The Constituent Assembly met for the first time on April 8 in the presence of the Bey, M. Seydoux (the French High Commissioner), and members of the Consular Corps. The Assembly unanimously elected M. Habib Bourguiba as its President, and M. Ben Ahmed Ben Salah (secretary-general of the U.G.T.T.) as First Vice-President.

On the following day M. Tahar Ben Ammar tendered his Government's resignation to the Bey, who on April 10 charged M. Bourguiba with the formation of a new Government, on the unanimous advice of the Bureau of the Constituent Assembly. M. Bourguiba accepted this mission and presented his Cabinet to the Bey on April 15, its membership being as follows :

M. Habib Bourguiba	Prime Minister, Foreign Affairs, and Defence.
*M. Mongi Slim .	Ministers of State in charge of
*M. Mohammed Masmoudi ..	Franco-Tunisian negotiations.
*M. Behi Ladgham	Deputy Premier.
M. Mehiri .	Interior.
M. Mestiri	Justice.
*M. Hedi Nouira ..	Finance.
*M. Ezzedine El-Abassi ..	Public Works.
M. Ferdjani Ben Hadj Ammar	Commerce and Industry.
M. Lamine Chabdi . .	Education.
M. Fillali .. .	Agriculture.
Dr. Materi .	Health.
M. Mahmoud Khiari .	Posts and Telegraphs.
M. André Barouch ..	Town Planning and Construction.
M. Chakroun .	Social Welfare.

* Member of previous Government.

M. Béchir Ben Yahmed was appointed State Secretary for Information, and M. Azouz Rabai State Secretary for Youth.

Of the 17 Ministers and State Secretaries, only one—Dr. Materi—was an Independent. All the other 16 belonged to the Néo-Destour, representing the party organization proper, the U.G.T.T., and the Union of Craftsmen and Traders.

Party representatives were the Premier himself (president of the Néo-Destour), M. Behi Ladgham (secretary-general), M. Mehiri (deputy secretary-general), and M. Rabai (leader of the youth movement), whilst MM Mongi Slim, Hedi Nouira, and Masmoudi also belonged to the party leadership Representatives of the U G.T.T. were M Fillali, M Khiari, and M. Chabdi, whilst M Abassi was closely connected with the U G T.T before he joined the Tahar Ben Ammar Cabinet. The Union of Craftsmen and Traders was represented by M Ferdjani Ben Hadj Ammar and M Barouch, the latter, like his prececessor as Minister of Town Planning and Construction (M. Albert Bessis), representing at the same time the Tunisian Jewish community All Ministers are members of the Constituent Assembly except M. Béchir Ben Yahmed, who, being under 30 years of age, is not yet eligible.

Members of the Tahar Ben Ammar Cabinet who retained their portfolios were M Hedi Nouira, M Ladgham, and M. Abassi. M Mongi Slim and M Masmoudi, who had been Ministers of State in the first Tahar Ben Ammar Government, and as such had been members of the Tunisian delegation which negotiated the Franco-Tunisian conventions of 1955, relinquished the portfolios of the Interior and of National Economy respectively which they had held in the second Tahar Ben Ammar Cabinet Of the other Ministers, M. Materi (58), the oldest member of the Government, had been Minister of State in the Chenik Cabinet; one of the founders of the Néo-Destour, of which he was president until 1938, he had left that party owing to a disagreement with M Bourguiba M. Béchir Ben Yahmed, the youngest member of the Government, was founder and director of the French-language weekly *l'Action*.

M. Djellouli Farès (Néo-Destour), Minister of Education in the second Ben Ammar Cabinet, was unanimously elected President of the Constituent Assembly on April 17, in succession to M. Bourguiba.

Constituent Assembly's Resolution on Tunisian Sovereignty.

The Constituent Assembly adopted on April 13 Article 1 of the new Tunisian Constitution, which read as follows:

"Tunisia is a free, independent, and sovereign State, Islamic in religion and Arabic in language. Sovereignty, which will be defined in the new Constitution, rests legally with the Tunisian people. The State assures freedom of religious belief and the protection of religious expression, in conformity with the spirit of the law."

It was commented in the French Press that this declaration implied the end of the absolute monarchy in Tunisia, and that it reserved a special place for the Mohammedan religion.

Franco-Tunisian Agreements on Public Order.

Two agreements on public order, amending the existing protocol on the subject, were concluded by M. Seydoux and the Tunisian Government during the latter months of 1955.

The first, signed at the beginning of October, aimed at strengthening the co-operation of the *caïds* with the local representatives of the French High Commissioner, who remained responsible for public order during the two-year period as provided in the 1955 conventions. The second agreement, announced on Dec. 8, provided for the formation of a new Tunisian police force in Tunis and an increase in the number of the auxiliary police forces at the Government's disposal in the rest of the country.

Franco-Tunisian Economic and Financial Agreements.

Three protocols dealing with the Franco-Tunisian Customs Union, the exchange system, and shipping were signed on Dec. 28, 1955, by M. Seydoux and M. Tahar Ben Ammar. The main provisions of the agreements, which had been drawn up as the result of negotiations between M. Hedi Nouira, the Finance Minister, and M. de Wailly, the French Inspector-General of Finance, were as follows:

Customs Agreement. (1) The same Customs duties and regulations would be in force in both countries, and could be changed only by mutual agreement wherever the changes proposed by one party affected the other's interests.

(2) No restrictions would be imposed on freedom of trade inside the Customs Union, except in the circumstances mentioned below

(3) Measures might be taken to prevent "dumping," if this practice seriously threatened the interests of one of the parties

(4) Either party might impose trade restrictions to protect morality, order, public health, animal health, or trademarks, or to ensure the application of regulations relating to the quality of goods, after consultation with the other, or without such consultation in cases of emergency.

(5) Any difficulties arising from the application of the agreements would be submitted to a mixed Franco-Tunisian commission, meeting alternately in Tunis and Paris, which would make recommendations to the two Governments.

Agreement on Exchange. This protocol defined the conditions in which French legislation on foreign exchange and foreign commerce would apply to Tunisia, and the responsibilities of the delegation of the French *Office des Changes* in Tunis

Agreement on Shipping. (1) Maritime transport between French and Tunisian ports would be carried only in ships flying the flag of either country.

(2) The French Government undertook to assist in the formation of a Tunisian merchant navy, and in the training of its officers.

Discovery of "Youssefist" Conspiracy.

The Néo-Destour congress, which met from Nov. 15-21, 1955, confirmed the expulsion of M. Salah Ben Youssef from the party; approved the Franco-Tunisian conventions, which he had denounced; re-elected M. Bourguiba as president; and elected M. Ladgham as secretary-general.

M. Salah Ben Youssef, however, who refused to recognize his expulsion or his removal from the post of secretary-general, had previously announced on Oct. 30 that he would form branches of the "general secretariat of the Néo-Destour." A number of clashes between "Bourguibists" and "Youssefists," in which several people were killed, occurred during the next three months. Following the Government's decision on Jan. 11, 1956, to refuse permission for the holding of a congress of "Youssefists," M. Salah Ben Youssef declared in a press statement on the same day that he would "wage war" on M. Bourguiba, whom he described as "the supreme traitor," and on the Tunisian Government, which he described as "that band of robbers and murderers."

The Tunisian Government and the French High Commissioner's Office jointly announced on Dec. 19 that a "dangerous association of malefactors" had been discovered, that 42 people had been arrested, and that a store of arms and ammunition had been seized. A Government spokesman stated on Jan. 31 that two suitcases containing arms and incriminating documents had been found on Dec. 16 during a search of the house of a prominent "Youssefist." The documents showed that a terrorist organization, branches of which were being set up all over Tunisia, existed to resist the application of the Franco-Tunisian conventions; that it was planned to murder M. Mongi Slim (Minister of the Interior) and 148 other leading members of the Néo-Destour; and that 200 armed commando groups were to be formed.

A warrant for M. Salah Ben Youssef's arrest on a charge of treasonable conspiracy was issued by the Tunisian Government on Jan. 28; however, when police arrived to search his villa in Tunis he had escaped, although a store of weapons and uniforms was found Of his followers, 115 were arrested between Jan. 28 and Feb. 1, and on Feb. 2 the Bey approved a decree setting up a special High Court, against whose verdicts there would be no appeal, to deal with crimes and conspiracies against the internal security of the State. M. Salah Ben Youssef arrived on Feb. 5 in Tripoli, and was granted asylum as a political refugee by the Libyan Government.

Renewal of Rebel Activities and Terrorist Acts. - Franco-Tunisian Counter-measures.

A revival of *fellagha* activities on an organized scale, in co-operation with the Algerian insurgents (who had made repeated raids into Tunisia since September), occurred during the second half of January, thus confirming the evidence supplied by the captured "Youssefist" documents that an armed rising was in preparation.

About 600 Tunisians and Algerians, organized in over 20 bands of varying sizes, were believed to be operating at the end of January, both on the Tunisian-Algerian frontier and in the interior, and in the Gafsa area alone 49 *fellaghas* were killed and 30 captured in six encounters during the period Jan. 1-25 Although some of the *fellagha* bands were believed to be mere brigands, others were known to be connected with the "Youssefist" movement; these included a band of about 100 men commanded by Tahar Lassoued, who had played a prominent part in the previous *fellagha* revolt against the French in 1954, and who called himself (in leaflets signed by him) "General Commandant of the National Tunisian Army of Liberation," and a band of about 50 men in the Mezzouna district led by Mosbah Ennifer, who had likewise fought in the previous *fellagha* revolt. During the French counter-operations Mosbah Ennifer and two other *fellagha* leaders were captured, and a fourth surrendered, on Jan. 25

In view of continued *fellagha* activities in Southern Tunisia during February and early March, French troops, several battalions strong and supported by artillery and aircraft, launched an offensive on March 10 in the Matmata Mountains, near Médenine, where a Berber tribe had recently joined the rebels. The French military authorities announced on March 23 that the rebels had lost about 100 killed and captured in a series of engagements during March 14-17, and that 86 more had been killed and 26 captured in further operations since March 20. Following another French encircling operation east of Gafsa, in which Tunisian mobile police forces also took part, further clashes with the rebels were reported during the first half of April in the mountains south of Tozeur and in the Gafsa area, in which over 20 *fellaghas* were stated to have been killed, whilst the French forces lost two killed and three wounded.

Terrorist acts against individual Frenchmen and Néo-Destour members also increased during February and March.

Some of the worst incidents were the throwing of a bomb into the European canteen of a mine at Redeyef, in which two French soldiers and an Italian miner were killed and 11 (including seven French soldiers) wounded, some of them seriously (Feb. 11); the murder of two French farmers near Medjez-El-Bab (March 7); the assassination of M. Hussein Bouzayane, secretary-general of the Néo-Destour federation at Gafsa and professor of Arabic Culture at the Grand Mosque in Tunis, who had been elected the previous day to the Constituent Assembly (March 26); the murder of three French civilians by *fellaghas* who stopped a number of motor-vehicles on the road from Sidi-Bou-Zid to Gafsa (April 3), and the murder of the wife and child of a local Néo-Destour leader at Moularès (April 9).

In order to support the police "in fighting urban terrorism and banditry in the countryside," the Government announced on March 6, after discussions with M. Seydoux, that "vigilance committees" were being formed in Tunis as well as in the towns of the interior. Earlier, on Feb. 15, it had been announced

that in view of the insufficient strength of the police in the capital a special night-watch committee had been recruited from 500 members of the Néo-Destour youth movement and Moslem scouts.

M. Mongi Slim (then Minister of the Interior), in a broadcast on March 28, strongly condemned the renewed terrorist activities; declared that the Government would take severe measures to suppress terrorism; and stated that no one who committed terrorist crimes after March 20 (the date of the French recognition of Tunisian independence) could hope to benefit from any amnesty or pardon that might be granted later on.

Speaking in the Constituent Assembly on April 13, both M. Bourguiba and M Mongi Slim rejected a proposal made by certain deputies from Southern Tunisia that the Government should appeal to the rebels to lay down their arms. The Ministers declared that persons committing terrorist acts would be punished without pity, whilst those who had joined the *fellagha* bands would be offered clemency if they returned to normal life within a week, after which repressive measures would be taken against everyone who continued to support the rebellion After the Ministers' statements the Constituent Assembly adopted a motion stressing the need for preserving order and restoring peace and asking the Government to take the necessary measures to assure speedily the return of general security, order, and protection by the State.

The Tunis Riots.

The murder of the two French farmers near Medjez-El-Bab on March 7 aroused strong feeling amongst the French community. After their funeral in Tunis on March 9, a crowd of about 700 or 800 French settlers, including many students, assaulted M. Seydoux, who had spoken at the ceremony, and stoned his car. They then marched through the city shouting anti-American and anti-Jewish slogans, sacked the U.S. Consulate-General and the U.S. Information Office, where they caused damage estimated at over $30,000, and attacked the offices of two nationalist newspapers before being dispersed by the police, who had to use tear-gas. During the attack on the offices of the Néo-Destour organ *Al Amal* one of the rioters was shot dead by two Tunisian members of the staff guarding the building, whereupon the mob stoned the building and attacked the two Tunisians, who were seriously injured.

A Tunisian Government spokesman strongly criticized the conduct of the Tunis police, who, he said, had made no attempt to interfere until the rioting had continued for three hours, and some of whom were alleged to have taken part in it. As a result of Tunisian demands for sanctions against certain police officers who had failed to transmit orders which would have prevented the riots the French High Commissioner announced on March 15 that four senior police officers had been relieved of their duties

Population Census.

The results of a census held in connexion with the preparation of electoral registers and the delimitation of constituencies were published on Feb. 27. They showed that the total population of Tunisia was 3,800,000, of whom 3,430,000 were Tunisians, and that the population of the city of Tunis was 680,000. At the previous census in 1946 the total population had been 3,231,000.—(Le Monde, Paris - Le Figaro, Paris - Times - New York Times) **(Prev. rep. Franco-Tunisian Conventions, 14408 C; 14289 A; Cabinet, 14427 A; Salah Ben Youssef, 14512 C.)**

A. NYASALAND. — Legislative Council Elections.

The first elections to be held in Nyasaland, for the five African and six non-African unofficial members of the Legislative Council, took place on March 15. The six non-Africans returned were all Europeans, the two Indian candidates being defeated, whilst three of the Africans returned were members of the Nyasaland African Congress, which advocates the withdrawal of Nyasaland from the Rhodesia and Nyasaland Federation.

A Bill providing for the implementation of the recommended changes in the constitution of the Legislative Council (see 14311 C), and for the appointment of a commission to draw up a voters' roll of non-Africans and divide Nyasaland into six constituencies, had been passed by the old Legislative Council on Sept. 6, 1955.—(Federal Information Department, Salisbury) **(Prev. rep. Nyasaland, 14311 C.)**

B. COUNCIL OF EUROPE. — Admission of Austria to Membership.

At a meeting of the Committee of Ministers of the Council of Europe held on April 16, the opening day of the eighth ordinary session of the Council's Consultative Assembly, Austria was formally admitted to membership of the Council after Dr. Figl, the Austrian Foreign Minister, had handed over the official documents embodying her decision to adhere. (Council of Europe, Strasbourg) **(Prev. rep. 14762 C.)**

C. UNITED KINGDOM.—Steel Industry. - Production Statistics. - Plant Expansion Schemes. - Denationalization of South Durham Steel and Iron Company. - Progress of Denationalization.

Production of steel and pig-iron in the first quarter of 1956 established new records, as shown by the detailed figures given below, with 1955 figures for comparison:

	1956		1955	
	Weekly Average Tons	Annual Rate Tons	Weekly Average Tons	Annual Rate Tons
Steel Ingots and Castings.				
January	405,200	21,069,000	380,600	19,789,000
February	417,800	21,724,000	394,200	20,498,000
March	425,800	22,141,000	394,900	20,536,000
First Quarter	416,400	21,651,000	390,300	20,295,000
Pig-Iron.				
January	260,700	13,558,000	236,400	12,292,000
February	263,300	13,692,000	241,700	12,567,000
March	262,000	13,624,000	240,700	12,516,000
First Quarter	262,100	13,630,000	239,700	12,463,000

Steel production in March was the highest recorded for any month.

Developments in recent months in connexion with the iron and steel industry are summarized below:

Plant Expansion. It was announced on Feb 8 that Bairds and Scottish Steel Ltd. would shortly begin work on a development scheme intended to increase the output of its Gartsherrie (Coatbridge) ironworks from 150,000 tons of pig-iron annually to 350,000 tons The project, expected to cost about £6,000,000, included two modern blast furnaces, new ore-stocking, sintering, and screening plants, and the doubling of the present number of coke ovens

On March 12 it was announced that the Iron and Steel Board had approved plans for the erection by the English Steel Corporation, at a cost of £15,000,000, of a new steelworks at Sheffield for the manufacture of very heavy castings and forgings, as well as of laminated and spiral springs for the automobile industry.

The chairman of the Steel Company of Wales (Mr. H Peake) stated on Feb. 15 that the second stage of the company's development plans, costing approximately £54,000,000, was expected to come into operation during 1956

Denationalization of Steel Undertakings. The second annual report of the Iron and Steel Holding and Realization Agency, covering the year ended Sept 30, 1955 and published on Jan 30, 1956, stated that during the year a further 15 steel undertakings had been sold for about £74,000,000. The number of undertakings sold was thus brought up to 28 and the sum realized to about £152,000,000, or almost exactly half the total of the net assets taken over by the Agency in 1953, plus the further investments made or contracted for by it since that year The excess over book values realized by the Agency's sales was about £4,000,000.

Details of sales by the Agency during the first quarter of 1956 are given below:

(*a*) The whole of the issued share and loan capital of the South Durham Steel and Iron Company, viz., 8,000,000 £1 Ordinary shares (offered at 27s 6d each) and £3,000,000 5½ per cent Debenture stock 1976-81 (offered at £97 per cent). Both offers were over-subscribed, and it was announced on Jan. 27 that about 25,400 applications had been received for a total of 8,500,000 Ordinary shares (including 900 applications from employees and former shareholders, who had been promised preferential treatment), and 2,370 applications for a total of about £5,500,000 Debenture stock (including 170 from former stockholders).

All preferential applications for Ordinary shares were accepted in full, as were applications from the general public for up to 10,000 shares, larger applications being accepted as to about 60 per cent Preferential applications for up to £10,000 Debenture stock were accepted in full, and larger ones as to about 60 per cent, public applications were accepted in full up to £2,000, and as to 40 per cent above.

(*b*) It was announced on Feb 22 that the Agency had sold the capital of the Patent Shaft and Axletree Company for £900,000 to Cammell, Laird and Co and the Metropolitan-Cammell Carriage and Wagon Co, which had taken 75 per cent and 25 per cent of the shares respectively. Prior to nationalization the Patent Shaft and Axletree Co was wholly owned by the Metropolitan-Cammell Co., which received £892,500 compensation when the Patent Shaft Co. was taken over.

(*c*) The sale of the entire share and loan capital of the Briton Ferry Steel Company for £2,300,000 to Duport Ltd., the Staffordshire engineers, was announced on April 7. The compensation paid to the Briton Ferry Co's shareholders on nationalization had amounted to £1,630,996.

(*d*) On Feb. 16 it was announced that Tube Investments Ltd. had purchased from the Agency the whole of the issued share capital of the Park Gate Iron and Steel Company, the purchase price of £5,600,000 including repayment of a loan of £3,750,000 received by the Park Gate Co. from the Agency.

Sir Ernest Lever, president of the British Iron and Steel Federation, stated on March 20 that about 1,000,000 tons more steel were expected to be available for the home market in 1956 than in 1955, the increase being principally in steel sheets and tinplate. It was estimated that by 1958 steel output would be almost double the output in 1945.—(Times - Daily Telegraph - Financial Times) **(Prev. rep. 14648 A; 14206 B.)**

A. FRANCE. — M. Guy Mollet's Criticisms of Western Policy. - Interview with U.S. Magazine.

M. Guy Mollet, the French Prime Minister, made an important statement on the French Government's views on international policy in an interview with the American weekly *U.S. News and World Report*. The most important point he stressed was that in the French Government's view first priority in the discussions with the Soviet Union should not be given to German reunification but to disarmament, which, if successful, would then create the necessary atmosphere for a solution of the German question. He also criticized what he called the "erroneous methods" pursued by the Western Powers, especially the U.S.A., in the Far East with regard to the distribution of aid to under-developed countries, and the U.S. attitude towards the Algerian problem. The following is a summary of the principal points of the interview, translated from the full text published in *Le Monde* on April 4.

After saying that he could not at present answer the question whether there had been a real change of policy in the Soviet Union, or just a change in tactics, M Mollet declared that it was important to bear in mind that Russia was "a country like others, with both internal problems and problems of foreign policy": that she had to think of her internal requirements, of China, and of the satellite countries, and that, through the action of the Western Powers, what was merely strategy today might become a policy tomorrow Replying to the further question as to whether a real peace was possible with the present Soviet Government, or whether he thought that the same struggle had to be expected as before but only in new forms, M. Mollet declared "One should not start by accepting the idea that the existence of governmental systems which do not suit us must lead to war—otherwise the whole world would always find a justification for war"

In reply to the question whether he regarded the threat of Soviet military aggression as past, M Mollet said . "I have never believed in the existence of this menace, and I have not changed my views I do not believe that a world war would be in Russia's interest and that the Russians want it, because their technicians, strategists, and economists could not consider such a war without fear. They might win the first battles but they would know well that there was a good chance of their losing the war. Moreover, their people have gone through hard trials during the last war. Whether Russian expansionist tendencies are still the same we do not know But we do know that if our attitude is positive, Russia's policy might undergo an evolution."

When asked whether he meant that the West would no longer need to maintain such large armed forces if the Russians did not intend to start a war, M. Mollet replied : "Certainly not. It is not a question of reducing our forces unilaterally if Russia does not reduce hers . . Russia, as I said before, cannot envisage an aggressive war because at present her strategists and economists might consider that she stands a risk of losing it. If we, however, relax in our defences they could envisage war. Therefore disarmament must be either universal or not at all"

He continued . "The basic principles of our foreign policy remain unchanged. We continue to be determined to defend liberty wherever it is menaced, to make our contribution to that defence, and to hope to obtain the co-operation of others in this defence But we try to induce our associates of the Atlantic world to change their direction and to organize this defence in a better way. The way in which the Western Powers have acted during these last few years has not been a particularly happy one. . .

"At the last Geneva conference in November the four Foreign Ministers limited the discussions between East and West to three questions, and said that numbers one and two were the unification of Germany and European security, whilst they gave disarmament third place. Our Government believes that this way of approaching the question was wrong. This is not only a Socialist view but a view which should be shared by every Government concerned with European unity. . . We do not know whether the Russians want Germany's reunification. It is even possible that they do not want it, but one thing is certain . if there is a chance that the Russians want to see Germany unified, this chance cannot really be envisaged except within the framework of general world-wide disarmament It is difficult to see Germany's unification in a period of rearmament, especially in the heart of Europe, which presents itself to the Russians—in spite of very important and concrete security guarantees offered by the Western Powers—as a Germany unified, rearmed, and entirely integrated in the Atlantic Pact. It is certain that if we take the trouble of putting ourselves in the place of the Russians such a solution is hardly conceivable for them On the other hand, if we begin to solve the question of general disarmament, the problem of European security becomes much easier . . . and, within the framework of security, Germany's reunification, in turn, will be much easier to realize."

Asked whether he thought that the conclusion of an agreement on general disarmament would entail Germany ceasing to be a member of NATO, M. Mollet answered : "There is no question of demanding that Germany should cease to belong to a security organization. Under the Franco-British disarmament plan each country would continue during the first stage to adhere to its present alliances—the Western countries to NATO and the Eastern countries to the Warsaw Pact—but the armed forces and armaments of each country would be restricted to an agreed level. Once such an agreement has been concluded, the number of troops provided for Germany would become totally different. . . In that event international negotiations might well induce Russia to accept free elections in Germany, and in the course of such negotiations Germany's status *vis-a-vis* the security organizations could be modified. I do not say that this implies that Germany would renounce her membership of NATO, but it would become possible to discuss the matter."

Replying to the question how he conceived the future status of a unified Germany within Europe, and whether Germany could then be a partner in a European Union, M Mollet declared : "Certainly ; within a European Union there is room for a unified Germany, just as there is for a German federal army. But one thing is clear, namely, that it will be much easier to integrate Germany, whether unified or not, in Europe—economically, socially, and perhaps even politically—if one looks at the matter within the framework of disarmament. If it is a question of having a completely rearmed Germany, its integration in Europe raises such problems that the possibilities of German reunification are thereby considerably diminished."

In answer to questions about the future of NATO, the French Prime Minister declared that its continued existence was "a necessity," adding . "I have spoken of the need to conceive a new way of approaching the question of the relations between East and West. This new way is only thinkable if there exists a solid and strong West One can only negotiate if one is strong" As to the question whether NATO should remain principally a military organization or whether it could be developed into an economic and political organization, M. Mollet said . "I have the firm hope that a decision will be taken to carry out Article 2 of the Atlantic Pact, and that we will make a start in setting up an economic community. To think of a political community might go too far ; we cannot go beyond the economic and social spheres, but in these matters we can go pretty far." Dealing with the question how long the American troops should stay in Europe, M Mollet replied · "I hope that they will stay as long as possible. If, in 1914 or in 1939, only 10,000 American soldiers had been on the Rhine—even with their hands in their pockets and without arms—neither William II nor Hitler would have started a war."

Asked about his opinion on the U.S. approach to disarmament, especially the U S. view that before discussing the reduction of conventional forces it was necessary to put into effect President Eisenhower's "open sky" plan and other controls, M. Mollet declared · "The Russians have different ideas, and that is why the Franco-British plan tries to bring about a synthesis of all these propositions. It is not certain that the Russians will reject an overall plan of this kind, but what is certain is that they will continue to speak of disarmament as the first necessity. The scepticism of our American friends, however, is such that they just say 'no'. Each time the U S A. says 'no' we lose a battle for world opinion. People then think 'Well, it is Russia after all which wants peace, and the U.S A. which does not.' You in the United States suffer much less from this than we do in France, Italy, and elsewhere in Europe In Europe the essence of all Communist propaganda—which has nothing in common with real Communism but is propaganda based on a false pacifism—is that it is only the Communists who really want peace. They pretend to be pacifists and it is on this assumption that people vote for them."

After saying that it was a "psychological error" to say—as the Americans did—that control was impossible, and at the same time to propose to throw open the entire world to aerial reconnaissance, M. Mollet emphatically denied that M. Pineau's recent statement could be interpreted as meaning that France wished to become a "connecting link" between East and West If that were the case, M. Mollet said, it would "presuppose that France has ceased to belong to the West. The correct position is that within the Western world, and amongst her friends and allies, France hopes to have new tactics accepted; but to say that France wishes to become a 'bridge' between East and West is certainly completely wrong."

After declaring that during their forthcoming visit to Moscow in May he and M. Pineau would not only discuss specific Franco-Soviet problems but would also "try to sound Russia about her true intentions," M Mollet reiterated that "no-one can put in doubt our fidelity to the West." Replying to a further question about the meaning of M. Pineau's remarks on the need for a change in Western policy, M. Mollet declared : "What he wanted to say is what I have just said. We have all committed an error of method. I have quoted two examples—Germany and disarmament—and I will quote a third—the Far East. If one compares the attitude of the Russians to ours, it certainly does not mean any rupture of the Atlantic Alliance if we say that the tactics followed by the Western Powers have not been good and continue not to be good. In fact, perhaps it will reinforce the common Western front if we make an effort to prevent the West from committing further errors.

"If one works out what the Western Powers have done to aid the under-developed countries, one arrives at gigantic, fantastic sums. In contrast, what has Russia promised ?—one hospital. But if you go into it you will see that M. Khrushchov's journey and his promise of one hospital have made a resounding impression in India and the whole Far East. People say 'This country is truly generous in being willing to share its last morsel of bread with us'—a phrase which comes from M. Khrushchov himself. We in the West, however, are considered to be terrible colonialists in spite of everything we have distributed. Why ? Because we do not know how to make known what we are doing, and because we do it badly, because our Anglo-Saxon friends, and particularly the Americans, do not know the old Latin proverb, 'the manner of giving is worth more than what one

gives.' And in this way they have brought it about that in those areas, as well as in the rest of the world, they have made themselves detested each time they have given a present."

Dealing with the reasons for this antagonism, M. Mollet said . " This had nothing to do with the attitude of the State Department, but was a result of the fact that the underlings distributed the aid in a high-handed way by accompanying it with good advice. Each and every one of them was more or less a preacher and said more or less what should be done, like a big brother. One cannot, however, make friends in this manner. . . . The second point is that it is better to give less without demanding anything in exchange, than to give much if at the same time one demands a counterpart, whether big or small. If you attach political or commercial conditions, you are lost and have given nothing.

" Moreover, you are doing this at a time when Russia and the Eastern bloc are on the point of launching a gigantic effort, and when the new phase of the conflict between them and us is becoming an economic one. During that phase the Russians will try to gain the Far East, and then the Middle East, and then Africa, by generous offers, completely disinterested—that is, at least, what they say—whilst each one of us in the West, and you particularly, continues to be led astray in isolation, often even competing with each other. To show you what I mean you need only look at what is happening in the Arab world, where each one of us, anxious to defend his oil, is about to set fire to the entire Middle East. The Socialist-directed French Government does not have the slightest intention of breaking its alliance with Britain and America, but it intends to tell them both that if we continue in this way we shall lose the game "

Asked how he thought aid to the under-developed countries should be given, M. Mollet replied · " The first condition is that it should not be distributed unilaterally, but in common. A good method would be to do it through the intermediary of the United Nations Why does one not apply the famous Point Four, or, better, why does one apply it so wrongly ? "

Answering a question about the reasons for widespread French criticism of the American attitude towards the Algerian problem in recent weeks, M. Mollet declared that certain Americans " understand nothing about the North African problem." He continued : " There is a tendency in American public opinion to condemn systematically and in an over-simplified way colonialism with a capital C. The French, knowing this, . . . are very irritated because they know that what is said of French colonialism is quite incorrect and grotesque. More or less every Frenchman has in Algeria a parent, a cousin, or a friend who is a small *fonctionnaire*, worker, employee, doctor, or chemist. He knows very well that his cousin is not a ' colonialist '. Therefore when he hears the Americans speak as if there were real slavery he becomes wrathful about the Americans. Moreover, it should be remembered that a certain number of subordinate American officials in France do not behave very well. . . ."

Replying to the question of how much of the responsibility for the present difficulties in French North Africa was due to the French and how much to U.S. or Egyptian policy, M. Mollet declared : " Responsibility falls essentially on France—not the France of today but that of the last 200 years . . . . but we no longer have time to look for those responsible. The time has come when, faced with a definite situation, we must see how to solve the problem. And it is for that reason that I have severely criticized our allies. It is not enough to say that it is above all France's fault and then to declare . ' France should extricate herself ' France will not be able to extricate herself alone, and her failure to do so would not only have repercussions for France. . . . If our allies start by saying that they are faithful to the Atlantic Pact, which explicitly covers Algeria, and that Algeria's security is of interest to them in the same way as it is of interest to France, then things would not go so badly."

After expressing appreciation of a statement made by the U S. Ambassador in Paris (Mr. Dillon) on March 20, in which he welcomed the new liberal French policy in Algeria, the Prime Minister declared, however, that such a statement alone was not sufficient unless certain very clear kinds of aid were given For instance, it was extremely irritating that if urgent French orders were placed for goods of a military character such as helicopters, which would considerably help in overcoming the difficulties, the first deliveries did not arrive until a year later.

In conclusion, M. Mollet denied that Communist influence in Algeria was considerable. Although Communists had tried to gain influence over the guerrillas, they had been expelled from almost all their positions because the Moslems did not want to have anything to do with them. On the other hand, it was clear that the organizational methods of the rebels were derived from Communist tactics, such as the political commissars attached to the guerrillas. Military measures, M. Mollet declared in reply to further questions, were indispensable to restore order, but they were not enough. They could restore confidence amongst the Moslem population against terrorization and intimidation by the guerrillas, but, he added " We must show the Moslem population not only the determination of France not to allow herself to be expelled from Algeria, but also the wish of France to change the former state of affairs. We must do two things at the same time—proceed with immediate reforms, and restore order."

M. Mollet's statement that agreement with the Soviet Union on disarmament should have priority over German reunification met with strong criticism in Western Germany, an official comment being issued by the Federal Foreign Ministry on April 4.

The statement recalled that previously there had been complete agreement between the German Federal Government, France, Britain, and the U.S.A. that there was no prospect of disarmament until the way had been opened up by German reunification and a satisfactory general security system. " The head of the French Government," the statement went on, " now describes the common policy of the three Western Powers as wrong, and says that disarmament must precede the solution of the problem of German reunification This seems to indicate a certain readiness to accept the Russian view on the order in which these questions should be settled. The Federal Government will not allow any doubts to arise about the fact that it does not share this view. No German Government will seriously discuss proposals which seek to bring about the relaxation of tension on the basis of a recognition of the division of Germany, or the tacit acceptance of such a division, even temporarily. The Federal Government believes that any other attitude on its part would be dishonest and therefore no contribution to peace Agreement on disarmament can only make sense and be effective if the actual causes of tension are removed Only thus can the political and psychological conditions be created for the renunciation of the arms race by all concerned "

Stressing that neither disarmament nor a relaxation of tension could be brought about " at the expense of the most elementary freedom of the German people," the statement took particular exception to M Mollet's view that Germany, " whether united or not," must be integrated into Europe It pointed out that the " tireless efforts of the Federal Government to create a United Europe " were " based on the understanding that the place taken today by Federal Germany would tomorrow be occupied by a united Germany "

It was announced in Paris on March 2 that M. Mollet and M. Pineau had accepted a Soviet invitation to visit Moscow and would leave for the Soviet Union on May 14.—(Le Monde, Paris - U.S. News and World Report - Frankfurter Allgemeine Zeitung) **(Prev. rep. M. Mollet, 14681 A ; M. Pineau, 14752 A.)**

A. UNITED STATES. — Presidential Election System. - Proposed Reforms rejected by Senate.

A number of proposed constitutional reforms designed to revise the electoral college system by which the American Presidents and Vice-Presidents are elected, in order to make the electoral vote more accurately reflect the popular vote, were rejected by the Senate on March 27.

At present, after the popular vote has taken place, the President and Vice-President are formally elected by an electoral college composed of members from each of the 48 States, each State having as many electoral votes as it has members in the U S. Senate and House of Representatives ; the number of electoral votes consequently varies from three in the least populous States, such as Nevada and Wyoming, to 45 in New York. The candidate receiving the majority of popular votes in each State automatically receives all the electoral college votes from that State, even though his popular majority may have been only one.

The various amendments designed to alter this system, their principal sponsors, and the voting, were as follows :

(1) The electoral college votes of each State should be apportioned to the three top candidates for President in a ratio based on their share of the popular vote. Alternatively, State legislatures should have the option of having the members of the electoral college from their State selected in the same way as Senators and Representatives (i.e. two elected by State-wide popular vote like Senators, and the remainder on the basis of popular majorities in each Congressional district like Representatives.) Proposed by Senator Price Daniel (Dem , Texas) and approved by 48 votes to 37—i.e by less than the required two-thirds majority.

(2) The electoral college system should be abolished. Presidential nominees should be selected in a nation-wide primary, and the President then elected by nation-wide popular vote. Proposed by Senator William Langer (Rep., North Dakota) and defeated by 69 votes to 13. An alternative proposal, providing for the direct popular election of Presidents, but without the national primary, was put forward by Senator Herbert H Lehman (Dem., New York), but was also defeated by 66 votes to 17.

(3) Each State should have two electoral votes on the basis of its popular majority in the Presidential elections, whilst the remaining 435 national electoral votes should be divided in proportion to the nation-wide popular vote. Proposed by Senator Hubert H Humphrey (Dem., Minnesota) rejected by voice vote

(4) Senator Daniel's proposal should be amended so as to make the electoral vote of each State depend on the percentage of its eligible voters who went to the polls in the previous election. Proposed by Senator Clifford Case (Rep., New Jersey) , defeated by 66 votes to 20.

In order to be adopted, a constitutional amendment must be approved by a two-thirds majority in each House of Congress and then be ratified by three-quarters of the States.
(New York Times) **(Prev. rep. Previous Constitutional Amendment, 13606 E.)**

B. POLAND - EGYPT. — Establishment of Embassies.

It was announced in Warsaw and Cairo during March that the Polish and Egyptian Governments, " taking into consideration the successfully developing co-operation and friendship between the two countries," had decided to raise their respective diplomatic missions in Cairo and Warsaw to the status of Embassies. (Polish Embassy, London)

APRIL 21—28, 1956

A. SOVIET UNION - EASTERN EUROPE. — M. Khrushchev's Attack on Marshal Stalin and Stalinist Policy. - Reactions in Soviet Union and Communist Countries. - Pro-Stalin Demonstrations in Georgia. - Release of Political Prisoners in Soviet Union, Poland, Bulgaria, Hungary, and Czechoslovakia. - Posthumous Rehabilitation of Bela Kun, Kostov, Rajk, and other Executed Communists. - M. Yugov succeeds M. Chervenkov as Prime Minister of Bulgaria. - Dismissal of Polish Security Chiefs and Czechoslovak Defence Minister.

At a secret session of the Soviet Communist Party congress held on Feb. 25, M. Khrushchev presented a lengthy report strongly attacking many aspects of the policy of the late Marshal Stalin. Although the report was not published, its main features were gradually revealed during March in the speeches of foreign Communist leaders who had attended the congress, and in articles published in the Soviet and foreign Communist Press. These made it clear that Stalin had been accused, *inter alia*, of abusing his powers as party leader to make himself supreme, of permitting the execution or imprisonment on false charges of loyal Communists who had opposed him; of mistakes in agricultural policy; of failure to prepare for the German invasion; of blunders in strategy; and of responsibility for the break with Yugoslavia in 1948.

The fullest summary of M. Khrushchev's report was given in an article by M. Jerzy Morawski, one of the secretaries of the Polish United Workers' Party, which appeared on March 27 in the Polish Communist newspaper *Trybuna Ludu*.

M. Morawski stated that the "cult of Stalin" had originated during the period after Lenin's death, when Stalin had led the struggle against the "distortions of Leninism" by Trotsky and Bukharin, and that this "cult" had been further strengthened by wartime circumstances. Stalin had, however, abused the prestige and popularity he had gained by gradually abolishing collective leadership inside the Communist Party, and by using repressive measures against his opponents and later against "everyone who did not share his views" During the war (M. Morawski continued) "Stalin's contribution was intertwined with grievous errors which cost many lives. These painful losses were due to the fact that the danger of Nazi invasion was not detected in time, that the necessary precautions were neglected, and that during the war a number of operations were carried out on Stalin's personal orders contrary to the opinion of military experts" Owing to the "weakening of control" over the various organs of government, the security police "became independent of the party authorities and were used to consolidate the personal power of Stalin. . . Recourse was had to *provocateurs*, evidence was forged to produce false accusations, and methods of investigation were abused to bring about the sentencing of the accused. As a result, many honest people were sent to penal camps or shot" As examples of the use of such methods, M. Morawski referred to the dissolution of the Polish Communist Party in 1938 (see below), the "Leningrad case" (see 13978 D), and the "doctors' plot" (see 12869 A). All these cases, as well as the break with Yugoslavia, had arisen out of "the erroneous and anti-Leninist theory, evolved by Stalin, that in the period of the construction of Socialism the class struggle was becoming more intense."

In the Soviet Press the attack on Stalin was developed by gradual stages. The Moscow papers ignored the third anniversary of his death on March 5, and prominence was given to attacks on the "cult of the individual." The first article attacking Stalin by name, however, did not appear until March 28, when *Pravda* published an editorial entitled: "Why the cult of the individual is alien to the spirit of Marxism-Leninism." This article was reprinted in full in all Moscow newspapers and the leading provincial papers.

After declaring that the condemnation of the "cult of the individual" by the party congress had "met with the unanimous approval of the entire party and of all the Soviet people," *Pravda* continued. "The cult of the individual signifies an inordinate exaltation of individuals, attributing to them supernatural powers and qualities, making them almost miracle-workers, and worshipping them. Such incorrect conceptions of man, which are alien to the spirit of Marxism-Leninism, and particularly concerning Stalin, were cultivated here over many years." The article paid a high tribute to Stalin's contribution during the revolution and the civil war, the industrialization of the country, and the collectivization of agriculture, but added: "These great successes in building a new society . . . were incorrectly attributed to the merits of one man—Stalin—and explained by some special merits as a leader inherent in him Far from cutting short the exaltations and praises addressed to him, Stalin—not possessing personal modesty—supported and encouraged them in every way . . . sometimes even resorting to self-glorification. . ."

The *Pravda* article continued: "Stalin's disregard of the principle of collective leadership, and the frequent decisions taken by him personally, led to the distortion of party principles and party democracy, to the violation of revolutionary law, and to repression. . . . The cult of the individual helped to spread methods of arbitrary adminstration detrimental to party leadership and economic management, and instilled contempt and disregard for initiative from below. Thus, serious mistakes were made in the direction of agriculture, which made it backward in many important branches . . .

"The cult of the individual has also done much harm in the ideological sphere. . . . It was considered that only one man—Stalin—could develop and advance theory or say anything original and new, while all others must popularize his thoughts and set out his formulations. . . . Many of our historical, and especially wartime films, works of literature, and paintings are dedicated to the exaltation and glorification of Stalin . Whilst paying tribute to the services of Stalin, and soberly assessing the great contribution which he made to the cause of the revolution and to the building of socialism, the party has resolutely raised the question of eliminating the Stalin cult so as fully to establish the Leninist principles and standards of party life and State activities. . . ."

Inside the Soviet Communist Party and the Young Communist League a series of meetings were held after the congress at which the Central Committee's views on the "Stalin question" were expounded and discussed. On March 19 it was officially announced that similar meetings were also being held in factories, offices, and schools, and that M. Mikoyan and M. Pervukhin (both Deputy Premiers and members of the Presidium of the Communist Party) had addressed meetings in Moscow factories. Over 6,000 such meetings were reported to have taken place in Moscow alone by the end of March, the speakers including M. Molotov and other members of the Soviet Government.

Pravda reported on April 5 that at party meetings Communists were "criticizing those who had not abandoned their bureaucratic methods of work, exposed shortcomings, and charted concrete ways and means of quickly eliminating them" It went on to complain, however, that "some rotten elements are trying to make use of criticism and self-criticism for all sorts of slanderous inventions and anti-party assertions," and that certain party officials were "tolerating impermissible criticism of the party line under the guise of condemning one-man rule." The article mentioned by name a number of persons who had made "libellous" and "demagogic" statements at party meetings, including M. Yaroshenko (an economist whose views had been attacked by Stalin in his *Economic Problems of Socialism*), and gave warning that "the party cannot permit freedom of discussion to be interpreted as freedom to spread views alien to Marxism and Leninism."

Reactions in Georgia. - Pro-Stalinist Demonstrations by Tiflis University Students.

In Georgia (Stalin's native republic) the new anti-Stalinist policy met with considerable opposition, particularly among university students, and led to a number of demonstrations in which clashes occurred between students and the police. After the authorities of the Stalin University at Tiflis had forbidden students to celebrate the anniversary of Stalin's death on March 5, the students staged a series of protest meetings at Stalin's statue with the result that official permission was given for the holding of demonstrations on March 9—the anniversary of Stalin's funeral. The Georgian Communist newspaper *Zarya Vostoka*, which had ignored the anniversary of Stalin's death, published on March 9 a leading article praising his achievements.

The Rector of Tiflis University (M. Kupradze) subsequently told a Reuters correspondent that "provocateurs" had exploited pro-Stalinist feelings to "disrupt order in the city" and to give utterance to "nationalistic slogans." Whilst admitting that there had been some casualties, he denied that any students had been killed. He attributed the disorders to "people without occupation," the remains of "broken classes such as former kulaks," and perhaps the remnants of political parties which had not existed "for a very long time," and suggested that some of them were "embittered by the repressions of 1937," when "Georgia had suffered more than any other republic."

It was announced on March 17 that 15,000 party propagandists had been sent to Georgia to explain the new policy, whilst on March 19-20 a conference of the Georgian Communist Party was held in Tiflis at which speakers strongly criticized indiscipline among students and denounced "survivals of bourgeois nationalism." *Zarya Vostoka* reported on March 24 that the secretary of the Communist Party organization at Tiflis University had been dismissed.

Release and Rehabilitation of Victims of Purges.

The Communist Party's denunciation of the repressive measures of the Stalin regime was followed by the release of a number of persons imprisoned during the purges of the 1930's, and by the posthumous rehabilitation of a number of others who had been executed. Among those released were M. Bubnov, a former Commissar for Education and member of the Politburo, who had been imprisoned in 1937, and M. Kosarev, formerly first secretary of the Young Communist League.

The journal *Problems of History*, in an article published on April 13, rehabilitated Marshals Blucher and Yegorov and Generals Gamarnik, Antonov-Ovseyenko, Bubnov, Kamenev, Kedrov, Rukhimovich, and Unglicht, whose names, it said, had been "ignored in recent years while the cult of the

individual flourished, but who did much to strengthen the Red Army." Marshal Blucher, formerly C-in-C. in the Far East, and Marshal Yegorov, formerly a Deputy Commissar for Defence, both disappeared in about 1938, whilst General Gamarnik, also a Deputy Commissar for Defence, committed suicide in 1937 to avoid arrest as an accomplice of Marshal Tukhachevsky, who was shot shortly afterwards. General Antonov-Ovseyenko had already been rehabilitated by M. Mikoyan at the party congress (see 14745 A).

One of the first victims of the " purges " to be rehabilitated was Bela Kun, the leader of the Hungarian Communist Government of 1919. After the suppression of the Hungarian revolution he settled in Moscow as an official of the Comintern, and was believed to have been shot in 1937 as a Trotskyist. In November 1955, however, M. Rakosi (first secretary of the Hungarian Workers' Party, and a former colleague of Bela Kun) paid tribute to him in an article published in *Problems of History*, whilst on Feb. 12, 1956, articles commemorating the 70th anniversary of his birth were published in *Pravda* and in the Hungarian Communist newspaper *Szabad Nep*. It was subsequently announced in *Szabad Nep* that recent research had established Bela Kun's innocence of the charges brought against him.

Revision of Soviet Penal Code.

Details of the new Soviet Penal Code, the forthcoming publication of which had been announced by President Voroshilov at the party congress, were given in the legal journal *The State and Soviet Law* on Feb. 25 It stated that offences would henceforth be divided into five categories: offences against the security of the State and against peace, offences against public property and the Socialist economy, offences against the administration of justice, offences against individuals, and offences against military law. Spies and traitors would remain liable to severe penalties, but the death penalty would be applied only in exceptional cases. Other penalties would be deprivation of liberty for a maximum period of 10 years, " re-education through labour," deprivation of civil rights, *interdiction de séjour*, fines, and public reproof. The new Penal Code recognized the principle that an accused person would be considered innocent until he had been proved guilty.

Position of the Jewish Community.

Together with these indications of the adoption of a more liberal policy, some evidence appeared that the anti-Zionist and anti-Jewish policy pursued by Stalin in his last years was being abandoned. On April 16 M. Molotov and M. Mikoyan attended the Israel Independence Day celebrations at the Israeli Embassy in Moscow—the first occasion on which Soviet leaders had attended such a function. It was reported on April 15 that about 300 Soviet Jews had been allowed to join their families in Israel during the past two years; that a number of stateless Jews living in the U.S.S.R. had also been allowed to leave the country; that M. Lyubimov, a well-known Jewish singer, had been released from a labour camp and had given song recitals in Moscow; and that permission had been granted for the reprinting of a Hebrew prayer-book. *Problems of History*, in an article published on April 13, emphasized that Lenin had condemned anti-semitism, and admitted that his policy on the national question had been " reflected in our literature only partially and one-sidedly."

In contrast to these developments, two Jews were sentenced in Moscow on Feb. 16 to five and three years' imprisonment respectively for possessing and distributing Zionist literature, whilst in March over 20 Jews were sentenced to terms of imprisonment ranging from three to 10 years on similar charges At the second trial the accused, who pleaded " not guilty," were defended by leading Moscow lawyers, and were reported to have been given full opportunities to justify their actions.

The New York *Daily Worker* (the official organ of the U S Communist Party) stated on April 14 that many Soviet Jewish writers had been executed in the late 1940's and that Jewish culture in the U.S S R. had been practically wiped out. It expressed " strong dissatisfaction that the Soviet leaders have not offered any explanation."

Repercussions on Soviet Cultural and Scientific Life. - Resignation of Professor Lysenko. - Posthumous Rehabilitation of Dr. Vavilov.

The new " line " produced profound repercussions in many fields of Soviet cultural life, notably in historical studies, art, and science, details of which are given below.

Historical Research. *Party Life*, the organ of the Central Committee of the Soviet Communist Party, criticized on March 13 the former policy whereby many historical documents had been classified as secret, and announced that the archives of the Ministry of the Interior (M.V D.), the Foreign Ministry, and the Marx-Engels-Lenin-Stalin Institute (subsequently renamed the Institute of Marxism-Leninism) would be thrown open to *bona fide* research workers, and that all secret files would be re-examined and " unreasonably secret documents " declassified In its article of April 13 quoted above, *Problems of History* called for a fundamental re-assessment of the history of the Russian revolutionary movement both before and since 1917, and for the publication of Lenin's unpublished writings and of a new biography of Lenin " free from the imprint of the Stalin cult." This cult, it declared, had led to " the deliberate distortion of historical facts "; in particular, the importance of Stalin's role in the civil war had been exaggerated, and he had been given the sole credit for the defeat of the Nazi invasion. The article also paid tribute to a number of Soviet historians whose works had been " slandered and banned " in recent years.

Art. M Gerasimov, one of the leading painters in the U.S.S.R., wrote in the magazine *Soviet Culture* (March 27) that the " Stalin cult " had resulted in the multiplication of " pompous pictures bearing the imprint of machine production," and had led to similar results in the fields of literature, the theatre, and the cinema. A delegation of U.S churchmen which was visiting the Soviet Union at the time reported that all portraits of Stalin had been removed from the Tretyakov Gallery, the principal art gallery in Moscow.

Science. Professor Trofim Lysenko, the well-known geneticist, resigned his post as president of the Academy of Agricultural Sciences on April 9, and was succeeded in that post by M. Pavel Lobanov, hitherto a Deputy Premier; M. Matskevich succeeded M. Lobanov as Deputy Premier, whilst retaining the post of Minister of Agriculture. It was officially stated that Professor Lysenko had been released from his administrative duties to enable him to devote more time to research

The Academy of Sciences had previously ordered on April 2 the re-publication of the works of the late Dr. N. I. Vavilov, the principal opponent of Professor Lysenko's theories. Professor Nesmeyanov, president of the Academy of Sciences, stated on April 12 that Professor Lysenko's views were still generally accepted, and that Dr. Vavilov's works were being re-published because he was undoubtedly one of the Soviet Union's greatest botanists. He added that in genetics, as in other sciences, Soviet scientists believed that the development of various schools of thought should be possible, provided they were really scientific

[Professor Lysenko succeeded Dr Vavilov in 1938 as president of the Soviet Academy of Agricultural Science, and subsequently became the virtual " dictator " of Soviet biological and genetical studies, his views on these subjects being officially approved by the Stalinist regime A bitter opponent of the Mendelian theory—of which Dr. Vavilov had been a leading exponent—Lysenko propagated the view that new varieties of wheat and vegetables could be evolved by climatic, nutritional, and other environmental conditions, and that the changes thereby produced could be transmitted to subsequent plant generations. This view, though strongly opposed by many eminent Soviet and foreign scientists, was dogmatically upheld by Professor Lysenko, who denounced opponents of his scientific theories as " reactionaries " and " idealists " After Stalin's death, however, leading Soviet cultural and scientific magazines had on several occasions denounced the " monopoly " of genetical and biological studies previously exercised by Lysenko, and had increasingly criticized his theories. Dr Vavilov disappeared during the war and was believed to have died in a Siberian labour camp in 1942. The dismissal of Dr Vavilov and other prominent scientists for refusing to support Professor Lysenko's theories had been strongly criticized abroad, and led Sir Henry Dale, president of the British Royal Society from 1940-45, to resign his honorary membership of the Soviet Academy of Sciences.—See 9703 A, 9487 B.]

Repercussions in Other Communist Countries.

The " revaluation " of Stalin led to a number of far-reaching political consequences in the other Communist countries, including the resignation of the Bulgarian Prime Minister, M. Chervenkov; the rehabilitation of those executed as a result of the Rajk trial in Hungary and the Kostov trial in Bulgaria; and the release of large numbers of political prisoners in Poland, Bulgaria, Hungary, and Czechoslovakia. These developments are described below.

Reactions in Eastern Germany. - Herr Ulbricht's Attack on Stalin.

The first attack on Stalin by a non-Russian Communist leader was made by Herr Ulbricht, the East German Vice-Premier, who had lived in the Soviet Union as a refugee throughout the Nazi regime. In an article in *Neues Deutschland* on March 4 he declared that Stalin, despite his services in the building of Socialism, had done " severe damage to the Soviet State and the Soviet Communist Party " by placing himself above the party, and that he could not be considered " a classical Marxist author." Herr Ulbricht elaborated these statements in a speech on March 17.

During Stalin's later years, he said, meetings of the Soviet Central Committee and the Politburo had become rarer and wrong decisions more numerous. As a result of Stalin's theory that the class struggle increased in intensity during the building of Socialism, the security police were turned during 1936-38 against leading Communists and against those who opposed Stalin's policy, such as M. Voznessensky (the former chairman of the State Planning Commission, who disappeared in 1949). The myth that Stalin was a " military leader of

genius," Herr Ulbricht continued, had been created by Stalin himself, in passages which he had contributed to his authorized biography and to his *Short History of the Communist Party of the Soviet Union*. In 1941 Stalin had ignored warnings from three separate sources that Hitler intended to attack the U.S.S.R., and had discounted the report of a German deserter who had crossed to the Soviet lines on the eve of the attack and told the Soviet authorities that an invasion was imminent.

At a congress of the Socialist Unity Party, held in East Berlin from March 24-30, Herr Grotewohl (the East German Premier) strongly criticized the administration of justice in Eastern Germany, which, he said, had been "arbitrary and vengeful," and attacked Frau Hilde Benjamin (the Minister of Justice) and Dr. Melsheimer (the Public Prosecutor) for failure to ensure strict regard for the law and civil rights. Herr Ulbricht announced that two committees had been set up, one to safeguard collective leadership, and the other to examine and, if necessary, to revise disciplinary action taken against party members in the past.

Reactions in Poland. - Release of M. Gomulka, General Spychalski, etc. - Amnesty for Political Prisoners. - Dismissal of Security Chiefs.

M. Ochab, the first secretary of the Polish United Workers' Party, announced on April 6 that M. Wladyslaw Gomulka (see 10351 E), the former Vice-Premier, had been released from prison and restored to full civil rights. [M. Gomulka had been arrested in 1951 on charges of "Titoism."] He pointed out that M. Gomulka's release did not mean that the party now approved of his opinions, but that it was recognized that his arrest in consequence of the Rajk trial in Hungary (see below) had been unjustified. M. Ochab admitted that the security police had "brought about the arrest of many members of the Communist party and the population by means of false evidence and bribed witnesses," and that the party had "committed grave mistakes between 1953 and 1955 by tolerating the imprisonment of people alleged to be opposing our regime." After checking the evidence and trial proceedings in a number of cases, he added, "dozens of people" had been released, rehabilitated, and readmitted to party membership. Simultaneously with M. Ochab's statement, it was officially announced in Warsaw that over 20 officers had been released, among them Generals Spyehalski, Komar, and others who had been imprisoned since 1951 (see 11687) on charges of espionage.

Warsaw Radio announced on April 20 that M. Kalinowski (the Prosecutor-General), M. Zaradowski (the Chief Military Prosecutor), and General Stanislaw Radkiewicz (the Minister of State Farms, and formerly head of the security police) had been dismissed from their posts. No official statement was issued as to the reasons for General Radkiewicz's dismissal, but it was announced that MM. Kalinowski and Zaradowski had been dismissed "in connexion with the discovery of serious deficiencies which have occurred in recent years.

General Radkiewicz had been responsible for thousands of arrests while head of the security police, including the arrest of M. Gomulka and the imprisonment without trial of General Spychalski He ceased to be head of the security police in December 1954, when he was appointed Minister of State Farms

On April 22 the Polish Government announced an amnesty for all political prisoners, under which persons who had been sentenced to death had their sentences commuted to 15 years' imprisonment; sentences of life imprisonment were reduced to 12 years; sentences exceeding 10 years were reduced by one-third, and those of 10 years by one-half; and sentences of five years or under were quashed. The amnesty also quashed all sentences for non-political offences punishable by two years' imprisonment or less, and offered a free pardon to all Polish exiles who returned before July 22, irrespective of any offences they might have committed. About 30,000 political prisoners were expected to be released under the amnesty, and another 70,000 to have their sentences reduced.

The Prime Minister of Poland (M. Cyrankiewicz) announced in the Seym on April 24 that compensation would be paid to all those released under the amnesty who had been wrongfully imprisoned. He added that a special commission had been set up to help the "large number" of released persons who had been victims of "provocation, lawlessness, abuse, and undeserved repression."

It had previously been announced by a Government spokesman, in a radio broadcast, that full rights would be restored to all members of the Polish Home Army (*Armja Krakowa*), the name by which the Polish underground forces were called during the war; that all those who had been arrested and imprisoned would be released; and that efforts would be made to obtain the release of the large numbers who had been deported to the Soviet Union after the war.

The broadcast declared that every Pole who had fought against Fascism "deserves to be remembered and esteemed by the nation"; that the struggle of the *Armja Krakowa* against the Nazi invaders equalled the struggle of all other Polish underground forces, including the *Armja Ludowa* (the People's Army, i.e. the forces organized and controlled by the Polish Communist Party); and that the comradeship in arms between all who fought against Fascism provided a moral basis for "full equality of civil rights." The announcement constituted an important reversal of previous official policy, since the Home Army had been bitterly attacked by the Communist Party since the end of the war

Reactions in Poland to the anti-Stalinist developments in the U.S.S.R. were stronger and more outspoken than in most other Communist countries. A speaker on Warsaw Radio (Feb. 29) called for greater freedom of thought, and declared that "for a long time we have been spoonfed on an insipid, messy hash of slogans. . . . Today everyone must realize that he has not only the right but the duty to think and to express his thoughts . . ."

The strength of this reaction was shown by a speech broadcast by M Ochab on April 7, in which he complained that "some comrades seem to be losing their sense of balance or proportion" while indulging in criticism. M. Ochab declared that it was necessary to "separate the chaff from the grain, the constructive ideas from the rare examples of irresponsibility and hysteria," and gave warning that no attacks on the Soviet Union or on the underlying philosophy of the regime would be permitted.

While the Soviet Communist Party congress was still in progress, a joint statement was issued on Feb. 19 by the central committees of the Polish United Workers' Party and the Soviet, Italian, Bulgarian, and Finnish Communist parties admitting that the dissolution of the pre-war Polish Communist Party by the Comintern in 1938 had been unjustified. The statement said that it had now been ascertained that the charge that "hostile agents had widely penetrated into the ranks of the party leadership," which had provided the grounds for the party's dissolution, had been "based on material forged by *agents-provocateurs* who were later unmasked."

Reactions in Bulgaria. - M. Chervenkov resigns Premiership. - M. Anton Yugov appointed Prime Minister. - Posthumous Rehabilitation of M. Kostov.

The central committee of the Bulgarian Communist Party, after discussions lasting from April 2-6, adopted a resolution condemning the "cult of the individual" and strongly criticizing M. Chervenkov, the Prime Minister. "The cult of personality around Comrade Chervenkov," the resolution stated, "put aside in many respects traditional and well-tried party methods, internal party democracy, and collective leadership." M. Chervenkov accordingly tendered his resignation to the National Assembly on April 17, admitting in a written statement that he had used "incorrect methods" which had been detrimental to State affairs. The Assembly accepted his resignation and unanimously elected M. Anton Yugov (a Deputy Premier) as Prime Minister, M. Chervenkov becoming one of the six Deputy Premiers.

M Yugov (52), a former tobacco worker, joined the Bulgarian Communist Party in 1929 and was elected to its Politburo in 1937. Interned in 1941, he escaped and became a partisan leader. He entered the Cabinet in 1944 as Minister of Health, and subsequently held the posts of Minister of the Interior, Minister for Industry, and Deputy Premier

M. Zhivkov (first secretary of the Bulgarian Communist party) stated in a speech published on April 14 that the accusations made at the trial of M. Traicho Kostov, and at subsequent political trials, had been proved untrue, and that all persons sentenced to imprisonment at these trials had been released and would be "rehabilitated before the party and the people."

M. Kostov, a former Deputy Premier and Communist Party secretary, was executed in 1949 after being found guilty of plotting an armed *coup* with Yugoslav support, whilst 10 other persons were sentenced to long terms of imprisonment—see 10511 A. The subsequent trials referred to apparently included that of five Bulgarians imprisoned in 1950 on charges of supplying information to Mr. Donald Heath, the U.S Minister in Sofia—see 10616 D.

A decree was issued on April 10 extending the amnesty for persons who had committed the crime of "flight abroad," and setting no time-limit for the return of exiles. It laid down (1) that Bulgarian citizenship would be restored to persons who had been deprived of it before the publication of the decree; (2) that the property of such persons confiscated by the State would be restored to them if they returned voluntarily to Bulgaria; and (3) that, if it was found impossible to return such property, the persons concerned would be compensated in cash, or by the granting of other suitable property.

Reactions in Hungary. - Posthumous Rehabilitation of Laszlo Rajk.

M. Rakosi, first secretary of the Hungarian Workers' Party, stated on March 29 that after the "exposure" of Beria and of Peter Gabor (the former head of the Hungarian security police, who was sentenced to life imprisonment in 1954—see 13464 B) the party leadership had investigated the Rajk trial, and had established that the charges brought against Rajk were untrue and had been based on "provocation and a miscarriage of justice." [M. Laszlo Rajk, a former Foreign Minister, was executed with six others in 1949 on charges of conspiring to overthrow the Government with Yugoslav assistance—see 10265 A, 10304 C.] Other similar cases had been reviewed, with the result that innocent persons had been rehabilitated and those who had "offended against the people's democracy" had been amnestied. M. Rakosi stated that all those involved, including a number of former Social Democrats, either had been or would be released within a few days.

M. Rakosi had previously told the central committee of the Workers' Party on March 15 that the "cult of the individual" had caused "serious political and theoretical mistakes" in Hungary, and that it was therefore necessary to "consolidate collective leadership," develop party democracy, and encourage criticism and self-criticism, especially criticism from below."

Reactions in Czechoslovakia. - Denunciation of "Cult" of President Gottwald. - Dismissal of Minister of Defence. - Repercussions of Slansky Trial.

The adoption of the new policy and the rehabilitation of the victims of political trials proceeded more cautiously in Czechoslovakia than in most Communist countries. Apart from the statements made at the public sessions of the Soviet congress, no criticisms of Stalin were published until March 29, when the *Pravda* editorial of the previous day was reprinted in the Prague newspapers. On April 9, however, the Czechoslovak press published the text of a speech, delivered ten days earlier to the Communist Party's Central Committee, in which M. Novotny (first secretary of the party) attacked the "cult" of the late President Gottwald and the methods of the security police.

M. Novotny said that an atmosphere of "infallibility" had been created around President Gottwald, and that collective leadership had been weakened by the propagation of the idea that "Gottwald thinks for us." Owing to Stalin's "wrong and one-sided thesis" on the intensification of the class struggle, the security organs had come to consider themselves a superior body, not subject to control but assuming the right to control the activity of the party. This had led to arbitrary actions and breaches of "Socialist legality," and a number of measures had now been taken against these methods. M. Novotny also urged that in such branches of social life as trade unions, youth, sport, and physical culture organizations, centralization and State control should be replaced by voluntary initiative.

On April 12 the Czechoslovak Communist paper *Rude Pravo* published an editorial attributing the excesses of the security police to Rudolf Slansky, Karel Svab, and Mme. Taussigova. [Slansky, the former general secretary of the Communist Party, and Svab, formerly head of the security police, were hanged with nine others in 1952 as "Trotskyist-Titoist-Zionist-bourgeois-nationalist traitors"—see 12685 A. Mme. Taussigova, a Communist party official, was sentenced to 25 years' imprisonment in 1954—see 13387 A.] As a result of investigations of "cases tried during the time Slansky was party secretary," a number of innocent people had been released and excessive sentences had been reduced, although some sentences had been found to be justified. "It has been shown," the article continued, "that it was quite wrong for people to be condemned merely on the basis of their own confessions produced by unlawful methods and without the existence of any material proof." These "impermissible methods," it was added, had been introduced by Slansky under Beria's influence and had continued for a certain time even after his "unmasking."

The Czechoslovak Prime Minister, M. Siroky, announced on April 14 that M. Artur London (formerly Deputy Foreign Minister), who had been proved to be a victim of a "breach of Socialist legality," had been released from prison; that M. Hajdu (also a former Deputy Foreign Minister) would also be released; and that the case of M. Loebl (formerly Deputy Minister of Foreign Trade) was under review. [London, Hajdu, and Loebl were all tried with Slansky in 1952 and sentenced to life imprisonment.] M. Siroky maintained that the sentence passed on Slansky himself and on M. Clementis (the former Foreign Minister, who was hanged with Slansky) had been justified. He admitted, however, that it had been a mistake to introduce into the trial charges of "Titoism," which was a "secondary issue," and to introduce an anti-semitic element by stressing the Jewish origin of many of the accused.

General Alexei Cepicka was dismissed on April 25 from the post of Minister of Defence, and also from the Politburo of the Czechoslovak Communist Party, for "shortcomings in the pursuance of his duties." He was succeeded as Defence Minister by Colonel-General Bohumir Lomsky, formerly Deputy Minister of Defence. General Cepicka is a son-in-law of the late President Gottwald.

Reactions in Rumania.

The central committee of the Rumanian Workers' Party adopted a resolution on March 30 declaring that Stalin's theory of the intensification of the class struggle had led to "incorrect tactical decisions" in Rumania, and that the party had failed to observe strictly the Leninist principle of party democracy. M. Gheorghiu-Dej, first secretary of the party, promised that plenary sessions of the central committee would be held more frequently than hitherto, and announced that several members of the security police would be punished for grave breaches of the law.

Reactions in China.

The Peking newspapers published on April 5 a statement issued by the Chinese Communist Party condemning the "cult of the individual." Chinese Communist newspapers criticized Stalin, *inter alia*, for neglecting the welfare of the peasants, ignoring the German invasion threat, and showing "conceit" in his later years. (Soviet Weekly - Times - Daily Telegraph - Manchester Guardian - Daily Worker - New York Times - Le Monde, Paris - Polish Embassy Press Dept., London - Hungarian Review, Budapest - Bulgarian Legation Press Bulletin, London - Tanjug Agency, Belgrade)

(Prev. rep. Soviet Party Congress, 14745 A.)

A. MAURITIUS. — Constitutional Changes.

The following constitutional changes for Mauritius were announced in the House of Commons on March 13 by the Colonial Secretary, Mr. Lennox-Boyd:

Executive Council. Membership would be increased from nine to 12, viz., seven unofficial members elected by the Legislative Council under the existing system of a single transferable vote, two unofficial members nominated by the Governor, and three *ex-officio* members. The elected element would therefore, for the first time, be in the majority, and the retention of the present system of election from the Legislative Council would ensure that they were as truly representative as possible of the community as a whole.

The Council would exercise collective executive responsibility (subject to the retention of the Governor's reserved powers), in contrast with the purely advisory functions of the existing Council. All its members would be titled "Minister." Six unofficial members would be assigned portfolios and would be responsible to the Governor in Executive Council for matters relating to their portfolios, and for the conduct of Government business relating to them in the Legislative Council.

Legislative Council. The number of elected members would be increased from 19 to 25, that of nominated members would be fixed at a maximum of 12, thus introducing flexibility; and the three *ex-officio* members would be retained.

The Speaker. There would be a Speaker for the Legislative Council, the first holder of the office being appointed from outside the Colony.

Constituencies. The present system of multi-member constituencies would be retained, with one modification in boundaries to provide for five constituencies each returning four members and one constituency returning five members.

Electoral System. The present literacy qualification required for electoral registration would be abolished, and universal adult suffrage introduced at the 1958 general election. The system of election by majority vote in multi-member constituencies would be replaced by proportional representation, with a single transferable vote similar to that already in operation for elections from the Legislative Council to the Executive Council. It was believed that this would produce a more precise reflection of public opinion.

With regard to the timing of these changes, Mr. Lennox-Boyd stated that provision would be made for the appointment of a Speaker as soon as practicable; that the increase in the Executive Council's membership and the introduction of a ministerial system would take effect in the autumn of 1956, and that the increase in the membership of the Legislative Council would take place in 1958 on the basis of the new franchise and electoral system, which together constituted interdependent parts of an integrated plan.

(Times - Manchester Guardian) **(Prev. rep. 8901 C.)**

B. BURMA - CHINA. — Air Service.

The first scheduled air services between Burma and China, operated by Soviet-type planes, went into operation on April 11 on the route Rangoon-Mandalay-Kunming. Agreement on the opening of direct air communications between the two countries had been reached during the Burmese Prime Minister's visit to Peking in December 1954—see 14047 A. (Times)

A. UNITED KINGDOM. — The Budget, 1956-57. - Premium Bonds Scheme and Other Inducements for Private Savings. - Increase in Tobacco Duty and Profits Tax. - Family Allowances increased. - Forthcoming £100,000,000 Cut in Government Expenditure. - Capital Requirements of Nationalized Industries to be financed by Exchequer.

The Chancellor of the Exchequer, Mr. Harold Macmillan, introduced the Budget for 1956-57 in the House of Commons on April 17. Estimates of Ordinary Revenue and Expenditure are shown in the following table:

ESTIMATED REVENUE

	£
Inland Revenue—	
Income Tax	2,085,500,000
Surtax	144,000,000
Death Duties	170,000,000
Stamps	58,900,000
Profits Tax and Excess Profits Tax	216,750,000
Excess Profits Levy	4,000,000
Other Inland Revenue Duties	1,000,000
Total Inland Revenue	2,680,150,000
Customs and Excise—	
Customs	1,204,000,000
Excise	953,350,000
Total Customs and Excise	2,157,350,000
Motor Vehicle Duties	92,000,000
Total Receipts from Taxes	4,929,500,000
Post Office (net receipt)	10,000,000
Broadcast Receiving Licences	28,000,000
Receipts from Sundry Loans	30,000,000
Miscellaneous	200,000,000
TOTAL REVENUE	5,197,500,000

ESTIMATED EXPENDITURE

	£
Interest and management of the National Debt	*670,000,000
Sinking Funds	37,000,000
Payments to N. Ireland Exchequer	61,000,000
Other Consolidated Fund Services	10,000,000
Total	778,000,000
SUPPLY SERVICES—**Defence—**	
Army Votes	479,000,000
Navy Votes	351,000,000
Air Votes	517,500,000
Ministry of Supply (Defence)	185,000,000
Ministry of Defence	16,200,000
	1,548,700,000
Less—American Aid receipts appropriated in aid of Defence Votes	50,000,000
	1,498,700,000
Civil—	
I. Central Government and Finance	20,850,000
II. Commonwealth & Foreign	90,469,000
III. Home Dept., Law & Justice	89,214,000
IV. Education & Broadcasting	413,571,000
V. Health, Housing and Local Government	728,732,000
VI Trade, Labour & Supply	72,507,000
VII. Works, Stationery, &c.	74,392,000
VIII. Agriculture and Food	324,078,000
IX. Transport, Fuel, Power, & Industrial Research	158,649,000
X. Pensions, National Insurance & National Assistance	455,753,000
	2,428,215,000
Tax Collection—	
Customs and Excise and Inland Revenue Votes	52,770,000
	3,979,685,000
Less—Net reduction in Supply Expenditure	† 20,000,000
TOTAL EXPENDITURE	4,737,685,000
SURPLUS	459,815,000
	5,197,500,000

SELF-BALANCING REVENUE AND EXPENDITURE

	£
Post Office Revenue required to meet Post Office expenditure	287,298,000
Excess Profits Tax, post-war refunds (part deducted for tax)	1,600,000
Total	288,898,000

* In addition £150,000,000 for interest on the National Debt will be met from receipts under various Acts authorizing such application.

† Representing the saving expected to accrue in 1956-57 from the reduction in the bread and milk subsidies, partly offset by the cost of the Agricultural Price Review [see 14831 A] and the increase in Family Allowances.

The changes brought about by the Budget, which Mr. Macmillan described as a "savings Budget," are set out below.

Premium Bonds. These will be of £1, without interest and repayable on due notice; for Bonds held for a minimum period, however, there will be draws every three months, with tax-free prizes up to £1,000. Individual holdings will be limited to, perhaps, £250.

Savings Certificates. A new issue as from Aug. 1 at 15s., increasing to 20s. within seven years.

Defence Bonds. A new issue as from May 1 at 4½ per cent interest, instead of 4 per cent, with a £2 per cent premium if held for five years and £5 per cent after ten years.

Post Office Savings Bank Deposits. The first £15 of interest to be exempt from Income-tax but not from Surtax.

Self-employed Persons. Self-employed persons and employees not coming under pension schemes will be given limited tax relief on premiums for retirement annuities.

Stamp Duty. Reduced for house purchase to 10s. per £100 up to £3,500, with a sliding scale up to £5,000, after which the full 2 per cent rate applies.

Family Allowances. An increase of 2s a week (from 8s. to 10s.) for third and subsequent children; qualifying age to be raised from 16 for children still at school or apprenticed.

Tobacco Duty. An increase of 3s a lb, equivalent to 2d more on 20 cigarettes [i.e. from 3s. 8d. to 3s. 10d.].

Profits Tax. The rate of distributed profits to go up 2½ per cent to 30 per cent, and on undistributed profits by ½ per cent to 3 per cent, from April 1, 1956

Wine Duty. Extended to cider and perry of 15 degrees proof alcoholic strength or more

Purchase Tax. Inclusion of shooting-brake type motor vehicles hitherto exempt.

Bread Subsidy. The remaining subsidy to be ended by Sept 30, increasing the retail price of a 1¾ lb. loaf by 1½d.

Government Expenditure. A review to start at once, with the aim of saving "not less than £100 000,000."

Nationalized Industries. The capital requirements of the nationalized industries to be met out of the Exchequer for two years, up to a maximum of £700,000,000.

Investment Allowance. This would be restored for approved fuel-saving equipment installed by industrial undertakings "by way of replacement or modernization in existing industrial premises."

Estate Duty. The charge to duty would be modified where settled property burdened with an annuity passed on the death of the life tenant who was not himself the creator of the settlement

Where land was compulsorily acquired by a public authority within three years of the death, duty could be charged by reference to the actual compensation paid if that was less than the value of the land at the date of the death (hitherto the basis for estate duty valuation).

Both changes would take effect in respect of deaths occurring after the passing of the Finance Bill.

The Chancellor's Budget speech is reproduced below under cross-headings:

"I have often thought of Budget Day as rather like a school speech day—a bit of a bore, but there it is! The parents and the old boys like it Indeed these occasions are very similar An unfortunate audience has to sit and listen to a long homily before it is told of the fortunate prize-winners. The analogy is not, of course, perfect, because on Budget Day there are quite likely to be impositions as well as prizes for distribution, and sometimes there are nothing but impositions."

Balance-of-Payments Position in 1955. "By all the rules, the year 1955 ought to have been a good one. The outflow of dollars from the United States continued at a high level. Output was growing rapidly in all major manufacturing countries and trade between them was increasing at an exceptional rate. The primary producing countries in general remained prosperous and provided good markets for manufactured goods—America sending out more dollars than she received, world trade increasing; markets good. Everything therefore seemed in our favour, but in spite of favourable external circumstances, the balance-of-payments figures were disappointing

The U.K. current account balance with all areas over the calendar year was in deficit to the extent of £103 million, £308 million down on 1954. This was divided between visible and invisible trade It is true that much of the fall of the invisible surplus was due to exceptional circumstances, such as the sudden expansion of the oil companies' expenditure All the same, the position, as a whole, is disappointing and unsatisfactory

The balance of the sterling area with the whole of the non-sterling world fell from a surplus of £97 million in 1954 to a deficit of £181 million in 1955. Of this deterioration of £278 million, no less than £251 million was due to the U K. The result of these unfavourable balances was naturally reflected in the reserves. . . . During 1955 we lost £229 million from the central gold and dollar reserves, which at the end of the year stood at £757 million—a loss of nearly one-quarter.

Over the turn of this year the reserves began to show improvement. In January they increased by £11 million and in February by £21 million. In March the figure showed an increase of £24 million, and this was all right so far as it went; but we have—and we must face it—a long way to go.

The truth is that our reserves, which now stand at £813 million, are really insufficient for their purpose. They represent in fact only about 8 per cent of the annual turnover of sterling area trade with the non-sterling world. In this sense, whether we take the figure of this year or the figure of last year, we are really trading beyond our capital resources. We lack just that amount of extra strength which would allow us to take the swings in our balance of payments with comfort. We must therefore increase the reserves. To do this we must correct the balance of payments. If we can do this, the rest will follow.

Our position in the E P.U has been even more markedly affected than our gold and dollar reserves. Our E.P U. deficit, which was over £90 million in the third quarter of 1955 and nearly £30 million in the fourth quarter, was in January better—only £4 million—and in February £8 million. In March, which should be a good month, it fell to only £100,000, so that is an advance

As regards the balance of trade, January was not a good month. The excess of imports over total exports was £74 million, compared with a monthly average of £62 million in the last quarter of 1955; and it was only slightly better than the figures for the earlier quarters of 1955. In February the excess was reduced to just under £50 million, but February is normally a low month for imports In March the deficit was again reduced to £47 million. This is encouraging, although it is too early yet to say that a better trend is firmly established."

Internal Economic Development. - Inflationary Trends. "It is against this somewhat sombre background that we must now have a look at the gay scenes, painted in bright, not to say glaring, colours, in the foreground of our picture.

On the home front, 1955 was a year of great prosperity for the mass of ordinary men and women. Everyone had a job; consumption again rose appreciably; and investments also increased. But, in total, demand rose faster than output, and in consequence the economy was overstrained Prices went up; there were shortages of labour and material; imports increased, exports were held back from the foreign market to be consumed at home, and so the balance of payments suffered.

Industrial production in 1955 was 5 per cent higher than in 1954, a smaller increase than the 7 per cent of the previous year Productivity, or output per man, rose less than in 1954—about 2 per cent, as against 5 per cent. . . .

Meanwhile the increase in demand was too much for the increase in output which took place during the year It is true that the increase in total personal consumption was rather less than the increases of the previous two years. Unfortunately, it was concentrated on our overloaded engineering industries. Motor cars, television sets, washing machines and similar products were in great demand—all of course in competition with precious exports.

At the same time there was a sharp increase in fixed investment Expenditure on plant, machinery and vehicles, after allowing for price changes, rose more than in any year since 1947. More orders were placed for capital goods than deliveries made, so that order books and delivery dates lengthened, and despite heavy imports, many types of steel were scarce. Stocks of raw materials, work in progress, and finished goods rose sharply, and this added to the strain on the economy.

The number of jobs waiting to be filled was substantially more than the number of unemployed, and unemployment remained at record low levels throughout the year. Employers competed with one another for labour, and wages and salaries went up by 8 per cent. Profits also increased by 8 per cent, and import prices went up by 3 per cent. As a result of the consequential cost increases, prices increased too. Retail prices were 4¼ per cent higher than in 1954, the price of manufactured goods was 3 per cent up, and export prices 2 per cent up. All these, together, are the symptoms of severe inflation

The strain was heaviest on the building and engineering industries, and the most important initiating factor in producing the inflation was the upsurge in industrial investment For this the Government certainly accepts part of the responsibility. I think everyone on both sides will agree that we need a high level of investment in this country It was to help achieve this that my predecessor, in two successive Budgets, stimulated investment first by the initial allowances, then by the investment allowances. In the long run we want all this extra investment and more. But the rise was too sharp and too sudden for the economy to sustain with all its other burdens One force acts and interacts upon another. The investment boom has stimulated both consumption and a sharp rise in stocks—particularly of work in progress—as the pipelines of industry become full to overflowing."

Anti-Inflationary Measures. "I need not again go over all the various measures which were taken to moderate the boom by restricting credit, by raising taxes, and by cutting Government expenditure They have all been discussed at length in this House . . . These measures took longer to act than we expected. They had to be—and they were—continually reinforced The economy is still running at a very high level. But I think we have learned this lesson from the events of the past year. We cannot afford to run our economy flat out, with more jobs than men to fill them, more orders than industry can meet, easy profits at home, and rising costs.

Of course, it would be very nice if we could do so—at least for some people—for we must remember that there are victims as well as beneficiaries of inflation. It would only be nice, even for the majority, so long as it lasted; and it would not last very long. There is really no future in importing extra materials that we cannot afford, in order to turn them into extra goods that we do not export We must pay for these imports honestly by our exports, and not by drawing on the reserves.

In our efforts to check the inflation, the Government have relied very largely on monetary policy. The extent to which we have done so is naturally the subject of controversy. The question is, what conclusions are to be drawn from the experience of 1955 and how shall we apply those conclusions in 1956?

On the debit side I recognize the increased cost of servicing the National Debt, including that part of it which is held abroad, and the time that it takes for monetary measures to achieve the desired results. On the credit side I claim that monetary policy has, in fact, operated with increasing effect as the year proceeded, thanks to the persistent pressure exercised on the monetary system, both by the interest rate and by the control of credit through the banks and the Capital Issues Committee Since this technique had not been used for many years—and even then under vastly different conditions—there are many new problems, especially as between the Exchequer and the monetary system. Two things at least are plain. First, no one has yet found an easy way to restrict credit without high interest rates I am told that if I appoint a committee I may find out, but I am not altogether sanguine about it Secondly, monetary policy cannot 'go it alone' It can only operate effectively in conjunction with fiscal and other measures to check demand, taken by the Government of the day and supported by an informed public opinion"

Out-turn for 1956-57. "Inland Revenue duties were £2,539 million, an increase of £61 million over the estimate. All the components of this total were up on the estimate, except for death duties, stamp duties, and excess profit levies. Customs and Excise produced £2,013 million, £85 million above the preliminary estimate. Almost everything was up, including beer, because it was a fine summer. Motor vehicle duties were £341 million, which was £37 million above the estimate, and so the total revenue was £4,893 million—£183 million above the estimate.

The expenditure, estimated at £4,562 million, came out at £4,496 million—£66 million below the estimate

The summary above the line shows—estimated surplus £148 million, actual surplus £397 million, or £249 million up. Below the line, receipts, were £219 million—up by £27 million Payments were £757 million, £19 million less than the forecast. The total net payments turned out at £538 million, or £46 million less than expected. As a result of all this, the amount which had to be borrowed was not £436 million as was forecast, but £141 million, or £295 million less"

The National Debt. After pointing out that the National Debt had increased by £106 million, i.e the afore-mentioned £141 million less certain adjustments, and that, in spite of this overall increase, there had been a decrease of £143 million in that part of the debt covered by Treasury Bills. Mr. Macmillan continued: "The total of the National Debt now stands at £27,040 million. On Sept. 3, 1939, it stood at about £8,400 million. On Aug. 4, 1914, it stood at about £645 million. These figures fill one with a certain awe There are few nations, victors or vanquished, in these 40 years that have so honourably tried to meet their obligations at home and abroad. The service of the debt cost us £638 million, which is about the sum of the 1914 debt, nearly 3s on the income tax The funded debt is a dull, dragging burden, the unfunded a constant and acute anxiety. No one who contemplates these figures can fail to draw the lesson that whatever may be the temporary difficulties from which we suffer by trying to run too fast, if we stand still we are lost.

Inflation must be curbed, because runaway inflation ends up by being itself restrictionist But deflation—in the sense of seeking stability by courses which, among other things, would result in an increase in the debt burden in relation to the national income—is out of the question. We must all be expansionists—but expansionists of real wealth. The problem of inflation cannot be dealt with just by cutting down demand, the other side of the picture is the need for increasing production. The only question is at what rate, for what markets, and how best guided our expansion is to be. There is one comfort in it—it has all happened before. We have done it before and we can do it again. But we shall need, as our fathers needed, prudence and daring in the right proportions and, above all, the instinctive judgment as to the right policy at the moment and the courage to apply it."

Revenue Estimates for 1956-57. "Inland Revenue duties in 1956-57, on the existing basis of taxation, are expected to yield £2,700 million, an increase of £161 million on the out-turn of last year. From income tax we expect to collect £2,102 million, or £159 million more than last year. This increase is due partly to the higher profits of 1955-56 which will be assessed in 1956-57, and partly to the effect in a full year of the increases in wages and salaries which have been negotiated in recent months. We expect the yield from surtax to rise by £5 million to £144 million From profits tax we expect to receive £216 million in 1956-57 compared with £192 million last year. This increase of £24 million is partly the result of higher profits, but also reflects the increase made last autumn in the rate charged on distributed profits.

Death duties and stamp duties are expected to yield £170 million and £63 million respectively. In each case there is a reduction from the 1955-56 yield, to take account of the lower Stock Exchange prices now ruling. Finally, £4 million may be expected from delayed settlements of the excess profits levy and £1 million from other duties.

The revenue from Customs and Excise duties on the existing basis of taxation is estimated at £2,130 million in 1956-57, compared with an out-turn of £2,013 million last year. The principal items in this total are: Tobacco, £680 million, purchase tax, £510 million, beer and other alcoholic drinks, £409,500,000, oil, £340,000,000; duties under the Import Duties Act, 1932, £71,000,000; entertainments, £39,250,000; and betting, £27,500,000

To this revenue must be added £92 million for motor duties, bringing the total tax revenue to £4,922 million, an increase of £283 million on the out-turn for 1955-56. From non-tax revenue I expect £268

million, or £14 million more than actual yield in 1955-56 Total revenue on the basis of existing taxation is thus expected to yield £5,190 million, an increase of £297 million on last year's out-turn."

Expenditure Estimates for 1956-57. " I estimate the total expenditure 'above the line' at £4,745 million, an increase of £183 million on the Budget estimate for 1955-56 The Consolidated Fund services, at £778 million, account for £79 million of this increase.

Supply expenditure in 1956-57 is estimated at £3,980 million, or £117 million above the expenditure last year Within this total, defence at £1,499 million is only £5 million above last year's estimate, but civil expenditure at £2,481 million is £112 million above the estimate. The major item in this increase is £107 million for social services, of which national health and education account for £39 million each. Development of atomic energy will require an additional £18 million, and other items showing increases include civil superannuation £10 million more, roads £8 million, police and fire services £7 million. On the other hand, there will be savings of £24 million on home defence

The figure for civil expenditure is based on the published Vote-on-Account. This did not, however, take account of the reductions in the bread and milk subsidies which I announced on Feb. 17 and which will save £35 million in 1956-57, or of the results of the agricultural price review, which were announced on March 15 (see 14831 A) and will require an additional £22 million in the coming year."

Exchequer Prospects on Existing Basis of Taxation. 'Above the line, therefore, on the basis of existing taxation and measures already announced, the prospects are for a surplus of £445 million. This compares with an estimated surplus for last year of £148 million and a realized surplus of £397 million.

During the year there will, of course, be overspendings and underspendings, as in previous years Some items are already known to us I hope that the Civil Service Staff Associations will accept the offer to carry out with certain modifications the proposals of the Royal Commission on the Civil Service. Certain pay increases have been made meanwhile The cost, none of which is covered by the estimates, will be £12 million, apart from the Post Office

Another known item on the other side of the picture is the removal of the remainder of the bread subsidy. The Government have decided that this should take effect at the end of September. It will produce a saving of about £12 million this year and about £23,500,000 in a full year Other items are uncertain. There is, for example, the prospect of an increase in teachers' pay in the autumn. I must bear all this in mind

Now I come to 'below the line,' and in this field I shall have some changes to propose. First let me forecast expenditure on the existing basis. This, at £678 million, is £98 million less than the estimate for 1955-56, and the receipts of £225 million are £33 million higher than the forecast made a year ago for 1955-56.

The main difference on the expenditure side comes from an estimated decline of £100 million in loans to local authorities. Repayments from local authorities are estimated to rise by £10 million, yielding a net improvement of no less than £110 million. This is mainly due to the expectation that this year they will raise more of their necessary finance in the stock and mortgage market. Loans to the National Coal Board are expected to be £25 million less, and I estimate that £27 million less will be required to meet outstanding claims for compensation under the Town and Country Planning Acts. Loans to the Potato Marketing Board, at £5 million, and to the Sugar Board, of £10 million, are new items of expenditure which have arisen since last year.

On the other side of the account the proceeds from the liquidation of the Raw Cotton Commission, which produced £158 million in 1955-56, practically come to an end. On balance, the forecast for 'below the line' items shows a deficit of £453 million, or £131 million less than the estimate made last year for 1955-56.

To sum up : estimated surplus above the line, with present taxation, £445 million ; estimated deficit on services at present financed below the line, £453 million. Not quite Mr. Micawber's ideal—but uncommonly near it.

Unfortunately for the appearance of the thing, it makes no difference to the reality I have some changes to propose which will apparently, though only apparently, rather spoil this pretty picture. It would be nice to show and proclaim an overall balance in 1956-57. It would sound well at home and abroad. It would be good advertising But, as Members know, this particular form of calculation depends on what items you choose to include in or exclude from the Budget arithmetic below the line. What matters is whether the total amount of saving by the whole nation, whether compulsory or voluntary, is sufficient to meet the needs of investment, and what Budget surplus is required to make that certain."

Exchequer Financing of Nationalized Industries. " This leads me to the difficult and complex question of the method of financing the nationalized industries Often as we have debated, inside and outside Parliament, the pros and cons of nationalization from the point of view of management, I do not think there has been so much public attention given to the question of finance. Yet ever since the war it has been necessary to raise very large sums, running to something between £300 million and £350 million a year, for their capital requirements.

In some cases, as with the railways, the years of war led to great destruction or neglect of capital assets. In others, as with the mines, the working out of old pits has made it necessary to spend immense sums in opening new pits and bringing older ones up to date. Again, the rapid development of industry, especially the metal-using industries, as well as the vast housing schemes, have made necessary a rapid expansion of gas and electricity production and distribution.

Before nationalization, the necessary capital would have been raised by the many and diverse bodies concerned in one or both of two ways. The new money might come from their own resources, from trading profits made and not distributed but ploughed back. Or the new money might be raised, by various channels and in various amounts, on their own credit on the market.

Today, for reasons which are well known to the House, the amounts made available from profits are not significant. I reckon that, of the total capital expenditure in coal, gas, electricity, transport, and airways since the nationalization of these industries, more than £1,600 million, or about 60 per cent, has had to come from external borrowing. But the House will also observe another difference. Before nationalization, these services were financed largely by money raised on the borrower's own credit. Now the new institutions pledge the credit of the nation. Perhaps this is right—since they are nationalized industries. . . . All the same, from the point of view of the national credit it is a considerable inconvenience

A number of institutions have been in the habit of borrowing from the State, that is from the Exchequer ; for instance, local authorities. But since their own credit allows them to borrow from the market without any Treasury underwriting, there is no reason why they should not do so more and more I will certainly press forward with this policy, initiated by my predecessor. The ultimate aim perhaps ought to be that the nationalized industries ought to be able to do the same. Members will have read with interest, and I hope approval, the suggestion made by the Herbert Committee in relation to the Central Electricity Authority. The time may come when this may happen. Perhaps electricity and gas might be the pioneers.

But, frankly, neither these industries nor coal nor railways have—to use a vulgarism—a cat in hell's chance in present conditions, and for two simple reasons. The first is that, as the nationalization Acts are drawn, the industries concerned cannot pledge their undertakings as security, and also they are not left with an unfettered ability to fix their charges Who would lend money without Treasury guarantee on this basis ? Secondly, even if we could overcome this difficulty, the very size of their requirements adds to the difficulty of flotation on their own credit—at least in present circumstances

At present, apart from coal, which has always been raised in a different way, the capital required is raised ultimately from the market investor, as and when the market completely absorbs these issues Generally, the borrowing starts with bank advances. From time to time these are followed by issues of stock carrying a Treasury guarantee. But if these are not taken up, or not fully taken up, then they have to be supported by the Exchequer In recent months support of this nature has had to be substantial and prolonged. If the nationalized industries are to carry on their programmes, further large issues will soon be necessary, doubtless with similar consequences,

Two embarrassing results will follow. First, official 'support' . . . can only be given, by and large, by borrowing the necessary funds on Treasury Bills. This impedes the operation of our monetary control. It kicks the ball, as one might say, through one's own goal. Secondly, and this is important technically, the necessity of making frequent issues on the basis of Government credit, often at inconvenient times, for particular nationalized industries which have reached their borrowing limits with the banks, prejudices the national programme of borrowing, re-financing and funding.

For the time being, therefore, it would be far better to face the reality, and for the Exchequer to be in control of the whole operation. I propose, therefore, as a temporary measure, to meet these capital requirements out of the Exchequer Bank advances for capital expenditure will gradually be repaid These industries will in future look to the banks only for their normal requirements of short-term capital.

I propose to move a procedural resolution in order that Parliament may embody the necessary provisions in the Finance Bill. These will be limited as to time and amount The new system will only be for two years ; the maximum sum will be £700 million, and this is for industries other than coal, which is already financed by the Exchequer 'below the line.' If these proposals are accepted, I estimate that issues may be required of about £350 million in 1956-57. This figure must be added to the estimate of the nominal deficit below the line. So disappears, by my own murderous act, my beautiful overall balance.

I am sure that we shall gain substantially from this plan It will give us, technically, far more control of the situation, and will enormously assist the authorities faced with their problems of dealing in general with the National Debt. Of course, it makes no difference to the method by which the physical programmes of the various boards are approved by the departments concerned and the Treasury. Still, if you actually press the fee yourself into the piper's hand, you have a better chance of influencing the tune.

Naturally, my purpose will be that this sum for the nationalized industries, with other borrowing by the Government, should be successfully absorbed by the public during the years—that is, draw in real savings and not depend on inflationary finance. But in the end, neither the nationalized industries nor the Government can borrow, except on a purely inflationary basis, more than the nation is able and willing to save."

Economic Prospects for 1956-57. - Need for Improved Statistics. " From the financial prospects for the Exchequer during the coming year, I now turn to the economic prospects. Here, alas, there is no true science which can give us certainty in this uncertain field. Some people feel that what passes for such is rather like astrology than like astronomy. Lyndoe or Old Moore may turn out just as reliable as Professor So-and-So or Dr. What's-His-Name. I do not share this extreme view. Nevertheless, I think we should all agree that if there is such a science it is not an exact one. There are too many unknowns and too many variables.

"I am told that too many of our statistics are out too late to be as useful as they ought to be. We are always, as it were, looking up a train in last year's Bradshaw. Nevertheless, I am still conscious of a certain gap in our defences in this matter, and of the need to strengthen our technical and administrative armoury We must continually improve our statistics, in form and timing. We shall, of course have to make further calls on the co-operation of industry. I am sure that this will be readily given. More complete and more up-to-date information will not only help in the proper ordering of the national economy, but will help industries themselves by enabling them to foresee more accurately the conditions in which they will have to operate.

So much for the reinforcement of our statistical arsenals. How are we to use these weapons? It is certainly true that the pressure of day-to-day work is so great that Ministers have very little time, perhaps not enough time, to think ahead On the other hand, it is no good thinking ahead in a vacuum, without that close contact with actual problems which Ministers on both sides obtain when in office

Nevertheless I believe that some improvement can and should be made. While the conditions within which the U.S economy has to be managed are very different from ours, there is undoubtedly much to be learned from a study of their methods. I feel sure that we can do a good deal, without embarking on a tedious investigation or setting up too elaborate a machinery, to improve the machinery available to us I am considering all this very carefully; and, as soon as more immediate preoccupations are out of the way, I hope to make progress

In the meantime the Chancellor of the Exchequer has to reach a decision and to indicate, in guarded phrases, if not in precise estimates, the factors which he has taken into account in forming his own judgment. From the Economic Survey and the other documents recently published, members will also be forming their own conclusions. We have to assess the outlook for the balance of payments—the crucial test. We all know our debts—whether on loans or in sterling balances. We all realize our obligations throughout the world if we are to play our part in the world. We all know our need not merely to balance the account, but, if we can, to earn a substantial surplus ..

One place where we can expect to do better is in our invisible trade. Last year our invisible surplus fell by £148 million. Half of this immense sum was on oil, due to heavier payments, a very large part of them being 'once for all' special payments of tax and royalties Oil earnings will go on increasing, and our net oil income this year should be well on its way back to the 1954 level. . . . Receipts of defence aid have been falling off for some time, but our invisible earnings from offshore sales have started to rise and are expected to be much larger this year than last

We took a bad knock last year in shipping payments, which were £80 million up. We had to hire more foreign ships and pay higher rates to bring in the goods we bought abroad, particularly bulky things like coal and timber. This year we should not have to import so much coal and timber and the rise in our other imports should be checked, while our earnings from shipping will go on rising.

All this is encouraging But what will really determine our success or failure is the balance of our visible trade—exports and imports. This in turn will depend on our success or failure in limiting the demands we make on our home production If these are too high, the gap is filled by increasing imports and reducing exports. The questions which the House and the public have the right to put to me—the questions which, with the burden I have to carry, I put to myself day by day—are these Have we done enough? Is the trend in demand already changing? Can the measures which we have taken be relied upon to overcome inflation?

It is usual for Chancellors of the Exchequer, at this stage, to try to judge the trend of the main elements of demand and to set these against an estimate of our own production. It is in the light of these assessments that the question of fresh taxation or remissions has to be decided This year I do not think that any detailed forecast of this kind would give us much help. Members must remember the various steps which were taken by my predecessor Those which I announced in February (see 14705 A) are so recent as to be fresh in their memory. None of them yet can have had their full effect

The object of present economic policy, whatever weapons are employed, must be to switch some labour and resources from less necessary to basic production—from production for home consumption to production for export Of course, if we were operating in a closed economy with vast natural resources and under a totalitarian system, where we could order everybody about and command, by the most ruthless methods, automatic obedience, it would be different. But in our country it is another story

In an island like ours, with a free system which we are determined to preserve, with a large population depending on its exports to pay for half its food and nearly all its raw materials, the Government of the day, of whatever complexion, is the servant of the people. And if the people are to be well served, they too have a part to play. To succeed in its purpose the redeployment of labour which must be secured by any control, whether it is monetary or fiscal or physical, should be allowed to take place as swiftly and smoothly as possible. The more smoothly it takes place, the less interference with production there will be.

How far have we moved in this direction? There are now signs that the pressure of demand is easing a little, but we still have an excess demand for resources. There are still more vacancies than people unemployed; expenditure on fixed investment is still rising, and consumers' purchasing power has been increasing. The main evidence of an easing of demand is confined to one sector of the economy—the industries producing consumers' durable goods—which has been affected both by the new hire-purchase regulations and by seasonal slackness. We cannot therefore say with any certainty that we are definitely moving in the direction in which we must go. That is why I have said that any detailed assessment of the course of demand and of production would not help us, for it would imply a degree of knowledge, which I do not think we possess, as to the exact position at which we stand today."

Continuation of Anti-Inflationary Policy. "In looking to the future I must first consider the credit squeeze and related monetary measures. We have placed a good deal of reliance on these—higher money rates, sharper control by the Capital Issues Committee, restrictions on hire purchase, and all the rest. In its use of the monetary mechanism, the policy of the Government has been much discussed by professional commentators and intelligent amateurs. Now it is my turn for a few moments

It would be unwise, and indeed it would defeat the purpose of monetary policy, if I were to attempt a forecast of the course of interest rates in the coming year, or to measure the part that credit restriction will be called on to play in our affairs But it is plain that for the time being credit restrictions must continue

I have been given a great deal of advice about the question of the credit base and the need for the banks to preserve a proper liquidity ratio for that purpose As I understand it, it has always been our practice for the conventional liquidity ratio to be determined by the clearing banks in accordance with their views of sound banking practice. But they would naturally take into account, on this as on other matters, any recommendations put forward by the Governor of the Bank of England acting on behalf of the central authority, and reflecting the needs of the general economic situation.

Further, I am advised that under the Bank of England Act, 1946, the Bank, subject to Treasury authority, has the power to give statutory force to any recommendations it may make to the banks about liquidity ratios However, it is often true that many things are better done on a voluntary basis, by honourable understanding, rather than by legal regulation—by unwritten law rather than by prescribed code.

Before making changes in a system which has on the whole worked well, we should need to be very certain that the changes would bring more advantages than disadvantages What matters is not the method but the result. In any event, the British banking system has shown that it can combine tradition with flexibility, and that it is able and willing to conduct its business with full regard to public policy. Carrying out a disinflationary policy is not pleasant, and I am fully aware of the difficulties it involves for the banks and for their managers and staff throughout the country.

Monetary policy and fiscal measures must go hand in hand. Today we are concerned with another instrument which I have in my mind —the Budget and the Budget policy. Is a surplus of £445 million enough? Is it too much? It is human to err But I think I would rather err on the safe side. A misjudgment on the side of over-optimism might have the gravest results. Any heightening of the inflationary pressure—indeed any delay in reducing it—might prove disastrous But an error in the opposite direction would be far less harmful—and far more easily remedied If we want to reverse the process and increase purchasing power or generally to reinflate, it would be simple to do so.

We have learned only too readily how to turn the taps on. But even Lord Keynes never told us how we were to turn them off a bit. Indeed, I rather look forward to the day—should we have gone a little too far in a policy of restriction—when a joint deputation from the F.B.I and the T.U.C. comes to see me asking for the abolition of surtax and profits tax, and the immediate reduction of all indirect taxation. It is very easy to do it the other way if we go a little too far in one direction. On the other hand, I am determined that this Budget should dispel any lingering doubts, at home or abroad, as to the determination of Parliament and the people to secure the welfare and solvency of the nation Therefore I have decided that any benefits which I may have to propose shall make no inroads on next year's surplus Indeed, the surplus must be fortified rather than depleted. In other words, any prizes which may be distributed must be more than balanced by impositions."

Need for Increased Savings. "I now turn to my main proposals. All of them, although in different senses of the word, may be regarded as having the same purpose; they may all be summarized by the word 'savings.'

First I would like to deal with personal savings. If we are to get our balance of payments out of the red and to restore an adequate margin on the right side, if we are to press on with investment in the means of production at home and overseas, our first and most urgent need is to restore, maintain and develop among all classes of our people the habit of saving.

Some modern critics will of course tell us that the only prescription for inflation is a large Budget surplus Does anyone read Dickens nowadays—except of course the Russians? If so, they will remember Mrs. Pardiggle in *Bleak House*:

> 'My family,' boasted this philanthropic lady 'are not frivolous. They spend the whole amount of their allowance in subscriptions, under my direction . . . they enrol their contributions, according to their ages, and their little means.'

Just so—first pay out far more money to the people than it is good for them to have. Then take it all off them again by taxation. It is as simple as shelling peas.

This method is called "public saving"—that is, an excess extracted from the citizens, singly or corporately, above what is necessary to carry on the work of Government. But what may be necessary

for an emergency cannot be erected into a system. In war, we give up many of our liberties in order to secure them all. But if we make a habit of it, it will grow on us—or rather on our masters—and we shall never escape. Mrs Pardiggle will reign in Treasury Chambers for ever

I can—and in times of difficulty like this, I must—reinforce and sustain the efforts of private savers, individual and collective But it will be a far better thing when the habit of saving has been so rebuilt and reinforced that a Chancellor can begin to reduce the terrible burden of taxation, so oppressive to energy, effort, and enterprise in so many spheres, without risking a serious degree of increased consumption and a fresh inflationary crisis He will best be encouraged on such a course when he is confident that reduced taxation would largely and almost automatically pass into the increased savings of a prudent people. In the meantime, while I must continue to make use of the processes described by this hateful phrase, 'public saving,' I want to do all I can to encourage the efforts of the private savers. I have some plans for a start.

It is customary for the Chancellor to pay his tribute to the National Savings Movement and its voluntary workers This is no empty ceremony. With all our political differences, we in this House are united in our acceptance of the need of savings and our support for the Savings Movement. It has been a difficult year for them. A fine summer does not encourage savings; although, as I have observed, it helps the Exchequer in other ways. Nor do rising prices help, even accompanied by rising wages. For these and other reasons, we cannot declare a net gain in the field of small savings in the last financial year. This is a disappointment to the movement and their leaders, but they have no cause to be discouraged I have complete confidence in their ability to play a decisive part in my plan of campaign for 1956. For the news I have for Lord Mackintosh and his movement is that I am moving them right into the front line, with new objectives and equipped with new ideas and new weapons.

First the objectives. The financial critics tell me that I must reduce bank deposits and the floating debt if I am to reduce the money supply. Very well. Let us see bank deposits turned into National Savings. As the National Savings rise the Treasury Bills will fall In this way the National Savings Movement will carry out a funding operation of the most effective and beneficial kind, and will prove itself a powerful ally in the battle against inflation. Let that be the first slogan—Save to Fund : Save for Solvency : Save for Security.

But there is something more. One of the most important tasks before us today is to ensure that, while maintaining our world-wide approach to the problems of trade and finance, we should lose no opportunity of taking a lead in strengthening the economic ties between this country and the Commonwealth and between this country and Europe. Thus we should aim at developing the mutual interests of these great groupings within the framework of our wider policies. For this, our position at home must be sound and strong. Nothing is more important to this end than an accumulation of savings. We must have capital resources. We must have stability for our currency. Our ammunition in the cold war is the power to invest, to develop other countries as well as our own, to play our part—and more than our part—in the struggle for the soul of the neutral world. So perhaps there could be other slogans too: Save to be free. Aye, and I am not ashamed of it : Save to be great!

So much for the new objectives. What are the new weapons? The first and greatest need of the Savings Movement is confidence in the currency. The saver needs to be assured that money will not continually lose its value. This Budget must play its part. But the thoughtful saver will also realize that this is a matter in which he is helping himself. A vigorous Savings Movement is itself the best protection that we can have against inflation But if the movement is to be vigorous it must have new securities to sell, and I will try to give them."

National Savings Certificates. "First, there is the question of putting a new cutting-edge on the old tool. The National Savings Certificate is by common consent the leading small savings security. The current issue yields £3. 0s. 11d. per cent tax free, if held to maturity in 10 years. I feel justified in offering the small saver a higher return, and a shorter period in which to earn it. There will therefore be a new issue opening on Aug. 1 of a 15s. Certificate rising to 20s. in seven years. The yield, if held to maturity, works out at £4. 3s. 11d. per cent tax free. The limit on holdings of the new issue will be 600 units. Till Aug. 1, the current issue will remain on sale, and I would urge everyone who can not to miss the chance of increasing his holding of the current issue before it closes. For the benefit of savers who already hold the maximum, I am raising the limit on holdings of the current issue from 1,200 units to 1,400 units"

Defence Bonds. "Next, the Defence Bonds Here again I feel justified in offering the saver a higher return. On May 1 the current 4 per cent issue will be closed, and a new issue will open yielding interest at 4½ per cent and encashable at par on six months' notice, but with a premium of £2 per cent if the bond is held for five years, or £5 per cent if it is held for its full currency of 10 years.

P.O. and Trustee Savings Bank Accounts. "The Post Office and Trustee Savings Banks are integral parts of the savings movement. Money saved in these institutions is effectively lent to the Exchequer. The rate of interest, fixed by statute since the last century, is 2½ per cent. I do not propose to change that. I believe that the savings movement is better off with a savings bank rate that does not fluctuate with the market but stays fixed whether money in the market is cheap or dear But I do propose to accept another proposal which the savings movement have often put forward. I do not think they have ever been very sanguine that any Chancellor would agree to it, but I propose to accept it. I propose to exempt from income tax the first £15 of income accruing to an individual from deposits in the Post Office Savings Bank or the ordinary department of a Trustee Savings Bank.

Naturally no more than £15 will be exempted in the hands of one individual, however many deposits are held Moreover this interest, grossed up by reference to income tax at the standard rate, will be chargeable to surtax. The cost to the revenue, as regards existing deposits, will be about £8 million in 1956-57 and about £10 million

The National Accounts.

1955-56 Out-turn and 1956-57 Estimates (after 1956-57 taxation changes)

Above the Line

Revenue	1955-56 Out-turn	1956-57 Estimate	Expenditure	1955-56 Out-turn	1956-57 Estimate
	£ million			£ million

in a full year The exemption from income tax does not apply to interest earned by deposits in the Special Investment Department of the Trustee Savings Banks. This is the field in which the banks can use their initiative to earn good rates of interest for their depositors, by judicious investment on terms which take full advantage of present market yields I want to be sure that the banks have full scope for this activity. The law at present sets a limit of £1,000 on the amount that a depositor may hold in the Special Investment Department. I am laying an Order before Parliament, which will take effect early in June and will raise the limit to £2,000."

Retirement Provisions by Self-Employed, etc. " I propose to give effect, though in a simplified and modified way, to the recommendations of the second Millard Tucker Committee on relief to the self-employed in respect of provision for retirement. This will grant relief from income tax and surtax, within certain limits, in respect of premiums paid to provide a deferred annuity on retirement. The relief will apply to professional men in practice, to individuals and partners who are not companies, to controlling directors of companies, and, finally, to employees who are not entitled to any benefit under schemes set up by their employers. It will be a condition of relief that the benefits secured by the premiums shall be payable only as annuities and not as lump sums

The relief will be limited to premiums not exceeding £500 or 10 per cent of earned income in any one year. The cost to the revenue of this relief will be small in the first year, perhaps £7 million, but may rise to some £30-£50 million in subsequent years, according to the extent to which advantage is taken of the relief. But, as I expect it to lead to a large amount of new savings, the effect on the economy should be the reverse of inflationary. The scheme covers a very wide range. The potential beneficiaries will be very numerous. The self-employed themselves number perhaps 1,500,000. They range from the city accountant to the village grocer There are the many employees whose jobs are not pensionable For all these, the scheme will be a measure of fiscal justice. It will also increase the savings that we want.

As a corollary of this new relief, I propose to carry out a related recommendation of the Tucker Committee and to relieve from income tax the annuity funds of life assurance companies, in so far as they represent invested premiums arising from deferred annuity business for the self-employed or from the reinsurance of approved superannuation funds This will cost about £500,000 in 1956-57, but the cost will increase later

I also propose to give effect to the Tucker Committee's recommendations that purchased life annuities not connected with a pension scheme should no longer be taxed in full, but that the part representing a return of the purchase money should be exempt. This will be of considerable benefit to those who are too old to secure any great advantage from the deferred annuity scheme It will cost about £1 million in 1956-57 and about £2 million in a full year."

Stamp Duty on House Purchases. " Now I come to an old love of mine—the owner-occupier. There is no better stimulus to saving than house ownership, and I believe that many more people will commit themselves to it if the initial costs are reduced I therefore propose to reduce the rate of stamp duty on house purchase The present rates are 10s. per £100 up to £500, with a sliding scale up to £3,450, when the rate becomes £2 per £100 The new rates will be 10s. per £100 up to £3,500, with a sliding scale up to £5,000 Above £5,000 the full rate of 2 per cent will apply. This relief will cost £4 million this year and £6,250,000 in a full year But it will help savings "

Premium Bonds. " Finally, I have something completely new for the saver in Great Britain—a premium bond. Let me say at once that this is not a pool or a lottery where you spend your money. The investor in the bond I propose is saving his money. He will get it back when he needs it, but as long as he holds it saved, his reward instead of interest is the chance of winning a tax-free prize. The idea is, of course, not novel. Various forms of it have been advocated in the Press recently, and schemes of this kind are being operated by the State in more than one oversea country.

Hitherto the State in this country has fought shy of using chance as an incentive to save Why? I can suggest two reasons. First, there has been the fear (I hope to show the unreasonable fear) of moral objections to rewards for saving based on chance. Secondly, there has been a reluctance to lay out the organization that must be made ready before the public can be invited to subscribe, with the risk that the public may or may not like it. But I have reached the conclusion that the moral objection is not really valid, and that the prospects of success make the outlay on organization well worth while.

Let me deal with the moral factor. This is not gambling, for the subscriber cannot lose This is an encouragement to the practice of savings and thrift by those members of the community who are not attracted by the reward of interest, but do respond to the incentive of fortune. My object is to invite the people to save for interest, or save for the chance of a prize, according to their preference.

The details of the scheme will be announced later, for they cannot be settled before the organization has been built up, and there is a great deal of organization to do. Here is an outline of the essential features It will be a £1 bond. There will be a limit on individual holdings, for we want the savings of ordinary people. The limit might be 250 to start with, or a little more. I am not quite certain A holder will get back his £1 on giving due notice. Each £1 bond that has been held for a fixed period will qualify for a draw to take place every three months. The number and amount of the prizes is not yet finally settled. I have in mind to give an annual prize fund equal in amount to 4 per cent of the bonds drawn, divided into prizes ranging from a few top prizes of £1,000 to a larger number of prizes of smaller amount

To handle the new money subscribed to these bonds on the large scale which I confidently expect, the Postmaster-General has a big organization to plan and build up; and that, of course, coming on top of all the work which I hope my proposals affecting Savings Certificates and Defence Bonds will be giving him in the coming months. The premium bonds have to be printed in large numbers. They will be held as savings—that means that he must organize a register. The drawing arrangements are by themselves a novel administrative problem. For all this, premises must be obtained and equipped and staff recruited and trained. The Post Office must be given time to get ready. I doubt whether we shall be ready at the end of this year. This cannot be done before the New Year.

This interval can be put to good use by the National Savings Movement. Naturally, I have not been able to consult the movement in advance But I hope that after studying the terms they will feel that it preserves and encourages saving.

I offer all this new range of securities as a challenge to the National Savings Movement. The securities are really attractive to every class of saver. To make them so, I have broken rules. It is now up to the movement to break records.

New Cuts in Government Expenditure. " I now come to another field in which the Government must make an effort of saving parallel to that which it is urging on private individuals That is the field of Government expenditure. We all know how difficult has been the task of effecting real economies. But we must be frank. War and the conditions following war produce a general atmosphere in which the whole idea of economy is necessarily weakened. We have to make a new effort, and get back to the point of view that however small a saving may be, it is worth making.

In my room at 11, Downing Street, there is a picture of Mr Gladstone, a copy of the famous Millais portrait I am told that some former Chancellors could not stand those eyes looking at them, day by day, reproachful and nostalgic The picture was, therefore, during certain periods removed Anyway, it is there now. We must all admit there was a great deal to be said for the older approach In those days it was the expenditure that had to be justified, and not the reduction in it

As regards defence expenditure, the net Estimates for this year do not show any increase in spite of rising costs. Indeed, making allowances for the new rates of pay for the armed Forces (which are likely to cost an extra £70 million), the real pressure of the defence bill upon our resources of manpower and materials should be smaller Nevertheless, the task of adapting the needs of defence to new interpretations of strategical and tactical concepts must go on all the time I am authorized by the Prime Minister to say that he and the Minister of Defence, with the other Ministers concerned, are taking special steps to ensure that the defence programme, and particularly those items most affected by recent changes in strategic thinking, are adapted to the new conditions as soon as possible and with maximum regard to the need for economy. I am sure that we shall be able to find worthwhile savings as a result.

So far as civil expenditure is concerned, without injury to the purposes which are common to us all, I believe there is still room for economy Even modest economies are worth making. They can be made both in central and local government, if economy is the order of the day—if people are economy-minded The Prime Minister announced in his Bradford speech that we are determined to make savings in administration He put as the objective a reduction of 10,000-15,000 in the Civil Service I believe this can be done, and perhaps still more can be done. Any economies, of course, whether in defence or in civil expenditure, fall into different classes—some become immediately operative, some only help us a little in the first year but fructify in future years

It is normally the practice for the Estimates to be discussed in the course of the autumn between Government departments and the Treasury. They are finally settled by Ministers in the early months of the calendar year, so that they can be presented to Parliament at the proper time This year the Government have decided that a review of all Government expenditure, civil and military, should be put in hand at once It will be continuous and comprehensive. It is an essential part of the effort which the whole nation is asked for this year

It has often been suggested that this work should be undertaken by some outside body. There are precedents for this. But I do not think that this is the right means to adopt. Ministers are responsible and they must carry their responsibility Although there are many individual detailed matters in which outside advice can be helpful to a Minister, yet it must be the Cabinet as a whole that must be responsible. In any case we intend to do this work ourselves. With the full approval of the Prime Minister and my colleagues, I can say that we are determined that this economy drive should bring us, over the whole field, savings amounting to not less than £100 million in this current year on services provided for in the Estimates as published."

Other Proposals. " The Finance Bill will of course contain the clauses to give effect to the Government's decision to suspend investment allowances, which has already been announced In my February statement I made two exceptions to the general rule. These were shipping and scientific research. Their investment allowance will remain. To these I now propose to add approved fuel-

saving equipment which is installed by way of replacement or modification in existing industrial premises. I think these three have an absolute priority today. The Bill will also contain legislation to correct defects in the profits tax law, which were revealed by decisions of the Courts last year in cases known to the initiated as "Heelex" and "Universal Grinding Wheel."

I propose to carry out the Royal Commission's recommendation that expenditure on what is known as cutting and tunnelling in connexion with an industrial building or structure—and this will include dredging—should qualify for capital allowances, including the initial allowance. This will be of particular importance to the construction of dry docks

I propose also certain changes, based broadly on the recommendations of the Royal Commission, in the basis of taxation of foreign employments, and a change in the residence rules so that in future an employee who goes to work wholly abroad will have his tax liability dealt with on the same basis, whether or not he continues to maintain a home in this country

In estate duty I propose to remove a hardship which can arise where an annuity is charged on settled property, and to carry out an undertaking of my predecessor to grant relief from duty in certain cases of compulsory purchase of land There will be a number of other minor proposals in the field of direct taxation. . .

There are also one or two minor matters relating to Customs and Excise with which I propose to deal The first concerns cider and perry. These drinks have for many years been excluded from the scheme of duties on alcoholic drinks, and I do not propose to introduce a duty on cider or perry as such However, there has recently been a rapid growth in the production of certain special types of cider and perry, of an alcoholic strength much above that of the ordinary product, and comparable in that and other respects with dutiable British wines To protect the revenue and to remove an unfair competitive advantage, I propose to extend the British wine duty to include cider and perry of a strength of 15 degrees of proof spirit or more. I am advised that in general cider and perry made by the ordinary processes do not exceed this strength

To avoid any possible hardship, particularly to farmhouse producers, I propose to provide for the exclusion of cider and perry from the duty even if this limit is exceeded, provided it is established that they have been made wholly by simple fermentation of natural apple or pear juice. This distinguishes those traditional beverages from more sophisticated products, which are made from a wide variety of fruits and vegetables. This change will operate as from tomorrow. It is estimated that the Exchequer will benefit to the extent of about £400,000 in a full year and £350,000 this year

I propose to close a loophole in the law of a very different kind I am informed that an increasing number of people have been able to acquire motor cars of the shooting-brake type in such a way as to avoid, in whole or in part, the purchase tax to which these vehicles are liable. I am including a clause in the Finance Bill to stop this form of evasion."

Strengthening of Budget Surplus. "I now turn to the means of preserving and strengthening the prospective Budget surplus. We certainly cannot afford to take any risks I am intending to place very considerable reliance upon the success of the new savings campaign with the whole body of the public I believe voluntary savings may bring us something of an order of magnitude far beyond anything yet achieved.

I have explained the Government's purpose to make a saving in expenditure of £100 million this year, and I would say frankly that, if I had not been fortified by the willingness of my colleagues to co-operate in this task, I would have felt it my duty to propose very heavy increases in taxation But public saving, that is compulsory saving, must in present circumstances, much as I deplore it, still play an important role. I have to be, this year ar any rate, another Mrs. Pardiggle after all The difficulty is to measure the need, and to find the means which do the least injury to the morale of all our people.

That our economy is basically sound, and in many ways stronger than for many years, we all know. We have escaped from the siege economy of the war and the years immediately after. It may be that in the first thrill of freedom we have gone a little too far in the other direction That is not to be wondered at; fresh air is rather intoxicating. But we must be careful The whole world is watching us today. It will judge us largely by the degree of self-control and self-discipline of which we can prove ourselves capable The prize of success is great; but so is the penalty of failure. For those we are asking to save, we must provide a stable pound. For the whole sterling area and all that this implies, politically as well as economically, we must ensure that our balance of payments shall improve and our reserves reasonably well built up. The period of strain comes in the second part of the year We must do everything we can now to prepare ourselves to take that strain

How do we stand on the 'above the line' surplus? The savings package which I have announced is estimated to produce a tax loss of £20 million in the year 1956-57. If the result is, as I hope, to stimulate savings on a very large scale, this tax loss is far more than offset from the point of view of inflation. It will pay for itself many times over. Nevertheless I must be scrupulous. Even in so good a cause I cannot allow the surplus to be reduced by this £20 million. Moreover, I want not merely to maintain the surplus but to increase it I want to send a message which will be understood that we are determined to protect the £, determined to overcome our difficulties. No one should doubt, here or overseas, that there will be made that extra effort required to achieve success.

We have £445 million in hand. What should the reinforcement be? I have thought a great deal about this—I have also had quite a lot of advice In the end I have reached the decision that I must look in about equal proportions to indirect and direct taxation for the purpose"

Tobacco Duty. "Let me take first indirect taxation The House will recall that the tobacco duty was raised sharply in 1947 and again by a smaller amount in 1948 Since then, the duty having remained unchanged, the prices of cigarettes and other tobacco have risen relatively little. The duty is a good deal less burdensome than it was eight or nine years ago While I am fully aware of the contribution already being made to the Treasury by smokers—the duty yielded £668 million last year—I am sure that part of the additional revenue which I need at the present time can best be obtained from this source. I accordingly propose to raise the duties on leaf tobacco by 3s. a lb., and to make corresponding adjustments in the rates chargeable on imports of cigars, cigarettes, and other manufactured tobacco. The effect will be, for example, an additional 2d on a packet of 20 cigarettes It is estimated that this increase in duty will bring in £28 million in a full year and £27 million in the present financial year The new rates of duty will come into effect from tomorrow.

I have naturally had to consider the arrangements under which old-age pensioners are given partial relief from the tobacco duty. This scheme had its origin and justification in the large increase in duty in 1947, which raised the price of tobacco out of line with the post-war increases for other goods In present circumstances I do not propose to extend it to cover the relatively modest increase now proposed."

Profits Tax. "Now I come to direct taxation. After much consideration I conclude that it would not be conducive either to increased incentives or to the successful operation of the savings campaign to place a further burden upon the income-tax payer. I have therefore decided to secure my purpose in the field of profits tax I propose to increase the rate of tax on distributed profits by 2½ per cent and that on undistributed profits by ½ per cent The effect will be to increase the rates to 30 per cent and 3 per cent respectively. The increases will take effect as from April 1 and there will be the usual provisions for dealing with accounts which overlap that date. The yield next year will be £30 million. It is true that in 1956-57 these increases will not actually reach the Exchequer. They will not therefore directly swell the surplus. Nevertheless, the deflationary effect will not be deferred. The tax to be paid next year will have to be taken into account by boards of directors in formulating dividend policy and expenditure programmes during this year. It will be saved."

Family Allowances. "I am conscious of the burden which is borne in these expensive days by the parents of the large family, and I have looked round for some small concession to help them. It must be something the benefit of which is widely spread, even more widely than the income-tax field I have found it in family allowances. A Family Allowance Bill will, we hope, be passed into law this session. Its purpose is to raise the age to which the allowance will continue if children remain at school or apprenticed The Government propose to ask Parliament to add to this an increase in the family allowance scale for the third and subsequent children at the rate of 2s a week. The cost in a full year will be £10 million. If, as we hope, this change can operate from Oct. 1, the cost will be £5 million for this year. This will be in addition to the £2,500,000 a year which is required to raise the age-limit, for which we have already made provision in the Estimates"

Conclusion. "Let us see how the balance sheet now stands. The savings package will cost £20 million The family allowances £5 million—£25 million in all. Against this, tobacco will bring in £27 million, the end of the bread subsidy £12 million, and miscellaneous tax changes £1 million—£40 million in all. As a result £15 million will be added to the estimated surplus above the line, making it £460 million in all. A further £30 million of profits will be earmarked in this year, and although the money will not accrue to this year's surplus, it will help to buttress it and support it The reduction of Government expenditure will bring further reinforcement. With all these measures together, I claim that our main objective will have been secured.

Naturally I regret that I cannot propose all the various alleviations and mitigations, in the realm of both indirect or direct taxation, which have been pressed upon me. For the time being, these must wait This is a savings Budget The Budget surplus, the Government saving in expenditure, and private savings will together make a foundation upon which we can take up without danger the task of increasing investment for the future. The rate of our progress during recent years makes it necessary to slacken the pace a little. But the great forward march goes on"

As pointed out by the Chancellor, the estimated effect of the taxation changes will be as follows: (*a*) Income Tax exemption of the first £15 of Savings Bank interest: a loss of £8,000,000 in 1956-57 and £10,000,000 in a full year; (*b*) Income Tax exemption on capital element in purchased annuities: a loss of £1,000,000 in 1956-57 and £2,000,000 in a full year; (*c*) Income Tax relief for premiums for retirement annuities: a loss of £7,000,000 in 1956-57 and of from £30,000,000 to £50,000,000 in a full year; (*d*) Income Tax exemption of investment income of funds for retirement annuities and reassured superannuation funds: a loss of £500,000 in 1956 and £1,500,000 in a full year; (*e*) Profits Tax increase: a yield of £750,000 in 1956-57 and £30,000,000 in a full year;

(*f*) reduction in stamp duty on house purchases: a loss of £4,000,000 in 1956-57 and £6,350,000 in a full year; (*g*) stamp duty reduction on certain purchased life annuities: a loss of £100,000 in 1956-57 and £150,000 in a full year; (*h*) tobacco duty increase: a yield of £27,000,000 in 1956-57 and £28,000,000 in a full year; (*i*) wine duty on strong cider and perry: a yield of £350,000 in 1956-57 and £400,000 in a full year. Total yield, £7,500,000 in 1956-57.

Certain aspects of the Budget speech are illuminated by the following information.

Borrowings of Nationalized Industries. Mr. Henry Brooke, the Financial Secretary to the Treasury, stated in the Commons on April 17 that temporary bank borrowings by the nationalized industries as at March 31, 1956, stood at £89,000,000. At the same time Exchequer advances to the National Coal Board amounted to £267,000,000

Market Borrowings by Local Authorities. In another reply on the same date, Mr. Brooke stated that four local authorities had raised £8,000,000 by issues of Stock since Feb. 7, whilst the estimated amount of local authorities' loans raised on mortgage was about £35,000,000.

4½ per cent Defence Bonds. Announcing details of the new issue, the Treasury said that holdings would be limited to £1,000, in addition to any permitted holdings of previous issues. Holders of 2½ per cent Defence Bonds maturing May 1 and Sept 30, 1956, who accepted conversion into the new Bonds would have their Bonds exchanged on the same terms as those issued for subscription.

National Savings Certificates. The Treasury also announcing on April 19 that certificates of the sixth issue (on sale from March 1, 1935 - November 21, 1939), which could hitherto be held for 22 years from the date of purchase, might now be retained indefinitely unless notice to the contrary was given by the Treasury Certificates of the eighth issue (on sale from April 1, 1947 - Jan 31, 1951), which could hitherto be held for 10 years from the date of purchase, might be retained for another 10 years.

Measures announced between Mr. Macmillan's statement on the Government's new anti-inflationary steps (Feb. 17) and his Budget speech were as follows:

Capital Issues. The Chancellor announced on March 13 that the limit of exemption from control of new capital issues by the Capital Issues Committee would be reduced as from March 14 from £50,000 to £10,000. Moreover, he stated, financial institutions would be requested to "examine with special care" transactions involving the sale of freehold properties to them in order to raise capital, and the subsequent leasing of these properties back to the vendor.

Local Authority Loans. The lending rates of the Public Works Loan Board for loans to local authorities were further raised as from March 24, the new rates being as follows (previous rates shown in parentheses) (*a*) for not more than five years: 5⅛ per cent (5¼ p.c.); (*b*) for 5-15 years 5¼ per cent (5⅜ p c.); (*c*) for more than 15 years: 5¼ per cent (5½ p.c.). These increases, which only applied to future loans, were in line with the policy announced by the Chancellor in his Supplementary Budget speech in October 1955, when he emphasized that the rates would be based on the credit of local authorities of good standing in the market for loans of comparable periods.

Hire Purchase Restrictions. A licence issued by the Board of Trade on March 21 exempted from the new restrictions announced by the Chancellor on Feb 17 certain goods manufactured to the special requirements of the buyer, for which an order had been placed and on which work had started before Feb. 18. Goods affected included machinery, machine tools, and certain commercial vehicles which would otherwise have come under the new hire purchase controls for capital goods.

The Chancellor's Budget speech led to an immediate further strengthening of sterling in overseas markets, spot sterling in New York closing on April 17 at $2.80⅞ - $2.81, and the London dollar rate on April 18 ranging from 2.80⅞ - 2.81⅛. Transferable sterling, which had already moved fairly close to the official spot rate since the beginning of April (reaching $2.7816 on April 5), further advanced on April 18 from $2.7845 to $2.7855.

Whilst the Opposition was critical of some features of the Budget, especially the Chancellor's refusal to grant old-age pensioners exemption from the increase in tobacco duty, the Parliamentary Labour Party decided on April 18 to accept the view of the Opposition "Shadow Cabinet" that no censure motion should be tabled.—(Times - Daily Telegraph - Manchester Guardian - Financial Times) **(Prev. rep. Supplementary Budget 1955-56, 14500 A; Revenue and Expenditure, 1955-56, 14798 A; Anti-inflationary Measures, 14705 A; Local Authority Loans, 14664 A; Defence Bonds, 14492 D.)**

A. SPAIN. — Death of Prince Alfonso of Bourbon.

Prince Alfonso of Bourbon (15), the younger son of the Pretender to the Spanish throne (Don Juan), was accidentally killed on March 29 while cleaning a pistol at his home in Estoril, Portugal.—(A.B.C., Madrid) **(Prev. rep. 14300 A.)**

B. FRANCE - ITALY. — President Gronchi's Visit to Paris. - Joint Franco-Italian Communiqué.

President Gronchi of Italy, accompanied by Dr. Martino, the Foreign Minister, paid an official visit to Paris from April 25-27—the first State visit to France by an Italian head of State since King Victor Emmanuel III's visit in 1903. During his stay in the French capital President Gronchi and Signor Martino had conversations with President Coty, M. Guy Mollet, the French Prime Minister, and M. Pineau, the Foreign Minister, whilst President Gronchi attended a State banquet at the Elysée.

A joint communiqué (April 27) stated that the conversations had been "marked by a spirit of friendly and close co-operation." It is summarized below under cross-headings.

NATO Policy. "France and Italy will continue to make their full contribution to NATO, and will act in concert to develop this organization in the economic, social, and cultural spheres in such a way as to give it its full meaning."

European Integration. "France and Italy will support all schemes aimed at tightening the links between the countries of Western Europe, by giving the Council of Europe all the possibilities of action which it must possess in order to exercise fully that initiative and direction which is its purpose. Both countries recognize as their objective a European integration which will affirm the community of ideas and interests which already transcend national frontiers."

East-West Relations. The statement stressed the importance of establishing "more confident and active relations between East and West," and pointed out that such a *rapprochement* would be facilitated by the settlement of urgent problems "such as Germany's reunification in freedom, and the creation of European security on a solid basis."

Disarmament. Both France and Italy were greatly interested in the current discussions on disarmament They believed that rapid progress in this matter would not fail to have an important influence on the international situation, and both countries would, in co-operation, make every effort necessary to achieve effective results.

Middle East. The communiqué said: "Special attention has been given to current problems in the whole of the Mediterranean basin. Any violation of peace and security in this area would directly affect the interests of the two countries, and in consequence close consultations will take place between them with the view of making efficacious that policy of peace, stability, and equilibrium which appears to be the only means of bringing about a settlement of the present crisis in the Middle East."

Franco-Italian Co-operation. "Both Governments are in full agreement on the necessity of achieving fresh progress in the economic co-operation already brought about between the two countries, and to which the joint Franco-Italian Commission established last year is making an active contribution. The concrete measures which this commission has been asked to study will not fail to have favourable effects in this respect."

Conclusion. "President Gronchi's visit to Paris has thus permitted the development and reinforcement of the close community of views already existing between two peoples who are allies and friends. On the eve of important negotiations, this meeting has made it possible to lay the foundations of joint action to solve the principal world problems, notably in Europe and in the Mediterranean basin."

The reference to "important negotiations" in the last paragraph of the communiqué related to the forthcoming meeting of the North Atlantic Council in Paris. The need to introduce greater political, economic and social cohesion into the NATO alliance was stressed by President Coty and President Gronchi at the State banquet held in the Elysée. In the course of his speech the Italian President spoke of the need to transform the NATO, at present "a purely defensive alliance which is by nature transitory and subject to the fluctuations of fear," into "a political, economic and social community based on a solidarity of interests, means and resources."

In a press interview (April 27) Dr. Martino expressed the belief that France and Italy would adopt a joint attitude at the next session of the North Atlantic Council, "which we hope will see the beginning of some concrete development within the framework of Article 2 [of the North Atlantic Treaty]." He added that Italy aimed at the creation of a joint fund for helping under-developed countries both inside and outside the NATO alliance, and that the French Government would submit proposals in this sense to the North Atlantic Council. Dr. Martino also expressed "the firm belief that it will be impossible for Europe to survive without European integration," and stated that the Italian Government shared the French view that "disarmament, European security, and German reunification are interdependent questions." Finally, he announced that a special working committee had been set up to study the position of the Italian community in Tunisia.

President Gronchi and Dr. Martino left Paris on April 28 to visit the Italian and French war cemeteries near Reims before returning to Rome on April 29. Before leaving Paris President Gronchi invited President Coty to visit Italy.

A. MIDDLE EAST. — Soviet Support for U.N. Efforts to achieve Peace in Middle East. - British, U.S. and Israeli Reactions.

The Soviet Government issued a statement on April 17 in which it was announced:

(1) That the U.S.S.R. would "render the necessary support to U.N. measures directed towards ways and means of strengthening peace in the area of Palestine, and implementing the corresponding decisions of the Security Council."

(2) The Soviet Government was of the opinion that "measures should be taken at the earliest moment to ease the tension in the Palestine area without outside interference, which is contrary to the will of the Near Eastern countries and the principles of the United Nations." At the same time the Soviet Government called upon the interested parties "to refrain from any kind of action which may exacerbate the situation on the existing demarcation line between the Arab countries and Israel," as well as to "make the necessary efforts to alleviate the difficult position of hundreds of thousands of Arab refugees deprived of their homes and means of subsistence."

(3) The Soviet Government "considers it essential, in the interests of strengthening international peace and security, to direct efforts towards a stable, peaceful settlement of the Palestine question on a mutually acceptable basis, taking due consideration of the just national interests of the interested parties."

The declaration was prefaced by the following statement:

"... The principal reason for the aggravation of the international situation in the Middle East is the continuous attempt to create and extend military alignments which serve the aims of colonialism and are directed against both the independence of the peoples of the area and the security of peace-loving countries The setting-up of such alignments has ... led to a deterioration of relations between the Arab States and Israel, between Pakistan and Afghanistan, and between Pakistan and India. . The pressure exercised by certain States on independent Arab States to force them against their will to join groupings such as the Baghdad Pact constitutes a violation of the principles of the U N. Organization, and is contrary to the interests of peace and international security.

"One of the most dangerous developments at present is the exacerbation of the Arab-Israel conflict Whatever interpretation one places on the emergence of this conflict, one cannot fail to see that certain circles in some countries .. are striving to make use of this conflict for aggressive aims, and are prepared to go as far as stationing foreign troops on the territory of countries of that area Interference in the affairs of Arab countries is aimed at re-establishing colonialism in the Near East, in which certain oil monopolies are particularly interested. The three-Power declaration of 1950 [i.e the Tripartite Declaration between Britain, the U S A and France] is in line with these aspirations. This is fraught with the danger of the emergence in the area of a hotbed of war, which cannot be permitted ...

"A great achievement of the peoples of the Middle East since the Second World War has been the establishment of the national independence and sovereignty of a number of States which, until recent times, were colonial or mandated territories. The Soviet Union regards with sympathy and ardent support the attempts of the Near Eastern countries—Egypt, Saudi Arabia, Syria, Lebanon, Yemen, Jordan, Libya, Sudan, Iraq, Israel, and others—to strengthen their independence. The Soviet Union has assessed in the same manner the actions of Britain and France, which facilitated the solution of urgent Near Eastern problems by recognizing the independence and sovereignty of these States

"The principles of respect for national independence, non-interference in the internal affairs of States, and the solution of international disputes by peaceful means, are enshrined in the U N. Charter. Being a steadfast supporter of these principles, the Soviet Government wholeheartedly supports the strivings of the Arab States for the consolidation of their recently acquired national independence. ..

"While striving to ensure the consolidation of peace and the development of international co-operation, with due regard for the rightful national interests of the peoples of all countries, the Soviet Government is unswervingly opposed to the violation of peace in the Near East, and to any actions which might lead to the outbreak of armed conflict or be used as pretexts for precipitating such conflicts. It considers that it is possible and necessary to avoid an armed conflict in the Near East, and that it is in the interests of all Near Eastern States not to allow themselves to be provoked into becoming involved in military operations. At the same time the Soviet Government considers that it is illegal and inadmissible to use the Arab-Israel conflict as a pretext for outside interference in the internal affairs of independent Arab States, or for introducing foreign troops in the territory of the Near East."

The Soviet Government's willingness to co-operate in U.N. efforts to bring about a settlement in the Middle East was welcomed in London, Washington and Paris. Mr. Dulles, at a press conference on April 17, pointed out that the U.S. Government had already taken up the position that peace in the Middle East was primarily a concern of the United Nations; he added that, as the Soviet Union was a member of the U.N., this automatically associated the Soviet Government with any U.N. proposals on the Middle East. Mr. Selwyn Lloyd, in a statement to the House of Commons on April 18, said that although there were "some evident mis-statements and inconsistencies" in the Soviet declaration, "H.M. Government nevertheless welcome Soviet emphasis on the need to preserve peace and to reach an Arab-Israeli settlement 'on a mutually acceptable basis, taking due consideration of the just national interests of the interested parties.'"

The Foreign Minister of Israel, Mr. Sharett, said on April 23 that the Soviet declaration "still had to pass the test of action." He thought that the arming of Egypt with Soviet weapons was in "striking contradiction" to the passage in the declaration which professed Soviet opposition to any action in the Middle East likely to bring about armed conflict. Nevertheless, he agreed that there were "innovations" in the Soviet statement which might "herald a change for the better."

On the same day on which the Soviet statement was published (April 17) M. Molotov and M. Mikoyan attended a reception at the Israeli Embassy in Moscow in connexion with the celebration of Israel's Independence Day—a gesture which was regarded as indicating the Soviet Government's desire to foster good relations with Israel as well as with the Arab countries. M. Molotov also stated on April 17 that the declaration "could serve" as a basis for discussions between the Soviet and British leaders during the forthcoming visit of Marshal Bulganin and M. Khrushchev to Britain.—(Soviet Weekly - Times - Manchester Guardian - Le Monde, Paris - New York Times) **(Prev. rep. Middle East, 14793 A.)**

B. COMINFORM. — Dissolution announced by "Pravda." - Cominform Journal ceases Publication.

The dissolution of the Cominform was officially announced on April 18 in the Moscow newspaper *Pravda*, organ of the Soviet Communist Party. The statement said that the eight Communist parties in membership of the Cominform (those of the U.S.S.R., Poland, Czechoslovakia, Hungary, Bulgaria, Rumania, France, and Italy) had unanimously agreed that the organization should be dissolved because it had "exhausted its function," and had also agreed to cease publication of the Cominform journal *For a Lasting Peace, For a People's Democracy.*

The statement (which was signed by all the eight national Communist parties concerned) said that the dissolution of the Cominform had been agreed upon as the result of a number of changes in the international situation, *inter alia*, the fact that Socialism had passed beyond the framework of a single country and had been transformed into a "world system", the formation of a wide "peace zone" that included non-Socialist as well as Socialist countries in Europe and Asia; and the strengthening of Communist parties in capitalist, dependent, and colonial countries.

The impending dissolution of the Cominform (Communist Information Bureau)—founded in 1947 as the successor to the pre-war Comintern (Communist International)—had been reported on various occasions during the past few months. The first official statement to this effect was made on April 17—the day before the *Pravda* announcement—by M. Mikoyan and M. Shepilov (editor of *Pravda*) at a reception at the Syrian Embassy in Moscow.

The news of the Cominform's dissolution was warmly welcomed in Yugoslavia, where the official *Borba* wrote that the decision would be "of benefit for the further advance of socialist and democratic movements generally." The Belgrade newspaper *Politika* said that the Cominform had sought to impose a rigid policy upon countries, which "did not contribute to international co-operation or to the improvement of relations between the peoples of the world."—(Times - Le Monde, Paris - New York Times - Tanjug Agency, Belgrade)
(Prev. rep. Cominform, 8864 A.)

C. SOUTH AFRICA. — Return to United Nations.

The Union Minister for External Affairs, Mr. Eric Louw, announced on April 26 that South Africa would take part in the 11th session of the U.N. General Assembly to be held at the end of the year. Mr. Louw added that he would lead the South African delegation at that session. South Africa had withdrawn from the 10th session (see page 14669, second column) in protest against the Assembly's decision to discuss the *apartheid* question, which was regarded as an interference in the Union's domestic affairs. (Times)

A. SOVIET UNION - UNITED KINGDOM. — M. Malenkov's Visit to Britain. - Study Tour of British Electrical Industry.

M. Georgi Malenkov, Minister for Electric Power in the Soviet Government, and formerly Prime Minister of the U.S.S.R., paid a three-weeks' visit to Britain from March 15 to April 7—officially described as a study tour—as the guest of the Central Electricity Authority M. Malenkov, who was accompanied by 14 Soviet experts in the fields of electrical engineering, technology, and economic planning, visited many power stations and electrical factories in different parts of the country, as well as the atomic energy research establishments at Harwell and Calder Hall. During his stay he exchanged views on problems of electric power production and generation with the Minister of Fuel and Power (Mr. Aubrey Jones), the chairman of the Central Electricity Authority (Lord Citrine), and a number of British experts.

Among industrial installations visited by M Malenkov were the power stations at Battersea, Hams Hall (Birmingham), Castle Donington (Leicestershire), Carrington (Manchester), Braehead (Glasgow), Loch Sloy (the hydro-electric station of the North of Scotland Hydro-Electric Authority), Littlebrook (near Dartford), and Brunswick Wharf (Poplar), as well as the super-grid sub-stations at Carrington and Elstree and the C E A. research laboratories at Leatherhead. In addition, he visited the factories of some of the largest manufacturers of electrical plant, including those of the General Electric Company, the English Electric Company, Metropolitan-Vickers, Babcock and Wilcox, and Scottish Cables Ltd During his visit to Harwell he met Sir Edwin Plowden (chairman of the U K. Atomic Energy Authority) and Sir John Cockcroft (Director of the establishment), and saw the " Bepo " reactor—the first atomic pile built in Britain—and the " Dido " heavy-water pile, which is nearing completion.

M Malenkov also called upon Sir Anthony Eden at Downing Street; attended a Government reception in his honour at Lancaster House; visited the House of Commons, where he listened to a debate on transport problems, addressed Labour M P s at the House of Commons on problems of electrification in the U S.S.R.; visited Mr. Gaitskell (leader of the Labour Party) at his Hampstead home; and called upon the Lord Mayor of London (Alderman Cuthbert Ackroyd) at the Mansion House. Among the places visited by M. Malenkov were Windsor Castle, Hampton Court, Kew Gardens, the British Museum, the National Gallery, Madame Tussaud's, the Royal Opera House (Covent Garden), and Highbury Stadium, where he saw a football match between Arsenal and Manchester United

Outside the capital, M. Malenkov paid visits to Stratford-on-Avon to see Shakespeare's birthplace and tomb, Canterbury, where he was shown round the Cathedral by the Dean of Canterbury, Dr. Hewlett Johnson, and the seaside resorts of Brighton, Blackpool, and Morecambe, where he spoke informally with a number of holiday-makers He also visited Aintree to see the Grand National. While in Scotland he visited Alloway (Ayrshire), the birthplace of Robert Burns, where he joined with the curator and workmen in singing *Auld Lang Syne* and recited some of Burns's poems in Russian. During a tour of Edinburgh he visited Holyroodhouse, Edinburgh Castle, the Scottish National War Memorial, the University, and other places of interest in the Scottish capital. Throughout his tour M. Malenkov met and spoke with many members of the general public in the places visited, and with many workers at the power stations and other installations visited by the Soviet delegation.

M. Malenkov held a press conference on April 5 at the Soviet Embassy (Kensington Palace Gardens, London, W.), attended by some 300 British and foreign journalists, at which he replied to a number of questions.

Asked to make a personal comment on the denunciation of the " cult of the individual " in the U S S R, M. Malenkov said: " This question of the cult of personality has been dealt with in the decision of our party congress (see 14817 A, 14745 A), and also in our Press. We have decided to oppose this cult, which attributes ' supernatural ' features to individuals and belittles the party as a whole . . . In conformity with the principle of collective leadership, we believe that as time goes on this principle of criticizing the ' cult of personality ' will bring fruitful results."

M Malenkov spoke in high praise of the British electricity industry and British technological achievements, saying that the Soviet delegation had found a great deal in common in the technical development of the British and Soviet power industries. Referring warmly to the friendliness which he had encountered everywhere, he said that the outstanding impression of his British visit had been " the sincere concern of all we met—ordinary people, business representatives, political and municipal leaders—to strengthen still further the friendship between our countries " M. Malenkov emphasized that the Soviet people were resolutely opposed to war, which they did not regard as a " fatal inevitability "; stressed the necessity for co-existence between nations, irrespective of their political and social systems; and repudiated any suggestion that Russia wished to improve her relations with Britain at the expense of worsening Anglo-American relations, declaring in this connexion · " Our aim is to bring about an improvement of relations between the Soviet and British peoples and at the same time between the Soviet, American, and British peoples."

On returning to Moscow on April 7, M. Malenkov described the British people as " wonderful," and said that the warmth of his reception had been the " dearest impression " of his visit. He said that he had been most impressed by the " concentration of labour and resources " in Britain, adding in this connexion: " There you have a small island with 50,000,000 people in it, and a tremendous amount of work has obviously been put into every square metre. The results of this are evident both culturally and materially."

At the invitation of the Soviet Government, conveyed by M. Malenkov during his visit to Britain, Lord Citrine and a delegation of British electrical engineers arrived in the U.S.S.R. in mid-April for a similar study tour of the Soviet electrical industry and installations.—(Times - Daily Telegraph - Manchester Guardian - Observer - Soviet Weekly)

B. MONACO. — Marriage of Prince Rainier III.

Prince Rainier III (32), the ruler of the Principality of Monaco, was married on April 19 to Miss Grace Kelly (26), the well-known American film actress.

The marriage was solemnized in the Cathedral of Notre Dame Monaco, by the Bishop of Monaco (Mgr. Barthé), in the presence of the Papal Legate to France and representatives of 24 countries. The French Republic was represented by M. Mitterrand, Minister of Justice, and Great Britain by General Sir Guy Salisbury-Jones, Marshal of the Diplomatic Corps Guards of honour were provided by the Monegasque Army (about 160 men) and by detachments from the British, French, Italian, and U S Navies. The religious marriage ceremony, the civil marriage on the previous day, and the colourful celebrations in Monaco—which attracted tens of thousands of visitors —were televised in eight countries, including Britain, through the Eurovision network.

Princess Grace is the daughter of Mr and Mrs J. B Kelly, of Philadelphia, U S A. Mr Kelly, the son of a farm worker from County Mayo (Ireland), started life as a bricklayer, and subsequently built up one of the largest brickwork construction companies in the United States. Both Prince Rainier and Princess Grace are Roman Catholics.

Prince Rainier is the 26th ruling prince of the House of Grimaldi, which has ruled the independent Principality of Monaco since 1297.—(Le Monde, Paris - Le Figaro, Paris)

(Prev. rep. Prince Rainier, 10676 C.)

Note. Monaco, the smallest country in the world, is about two miles long and half-a-mile wide, the total area being about 360 acres —approximately the size of Hyde Park, London Except for the Mediterranean seaboard, it is entirely surrounded by French territory, the Italian frontier (at Ventimiglia) being a few miles distant. The principality is entirely built over and consists of three towns—Monaco (the seat of the Royal Palace and the Council of Government), Monte Carlo (whose casino provides most of the principality's revenues), and La Condamine The Monegasque population, about 25,000, enjoys exemption from taxation and from military service. Prince Rainier's marriage was warmly welcomed in the principality, particularly as—under historic conventions with France—Monaco would pass under French rule if the House of Grimaldi were to die out without male issue —(Ed. K.C A)

C. NEW ZEALAND. — Establishment of New Zealand Office in Bangkok. - Diplomatic Relations with Siam.

The N.Z. Prime Minister (Mr. Holland) announced on March 26 that it had been decided to establish a New Zealand Office in Bangkok, the headquarters of the South-East Asia Treaty Organization.

Mr Holland explained that when the office of N.Z. Commissioner in South-East Asia had been opened in Singapore in July last (see 14255 B) the Commissioner (Mr. Foss Shanahan) had been concurrently appointed N Z. member of the SEATO Council of Representatives. At the recent Karachi meeting of the SEATO Council, however, it had been decided to provide a stronger central SEATO organization in Bangkok, and the establishment of a New Zealand Office in the Siamese capital would ensure that New Zealand played an effective part in the organization.

Mr. Holland added that Mr. Foss Shanahan would be accredited to the Siamese Government, concurrently with his appointment as member of the SEATO Council, and that Siam intended to establish diplomatic relations with New Zealand on a reciprocal basis and to open a diplomatic mission in Wellington.—(Department of External Affairs, Wellington)

(Prev rep. 14255 B.)

D. LEBANON. — Earthquake Disaster.

Over 130 people were killed, some 500 injured, and about 10,000 rendered homeless by a severe earthquake in the southern Lebanon on March 16. Beirut and other leading towns were not affected, the casualties occurring in a number of villages and small townships in the area around Mount Lebanon. Relief supplies were sent by the Lebanese Government and by Britain, the U.S.A., Egypt, and other countries.

(Times - Le Monde, Paris)

A UNITED KINGDOM. — Agricultural Policy. - Farm Prices for 1956-57. - Opposition by National Farmers' Unions. - Special Additions to 1955-56 Prices.

A White Paper published on March 15 announced the new farm prices and production grants for 1956-57 fixed as a result of the annual February review, and providing for an increase in the value of agricultural guarantees of about £25,000,000 in a full year. The new prices (effective from April 1, 1956, except those for cereals and root crops) are given below, the prices fixed at the previous price review for 1955-56 being shown in parentheses :

Livestock and Livestock Products. *Milk* : An average of 3s. 2.45d. a gallon (3s. 1 95d.). *Fat Cattle* : Steers, heifers, and special young cows, 151s. a live cwt (138s. 8d)*. *Fat Sheep and Lambs* : 3s. 2d. an estimated lb. dressed carcase weight (3s. 0d) *Fat Pigs* : 49s 7d a score deadweight (51s. 4d.)†. *Wool* . An average of 4s. 8¼d. a lb. (4s. 10¼d.).

* The large price increase reflected the Government's desire to encourage beef production, a high level of guarantee being regarded as " a necessary part of long-term policy."

† The 1956-57 and 1955-56 prices were based respectively on feed prices of 31s. 2d. and 32s 5d a cwt , the new price therefore representing a net reduction of 6d a cwt It was explained that the subsidy rate of pigmeat had been reduced because it was not thought desirable to encourage further expansion until both production costs and the unit rate of subsidy could be reduced.

Eggs. Averages of 4s. 1½d for hen eggs (unchanged) and 2s. 4½d. a doz. for duck eggs (2s. 9½d.).

Cereal and Other Crops. (1957 harvest) *Wheat* . An average of 28s. 3d. a cwt. (29s. 9d.) *Barley* : 26s. 6d. a cwt (26s. 0d). *Oats* : 26s 3d a cwt. (24s. 9d.). *Rye* . 21s. 6d. a cwt (23s. 0d). *Potatoes* : 225s. 0d. a ton (217s. 0d). *Sugar Beet* : 130s. 6d. a ton (128s. 1d.)

The White Paper explained that the Government felt that, in order to encourage a greater supply of home-grown feeding-stuffs, it was important to bring the price guarantees for cereal crops more into line with each other. Moreover, at a time when there were large wheat surpluses—especially in other Commonwealth countries—there was no longer any justification for the disproportionate share of the cereals subsidy given to wheat in price reviews in previous years.

Production Grants. After reviewing existing grants (totalling about £60,000,000 annually) the Government had decided to increase subsidy rates for nitrogenic and phosphatic fertilizers from July 1, 1956, involving payments totalling £3,000,000 at present rates of consumption. The maximum rate of grants under marginal production schemes would also be increased, so far as work on marginal farms was concerned, at an estimated additional cost of £1,000,000 in a full year.

Other Subsidies. In order to encourage beef production, the calf subsidy rate would be increased to £8. 10s. for steer calves born on or after April 1, 1956. Grants of up to £200,000 would also be made towards the construction of silos, and legislative powers would be sought to enable the scheme to come into operation in the autumn of 1956.

The White Paper gave the following details of the Government's agricultural policy, the farm industry's production achievements and income, and several other matters relating to price guarantees to farmers.

The Government's Agricultural Policy. It was stressed that the industry must strive to improve its competitive position by concentrating on reducing unit costs of production, meeting consumer choice, and raising quality. Partly owing to the success already achieved in these directions, the cost of Exchequer support to agriculture had been less in 1955-56 than in 1954-55, but it was still high and the industry must do everything possible to reduce it After considering whether agricultural production policy required a revision in the light of the balance-of-payments position, the Government had concluded that national requirements could best be met by intensifying the policy developed since 1952—the objective remaining the maximum production that could be achieved efficiently and economically in accordance with market requirements, steadily increasing technical efficiency, and diminishing unit cost. Even greater emphasis must be put, however, on the substitution of home-grown products for imports, and on economies in the use of such materials as had to be imported. This entailed (1) the continued maintenance of a large arable area, with emphasis on feed crops and temporary grass ; (2) improved standards of temporary and permanent grass, with increased production of beef, mutton, and milk ; (3) the use of feeding-stuffs to the best advantage.

The leading features of current production were (*a*) a continuing long-term expansion of beef, mutton, and milk production ; (*b*) a lower pigmeat output than in the peak year 1954-55 ; (*c*) a relatively small increase in the output of milk and eggs. Although the tillage area had fallen, crop production (particularly of grain crops) had remained fairly stable owing to increased crop yields, but the increase in the area under grass had outstripped the increase in the number of grass-eating animals.

The actual cost to the Exchequer of the changes made in the review (the White Paper explained) would necessarily depend on the trend of market prices and the volume of output. The Government recognized that the Annual Reviews gave assurances for only a short time ahead, and would consider whether any practicable means for providing long-term guarantees could be devised, in order to help the industry with its forward planning

Farm Output and Income. Agricultural output was estimated to have risen from 51 per cent above pre-war in 1954-55 to 55 per cent in 1955-56, the volume of net output being back to the record level of 1953-54. The White Paper added that " substantial falls " in tillage area and pig production had been more than offset by record yields of cereal crops, a better hay harvest, and a continued rise in the output of milk and eggs, whilst breeding for production of beef, mutton, and lamb had continued to expand.

Production costs for commodities covered by the review had increased by about £36,000,000 yearly , of this, about £12,000,000 would already have affected net income in the year 1955-56, leaving about £24,000,000 to take effect on future income The agricultural industry's net income for 1955-56 was put at £299,500,000 (against £285,500,000 in 1954-55), or, adjusted for normal weather conditions, at £292,500,000 The White Paper explained that although agricultural output had recovered from the setback caused by the bad weather of 1954-55, the industry was having to bear a substantial burden of increased costs , there were, however, " reasonable grounds on which to credit agriculture with an increase in efficiency of about £30,000,000 a year for the industry as a whole, equivalent to about 2 per cent of gross output."

Fatstock Marketing Guarantees. It was announced that the Government had decided to discontinue the individual guarantees for various classes of fatstock introduced in 1954 after the ending of control. It was pointed out that the guarantees had been intended to safeguard individual producers against any serious imperfections in the auction markets when private trading had been restored. The auction markets were now working reasonably well, and the risks which the arrangements had been intended to meet no longer justified the elaborate machinery involved ; moreover, the individual guarantees had tended to distort the normal market influences New guarantee arrangements for cattle, sheep, and pigs would be introduced from March 26, with a single deficiency payment for each group ; this would be adjusted whenever necessary to ensure that the average weekly return to producers remained within the following ranges on either side of the respective standard prices—cattle, 23s. a live cwt. , sheep, 4d a lb dressed carcass weight , pigs, 5s. a score lb

Results of Special Review. This Special Review had been carried out at the same time because of increased wage costs, and related only to crops of the 1956 harvest and livestock and livestock products for 1955-56.

For the 1956 crops higher wage-rates were considered on a full year basis, resulting in cost increases of about £3,000,000, whilst for livestock and livestock products the period over which they applied was reckoned as 61¼ days, with an extra cost of £1,750,000. The Special Review proposed additions to the guaranteed prices for 1956 crops of 3d a cwt for wheat, rye, and oats , 2d. a cwt. for barley ; 4s. 3d. a ton for sound potatoes ; and 2s. 5d. a ton for sugar beet. In addition, a total of £746,000 would be made available to Milk Marketing Boards ; small additions would be made to support prices of hen and duck eggs ; and £53,000 would be paid to the Wool Marketing Board. Since market prices of fat cattle had been substantially above the standard price, no additional Exchequer liability would be involved, but small additional payments would be made for sheep and pigs.

The National Farmers' Unions of England and Wales, Scotland, and Northern Ireland issued a joint statement on March 15 explaining that they had been unable to reach agreement with the Government, which had therefore prescribed both the total change in the value of guarantees to the industry and the schedule of commodity prices and production grants for the year 1956-57.

The statement pointed out that the raising of the level of the guarantees by £25,250,000 (compared with increased costs on review commodities of £36,750,000) did not necessarily mean rises either in the subsidy bill or in farm incomes, and that agricultural subsidies actually totalled £27,000,000 less than a year before. The unions contended that to enable the industry to equip itself for an even greater contribution towards closing the trade gap, the total award should have been higher in view of the steady decline in farm incomes over the past three years, in contrast to the rise in other industries. " It is the Government's allocation of the award among the various commodities, however, which causes the greatest concern," the statement continued " The unions consider it unsound in that it fails to make adequate allowance for the effect of rapidly rising costs on producers of milk, pigs, and eggs—the basic products of many small farms. The worst impact will thus be borne by that section of the industry which is least able to withstand it. The unions also condemn in the strongest possible terms the abolition of the guaranteed individual price system for fatstock "

This was the first time in the history of the Annual Price Reviews that the farmers unions' had not concurred in the settlement.—(Cmd. 9721 - Times - Daily Telegraph)

(Prev. rep. 14186 A ; Wage Increases, 14647 A ; 13985 A.)

Note. A renewed demand by the National Union of Agricultural Workers for a " substantial " wage increase, additional to that granted in December last (see 14647 A), was rejected on March 6 by the Agricultural Wages Board On March 8 the N.U.A.W decided to approach the T.U.C. and the Ministers of Labour and Agriculture for discussions on farm workers' wages.—(Ed. K.C.A.)

A. IRISH REPUBLIC.—Balance-of-Payments Deficit. - Imposition of Special Import Levy and Hire-Purchase Restrictions. - Encouragement of National Savings. - Call for Increased Agricultural Production.

Mr. Sweetman, the Minister of Finance, announced in the Dail on March 13 the introduction of a new special import levy ranging from 5 to 37½ per cent on a wide range of household and electrical goods, and the imposition of hire-purchase restrictions, in order to redress the country's balance-of-payments deficit. He also announced a number of measures designed to encourage savings, including a new issue of savings certificates giving a tax-free yield of over 4 per cent and maturing in six years.

Mr. Sweetman said that the balance-of-payments deficit in 1955 was estimated at £35,000,000, and had arisen not because of higher imports of capital goods, but because of increased imports of consumer goods. It had, moreover, been built up at an accelerating rate, having amounted to £3,800,000 in the first quarter, £5,400,000 in the second, £9,700,000 in the third, and £10,300,000 in the fourth, and the "most unsatisfactory" trade figures for January 1956 disclosed no improvement in the situation.

Emphasizing that the special levy was being introduced purely to redress the adverse balance of payments, and was not designed to increase still further the protection already enjoyed by Irish industries, Mr. Sweetman said that it would be retained only as long as the balance-of-payments situation required. As it was not designed to produce revenue for the Exchequer, the revenue from it would be used solely—through the Government's capital expenditure programme—for preserving employment on useful works and easing the pressure on the balance of payments. He estimated that the special levy would reduce imports by £7,000,000 to £8,000,000, but stressed that, however deterrent its effect might be, it could not of itself be expected to right the adverse balance-of-payments situation, though the number of articles affected by the new levy was considerable, they represented only a fraction of total imports

Some of the principal items affected by the special import levy, and details of the hire-purchase restrictions, are given below:

Special Import Levy. (i) Goods and component parts chargeable at 37½ per cent *ad valorem* (U.K. and Canada at 25 per cent): cutlery, razors and blades; photographic apparatus, films, etc.; lawn mowers; vacuum cleaners, hair dryers, domestic washing machines and refrigerators; radio and television sets, gramophones and records, musical instruments; clocks and watches, new articles of clothing (except boots and shoes, linen handkerchiefs, shirts and collars, and various knitted woollen items—socks, underwear, gloves, cardigans, etc.); pipes for smoking; furniture and fittings for interior lighting; toys; precious and semi-precious stones, pearls, and imitation jewellery; fancy goods; umbrellas and sticks; trunks, suitcases and other leather goods; fountain pens; furs; paints and enamels; perfumery; glassware; domestic hollow-ware made wholly or mainly of non-ferrous metals; meat and meat preparations; chocolate; non-alcoholic beverages; edible nuts, spices, pickles.

(ii) Goods chargeable at 15 per cent *ad valorem*: assembled and unassembled motor vehicles, bicycles and chassis.

(iii) Goods chargeable at 1d. a copy (Commonwealth countries ½d. a copy): newspapers and periodicals imported in bulk, excluding daily newspapers, foreign Government publications, and newspapers and periodicals recognized by the Revenue Commissioners as trade, craft, trade union, scientific, religious, or educational publications.

(iv) Goods chargeable at ½d. a copy: daily newspapers, excluding those imported singly through the post and those whose average daily circulation in Ireland did not exceed 1,000 copies.

(v) Goods chargeable at 5 per cent *ad valorem*: newsprint and other printing paper.

Hire-Purchase Restrictions. The following minimum deposits and maximum payment periods would apply: domestic furniture, floor coverings, carpets and mattresses—10 per cent, 2 years, pedal cycles—10 per cent, 1 year; motor vehicles, cycles, scooters, etc.—25 per cent, 2 years; personal clothing—50 per cent, 6 months; radio sets—20 per cent, 1½ years; television sets, musical instruments, cameras, refrigerators, and washing, drying, cleaning and polishing machines—33⅓ per cent, 1½ years, other goods—20 per cent, 2 years.

The Minister of Agriculture, Mr. James Dillon, speaking at Clones (Co. Monaghan) on Feb. 5, called on Irish farmers to launch a five-year plan to expand agricultural output to a level which would enable them to export enough to overcome the country's balance-of-payments difficulties. Their first objective, he said, must be to raise the number of cows and heifers to 2,000,000.—(Irish Times, Dublin) **(Prev. rep. 12137 A.)**

Note. The Irish Republic had a trade deficit in 1955 of £94,100,000, compared with one of £64,300,000 in 1954. Exports in 1955 totalled £110,000,000 (£116,000,000 in 1954), and imports amounted to £204,300,000 (£180,000,000). There was a deficit of £22,600,000 in trade with the United States (imports £26,000,000, exports £3,400,000), and one of £24,400,000 with the United Kingdom (imports £104,600,000, exports £80,200,000).—(Irish Times)

B. RHODESIA AND NYASALAND FEDERATION.—New Political Parties. - The Sebakwe By-Election.

Two new political parties were formed in the Rhodesia and Nyasaland Federation in the early part of 1956, their objectives and the events leading up to their formation being summarized below:

The Commonwealth Party. This party was constituted on Jan. 9 by supporters of Mr. Van Eeden, the Independent member for Kafue (see 14492 B), who assumed the new party's leadership. Earlier negotiations for co-operation between Mr. Van Eeden and the Confederate Party had been abandoned on Jan. 6.

The Commonwealth Party's policy was outlined in a statement published on Feb. 6 as follows: (1) the partitioning of the Federation into a White self-governing Dominion and separate African protectorates under the joint trusteeship of the Dominion Government and the British Government; (2) the acceptance of the Federal boundaries as at present constituted, without precluding the possibility of the African protectorates eventually seceding should their peoples so desire after they had attained self-government, (3) loyalty to the British Commonwealth and use of English as the sole official language.

[It was pointed out in the Press that the party's policy represented a compromise between Mr. Van Eeden's original proposal that territory on the eastern and western borders of the Federation should be handed back to the Colonial Office to be administered as native territories, and the Confederate Party's view that the Federation's boundaries must remain unchanged.]

The Dominion Party. This party, which was formed at Lusaka on Feb. 18 at a meeting attended by delegates from both Northern and Southern Rhodesia, combined all Opposition parties in the Federation except the Van Eeden-Commonwealth group It included, among others, the Confederate Party, the Rhodesia Party under Mr. R. O. Stockil (a member of the Southern Rhodesia Legislature, to which he was elected in 1953 for the Independent Rhodesia Party), and Mr. Jack Keller (an Independent Labour member of the Southern Rhodesia Legislature)

A manifesto published on the same day repudiated "the principles of racial partnership propounded by the Federal Party"; stressed "the necessity for European control and political leadership for the foreseeable future"; but recognized that this leadership depended primarily on "the general acceptance and implementation of a just and practical Native policy, based on principles of equality and common justice." It explained that the party would support the system of separate voters' rolls for Europeans and Natives, in order to give each community the opportunity to develop its own political capabilities, and pledged itself to work for early self-government for Northern Rhodesia, as well as for self-determination for the Federal State and its constituent territories.

On March 16 Mr. Winston Field, a Northern Rhodesian farmer, was elected interim leader of the party, and Mr. John Gaunt, a member of the Northern Rhodesian Legislative Council, its interim deputy-leader. Mr Gaunt, however, resigned from the party on March 19, explaining that he had decided that he could best serve the interests of Northern Rhodesia by abstaining from party politics, whilst Mr. Keller resigned on March 22 owing to dissatisfaction with the party's policy.

A by-election took place on April 5 for the Sebakwe seat in the Federal Parliament, left vacant by the resignation of Mr. J. R. Dendy Young, Q.C., following his appointment to the Southern Rhodesia Bench. It resulted in the return of Mr. R. Williamson (Dominion Party), who received 805 votes against 786 votes for Dr. M. Hirsch (Federal Party) and 603 for Mr. J. Decock (Commonwealth Party).
(Federal Information Dept., Salisbury) **(Prev. rep. 14492 B.)**

C. BRAZIL. — Suppression of Attempted Revolt. - Senhor Adhemar de Barros convicted of Embezzlement.

A small-scale revolt broke out in Brazil on Feb. 11 when Major Haroldo Coimbra Veloso and Captain José Chaves Lameirao stole a plane and flew from Rio de Janeiro to Jacare-Acanga, a landing strip in the Amazon jungle, where they set up a rebel headquarters as an expression of their opposition to President Kubitschek's regime. The revolt received little popular support, however, and although the rebels subsequently claimed to have "captured" the town of Santarém, the movement collapsed on Feb. 27 after the first clash with Government forces. On Feb. 29 Major Coimbra Veloso was captured and Captain Chaves Lameirao and another leader fled to Bolivia, where they were interned. An amnesty for all those accused of "revolutionary activities" since the previous November was proposed by President Kubitschek on March 1.

Senhor Adhemar de Barros, former Governor of the State of São Paulo and an unsuccessful candidate in the recent presidential elections (see 14479 A), was found guilty on March 6 of embezzling funds of the State of São Paulo during his tenure of office; he was sentenced to two years' imprisonment and loss of civic rights for five years. Senhor Adhemar de Barros subsequently fled to Bolivia, where he was granted political asylum. His supporters maintained that the charges against him were political and insisted that he was innocent.

APRIL 28—MAY 5, 1956

A. SOVIET UNION - UNITED KINGDOM. — Visit to Britain by Marshal Bulganin and M. Khrushchev. - Anglo-Soviet Discussions on Disarmament, the Middle East, and Trade and Cultural Relations.

Marshal Nikolai Bulganin, Prime Minister of the U.S.S.R., and M. Nikita Khrushchev, first secretary of the Soviet Communist Party, paid an official visit to Britain from April 18-27, the invitation having been extended by Sir Anthony Eden during the "summit" conference at Geneva in 1955 (see 14369 A). In addition to attending numerous official functions and visiting Oxford, Birmingham, and Edinburgh, the Soviet leaders had important political and economic discussions with Sir Anthony Eden and other British Ministers at 10, Downing Street, and at Chequers, as announced in a communique issued at the conclusion of the visit.

The Soviet party of 44, in addition to Marshal Bulganin and M. Khrushchev, included M. Mikhailov (Minister of Culture), M. Gromyko (First Deputy Minister of Foreign Affairs), M. Redkin (First Deputy Minister for the Shipbuilding Industry), M Kumykin (Deputy Minister for Internal Trade), M. Kurchatov (one of the leading Russian atomic physicists), M. Tupolev (the leading Russian aircraft designer), and a personal bodyguard of 15 men headed by Major-General Zakharov, who was one of those responsible for the security arrangements at the Geneva "summit" conference. A number of Russian journalists also travelled with the party, whilst M. Khrushchev was accompanied by his son, a 22-year-old electrotechnical student

Prior to the arrival of the Soviet leaders, the security arrangements for their forthcoming visit had been discussed and agreed upon by Commander Burt (head of the Special Branch at Scotland Yard) and Colonel-General Serov (head of the Soviet State Security organization), who had arrived in London for this purpose on March 22 General Serov left a few days later after expressing full satisfaction with the arrangements made by Scotland Yard; he did not return with the party accompanying Marshal Bulganin and M. Khrushchev.

Before Marshal Bulganin and M. Khrushchev left Moscow, the Tass Agency issued a statement on April 8 declaring that the Soviet leaders "attach great significance to their forthcoming talks with the British Government," but at the same time expressing regret that the programme would make it impossible for them to "meet ordinary people working in factories and other enterprises."

The statement expressed disappointment that the programme had not included visits to "factories and institutions in Scotland and Wales," such as had originally been agreed with the British authorities, and also that the Soviet leaders would be unable to accept invitations extended to them by "hospitable British citizens" because they would not have sufficient time to do so. It added: "The final programme handed over by the Foreign Office had included a visit to a Birmingham factory, but for some reason or other this has been omitted. . . . Apparently there are still some forces in Britain who do not wish to permit contact between the Soviet leaders and the British people."

[The Tass statement was issued on the day after M Malenkov's return from his visit to Britain (see 14830 A) M. Malenkov, both in his press conference in London and after his return to Moscow, had spoken enthusiastically of the personal contacts he had had with ordinary people in Britain.]

The British Foreign Office issued a statement on the following day denying the allegation that "some forces in Britain" did not wish the Soviet leaders to make contact with the British people. After recalling that the original invitation to Marshal Bulganin and M. Khrushchev had been issued at the time of the Geneva "summit" conference, it went on:

"In September [1955] a first draft programme was submitted to and agreed by the Soviet authorities. Then came the second Geneva conference [i.e the Conference of Foreign Ministers], which revealed substantial differences and left many questions unresolved. Therefore a suggestion was made on Feb. 18—to which the Soviet authorities agreed on Feb. 20—that much more time should be given in the programme to serious governmental discussions. The need for more time for discussion was warmly welcomed in principle by the Russians.

"A new programme was drawn up with this in mind. It was designed to provide the maximum physically possible in the way of visits and in the way of meeting as wide a cross-section of the public as could be combined with the need for serious discussions Visits have been arranged to the British Industries Fair [Birmingham], to Calder Hall [the new atomic energy station in Cumberland], and to Harwell, which should provide plenty of opportunities for seeing industry and its products. Only one item in the programme as suggested by us has been the subject of a Russian reservation, and that is whether they should or should not hold a press conference.

"It is quite untrue that the British Government want to prevent wider contact between our visitors and the British people. In the course of their travels through the country they will have plenty of opportunity, of which they will doubtless avail themselves, of seeing the British people and their way of life."

[It was officially stated during the Soviet leaders' visit that the length of the political discussions, and the strain upon Marshal Bulganin and M. Khrushchev as a result of their many engagements, had not permitted them to visit Calder Hall as originally planned. For similar reasons they were unable to visit the Austin Motor Works at Birmingham—the factory referred to in the Tass statement—as they were only a few hours in the city and had to fulfil many engagements Marshal Bulganin and M. Khrushchev did, however, agree to hold a press conference in London at the end of their visit—see below]

The Soviet Leaders' Visit.

Marshal Bulganin and M. Khrushchev travelled to Britain in the 12,800-ton Soviet cruiser *Ordjonikidze*, which left Baltisk, near Kaliningrad (formerly Konigsberg), on April 15 and arrived at Portsmouth on April 18. After being welcomed by Lord Cilcennin (First Lord of the Admiralty), Lord Reading (Minister of State, Foreign Office), and Admiral Sir George Creasy (C.-in-C., Portsmouth) they travelled by train to London, where they were greeted at Victoria Station by Sir Anthony Eden and Mr. Selwyn Lloyd, the Foreign Secretary. During their first day in London—where they stayed at Claridge's Hotel throughout their 10-day visit—the Soviet leaders made a rapid sight-seeing tour, visiting Westminster Abbey, St. Paul's Cathedral, the Tower of London, and the Royal Festival Hall.

Discussions between the British and Soviet leaders began at 10, Downing Street, during the afternoon of April 19. It was announced that it had been "agreed that both the substance and the progress of the talks, which are in the nature of continuing informal discussions rather than of a conference with a pre-arranged agenda, should be secret," and that "nothing would be divulged except by means of agreed communiqués." As a result, only brief statements were issued from time to time mentioning the principal subjects discussed —e.g. disarmament, the Middle East, and Anglo-Soviet economic and cultural relations—until the publication of the final communiqué (see below) on April 26.

During the morning of April 19 Marshal Bulganin and M Khrushchev laid a wreath on the Cenotaph bearing the inscription: "From the Government and peoples of the Soviet Union, to the eternal memory of the gallant warriors of Great Britain who, together with the gallant warriors of our country, gave their lives during the First and Second World Wars in the common struggle for peace and the security of nations."

Sir Anthony Eden and other British Ministers, as well as Mr. Gaitskell (Leader of the Opposition), were present at a lunch at the Soviet Embassy at which informal speeches were made by Sir Anthony, Marshal Bulganin, and M Khrushchev. The ministerial discussions during the afternoon were attended, on the British side, by Mr. Selwyn Lloyd, Mr. Macmillan, and Sir William Hayter (H.M. Ambassador in Moscow) in addition to the Prime Minister, and on the Russian side by M. Gromyko, M. Mikhailov, M. Kumykin, and M. Malik (Ambassador in London), in addition to Marshal Bulganin and M. Khrushchev. During the evening a dinner was given for the Soviet leaders at 10, Downing Street, which was attended by Sir Winston Churchill, Mr. Gaitskell, Lord Attlee, Mr Herbert Morrison, Service chiefs, the president of the Federation of British Industries and the chairman of the Trades Union Congress.

After further discussions at Downing Street during the morning of April 20, Marshal Bulganin and M. Khrushchev attended a luncheon at the Mansion House given in their honour by the Lord Mayor of London. The ministerial meetings were resumed in the afternoon, after which the Soviet leaders went by boat from Westminster to Greenwich, where a dinner was given for them by the Admiralty in the Painted Hall of the Royal Naval College.

After visiting the Atomic Energy Establishment at Harwell during the morning of April 21, the Soviet leaders paid a short visit to Oxford, where they were greeted by the Mayor of the city and the Vice-Chancellor of the University, saw Magdalen College and New College, and were given a boisterous reception by several thousand undergraduates. In the afternoon they motored to Chequers for further discussions with Sir Anthony Eden, in which Mr. R. A. Butler and Mr. Selwyn Lloyd took part on the British side and M. Gromyko and M. Malik on the Russian side.

After further discussions at Chequers (where they had stayed overnight) on April 22, Marshal Bulganin and M. Khrushchev motored in the afternoon to Windsor, where they were received in audience by H.M. the Queen. The Soviet leaders, who were at Windsor for over an hour, presented an address to the Queen from President Voroshilov, and also presented gifts to all the Royal family—a sable fur wrap for the Queen, a horse for the Duke of Edinburgh, a pony for Prince Charles, and a small bear cub ("Nikki," subsequently cared for at the London Zoo) to Princess Anne. In the evening the Soviet leaders attended a reception given in their honour by the London County Council at County Hall.

On April 23 Marshal Bulganin and M. Khrushchev flew from London to Birmingham, where they attended a civic reception given by the Lord Mayor and paid a short visit to the British Industries Fair at Castle Bromwich. M. Khrushchev spoke at a lunch given by the Birmingham Chamber of Commerce, some extracts from his speech—which attracted considerable attention—being given below.

"... We have come to your country with the very best intentions. And we are very pleased at the hospitality being shown us by the British Government and people. No-one able to read the expressions of the people, the look on their faces, could fail to note that the ordinary people of Britain are pleased that we have come. I don't want to exaggerate the importance of Bulganin and myself. But we represent a great and most interesting country. You may like us or you may not like us, but that won't stop the Soviet Union from existing.

"Representatives of the Press may say in this connexion: 'Do you mean to assert that the British people are pleased at your visit—have you not heard some shouts of disapproval in the crowds?' Yes, I have heard them. I myself saw two posters on which were inscribed in Russian unfriendly words towards the Soviet Union. I even saw someone in the crowd shake his fist at us.... What can we say about this? There is a Russian saying: 'It is a small flock that has no black sheep.' Not all the children of any father are necessarily clever. And it is quite possible that these black sheep are not even of your own family. [An apparent reference to the hostility displayed to the visit of the Soviet leaders by Polish and other Eastern European exiles in Britain—see below.]

"I would like to remind those who shake their fists at us that this method has already been tried. This is not a reproach, but I wish to be perfectly frank. After the October Revolution there were many who came at us brandishing their fists—in the north the British, in the east the Americans and the Japanese, in Odessa the French, and in the Ukraine the Germans. But the Russian people, defending their country, threw the interventionists out. Hitler also tried to use his fists against us, but you know the outcome of that. So, you see, the fist method won't do.

"Isn't it time we became more sensible and stopped shaking fists? It requires less intelligence for a fist-fight than for establishing good relations between peoples. We have not come to sow discord and suspicion, but with good intentions. We have come on a friendly visit at the invitation of Sir Anthony Eden. We are conducting talks with British Government leaders. The tone of the talks is one of frankness, friendliness, and mutual understanding, though we may be blunt now and then. We are profoundly convinced that our talks will produce good results. Perhaps we may not reach complete agreement at once. But I think we will get rid of many obstacles and lay good foundations for relations which will grow into friendship between our peoples....

"A major factor in the development of good relations is commerce. We want to develop trade relations between the Soviet Union and Britain, and also with other countries. We are told that we are already trading now. But allow me to ask—on what basis is this trade being conducted? Let us take one example. If you only buy crab from us, and only sell us herring—that would hardly be real trade. True, our crab is good, and your herring is not so bad either. But judge for yourselves—is that real trade? Many more such instances could be cited. That is the sort of trade offered us under the policy of discrimination. But discrimination against the U.S.S.R. cannot fail to wound the pride and dignity of our country, and we react accordingly. Naturally, such trade cannot be of any help in establishing good relations between countries. It is hard to speak seriously of disarmament without the removal of trade discriminations.... Without this, it will be impossible to achieve success in solving the problem of disarmament.

"Some politicians say—'What if war should break out, isn't it dangerous to trade in strategic goods?' But what are strategic goods? The answer depends on your point of view. Butter can be regarded as strategic goods. In our opinion it is time such an approach was renounced, and real trade developed. It is necessary to sell whatever there is a demand for. All right, if you wish, don't sell us guns, aircraft, ships, particularly as at the present rate of technological development they rapidly become obsolete. What was fine yesterday becomes out of date tomorrow. We all know that.

"Take aircraft development. You are mistaken if you think the Soviet Union lags behind you in aircraft construction. Today we were shown the latest four-engined passenger plane. It was a fine plane. We were told it could carry 90 persons. Our well-known aircraft designer, Academician Tupolev, is working on a plane that will seat 170 persons. This will also be a four-engined plane. We came to Birmingham from London in a four-engined plane seating 47 persons. This also was a fine plane with a speed of 500 kilometres [an hour]. The Soviet TU-104 jet-engined passenger plane is twin-engined, seats 50, and has a speed of 800 kilometres [an hour].

"Nor is there any ground for believing that we lag behind in the development of other forms of technology. It is a fact that the Soviet Union was the first to explode a hydrogen bomb from an aeroplane, whereas in the United States, according to available information, only a hydrogen bomb installation was exploded, and now they are preparing for fresh tests of thermo-nuclear weapons. Nor do I think we are behindhand in the development of guided missiles.

"Why do I mention this? Not in order to intimidate anyone. We have called and continue to call for the reduction of armaments and the prohibition of atomic and hydrogen weapons. We have made constructive proposals on this problem. If I speak of this, it is only to point out that no restrictions on trade have been able to hold back technological development in the Soviet Union. . .

"We know of the efficiency of British industry. Your machine-tool industry, for instance, is well developed. Our country could buy machine-tools from you. That would be beneficial both to you and to us. Instead of spending our efforts on producing some of the machine-tools we need, we could buy them from you and place good orders with you. But since you won't sell them to us, we have to organize their production ourselves. Of course, this entails additional expenditure, but in the long run we build the machine-tools we need and you lose valuable orders . .

"Our peoples have more than once fought on the same side against a common enemy—against Napoleon, in the First World War, and in the Second World War. But in the past it has repeatedly come about that, after the end of these wars, relations began to deteriorate. Our opponents took advantage of this, rearmed, and once again unleashed war. We must display great wisdom and prevent the unleashing of a new war. We are firm in our desire to strengthen friendly relations between the Soviet Union and Britain."

Marshal Bulganin and M. Khrushchev, accompanied by M. Tupolev, flew from Birmingham to the R.A.F. station at Marham (Norfolk), where they witnessed an aerial display by the latest types of British military aircraft, including *Canberra* and *Valiant* bombers and Hawker *Hunter* fighters. After the display they invited the Secretary of State for Air (Mr. Nigel Birch) and the Vice-Chief of Air Staff (Air Chief Marshal Sir Ronald Ivelaw-Chapman) to visit the U.S.S.R.

In the evening the Soviet leaders returned to London, where they were the guests of the Labour Party Executive at a dinner given at the House of Commons. At this dinner, which was attended by some 40 Labour M.P.s, some unpleasantness arose after a speech by M. Khrushchev (the text of which was not published) and after he had rejected a request by Mr. Gaitskell that the Soviet leaders should use their influence to secure the release of Social Democrats imprisoned in the U.S.S.R. and other East European countries. It was stated in the Press that sharp altercations had occurred between M. Khrushchev and Mr. George Brown (M.P. for Belper), who, it was stated, had made a number of interjections during M. Khrushchev's speech. It was also reported that M. Khrushchev had declined to accept a list of imprisoned Social Democrats, presented by Mr. Gaitskell, on the ground that no such persons were imprisoned in the U.S.S.R., and that the position in the "people's democracies" concerned those countries only.

After renewed ministerial discussions at 10, Downing Street, during the morning of April 24, the Soviet leaders spent the afternoon at the Houses of Parliament, where they lunched with the Speaker of the House of Commons and subsequently listened to question time in the House of Commons and to a debate in the House of Lords. In the evening they were present at a reception given by M. Malik, the Soviet Ambassador, at Claridge's, the 1,000 guests including Sir Anthony and Lady Eden and Mr. Harold Stassen (special adviser to President Eisenhower on disarmament questions) who was then in London. Mr. Stassen and M. Khrushchev had a personal discussion during the evening.

During their visit to the House of Commons, where they sat in the Distinguished Strangers' Gallery, the proceedings were interpreted for the Soviet leaders by Captain H. B. Kerby (Conservative M.P. for Arundel and Shoreham), who speaks Russian fluently. Marshal Bulganin and M. Khrushchev heard Labour members ask the Prime Minister to make a statement on his discussions with them, to which Sir Anthony replied that full details would be issued in the communiqué to be published after the talks had ended. Later the Soviet leaders had tea with the Lord Chancellor (Viscount Kilmuir), attended a reception given in their honour in the Royal Gallery of the House of Lords, and listened to a part of the debate in the House of Lords on the Clean Air Bill.

The Anglo-Soviet discussions ended on April 25 after two long meetings at 10, Downing Street, during the morning and afternoon. It was announced that the official communiqué would be issued after the Soviet leaders' return from their visit to Edinburgh on the following day (see below). In the evening of April 25 Marshal Bulganin, M. Khrushchev, and Sir Anthony Eden visited the Royal Opera House, Covent Garden, to see the Sadlers Wells Ballet.

The Soviet leaders began the last full day of their visit (April 26) by laying a wreath on the grave of Karl Marx at Highgate Cemetery. On returning to their hotel they had a farewell meeting with Mr. Gaitskell, who was accompanied by Mr. James Griffiths (deputy leader of the Labour Party), Mr. E. G. Gooch (chairman of the party), and Mr. Morgan Phillips (the party secretary). A statement issued from Transport House (the Labour Party's headquarters) said that the meeting had lasted over an hour, that it had "helped to remove some of the misunderstandings," and that it had "ended in a

very friendly manner." Mr. Gaitskell said that his farewell meeting with the Soviet leaders had been "cordial and friendly," though no progress had been made on the question of Social Democrats imprisoned in "Iron Curtain" countries.

Later in the day Marshal Bulganin and M. Khrushchev flew to Edinburgh, where they were welcomed by the Secretary of State for Scotland, Mr. James Stuart, and the Lord Provost, Sir John Banks. In the course of a five-hour sight-seeing tour they visited Holyroodhouse, Edinburgh Castle (where they attended a banquet given in their honour), the Scottish National War Memorial, the City Chambers, and the Forth Bridge, returning the same evening to London by air.

Communiqué on Anglo-Soviet Discussions.

The final communiqué on the discussions between the British and Soviet leaders, signed by Sir Anthony Eden and Marshal Bulganin, was issued in the evening of April 26. It was worded as follows (cross-headings inserted):

"From April 18 to 27 Mr. Bulganin and Mr. Khrushchev visited the United Kingdom at the invitation of H.M. Government. During their stay they held a series of conversations with the Prime Minister, Sir Anthony Eden, the Lord Privy Seal, Mr. R. A. Butler, the Foreign Secretary, Mr. Selwyn Lloyd, and other members of H.M. Government on Anglo-Soviet relations, as well as on the international situation as a whole. These talks have been conducted on both sides in a spirit of candour and realism. They have ranged over most international questions of current concern, and there has been a full and useful exchange of views.

Relaxation of International Tension. "The representatives of the Soviet Union and the United Kingdom recognized that the strengthening of Anglo-Soviet relations in political, trade, scientific, cultural, and other fields would be in the interests of the peoples of both countries. They were also convinced that this would help to consolidate general peace and security.

"They expressed the determination of their Governments to work for a further relaxation of international tension. Having in view the present situation, where there is not the necessary confidence between countries, they expressed their determination to take all possible measures to facilitate the strengthening of mutual confidence and the improvement of relations between States. They recognize that one of the important factors in strengthening international confidence consists in personal contacts between leading statesmen, which have produced positive results.

"The two countries, in their relations with each other and also in their relations with other countries, will be guided by the principles of the United Nations. They are convinced that the basis of friendly co-operation and peaceful co-existence of all countries, irrespective of their social systems, is respect for national independence and sovereignty, territorial integrity, and non-interference in the internal affairs of others. They will do their utmost to put an end to the armaments race in all parts of the world, and thus to free the peoples of the world from the threat of a new war.

"The representatives of both countries attached particular importance to maintaining security in Europe, being convinced that peace and security in Europe are of determining importance in preserving the peace of the world. But an understanding on the means to achieve that end was not reached.

"As regards other unsettled international problems, including those of Europe and Asia, on which an exchange of views has taken place, both parties will strive to promote a solution in the interests of consolidating general peace.

"The representatives of the Soviet Union and the United Kingdom have come to the following conclusions with regard to certain individual problems which have been under consideration:

The Middle East. "The United Kingdom and the Soviet Union have the firm intention to do everything in their power to facilitate the maintenance of peace and security in the Near and Middle East. For this purpose they will give the necessary support to the United Nations in its endeavour to strengthen peace in the region of Palestine and to carry out the appropriate decisions of the Security Council.

"The Governments of the two countries consider that effective measures should be undertaken in the immediate future to this end in accordance with the national aspirations of the peoples concerned, with the necessity of ensuring their independence and in full conformity with the principles of the U.N. Charter.

"The Governments of the two countries call on the States concerned to take measures to prevent the increase of tension in the area of the demarcation line established in accordance with the relevant armistice agreement between Israel and the Arab States.

"They will also support the United Nations in an initiative to secure a peaceful settlement on a mutually acceptable basis of the dispute between the Arab States and Israel.

"They recognize the importance of the problem of the refugees, and accordingly will support U.N. action directed towards the alleviation of their hardships.

"The Governments of the two countries express the strong hope that other States will also do everything possible to help the U.N. in bringing about a peaceful solution of the dispute between the Arab States and Israel, and thus to strengthen peace and security in the Near and Middle East.

Disarmament. "In the course of the exchange of views the disarmament problem was discussed. The representatives of the two countries reviewed the position reached in the discussions in the U.N. and the proposals made by the Powers concerned. It was agreed that a solution of this problem would be of the utmost significance for the maintenance of universal peace.

"The Governments of the Soviet Union and the United Kingdom attach great importance to concluding an appropriate international agreement on this problem. Such an agreement would help to reduce international tension, to increase confidence between States, and to relieve the burden of military expenditures.

"The two Governments agreed on the paramount importance of saving humanity from the threat of nuclear warfare. Their common objective remains the ultimate prohibition of nuclear weapons and the devotion of nuclear energy exclusively to peaceful uses, and they will continue their efforts to achieve this aim.

"The Governments of the Soviet Union and the United Kingdom recognize the necessity of reaching an agreement to start without delay upon practical measures for a substantial reduction under appropriate international control of the armed forces of States (with corresponding reduction in their armaments), beginning with reductions by the five great Powers.

"The Governments of the two countries will continue their efforts to promote the necessary understanding on this question between the States concerned in the U.N. and the Disarmament Sub-Committee.

Anglo-Soviet Trade. "Questions were also considered relating to a further development of trade between the U.S.S.R. and the United Kingdom. The representatives of the two countries agreed that the development of trade between the U.S.S.R. and the U.K. could make an important contribution to closer relations between the two countries. This would serve to promote a more rational use of production possibilities in each of them, and would stimulate trade between East and West.

"In the course of the discussions the Soviet representatives stated that the Soviet Government were willing to extend trade with the U.K. considerably. The British representatives also stated their desire to see an extension of this trade. The Soviet representatives stated that the Soviet Union could in the coming five years (between 1956-60), if there were no trade restrictions or discrimination, increase purchases in the U.K. to as much as nine to 11 billion roubles, i.e. £800,000,000 to £1,000,000,000, including the placing of orders for various equipment and ships for some four to five billion roubles, and the purchase of a wide range of industrial goods and raw materials for five to six billion roubles. A comprehensive list of machinery, equipment, and ships which could be ordered by the Soviet organizations from the United Kingdom was handed to the U.K. representatives.

"The U.K. representatives pointed out that part of this list was covered by existing strategic controls. Nevertheless, a substantial part of the goods and raw materials on the list was free of restriction, and accordingly there was scope for an increase of trade. The Soviet representatives pointed out that the increase envisaged in Soviet orders in the U.K. for machinery, equipment, and ships, as well as the increase in purchases of raw materials and industrial goods, would make it necessary for them to increase their earnings of sterling by a corresponding development in their exports, and the U.K. representatives pointed out that the U.K. market was open to a wide range of Soviet exports.

"The representatives of the two Governments agreed, in the light of the foregoing considerations, that the above-mentioned list should be studied further on the British side with the help of Soviet technical experts. They also agreed to study further the matter of exchanging consumer goods and facilitating contact between buyers and sellers."

Joint Declaration on Cultural Contacts.

Appended to the communiqué was a "Joint Declaration on the Further Development of Contacts between the United Kingdom and the U.S.S.R.", worded as follows.

"The Heads of Government of the United Kingdom and the U.S.S.R. . . . have agreed upon the following:

(1) They have noted with satisfaction that certain results have been achieved in the relations between the two countries in respect of cultural, scientific, and technical contacts. There have been governmental, municipal, scientific, and cultural visits from each side, as well as visits by theatre companies, musicians, and sports teams.

(2) They consider it desirable that the Governments of the two countries should accord to the citizens of each country every assistance in acquainting themselves with the experience and achievements of the other in the fields of literature, painting and sculpture, the theatre, music, the cinema, broadcasting and television, as well as of science, technology, education, and public health.

(3) They favour the increase of all types of exchanges between artistic, technical, scientific, and sporting organizations on a reciprocal basis, drawing on the best which each country has to offer, and the exchange of suitably qualified students to study at the universities in each country.

(4) They wish to encourage the exchange of information between academic, professional, and scientific bodies in the U.K. and the Soviet Union, and to increase the exchange between the two countries of publications in the fields of science, technology, and culture.

(5) They look forward to an increase in individual and group visits of Soviet citizens to the U.K. and of U.K. citizens to the Soviet Union.

Both Governments will afford all possible assistance in giving effect to these measures, in particular by creating more favourable economic conditions [implying a more favourable sterling-rouble exchange rate, as had been proposed by the U.K. delegation at the Geneva conferences].

(6) With a view to improving the mutual understanding which it is the object of these exchanges to promote, they agree to provide every opportunity to the peoples of the United Kingdom and the Soviet Union to learn about each other's opinions and ways of life. To that end they will take practical steps directed towards ensuring a freer exchange of information by the spoken and the written word."

Soviet Leaders' Press Conference in London.

Before leaving London on the morning of April 27, Marshal Bulganin and M. Khrushchev held a press conference at the Central Hall, Westminster, which was attended by some 450 British and foreign journalists. After reading a lengthy statement—mainly a paraphrase of the communiqué, and dealing principally with disarmament, the Middle East, and Anglo-Russian trade—Marshal Bulganin announced that Sir Anthony Eden had accepted an invitation to visit the Soviet Union, the date of which, however, had not yet been fixed owing to the Prime Minister's other engagements.

After thanking Sir Anthony Eden and the British Government and people, Marshal Bulganin said that he and M. Khrushchev were "leaving this remarkable country filled with friendly feelings towards the British people and their Government, who have shown great hospitality to us." Continuing, he said that it was "no secret" that there had been "sharp moments" during the Anglo-Soviet discussions, which had encountered at times "certain under-water rocks." This, he added, was not surprising—if only because Britain was a member of the Atlantic Pact, "for which the Soviet Union cherishes no love," whilst the U.S.S.R. was a signatory to the Warsaw Treaty.

Turning to "the most important problem of today," Marshal Bulganin said that it had to be recognized that the subject of disarmament was "in a bad way." Referring to the continuing deadlock in the U.N. Disarmament Sub-committee, he declared *inter alia*: "On a number of questions we have accepted the proposals previously made by the Western Powers—for instance, on the level of armed forces of the five Powers. But now we have to defend these proposals against the representatives of those very same Powers. As soon as we expressed agreement with their proposals, they hastened to renounce them. Perhaps you know what is the matter here. It is a mystery to us. . . ." Nevertheless, in spite of existing differences, the Soviet Government hoped that the great Powers would "find it possible to take some practical steps forward in the matter of ending the arms drive," and also to abolish atomic weapons and save mankind from the threat of nuclear warfare—an objective on which both sides were in agreement.

As regards the Middle East situation, Marshal Bulganin said: "In the Soviet Government's view, the main source of friction in the Middle East, the reason for the deterioration of relations between the Arab States and Israel—as well as between other countries—is the creation of military groupings such as the Baghdad Pact. The British side does not share our views on this question. We in turn could not recognize as correct the British view on this question. As you see, here we take different stands. At the same time both sides have expressed the firm intention to do everything in their power to facilitate the maintenance of peace and security in the Middle East, and to give the necessary support to the U.N. in its endeavour to strengthen peace in the region of Palestine. We have also reached agreement that effective measures should be taken in the immediate future to this end. . . . In particular, both sides will support the U.N. in an initiative to secure a peaceful settlement, on a mutually acceptable basis, of the dispute between the Arab States and Israel." The agreement reached on this question, he added, "opens up no small possibilities for the two countries to give an example of joint work for the cause of peace in such an important area."

With regard to Anglo-Russian trade, Marshal Bulganin said that the U.S.S.R. desired greater trade exchanges with Britain, "not because we cannot get along without British goods, but because it would be more advantageous for us to buy certain goods in Britain than to make them in our own country." After stressing the value of greater trade exchanges to both countries, and emphasizing the U.S.S.R.'s opposition to "any discriminatory restrictions in international trade—a product of the cold war," he said that he understood "the delicacy of Britain's position in this respect," but expressed his conviction that the British, "a practical and business-like people," would sooner or later find a way to "a more sober trade policy." In conclusion, Marshal Bulganin stressed the desirability of closer cultural contacts between the two countries, and of increased tourist traffic.

After Marshal Bulganin had read his statement, both he and M. Khrushchev replied to a number of questions by journalists.

M. Khrushchev was asked how he reconciled his desire for increased Russian trade with Britain, expressed in his Birmingham speech, with statements that the U.S.S.R. did not intend to drive a wedge between Britain and her allies. He replied: "So far from driving in wedges, we should like to pull them out. But on this matter of trade I think that a wedge between the U.K. and the U.S.A. already exists. That wedge has not been driven in by us but by the U.S.A., because Britain, for her part, is interested in free trade to develop her commercial ties."

Marshal Bulganin, in reply to a question, suggested that Britain might help the U.S.S.R. to establish good relations with the United States. He declared in this connexion: "We are trying to achieve friendly relations with Britain, but not at the cost of worsening her relations with other States friendly to her. Our relations with the United States are far from sufficiently normal, which we regret, and for our part we will do everything to improve them."

Asked whether the Soviet leaders would influence other Governments to reduce arms shipments to the Middle East, M. Khrushchev replied: "That is a very delicate question, but we do not wish to by-pass it. Our country does not ship arms to anybody, and we would like it if there were no shipments at all, but such shipments are taking place. I think we would answer wrongly if we said we would not sell arms to States that urged us to do so. The reason for that is that shipments are being made by other countries. If it were possible to agree, through the U.N. or otherwise, that this should not take place, we would welcome it and be prepared to take part in such an undertaking, which would help to bring about peaceful conditions in troubled areas of the world."

Asked, finally, whether he and Marshal Bulganin considered their visit to Britain to have been worth while, M. Khrushchev said: "We believe we have achieved a great deal and that our visit was very worthwhile. The main thing we have achieved is greater confidence between the Soviet Union and Britain. . . . Neither the British people nor the British Government want a war."

After their press conference, Marshal Bulganin and M. Khrushchev travelled by train to Portsmouth, where they embarked on the *Ordjonikidze* for their return voyage. They were seen off at Victoria by Sir Anthony Eden, with whom the Soviet leaders exchanged gifts, and at Portsmouth by Mr. Selwyn Lloyd.

Sir Anthony Eden's Broadcast on the Bulganin - Khrushchev Visit.

The following radio and television broadcast on the visit of the Soviet leaders to Britain, and on the Anglo-Soviet discussions, was made the same evening (April 27) by Sir Anthony Eden:

"I have been anxious to give you some account at the earliest opportunity of our discussions with our Russian guests. Inevitably we have had to keep a cloak of secrecy over the talks while they were actually going on. Now I can tell you about them. They were certainly worthwhile. Some people had doubts about the wisdom of inviting the Soviet leaders to this country for discussions. This is not surprising in view of the history of Anglo-Soviet relations since the war. It is true that, last summer, we had the 'meeting at the summit,' at Geneva, which showed some improvement, but since then the great Powers have been deadlocked once again. All the same, I felt sure it was right to have this meeting. To give up the hope of ever meeting those with whom we have disagreement would, indeed, be a counsel of despair, and on the whole I thought it was very suitable that our discussions should take place in London this time.

"Now our talks are over and our guests are on their way home. They have lasted more than a week and have been strenuous. . . . There was some plain speaking. That was inevitable, and I think it was helpful because both of us were pursuing serious purposes in our talks. We did not expect, neither did you, that in a few days we could solve the great differences that divide the world. On some of them we made no progress. We did not agree about the German problem, for instance, because we in Britain think there should be free elections in Germany and that she should decide her own future that way. We have neither of us changed our point of view about that or about some other important things. On the other hand, there are a number of issues on which we have found an encouraging measure of agreement—greater, I admit, than I expected when we began.

"We both want to try, for instance, to bring about a settlement of the conflict between Israel and her Arab neighbours . . . on terms acceptable to both sides. . . . We declared ourselves ready to back any U.N. initiative to bring about a permanent peace. Meanwhile, we join in asking both sides to respect the existing armistice.

"Then there is this tangled question of disarmament. The more apprehensive nations are, the less willing they are to disarm, and yet, if you can get a measure of agreement, you may thereby create more confidence between the nations. . . . We tried to find some means, by controls or one means or another, to . . reduce this heavy burden of armaments. Probably this is the most difficult international question of all. I hope the exchanges we had will help the U.N. Sub-committee which is sitting in London, and on which is represented not only Britain and Russia but other countries. I hope that what we argued out together may be of some help to them to make progress.

"Then there is the question of trade, important not only for itself but because a freer flow of trade can help towards understanding between countries. The more they know each other, the better it will be. And the more interlocked their commerce, the stronger the influence for peace. As many of you will remember, as long ago as 1949 there have been restrictions on the supply of certain strategic materials to Russia. They have been reduced in recent years, but they still exist. The free nations of the West were parties to the agreement which enforced them and they still are, so there can be no question of altering them by ourselves alone. We explained this to the Russians.

"We also explained that in our view there was scope for considerable improvement in trade between us outside these controls altogether, and I am confident that this is so. And now the Russians have brought us not only a figure of £200,000,000 a year to which they want to build up their purchases from us, but an actual shopping list. We are going through this carefully and we think that about two-thirds is not affected by restrictions at all It may be that the percentage will turn out to be even higher So there really is a big scope for increased trade between Soviet Russia and ourselves. Last year we exported to her about £23 millions' worth of goods—very much higher than in previous years.

"We are going through this list carefully in consultation with the Russians, and the result should be a real improvement in the export market for us. If so, we have to face it that an important part of the call to meet this demand will fall on the engineering industry, and we must make up our minds as a nation that if this opportunity of increased trade does open up we have simply got to rise to it. We have got to step up our production to supply the goods, and avoid industrial disputes which weaken us. I have no doubt that the Russians want these goods, and if they cannot get them from us will either make them themselves or get them from someone else. We must show what we can do, and at the same time build a secure future for ourselves. It is not just a question of trade. It is more than that This kind of commerce can help to build the peace. We also agreed on a number of suggestions which will enable our people to exchange contacts of all kinds—science, art, sport, and so on—on a wider scale than we have been able to do before. All this will help.

"This does not add up to a revolutionary agreement. How could it? Great nations do not change their policies lightly But the London discussions could be something very important all the same. They could be the beginning of a beginning.

"Mr. Bulganin said something at his press conference this morning which I want to quote because I agree with it so completely · 'The programme, as you see, is a solid one and there is a good deal to work upon. We, the Soviet people, take the programme seriously and will strive to turn it into reality.' Well, so will we. Even if only partly successful, we can contribute thereby to the peace of the world.

"There are those who say that agreements of this kind have often disappointed us in the past, and that there is no use in making them. I utterly disagree, and I want you to understand seriously where I stand in this. As long as I have any responsibility, we shall continue to work for solutions of these questions. For my part, I will not accept a situation where the Great Powers of the world stand lowering at each other and consume a large part of their wealth on armament expenditure.

"We have got to do better than that It may be—I think it is—true that the immediate danger of war has receded, and that is good. But even if it is true, it is not enough. Here is our policy · We will not be parted from our friends, nor will we abandon our vital interests, but we will seek agreements with all In the long history of diplomacy, suspicion has done more harm than confidence Believe me, that is true. We will follow the policies I have described to you, seeking agreements, promoting friendships. I am sure that this Soviet visit was in tune with this, and that, as a result, the world can rest more secure."

Soviet Leaders' Return to Moscow. - M. Khrushchev's Criticisms of British Labour Party.

On their arrival back in Moscow (April 30) both Marshal Bulganin and M. Khrushchev addressed the 10,000 people assembled to greet them at the airport. Both declared that their visit to Britain had been a success, and of "great political and practical significance," despite the fact that agreement had not been reached on all the subjects discussed, and both said that "good and personal contacts" had been established with Sir Anthony Eden and his colleagues. They regretted, however, that the discussions and official functions had given them little opportunity to meet "the ordinary people of Britain," whom (said Marshal Bulganin) "we saw only from the windows of our car."

After expressing their "sincere gratitude" to Sir Anthony Eden and to the British Government and people for "the most friendly welcome and hospitality" extended to them, both Marshal Bulganin and M. Khrushchev criticized the British Labour Party, declaring that it was the only organization which had tried to "spoil the atmosphere" of their visit. M. Khrushchev, who said that the British Labour leaders had been given "a decisive rebuff for their slanderous attacks," spoke as follows:

"Our visit to Britain was very useful. We had a frank exchange of opinions both on questions of Anglo-Soviet relations and on important international problems. . . . We believe that good results have been achieved, particularly if we take into account the fact that the talks took place after a considerable period of mutual distrust. The important thing is that a foundation has been laid for the development of friendly relations between the U.S S.R. and Britain. . . . The results of the talks are fresh proof that, given goodwill, it is possible to achieve co-operation and maintain peaceful co-existence between States, irrespective of their social systems. . . .

"During our stay in Britain we readily accepted the Labour Party leaders' suggestion to meet them and exchange opinions on questions of interest to both our parties. Such a meeting took place. We must tell you frankly that as a result of this meeting we formed the opinion that among the leaders of the Labour Party are some who take a reactionary anti-Soviet attitude. . . . Questions about some Social Democrats who are allegedly imprisoned in our country and in the countries of the peoples' democracies were specially prepared and thrown at us. We firmly rejected these questions as provocative. These Labour leaders know very well that we are doing everything possible to correct the errors committed in the past. In a number of cases people who were wrongly condemned have been rehabilitated, not only in the U.S S R. but also in the the countries of the people's democracy. Those court cases about the correctness of which there is some doubt are being re-examined. The whole world knows this, and it is well known also to the leaders of the Labour Party. Why, then, did they drag out this question? To curry favour with reactionary circles? . . Notwithstanding the fact that we were the guests of the Labourites, we gave a decisive rebuff to their slanderous attempts to interfere in the internal affairs of Socialist countries. . . .

"In a number of countries representatives of reaction slander the Soviet Communist Party, alleging that we have artful designs in asking for contacts with Socialist parties and in stressing the need for unity of action between Communists and Socialists. This is a lie which is spread by the enemies of working-class unity, and this slander is taken up by some would-be Socialists We are convinced that the sallies made by certain leading members of the Labour Party are not supported by the rank and file of the party, and that the stand taken by individual Labour leaders will not find support among the masses We are sure that the Labour Party, too, will understand us correctly and will make the necessary moves in this direction We are prepared to rise above personal offence and the provocative attacks which certain Labour leaders allowed themselves to make on the Soviet Communist party. We can establish contacts with the Labour Party if they, for their part, will show the necessary understanding and willingness. . . ."

Statements by British Labour Party.

Commenting on the statements by Marshal Bulganin and M. Khrushchev, Mr. Gaitskell said that it was "certainly not our desire to spoil the visit in any way." He added: "We had hoped that the outcome of our discussions with them would have been different. Mr. Khrushchev has stated their position. I think everybody knows ours. We are bound to differ on the issue of imprisoned Social Democrats, which we regard as an issue of principle. But let us hope that frank speaking on both sides cleared the air and paved the way for better understanding in future."

Mr George Brown, M P., in a B.B C. television interview on the same date (April 30), denied that the Labour Party had "spoiled or tried to spoil" the visit of the Soviet leaders Stressing that the question of imprisoned Social Democrats in Eastern Europe had not been "sprung" on Marshal Bulganin and M Khrushchev, he said that "the Russian Ambassador was told that we wanted to raise this question, and it would have been outrageous if we had not raised it." Mr. Brown added that "we all felt strongly about some of the outrageous things M. Khrushchev said."

Mr. Morgan Phillips said on May 2 that it was not intended to publish the list of imprisoned Social Democrats in Eastern Europe "until we have exhausted every avenue for their release." [It was understood that the list contained about 150 names of Russian and other East European Socialists who were either in prison or had died in prison.] Mr. Phillips also stated that it was not intended at the moment to publish a transcript of the speeches made at the dinner given by the Labour Party to Marshal Bulganin and M. Khrushchev.

The Labour Party's monthly, *Fact*, carried an editorial in its May number declaring that the "blank refusal" of the Soviet leaders to help in the release of imprisoned Socialists in Eastern Europe had made it "crystal clear" that there could be no political co-operation between Social Democratic and Communist parties. *Fact* also carried the following May Day message from Mr. Gaitskell:

"Let us not forget, on this May Day, those Social Democrat comrades of ours who because of their faith and courage in resisting tyranny under Communism and Fascism were brutally murdered. Let us remember the thousands still languishing in prison and press for their speedy release."

Attitude of Roman Catholic Church to Bulganin-Khrushchev Visit. - Protests against Soviet Leaders' Visit by East European Exiles.

Prior to the arrival of Marshal Bulganin and M. Khrushchev in Britain, Roman Catholic leaders had called upon H.M. Government to make representations to the Soviet leaders, "in clear and unmistakable terms," that the desired mutual understanding between Britain and the U.S.S.R. "cannot be assured until evidence is forthcoming that the Government of the U.S.S.R. has truly ceased to combat religion in its own territories and to support or approve measures taken to

the same end by the Governments of countries under under Communist rule." Strong opposition to the visit of the Soviet leaders was also expressed by organizations representing East European exiles in Britain.

Attitude of Roman Catholic Church. The text of correspondence between the Duke of Norfolk (Earl Marshal of England, and the leading Roman Catholic peer) and the Prime Minister was released on April 9. The Duke's letter was worded as follows :

" The Catholic Union of Great Britain, a representative body of the Catholic Laity, has requested me, its President, to address you in connexion with the forthcoming visit of Marshal Bulganin and Mr. Khrushchev as guests of H.M. Government.

" I am first to assure you that . . . all Catholics in this country—and, indeed, throughout the world—must welcome any steps taken in the reasonable and sincere belief that they will further the cause of international peace, though with one proviso : that the terms of that peace must accord with the demands of justice. Failing this, no peace is real; no peace can endure.

" Such purely economic or political matters as may be discussed between H.M. Government and the Government of the U.S.S.R. are no immediate concern of the Catholic Union. On the other hand, since our object is the advancement of religion and the defence of the Christian standpoint generally, the Catholic Union is bound to be deeply moved whenever and wherever persons are subject to injustice or persecution on account of their religious beliefs.

" For this reason, I am to request you to ensure that during their forthcoming visit the representatives of the Government of the U.S.S.R. are informed by H.M. Government in clear and unmistakable terms that the desired mutual understanding between Great Britain and the U.S.S.R. cannot be assured until evidence is forthcoming that the Government of the U.S.S.R. has truly ceased to combat religion in its own territories, and to support or approve measures taken to the same end by the Governments of other countries under Communist rule. . . ."

The Prime Minister replied as follows to this communication : " The invitation to the Soviet leaders does not indicate any change in the policies of H.M. Government. We have no intention of sacrificing the principles for which this country has always stood in human and international relations. At the same time we are convinced that we have a duty to try to reduce the tension and risks of war in the world. This duty we are determined to fulfil, and it is the object of our invitation to the Soviet leaders. . . . The traditions of this country show, first, that we are in favour of religious toleration, and, secondly, that we are most strongly opposed to any form of religious persecution."

Prayers for the victims of Communist persecution were offered in all Roman Catholic Churches throughout Britain on Sunday, April 8. Cardinal Griffin (Roman Catholic Archbishop of Westminster), speaking in the name of " the 28,000,000 Catholics of the British Commonwealth," called upon the Government to make representations to the Soviet leaders about the persecution of Christians in Iron Curtain countries. He said in the course of his sermon :

" For all the apparent overtures of good will at present issuing forth from Moscow, we cannot close our eyes to the fate of those in Communist-controlled countries. For many years we have heard reports of the arrest and imprisonment of bishops, priests, and laity. Whole communities have been deported, Catholic schools closed, property expropriated, and the religious press silenced. Of late there have been new developments. Stalin has been denounced and those who have replaced him have recognized, though in secret, that this policy of physical persecution has failed. A subtle change in policy has been effected. During the last few months there has been increasing evidence of . . . an attempt to persuade people that Communism and Christianity are not incompatible. I believe that this evil propaganda will fail in Communist countries where the enormities of the regime are well known. Let us be on our guard lest those in the West, who lack this bitter experience, be misled into imagining that Communism does not desire to stamp out religious belief. A return to the teachings of Lenin and Marx can provide no other objective."

Protests by East European Exiles. Some 15,000 East European exiles in Britain—mainly Poles, but also including Balts, Ukrainians, Czechs, and others—marched in silent procession on Sunday, April 22, from Brompton Oratory to the Cenotaph, where a wreath was laid " in memory of the Poles who perished in Russia and the thousands still in concentration camps." The procession was headed by General Anders (the wartime commander of the Polish forces in Britain) and members of the Polish-Government-in-Exile, and included many Poles who served in the British armed forces during the war, including Battle of Britain pilots. Before the march to the Cenotaph some 5,000 refugees attended a special mass at Brompton Oratory, conducted by Archbishop Gawlina (Apostolic Visitor to the exiled Poles in Western Europe), for the victims of persecution in East European countries.

A petition bearing 60,000 signatures was presented the same evening at 10, Downing Street, asking H.M. Government to raise with the Soviet leaders the question of free elections in Poland and the release of Poles still interned in the U.S.S.R. The Polish delegation presenting the petition was accompanied by Lord Birdwood and by Mr. Malcolm Muggeridge, the editor of *Punch*, who had conducted a campaign against the Bulganin - Khrushchev visit to Britain.

The 12,000 Latvian exiles in Britain observed the 10-day period of the Soviet leaders' visit as one of mourning.

The Australian Minister for Immigration (Mr. Holt) announced on April 30 that the Australian Government had made a direct appeal to Marshal Bulganin and M. Khrushchev, during their London visit, for help in reuniting the families of European migrants who had settled in Australia. Mr. Holt said that this message contained the names of 51 wives, children, and other close relatives who were still in the Soviet Union and other East European countries, and who had not been allowed to join their next-of-kin in Australia.

An appeal on behalf of the Jewish community in the U.S.S.R. was also made to Marshal Bulganin and M. Khrushchev during their visit to London by the World Jewish Congress. After referring to the " drastic deterioration " in the position of the Soviet Jewish community, including the virtual extinction of all forms of Jewish cultural life, the memorandum asked *inter alia* that Soviet Jews should be allowed in future to pursue their religious and cultural life free from restrictions, to resume contacts with Jewish organizations in other countries, and to be given facilities for joining their relatives in Israel and other countries if they wished. The memorandum also drew attention to the disappearance and execution of a large number of Jewish writers in the Soviet Union who, as admitted by the Communist press, had been innocent of any crime, and asked that their memory should be officially vindicated and their innocence proclaimed.—(Times - Daily Telegraph - Manchester Guardian - Observer - Sunday Times - Soviet Weekly - Australian News and Information Bureau - World Jewish Affairs) **(Prev. rep. Bulganin - Khrushchev Visit, Invitation, 14369 A ; M. Malenkov, U.K. Visit, 14830 A.)**

A. BRAZIL. — Multilateral Trade and Payments System. - Results of First Six Months' Operation. - Belgian Adherence to Multilateral System.

During the first six months' operation (i.e. August 1955 - January 1956) of the multilateral trade and payments system introduced in August last between Brazil and a number of Western European countries, licences were granted by the Bank of Brazil for exports worth $54,047,000 and imports worth $59,094,000, over half of the trade in each case being with the United Kingdom.

The allocation of licences between the participating European countries was as follows : U.K.—exports, $27,366,000, imports, $34,321,000 ; Western Germany—exports, $13,847,000, imports, $19,749,000 ; Netherlands—exports, $11,285,000, imports, $1,694,000; Belgium—exports, $1,549,000, imports, $3,330,000.

Some of the principal imports licensed were : U.K.—electric trains (£8,334,000), telephone equipment (£1,502,000), banknotes, and tractors. Western Germany—printing materials (DM 11,464,000, or nearly £1,000,000), ships (DM. 8,843,000), machinery for foundries and ironworks, rolling mills, aniline dyes, and marine diesel engines. Netherlands—seed potatoes, printing materials, nitrogen fertilizers, and aniline dyes Belgium-Luxemburg—steel girders (46,068,000 Belg. francs, or about £330,000), arms and munitions (40,500,000 fr.), zinc, copper sulphate, copper, rails, and electric transformers.

An agreement providing for Belgium's adherence to the multilateral system (otherwise known as the " Hague club ") had been signed in Rio de Janeiro on Nov. 17, 1955.
(Bank of London and South America, Fortnightly Review)
(Prev. rep. 14421 C.)

B. UNITED KINGDOM. — Gold and Dollar Reserves in April. - Increase of $51,000,000.

The sterling area had a gold and dollar surplus in April of $51,000,000 after taking account of (*a*) $4,000,000 received in U.S. defence aid, (*b*) $2,000,000 paid to creditors of the E.P.U. in bilateral settlements. As a result, the sterling area's gold and dollar reserves rose to $2,328,000,000 on April 30.

Provisional figures for the E.P.U. April settlement showed that the U.K. had a surplus of $39,200,000 (£14,000,000) which would be settled in May three-quarters in gold or dollars and one-quarter by a reducton in the U.K. debt to the Union. This was the first British surplus with the E.P.U. since May 1955.—(Treasury Press Office) **(Prev. rep. 14791 D.)**

C. ANTARCTICA. — Discovery of New Mountain Range in Australian Antarctic Territory.

It was reported from Canberra on May 3 that a new range of mountains, stretching for 200 miles and about 30 miles wide, had been discovered in the Australian Antarctic Territory during a recent survey flight by members of the Australian Antarctic Expedition. The range—a chain of rocky peaks—starts 150 miles west of the Australian base at Mawson, and stretches in a south-westerly direction. Its average height is 11,000 feet, two of the peaks being over 13,000 feet.

A. UNITED KINGDOM.—Airline Corporations. - Sir Miles Thomas resigns Chairmanship of B.O.A.C. - Appointments to B.O.A.C. Board. - New Chief Executives for B.O.A.C. and B.E.A.

It was announced on March 21 that Sir Miles Thomas, chairman and chief executive of the British Overseas Airways Corporation, had asked the Minister of Transport and Civil Aviation to release him from his obligations to the Corporation at the end of the current financial year on March 31. Sir Miles had intimated, however, that if desired he would be willing to serve until June 30.

In his letter of resignation Sir Miles explained that he felt that, now that B.O.A.C. was making regular profits and had recovered from "the tragic loss of the *Comet I*," he had completed the task for which he had been appointed in 1948 and could "make a more useful contribution to trade and industry in other directions." He added: "Although the chance of bettering the affairs of B.O.A.C. when it was costing the taxpayer £8,000,000 annually was good exercise, working in a nationalized industry is not my natural bent."

Sir Miles's resignation followed those of Mr. Whitney Straight (deputy-chairman of B.O.A.C.) in October, 1955, and of Mr. Peter Masefield (chief executive of B.E.A.) in September last [see 14588 A, 14631 A]

On March 28 it was announced that Sir Miles Thomas had joined the board of Monsanto Chemicals Ltd. and would become full-time chairman not later than July 1. Sir Miles stated that he had relinquished the directorship which he had recently accepted on the board of Harry Ferguson Research Ltd.

It was announced on April 20 that the Minister of Transport and Civil Aviation (Mr. Watkinson) had appointed Mr. Gerard d'Erlanger, a former chairman of British European Airways, as chairman of B.O.A.C.; the appointment would be for an initial period of five years and would be a part-time one, and at his own request Mr. d'Erlanger would not be paid a salary. It was also announced that the Minister had appointed Sir George Cribbett, a deputy secretary in the Ministry of Transport and Civil Aviation, as full-time deputy chairman of the Corporation at a salary of £5,000 a year. The new chairman and vice-chairman took up their duties on May 1.

Mr. Gerard d'Erlanger (49), a member of the well-known banking family, was chairman of B.E.A. from 1947 to 1949, when he resigned and was succeeded by Lord Douglas of Kirtleside (see 9868 A). He was appointed to the Air Transport Advisory Council in 1952, and became deputy chairman in 1954.

The Board changes were strongly criticized in the House of Commons by Mr. George Russell Strauss (Labour).

Mr. Strauss asked the Minister whether, before appointing Mr d'Erlanger, he had studied "the facts leading to the refusal of a previous Minister of Civil Aviation to reappoint him after a short tenure of office as chairman of B.E.A." He also alleged that by "reducing the post of chairman to a part-time unpaid job" the Minister was "lowering the status of this important publicly-owned industry," and asked whether Mr. Watkinson had consulted the Prime Minister and the Chancellor of the Exchequer before doing so.

Mr. Watkinson, in reply, said that he was satisfied that the history of Mr. d'Erlanger's relations with the airways corporations were "greatly to Mr. d'Erlanger's credit." He was also satisfied—and the Prime Minister concurred—that it was essential to the commercial future of B.O.A.C. that the chairman should no longer combine the offices of chairman and chief executive. Following from this, the Government took the view that it was much to the Corporation's advantage that the chairman should have wide outside interests, which would greatly help its commercial future. He was quite satisfied that in the new chairman and deputy-chairman he had secured "the two best men in the country for the job."

In reply to **Mr. Beswick** (Lab.), who asked what additional work the new deputy-chairman was going to do if there was insufficient work to merit a full-time chairman, **Mr. Watkinson** explained that he had decided to appoint a full-time deputy chairman so as to make it possible for the chairman and chief executive (or managing director) to go abroad on the Corporation's business and leave a full-time responsible member of the Board at home carrying out its day-to-day affairs. He added: "The responsible position is, of course, that of chairman, who is in charge. In his absence, the deputy-chairman is obviously in charge. The important point is that there must be a part-time chairman, a full-time deputy chairman, and an able full-time managing director."

In reply to **Mr. Gaitskell** (Leader of the Opposition), **Mr. Watkinson** emphasized that Mr. d'Erlanger had assured him that he would "give all the time to the Corporation's affairs that is necessary," adding: "At the moment this will amount to practically 100 per cent."

The changes also aroused strong opposition amongst some of the B.O.A.C. staff. A protest meeting at London Airport, at which it was claimed that 6,000 B.O.A.C. employees were represented, passed a resolution on May 1 expressing "extreme disquiet" at Mr. d'Erlanger's appointment in view of his "attitude to public ownership" and his alleged "failure in a similar position with the B.E.A."

Further changes in the Board of B.O.A.C. were announced during April and May as follows:

(*a*) Lord Rennell of Rodd, who had been deputy-chairman on a part-time basis since the resignation of Mr. Whitney Straight (see 14558 A), resigned that appointment on April 20, but on May 1 it was announced that he had agreed to become a part-time member of the Board for the remainder of his original term of office. In a press statement on April 20 Lord Rennell had explained that he had resigned his deputy-chairmanship because he did not feel that it was a workable arrangement "to have a part-time chairman and a full-time deputy chairman."

(*b*) It was announced on May 1 that the Board had appointed Mr. Basil Smallpeice (47), deputy chief executive since June 1954, as B.O.A.C.'s managing director. Mr Smallpeice remained a member of the Board.

(*c*) Mr Watkinson notified Lord Burghley on April 23 that his appointment as a part-time director of B.O.A.C.—held since 1946, and expired on March 31—had not been renewed.

The British European Airways Corporation announced on May 2 that Mr. Watkinson had appointed Mr. A. H. Milward (51), the Corporation's deputy chief executive, as Chief Executive. Since the resignation of Mr. Peter Masefield in November 1955, the Corporation's chairman (Lord Douglas of Kirtleside) had temporarily combined the post of Chief Executive with the chairmanship.

Lord Douglas of Kirtleside stated on April 30 that in the financial year ended March 31, 1956, B.E.A. had earned a gross profit of about £1,100,000, and (after deducting interest of capital and other financial charges) a net profit of about £500,000. During the year B.E.A. had carried 2,225,000 passengers—more than any airline in the world outside the U.S.A.—and had earned a total revenue of £21,450,000.

Sir Miles Thomas had announced on April 1 that in the year ended March 31, 1956, B.O.A.C. had made a gross profit of about £1,750,000 and a net profit of about £500,000, compared with a net profit of £261,687 in the year ended March 31, 1955. (Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Sir Miles Thomas, 14564 B; B.O.A.C., 14558 A; Mr. d'Erlanger, 9868 A; Mr. Masefield, 14631 A.)**

B. YUGOSLAVIA - WESTERN GERMANY. — Financial and Monetary Agreements. - Settlement of Yugoslav War and Pre-war Claims.

After negotiations which had begun nearly two years earlier, a number of financial and economic agreements between Western Germany and Yugoslavia relating to their mutual claims were signed in Bonn on March 10.

They provided that in settlement of Yugoslav pre-war claims and of war claims arising out of the German occupation, originally amounting to over $100,000,000, the German Federal Republic would pay Yugoslavia 300,000,000 DM. (nearly $74,500,000), of which 60,000,000 DM. would be in cash and 240,000,000 DM. in the form of a 99-year, interest-free credit. Of the cash payments, 25,000,000 DM. would be as restitution of social insurance funds owing to Yugoslavia, 17,000,000 DM. for Yugoslav copper used in Germany during the war, 15,000,000 DM. for Yugoslav wartime accounts affected by the devaluation of the Reichsmark in 1949, and 3,000,000 DM. for Yugoslav postal and railway claims against Germany. The credit would be used by Yugoslavia as to 80 per cent for the purchase of German goods required for Yugoslav economic development, and as to 20 per cent for Yugoslav imports of consumer goods from Germany.

As far as Yugoslavia's post-war commercial debts to Western Germany were concerned (involving a sum of about 200,000,000 DM.), it was agreed that the date of repayment would be extended from 1960 to 1968, and that the interest-rate would be reduced from about 7 per cent to an average of 3 per cent.

One of the agreements provided for German-Yugoslav economic co-operation, including the exchange of technical experts and technical publications.

The communiqué announcing the conclusion of the agreements stated that the negotiations had "cleared up a number of difficulties that had arisen in the relations between the two countries, thus creating an opportunity for widening their future co-operation in various spheres." Owing to the difficulties encountered during the earlier talks, the negotiations had been broken off by Yugoslavia in December, 1954, and were resumed only in January 1956.—(Borba, Belgrade - Frankfurter Allgemeine Zeitung) **(Prev. rep. President Tito on Yugoslav Claims against Germany, 14358 A; Yugoslav Debts to Britain and U.S.A., 14803 B.)**

C. NORWAY. — Increase in Home Guard.

The Inspector-General of the Norwegian Home Guard, Major-General Haukeland, announced during April that its strength was being increased from about 80,000 men to 120,000. (Royal Norwegian Embassy, London) **(10475 A; 13496 B.)**

A. SOUTH-EAST ASIA. — SEATO Council Meeting in Karachi. - First Annual Report of SEATO. - Mr. Dulles's Tour of South-East Asia and Far East. - Statement on U.S. Policy towards Asian Countries.

The Council of the South-East Asia Treaty Organization (SEATO), consisting of the Foreign Ministers of the eight member-countries, held its second annual meeting in Karachi on March 6-8 under the chairmanship of Mr. Hamidul Huq Choudhury, the Foreign Minister of Pakistan. The other seven Foreign Ministers taking part were Mr. Casey (Australia), M. Pineau (France), Mr. MacDonald (New Zealand), Señor Carlos Garcia (Philippines), Prince Wan Waithayakon (Siam), Mr. Selwyn Lloyd (United Kingdom), and Mr. John Foster Dulles (United States).

The Council meeting was held in closed session, the following communiqué (cross-headings inserted) being issued at its conclusion:

Objectives of SEATO. "... The Council members reaffirmed their Government's support for the United Nations and their continued intention to conduct their policies in accordance with the purposes and principles of the U N. Charter. The Council also reaffirmed the dedication of member-Governments to the objectives of the [SEATO] treaty and the Pacific Charter—to strengthen the fabric of peace and freedom; to co-ordinate efforts for collective defence for the preservation of peace and security, to uphold the principle of equal rights and self-determination of peoples in accordance with the U.N. Charter; to promote self-government and to secure the independence of all countries whose peoples desire it and are able to undertake its responsibilities; to promote higher living standards, economic progress, and social well-being; and to prevent and counter attempts to subvert freedom or to destroy sovereignty or territorial integrity.

The Council reviewed the progress made towards these objectives in the 18 months since the treaty was signed in Manila, and especially in the year since the Council held its first meeting in Bangkok It agreed that the treaty, and the progress of the treaty organization, have made a noteworthy contribution to the maintenance of peace in South-East Asia and the South-West Pacific, and have helped to deter armed aggression in the treaty area.

The Council hoped that the use of force would continue to be avoided in the settlement of international disputes, and that particular disputes would be resolved amicably. It recognized the necessity, however, of creating and maintaining powerful deterrents against aggression lest potential aggressors come to believe that aggression would not be effectively and immediately resisted. The Council members severally affirmed that their countries will never commit aggression, and that their co-operation under this treaty is directed towards mutual defence and the maintenance of peace."

Political and Economic Developments in SEATO Area. "Members of the Council noted with satisfaction healthy political developments of the past year within the treaty area. They noted that talks with delegations from Singapore were to take place in London in April, and expressed their deep interest in the outcome of discussions of such importance to the SEATO area. They welcomed the steps taken towards establishing full self-government and independence for Malaya within the British Commonwealth. They noted further progress in the development of free political institutions in the region and, particularly, the further development of representative government in the countries referred to in the protocol to the treaty—Cambodia, Laos, and the Republic of [South] Vietnam.

The Council agreed that steady economic progress had been registered among members and in Cambodia, Laos, and the Republic of Vietnam. It was noted that assistance from members had contributed markedly to this desirable development"

Resistance to Communist Infiltration. "The Council agreed that there had been useful progress in co-operation among member-Governments in assisting each other to combat subversive activities They observed that Communist tactics were placing increasing reliance on methods of political and economic infiltration. They noted, however, that this shift in tactics was unaccompanied by any convincing evidence of intent to abandon efforts to subvert, weaken, and overthrow the political, economic, and social systems which have been freely chosen by the peoples of the area.

The Council attributed in large measure this seeming shift in tactics away from violence in some parts of the world to the collective security arrangements of the free nations. They particularly deplored the statements and interventions by Soviet leaders in recent months designed to increase tension and promote division in Asian communities and among other nations of the free world. [A reference to the various statements made by Marshal Bulganin and M. Khrushchev during their visits to India and Burma.]"

Support for Pakistan in "Pushtunistan" Dispute. "In so far as those statements referred to 'Pushtunistan' [i.e. the Pushtu-speaking areas of the North-West Frontier Province whose separation from Pakistan is demanded by Afghanistan], the members of the Council severally declared that their Governments recognized that the sovereignty of Pakistan extends up to the Durand Line, the international boundary between Pakistan and Afghanistan."

The Kashmir Question. "In so far as these statements concerned Kashmir, members of the Council, noting that U.N. resolutions remain in force, affirmed the need for an early settlement of the Kashmir question through the United Nations or by direct negotiations."

Collective Defence of SEATO Area. "The Council reviewed steps taken by member Governments under Article 2 [of the SEATO treaty] to maintain and develop their individual and collective capacity to resist armed attack and to prevent and counter subversive activities directed from without. They found that the defence forces of the member-nations in Asia have been appreciably improved since the signing of the treaty and are better equipped and deployed to act in an emergency Member-Governments have assisted one another on an increasing scale in the training and equipping of these forces.

Through its military advisers, SEATO has made a good beginning in planning for the co-ordinated use of forces in collective self-defence. During the year a number of joint military exercises by some of the SEATO Powers were held, including combined land, sea and air exercises in and around Bangkok on Feb 15-18. These exercises pointed the way to further co-operative efforts for the common defence

The Council welcomed the progress recorded in the past year in reducing dangers posed to the territorial integrity and political stability of the area by subversive activities directed from without. In considering the continuing threat, the Council noted that the members concerned have significantly improved the quality of their security forces and have moved ahead with other measures to reduce threats to domestic government and social progress. The SEATO Governments have initiated a number of mutual assistance programmes in this field, and the Organization's Committee of Security Experts has provided an increasingly useful forum for co-operation in defence against such subversive activities."

Economic and Social Progress. "The Council reviewed steps taken under Article 3 to co-operate 'in the further development of measures to promote economic progress and social well-being.' They considered this a most important objective of the treaty, recognizing that economic and social welfare is essential to healthy political life. They were gratified to note the steady progress already made in promoting the economic development of the treaty area, and emphasized the urgency of this problem

They noted measures of economic assistance to countries of the area undertaken by member-Governments, in addition to very considerable expenditures under aid programmes for increasing the defensive capacity of the region They particularly welcomed the fact that U.S. allocations for economic aid to Asian SEATO members have increased almost four-fold in the two fiscal years since the treaty was signed.

The Council members, while convinced of the necessity of adequate defence programmes ... are equally determined to press forward with national and international programmes to raise standards of living in the treaty area, which they consider basic to national security."

Future Tasks. "The Council approved measures to strengthen the Organization and facilitate the Council representatives' plan of work for the coming year. They approved plans of the Committee of Economic Experts ... to continue their studies of the economic problems involved in treaty commitments, and to undertake new studies. They invited the Council representatives to pursue the study of the concrete problems resulting from the defence effort of member-States, as well as those existing in areas particularly susceptible to subversive activities. They noted and approved the intention of the Council representatives ... to give a high priority in the coming year to regional co-operation, and, where appropriate, joint action by member-Governments in countering subversive activities.

The Council considered the ... conclusions of the military advisers as to the defensive forces that would be required to meet aggression, and agreed on the desirability of maintaining certain of their military forces at levels of mobility and combat effectiveness which would be an effective deterrent to aggression."

Organizational Changes. "The following organizational decisions were taken:

(1) To assist the Council representatives and to provide a stronger central SEATO organization in Bangkok, the Council authorized the establishment of a permanent Working Group composed of an officer from the staff of each Council representative, and the establishment of a full-time executive Secretariat to replace the provisional Secretariat generously provided hitherto by the Government of Thailand

(2) A Research Service Centre will be established in Bangkok to produce, for the benefit of member-Governments and of bodies set up within the SEATO framework, reports on current development in Communist activities.

(3) The Public Relations Office in Bangkok will be expanded, and a Cultural Relations Office established to carry out new programmes in these fields.

(4) An Economic Officer will be appointed to facilitate important work in the economic field. He will work closely with, and under the direction of, the Council representatives.

(5) Organizational costs will be met from a common budget."

Conclusion. "The Council was convinced that the work accomplished at this meeting would give new and strong impetus to the promotion of security and welfare in the treaty area All the Foreign Ministers expressed the firm determination of their Governments to press forward with their individual and collective efforts to safeguard the peace and well-being of the region as a whole."

Speeches were made by all the Foreign Ministers in which emphasis was laid on the purely defensive nature of the Organization, on the necessity for collective action in resisting Communist infiltration into the region, and on the need for raising the economic and social levels of the South-East Asian

countries. Mr. Dulles promised additional U.S. economic aid for the SEATO area, whilst Mr. Casey announced that Australia would contribute £A2,000,000 for defence support aid.

Mr. Choudhury, the Pakistani Foreign Minister, raised the questions of Kashmir and "Pushtunistan" during the discussions. As regards the former, he asked the SEATO Council to support Pakistan's demand for a plebiscite in Kashmir, and said that the Soviet leaders' statements supporting India on the Kashmir question constituted "a deliberate attempt to cause tension in the area." On the "Pushtunistan" issue, he asked the Council to support Pakistan in rejecting the Afghan demands for a separate Pushtu-speaking state. As stated in the communiqué, the SEATO Council unanimously recognized the sovereignty of Pakistan as "extending up to the Durand line" (i.e. the present international frontier between Afghanistan and Pakistan). On the Kashmir question, however, the Council confined itself to affirming "the need for an early settlement . . . through the U.N. or by direct negotiations." Mr. Selwyn Lloyd expressed the opinion that the SEATO Council was not the proper forum to discuss details of a dispute which was still before the U.N. and therefore *sub judice*.

First Annual Report of SEATO.

Prior to the Council meeting in Karachi, the Organization's committees of military advisers and of economic experts had met during January, in Melbourne and Bangkok respectively, to draft reports and recommendations which were considered at the Karachi meeting and referred to in the communiqué. In addition, the SEATO Council also discussed the first annual report of the Organization, which had been issued on March 2 and is summarized below.

The report stated that substantial progress had been made during the past year towards providing security and guarding against subversion in the SEATO area. It added that the determination of SEATO members to prevent and deter "aggressive expansion into South-East Asia" had made an important contribution towards preserving peace; that over $700,000,000 had been made available for economic development in the South-East Asian countries in the past two years, apart from financial aid for military purposes, and that there had been "definite progress" in the combat effectiveness of the forces of member-countries in the SEATO area, in which connexion "extensive military aid programmes under the treaty's mutual aid provisions have played an important role."

Although progress had been made in countering subversion, and member-Governments were keeping an increasingly effective watch over Communist activities, the report nevertheless stressed that subversion "remains a major threat to the area." It stated, *inter alia*: "Measures are being taken to increase the ability of police and security forces to deal with subversive Communist activities; governments and national information services have increasingly directed their efforts at exposing and countering Communist propaganda"

On the military side, the principal emphasis had been placed on "modernization, re-equipment, more efficient disposition, and more intensive training of forces." It was pointed out that there had been a considerable increase in U.S. military assistance to Pakistan, the Philippines, and Siam under bilateral agreements; that almost 11,000 officers and n.c.o.s from the SEATO area had completed courses in, or were attending, American-operated service schools in the first nine months of 1955; that Siamese and Pakistani officer cadets were also attending military schools in France; and that Australian, New Zealand, Pakistani, and Siamese naval, army, and air force personnel had received training in Britain.

In conclusion, the report said that "SEATO enters its second year with a high sense of optimism based on the knowledge of what has already been achieved," and that the Organization had "provided an element of security indispensable to economic, social, and cultural progress, and has been an effective stabilizing influence."

Mr. Dulles's Tour of S.E. Asia and Far East. - Meetings with Asian Statesmen.

After attending the SEATO Council meeting in Karachi, the U.S. Secretary of State made an extensive tour during which he visited nine Asian capitals in ten days—Delhi (March 9-10), Colombo (March 11), Jakarta (March 12), Bangkok (March 13), Saigon (March 14), Manila (March 15), Taipeh (March 16), Seoul (March 17), and Tokio (March 18-19). During this period he had discussions with the political leaders of all the countries visited, including Mr. Nehru, the Indian Prime Minister, Sir John Kotelawala (then Prime Minister of Ceylon), President Sukarno of Indonesia, Marshal Pibul Songgram (Prime Minister of Siam), President Diem of the Republic of [South] Vietnam, President Magsaysay of the Philippines, Generalissimo Chiang Kai-shek, President Syngman Rhee of South Korea, and Mr. Hatoyama, the Japanese Prime Minister. Particular interest centred on Mr. Dulles's visits to India, where he had two days' discussions with Mr. Nehru, and to Indonesia, where he held a press conference which led to strong Netherlands representations to Washington (see 14845 A).

Visit to India. Before leaving Delhi, Mr. Dulles held a press conference on March 10 which was attended by some 200 Indian and foreign journalists, and at which he replied to a number of questions. Speaking of his two-day talks with Mr. Nehru, the Secretary of State said that there had been a comprehensive review of the world situation, with special reference to questions in which both India and the U.S.A. were interested. Both countries, he emphasized, were dedicated to the same ideals—the achievement of peace, justice, and human liberty.

Asked whether the U.S. attitude to the Goa and Kashmir questions was aimed at "teaching India a lesson" for her refusal to join military alliances, Mr. Dulles replied: "I can answer absolutely categorically and emphatically that the idea of 'teaching India a lesson' never for one moment entered my mind in connexion with these two matters. I absolutely reject any such interpretations. We do have views on collective security which are not wholly shared by the Indian Government. That is the kind of difference which always exists in free society and among free nations. While we may not agree, we fully respect the right of India as a sovereign State to have its own policy in this matter."

Mr. Dulles emphasized that the U.S. Government had never taken any definite position on the Goa and Kashmir questions, except that it hoped for a peaceful solution of both problems. Asked how he explained his recent statement that Goa was "a part of Portugal" [see page 14613, second column], Mr. Dulles said that he had referred to the fact that Goa and certain other areas were described as provinces under Portuguese legislation. "That is a fact which few people would deny," he added, "but it does not carry any necessary implications."

Asked about the "implications" of the reference to Kashmir in the SEATO communiqué, Mr. Dulles said: "There are no implications in it that do not appear on the surface" He reiterated that the U.S. Government hoped for a peaceful settlement of the Kashmir dispute —a hope that had been expressed by all the SEATO Governments, and which constituted "no novelty."

In reply to another question, Mr Dulles said that he saw no reason why the supply of U.S. arms to Pakistan should lead to an arms race in that part of the world. He added: "There can be every confidence on the part of India that there will be no use of these armaments in any aggressive way against India Pakistan knows that if that should happen, there will be a quick ending of its good relations with the United States, and that, under the U.N. Charter, the U.S.A. would support India if she became a victim of any armed aggression."

As regards Indo-American relations generally, Mr. Dulles said: "We have no differences between us that I know of—certainly no question has been raised with me and no complaints made to me about relations between the U.S.A. and India. They are cordial, and there are no matters of dispute or controversy. The U.S.A. has been able to contribute substantially to the carrying-out of India's Five-Year Plan, and our present relations are on a happy basis. I see no reason to change them."

In a broadcast to the Indian people before leaving Delhi, Mr Dulles emphasized that although India and the U.S.A. were very different "on the surface" in history, culture, and character, they had common aims on "basic issues." "Our two countries," he declared, "both believe in democratic principles of government We both believe in the dignity of man and in his individual worth. We both recognize that one of our great tasks today is to give each and every human being a better opportunity to grow in body, mind and spirit. We both recognize that war is a scourge, and we are both dedicated to achieving peace in the world. Sometimes these abiding common purposes are obscured by focusing on the differences between us. Free peoples are not expected to think and act alike on everything. Diversity is characteristic of freedom. But our basic purposes are the same."

Visit to Indonesia. At a press conference in Jakarta on March 13, Mr. Dulles stressed that there was "no connexion whatsoever" between the giving of U.S. economic aid under Mutual Security legislation and the entry of any country into a mutual security pact with the United States As examples, he cited the fact that the three countries he had already visited in his Asian tour—India, Pakistan, and Ceylon—were all receiving U.S. economic aid, though only one of them—Pakistan—had mutual security arrangements with the U.S.A.

Defending the preponderant military power possessed by the U.S.A. in the SEATO alliance, Mr Dulles said: "That preponderant power is in defence of liberty and freedom. Many people in this part of the world were grateful ten years ago when we fought for the liberation of some countries from the imperialism and militarism that was then dominant in the area." After saying that he fully understood Indonesia's opposition to joining any military alliance, he added: "When the U.S.A. was a young country, itself just emerged from colonialism, we were very eager to devote our efforts and attention primarily to our own affairs. . . . It is quite understandable, therefore, that that should be the point of view of the Indonesian Government. We fully respect the right of each country to make its own decision. . . ."

Asked why the U.S.A. was "meddling" in the South-East Asian area, Mr. Dulles said that there was a time when America felt that it should remain completely aloof from troubles in other parts of the world. "But we found," he added, "that in order to save precious values we had to get into the First World War to defend Western civilization against the threat of German militarism. And we found that we had to get into the Second World War to save vital portions

of Europe and Asia against the threat of the Axis Powers. As the world has grown smaller, it is no longer possible to operate on the theory that nations must defend their security alone and cannot get help from other parts of the world."

After stressing that the preservation of Indonesian independence was a major objective of American policy, Mr. Dulles declared that the U.S A was "happy to be identified with the rapid evolution that has taken place from colonialism to independence," and "supported that movement at every point." Questioned about the sovereignty of West Irian (Dutch New Guinea), Mr. Dulles said that the U.S A. had been strongly urged by the Netherlands, a partner in NATO, to support the Dutch position. Since, however, the New Guinea question was a dispute between two countries which the U.S.A. considered as its friends, "it serves the general cause of friendship for the U S.A. to take an impartial and neutral position."

Mr. Dulles on U.S. Policy towards Asian Countries.

On returning to Washington, Mr. Dulles made a radio "report to the nation" on March 23 in which he spoke of his Asian tour and of American policy towards the Asian countries. Extracts are given below.

"... These ten countries I visited have a total population of over 700,000,000 people, or almost one-third of the population of the earth. More than 600,000,000 of these people were colonial people until the close of World War II. Now they are independent nations. Several of them are only now completing their new political institutions. For example, while we were in Pakistan that country adopted its first Constitution. In Indonesia the first government based on national elections was in process of formation.... This building and testing of new political processes is the outstanding characteristic of the area I visited. Another characteristic is the determination to develop the economic potentials of the area. So far, productivity is low. The average income amounts to about $100 a year. The people expect their new Governments to improve their living conditions

"There are some who doubt the determination or ability of these free Asian nations to preserve and develop their political independence, and also to make that independence serve to improve social and economic conditions. I do not share that doubt. But I do come back with the strengthened conviction that the U.S A can help the Asian countries to achieve both these goals Also, I feel sure that it is in our own interest to provide that help.

"Let me speak first of the problem of political independence in Asia. We need to be aware of how proud the peoples of Asia are to be free of foreign domination, and how sensitive they are to any hint of encroachments from without Also, let us remember that while we think first of the danger that stems from international Communism, many of them think first of possible encroachments from the West, for that is the rule they have actually known at first hand

"But I found that the leaders are quite aware of the danger of penetration by Communism, and of the fact that Soviet and Chinese Communist economic lures generally go with a hook and line that leads to Moscow or Peking. Some take more effective precautions than others to avoid being caught But none of the leaders is blind to this danger. They all desire help which will preserve their independence and develop their free institutions. But they want to be very sure that that help does not subtract from their sovereignty, or retard their development by involving them in controversies that do not directly concern them.

"The United States is able sympathetically to understand that attitude. We ourselves were once a colony. Our struggle for independence is the first chapter of history that is learned by every American boy and girl. In our early days we, too, saw our first task as that of internal development, and only changed conditions have made it apparent that international security is best assured by collective efforts. The story of America is known in Asia; George Washington, Thomas Jefferson, and Abraham Lincoln are honoured names. ... All this creates a bond of sympathy and helps to make possible a good understanding between us and them. Our historical experience is an asset of priceless value in Asia.

"Many of the countries of Asia feel that their independence is better assured if they participate with us in arrangements for mutual security. There are such arrangements—bilateral or multilateral—with seven of the ten countries I visited—Pakistan, Siam, Vietnam, the Philippines, Free China, Japan, and Korea. Three of the countries I visited—India, Ceylon, and Indonesia—have preferred not to join regional security arrangements That choice we respect The U.S A. does not seek ties of mutual defence with any country whatsoever unless that country believes that the application of the principle of collective security will better assure its independence.

"Let me turn now from the problem of political independence to that of economic and social development. Here, too, the conduct and example of the U.S.A. provide an inspiration and a responsibility. The United States has itself realized an economic miracle. Our population of about 165,000,000 produces nearly half of all the goods produced in the world.... There is, of course, no magic formula for reproducing elsewhere economic productivity like ours. It is not to be had merely for the wanting, or merely by the installation of machines. It is a product of widespread education; of an ingrained spirit of enterprise; and of savings which provide more efficient tools for labour.

"I did not find that the Asian leaders expect that either they, or we, or all of us in combination, will be able to change their economies overnight. But I did find in Asia a natural and powerful urge to get on a path which surely, even though slowly, leads to better economic and social conditions. If we wish to see the free world preserved and enlarged, we must help, or the forces of despotism will take control. The day is past when the peoples of Asia will tolerate leadership which keeps them on a dead centre economically and socially, and when each generation merely ekes out a bare subsistence, with a brief life expectancy, and passes on to the next generation only the same bleak prospect.

"The U.S.A has come to see that its own self-interest is served by helping others to improve their economic condition. Our nation provides this help in many ways, public and private, throughout the free world. For ten years now we have had Mutual Security programmes; and for the last three years, and following the completion of the Marshall Plan for Europe, much attention has been given to Asia.

"One component of our Mutual Security programme is technical assistance ... In addition, we have economic programmes of other sorts. We have programmes which help our allies to bear the cost of their defence establishments, which vitally supplement our own. We have surplus commodity programmes which, under proper conditions, do much good. It is necessary to avoid unfair competition with countries which historically depend upon the sales abroad of their own agricultural surpluses. But I was impressed with the fact that, subject to this qualification, our surpluses can do much to bring a better life to Asian people. For example, we have just concluded an agreement with Indonesia for the delivery of surplus commodities of a value of some $95,000,000, and we are just beginning a milk programme for the children of Ceylon.

"These programmes, involving military support, technical assistance, and surplus commodities, are of great importance and contribute to preserving and developing the Asian economies. But by themselves they are not sufficient to enable the free Asian countries to make their economies more diversified, or lessen their dependence on others for manufactured goods. The present lack of diversification and industrialization is the weakness which Asian leaders above all want to cure That aspect of the matter requires more emphasis. Japan should be able to help in this respect as the only Asian nation which has found the way to industrialization. . .

"To share with others our own blessings accords with the most deeply rooted of American traditions George Washington, in his farewell address, said: 'It will be worthy of a free, enlightened, and, at no distant period, a great nation, to give to mankind the magnanimous and novel example of a people always guided by an exalted justice and benevolence.... Who can doubt that in the course of time the fruits of such a plan would richly repay any temporary advantages which might be lost by a steady adherence to it?' Our Mutual Security plan conforms to Washington's prescription. Even though, to use Washington's phrase, it loses us some temporary advantages, the fruits of that plan will in the course of time richly repay us That plan provides the difference between a world environment which is friendly and healthy, and one which is corroded by massive discontents dangerous both to us and the discontented

"Throughout most of the countries I visited there is a profound desire for peace. In the case of the Republic of Korea and the Republic of China the leaders and people would be willing to make almost any sacrifice to restore freedom to their countries as a whole. However, even there the will to sacrifice is tempered by the knowledge that modern war creates such widespread devastation and so many evils that it provides no clear solution to any problem. Communist propaganda has sought diligently to create the impression that the U S.A. seeks war, and that its collective security arrangements are aggressive in purpose. I had no opportunity to judge the impact of that propaganda upon the people generally. But so far as concerns the leaders with whom I talked, I found no evidence whatsoever that they believe that the U S A wants war.

"The spot in the Far East where, at the moment, conflict most threatens is the Taiwan [Formosa] area. I reported to our Asian friends how, at our Geneva talks with the Chinese Communists, we were patiently but persistently striving for a reciprocal renunciation of force, with particular reference to this area.

"I found in India some fear lest our arms supplies to Pakistan, which feels endangered from the north, might be turned against India I received the most categorical assurance from the highest authorities of Pakistan that they have no belligerent intentions whatsoever against India. In India I publicly called attention to the fact that the SEATO pact expressly prohibits any use of force, except in defence against aggression. Also, the agreements under which we are supplying arms to Pakistan explicitly provide that these arms shall not be used for any aggressive purpose I expressed my conviction that Pakistan would scrupulously observe these solemn engagements.

"I found uniformly that the Asian leaders with whom I talked desire the U.S.A to be strong, and that that strength should continue to be a sort of protective umbrella over other free nations. That was the clearest single impression I received Repeatedly I was asked whether it was our purpose to maintain that protective cover, affording new freedoms the opportunity to sink their roots deep and grow strong. Each time my reply was emphatically affirmative. And this reply was received with profound satisfaction.

"There is of course a great desire for disarmament, particularly since it is felt that arms limitation would release funds which, in part, would accrue to the benefit of the less economically developed countries ... I found no-one who wanted unilateral disarmament by the U.S.A., or disarmament which might in fact turn out to be unilateral because of evasions by others I believe that there is a general realization of our ardent dedication to peace, as well as respect for our determination to have the strength to ensure that no-one need feel that peace has to be bought by surrendering freedom to despotism.

"There is throughout the Asian peoples a desire for Western recognition of their dignity. We need to remember that although we have developed more rapidly than the Asians in some directions, notably in industrialization, they have preceded us in finding many of the ways to make life richer. Their culture and art long antedate our own, and in many respects have not yet been equalled by our own. Their handicraft is outstanding They have an exceptional love and appreciation of beauty. They possess in full measure those human qualities which all admire—devotion to family and country, courage, and willingness to sacrifice. They possess unusual qualities of patience, reflection, and repose. Therefore, let us not forget that while we have material and technical things to give, they also have things to give. And if we are wise enough to perceive and take what Asia has to offer, the balance struck between us will not be onesided by any true measure of values.

"I come back from this trip encouraged. Of course, Soviet and Chinese economic tactics are a danger Of even greater danger are their tactics of stirring up hatred between free nations. But I feel that the conditions which we wish for will prevail in the area I visited, if only we play our part worthily

"What is it that we seek? It is not conquest or domination. If that were our goal, it would be doomed to failure. Our desire is a world in which peoples who want political independence shall possess it whenever they are capable of sustaining it and discharging its responsibilities in accordance with the accepted standards of civilized nations. That condition is developing throughout non-Communist Asia, and I believe that it will continue to develop against assault from any quarter.

"But we also realize that political independence is not enough. It is a means to certain ends. One of these ends is the infusing of men with reasonable hope that they can build a better world for their children and their children's children That hope we can help to provide without any encroachment whatsoever on the political independence of others. Under those conditions help will be welcome. Under reverse conditions, it would, I am glad to say, be rejected

"Also, there is need for a new attitude towards the diversity that the Asians provide. Differences of race and culture are not measures of superiority or inferiority. Indeed, uniformity and conformity are conditions to be abhorred. The great richness of our universe is due above all to its diversity. We may take honourable pride in our own distinctive accomplishments But we should equally be aware that the accomplishments of others are a proper subject for their pride and our appreciation.

"The future belongs to independence, not domination; to freedom, not servitude; to diversity, not conformity. Acceptance of that fact will create between the Asians and ourselves a solid basis for fellowship It will enable us, as mutual friends and helpers, to pursue hopefully the destiny that we share in common"

Mr. Selwyn Lloyd's and M. Pineau's Visits.

After the Karachi meeting, Mr. Selwyn Lloyd visited Delhi for conversations with Mr. Nehru (see **14846** A), and subsequently visited a number of Middle Eastern capitals (see page 14794, second column) during his return journey to London. M. Pineau paid visits to Delhi and Cairo, during which he had discussions with Mr. Nehru and Colonel Nasser, before returning to Paris. The British Foreign Secretary made a short statement on the SEATO meeting to the House of Commons on March 19, after returning from his Middle Eastern tour.

Mr. Lloyd said that the SEATO Council's discussions had taken place "against the background of recent Soviet actions in Asia," which had "undoubtedly been the most significant developments affecting the treaty area since the Council last met." He added that it was "very clear" at the Karachi meeting "that Pakistan, Siam, and the Philippines attach great importance to their membership of SEATO and the habit of co-operation that is being developed"

In reply to Mr. Fenner Brockway (Lab), who asked if it was not "unwise" for the SEATO Council to have discussed Kashmir, Mr. Lloyd pointed out that the Kashmir question was not on the agenda of the Karachi meeting, and that he had never concealed his opinion that it was not appropriate to discuss the merits of the dispute there. All that had happened was that the members had noted that the U.N. resolutions remained in force and had expressed their hope of an early settlement of the problem, either through the U.N. or by direct negotiations between the parties.

M. Pineau, at a press conference in Delhi (March 13), similarly stressed that only one member of SEATO—Pakistan—had insisted on raising the Kashmir question. Like Mr. Selwyn Lloyd, he took the view that SEATO was not the competent body to discuss the matter, which properly fell within the competence of the United Nations.

It was announced in Bangkok on April 12 that Mr. N. V. Issarabhakdi, of the Siamese Foreign Service, had been appointed Executive Secretary of the South-East Asia Treaty Organization.—(Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times - New York Herald Tribune - Australian News and Information Bureau - Department of External Affairs, Wellington - Pakistan High Commissioner's Office, London - The Statesman, Calcutta - Indian High Commissioner's Office, London - Indonesian Embassy Press Department, London)

A. SOCIALIST INTERNATIONAL. — Zürich Meeting. - Rejection of Political Co-operation between Social Democratic and Communist Parties.

The General Council of the Socialist International held a three-day meeting at Zurich on March 2-4, attended by representatives of the Labour and Social Democratic parties of Great Britain, Canada, France, Italy, the German Federal Republic, Belgium, Luxemburg, the Netherlands, Denmark, Norway, Sweden. Switzerland, and Israel. It adopted a resolution rejecting any form of political co-operation between Social Democratic and Communist parties, and also resolutions on disarmament and the Middle East situation.

Rejection of "United Front" with Communism. Discussion of this subject arose out of the appeal made by M. Khrushchev, at the 20th congress of the Soviet Communist Party, for political co-operation and "businesslike contacts" between Communist and Social Democratic parties After considering a report on this matter drafted by Hr Haakon Lie (secretary-general of the Norwegian Labour Party), in which any such co-operation was strongly rejected, the Socialist International unanimously adopted the following resolution:

"The changes of Communist tactics which emerged at the recent party congress of the Soviet Communist Party are not adequate proof of a genuine change in the principles and policies of Communist dictatorship and therefore provide no grounds for departing from the position taken up by Democratic Socialism, which firmly rejects any united front or any other form of political co-operation with the parties of dictatorship. The Socialist International considers the minimum precondition, even for the possibility of talks on an international basis, to be the re-establishment of genuinely free democratic labour movements in all those countries where they existed before and have been suppressed or eliminated by the Communist dictatorship."

Disarmament. The resolution on this subject appealed to Socialist parties in all countries to press for progressive and controlled disarmament. It pointed out that the transition from atomic weapons to the hydrogen bomb had made this the most urgent problem facing the world today, and added that "the prospect of aggression by inter-continental, radio-guided missiles . . . holds out the threat of the end of all civilization, or perhaps even of life on earth."

The Middle East. The General Council called on Socialist parties to "urge insistently that Israel be provided with the necessary arms for self-defence," and criticized the Western Powers for attempting to "appease" the Arab countries. It also called upon the British, French, and U.S. Governments to reaffirm the Tripartite Declaration of 1950 by making it "absolutely clear that they will, immediately and with all necessary force, come to the aid of any State which is the victim of aggression."

Labour and Socialist leaders attending the Zurich meeting included Mr. Morgan Phillips (secretary of the British Labour Party and president of the Socialist International), Herr Erich Ollenhauer (leader of the German Social Democratic Party), and M. Jules Moch (France). A further meeting of the executive bureau of the Socialist International was held in London on April 7 at which the following statement was issued, in amplification of the Zürich resolution rejecting collaboration between Social Democratic and Communist parties:

"Socialism and Communism have nothing in common. The Communists have perverted the very idea of Socialism. Where they are in power they have destroyed every freedom, every right of the workers, every political gain, and every human value which Socialists have won in a struggle lasting several generations.

"We believe in democracy; they do not. We believe in the rights of men, they mock them. This is not changed by the refutation of Stalinism. Repudiation by those who—whether in fear of their lives or in genuine complicity—previously helped in Stalin's crimes and praised his sins has not fundamentally altered the character of the Communist regime Even with collective leadership, it yet remains a dictatorship; and what they now call 'Leninism' is nothing but an earlier edition of the misconceptions and misdeeds of Stalinism

"We note the professed desire of the Communist Party of the Soviet Union for some form of co-operation with Socialist parties. But where Socialist parties in the Russian-dominated part of the world have co-operated with them they were crushed out of existence, compulsorily merged, or otherwise eliminated by the ruthless methods of a dictatorship which ironically calls itself 'people's democracy.' Nor can we forget that Socialists are denied all political rights in the countries of the Soviet bloc. Many are still in prison whose only crime was to believe that there are more roads to Socialism than one. . . .

At the Zurich meeting Dr. Bjarne Braatoy was elected secretary of the Socialist International in succession to Mr. Julius Braunthal, retiring. Dr. Braatoy (56) was born in the U.S.A. of Norwegian parents, and has been active in trade union and international socialist affairs since 1928. For the past four years he has been technical adviser to the German Social Democratic party.—(Daily Herald - Le Populaire, Paris - Times - Manchester Guardian - Neue Zurcher Zeitung)

A. NORTHERN RHODESIA. — The Copperbelt Dispute. - Agreement between Mining Companies and European Mineworkers' Union on African Advancement in Copperbelt Mines.

After prolonged negotiations, covering in all a period of over nine years, an agreement on the employment of Africans in more responsible posts in the mines of the Copperbelt was signed on Sept. 27, 1955, between the Northern Rhodesia Chamber of Mines and the Northern Rhodesia Mineworkers' Union (N.R.M.W.U.), representing the European mineworkers. The issues involved and the progress of the negotiations are summarized below.

During the early stages of the development of the Copperbelt, from 1931 onwards, European workers were attracted to Northern Rhodesia by the offer of wages and salaries far higher than those paid for similar work in Southern Rhodesia and South Africa, and of exceptionally good working and housing conditions. As a result, European mineworkers earned in 1954 at least £2,000 a year on an average, whereas the highest wages paid to Africans were £237 a year for surface workers and £258 for underground workers To protect the European workers from competition from cheap African labour, the N.R.M.W.U. had concluded an agreement with the mining companies in 1936 whereby work of a class or grade being performed by a European could not be given to an African.

In 1946, following negotiations between the Chamber of Mines and the N.R.M W U. on the question of African advancement, the Northern Rhodesian Government appointed a commission headed by Mr. Andrew Dalgleish to investigate the problem. The commission recommended in 1947 that a number of posts filled by Europeans should be filled by Africans, and that, if a number of Africans were required to undertake the work of a European, the pay of the European should be divided between them. The N.R.M W.U., however, rejected the report, and no action was taken. When the African Mineworkers' Union was formed in 1949, the two unions reached an agreement that Africans might be employed in work hitherto done by Europeans, on condition that the principle of "equal pay for equal work" was observed.

The cessation of bulk buying of copper by the British Government in 1953 was followed by a rise in copper prices, and as this involved a rise in bonus payments—under an agreement between the companies and the N.R.M.W.U.—the differential between European and African wages increased. In view of this situation, negotiations were reopened at the companies' request in May 1953, and were extended in February 1954 to include representatives of the African Mineworkers' Union and the European Salaried Staff Association.

During the talks the N.R.M.W.U. insisted that advancement of an African must be to a complete job held by a European, and that no sub-division of jobs should be permitted. The employers, on the other hand, contended that some simplification and sub-division of jobs was essential to the effective advancement of Africans, so as to provide training opportunities and, where necessary, to bring work and responsibility within their present capacity. The African Mineworkers' Union accepted this argument, and made it clear that they regarded the N.R M.W U 's attitude as effectively maintaining a bar to their future progress. The companies gave an assurance that no European would lose employment as a result of African advancement, and offered (*a*) to discuss safeguards for the future status and livelihood of Europeans; (*b*) to agree that a stated maximum number of Africans should be advanced at special rates into jobs infringing on the European field during the next five years, after which new negotiations would be begun; and (*c*) to employ a substantial number of Africans in intermediate posts outside the European field of employment, so as to enable them to train for greater responsibilities. The N.R M.W.U., however, rejected these proposals and insisted on the acceptance of the principle of equal pay for equal work As no compromise could be reached, the N R.M.W.U. withdrew from the talks on July 24, 1954.

The Northern Rhodesian Government announced on the latter date that it would set up a Board of Inquiry to ascertain whether there was anything to prevent Africans from advancing in the copper-mining industry to the full extent of their capacities; to investigate the reasons for such lack of advancement, if they existed; and to make recommendations. The Board, which was headed by Sir John Forster (president of the British Industrial Court, and chairman of the National Arbitration Tribunal and the Railway Staff National Tribunal in the U.K.), published its findings on Oct. 18, 1954.

The Board accepted the view, expressed by all the parties, that the African in the industry was capable of advancement and had not been permitted to advance to the full extent of his capabilities. On the other hand it rejected the claim of the African Mineworkers' Union that, with the exception of a few technical jobs, there were no jobs in the industry which an African was incapable of doing, and accepted the mining companies' view that industrial advancement would be slow for the African. Advancement of Africans, it stated, had been prevented by the fundamental difference of opinion between the companies, which claimed that remuneration for a promoted African must be related to the African wage structure, with due regard to the extra responsibilities or skill involved, and the N.R.M.W.U., which maintained that the remuneration must be that of the European grade in which the work had been classified. The Board reached the conclusion, however, that "the establishment of the principle of awarding to any promoted African the European rate of remuneration would disrupt the African wage structure throughout the Federation and seriously threaten the national economy," and would constitute "an effective bar to their advancement."

The report added: "While at European rates of remuneration there would be no advancement at all, we cannot hold that advancement based on differential rates is unfair, especially having regard to the companies' readiness to guarantee the unreduced employment of all their European employees. Nor can we hold that there is adequate justification for the fear that the competition may become unfair in the future. We hold the view that European workers will have ample time to adjust themselves and their families to the degree of advancement that is to be expected. It is a corollary to these conclusions that the proposed method of remuneration does not constitute a cheap labour policy, and in the light of these conclusions we cannot regard as justified the contention of the European union that the African should receive the European rates of pay and conditions. We are satisfied that a reasonable degree of African advancement will be achieved only by making available at rates of remuneration duly related to the African wage-structure work which, having been simplified by the fragmentation of some of the European jobs, will provide some missing rungs in the African industrial ladder. We come therefore to the conclusion that reasonable fragmentation is necessary. . . ."

The mining companies announced their acceptance of the report on Oct. 22, 1954, and invited the N.R.M.W.U. to resume negotiations; the latter, however, refused to do so on the basis of the report. Somewhat different proposals for African advancement were put forward during the next few weeks by the two main companies.

The Rhodesian Anglo-American ("Rhoanglo") group proposed on Nov. 3, 1954, that a fixed proportion of jobs should cease to be exclusively "white" each year for a period of five years, at the end of which time the total number of Africans advanced to these posts should not exceed five per cent of the total number of Europeans employed on Jan. 1, 1955.

The Rhodesian Selection Trust (R.S.T.), on the other hand, proposed on Feb. 3, 1955 (*a*) that, in addition to certain "least skilled" jobs, which should be transferred from Europeans to Africans, an "intermediate schedule" of jobs should be created to bridge the gap between jobs at present held by Europeans and Africans, and (*b*) that rates of pay for jobs on this schedule, which could be held by both Europeans and Africans, should be related to European wage-scales. If an African proved capable of handling a job on his own he would receive the full European rate of pay, whilst if a job formerly done by one European had to be done by two or more Africans, the former European wage would be divided between them.

A compulsory ballot of the 4,000 members of the N.R.M.W.U., held on Jan. 29, 1955, showed a 60 per cent majority in favour of admitting Africans to several "white" jobs, and a second ballot held from March 16-19 confirmed this result. The union accordingly offered on May 19 to surrender 13 categories of jobs to Africans and to discuss the surrender of further categories, provided that the mining companies agreed to certain safeguards, including declared adherence to the "rate for the job" and a guarantee that no European should lose employment as a result of the change. Negotiations were resumed on this basis but again broke down on July 7, 1955, as the R.S.T. group, though promising fullest consultation with the union, refused to accept a demand that the union should have the right to veto any suggestions for African advancement that might be put forward at any time

An agreement between the Rhoanglo group and the N.R.M.W.U. was signed on July 31, 1955, the main conditions of which were as follows: (1) 24 categories of jobs hitherto held by Europeans would be transferred to Africans; (2) union members whose jobs were taken over by Africans would be given alternative employment on terms not less favourable than before; (3) no further negotiations on African advancement would take place for three years; (4) no jobs would be transferred from Europeans to Africans without the union's consent. It was announced on Aug. 5 that under this agreement about 240 Africans would take over jobs held by Europeans, whilst 366 would be promoted to jobs not impinging on European fields of work.

The R.S.T. group, in a statement issued on Aug. 15, 1955, reaffirmed its refusal to accept the right of veto demanded by the N.R.M.W.U. and conceded by the Rhoanglo group. It maintained that if this claim were conceded, a similar right would eventually be demanded in other industries, thereby reproducing the pattern of South African industry and destroying the principle of racial partnership. In view of the R.S.T.'s firm attitude, the union agreed to abandon the demand, and on Sept. 10, 1955, concluded an agreement with the R.S.T. which, although generally similar to that concluded with the Rhoanglo group, omitted the veto clause, and also the clause postponing further negotiations for three years. The agreement met with considerable opposition from a section of the union executive, as a result of which the union's president (Mr. A. Clarke), whose conciliatory attitude had been strongly criticized, resigned on Sept. 11.

A general agreement, similar in its terms to that concluded with the R.S.T., was signed by the Chamber of Mines and the N.R.M.W.U. on Sept. 27, 1955. Under this agreement about 1,200 Africans, out of a total African labour force of 37,000, were expected to receive promotion during the next three years, and the more skilled of these would receive £40 a month. The maximum wage hitherto paid to Africans had been £28 a month, but very few had qualified for this amount.

The African Mineworkers' Union and the Mines' African Staff Association announced their rejection of the agreement on Jan. 6, 1956, on the grounds that the proposed pay was too low and the required educational qualifications too high. Mr. Katilungu, the president of the Mineworkers' Union, pointed out that the highest wages offered to Africans for one group of jobs was £36 a month, as compared with an average of £130 a month paid to Europeans doing the same work, whilst the Staff Association objected to the fact that Africans with the necessary experience and practical qualifications might be excluded from advanced work because they had not reached the required educational standard.

A strike called by the African Mineworkers' Union on Jan. 3, 1955, to enforce a demand for a wage increase of 10s. 8d. a shift was supported by about 32,000 Africans, and temporarily stopped production entirely at three of the four producing mines in the Copperbelt. As a result of an ultimatum by the mining companies that strikers who did not return to work would be dismissed and evicted from their houses, a slow drift back to work began during February, and at the end of the month the union offered to call off the strike on condition that there was no victimization. These terms were accepted, and the strike (the longest in the history of the Copperbelt) ended on March 2. The Chamber of Mines decided on March 22 to give recognition to the African Staff Association, which had not supported the strike, and on May 12 gave six months' notice of its intention to end the existing agreement with the African Mineworkers' Union as the sole representative of African employees The African Staff Association, founded in 1954, has about 3,000 members, and represents Africans holding senior and administrative posts in the mines.

A new wage award, under which African mineworkers would benefit by between 26s. 6d. and 57s. 6d. a month, was announced on July 8, 1955.—(Federal Information Dept., Salisbury - Times - Manchester Guardian - Financial Times - Economist)

Note. The two established copper mines belonging to the Rhodesian Anglo-American group are Nkana (Rhokana) and Nchanga, whilst a third mine—Bancroft—is in the stage of development. The two established mines belonging to the Rhodesian Selection Trust group are Roan Antelope and Mufulira, whilst Chibuluma is in the development stage. (Economist)

A. NETHERLANDS. — Resentment at Mr. Dulles's Press Interview in Indonesia. - Note to Washington.

Dr. Luns, the co-Foreign Minister of the Netherlands, said in the States-General on March 22 that the Netherlands Government was "shocked and disappointed" at some of the remarks made by Mr. Dulles during his recent visit to Indonesia (see page 14841, second column). He added that several of Mr. Dulles's statements were not in accordance with relations between allies such as existed between the Netherlands and the United States, and expressed the opinion that "instead of contributing to *rapprochement* between the Netherlands and Indonesia, it is to be feared that the Secretary of State has made it more difficult." In particular, Dr. Luns said that Mr. Dulles had created the impression that the U.S.A. approved Indonesia's action in unilaterally abrogating the Netherlands-Indonesian Union. The views of the Netherlands Government were conveyed on the same day to the U.S. Ambassador in The Hague (Mr. Freeman Matthews), whilst on March 29 the Netherlands Ambassador in Washington (Dr. van Royen) presented a Note to the State Department—the contents of which were not disclosed—drawing attention to the feeling aroused in Holland by Mr. Dulles's press statement in Jakarta. (Algemeen Handelsblad, Amsterdam - New York Times)

(Prev. rep. 14840 A; 14715 A.)

B. UNITED KINGDOM. — Repayment of U.S. Lend-Lease Silver.

The Treasury announced on April 13 that a start had been made on the shipment of silver to the U.S.A. in fulfilment of the U.K.'s obligation to return the 88,000,000 oz. borrowed from the United States during the war under Lend-Lease arrangements. [The silver was due to be repaid within five years of the official ending of the state of emergency in the U.S.A.—that is, by April 1957.] The Treasury stated that most of the 88,000,000 oz.—which, at current prices, was worth about £29,000,000—had been extracted by the Royal Mint from silver coinage which had been withdrawn from circulation and was being replaced by cupro-nickel coinage. The Lend-Lease silver received during the war was used mainly for industrial and, to a lesser extent, for coinage purposes. (Treasury Press Office)

C. SOUTH AFRICA. — Immigration Policy.

The Minister of the Interior, Dr. Donges, made a statement on the Union Government's immigration policy during the course of a debate in the House of Assembly on March 9. The Minister was replying to an Opposition motion calling for the introduction of a State-aided immigration scheme, the debate being finally adjourned without a vote being taken.

Mr. H. G. Lawrence (United Party), moving the Opposition motion, asked the Government, as a matter of urgency, to consider introducing a State-aided selective immigration scheme to combat the increasing scarcity of skilled labour, and to protect and foster the influence of European civilization in Africa. He pointed out that the last official figures (given in Parliament in April 1955) showed that there was a total shortage of something like 29,000 Europeans in the Public Service, the Railways, and the Police.

Referring to the success of the State-sponsored immigration scheme introduced by General Smuts, Mr. Lawrence said that the accelerated flow of immigration which had taken place because of the United Party's policy, and which had reached a peak of 35,631 immigrants in 1948, had been abruptly halted as a result of the Nationalist Government's abandonment of the scheme (see 9817 A). In 1949 the number of immigrants had dropped to 14,000, whilst in the years 1950-51 those who had emigrated from South Africa had actually exceeded the number who had entered the country In the 10 years since the war South Africa had received 165,795 immigrants and had lost 92,000, a net gain of only 74,000, whereas Canada had received 1,200,000 immigrants and Australia 1,000,000. Mr. Lawrence commented that it was "a curious anomaly" that a Government which stated that its policy was White leadership and White domination did not help to bring additional White manpower to the Union.

Dr. Donges, in reply, pointed out that the Government's policy was one of selective immigration—i.e., it was prepared to welcome those who conformed to the needs of health and of public security considerations, and to admit immigrants in relation to the Union's capacity to absorb them. As regards the shortfall of immigration, he accused the Opposition of ignoring the "passive attitude" of employers as well as the "misrepresentation" of the Government's policies in the [foreign] Press On the question of labour scarcity in the Union, Dr. Donges said that an official survey had been concluded and was being studied by the Minister of Labour, who hoped to make an announcement soon With respect to the Public Service, a recruiting mission which had been sent to Europe to obtain some 500 recruits had actually obtained 359, recruiting having been poorest in Britain.

With regard to the general question of immigration, Dr. Donges said that during his European visit in 1955 he had had discussions with heads of Government departments in the countries concerned. Everywhere he had found prosperity, full employment, and a scarcity of skilled workers, and many of these countries had introduced social security schemes, with the result that there was no economic pressure on the people to emigrate. Dr Donges stated that South Africa now had Immigration Attachés in Britain, Holland, Western Germany, Belgium, and Sweden, and that, while in Switzerland, he had had talks with officials of the Inter-Governmental Committee on European Migration (I.C.E.M.); one of the committee's officials had now come to South Africa to study local conditions, and discussions were in progress on South Africa's possible membership of the I.C E.M.

Among other speakers, **Dr. du Plessis** (Nat.) said that the Nationalist Party had never been opposed to immigration as such, but was opposed to unrestricted immigration and to the Afrikaner people being "ploughed under" by immigrants. **Mr. Waterson** (U.P.) referred to the difficulty of obtaining Union citizenship, asserting that an immigrant had at present to undergo "little short of an inquisition" to become a South African citizen.

Figures published by the Bureau of Census and Statistics on April 5 showed that 16,013 immigrants had entered the Union in 1955 and 12,516 South Africans had left the country—a net gain of 3,497. These figures compared with 16,416 immigrants, 11,336 emigrants, and a net gain of 5,080 (all revised figures) in 1954.

It had been announced on Nov. 22, 1955, that the Government had decided to appoint a Director of Immigration and that Mr. A. B. Kriegler, former chairman of the Immigration Selection Board, had been appointed to that post.

D. NORWAY. — Release of Wartime Collaborators.

It was announced in Oslo at the beginning of April that four leading Norwegian Nazis, sentenced after the war to life imprisonment, had been released on probation. Three of them —R. J. Fuglesang, J. A. Lippestad, and A. H. Stang—had been members of the Quisling government, whilst the fourth was a prison guard. Another seven Norwegian Nazis are still serving terms of life imprisonment.—(Aftenposten, Oslo)

E. FRANCE. — New Paris Evening Paper.

A new evening paper, *Le Temps de Paris*, began publication in Paris on April 17. Its managing editor is M. Philippe Boegner, who formerly worked for *Paris Soir* and the illustrated weekly *Paris Match*.—(Le Monde, Paris) **(Prev. rep. 14777 A.)**

A. INDIA. — Mr. Nehru's Review of International Situation. - Criticisms of SEATO and Baghdad Pacts.

Following his discussions with Mr. Dulles, Mr. Selwyn Lloyd, and M. Pineau, all of whom had visited Delhi after the SEATO Council meeting in Karachi (see 14840 A), Mr Nehru reported to the *Lok Sabha* (House of the People) on March 20 on his conversations with the U.S, British and French Foreign Ministers. In a comprehensive review of the international situation, Mr. Nehru strongly criticized both the SEATO and Baghdad Pacts; expressed India's concern at the reference to Kashmir in the SEATO Council's communiqué, and also at the U.S. arms supplies to Pakistan; and spoke *inter alia* of the Goa question, the situation in the Middle East, Indo-China, and the Far East, and the changes in Soviet policy announced at the 20th congress of the Soviet Communist Party. A summary of Mr. Nehru's speech (cross-headings inserted) is given below:

"During the past few months we have had the pleasure of welcoming to India many eminent visitors from abroad. . . . Of these visitors, three recent ones have been Mr. Selwyn Lloyd, Foreign Minister of the United Kingdom, Mr John Foster Dulles, the U S Secretary of State, and M Pineau, Foreign Minister of France. With each of them I discussed the international situation, and also how best tension could be relaxed and peace promoted.

The SEATO Council Meeting and Kashmir. "The occasion which brought these statesmen to this region of the world was the meeting of the SEATO Council in Karachi. To our great surprise the Council thought fit, at the insistence of one of its members [i e Pakistan], to discuss the question of Kashmir, and to include a declaration on this question in its final communiqué In doing so, the Council confirmed our worst apprehensions about the Organization it represents. The declared purpose of the South-East Asia Treaty is to increase the defensive strength of the parties to the treaty against external aggression and internal subversion. How the question of Kashmir could come within the scope of the SEATO Council is not clear to us. Its reference to Kashmir could only mean that that military alliance is backing Pakistan in its disputes with India. . . . We have noted with regret that three other Commonwealth countries [i e. Great Britain, Australia, and New Zealand] have associated themselves with the offending declaration. We have communicated our protest to all the countries concerned at the unusual procedure adopted by the Council"

U.S. Military Aid to Pakistan. "I had talks with Mr. Dulles about U S. military aid to Pakistan I told him how this has been causing us serious concern. The atmosphere in Pakistan seems to be one of threats and menaces towards India India continues to be the subject of bitter attack in sections of the Pakistani Press, and bellicose statements appear from time to time even from responsible leaders. More recently there has been a recrudescence of border incidents which, by their frequency and dispersion over a wide area, have assumed special significance Substance is thus lent to the growing belief in this country that, whatever the object of the U.S A in giving military aid to Pakistan, in Pakistan itself the resulting acquisition of military strength has been generally welcomed not because it will increase Pakistan's defensive capacity against a potential aggressor, but because they hope thereby to be able to settle disputes with India from what is called a 'position of strength.'

"We in India wish Pakistan well. She has just declared herself a republic and we offer her our best wishes at the threshold of a new chapter in her history. . . It is not our intention to enter upon any arms race with Pakistan or any other country, even if we could afford such competition. Our energies and resources will continue to be absorbed for many years to come in our Five-Year Plans, and none of us would wish to divert any part of our limited resources to further expenditure on arms Nevertheless, those responsible for the destiny of India have to take note of certain facts I can only express our regret and disappointment that, at a time when we in Asia should be bending our energies to the task of development, a new factor making for tension and instability should have been introduced by this arms aid I have explained our views clearly to Mr. Dulles, and I hope he now has a better appreciation of our feelings"

The SEATO and Baghdad Pacts. "Recent developments serve once again to focus attention on military pacts. These pacts . . . seem to be on the increase, and are being strengthened and enlarged irrespective of previous commitments and declarations. This is the history of all pacts, more especially of the South-East Asia Defence Treaty and the Baghdad Pact. The former came into existence at a time when, after many years of warfare, there was peace in South-East Asia. Tensions were relaxed and people looked forward to a return to normality There was no possibility of aggression in the foreseeable future. Yet at this moment of relief and the beginnings of hope this pact came into existence, and resulted immediately in increasing tension.

"The more recent Baghdad Pact has already brought disruption, insecurity, and discontent in Western Asia. Thus the very objective for which these pacts were made is being defeated. It is our firm conviction that these two treaties and similar military pacts do not add to the intrinsic strength of regions in the interest of which they are supposed to have been devised.

"Talks on disarmament in the face of military pacts by either bloc are inconsistent, and a mockery of avowed purposes. . . . It is not by military alliances and matching of strength with strength that tensions can be lowered and peace and stability re-established where conflict now prevails. We hold—and with each new experience are further confirmed in our conviction—that in adherence to and practice of the 'Five Principles', now widely known as *Panch Sila*, there alone lies promise of a new era of international peace and stability.

"The coming of atomic energy and the dread weapons it has let loose on the world has made all previous thinking, not only in regard to military matters but also other matters, out of date. Leaders of nations have as a consequence ruled out war In this new situation there is no logic in clinging to the idea of 'cold war.' We have stated repeatedly that nuclear weapons must be banned and that atomic energy must be used for the benefit of humanity, and not be controlled by the Great Powers If war is to be ruled out, then 'cold war' becomes illogical and harmful. It can only keep up the atmosphere of hatred and fear and the ever-present danger of its being converted into nuclear war"

The Goa Dispute. "I also had discussions on Goa with Secretary Dulles. As the House is aware, the joint statement issued by him and Dr. Cunha, the Foreign Minister of Portugal [see 14613 A], caused deep resentment throughout India We took this matter up immediately with the U.S Government and explained to them how, in the context of the present situation in Goa, the association of the U S Secretary of State with a statement of that kind could only have one effect—to give encouragement to Portugal in pursuing a policy which represents a continuance of colonialism Mr. Dulles assured me that in subscribing to the joint statement the United States was not supporting Portugal against India We do not, of course, doubt this statement, but the position nevertheless is that the joint communiqué is being interpreted, especially by the Portuguese authorities, as if it supported their claims. We have made our position clear to the U S Government, and I repeat that in no circumstances will we tolerate the continuance of the last remnants of Portuguese colonialism on India's soil. We have been patient and shall continue to be so, but there will be no compromise on this issue. I hope that friendly countries will impress on Portugal the unwisdom of following a policy of 16th-century colonialism in the second half of the 20th century"

The Middle East. "With all three Ministers we have had detailed discussions about the situation in West Asia [i e. the Middle East]. All are agreed that this situation is an explosive one I do not presume to give advice about any quick solution of this difficult problem. At the same time, I have no doubt in my mind that a solution can only emerge from a gradual relaxation of tension Here again the Baghdad Pact is partly responsible for a good deal of the present trouble which now plagues West Asia. It has rent asunder Arab unity and has thereby made the solution of a difficult problem still more difficult and complicated"

Indo-China. "I discussed the situation in Indo-China with the three Foreign Ministers, particularly with Mr Selwyn Lloyd, who is co-chairman of the Geneva Conference [on Indo-China] When, in response to the invitation of the Geneva Powers, India accepted the chairmanship of the three International Commissions in Indo-China, we did so in the hope that at long last peace would return permanently to this troubled region in South-East Asia which is so close to us and with which we have so many historic ties. It appears now that the time-schedule for elections as a preliminary to the unification of the two parts of Vietnam, which was envisaged in the final declaration at Geneva, is unlikely to be fulfilled We are compelled, therefore, to review the situation in so far as it concerns us. We have no intention of trying to escape from a position of responsibility, or of taking a step which would hamper a peaceful settlement We have, therefore, suggested to the two co-chairmen that they should review the position and decide on steps that should be taken to secure compliance with the Geneva Agreement."

The Far East. "Discussions with the three Foreign Ministers also covered the present situation in East Asia, particularly in relation to the coastal islands of Quemoy and Matsu, as well as Taiwan [Formosa]. I explained to them how, in our view, the basic cause of trouble in East Asia is non-recognition of a patent fact. That fact is the emergence of the new China, unified as never before in its history—strong, powerful, and conscious of its rights and dignity. I do not think that the situation in East Asia will return to normal so long as the Chinese People's Republic is not admitted to the United Nations. In particular, I expressed the view that China will never feel secure so long as Quemoy and Matsu remain in occupation of hostile forces. An essential first step would be the withdrawal of those forces from these islands so that they can become part of the mainland. The Taiwan issue will still remain, but I believe that if the coastal islands were to return to China, the problem of Taiwan could be handled a little more easily.

"In this context we have been watching with interest the course of the talks at Geneva between the U.S. and Chinese Ambassadors [see 14702 A] Both sides are broadly agreed that they should settle disputes between them through peaceful negotiations. The main difficulty is that of applying this principle to the particular case of Taiwan. We hope that a satisfactory formula will be found. . . ."

North Africa. "I should like to refer in particular to the talk I had with M. Pineau about North Africa. We in India appreciate and welcome the steps taken by the French to restore sovereignty to Morocco and Tunisia. The difficult problem of Algeria still remains. I am glad to find that M. Pineau takes a realistic view of the situation. The problem there is complicated by the presence of about one and a quarter million persons of European descent who have been settled there for some generations The House will not expect me to go into further details of these discussions. I hope that the problem of Algeria will be solved to the mutual satisfaction of the French and Algerian peoples. . . ."

Disarmament. "If peace is to be aimed at, disarmament is essential. As with every other difficult question, it is easier to proceed step by step. The Sub-Committee of the U N Disarmament Commission has been meeting in London, and there is already a large measure of agreement on this subject. Unfortunately, growing tensions in the world do not create an atmosphere in favour of disarmament; yet the urgency of disarmament grows in proportion to invention and the accumulation of weapons of ever-increasing destructive potential. We believe in unconditional prohibition of the production, use, and experimentation of nuclear and thermo-nuclear weapons, and, as a step to that end, the suspension of experimental explosions and an armaments truce."

The Soviet Communist Congress. "I should like to draw the attention of the House to a very important event in recent weeks. I refer to the 20th Congress of the Communist Party of the Soviet Union which met recently in Moscow. There can be no doubt that this congress has adopted a new line and a new policy. This new line, both in political thinking and in practical policy, appears to be based upon a more realistic appreciation of the present world situation, and represents a significant process of adaptation and adjustment. According to our principles, we do not interfere in the internal affairs by other countries, just as we do not welcome any interference by others in our country. But any important development in any country which appears to be a step towards the creation of conditions favourable to peaceful co-existence is important for us, as well as to others. For this reason we feel that the decisions of the 20th Congress of the Soviet Union are likely to have far-reaching effects I hope that this development will lead to the further relaxation of tension in the world. . ."

Strong exception to the SEATO Council's reference to Kashmir was also expressed by the Kashmiri Premier (Bakshi Ghulam Mohammed) in a speech on March 9 to the State Assembly.

Asserting that Pakistan had committed "unprovoked aggression" against Jammu and Kashmir, he declared that the SEATO Powers were "sadly mistaken" if they thought they could change the decision whereby Kashmir had acceded to India. He accused the SEATO Powers of having ignored the changed international conditions of the past seven years, and declared *inter alia*: "It is unfortunate that the SEATO Powers, under American leadership, should try to create conditions of uncertainty and chaos in this strategic area, where peace and democracy have been established after terrible sufferings."

The Premier of Kashmir also expressed his "amazement" that the SEATO Council had been "agitated" at the statements of Marshal Bulganin and M. Khrushchev recognizing Kashmir as a part of India, declaring in this connexion that the Soviet leaders had "only recognized something that was a patent fact."—(The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London)

B. UNITED KINGDOM. — Civil Service. - Improved Pay and Conditions. - Implementation of Royal Commission's Recommendations.

The Treasury announced on March 31 that Civil Servants and Post Office employees earning up to £1,600 a year would receive immediate pay increases equivalent to 5½ per cent of their current rates. The improvements, based on the recommendations of the Royal Commission on the Civil Service which reported in November (see 14587 A), will affect over 600,000 men and women and cost about £30,000,000 a year, of which the share of the Post Office will be £18,000,000 and that of the remainder of the Civil Service £12,000,000. Details of the increases are given below.

Salaried Staff. Annual basic pay below £350, £21. 10s.; £350-£500, £25 10s, £500-£700, £36; £700-£900, £48; £900-£1,250, £65; £1,250-£1,600, £85 Juveniles under 18, £15. 10s., 18-21, £21. 10s.

Weekly Paid Staff. Basic pay under £6. 14s. weekly, 8s 6d.; £6 14s.-£9 11s, 10s., £9 11s.-£13. 8s., 14s; £13. 8s.-£17. 5s. 18s. 6d Juveniles under 18, 6s.; 18-21, 8s. 6d.

It was stated that the publication of the Royal Commission's report had been followed by negotiations in the National Whitley Council on the basis of Government acceptance of the Royal Commission's recommendations. Discussions on most major questions had now been concluded, and in May and June the staff associations would present to their conferences comprehensive proposals for giving the recommendations effect, with certain modifications. The pay increases now proposed were interim increases in pay supplements pending ratification of these proposals, and took account of the general movement of pay in other occupations since the report had been made. They did not apply to the higher grades of Civil Servants because the Government proposed to follow the procedure suggested by the Commission and to appoint a standing advisory committee to "exercise a general oversight of the pay of the higher Civil Service."

The staff side of the Civil Service National Whitley Council announced on April 11 that, after lengthy negotiations on the Royal Commission's recommendations, proposals had been agreed between the two sides of the Council providing for (1) the spreading of hours of work (42 in London, 44 in the provinces) wherever practicable over 5 days, instead of 5½ days as at present; (2) the maintenance of essential services to the public on Saturdays, (3) the reduction of leave as proposed by the Royal Commission, subject to some minor modifications and to existing Civil Servants having reserved rights to their present leave. The proposals—which would apply to about 380,000 office staff, but not to the main Post Office grades—would be submitted to the unions represented on the staff side of the Council. If approved by them and ratified by the staff side, they would come into effect from July 1, 1956.—(Times - Daily Telegraph) **(Prev. rep. 14587 A.)**

C. AUSTRALIA. — Diplomatic, Commonwealth and U.N. Appointments. - Embassy Status with Burma.

The following appointments were announced in Canberra during the past 12 months:

Mr. H. A. McClure-Smith (a former editor of the *Sydney Morning Herald*), Minister in Cairo since 1953, as Ambassador to the Netherlands in succession to Sir Alfred Stirling, who was appointed Ambassador to France (May 1955).

Mr. Arthur Cutler, V.C., High Commissioner in Colombo, as Ambassador to Egypt *vice* Mr. McClure-Smith (June 1955).

Mr. T. H. Critchley, head of the Pacific Section of the External Affairs Department, as Australian High Commissioner in Malaya, a new post (November 1955). The Minister for External Affairs (Mr. Casey) explained that the appointment of an Australian High Commissioner in Kuala Lumpur was desirable in view of the important constitutional developments in Malaya.

Dr. Ronald Walker, Ambassador in Tokio, as Australian permanent representative at the United Nations *vice* Mr. William Forsyth who was appointed to a senior post in the External Affairs Department (December 1955)

Sir Alan Watt, Australian Commissioner for South-West Asia and Commissioner in Singapore, as Ambassador to Japan *vice* Dr Walker (February 1956).

Mr. Allan Eastman, Deputy High Commissioner in Singapore, as High Commissioner to Ceylon *vice* Mr Cutler (February 1956).

Vice-Admiral Sir John Collins, formerly Chief of Australian Naval Staff, as High Commissioner to New Zealand (February 1956).

Mr. Patrick Shaw, formerly head of the Australian Mission in Tokio, as Ambassador to the German Federal Republic *vice* Mr. J. D. L. Hood (April 1956).

Mr. Casey, announced on April 18 that the Australian and Burmese Governments had agreed to raise their respective Legations in Rangoon and Canberra to the status of Embassies. (Australian News and Information Bureau) **(14023 B.)**

A. CANADA - MEXICO - UNITED STATES. — Tripartite Meeting of U.S. and Mexican Presidents and Canadian Prime Minister.

President Eisenhower, the Mexican President (Señor Ruiz Cortines), and the Canadian Prime Minister (Mr. St. Laurent) met at White Sulphur Springs (West Virginia) on President Eisenhower's invitation from March 26-28. The meeting—the first of its kind to be held between the Heads of Government of the U.S.A., Mexico, and Canada—was also attended by the three Foreign Ministers (respectively Mr. Dulles, Señor Padilla Nervo, and Mr. Lester Pearson). It was completely informal and without a fixed agenda, a statement issued before the meeting saying merely that the discussions would deal with "matters of mutual interest."

The talks were partly on a tripartite basis and partly bilateral—between President Eisenhower and President Ruiz Cortines, and between President Eisenhower and Mr. St. Laurent. The U.S.-Mexican talks, dealing with issues of specific interest to the two countries, were also attended by Mr. Dulles, Señor Padilla Nervo, and Dr. Milton S. Eisenhower (the President's brother and formerly special U.S. envoy to the Latin American countries). The U.S.-Canadian discussions, on problems on specific interest to the U.S.A. and Canada, were attended by Mr. Dulles and Mr. Lester Pearson.

No communiqué was published on the talks, but Mr. St. Laurent made a statement in the Canadian House of Commons on April 9.

After saying that the general discussion had "centred largely upon the comprehensive report which Mr. Dulles made on his recent visit to Asia" (see page 14842), Mr. St. Laurent said that there was no foundation for Press reports to the effect that there had been "an emphatic expression of policy difference between the U.S.A. and Canada in respect of Communist China" It was quite true, he added, that President Eisenhower and Mr. Dulles had explained "very frankly" the reasons why U.S. recognition of the Communist Government in Peking could not be contemplated under present circumstances, and why they felt their support should be continued to the Chiang Kai-shek Government. On the Canadian side nothing had been said which would suggest any change from the policy statement made by Mr. Lester Pearson on Jan 31 (see 14707 B) It had, however, been recognized by both sides that the recognition of the Peking regime by many other countries had created a problem as to which regime should represent China at the U.N , and that this problem might be expected to grow more acute as time went on.

There had also been "considerable discussion" over the position in the Middle East, "the seriousness of which everyone recognized." It had been agreed that, while all possible steps to reduce immediate tension should be taken, peace could only be secured by an agreed political settlement between Israel and her neighbours. Furthermore, there had been a general discussion of the possible consequences of recent Communist Party developments in Russia, and consideration had also been given to the problems arising from the emergence of new States in Asia and Africa. In connexion with the question of continuing international economic assistance to under-developed countries, the view had been expressed on the Canadian side that it might help to remove any suspicion of ulterior motives if the U.N. were brought more into the picture than had been the case hitherto, "at least from the point of view of using the Organization as a clearing-house for plans, policies, and information in regard to international assistance schemes," similar to the practice developed under the Colombo Plan.

On the U.S.-Canadian bilateral talks, Mr. St. Laurent stated that he had emphasized the importance of better-balanced trade between the two countries. He had referred to the existing unfavourable balance for Canada in their visible trade, and had mentioned that the correction of this unbalance by U.S. capital movements to Canada was occasionally the cause of some concern lest the control of Canadian economic development, which should remain in Canadian hands, might be prejudiced. Finally, he had suggested to President Eisenhower that problems regarding the use of water-power on rivers crossing the international boundary might be studied at an inter-governmental conference.

Although the tripartite meeting ended without any concrete agreements, President Eisenhower expressed the view that it had been "a great success" in giving the statesmen concerned an "informal and relaxed opportunity" to get to know each other better and to discuss current questions.
(New York Times - New York Herald Tribune - Canadian Department of External Affairs, Ottawa - Montreal Star)

B. RUMANIA. — Release of Jewish Leaders.

The publication *World Jewish Affairs*, organ of the World Jewish Congress, reported on April 26 that the Rumanian Government had released the leaders of the Jewish community who had been sentenced to long terms of imprisonment in 1953 and 1954 for Zionist and other "anti-state" activities. The releases were apparently in conformity with the internal policy changes recently carried out in the Communist countries of Eastern Europe.—(World Jewish Affairs)
(Prev. rep. 14817 A ; 13820 A.)

C. BRITISH COLONIAL EMPIRE. — Colonial Development Corporation. - Report for 1955. - Surplus of £409,000.

The report of the Colonial Development Corporation for 1955, published on April 25, showed a revenue surplus of £409,000, after payment of £307,000 interest to the Colonial Office. The surplus, the first earned by the Corporation on revenue account in its eight years of existence, compared with a consolidated loss of £511,000 incurred in 1954. It included a net operating profit on direct projects and subsidiary undertakings of £113,615 (against a net loss on these projects of £222,353 in 1954), this profit having been earned in spite of the sale of the Corporation's controlling interest in Chilanga Cement Ltd. and the loss of its share of that company's profits, amounting in 1954 to nearly £217,000. The Corporation's activities in 1955 are summarized below :

Projects in Operation. During the year 10 new projects were started (compared with seven in 1954), and at Dec. 31, 1955 there were 63 continuing projects and investigations in progress, against 56 on Dec 31, 1954. The total capital approved for these projects had increased from £47,822,000 at Dec. 31, 1954 to £54,853,000 at Dec. 31, 1955.

Location of Projects. The projects were located as follows (capital approved for each area shown in parentheses) . *Caribbean Region*, 18 (£7,500,000); *Far East*, seven (£15,400,000); *East Africa*, 13 (£13,000,000); *Central Africa*, six (£6,000,000); *High Commission Territories*, 10 (£9,700,000); *West Africa*, eight (£3,000,000); *Mediterranean area*, one.

Operating Results. Most projects improved their operating results during the year, the outstanding examples being British Guiana Timbers Ltd., which reduced its net loss from £114,676 in 1954 to £37,730, and Borneo Abaca Ltd., which cut its loss from £161,547 to £46,391.

Abandoned Projects. Three projects were abandoned during the year—the Falkland Islands Freezer (which the report described as "too grandiose"), and the Murango Mines (Tanganyika) and Barton Ramie (British Honduras) investigations

Capital Losses. The amount written off capital account increased during 1955 from £6,269,468 to £8,000,000, the new figure including £300,000 written off on account of the Falkland Islands Freezer scheme, £245,000 and £184,000 respectively for the Murango and Barton Ramie investigations, and £424,457 for capital losses in connexion with the Bechuanaland cattle ranch.

The report maintained that most of the capital losses "would not have occurred if an efficient and experienced organization had been built up before the Corporation spread itself into world-wide operations." It was therefore proposed to transfer the whole of the £8,000,000 to a "special loss account," which the Corporation would disregard when adjusting its policies to comply with the statutory requirements that it should pay its way, taking one year with another. The Corporation contended that the Government should waive interest on the whole amount, instead of on part only as at present, and that the £8,000,000 should be converted into an equity capital of the International Bank for Reconstruction and Development and the International Finance Corporation. In this connexion the report pointed out that long-term borrowings by the Corporation from the Colonial Office had been subject to an initial seven-year interest moratorium , from 1956 onwards, however, the service of existing borrowings from the Colonial Office would build up steadily to over £1,000,000 in 1960 and to nearly £2,000,000 in 1964.

Competition from Synthetic Substitutes. Discussing the "pressure from synthetic substitutes against raw materials traditionally grown in the tropics," the report stressed the need for the Corporation to assess which of its products—such as rubber, hemp, tung oil, and tanning materials—were likely to be saleable in 10 or 20 years' time. It pointed out, however, that "increasing association with local people in C D.C projects through smallholder and co-operative schemes will not make decisions involving their livelihood any easier."

Legality of Housing Schemes. With reference to the various housing and road schemes in which the Corporation was interested, and on which nearly £7,500,000 was still owing to the contractors, with more "morally committed," the report referred to the position in terms similar to a recent announcement by the Colonial Secretary (see below).

Mr. Lennox-Boyd had announced in the House of Commons on April 18 that he had been advised that the Corporation's housing loans to the Government of Kenya and Southern Rhodesia, as well as the loans to the Federal and Colonial Building Society in Malaya and certain West African works contracts, were not within the Corporation's powers as defined by the Overseas Resources Development Act. Although the Corporation took the view that the Act permitted them to undertake these and similar projects, the Government had decided to introduce legislation in the current session to put the matter beyond all doubt, and were considering a suitable amendment to re-define the Corporation's powers. Meanwhile no further advances could be made under the Act from public funds for these projects, and the Corporation had been asked to suspend negotiations on any new similar projects.

MAY 5—12, 1956

A. CEYLON. — General Elections. - Victory of People's United Front. - Resignation of Sir John Kotelawala. - New Cabinet formed by Mr. Bandaranaike. - Statement on New Government's Policy.

General elections held in Ceylon between April 5-10 resulted in a severe defeat for the ruling United National Party (U.N.P.), which lost 46 of the 54 seats which it had held in the previous Parliament. An absolute majority was won by the People's United Front (*Mahajana Eksath Peramuna*, or M.E.P.), led by Mr. Solomon Bandaranaike, the former leader of the Opposition.

The People's United Front, which contested 58 of the 95 elected seats, consisted of Mr. Bandaranaike's *Sri Lanka* Freedom Party, the leading Opposition party in the former House of Representatives; the *Viplavakari Lanka Sama Samaja* (Ceylon Revolutionary Socialist) party, a left-wing group led by Mr. D. P. R. Gunawardena which broke away from the *Nava Lanka Sama Samaja* party in 1951; the *Samasta Lanka Bhasa Peramuna* (Language Front), a Sinhalese communal organization; and a number of Independents. The conservative United National Party, led by Sir John Kotelawala (the Prime Minister), contested 76 seats. The *Nava Lanka Sama Samaja* (Ceylon Socialist) party, led by Dr. N. M. Perera, put forward 20 candidates; although nominally a "Trotskyist" organization, it resembles the left-wing of the British Labour Party in outlook. The Communist Party, led by Dr. S. A. Wickremasinghe, contested 10 seats. In the Tamil-speaking areas of northern and eastern Ceylon, where neither the U.N.P. nor the M.E.P. put forward any candidates, 14 of the 16 seats were contested by the Federal Party, led by Mr. S. J. V. Chelvanayagam, which advocates complete autonomy for these areas within a Ceylonese federation In addition, there were 61 Independent candidates and eight put forward by minor parties.

Polling, which took place in an atmosphere of complete order, was held in 37 constituencies (returning 42 members) on April 5, in 22 (returning 23 members) on April 7, and in 30 (returning 30 members) on April 10. The final results were announced on April 11 as follows:

	Seats		Votes
	1956	1952	1956
People's United Front (M.E.P.)	51	10*	1,045,725
United National Party	8	54	737,447
Nava Lanka Sama Samaja Party	14	9	274,447
Federal Party	10	2	142,758
Communist Party	3	3	119,773
Tamil Congress	1	4	8,914
Tamil Resistance Front	1	—	7,931
Other Parties	—	2	18,891
Independents	7	11	287,943

* In 1952 the *Sri Lanka* Freedom Party and the *Viplavakari Sama Samaja* Party, contesting the elections separately, won nine and one seats respectively.

The Governor-General subsequently nominated three Europeans, two Burghers (Ceylonese of Dutch descent), and one Malay to represent minority interests.

Eight members of Sir John Kotelawala's Cabinet lost their seats—Mr. Jayawardene (Finance), Mr Corea (Commerce), Mr. Dissawe (Lands), Mr. Keethiratne (Posts), Mr. Ratnayake (Home Affairs), Dr. Kaleel (Labour), Mr. Nugawela (Health), and Major Jayawickrema (Transport and Works) The Speaker (Sir Albert Peries) and five Parliamentary Secretaries were also defeated Sir John Kotelawala retained his seat, though his majority fell from 15,468 in the 1952 elections to 8,274 Mr. Bandaranaike was returned by a majority of 41,997 votes (the largest ever recorded in a Ceylon election) over a U.N P. opponent Mr R. G. Senanayake (formerly Minister of Commerce in Sir John Kotelawala's Cabinet), who contested two constituencies as an Independent with M.E.P. support, was returned in both with large majorities The *Nava Lanka Sama Samaja* party increased its strength by five seats, becoming the second largest parliamentary group, whilst the Federal Party, which took the third place, gained eight additional seats. Of the Communist candidates, Dr. Wickremasinghe, the Communist leader, won the seat formerly held by his wife.

The defeat of the U.N.P., which occasioned general surprise both in Ceylon and abroad, was attributed by British press correspondents to the following causes:

(1) The electorate's desire for a change in view of the fact that the U.N.P. had been in office—both before and since the attainment of Ceylonese independence—for nearly 25 years.

(2) Economic discontent, due chiefly to the high price of rice (the staple food of the people) following the reduction of the rice subsidy in 1952, and to dissatisfaction with the housing and unemployment position.

(3) The vigorous campaign waged in favour of the M E.P. by the younger Buddhist monks, who had alleged that Sir John Kotelawala's Government was dominated by Christians. Among the demands put forward by the monks, and accepted by the M.E P., were the transfer of all education (at present largely under Christian control) to the State, the withdrawal of the privileges enjoyed by Christian missionaries, prohibition of the sale and consumption of alcoholic drinks a ban on horse-racing, the replacement of Western by national dress, the raising of capital for economic development by a savings campaign and restrictions on luxury imports, and a *bhoodan* movement similar to that in India (see 14336 B) for redistribution of the land.

(4) Whereas the dispersal of the Opposition vote among a number of parties had enabled the U N.P. to win the 1947 and 1952 elections on a minority vote, in the present elections the M E.P., the *Nava Lanka Sama Samaja*, and the Communist party abstained from putting up candidates against one another in most constituencies. Co-operation between them was assisted by the fact that, despite their differences on linguistic policy, they agreed in advocating the proclamation of a republic, the withdrawal of British forces from bases in Ceylon, a "neutralist" foreign policy, and the nationalization of foreign-owned plantations, banks, and insurance.

[The M.E P., like the U.N.P , advocated that Sinhalese should be the only official language, whilst the *Nava Lanka Sama Samaja* and the Communists supported equal status for Sinhalese and Tamil]

Sir John Kotelawala tendered his resignation to the Governor-General, Sir Oliver Goonetilleke, on April 11, and advised him to call on Mr. Bandaranaike to form a Government.

On relinquishing office Sir John Kotelawala issued a statement claiming that he was leaving to the new Government a cash balance of Rs 197,000,000 (about £15,000,000), as compared with Rs 36,000,000 when he became Premier in 1953. Moreover, while in office he had reduced the Government's short-term liabilities from Rs 184,000,000 to Rs 60,000,000, and had repaid loans and advances totalling Rs 129,000,000

The membership of Mr. Bandaranaike's Government, drawn entirely from the United People's Front, was announced on April 12 as follows:

Mr. Solomon Bandaranaike	Prime Minister, Defence, and External Affairs.
Mr. W. Dahanayake ..	Education.
Mr. C. P. de Silva ..	Land and Land Development.
Mr. M. W. H. de Silva ..	Justice.
Mr. P. H. W. de Silva ..	Industries and Fisheries.
Mr. S. de Zoysa	Finance.
Mr. D. P. R. Gunawardena	Agriculture and Food.
Mr. T. B. Illangaratne .	Labour, Housing, and Social Services.
Senator A. P. Jayasuriya	Home Affairs.
Mr. J. Kuruppu . .	Local Government and Cultural Affairs.
Mr. C. A. S. Marikkar ..	Postal Services, Broadcasting, and Information.
Mr. M. Senanayake .	Transport and Works.
Mrs. V. Wijewardene .	Health.

Mr. R. G. Senanayake subsequently entered the Government on April 18 as Minister of Commerce and Trade, announcing at the same time that he had joined the *Sri Lanka* Freedom Party.

Mr. Bandaranaike (47) studied at Christ Church, Oxford (where he was a contemporary of Sir Anthony Eden), and was secretary of the Oxford Union. After a successful legal career he entered politics as a U.N.P. supporter, becoming Minister of Health and Local Government and Leader of the House in Mr. D S. Senanayake's Government. He went into opposition in 1951 to form the *Sri Lanka* Freedom Party, and after the 1952 elections sponsored the formation of the People's United Front.

Mr. R. G. Senanayake, the only other member of the Cabinet who had previously held office, became Minister of Commerce and Trade after the 1952 elections, but resigned in 1954 owing to disagreement with the Government's policies. Among the new Ministers, **Mrs. Wijewardene** is the first women to hold Cabinet office in Ceylon; **Mr. P. H. W. de Silva,** like Mr. Gunawardena, belongs to the *Viplavakari Lanka Sama Samaja* party, whilst **Mr. M. W. H. de Silva** (who was appointed to fill a vacant seat in the Senate on April 12, the day of his Ministerial appointment) was leader of the former People's Republican Party.

In statements to British press correspondents on April 6, Mr. Bandaranaike had described the M.E.P. as "a democratic Socialist party, as opposed to the extreme conservative and capitalist character of our opponents." His party, he said, would establish a republic if they obtained the necessary two-thirds majority, and had originally favoured withdrawal from the British Commonwealth; the example of India and Pakistan, however, had shown that Commonwealth membership was not incompatible with full independence, and even if Ceylon did withdraw she would retain very close ties with the Commonwealth. After suggesting that Ceylon should play the role of an "Asian Switzerland" and serve as "a bridge between

East and West," Mr. Bandaranaike said that he favoured "a form of dynamic neutralism" in foreign politics, which did not, however, imply any kind of hostility towards the Western Powers. In particular, he wished to maintain the friendliest relations with Britain, which he regarded as "providing a sane balance between the extreme American and Russian views." The question of the British naval and air bases at Trincomalee and Katunayake, however, would have to be looked into at an early date, as any arrangement which tied Ceylon irrevocably to one "power bloc" would inevitably debar the country from the mediatory role which he wished to see it play. In home affairs he favoured the nationalization of banking, insurance, and transport, and of foreign-owned tea and other plantations; full compensation would be paid, however, and there would be no discrimination against foreign investments which had been made on satisfactory conditions.

The new Parliament was opened on April 20 by the Governor-General, Sir Oliver Goonetilleke, who gave details of the Government's policy in the Speech from the throne.

In its foreign policy, the Governor-General stated, the Government would not align itself with any Power blocs and would review the position of the British bases. Consideration would also be given to the exchange of diplomatic representatives with countries in which Ceylon was not at present represented In home affairs, attention would be paid to the question of establishing a republic, and, to ensure the more effective functioning of democratic principles, the electoral law would be changed and all "repressive legislation" amended or repealed

The Speech also promised improvements in health, education, housing, and other social services, a comprehensive plan for agricultural and industrial development, measures to deal with unemployment, the nationalization of certain essential services, such as transport; and reductions in the price of rice and sugar Legislation for the adoption of Sinhalese as the only official language would be introduced as early as possible. All undemocratic restrictions on trade union rights would be abolished, labour conditions brought into line with modern practice, and measures taken to stamp out corruption and nepotism in the Public Service In conclusion, all religious, racial, and other minorities were assured that they need have no fear of injustice or discrimination in the carrying-out of the Government's policies

The House of Representatives had unanimously elected Mr. H. S. Ismail (Independent) as its new Speaker on April 19. Dr. Perera, as the leader of the largest Opposition party, was elected Leader of the Opposition on April 22.

At its first meeting on April 14, the new Cabinet decided to request the Queen not to confer Imperial honours on Ceylonese citizens in future —(Ceylon Government Information Department, Colombo - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. General Elections, 12315 A; Dissolution of Parliament, 14756 A.)**

A. UNITED STATES. — Foreign Service.

Important appointments in the U.S. Foreign Service since September last are listed below, the date of announcement being shown in parentheses:

Mr. John D. Hickerson, a career diplomat, as Ambassador to Finland *vice* Mr. John K. McFall (Sept. 20, 1955)

Mr. John D Mucclo, a career diplomat, formerly Ambassador in Seoul, as Ambassador to Iceland (Oct. 19, 1956).

Mr. Max Waldo Bishop, a Foreign Service officer, as Ambassador to Siam *vice* Mr. John E. Peurifoy, who had been killed in a road accident—(see 14395 B) (Dec. 3, 1956).

Mr Douglas M. Moffat, partner in a well-known New York law firm, as Ambassador to Australia *vice* Mr. Amos J. Peaslee, who was appointed Deputy Special Assistant to the President on disarmament matters (Feb. 14, 1956). Mr. Moffat was principal U S. representative at the Anglo-U.S. Supply Centre in Egypt during the war.

Mr. Fletcher Warren, Ambassador in Caracas, as Ambassador to Turkey *vice* Mr. Avra M. Warren, retiring (Feb 27, 1956).

Mr. Dempster McIntosh, Ambassador in Montevideo, as Ambassador to Venezuela *vice* Mr. Fletcher Warren (March 9, 1956)

Mr. Jefferson Patterson, a retired Foreign Service officer, as Ambassador to Uruguay *vice* Mr McIntosh (March 9, 1956)

Mr. Sheldon T. Mills, Ambassador in Quito, as Ambassador to Afghanistan *vice* Mr Angus Ward, retiring (March 20, 1956)

Mr. Lowell C. Pinkerton, a Foreign Service officer, as the first U.S. Ambassador to the Sudan (March 29, 1956).

Mr. Livingston Merchant, Assistant Secretary for European Affairs at the State Department, as Ambassador to Canada *vice* Mr Douglas Stuart, retiring (April 11, 1956).

Mr. Albert S. Nufer, formerly Ambassador in Buenos Aires, as Ambassador to the Philippines *vice* Mr. Homer Ferguson (April 21, 1956).

Mr. Homer Ferguson, the Ambassador in Manila, and formerly Republican Senator for Michigan, was appointed by President Eisenhower on Jan. 30 to the Court of Military Appeals, the final appellate tribunal on court-martial convictions.—(New York Times - New York Herald Tribune) **(Prev. rep. Foreign Service, 14395 B.)**

B. INDONESIA - NETHERLANDS. — Unilateral Abrogation of Netherlands-Indonesian Union. - Dutch Protest to Indonesia.

A Bill providing for the abrogation of the Netherlands - Indonesian Union was adopted without a division by the provisional Indonesian House of Representatives on Feb. 28. The House had previously adopted (by 108 votes to 80) a motion giving the Bill priority over an Opposition motion of no-confidence in Mr. Harahap's Government. As a protest against this decision, which he considered contrary to the rules of the House, the Speaker (Mr. Sartono) announced his resignation, and all Opposition members withdrew before the Bill was discussed. President Sukarno announced on March 3 that he had not signed the Bill because he considered that, in view of its importance, it should be submitted to the new elected Parliament.

Following the resignation of Mr. Harahap on March 3, a new Bill incorporating a number of amendments was introduced by Dr. Sastroamidjojo's Government, and was passed without a division on April 21. The Bill revoked all agreements concluded at the Hague Round-Table Conference of 1949; declared that "the relationship between the Republic of Indonesia and the Kingdom of the Netherlands is henceforward an ordinary relationship as between fully sovereign nations, based on international law"; and abolished all special privileges enjoyed by Netherlands citizens in Indonesia, with the exception of concession rights, licences, and permits for the operation of enterprises which were not in conflict with "the interests of the development of the Republic of Indonesia." The Bill was made retroactive as from Feb. 15, 1956.

The Netherlands Government, in a Note on March 3, had informed the Indonesian Government that it could not consent to the unilateral measures taken by Indonesia, and had protested against them.

After declaring that Indonesia's unilateral abrogation of "solemn treaties concluded with the assistance of the U N. Commission for Indonesia" was "at variance with international law," the Note said that Indonesia's action was also unjustified because the Netherlands had "always done everything possible to meet, as far as could reasonably be expected, Indonesia's wishes in regard to changes in the relations between the two countries," and had already agreed to the abolition of the Union in the 1954 protocol [which was not ratified by Indonesia]

The Note added that the Netherlands Government was still willing to co-operate in establishing a basis for future relations satisfactory to both parties, and meanwhile agreed that diplomatic relations between them should continue A letter informing the United Nations of Indonesia's unilateral action, and of the views of the Dutch Government, had been handed by the Netherlands permanent representative at the U N. to Dr. Hammarskjold on Feb 24.

The Indonesian reply to the Dutch Note (published on March 20) stated that the Indonesian Government's decision had been prompted by the desire to place relations between the two countries on a basis which was normal between sovereign and independent States. As Indonesia's repeated attempts since 1951 to settle the problem by means of negotiations, culminating in the recent talks in Geneva, had all failed, the Indonesian Government had resolved to withdraw from the Union, to the abolition of which the Netherlands Government had already agreed in principle Pending the establishment of normal diplomatic relations, Indonesia would regard the Netherlands High Commission in Jakarta as the diplomatic mission of the Kingdom of the Netherlands, whilst the Indonesian High Commission in The Hague would henceforth have the status of a diplomatic mission.

The Netherlands Deputy High Commissioner in Jakarta (Mr. Hagenaar) informed the Indonesian Government on May 4 that the Netherlands Government had decided to change the status of its High Commissioner in Jakarta to that of an Embassy —(Indonesian Embassy Press Office, London - Netherlands News Agency) **(Prev. rep. 14715 A.)**

C. BURMA. — Social Security Scheme.

A social security scheme came into force in Burma on Jan. 1, 1956, providing for medical care at dispensaries, sickness benefit, maternity benefit, and funeral grants. It also covered temporary disability benefits, permanent disability pensions, and survivors' pensions in the case of fatal accidents.

The area covered by the scheme comprises Rangoon, Insein, and four other townships. The scheme applies to all persons employed in industrial establishments with at least ten employees, and to the Burmese railways, publicly-owned industrial and transport undertakings, ports, mines, oilfields, and stevedoring establishments. It does not apply to permanent public servants.

The scheme is administered by a Social Security Board under the chairmanship of the Minister of Labour (U Raschid). There is a standing committee to deal with questions such as interpretation of policy, and an appeal tribunal to hear disputes.

(Burmese Government Information Dept., Rangoon)

A. UNITED NATIONS. — The Disarmament Negotiations. - Deadlock in Meetings of U.N. Disarmament Sub-committee. - Western and Soviet Proposals for Disarmament. - Eisenhower-Bulganin Correspondence on Disarmament Problems.

A summary is given below of the discussions in the United Nations on the question of disarmament, and of the various proposals put forward by the Western Powers and the Soviet Union, during the past two years. During this period—from the spring of 1954 to May, 1956—the U.N. Disarmament Sub-committee held 86 meetings in London and New York without, however, reconciling the differences between the Western and Soviet viewpoints. The article is divided into three sections: (1) the general background to the disarmament discussions; (2) the meetings of the Disarmament Sub-committee, and the various proposals put forward by the Powers concerned; and (3) the exchanges of correspondence between President Eisenhower and Marshal Bulganin on the question of disarmament.

The General Background.

Following the deadlock in the U.N. Disarmament Commission during 1953, the eighth session of the U.N. General Assembly recommended in November of that year that a sub-committee of the Powers principally concerned should be set up to seek a solution to the disarmament question by private discussions (see 13993 A). This sub-committee, consisting of Great Britain, the United States, the Soviet Union, France, and Canada, was established by the Disarmament Commission on April 19, 1954, and met in London in May and June, 1954 (see 13681 C).

On June 11, 1954, France and Britain presented disarmament proposals to the Sub-committee (see below) which were debated at the ninth session of the General Assembly (see 14677 A). Although the Soviet representative declared that his country accepted these proposals as a basis for future negotiations, the debates in the Assembly revealed that further consideration of a number of matters would be required. On Nov. 4, 1954, therefore, the Assembly unanimously adopted a resolution (sponsored by all the five Powers concerned) proposing that the Disarmament Sub-committee should reconvene and make a further effort to reach agreement on comprehensive and co-ordinated proposals to be embodied in a draft international convention on disarmament. It was recommended that this convention should provide for (1) the limitation, regulation, and major reduction of all armed forces and conventional armaments; (2) the total prohibition of the use and manufacture of nuclear and other weapons of mass destruction, together with the conversion of existing stocks to peaceful purposes; (3) the establishment of effective international control through a control organ with the necessary rights, functions, and powers to ensure that the measures under (1) and (2) were carried out by the Powers concerned.

In accordance with the Assembly's resolution, the U.N. Disarmament Sub-committee held private meetings in London between Feb. 25 and May 18, 1955, and subsequently at U.N. Headquarters in New York between Aug 29 and Oct. 7, 1955 The London meetings were adjourned on May 18 to await the outcome of the Geneva "summit" conference between the Heads of Government of the U S.A., the U.S.S.R., Great Britain, and France, whilst the New York meetings were similarly adjourned until the conclusion of the Geneva meeting of Foreign Ministers, which was held between Oct 27 and Nov. 16 and at which no agreement was reached on the problem of disarmament.

At the "summit" meeting the four Heads of Government agreed to work together to develop an acceptable system of disarmament through the U N. Disarmament Sub-committee. Their representatives on that body were asked to continue their work, taking into account the various proposals put forward at the "summit" conference by President Eisenhower, Marshal Bulganin, Sir Anthony Eden, and M. Faure. On Oct. 7 the Sub-committee presented a lengthy report to the U.N. Disarmament Commission, for subsequent transmission to the U.N. General Assembly, recapitulating the various proposals which had so far been made by "the Powers principally concerned."

When the Disarmament Commission met on Oct 21, 1955, to consider this report, the Soviet representative urged that the General Assembly should be given an opportunity to debate the disarmament question at the earliest possible moment The Western representatives, however, took the view that a debate on disarmament would be inappropriate at that particular moment because the four Foreign Ministers were shortly to meet in Geneva to discuss disarmament and other questions. Although the Soviet representative maintained that a debate in the General Assembly would help the Foreign Ministers in tackling the disarmament question, the Western representatives felt that there had been insufficient time to study the voluminous report of the Disarmament Sub-committee, and also felt that any debate on disarmament prior to the Foreign Ministers' conference would not be useful. They therefore opposed the Soviet proposal for immediate discussion of the Sub-committee's report by the General Assembly, and the Commission adjourned on Oct. 26 without a vote having been taken.

The Disarmament Commission met again on Nov. 23-25, 1955, after the Foreign Minister's conference had ended, and decided to transmit to the General Assembly and the Security Council the report of the Sub-committee, together with the verbatim records of the Commission's meetings at which this report had been considered. At the 10th session of the General Assembly (see 14665 A) a resolution —sponsored by the U S.A., Britain, France, and Canada—was adopted asking the Disarmament Sub-committee to continue its efforts for "a comprehensive disarmament agreement" and, in this connexion, to consider the various proposals made by the four Heads of Government at the "summit" conference (see page 14668).

The Disarmament Sub-committee accordingly met again in London from March 19 to May 4, 1956. Although new proposals were put forward by the Western and Soviet sides, no progress was made towards resolving the deadlock and the discussions ended without any agreement.

Western and Soviet Disarmament Proposals.

The principal proposals made by the various Powers in the course of the discussions in London, New York, and Geneva during the past two years are summarized below:

Anglo-French Proposals of June 1954.

These proposals were presented to the U.N. Disarmament Sub-committee in London on June 11, 1954, and were accepted by the Soviet Union in October as a basis for a draft international disarmament treaty. They proposed that disarmament should take place in three stages, as follows:

(1) An international control organ should be set up, after which the strength of armed forces would be fixed at the level obtaining on Dec. 31, 1953, and defence budgets at the 1953 level

(2) The first half of an agreed reduction in conventional armaments should be put into effect, and when this had been completed the manufacture of nuclear weapons should cease

(3) The second half of the agreed reduction in conventional weapons should take place, and when this had been completed all nuclear weapons and weapons of mass destruction should be eliminated and prohibited.

Modification of Anglo-French Proposals.

The Soviet Union subsequently proposed that the complete prohibition of nuclear weapons should be carried out simultaneously with the second half of the agreed reduction in conventional armaments, instead of after this agreed reduction had been completed. In counter-proposals presented on April 19, 1955, Britain and France put forward a compromise plan under which the prohibition of nuclear weapons would be carried out simultaneously with the final quarter of the agreed reductions in conventional weapons · i e. after these weapons had been reduced to 75 per cent of the agreed level—instead of entirely to the agreed level as they had suggested originally. This proposal was put forward on the conditions (1) that the U S.S.R. accepted the reduction in forces proposed by the Western Powers on March 29, 1955 [i e a maximum of 1,000,000 - 1,500,000 men for the U.S A., the Soviet Union, and China, 650,000 men each for Britain and France, and proportionately lower levels for other Powers]; and (2) that the U.S.S.R. agreed to a fully effective international control system which would operate throughout the whole disarmament programme.

Soviet Proposals of May 1955.

Further proposals were put forward by the Soviet Government on May 10, 1955, in which they accepted the Anglo-French plan that the prohibition of nuclear weapons should take effect after conventional weapons had been reduced by 75 per cent of an agreed amount, and also accepted the proposed level of forces of the major Powers. It was suggested that these measures should be put into effect by stages during 1956 and 1957 (see below) The Soviet draft also included detailed proposals on the rights and powers of an international control organ which should supervise the planned reductions in armaments.

Suggested Measures to be taken during 1956.

(1) States which were parties to the proposed convention should undertake not to increase their armed forces and conventional armaments above the levels obtaining on Dec. 31, 1954, nor their appropriations for armed forces and armaments (including atomic weapons) above the level of expenses for the year ended Dec. 31, 1954. These measures should be carried out within two months after the coming into force of the convention. Within one month of the coming into force of the convention, the five Great Powers (the U.S.A , U.S S R , Great Britain, France, and China) should submit to the Disarmament Commission full official figures of their armed forces, conventional armaments, and military expenses.

(2) The five Powers should undertake to reduce their armed forces to the following maxima: the U.S A., the U.S.S.R., and China—1,000,000 to 1,500,000 men each; Great Britain and France—650,000 men each Within one year, they should reduce their armed forces and armaments by 50 per cent of the difference between the levels obtaining on Dec. 31, 1954, and the aforementioned reduced levels.

(3) Not later than the first half of 1956, a World Conference should be convened on the general reduction of armaments and the prohibition of atomic weapons This conference would set maximum levels for the forces of States other than the five Great Powers

(4) As one of the first measures towards disarmament, States possessing atomic and hydrogen weapons should undertake to discontinue tests of these weapons. An international supervisory committee should be set up to report to the General Assembly and the Security Council on the fulfilment of this undertaking.

(5) Simultaneously with the initiation of measures for the reduction of the armaments and armed forces of the five Powers by the first 50 per cent, and before the entry into force of the agreement on the complete prohibition of atomic weapons, all States should assume a solemn obligation not to use such weapons. Exceptions would be permitted for purposes of defence against aggression when a decision to that effect had been taken by the Security Council.

(6) States possessing military, naval, and air bases on the territory of other States should undertake to liquidate such bases.

Suggested Measures to be taken during 1957.

(1) The production of atomic and hydrogen weapons should be discontinued, and budgetary appropriations of States for military purposes reduced accordingly.

(2) The five Powers should reduce their armed forces and armaments by the remaining 50 per cent of the difference between Dec. 31, 1954, and the reduced levels. Appropriations for armed forces and conventional armaments should be correspondingly reduced. The reduction of the armaments and armed forces of other States to the levels established for them at the World Conference would be completed at the same time.

(3) After the reduction of armed forces and conventional armaments had been carried out to the extent of 75 per cent of the total reduction laid down, a complete prohibition on the use of nuclear weapons should enter into force. The elimination of these weapons from the armaments of States, and the reduction of armed forces and conventional armaments by the final 25 per cent of the agreed reduction, should begin simultaneously. Both these processes should be completed in 1957.

Thereafter, all atomic materials should be used solely for peaceful purposes, and States should undertake to promote extensive international co-operation in the peaceful uses of atomic energy in industry, agriculture, medicine, and other fields of economics and science. Special attention should be given to assistance to economically under-developed countries, and such assistance should not be made conditional upon any demands of a political or military nature States should endeavour to devote part of the savings resulting from world-wide disarmament and the elimination of nuclear weapons to the extensive use of atomic energy for peaceful purposes.

(4) Measures for the liquidation of all foreign military, naval, and air bases on the territories of other states should be completed.

(5) The question of the obligations of China under the proposed convention should be examined with the participation of the People's Republic of China.

International Control System.

The Soviet draft also proposed that the General Assembly should set up an international control organ with the following rights and powers :

(1) In order to prevent a surprise attack by one State upon another, the international control organ should establish on the territory of all the States concerned, on a basis of reciprocity, control posts at large ports, railway junctions, main highways, and airports, to ensure that there was no dangeous concentration of military, air or naval forces.

(2) The control organ should have the right to require from States any necessary information on the execution of measures for reducing armaments and armed forces.

(3) It should also have unimpeded access to records relating to the budgetary appropriations of States for military needs, including all decisions of their legislative and executive organs on the subject. States should periodically furnish the control organ with information on the execution of the measures provided for in the convention.

(4) The control organ (whose staff would be recruited internationally) should make recommendations to the Security Council " on measures of prevention and suppression with regard to violators of the convention."

At the Geneva " summit " conference, Marshal Bulganin put forward proposals similar to those described above, together with two new suggestions : (1) that the levels of armed forces of States other than the five Great Powers should not exceed maxima of 150,000 to 200,000 men ; (2) that the five Powers, pending the conclusion of the disarmament convention, should solemnly declare that they would not be the first to use atomic or hydrogen weapons against any country.

American Proposals.

During the " summit " conference President Eisenhower presented proposals calling for an exchange of blueprints of military information between the U S A. and the U S.S.R., to be verified by mutual aerial reconnaissance. This proposal was intended as a beginning towards a comprehensive and effective system of disarmament by providing against the possibility of surprise attack, thereby lessening danger and relaxing international tension.

On Aug. 30, 1955, the U.S A. submitted to the Disarmament Sub-committee an outline plan for implementing the proposals made by President Eisenhower at Geneva This plan—divided into " terms of reference," a " concept," and an " outline of procedure " —was, in effect, an attempt to combine the main features of President Eisenhower's and Marshal Bulganin's proposals—i.e. the President's " open skies " plan and the Soviet proposals for stationing international observers at key points.

(1) As regards " terms of reference," the U.S. plan defined " blueprints of military establishments " as covering the identification, strength, command structure, and disposition of personnel, units, and equipment of all major land, sea, and air forces, including reserve and para-military forces ; together with a complete list of military plants, factories, and installations. After pointing out that both the Western and Soviet sides had recognized the necessity for stationing observers at key points, so as to give prior warning of any evidence of impending attack or mobilization, it proposed that the U.S.A. and the U.S.S.R. should permit mutual and unrestricted aerial reconnaissance by visual, photographic, and electronic means.

(2) Under the heading of " concept " it was proposed that the U S.A. and the U.S.S R. should exchange data relating to military forces and installations which, coupled with the measures for verification and surveillance, were essential to safeguard against the possibility of surprise attack. This exchange would be accomplished by progressive steps as mutually agreed between the two Governments.

(3) " Initial procedure " would consist of the exchange and verification of " blueprints of military establishments, the facilities and services to be provided, and checks and controls."

At a meeting of the U N. Sub-committee on Oct. 7, 1955, Mr. Harold Stassen (Special Adviser to President Eisenhower on disarmament problems) recalled the President's statement at Geneva that " no sound and reliable agreement can be made until it is completely covered by an inspection and reporting system adequate to support every portion of the agreement." He pointed out in this connexion that stockpiles of nuclear materials had been accumulating in several countries during recent years, which could constitute a major threat if they were secretly converted into weapons ; that not all accumulated nuclear materials could be detected by existing scientific means ; and that, in the opinion of the U.S. Government, aerial inspection remained the key to arms limitation.

After announcing that President Eisenhower had directed " an intensive re-study of U.S. policy on the question of disarmament," Mr. Stassen added " On the basis of our preliminary inquiries, it soon became apparent to the President and the Government that the situation required a new, fundamental, and extensive expert study of the methods of international inspection and control by the most competent authorities in American life. Accordingly, we have selected outstanding men to head task forces in the appropriate fields of inquiry."

Mr Stassen then announced that eight leading personalities in American scientific, industrial, and military life had been appointed to make " a broad reappraisal of disarmament policy," each being charged with one particular aspect of the problem. They were :

Dr. Ernest Lawrence (the eminent nuclear physicist, and Director of the Radiation Laboratories of the University of California), who would head a " nuclear task force " which would endeavour to " seek a scientific break-through to a means thus far unknown of detecting concealed nuclear weapons " ;

General James H. Doolittle (now vice-president of the Shell Oil Company), who would study aerial inspection and reporting methods ;

Lieut -General Walter Bedell Smith (now vice-chairman of the American Machine and Foundry Company), who could study army and ground unit inspection and reporting ;

Vice-Admiral Oswald S. Colclough (retd.), Dean of Faculties at George Washington University, who would study naval problems, including guided missiles which could be launched from warships ;

Mr. Benjamin Fairless, president of the U.S. Steel Corporation, who would study matters relating to the steel industry ,

Mr Walter L. Cisler, president of the Detroit Edison Company, who would study power and industry in general ,

Dr. Harold G. Moulton, an economist, who would study national budgets and finances ;

Dr. James B. Fish, of the Bell Telephone laboratories, who would study questions relating to the communications necessary for an international inspection and reporting system.

British Proposals.

Sir Anthony Eden proposed at the " summit " conference that, as a means of increasing mutual confidence in Europe, consideration should be given to the establishment of a system of joint inspection of the forces now confronting each other in Europe In specified areas of agreed extent on either side of the line dividing Eastern and Western Europe, joint inspecting teams would operate by mutual consent. This project would not only provide opportunity for the practical test on a limited scale of international inspection of forces in being, but would also provide valuable experience and lessons for use over a wider field in the future.

The U.K. representative on the Disarmament Sub-committee (Mr. Anthony Nutting) submitted on Sept. 13, 1955, a memorandum on the methods, objects, and rights of inspection and supervision of a control organ. It proposed that all States adhering to a disarmament convention should submit to the control organ the information it required on the following subjects :

(1) Levels of armed forces ;

(2) Conventional land, sea, and air armaments, including certain categories of civilian aircraft and shipping ;

(3) Military installations, including barracks, ordnance depots, dockyards and airfields ;

(4) Factories manufacturing armaments (including aircraft), explosives, and propellants ;

(5) Nuclear installations and reactors ;

(6) Plants making chemical and biological weapons ;

(7) Budgetary documents used by States in preparing annual estimates of military expenditure.

The control organ would also have powers to establish regional offices to analyze information provided by States ; set up observation posts at specific points, e.g. railway junctions, ports, highways, and airfields ; and have the right to (*a*) send inspection teams to check on the information provided under (1) to (4) above, (*b*) travel freely to, from, and within all States adhering to the convention.

During the first stage of disarmament, the control organ would have the right to make use of : (1) aerial reconnaissance ; (2) ground inspection , and (3) budgetary control, based on analysis of documents disclosed in accordance with (7) above. It would also have the right to station inspection teams at points where armed forces were being demobilized and conventional armaments destroyed ; to establish inspection posts at certain installations and plants , to inspect all other installations or plants at all times it considered necessary ; and to investigate alleged or suspected breaches of the convention in any establishment or installation, and to use any technical equipment and devices required for this task.

During the second stage of disarmament, the control organ would, in addition, have the right to establish resident inspection posts at, or to inspect, nuclear installations and reactors and plants making chemical and biological weapons. It would likewise have the right to use any technical equipment and devices required for this task.

French Proposals.

At the opening meeting of the four heads of Government in Geneva on July 18, 1955, M. Edgar Faure (then Prime Minister of France) proposed that States should agree to a reduction in their military expenditure, and that the financial resources thus made available should be allocated in whole or part to international expenditure for development and mutual assistance.

The French representative on the U.N Sub-committee submitted on Aug. 29, 1955, a draft agreement on the financial supervision of disarmament and the allocation for peaceful purposes of the resulting funds, in conformity with M. Faure's suggestion. It proposed to institute a financial supervision of military expenditure, together with a system of penalties for the purpose of encouraging disarmament, and provided for the allocation of the resulting funds for the improvement of living standards and the development of under-developed areas. *Inter alia*, it suggested that States should agree to reduce their military expenditure by a percentage that would increase from year to year, and that the sums thereby released should be transferred to an International Fund for Development and Mutual Assistance.

On Sept. 2, 1955, the French representative (M. Jules Moch) submitted a working paper concerning the structure of an International Disarmament Organization. This body would include the financial control organ suggested in the draft agreement submitted on Aug. 29, and would consist of a "General Assembly" of all States ; a "Permanent Committee" consisting of 15 States—the five permanent members of the Security Council and 10 non-permanent members to be appointed by the General Assembly ; a "Council of Jurists", consisting of seven persons of different nationalities, to be elected by the General Assembly on the basis of their qualifications ; and a "Control Administration," under the orders of a Director-General, consisting of a governing body and of fixed and mobile inspection units.

On Oct. 6, 1955, another French working paper was submitted concerning the powers and objects of the proposed "Control Administration." It was suggested that, not later than six months after the entry into force of the Disarmament Convention, the Control Administration should establish in the territory of all States a network of control posts at ports, railway junctions, motor highways, airfields, and military camps. Full information on the level of armed forces and conventional armaments of all States adhering to the Convention would be supplied to the Control Administration, which would have free access to documents relating to appropriations for military requirements.

At a later stage, the Control Administration might at all times and in all places exercise control, carry out investigations, and obtain such documents, information, and reports as it considered necessary to ensure : (1) that the disarmament programme was actually being carried out in each State so far as concerned armed forces, conventional armaments, equipment, and installations used, or capable of being used, for the storage, maintenance or manufacture of armaments and equipment ; (2) that, so far as weapons of mass destruction were concerned, the relevant provisions of the Convention were applied to the same extent and simultaneously in all States ; and (3) that, as regards nuclear energy, the relevant installations, establishments, equipment, and materials were abolished or used in accordance with the terms of the convention. Moreover, the Control Administration would carry out on-the-spot investigations and aerial reconnaissance in order to verify the information obtained, and ensure continuous control over nuclear installations, establishments and stockpiles.

Proposed Synthesis of Western and Soviet Proposals.

At a meeting of the Disarmament Commission on Nov. 23, 1955, M. Moch suggested that the disarmament and control plans already put forward by France, Britain, and the U.S.A. on the one hand, and by the U.S S.R on the other, should be combined. He declared that every effort should be made to achieve a synthesis which, through reciprocal concessions, would bring together the partisans of both concepts, and expressed the opinion that such a synthesis was necessary if the United Nations were not to betray the hopes placed in it

The U.N., M. Moch declared, should be guided by the following three principles : (1) no control without disarmament ; (2) no disarmament without control ; but (3) progressively, all disarmament that could be currently controlled. Because of the impossibility of controlling atomic stockpiles already accumulated, M. Moch proposed that the countries concerned should agree to prohibit their use for any warlike purpose. While nuclear test explosions for military purposes should also be prohibited, tests designed to develop the peaceful uses of atomic energy should be permitted under dual international control, scientific and political.

Although M. Moch's appeal for a "synthesis" between the Western and Soviet viewpoints won general support from the other Western representatives, notably from Mr. Nutting (U.K.) and Mr Paul Martin (Canada), it was criticized by M. Sobolev (U.S S.R.), who alleged that the Western Powers were reluctant to disarm—an allegation strongly repudiated by Mr. Cabot Lodge (U.S.A). M. Sobolev called for a pledge by the great Powers not to be the first to use atomic or thermo-nuclear weapons, and said that such a move, coupled with a "moral condemnation" of nuclear warfare by the General Assembly, was regarded by the Soviet Government as of paramount importance.

New Anglo-French, American, and Soviet Proposals.

The U N. Disarmament Sub-committee held another series of meetings at Lancaster House, London, from March 19 to May 4, 1956. After 18 sessions, however, the discussions were suspended without any agreement being reached, and it was decided to report back to the U N. Disarmament Commission in New York. Three sets of proposals were submitted at this latest series of meetings—respectively by the British and French delegations, by the U.S.A., and by the Soviet Union—and are summarized below.

Anglo-French Proposals. The new Anglo-French plan, tabled by M. Moch with the support of Mr. Nutting, had been agreed upon in the discussions between Sir Anthony Eden and M. Mollet on March 11-12, during the French Prime Minister's visit to Britain (see 14752 A). It proposed that disarmament should be carried out in the following three stages :

(1) The first stage envisaged partial disarmament during the existing international situation, to be achieved by the following successive steps . (*a*) a declaration renouncing the use of nuclear weapons except for defence against aggression ; (*b*) the setting-up of a control organ ; (*c*) the putting into force of President Eisenhower's "open skies" plan and of Marshal Bulganin's plan for ground control at key points , (*d*) the "freezing" of conventional armaments at their present levels ; (*e*) initial reductions in the armaments and armed forces of the "Big Five" to levels to be negotiated ; (*f*) the fixing of maximum levels for the forces of other Powers, for which purpose an international conference would be called ; (*g*) the setting-up of a special branch of the control organ to supervise the limitation of nuclear test explosions, both in number and power.

(2) The second stage would be carried out at a later date, when, through a brighter international outlook, the present "grey" world situation had become "white." It would comprise three successive steps : (*a*) the limitation of nuclear test explosions ; (*b*) further reductions of conventional arms and forces to bring total reductions to 50 per cent of agreed figures , (*c*) expansion of the control organ preparatory to the prohibition of nuclear test explosions and the cessation of the manufacture of nuclear weapons.

(3) The third and final stage, aimed at the complete prohibition of nuclear weapons, would involve the following successive steps : (*a*) prohibition of test explosions ; (*b*) cessation of the manufacture of nuclear weapons ; (*c*) the second 50 per cent reduction in conventional forces and armaments ; (*d*) prohibition of the use of nuclear weapons when 75 per cent of reductions in conventional forces had been completed. At the end of Stage 3, an international scientific conference would be held to see whether there had been sufficient progress to make practicable the destruction of all stocks of nuclear weapons under international supervision. [There was no reference at any point in the plan to existing stocks of atomic and thermo-nuclear weapons, as it was considered impossible to devise any means of controlling whether these had or had not been destroyed.]

To carry out this plan, M. Moch proposed the establishment of an executive committee to be created by a new body—the International Disarmament Commission—which would come into being when a disarmament treaty had been signed. This commission would consist of the five Great Powers and nine other Powers who would be members of the U.N., chosen on a regional basis.

American Proposals. Mr. Stassen presented a working paper in which it was proposed (*a*) that the five Powers represented in the U.N Sub-committee should take a number of preliminary steps towards disarmament, and (*b*) that, on the completion of this first stage, an Armaments Regulation Organization should be set up to work for all-round disarmament, both of conventional and nuclear weapons The principal American proposals were as follows :

(1) The U.S.A., Great Britain, France, the Soviet Union, and Canada should exchange technical missions to study "problems of control and inspection of conventional armaments"

(2) They should also carry out "a small demonstration test of control and inspection in a limited non-sensitive area of the U.S.A. and the U.S S.R. of 20,000 to 30,000 square miles, including at least one port, one airfield, and one railway terminal."

(3) Meanwhile, they would set up without delay a Preparatory Armaments Regulation Commission, whose decisions would be taken by unanimous vote. This body would decide upon the reduced level of conventional forces and armaments to be carried out during the first stage of disarmament, a level of 2,500,000 men for the U.S.A and the U.S.S.R. and of 750,000 men for Britain and France being suggested. [Mr. Stassen pointed out that this would involve a reduction of 400,000 in the strength of the U.S armed forces, at present 2,900,000.]

(4) A control and inspection plan should be put into operation, combining President Eisenhower's "open skies" proposals and Marshal Bulganin's ground-control proposals.

(5) After agreement had been reached upon reduced levels of conventional armaments, and upon a system of control, three steps would be taken "interdependently and concurrently" : (*a*) each

State would furnish the Preparatory Commission with a blueprint of its military establishments; (b) each would take steps to stabilize its armed forces and military appropriations; (c) the inspection and control system would be "completed expeditiously."

(6) When the five countries concerned had carried out the above-mentioned steps, the U.N. Disarmament Commission would invite "other States having a significant military potential" to join an Armaments Regulation Organization. Each State would agree on a reduced level for its forces "considerably below the levels fixed for the four major Powers" and in any case not exceeding 500,000 men, except that "the armed forces of China shall not exceed 2,500,000." It was proposed that the Armaments Regulation Commission should have a Council including all signatories, an Executive Committee of permanent and non-permanent elected members, and a Director-General.

(7) The signatories would report to the Director-General on their possession and production of fissionable material, their possession of nuclear weapons, and the planning of tests for such weapons. The control system would be expanded to account for future production of fissionable materials and to monitor future tests of nuclear weapons. When the Director-General had reported that the control system was prepared to verify reductions and provide against surprise attack, when the Executive Committee had accepted this report, and when States regarded by the Executive Committee as essential to the working of a sound system had adhered to the treaty, the first-phase reductions would be carried out on a parallel time schedule. Military appropriations would be reduced accordingly, and the funds thus made available would be used to improve the well-being of the less developed countries.

(8) When the Director-General had reported that the control system was prepared to account for future production of fissionable materials, all signatory States would agree "that future production of fissionable material will not be used for the manufacture of explosive weapons." They would also "begin to make agreed reciprocal and equitable transfers from past production of fissionable materials" for exclusively peaceful purposes, "thereby progressively reducing the amount of fissionable materials available for nuclear weapons purposes." Testing of nuclear weapons would also be "limited and monitored in an agreed manner under the control of the Armaments Regulation Commission."

Soviet Proposals. The following proposals were submitted by M. Gromyko on behalf of the Soviet Government

(1) Limitation and reduction of armed forces and conventional armaments should be carried out by stages in the years 1956-58. Within one month of agreement on the plan, the Powers concerned would submit complete official figures of their armed forces and military appropriations, and would agree not to increase such forces and expenditure above the levels obtaining on Dec. 31, 1955.

(2) An International Control Agency, with wide powers, should be set up to supervise the limitation of conventional armaments, the size of armed forces, and the extent of military budgets.

(3) The Control Agency should have a permanent staff of inspectors selected on an international basis, who would have free access at any time to all objects of control. These objects of control would include military units, stores, etc., naval and air bases, and plants producing conventional armaments and munitions.

(4) The Agency should recommend to the Security Council measures for preventing violations of the agreement on arms reduction.

(5) When confidence had been achieved between States, consideration should be given to the "possibility of using aerial photography as one of the control methods"

(6) Control posts should be set up at major ports, rail junctions, motor-roads, and airfields in the States concerned.

(7) A "zone of inspection and limitation of armaments" should be established in Europe, including both parts of Germany and countries bordering upon Germany.

(8) There should be an agreed maximum level for the number of U.S., British, French, and Soviet troops stationed in this zone.

(9) No atomic military formations, nor any types of atomic or thermo-nuclear weapons, should be permitted in the zone

(10) Independently of the disarmament agreement, the States concerned should undertake to discontinue nuclear and thermo-nuclear tests immediately.

(11) The States should also agree, independently of the agreement, to reduce their national military budgets by 15 per cent.

(12) The U.S.A., the U.S.S.R., and China should reduce their armed forces to between 1,000,000 and 1,500,000 men, and Britain and France to 650,000 men The forces of other States should not exceed 150,000 to 200,000 men, as determined at an international conference.

(13) The system of supervision should be applied not only to "domestic" armies but also to armed forces and installations maintained by States outside their own territories

(14) Savings accruing from the reductions in military expenditure should be devoted to a special U.N. Fund for aiding under-developed countries.

[The Soviet plan laid primary emphasis on conventional weapons, and made no detailed suggestions for the control and prohibition of nuclear weapons. A Moscow broadcast declared that the U.S.S.R. still aimed at the complete prohibition of such weapons, but was prepared to drop this point for the time being "in order to meet Western objections." On the question of control, the Soviet proposals gave first place to Marshal Bulganin's ground-control plan, but said that the U.S. "open skies" plan could be considered at a later stage Certain features of earlier British and French proposals were also incorporated in the Soviet plan—notably the suggestions for a "zone of inspection and limitation" in Germany and adjacent countries, and for the creation of a U.N. Fund for aid to under-developed countries through savings in military expenditure, as put forward by Sir Anthony Eden and M. Faure respectively at the "summit" conference.]

After the latest series of meetings had ended without any agreement having been reached on the various proposals, statements were issued on May 4 by the delegates of the four Western Powers represented on the U.N. Sub-committee, and by the Soviet representative (M. Gromyko), setting forth their respective attitudes to the disarmament question.

Statement by Western Powers. The four-Power statement was worded as follows:

"In order to promote peace, security, and prosperity through disarmament, the delegations of Canada, France, the U.K., and the U.S.A. reaffirm their determination to seek agreement on a developing programme of disarmament in accordance with their mandate from the United Nations This programme should begin without delay, and should include measures under effective international control to end the present competition in armed forces and armaments of all kinds.

"(1) The programme should proceed by stages Progress from one stage to another must depend upon the satisfactory execution of the preceding stage and upon the development of confidence through the settlement of major political problems.

"(2) The programme should begin, under effective international control, with significant reductions in armed forces to such levels as are feasible in present unsettled world conditions. There should be corresponding reductions in conventional armaments and in military expenditures. Further reductions would be carried out as world conditions improved.

"(3) The programme should provide that, at an appropriate stage and under proper safeguards, the build-up of stockpiles of nuclear weapons would be stopped, and all future production of nuclear material devoted to peaceful uses.

"(4) The programme should provide for a strong control organization with inspection rights, including aerial reconnaissance, operating from the outset and developing in parallel with the disarmament measures The control measures should also provide against major surprise attack. This is particularly important so long as it is impossible to account for past production of nuclear material.

"(5) Preliminary demonstrations of inspection methods on a limited scale would help to develop an effective control system and could bring nearer agreement on a disarmament programme.

"(6) Provision should be made for the suspension of the programme in whole or part if a major State failed to carry out its obligations, or if a threat to peace should occur.

"The proposals introduced in the Disarmament Sub-committee by the delegations of France, the U.K., and the U.S.A. are inspired by these principles The Soviet delegation did not accept these proposals. . . .

"The four delegations . . . express their conviction that a reconciliation of the opposing points of view is possible and necessary They reaffirm their determination to continue their efforts within the U.N., and particularly in the Disarmament Commission and its Sub-committee, to seek agreement on disarmament in accordance with the desire of the peoples of all nations."

Soviet Statement. M. Gromyko claimed that much of the new Soviet plan was based on previous Western proposals, and expressed surprise that the Western Powers had now declared those proposals to be unacceptable. "It is suggested," he added, "that we should continue to go round the same vicious circle in which we have been running for ten years Actually, the position now is that there will either be an agreement on part of the problem, with a view to facilitating later agreement on the disarmament problem as a whole, or there will be no agreement and the U.N. and its Disarmament Sub-committee will be marking time."

After reproaching the Western Powers for having rejected the levels of armed forces previously put forward by themselves, and accepted by the Soviet Union, M. Gromyko said that one of the main obstacles to agreement was that the Western Powers had put forward "new conditions," including aerial inspection, "which have nothing to do with the real control of disarmament, but have other aims." He alleged that after the Soviet Union had put forward a proposal for wide powers for the international control organ, the Western Powers had "started going backwards, making practically new kinds of conditions not even mentioned previously."

M. Gromyko insisted that the U.S.S.R. "stands for the unconditional abolition of the atomic weapon," and said that the latest Western proposal had made agreement on this question "more complicated." He added: "The Western Powers do not even talk now about the abolition of atomic weapons, and limit themselves only to expressions or vague suggestions that some time in the future this question should be discussed by scientific experts Their proposals on atomic weapons, as well as their proposals on conventional weapons, are so hedged around by various kinds of preliminary conditions that any possibility of making progress in this respect is excluded."

In conclusion, M. Gromyko said that the attitude of the Western Powers had made it necessary to seek a new approach to a solution of the disarmament problem. This new approach should be aimed, in the first instance, at reaching agreement on the question of conventional weapons, "which will make it easier to reach agreement on the question of abolishing atomic weapons." The Soviet Government was ready to discuss conventional and atomic weapons simultaneously, "so long as an agreement on conventional weapons is not made dependent on an agreement on the abolition of atomic weapons."

Despite the lack of agreement, Mr. Stassen said on May 5 that the latest discussions had narrowed the gap between the Western and Soviet viewpoints "from nine miles to five." He believed that this gap would be closed eventually, and thought that the next important move might be a reply by Marshal Bulganin to President Eisenhower's letter of March 1, 1956 (see below).

Correspondence between President Eisenhower and Marshal Bulganin.

Apart from the discussions in the U.N. Disarmament Commission and its sub-committee, several letters were exchanged between President Eisenhower and Marshal Bulganin on the question of disarmament, the text of this correspondence being reproduced below:

Marshal Bulganin to President Eisenhower.

The Soviet Prime Minister sent a long letter to the U S President on Sept. 19, 1955, worded as follows:

"In the course of our memorable meetings in Geneva we agreed to work jointly for an acceptable system of disarmament.... However, the work of the [U.N.] sub-committee has so far not produced those results for which you and I were fully entitled to hope.... As is known, the U.S representative has completely put aside the questions of reducing armed forces and armaments and prohibiting atomic weapons, and appears to have given emphasis to your proposals for the exchange of military information between the U S.S R. and the U.S A., and for mutual aerial photography. . .

"In this connexion, allow me to touch upon the proposals put forward by you at Geneva We regard them as a testimony of your sincere desire to find a way to settle the important problem of international control and inspection, and to contribute personally to efforts for the normalization of international relations Upon our return from Geneva we gave careful study to your proposals, which were introduced by Mr Stassen into the Disarmament Sub-committee on Aug. 31. In the course of this study several questions have arisen about which I would like to express my thoughts

"First of all, about the mutual exchange by the U S A. and the Soviet Union of information concerning their armed forces and armaments In principle, we have no objections to the proposal. I think that at a definite stage the exchange of such information is necessary. It would be better, however, if information concerning armaments were submitted by all States, and not only by the U S.A. and the U.S S.R., to the international organ of control and inspection, on the creation of which we should reach an agreement....

"It is self-evident that the submission of the above-mentioned information to an international control organ would become significant only if agreement is achieved on the reduction of armaments, and on measures for the prohibition of atomic weapons It seems to me that the problem of creating an international control organ which would satisfy the requirements of the problems of disarmament should be considered in indissoluble unity with decisions for putting into effect a plan for gradual disarmament. At the same time it is necessary to keep sight of the fact that the achievement of a really valuable exchange of military information will become effective to the degree that mutual trust among States is strengthened.

"Now I would also like to express my opinion about the problem of aerial photography. I do not doubt that when you introduced your proposal for photographing from the air the territories of our two countries, you were guided by a legitimate desire to create confidence that neither of our two countries would be subjected to attack by the other.

"However, let us be frank. Under present international conditions neither of our countries is acting singly. The United States heads military groupings which exist in the West and in the East What is more, their armed forces are stationed not only on American territory; they are also stationed in Britain, Western Germany, Italy, France, Spain, North Africa, Greece, Turkey, in several countries of the Near and Middle East, in Japan, Taiwan [Formosa], and the Philippines. To this should be added the fact that the armed forces of several States are organically connected with the military forces of the U.S A. under a single command [i e. the NATO]. In these conditions, the Soviet Union, on its side, has united militarily with several allied States [i.e. the Warsaw Treaty].

"It is impossible not to see that the proposal introduced by you completely omits from consideration armed forces and military installations which are outside the U S A. and the Soviet Union. Yet it is perfectly self-evident that aerial photography should also be extended to all armed forces and military installations located on the territories of those other States. This presents an entirely new problem: Would the Governments of such States permit their territory to be photographed by foreign aircraft?

"All this shows that the problem of aerial photography is not a question which, under present conditions, would lead to effective progress towards ensuring the security of States and the successful accomplishment of disarmament. This conclusion is suggested by the fact that your proposal, unfortunately, does not mention the necessity for reducing armaments and prohibiting atomic weapons

"It is therefore natural that people should ask more and more often what the proposal for aerial photography and the collecting of such information will really do to end the arms race. If such a proposal does not promote the ending of the arms race, then it means that it does not remove the threat of a new war. It does not lighten the burden which the peoples are bearing in connexion with the arms race....

"My remarks do not mean that we cannot achieve agreement on important aspects of the disarmament problem I would like to call your attention to the fact that on very substantial aspects of this problem our positions have become so close that we should be able to reach a definite agreement.

"Let us take such a question as the establishment of levels of armed forces for the great Powers It is generally recognized that this is a question of great importance. Originally, the idea of establishing levels to which the armed forces of the 'Big Five' should be reduced was put forward by your Government, together with the Governments of Great Britain and France, in 1952. In the interest of achieving general agreement on this matter, we decided to adopt this joint proposal of the U.S.A., Britain, and France as a basis for discussion. Consequently we have a common point of view on this question. . .

"On the question of atomic weapons, we must remember that at the present time, when the greatest armies of the world have at their disposal such means of mass destruction as atomic and hydrogen weapons, it is impossible to talk about disarmament without touching on this important subject Therefore, we have always attached paramount importance to the prohibition of atomic weapons

"In the discussion of this problem, one of the substantial subjects of disagreement was the question of when the prohibition against the use of atomic weapons would come into force In our desire to bring the positions closer, and thereby to expedite agreement on this subject, we agreed to accept the dates for putting into force the prohibition on the use of atomic weapons which were proposed by the representatives of Britain and France in the U.N Sub-committee in London in April, 1955. I think you will agree that this Anglo-French proposal, accepted by the Soviet Union, satisfies our common interests. It would be desirable—and I think completely feasible—to reach an agreement on this question

"It also seems expedient for us to reach agreement on putting into effect several measures designed to prevent sudden attack by one State against another. We feel that this measure would be in accordance with the interests of maintaining peace and security, and in this respect it should also be possible to reach agreement on the form of control suitable to the above-mentioned problem.

"You, Mr. President, as a military man, know from your own experience that modern war requires armies of many millions and an enormous quantity of technical combat equipment.... The system of control proposed by us—namely, the creation of control posts at large airports, railway junctions, highways, and airfields—is designed to prevent large-scale concentrations of troops and combat equipment, and thereby to remove the possibility of sudden attack by one country against another.... In my opinion our proposal has the advantage that it provides a definite guarantee against a sudden attack by one State against another

"I think you will agree that our proposals concerning levels of armed forces, the dates for the entry into force of the prohibition on nuclear weapons, and the establishment of control posts, can promote the reduction of tension in international relations and contribute to the strengthening of peace. I do not see, therefore, any reason why we should not reach agreement on these questions. Such joint decisions by the four Powers would have tremendous importance because they would give millions of people the assurance that disarmament is fully realizable and that real steps are being taken in this direction. An agreement on these questions would open the way toward the solution of other questions concerning the problem of disarmament. It would encourage the strengthening of that atmosphere of co-operation and mutual understanding which we initiated at Geneva....

"In presenting these ideas to you, Mr. President, I am inspired by the sincere desire to achieve, through a frank exchange of opinions on the problem of disarmament, better mutual understanding which may facilitate agreed decisions on this most important problem.

"As the solution of these questions depends mainly on the four great Powers that participated in the Geneva Conference, I have taken the liberty of sending copies of this letter to Sir Anthony Eden and M. Faure, and hope that you will not misunderstand this action. I hope soon to receive your ideas on the questions touched upon in this letter"

President Eisenhower to Marshal Bulganin.

As President Eisenhower's sudden illness (see 14512 D) made it impossible for him to reply at length to Marshal Bulganin, the following interim reply was sent on Oct. 11, while the President was convalescing at Denver:

"I thank you for your letter of Sept 19 about my Geneva proposal that we should exchange information about military establishments and permit reciprocal aerial inspection over our two countries. You raise a good many questions, and I shall not be able to reply to them until the doctors let me do more than at present. In any event, a full reply calls for preliminary work by my advisers, and this is actively under way.

"Let me say, however, that I am encouraged that you are giving such full consideration to my Geneva proposal. I hope that we can agree on it, not as a cure-all, but, as I said at Geneva, to show a spirit of non-aggressiveness on both sides and so create a fresh atmosphere which would dispel much of the present fear and suspicion. This, of itself, would be worthwhile. It would, I believe, make it more possible to make progress in terms of comprehensible plans for inspection, control, and reduction and armaments....

"I have not forgotten your proposal for stationing inspection teams at key points in our countries, and if you feel this would help to create the better spirit I refer to, we could accept that too."

Marshal Bulganin to President Eisenhower.

The Soviet Prime Minister sent the following reply on Oct. 20 :

" . . . I shall wait for the moment when you will be able to state your ideas on this subject. It gladdens me that you attach such great significance to these questions. There can be no doubt that all that the Governments of our countries can do to stop the armaments race and establish the necessary controls will answer the interests and expectations of nations.

" With satisfaction I note your favourable reception of our proposal concerning control posts aimed at forestalling surprise attacks by one country against another. I consider that agreement on this question would have great significance for furthering the solution of the problem of disarmament.

" We in Moscow await your speedy recovery to health."

President Eisenhower to Marshal Bulganin.

Following his recovery from his illness, and the resumption of his official duties, President Eisenhower sent the following letter to Marshal Bulganin on March 1, 1956, in reply to the Soviet Prime Minister's communication of Sept. 19, 1955 :

" In accordance with my message of Oct. 11, I have now thoroughly reviewed your letter of Sept. 19 regarding the objective of an acceptable system of disarmament which we discussed at Geneva. I have noted with satisfaction that you have expressed agreement with the importance of providing mutual safeguards against surprise attack, and with the desirability of reciprocal reductions in armaments. You have credited me with a sincere desire to find a way to settle the important problem of international control and inspection.

" It would appear, however, that you raise the following questions with regard to my Geneva proposal. You ask whether the adoption of my offer would lead to the reduction of armaments, and express doubt. You suggest the need of extending inspection to other countries. You raise other points regarding nuclear weapons.

" I am confident that the adoption of my Geneva proposal, combined with ground inspection teams which you proposed, will in fact lead to a reduction of armaments, the lessening of tension, and the brightening of the prospects of a durable peace Certainly the U.S.A. is fully resolved to achieve those ends. My representative on the U N. Disarmament Sub-committee will be prepared to help develop a programme to carry out that resolve, through appropriate action by our Governments.

" In my judgment our efforts must be directed especially to bringing under control the nuclear threat As an important step for this purpose, and assuming the satisfactory operation of our air-and-ground inspection system, the U.S A. would be prepared to work out, with other nations, suitable and safeguarded arrangements so that future production of fissionable materials anywhere in the world would no longer be used to increase the stockpile of explosive weapons.

" With this could be combined my proposal of Dec. 8, 1953, ' to begin now and continue to make joint contributions ' from existing stockpiles of normal uranium and fissionable materials to an International Atomic Agency [i e. the President's " atoms-for-peace " proposal made to, and subsequently approved by, the U.N. General Assembly]. These measures, if carried out adequately, would reverse the present trend towards a constant increase in nuclear weapons overhanging the world. My ultimate hope is that all production of fissionable materials anywhere in the world will be devoted exclusively to peaceful purposes.

" I am mindful of the difficulties in this regard, pointed out in your Government's proposals of May 10, 1955, arising from the possibilities for evading international control and organizing the clandestine manufacture of atomic and hydrogen weapons. The risks inherent in failing to achieve control, however, make it imperative to overcome the difficulties involved and to devise and implement an effective system of safeguards. With genuine efforts on both sides, I feel confident we can succeed in this endeavour.

" In general, my feeling is that disarmament should be sought primarily, though not exclusively, in terms of limitations on armaments rather than on men. The former are more subject to supervision, regulation, and control than the latter. In the present state of international affairs, and especially in the absence of real peace in the Far East, I foresee that it may be difficult to agree on reductions in the general level of armed forces at this time. It should, however, be possible to agree on measures . . . dealing with the control and limitation, under proper safeguards, of major types of armaments. . . .

" If the U.S.A., the U.S.S.R., and our associates on the Sub-committee—the United Kingdom, France, and Canada—can reach a basic agreement, I am confident that other nations would want to join in what they would regard as a favourable development for world peace. With the agreement of other nations concerned, the U.S.A. would expect the agreed system of supervision to apply . . . to forces and facilities which we both have outside our borders.

" During the early phases of such a programme both the U S.S.R. and the U.S.A. would have very extensive military strength, including stocks of nuclear weapons. I wish to make it clear that, so far as the U.S.A. is concerned, we would continue to hold such strength, not for aggression, nor for narrow national purposes, but as a contribution toward world stability in this transitional period. . . . May I assure you and the people of your country that the objective of the United States continues to be the attainment of a just and durable peace. I hope that the coming meeting of the Disarmament Sub-committee will succeed in making real progress toward that goal."

In conclusion, President Eisenhower acknowledged the receipt of Marshal Bulganin's letter of Feb. 1 (see 14800 A), which was sent in reply to the President's letter of Jan. 28 (see 14665 A). After stating that his views remained " generally as expressed in that letter" [i.e. the letter of Jan. 28] President Eisenhower said that he would " continue to study the problem with a view to seeing whether . . . any useful new steps can be taken between us." He added that he might communicate again with Marshal Bulganin on this matter.—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris - Soviet Weekly - United Nations Review, New York) **(Prev. rep. U.N. Disarmament Sub-committee, 13681 C; General Assembly Resolutions, 14667 A; 13993 A; Eisenhower-Bulganin Correspondence, 14800 A; 14665 A.)**

A. NORTHERN IRELAND. — Validation of Elections. - Sir Norman Stronge re-elected Speaker of N.I. House of Commons.

A Bill indemnifying five members of the Northern Ireland Parliament, all of whom had been found to be disqualified from membership because they had technically held offices of profit under the Crown, was enacted by the Imperial Parliament on March 22 after an unopposed passage through both Houses.

The five members whose elections were validated comprised one member of the N.I. Senate (Lieut -Colonel H. S. C. Richardson) and four members of the N.I. House of Commons—Sir Norman Stronge, Sir William McCleery, Dr. Eileen Hickey, and Dr. R. S. Nixon. A Select Committee of the N.I. Parliament had reported on Feb. 28 that Dr. Nixon (Unionist M.P. for North Down), as well as the other four members (see 14698 C, 14661 B), was disqualified because at the time of his election he was a factory doctor appointed by the Minister of Labour. It was pointed out, however, that he had not received any fees in this capacity, and that he had resigned the position five days after his election.

In addition, the Select Committee reported that a second member of the Senate, Mr. Henry Fleming, was also disqualified because he was a member of a rent tribunal at the time of his election , it added that Senator Fleming had acted in good faith and without knowledge of the legal complexities involved. Senator Fleming (who was 84, and had been in ill-health for some time) died on Feb. 29, the day after the Select Committee issued its report.

The legislation validating the elections of Senator Richardson, Sir William McCleery, Sir Norman Stronge, Dr. Hickey, and Dr. Nixon —the Validation of Elections (Northern Ireland) Bill—was introduced in the Imperial Parliament at the request of the N I. Parliament. In addition to indemnifying the above-mentioned members, it also indemnified the estate of the late Senator Fleming from any penal consequences which he might have incurred by sitting and voting in the N.I. Senate while technically holding an office of profit under the Crown.

Following the validation of his election, Sir Norman Stronge was re-elected Speaker of the N.I. Commons on April 26 in succession to Mr. McCoy, who had held that office for three months.—(Times - Belfast Telegraph - Northern Whig, Belfast) **(Prev. rep. 14698 C; 14661 B.)**

B. INDIA - NORWAY. — Extension of Norwegian Aid for Indian Fisheries Development.

An agreement was signed on April 21 between the Governments of India and Norway, and also by the United Nations, providing for additional Norwegian aid under the Fisheries Community Development Project in Travancore-Cochin covered by the earlier agreement of Oct. 17, 1952. Under the new agreement the Norwegian Foundation will contribute up to Rs. 10,000,000 (15,000,000 kroners, or £750,000) for the extension of a hospital at Quilon, and for developing a new fishing centre in Cochin and improving the water-supply in areas adjoining the project.—(Indian High Commissioner's Office, London) **(Prev. rep. 12832 C; 12558 B.)**

C. HUNGARY. — Border Obstacles removed from Austrian Frontier.

It was announced in Vienna on May 10, and confirmed in a Budapest broadcast, that the Hungarian Government had notified Austria of its intention to remove all the minefields and barbed-wire obstacles which at present extended along the whole length of the Austro-Hungarian frontier. The Vienna announcement said that this decision had been conveyed to the Austrian Minister in Budapest by M. Hegedüs, the Hungarian Prime Minister, and recalled that the removal of these obstacles had been suggested by Austria on a number of occasions. *Szabad Nep* and other Hungarian newspapers said that the removal of frontier obstacles would be a step towards ending the " cold war," and stressed the need for improving relations between the two countries. (Wiener Zeitung)

A. UNITED KINGDOM. — Mid-Ulster By-election.

Polling took place in Mid-Ulster on May 8, for the third time within 12 months, in a by-election caused by the disqualification of Mr. Charles Beattie (Ulster Unionist) on the ground that he was ineligible for membership of the House of Commons because he had technically held "offices of profit" under the Crown.

The complicated situation in the Mid-Ulster constituency had developed as follows: (1) Mr. Thomas J. Mitchell, who is serving a ten-year sentence for taking part in the I.R.A. raid on Omagh barracks in 1954, was returned at the general election as a Sinn Fein candidate with a majority of 260 over Mr. Beattie; (2) as Mr. Mitchell was ineligible for election to the House of Commons because he was serving a sentence for treason-felony, a writ was issued for a by-election in Mid-Ulster (held on Aug. 11, 1955), at which Mr. Mitchell was re-elected with a majority of 806 over Mr. Beattie; (3) on a petition from Mr Beattie, the High Court of Northern Ireland ruled on Sept. 2, 1955, that Mr. Mitchell's election was invalid and that the constituency should be represented by Mr. Beattie. This ruling was upheld by the House of Commons and Mr. Beattie accordingly took his seat at Westminster.

On Dec. 19, 1955, however, a Select Committee of the House of Commons reported that Mr. Beattie's membership of the House was invalid because he had been holding three appointments under the National Insurance and National Assistance Acts at the time he entered Parliament. Though Mr. Beattie had in fact drawn no remuneration from these appointments, they nevertheless technically constituted "offices of profit" under the Crown and therefore disqualified him from membership. The committee recommended that legislation should be brought in to indemnify Mr. Beattie against any consequences that might arise from his technical disqualification, but at the same time it recommended that no legislation should be introduced to validate his election.

The report said in this connexion: "While the committee are convinced that Mr. Beattie accepted his offices in complete good faith, they consider, nevertheless, that Mr. Beattie and his advisers should have more carefully examined Mr. Beattie's own appointments. The committee accordingly find that, although Mr. Beattie should be indemnified from the consequences of his services as a Member, the circumstances clearly distinguish Mr. Beattie's case from the cases they have previously considered [see 14381 A]. They therefore recommend that legislation to validate Mr. Beattie's election should not be brought in."

The report was accepted by the Government, the Attorney-General declaring on Feb. 6 that it was out of the question to leave Mr Beattie, who had acted in complete good faith, "at the mercy of the common informer and liable to heavy penalties." A one-clause Bill indemnifying Mr. Beattie against any penal consequences which he might have incurred was accordingly introduced on Feb. 8, and passed through all its stages on Feb. 13. Mr. Chuter Ede (Lab.) pointed out in the debate on Feb. 6 that Mr. Beattie had voted in 19 divisions and was possibly liable to penalities amounting to £9,500.

As a result of the disqualification of Mr. Beattie, a writ for a new by-election in Mid-Ulster was issued on April 19. Three candidates were nominated—Mr. George Forrest, standing as an unofficial Unionist; Mr. Thomas Mitchell, who was re-nominated by Sinn Fein; and Mr. Michael O'Neill, who stood as an Anti-Partitionist, and who had represented the constituency as an Irish Republican from 1951 to 1955.

The Ulster Unionist party in Mid-Ulster had previously decided not to nominate a candidate, as the strength of loyalist opinion in the constituency had been sufficiently demonstrated at the general election and also at the by-election held in August 1955.

The decision to put forward an Anti-Partitionist candidate had been taken at a meeting at Omagh on Jan. 14, when the following statement was issued: "As a united anti-partition vote in the previous two elections in Mid-Ulster has been represented as support for the Sinn Fein's policy of defiance of the Irish Government. . . . it has been decided to put forward an Anti-Partition candidate on the simple issue of recognition by the people of the authority of the Irish Government to rule the country."

[The Anti-Partitionist statement constituted an obvious reference to the denunciation of the I.R.A. and other extremist organizations by Mr. Costello, Prime Minister of the Irish Republic—see 14598 A. It was commented in the Press that, apart from Mr. O'Neill's intervention in the by-election, the chances of Sinn Fein might also be affected by the Irish Hierarchy's condemnation of membership of armed organizations—see 14645 A.]

The by-election resulted as follows:

Forrest, George (Unofficial Unionist)	28,605
Mitchell, Thomas (Sinn Fein) ..	24,124
*O'Neill, Michael (Anti-Partitionist) .	6,421
Unofficial Unionist majority . ..	4,481

* Forfeited deposit

Figures at the general election were: T. J. Mitchell (S F.) 29,737, C. Beattie (U.U.) 29,477—Sinn Fein majority, 260. At the by-election in August last the figures were. T. J. Mitchell (S F.) 30,392, C. Beattie (U.U.) 29,586—Sinn Fein majority, 806. Out of the total electorate of about 66,000, 88.4 per cent voted in the second by-election.

Mr. Forrest (33), of Stewartstown, Co Tyrone, is an auctioneer by profession. Though standing as an unofficial Unionist, he was officially supported by the Newtown Stewart branch of the Tyrone Unionist Association. His candidature was also supported by the Orange Order.

Party representation in the House of Commons (excluding the Speaker) is as follows after the Mid-Ulster by-election—Conservatives and supporters (including 11 Ulster Unionists and one unofficial Unionist), 344; Labour, 278; Liberals, 6. There is one vacancy, caused by the resignation through ill-health of Mr. Gerald Williams (Conservative, Tonbridge). (Times - Daily Telegraph - Belfast Telegraph) **(Prev. rep. Mid-Ulster, 14520 B; 14357 C; By-elections, 14730 B.)**

B. SPAIN - MOROCCO. — Spanish Recognition of Moroccan Independence. - Agreement on Integration of Spanish Zone. - Nationalist Demand for Integration of Tangier International Zone.

During a State visit to Spain paid by the Sultan of Morocco from April 4-9 at the invitation of the Spanish Government, a joint declaration recognizing the independence, sovereignty, and territorial unity of Morocco was signed in Madrid on April 7 by Señor Artajo, the Spanish Foreign Minister, and Si Bekkai, the Moroccan Premier. The declaration referred to the "age-old friendship" between the two countries, its wording being largely identical with that of the Franco-Moroccan agreement of March 2 (see 14781 A). It stated (*a*) that relations between Spain and Morocco could no longer be governed by the Convention of Madrid of Nov. 27, 1912; (*b*) that new agreements would be drawn up defining "the free co-operation of the two nations in those spheres in which they have common interests"; and (*c*) that these agreements would also guarantee "the liberties and rights of Spaniards established in Morocco, and of Moroccans established in Spain, in the personal, economic, cultural, and social spheres, on a basis of reciprocity and of respect for their respective sovereignties." The Spanish Government undertook to lend the Sultan "the aid and assistance which by common agreement are considered necessary, especially with regard to foreign affairs and defence." A letter from the Sultan to General Franco, published with the agreement, proposed that discussions on the transfer of powers in the former Spanish zone should begin on May 7.

A protocol dealing with the position during the transitional period contained similar provisions to the Franco-Moroccan protocol of March 2, e.g. the Spanish representative at Rabat would be informed of draft decrees affecting Spanish interests; the guarantees enjoyed by Spanish officials would remain in force; the Spanish Government would assist in the formation of the Moroccan Army; the status of the Spanish Army in Morocco would remain unchanged during the transitional period; and the Spanish Government would protect the interests of Moroccans born in the Spanish zone and living abroad until the Sultan took over this responsibility. Other clauses provided that the position of the peseta would remain unchanged until a new agreement on the subject had been concluded, and that visas and all administrative formalities hitherto required for travellers between the two zones of Morocco would be abolished.

The agreement made no reference to the ports of Ceuta and Melilla, which have been integral parts of Spain since 1581 and 1496 respectively.

The Sultan flew on April 9 to Tetuan, the former capital of the Spanish zone, where he was acclaimed by some 200,000 people. He returned to Rabat on the following day, after cutting a green and red ribbon (the Moroccan national colours) at the frontier post of Quedadra as a symbol of the reunification of Morocco.

In the Legislative Assembly of the International Zone of Tangier, the Moroccan members submitted on April 28 a resolution demanding the immediate opening of negotiations between the Moroccan Government and the other Governments concerned, with a view to defining Tangier's new status as "part of an independent, united, and sovereign Morocco." The Assembly rejected the resolution, whereupon the Moroccan, Jewish, and Spanish members withdrew as a protest. The *Mendoub* (the Sultan's representative, who presides over the Assembly) announced that he would refer the question to the Sultan.—(A.B.C., Madrid - Le Monde, Paris - Le Figaro, Paris) **(Prev. rep. Morocco, 14781 A.)**

C. INDONESIA - IRAQ. — Treaty of Friendship.

A treaty of friendship between Indonesia and Iraq was signed in Jakarta on April 30 by the Indonesian Minister for Foreign Affairs, Mr. Abdulgani, and the Iraqi Ambassador. (Indonesian Embassy Press Office, London)

A. FRANCE. — Unseating of Poujadist Deputies. - Poujadist Boycott of National Assembly. - U.D.C.A. Congress. - M. Poujade's Demand for Convening of States-General.

The National Assembly's commission charged with validating the election of members recommended on Jan. 19 that 12 Poujadist (U.D.C.A.) deputies should be unseated because of infringements of the electoral law in the constituencies for which they had been returned.

Specifically, it was found that in each of these constituencies the U.D C.A. had presented two, and in some cases three, lists—representing respectively shopkeepers, peasants, or consumers—all bearing the words "presented by Pierre Poujade." This, it was pointed out, contravened Article 6 of the electoral law of 1951, which laid down that "different lists presented in the same constituency cannot carry the same title, nor can they be attached to the same party or to the same organization" [i e. although the law permitted electoral alliances between different parties, it forbade the "alliance" of lists presented by the same organization.] Thus, though the lists themselves were valid, the "alliance" of these lists was not, and the adding-up of the votes cast for them to arrive at the total Poujadist vote was therefore illegal. In consequence, the Poujadist deputies elected on these lists were disqualified from membership of the Assembly.

The 12 Poujadists whose invalidation was recommended—constituencies in parentheses—were M Guichard (Ardèche), Dr Courrier (Aube), M. Baryelon (Bouches-du-Rhône), M. Lainé (Cher), M. Calmel (Haute-Garonne), M. Cottet (Indre-et-Loire), M. Cochet (Loiret), M. Baylac (Lot-et-Garonne), M. Vaugelade (Puy-de-Dôme), M. Vignal (Rhin), M. Duchoud (Haute-Savoie), and M. Lamalle (Yonne). The National Assembly's commission recommended that these 12 seats should be filled by the respective runners-up in the elections for the constituencies concerned—viz., M. Palmero (Socialist), M. Terré (Independent), M. Juvénal (Socialist), M. Genton (Radical), M. Alfred Coste-Floret (M.R P.), M. Souquès (Radical), M. Perroy (Independent), M. Tremoulhe (Radical), M Sauzedde (Socialist), M. Degoutte (Radical), M. Briffod (Socialist), and M Chamant (Independent) That is, the 12 Poujadists would be replaced by four Socialists, four Radicals, three Independents (*modérés*), and one M.R.P. member, thereby reducing the U.D.C.A.'s representation in the National Assembly from 52 to 40.

Between Feb. 7 and April 25 seven of the above-mentioned Poujadist deputies were unseated by the National Assembly and their seats given to members of other parties. The U.D.C.A. parliamentary group, before withdrawing from the Assembly on April 20 (see below), strongly opposed the unseating of these deputies and resorted to filibuster tactics in an effort to hold up the Assembly's debates and delay the voting. Violent scenes occurred in the Assembly on Feb. 14-15, when Poujadist and Communist deputies came to blows, and the sittings had to be suspended on several occasions.

On Feb. 14, during the debate on the unseating of one of the Poujadist members (M Calmel), another Poujadist—M Damasio—refused to leave the rostrum when asked to do so, thereby forcing the President of the Assembly (M. Le Troquer) to suspend the sitting On the following day a pitched battle broke out on the floor of the Assembly after M. Damasio had tried to push a Communist speaker off the rostrum. Blows were exchanged, chairs and stools brandished as missiles, and attempts made to throw the heavy voting-urn into the mêlée At the height of the disturbances a man in the public gallery fired four blank shots from a starting-pistol and was handcuffed after violent resistance. Order was eventually restored by ushers—who had to prevent the enraged deputies from smashing chairs on each other's heads—after M. Le Troquer had suspended the sitting.

After further "filibusters" on Feb 22, the Assembly rejected (by 188 votes to 181) a proposal to shelve the whole question of invalidation until a committee of inquiry had reported into the circumstances of the election of the 12 Poujadist deputies. The proposal was put forward by M. Tixier-Vignancour (an extreme Right-wing deputy and a former prominent "Vichyite"), who, though not himself a member of the U.D.C.A., had given strong support to the Poujadists throughout the debates On April 19 further violent scenes occurred when one of the unseated Poujadists refused to leave the Chamber, he had eventually to be escorted out by two officers of the *Garde Républicaine*.

On April 20, after a meeting attended by M. Poujade, the U.D.C.A. parliamentary group decided to boycott the proceedings of the National Assembly until further notice. A statement was issued accusing the "parties of the majority" of "systematic sabotage of the parliamentary regime" and "contempt of the democratic rights of the Opposition." M. Poujade was asked to take "any necessary decisions" until the forthcoming U.D.C.A. congress at Saint-Céré (see below), and was also asked to submit to that congress "resolutions resulting from the situation created by the Government and the parties of the majority."

The congress of the U.D.C.A. was held at Saint-Céré (M. Poujade's home town in the Lot department) from April 30 to May 4. The proceedings were held *in camera* except for the opening speech by M. Poujade, and no official statement was issued as to any decisions taken.

In the course of his speech M. Poujade reiterated his demand for the convening of a "States-General," declaring that "as the Government refuses to call the States-General, we will call it ourselves." [A Poujadist resolution for the convening of such a body had previously been introduced in the National Assembly, but had been pronounced unconstitutional.] He asserted that the States-General, and not the "Palais Bourbon" (i.e. the National Assembly), would represent "true legality," and said that it would involve the co-ordination of all the "parallel unions" which had been, or were being, set up within the movement—i e unions representing workers, peasants, the liberal professions, youth, etc, a number of which had come into existence since the emergence of Poujadism as a political force

M. Poujade emphasized that there was no question of the U D.C.A. trying to seize power "for Poujade or for any social category," and declared that the movement "wished to re-establish the line of democracy, the true expression of the popular will." Criticizing certain persons who had been expelled from the U D.C.A. for adopting "excessive positions," M. Poujade declared · "We are a social and economic movement and not a league, and I would oppose our transformation into one. There can be no question of returning to what was said and done 20 years ago. [A reference to the extremist Right-wing associations formed in France before the war] We want to rally all social classes round us. You will not do this by saying · 'Form column of fours behind me' . . "

As regards the "odious" invalidation of Poujadist deputies, M Poujade said that it was for the congress to decide whether the U D.C A. should continue to boycott the Assembly or take part in its proceedings.

It was understood that one of the principal subjects discussed at the Saint-Céré congress was the relationship between the U.D.C.A. and the "parallel unions" to which M. Poujade had referred. M. Poujade admitted in his speech that the leadership, organization, and development of these unions had proved unsatisfactory in many cases, and stressed the need to rebuild them on a local basis.—(Le Monde, Paris - Le Figaro, Paris)

(Prev. rep. U.D.C.A., 14681 A; M. Poujade, 14708 B.)

B. NETHERLANDS. — Constitutional Reform. - Increase in Membership of States-General.

A Bill amending the Netherlands Constitution by increasing the membership of the Lower Chamber of the States-General from 100 to 150, and that of the Upper Chamber from 50 to 75, was introduced by the Government on July 15, 1955. The Bill was approved by the Lower Chamber on Nov. 30, 1955, and by the Upper Chamber on April 25, 1956. Similar legislation had been introduced in 1951, but certain amendments then made by the Lower Chamber had led to the rejection of the Bill by the Upper Chamber, where it failed to get the necessary two-thirds majority (see 12430 A). The Bill in the new form omitted the amendments to which the Upper Chamber had previously objected.

The new Bill will, however, only come into force after it has been given a second reading by a new Parliament. For this purpose it was officially announced in The Hague on May 5 that general elections for the Lower Chamber of the States-General would be held on June 13, and elections for the Upper Chamber on June 14, the elections for the latter being indirect through the Provincial States (assemblies). It was also announced that the present States-General would be dissolved on July 2 and that the new Parliament would meet on July 3, its first task being to give the constitutional amendment Bill a second reading. During those proceedings the Lower Chamber would still have only 100 members, and only after the new Parliament had approved the increase in membership would the additional 50 members take their seats on the basis of the results of the elections.—(Netherlands News Agency)

C. UNITED KINGDOM. — Recognition of Sovereignty of Morocco and Tunisia.

Formal British recognition of the independence and sovereignty of Morocco and Tunisia was announced by the Foreign Office on May 10, as a result of the Franco-Moroccan agreements of March 2, the Spanish-Moroccan agreements of April 7, and the Franco-Tunisian agreements of March 20. The Foreign Office stated that British embassies would be opened in Rabat and Tunis in due course; that H.M. Government was willing to reconsider existing treaties with Morocco in the light of modern conditions; and that it was also prepared to discuss the future of the Tangier international zone with the other interested parties.—(Times) **(Prev. rep. Morocco, 14857 B; 14781 A; Tunisia, 14812 A.)**

D. UNITED STATES. — Increase in Bank Rate.

The Chicago Federal Reserve Bank raised its discount rate on April 19 from 2½ to 2¾ per cent, following the similar action taken by the other Reserve Banks earlier in the month.

(New York Herald Tribune) **(Prev. rep. 14799 B.)**

A. KENYA. — Continued Decline in Mau Mau Activities. - Further Withdrawal of Troops. - U.K. Financial Aid, 1956-57. - Limited Franchise for Africans.

Mau Mau activities in Kenya continued to decline during the first four months of 1956, terrorist acts of violence being limited to about five a month. The number of terrorists killed and captured by, or surrendering to, the security forces fell to some 200 a month, reflecting the greater difficulty in making contact with the diminished number of terrorists. A major operation by the security forces took place during the first three weeks of the year, when a gang of some 70 terrorists was surrounded in a swamp on the shores of Lake Naivasha, in the Rift Valley; 22 terrorists were killed, captured, or gave themselves up during the operation, including "Field Marshal" Mbaria Kaniu, one of the more important Mau Mau leaders, who surrendered on Jan. 7. Among other self-styled "generals" captured during the first four months of the year was "General Tanganyika," the most senior Mau Mau leader after Dedan Kimathi and Stanley Mathenge.

"General Tanganyika" had surrendered to the security forces in March 1954 (see page 13507, second column), and a month later had returned to the forests to negotiate with the terrorists in connexion with the Government's mass surrender offer (see 13565 A). It was reported at that time that he and other terrorists who had taken part in the surrender negotiations had been arrested by their own people on suspicion of having led them into a trap On May 8 "General Tanganyika" (whose real name is Harioki Kamotho) appeared before a magistrate's court in Nairobi charged with the murder of Mr. A. G. Leakey, who had been abducted from his home in October, 1954, and whose body was found a month later (see 13901 A).

Other recent developments in Kenya relating to the emergency are described below.

Withdrawal of British Troops. The War Office announced on March 30 that two British battalions, together with ancillary units —a total of about 2,200 fighting troops—would be withdrawn from Kenya between April and June, leaving only one British battalion in the forces engaged against the Mau Mau Lieut.-General Lathbury (C.-in-C, East Africa) stated on the same day that the battalions leaving Kenya would be the 1st Battn. Gloucestershire Regiment, which would be going to the Middle East (Aden was subsequently announced as their destination), and the 1st Battn. Rifle Brigade, which would leave for Malaya

It was announced from G.H Q., East Africa, on March 9 that Major-General Hinde would relinquish his appointment as Deputy Director of Operations (East Africa) at the end of March prior to his retirement.

The Governor of Kenya (Sir Evelyn Baring), on his arrival in London on May 7 for his annual talks with the Colonial Secretary, stated that "the worst of the Mau Mau is over" and that the remaining operations would be of a "mopping-up" character.

Clearance of Meru Area. In a message to the District Commissioner of Meru on Feb. 19, at the end of 26 days' special operations in the forests south-west of Mount Kenya, Lieut.-General Lathbury said that as a result of these and other operations the terrorists' strength in Meru had been reduced to an extent where it no longer presented a military problem The King's African Rifles were therefore being withdrawn, and he was confident that the administration and police, with the co-operation of the people, would be able to eliminate the few remaining terrorists in the area

Revised Procedure for Issue of Detention Orders. It was announced on Feb. 1 that the Kenya War Council, in view of the improvement in the emergency situation, had reviewed the need for the continued delegation to provincial commissioners of the Governor's powers to issue detention orders, which had been in force since March 1954. The War Council decided (*a*) that detention orders in respect of persons "picked up" by the security forces would in future be made by the Governor or Deputy Governor in consultation with a committee consisting of the Attorney-General, the Minister for Internal Security and Defence, and the Director of Intelligence and Security, (*b*) that in exceptional cases, where it proved impossible to record and complete a full dossier for consideration by the Governor and his committee within 28 days, provincial commissioners would be allowed to issue delegated detention orders, valid for a further period of one month only, if the need to do so was justified.

Inquiry into Origins of Mau Mau. The Chief Secretary, Mr. R. G. Turnbull, agreed on March 1 to institute an inquiry into the origins, methods, and growth of Mau Mau Accepting a motion to this effect introduced by Group-Captain L. R. Briggs, Mr. Turnbull said that there would be an examination by "a suitably qualified person" appointed by the Governor.

Further U.K. Financial Grant. The Colonial Secretary, Mr. Lennox-Boyd, announced in the House of Commons on Feb. 14 that the British Government proposed to provide a further grant of £4,000,000 and an interest-free loan of £2,000,000 to Kenya in 1956-57 Although the scale of military operations had been substantially reduced, there would still be need for some expenditure particularly designed to hasten the end of the emergency, whilst the proportion devoted to rehabilitation and reconstruction would be greater than in past years. Mr. Lennox-Boyd added that expenditure arising out of the emergency in 1956-57 was likely to be about £10,500,000, towards which Kenya would provide some £4,500,000 from her own resources

On Feb. 24 the Kenya Legislative Council gave a second reading to a Bill providing for the election of African unofficial members. Its principal provisions were that there should be direct voting by secret ballot; that a qualitative franchise should be introduced, based on education, experience, public service, achievement, and standing in the community; and that electors exceptionally qualified by education, character, or service should have additional votes. The Bill was based on a report by Mr. W. F. Coutts (now Minister of Education, Labour, and Lands), which had been published on Jan. 10 together with a White Paper giving the Government's views on the proposals. The White Paper had pointed out that the Electoral Rolls might not be prepared in time for the general election in September 1956; that the Government intended however, that the election of African members should take place before March 1957; and that meanwhile the present African members would continue to sit in the Legislative Council.

The principal provisions of the Bill—which was given a final reading on Feb. 29—are summarized below.

Qualifications for Franchise. To qualify for the vote a person must be at least 21 years of age and must also qualify in at least one of seven specified categories; qualification in additional categories would earn *pro rata* additional votes up to a maximum of three. The seven categories were: (i) the completion of an intermediate school course or a prescribed equivalent, (ii) proved income from all sources of £120, or property worth £500; (iii) long service in the police or prison service, or in any form of Government or local government employment, or in the employment of the East African High Commission, or in commercial, industrial or agricultural employment; (iv) the grade of Elder or the age of 45 years; (v) a degree or diploma of an approved institution of university or university college standing, or an approved professional qualification; (vi) past or present membership of the Kenya Legislative Council or the Central Legislative Assembly of the East Africa High Commission, or three years continuous membership of a Local Government Authority or an African Advisory Council or an African Court, (vii) the award of a civil or military decoration A separate schedule of qualifications would apply to women voters

Qualifications for Candidates. Candidates should be at least 25 years old; be registered voters, with the same educational qualifications as voters, have an income of £240 from all sources in the year preceding nomination, or half that amount if there was another acceptable qualification, or possess property valued at £700, and be able to write and speak English fluently. A candidate would be disqualified if he failed at the time of his nomination to take an oath of allegiance to the Queen (The Coutts report had proposed that the oath of allegiance should also be compulsory for electors, but the Government had rejected this suggestion on the ground that the oath could not be administered with suitable solemnity to the large number of Africans qualifying for registration as voters)

Special Conditions for Kikuyu, Embu, and Meru Tribes. As far as these three tribes were concerned, the Government considered that the Coutts proposals required "substantial modification." The report had proposed that no person who had ever taken the Mau Mau oath should be given the vote; that qualified voters should have only one vote and be allowed to vote only for candidates in the Central Province; and that only women who had shown "exceptional powers in active fighting against Mau Mau," and who were recommended for inclusion in the register, should be given the vote.

In the Bill as finally adopted it was provided that any Kikuyu, Embu, or Meru who had passed an approved loyalty test should be allowed to qualify on the same basis as Africans of other tribes; the loyalty test would include proof of having given active support to the Crown during the emergency. To eliminate the possibility of corruption or personal feuds, the loyalty test would be applied by a District Commissioner, aided by assessors, instead of by the Native authorities, and there would be no appeal. No Kikuyu, Embu, or Meru could vote for any candidate other than candidates for the Central Province or Nairobi.

No Kikuyu, Embu, or Meru would be allowed to stand as a candidate unless he had passed the loyalty test, and none would be permitted to stand for election in any constituency outside the Central Province or Nairobi

The Kikuyu, Embu, and Meru registers would be provisional only and subject to amendment at any time, and the whole question of these tribes would be reviewed in relation to the 1960 and subsequent elections.

The Attorney-General (Mr. Griffith-Jones) announced on Feb. 24 that the Kenya Federation of Labour, a central organization embracing practically all the African trade unions in the colony, had been called upon by the Government to show cause why its registration as a society should not be cancelled. He said that the registrar of societies had issued the notice on the ground "that the federation is pursuing objects other than those constitutional objects as set out in its rules and as declared in its application to register." It was officially announced on April 4, however, that, in view of assurances received from the federation, it was not intended to cancel its registration as long as these assurances were maintained.—(Times - Daily Telegraph - Manchester Guardian)

A. UNITED KINGDOM.—Electricity Supply Industry. - Report of Herbert Committee.

The report was published on Jan. 31, 1956, of a committee set up by the Minister of Fuel and Power in 1954, with Sir Edwin Herbert as chairman, to inquire into the structure and organization of the electricity supply industry. This was the first independent review of an entire nationalized industry to be carried out by a Government-appointed committee. The report is summarized below under cross-headings.

General. The committee considered that whilst it would be "quite wrong" to describe the industry as "inefficient" or badly organized, its present formal structure was "not conducive to the highest degree of efficiency" and should be improved In particular, it found that the industry had not "solved the problem of the right degree of delegation," had "a long way to go in introducing modern aids to good management," and had not "done as much hard thinking as it should about the economics of electricity supply" The committee also felt that the existing mixture of supervisory and executive functions within the Central Electricity Authority made it difficult for the Authority to exercise "effective and impartial supervision over the industry as a whole"

Relations between the C.E.A. and Area Boards. Most Area Boards felt that the C.E.A interfered too much in their affairs, although under the Electricity Act they were quasi-autonomous statutory bodies. Similarly, some divisional controllers felt that they were not given enough power and responsibility in the design and operation of power stations, and that there was unnecessary duplication of work at headquarters and in the divisions.

The committee pointed out in this connexion that the Central Authority, besides generating the electricity supplied by the Area Boards to their customers and fixing its price to the Area Boards, also approved the Area Boards' tariffs and capital budgets In the last resort, therefore, the Authority—which, in practice, generally meant the chairman and the two deputy chairmen—'controls the cost and price of electricity at every level of the industry, including delivery to the actual consumer" Apart from the time spent by the chairmen and staffs of Area Boards in attending headquarters' conferences, this meant that immense work and responsibility rested on the chairman and deputy chairmen of the Authority, and that its full-time members and staff were so heavily burdened with day-to-day tasks that they had insufficient time to consider wider questions of policy and development

Proposed "Generation Board." The committee did not think that any economies could be secured by combining responsibility for generation and distribution under a single authority. It considered that the basic pattern of the industry should remain as at present—i e. a series of area distribution boards buying their power from a central generating board. It held, however, that the Authority itself should be relieved both of executive responsibility for generation and of its present "vague general responsibility for the industry as a whole," and therefore recommended the creation of a new statutory corporation to be known as the "Generation Board" This Board would be responsible for generation and transmission, and would consist of a full-time chairman, completely free of special duties, and four to six other members, who should mostly be full-time

The Generation Board would be responsible for (*a*) system load control, general planning of power supply development, siting of generating stations, and the design (and possibly the construction) of advanced-design stations, including nuclear power stations, (*b*) the planning of the super-grid and main transmissions; (*c*) fuel supply; (*d*) financial policy; (*e*) research and development; (*f*) staff policy. The committee stressed that it "attached the utmost importance" to the delegation of as much power and responsibility as possible to the divisional controllers, and did not expect the Generation Board to retain at headquarters "anything like the number of staff at present employed on generation at C.E.A. headquarters."

The salaries of the chairman, full-time members, and part-time members of the Generation Board should be at least £8,500, £7,000, and £2,500 respectively

Suggested Reorganization of the C.E.A. The Central Authority should be reorganized to consist of a chairman, two other full-time members, and four part-time members Its functions should be (*a*) to approve general plans of both the Generation Board and the Area Boards, including capital and revenue budgets, depreciation and reserve fund policies, tariffs, and research programmes; (*b*) to authorize Stock issues by the Boards, (*c*) to consider consumers' complaints; (*d*) to supervise labour relations machinery The report stressed that the Central Authority, when relieved of executive responsibilities, could exercise "a much firmer and closer supervision of capital expenditure than at present"

The salaries of the chairman, full-time members, and part-time members of the Central Authority should be £10,000, £8,500, and £2,500 respectively.

The Area Boards. Full-time chairmen of Area Boards should receive £6,000 per annum (instead of £4,000 as at present), part-time chairmen £3,000, and board members (all part-time) £1,000 (£500 at present). Chief executives should be paid not less than full-time chairmen, and the functions of chairmen and chief executives should in all cases be separate (the report pointed out that at present many Area Board chairmen acted also as general managers) The committee suggested that the Minister of Fuel and Power should consider appointing all Area Board chairmen on a part-time basis only.

Other Recommendations. These included

(1) Greater attention to research and development, and a thorough investigation of the possibility of improving the load factor

(2) Better organization of the nuclear power branch, including the creation of a new post of deputy chief engineer, solely for nuclear station development.

(3) A more vigorous approach to problems of costs, scale of capital expenditure, utilization of capital and manpower, etc. The committee pointed out that at present the industry was "barely meeting proper charges on income" and had "contributed nothing to the contingency reserve which common prudence would require to be built up" No raising of prices to increase income should be considered, however, until the possibility of reducing costs had been thoroughly examined On the other hand, the committee stressed that as a result of the "substantial technical advances" made by the industry in recent years, the present price of electricity averaged only 30 per cent above 1939, although coal costs had risen by 270 per cent and the cost of living by 137 per cent

(4) A "more realistic policy" with regard to redundancy The committee considered that the Authority's "passive attitude" to problems of under-employment had made managements at all levels disinclined to seek out redundancy, and that "the most generous treatment of redundant staffs would be preferable to under-employment or old-fashioned methods"

(5) A review with the trade unions of the working of the industry's negotiating and advisory machinery.

(6) A new system of financing, under which Area Boards would be responsible for making their own Stock issues

The other members of the committee, apart from Sir Edwin Herbert, were Mr. F. C. Bagnall, managing director of British Nylon Spinners Ltd.; Mr. J. W. G. Church, former chairman of Associated Electrical Industries (India) Ltd.; Professor Ronald Edwards, Professor of Economics, University of London; Mr. A. Healey, a former director of the Dunlop Rubber Company; Mr. Lawrence Robson, a chartered accountant; and Mr. Jack Tanner, former president of the Amalgamated Engineering Union. (Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Electricity Act, 8457 A.)**

B. EGYPT. — Withdrawal of British Forces from Canal Zone. - Formation of New British Companies for Maintenance of Suez Base.

The last British combatant troops in the Suez Canal Zone—a battalion of the Grenadier Guards and a squadron of the Life Guards—sailed for the United Kingdom on March 31, 1956, thereby bringing to an end the 74-year period during which British troops had been stationed in Egypt. The last R.A.F. base in the Canal Zone, Abu Sueir, was evacuated on April 14. Under the Anglo-Egyptian agreement of October, 1954 (see 13833 A) the withdrawal of all British troops from the Canal Zone is to be completed by June 18, 1956, after which date some 800 British technicians will remain to service the base workshops, supply depots, etc.

It had been announced in February 1955 that five new British companies had been formed to handle activities at the Suez base after the final evacuation of the British forces. They were .

Suez Contractors (Engineers), formed by Vickers-Armstrong to look after the base workshops, which handle tanks and armaments.

Suez Contractors (Vehicles), formed by Associated Commercial Vehicles (Sales) Ltd., the Austin Motor Company, and Rootes Motors Ltd to handle the ordnance depot and workshops for vehicles.

Suez Contractors (Ammunition), formed by Imperial Chemical Industries Ltd. to manage the ammunition depot.

Suez Contractors (Electricity), formed by Balfour, Beatty & Co. to handle water and power supplies at the base.

Suez Contractors (Maintenance), formed by George Wimpey and Co., John Laing and Co., and Holloway Bros. to handle general repairs and maintenance of base installations.

These companies will be responsible to a Government committee in London known as Suez Contractors Management Ltd. They will be separated from their parent companies, will be run on a "non-commercial" (i.e. non-profit-making) basis, and will be paid an annual fee for their services in maintaining Government property in Egypt. Under the Anglo-Egyptian agreement they will be exempt from Egyptian labour legislation

The former G.H.Q. of British Middle East Command at Fayid was formally handed over to the Egyptian authorities on Nov. 20, 1955, when G.H.Q. moved to its new headquarters in Cyprus.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14030 D; 13833 A.)**

C. FINLAND. — Cabinet Appointment.

The new Government headed by M. Fagerholm was completed on May 2 by the appointment of M. Arvo Heimo Helminen as Minister of Justice—a portfolio left vacant when the Fagerholm Government was formed in March. M. Helminen, formerly a district judge, is not a member of any political party.—(Times) **(Prev. rep. 14742 B.)**

MAY 12—19, 1956

A. NORTH ATLANTIC TREATY ORGANIZATION. — North Atlantic Council Meeting. - Extension of NATO Co-operation to Non-Military Fields. - Appointment of Three-man Ministerial Committee. - NATO Developments. - Military and Civilian Appointments.

The North Atlantic Council met at the Palais de Chaillot in Paris on May 4-5 under the chairmanship of Dr. Gudmundsson, the Foreign Minister of Iceland. It was decided, *inter alia*, to set up a Committee of three Ministers to examine "ways and means to improve and extend NATO co-operation in non-military fields and develop greater unity within the Atlantic community." At the end of the meeting it was announced that the members of this committee—known as the "three wise men"—would be the Foreign Ministers of Canada, Italy, and Norway, respectively Mr. Lester Pearson, Dr. Gaetano Martino and Hr. Halvard Lange.

Prior to the meeting of the North Atlantic Council, both Mr. Dulles (the U S. Secretary of State) and Mr. Lester Pearson had issued statements emphasizing the desirability of greater political and economic co-ordination between the members of the North Atlantic alliance, in addition to the existing co-operation for defensive purposes (see below) The desirability of expanding the work of NATO in the economic, social, and cultural spheres had also been particularly stressed by French and Italian statesmen in recent months—e.g. by President Coty and President Gronchi during the latter's visit to Paris in April (see 14828 B); in the ministerial discussions between MM. Mollet and Pineau and Dr Martino, held at the same time; in President Gronchi's speech to the U S. Congress (see 14763 A); and by M Mollet in his recent interview to an American magazine (see 14815 A). A resolution to the same effect had also been adopted in March by the Foreign Affairs Committee of the Norwegian *Storting*.

The proposal to appoint the above-mentioned ministerial committee was made at the North Atlantic Council meeting by Mr. Dulles. It was understood that the "three wise men" had been proposed by Mr Selwyn Lloyd, the British Foreign Secretary.

The communiqué issued by the North Atlantic Council was worded as follows:

"(1) The Atlantic Powers, seven years ago, entered into the North Atlantic Treaty in face of the Communist threat to their common ideals and civilization. They had seen imperilled all the human rights which their peoples regard as essential for their life and freedom, particularly representative government, freedom of the individual, the rule of law, and liberty of the press

With the disappearance of the last free regime in Eastern Europe, that of Czechoslovakia, the Berlin blockade in 1948, and, two years later, the invasion of Korea, the concern of the free world reached its climax The need for collective military defence was all the more obvious because at the end of the Second World War the free world had disarmed. These were the circumstances which led to the creation of NATO and its military strength, and this is why the sacrifices necessary for the defence of the Atlantic Community have since then been borne in common.

(2) The collective defence efforts of the Atlantic Powers have not been in vain. They have successfully deterred Soviet aggression in Europe and have contributed to the adoption by the Soviet Government of the so-called policy of co-existence To the extent that this policy involves a certain easing of tension and the admission by the Government of the U.S S R. that war is not inevitable, it is welcomed by the Atlantic Powers, who have always supported this idea. It is now possible to hope that those principles of the U.N Charter which have regulated the relations between the peoples of the Atlantic Community may eventually also regulate the relations between the Soviet Union and the Western Powers.

(3) The reasons which gave rise to the Atlantic Alliance have not, however, disappeared. No progress has been made towards solving certain vital European problems, including the reunification of Germany in freedom, which have to be solved on a basis which would satisfy the legitimate security needs of all. The Western Powers cannot relax their vigilance until these problems have been solved, and until a disarmament plan providing the necessary guarantees to all and an effective control system has been put into effect. Soviet military power continues to increase Security remains therefore a basic problem, and the Atlantic Powers must continue to give priority to the maintenance of their unity and strength.

However, present prospects seem to leave scope for further peaceful initiatives on the part of the Atlantic Powers. They are determined to pursue these initiatives with the same energy that they displayed in building up their defence organization and with which this will be maintained. They solemnly affirm that this policy will be pursued in common, based on the unity, solidarity and co-operation of peoples sharing common ideals and standing together in the cause of freedom.

(4) The Atlantic Council consider it timely and useful for the members of the Atlantic Community to examine actively further measures which might be taken to advance more effectively their common interests. The Atlantic Powers already possess in the North Atlantic Council an instrument of unity and a forum for consultation regarding policies of general interest. In order to enable the Council better to perform these tasks, the Ministers agreed to appoint a Committee of three Ministers to advise the Council on ways and means to improve and extend NATO co-operation in non-military fields and to develop greater unity within the Atlantic community. The Committee of Three was requested to submit its report as soon as possible

(5) In the meantime, the Council agreed:

(*a*) to undertake periodical examinations of the political aspects of economic problems;

(*b*) to strengthen economic co-operation between member-countries, to seek to eliminate conflict in their international economic policies, and to promote conditions of stability and well-being;

(*c*) to instruct the Permanent Representatives of the Council to examine economic problems in the light of the ideas set out above and of the plan put forward by M. Pineau (see below), calling upon the services of a committee of technical advisers working under their authority

(6) The members of NATO are dedicated to 'safeguard the freedom, common heritage and civilization of their peoples, founded on the principles of democracy, individual liberty, and the rule of law.' Their first seven years of working together have resulted in marked success, and have strengthened the bonds between them. The members of NATO are determined to remain united and steadfast in their ideals. They face the future with confidence."

The discussions in the North Atlantic Council were held *in camera*, but it was understood that Mr. Selwyn Lloyd had given an account of the recent visit to Britain by Marshal Bulganin and M. Khrushchev; that Mr. Dulles had discussed the recent changes in Soviet policy; and that M. Pineau and Dr. Martino had dwelt on the need for enlarging the scope of NATO and, in particular, of giving effect to Article 2 of the North Atlantic Treaty. [This Article pledges the signatories to "eliminate conflict in their international economic policies" and to "encourage economic collaboration" between themselves —see 9869 A.]

The Ministers also discussed a proposal by M. Pineau—to which reference was made in the communiqué—for the establishment of a World Economic Development Agency to give assistance to under-developed countries. M. Pineau suggested that such a body should be set up by the United Nations at the request of the North Atlantic Council, and that it should consist of the following organs:

(1) A Steering Board, responsible to the U.N., comprising representatives of States granting and of States receiving aid.

(2) A Statistical Office to centralize all contributions made to under-developed countries through existing organizations or bilateral agreements.

(3) A Bank or Fund responsible for credits furnished under all existing assistance programmes. It would also receive the contributions of member-States and keep account of the efforts of every country in the field of economic aid. It would grant aid in the form considered most appropriate by the Steering Board—loans with or without interest, lowered interest rates on existing loans provided by other organizations, or subsidies for urgent cases.

(4) A Commercial Agency which would buy and resell surpluses of beneficiary countries

(5) A Technical Institute concerned with technical assistance and research.

U.S. and Canadian Statements on Need for expanding Scope of NATO.

As stated above, both Mr. Dulles and Mr. Lester Pearson had previously spoken of the need to expand the scope of NATO beyond that of a purely defensive and military organization. Mr. Dulles, in the course of a speech on April 24 to the Associated Press in New York, said that NATO "can and should be" more than a military alliance, and that the time had come "to advance NATO from its initial phase into the totality of its meaning." Mr. Pearson, in a speech on April 12 to the Canadian Parliament's Standing Committee on External Affairs similarly declared that NATO should be "far more than a mere agency of defence policy." Extracts from their speeches are given below.

Statement by Mr. Dulles.

". . . Because Soviet military capabilities remain so vast, and because their intentions are subject to rapid change, we must maintain our vigilance and our strength. But also we must increase the unity and dynamism of the free world by greater emphasis upon co-operation for something, rather than merely against something. . . .

"We had all hoped that the U.N. would establish world order on a universal basis. It has indeed done much in this respect, and we should do nothing that would detract from the United Nations. It remains the corner-stone of U.S. foreign policy. But the U.N. was never expected to be an exclusive means for developing world order. The Charter itself looks to regional and collective defence organizations to play a major role in this respect.

"The Organization of American States illustrates the possibilities of a regional organization It takes account of external perils, but it concentrates primarily upon its own positive accomplishments. It traces its origins back 66 years to when the Pan-American Union was founded It is held together by considerations which long preceded, and which will long succeed, the fear of Soviet armed attack.

"NATO is another organization which contains the possibilities of great development. It was, to be sure, conceived primarily as a military alliance, and that aspect of the Organization remains vitally important. But the Organization can and should be more. The Canadian Government has notably espoused this point of view, and at last December's meeting of the [North Atlantic] Council both the French and Italian delegations introduced resolutions along this line. . .

"All our peoples embrace a religious faith which makes atheistic materialism seem abhorrent to them We have a common sense of moral values. Our political institutions reflect democratic conceptions which had their origin in Greece, and legal institutions which had their origins in Rome. Our economies are similar. We believe in and encourage the private ownership of property, and there is a large and flourishing trade between our countries Our educational systems are much the same . . .

"None of our Governments is predatory. We want military power to be used as a community force to prevent aggression, and not as a national force for aggrandisement. Indeed, the amended Brussels Treaty for Western European Union already sets an historic example in armaments limitation—an example that we can well ask the whole world to follow.

"No NATO member, I suppose, wants to drift into some new and ill-defined relationship which could be provocative of future misunderstandings. But the unanimity of our thinking upon the great basic issues makes it apparent that the time has come to advance NATO from its initial phase into the totality of its meaning.

"Western civilization has made an immense contribution to the welfare of the whole world. It has been a dynamic force which, like everything human, has made its mistakes But on the whole it has reflected an enlightened view of the nature of man and of his God-given right to enjoy life, liberty, and the pursuit of happiness. . . .

"But the mission of the West is not completed More independence needs to be perfected. More economic development needs to be planned and supported throughout the world More sense of equality and human brotherhood needs to be developed And the West needs to appreciate better how rich are the gifts that other civilizations have to offer.

"We believe in the closer integration of some Western European countries, such as is represented by the Coal and Steel Community, by the Western European Union, and by the prospective development of what is called 'Euratom,' the proposed organization whereby the same countries that are members of the Coal and Steel Community would apply community principles to the development of atomic energy for peaceful purposes Such European integration, and the development of NATO, are complementary and not mutually exclusive processes .

"The historic weakness of the West has been its disunity Out of this disunity came wars which have taken the life-blood of its finest youth and weakened its economies. A major task of post-war statesmanship was to find the ways whereby the West can maintain its solidarity Very much has been done in this respect, but more can still be done to make sure that the good in Western civilization is not again negated by differences The peoples who make up the Atlantic Community ought, in increased unity, to resume their greatness; and true greatness is not to be measured by ability to impose on others what they do not want, but ability to find new ways whereby all men can better realize their aspirations

"The North Atlantic Treaty already serves as an indispensable, vital instrument of the Atlantic Community But the time has come, I believe, to consider whether its organization does not need to be further developed if it is adequately to serve the needs of this and coming generations. If that be the common desire of the NATO member-nations, the United States will join eagerly in exploring those possibilities which now beckon us forward."

Statement by Mr. Lester Pearson.

". . NATO is, or should be, far more than a mere agency of defence policy I think the feeling is growing that if this is not recognized and acted upon, NATO may not survive at all. . . . NATO is, of course, of vital importance as an organization for collective defence. I will even agree that that is its primary task . . . But it is also very important as an agency for organizing common policy in other fields, and I think its importance in that regard is growing It is important as a means of organizing a common political and economic approach to world problems, and for co-ordinating our views and policies as to how we should meet threats other than military

"There is a gap in policy which is hurting the West; that is, the separation between economic and technical aid to materially under-developed countries and political objectives. Maybe I should put it this way · We are suffering from efforts to close that gap in the wrong way by associating aid with the acceptance on the part of the receiving countries of 'cold war' political and strategic objectives. . . . The purpose of foreign aid is as important as the aid itself. Economic assistance of any kind on an international scale is bound to be a political act of some kind. The question is what kind? . . . The Russians, of course, are moving into this field, if not in a big way . . . then certainly in a 'headline' way.

"There is no doubt that in moving into this field of international economic assistance in Asia and Africa, the Soviet Union is guided primarily by political considerations. They also associate their economic efforts with denunciations of colonialism. That is, of course, an easy way of becoming popular in that part of the world, where they have been all too successful in obscuring their own record as the greatest colonial exploiters of modern times and the greatest suppressors of freedom in modern times.

". . What should we in the West do to counteract all this, and what should be the principles upon which our international aid policy should be based? . . I think we should pay more attention to the 'why' and 'how'. *Why* do we help these people, and *how* do we help them? . It is essential to divorce our aid from political considerations. If we go out of our way to respect the national and cultural sensitiveness of the people with whom we are co-operating in this field; if we make sure that our aid is practical and well administered; if, before we engage in any project, we work out an agreement between the countries concerned, the giver and the receiver, as we do under the Colombo Plan—then we shall be working in the best and most practical way

"Finally, I think we should bring the United Nations into these matters as much as possible—more than we have in the past. There is no better way of removing any suspicion that there is some ulterior purpose in granting aid than in having it administered by an international organization."

Senator George's Liaison Post with NATO.

It was announced in Washington on May 9 that Senator Walter F. George (Democrat, Georgia), chairman of the Senate Foreign Relations Committee, had accepted an invitation from President Eisenhower to serve as the "focal point of contact" between the U.S. Government and the three-man ministerial committee (the "three wise men") set up by NATO to study possibilities of expanding the non-military aspects of the North Atlantic alliance. A White House spokesman said that Senator George's assignment was "a further indication of the importance the United States attaches to expanding NATO beyond its military role." Senator George stated that he intended to resign from the Senate on taking up this appointment.

Resignation of General Gruenther. - General Norstad appointed Supreme Allied Commander, Europe.

The North Atlantic Council had announced on April 13 that General Gruenther was relinquishing the post of Supreme Allied Commander, Europe, at his own request, and that he would be succeeded by General Lauris Norstad, hitherto Air Deputy to the Supreme Commander. Field-Marshal Viscount Montgomery remained Deputy Supreme Allied Commander.

In a letter on April 10 to Lord Ismay (Secretary-General of NATO) President Eisenhower had asked the North Atlantic Council to give "favourable consideration" to the release of General Gruenther, who had expressed the wish to retire from active duty towards the end of the year for personal reasons The North Atlantic Council accordingly decided with regret to release General Gruenther, and expressed to him—on behalf of all member-countries—its "lasting gratitude for the distinguished service" he had rendered as Supreme Allied Commander, Europe

At the same time the North Atlantic Council requested President Eisenhower to nominate "an officer of the armed forces of the United States for appointment by the Council as Supreme Allied Commander, Europe" President Eisenhower nominated General Norstad to this post, describing him as "an officer of outstanding ability" with the special qualification of "long years of experience in Europe" General Norstad's appointment as SACEUR was unanimously approved by the North Atlantic Council on April 13

General Norstad (49), one of America's leading air officers, was commissioned in the U.S. Army in 1930 after passing through West Point. Joining the air arm, he saw service in various branches and came to Europe in 1942 with the U.S. 12th Air Force. In December 1943 he became Director of Operations of the Mediterranean Allied Air Forces, and in 1944 became Chief of Staff of the U.S. 20th Air Force, which carried out the Superfortress attacks against Japan. In the immediate post-war years he served successively as Assistant Chief of Air Staff for Plans and as Director of the Plans and Operations Division of the U.S. War Department, before his appointment in 1947 as Deputy Chief of Staff for Operations of the U.S. Air Force. In January, 1951, he assumed command of the U.S. Air Forces in Europe, subsequently becoming C.-in-C., Allied Air Forces, Central Europe. He had been Air Deputy to General Gruenther since July 1953.

General Gruenther (57) had been Supreme Allied Commander, Europe, since July 1953. In a press statement on April 13 he stressed that there were no "ulterior motives" behind his resignation, that his dedication to NATO ideals was undiminished, and that his relations with NATO remained "of the very best."

Military and Civilian Appointments.

Apart from the appointment of General Norstad as Supreme Allied Commander, Europe, several other important NATO appointments, both military and civilian, were made in recent months, as set out below (date of announcement in parentheses):

Military Appointments.

Lieut.-General Sir Cecil Sugden, Commander of the British Forces in Hong Kong, as C.-in-C., Allied Forces, Northern Europe (CINCNORTH) in succession to General Sir Robert Mansergh, consequent upon the latter's appointment as C.-in-C., U.K. Land Forces—see page 14777. (Nov. 3, 1955.)

Vice-Admiral Robert P. Briscoe, Deputy Chief of Naval Operations, U.S. Navy, as C.-in-C., Allied Forces, Southern Europe (CINCSOUTH) in succession to Admiral Fechteler, retiring (April 17, 1956.)

Civilian Appointments.

Baron Adolph Bentinck, Netherlands Ambassador in Berne, as Deputy Secretary-General of NATO *vice* Jonkheer van Vredenburgh, following the latter's appointment by the High Authority of the European Coal and Steel Community as head of its permanent delegation to the British Government (Feb 24, 1956) Baron Bentinck was recently a member of the European Commission for the Saar referendum.

Signor Aubrey Casardi as Assistant Secretary-General for Political Affairs *vice* Signor Giuseppe Cosmelli, who had been appointed head of the Italian delegation to the Organization for European Economic Co-operation (O E.E C). Signor Casardi has been a member of the Italian Diplomatic Service since 1927. (May 11, 1956)

Mr. J Murray Mitchell (U.S A.) as Assistant Secretary-General for Production and Logistics *vice* Mr Lowell P. Weicker, who had resigned in order to resume his business activities. (Feb 2, 1956.) Mr. Mitchell, formerly vice-president of the New York Trust Company, served during World War II as Assistant Chief of Staff for Civil Affairs and Military Government at Allied Forces H.Q. in the Mediterranean In 1951-52 he was assistant to Mr. Charles E Wilson, then U.S Director of Defence Mobilization.

Miscellaneous NATO Developments.

Other developments within the NATO during recent months are summarized below under cross-headings.

Atomic Information. The NATO Agreement for Co-operation regarding Atomic Information (see page 14367, second column) came into force on March 29, 1956, by which date all NATO member-countries had given official notification that they were bound by its terms The agreement, which was signed in Paris in June 1955, provides that the U.S A. and other NATO countries may make various categories of atomic information available to the Organization.

Guided Missiles. In his semi-annual report to Congress on the Mutual Security Programme (May 7), President Eisenhower said that the U.S A. had been "building up its armed strength in Europe with such weapons as the *Nike*, *Corporal*, *Honest John*, and *Matador* missiles and 288-mm.'gun battalions, all with atomic capability." He added that "the United States plans to provide its NATO partners with certain types of modern defence weapons and equipment which we are now furnishing in increasing numbers to our own NATO forces in Europe."

Civil Defence. - Lord Montgomery's Criticisms. In a statement at SHAPE on April 27, Lord Montgomery said that the Western Powers' preparations for maintaining civilian morale in nuclear war were "totally inadequate" He added . "The secret of civilian morale under attack, as of military morale, is that the people should be told the truth about what is happening, and should believe the situation is under control. It is vital to understand that, in a situation of nuclear equality between two sides, the side will survive which has the best organized home front. Home morale is the business of Civil Defence. Civil Defence is vital to the modern fighting chief, because without it his base is not secure. Most Western nations are doing nothing about this. Those that are, are not doing enough. . . .

"We are almost at the stage where it is possible to despatch destructive forces from distances ranging from a mile to 5,000 miles, in the latter case a missile taking 15 minutes to reach its objective. . . . It may be possible to detect an enemy missile somewhere along its path, to compute that path, to fire an anti-missile missile, and to destroy or neutralize it somewhere in space. But all these operations will have to be done in minutes or the first enemy strike may be decisive. Our early warning and air defence systems must operate extremely quickly, and must function as one system. A single authority, with the power of instant decision is essential if this is to happen. . . . If we are to survive a surprise attack we must have a more effective defence than we have today. . . . Theoretically, the ideal solution would be to combine all military functions into a single service. But today this would not be possible. . . . Inter-Service rivalries and mistrust still distort judgment and make sound decisions impossible"

Transfer of French Forces to Algeria. The following communiqué was issued by the North Atlantic Council on March 27 in connexion with the increasing withdrawal of French forces from Europe to Algeria, as a result of the disturbed situation in that territory:

"The North Atlantic Council has been kept informed of the withdrawals by France of forces assigned by her to NATO, and has examined the situation in Europe arising from these movements. It has noted that France has found it necessary, in the interests of her own security, to reinforce the French forces in Algeria, which is part of the North Atlantic Treaty area. The Council recognizes the importance to NATO of security in this area. Expressing the hope of an early and lasting settlement, the Council noted the determination of the French Government to restore, as soon as possible, its full contribution towards the common defence in Europe"

The communiqué was issued after the French Government had decided to transfer two more divisions from Germany to Algeria, including the 7th Mechanized Division, one of the most modern in the French Army. Whereas a year earlier France had five divisions in Europe at combat readiness, with another nine in reserve, three of the combat divisions had been or were being sent to North Africa, thereby more than halving French combat strength in Europe. Despite the transfer of North African and West African troops to Europe as replacements, it was believed that total French combat strength in Europe—i.e. excluding troops on communications duties and at depots, etc.—was still little more than three divisions. None of the reserve divisions have been transferred to North Africa.

Greek Participation in NATO Exercises. After an interval of six months, Greek forces resumed participation in NATO exercises during March, when two Greek submarines took part in naval and air manoeuvres in the Tyrrhenian Sea with British, U S , Italian, and Turkish units. Owing to the tension with Britain over Cyprus, and because the Greek Government considered that Turkey had not yet made satisfactory amends for the anti-Greek riots of September last, the Greek crews were instructed not to fraternize with British and Turkish personnel and to boycott the "social" side of the exercises.

German Representative at SHAPE. It was announced in Bonn on Dec. 24, 1955, that Colonel Count Johann von Kielmannsegg had been appointed German military representative at SHAPE in succession to General Speidel, consequent upon the latter's appointment to a senior post in the Federal Defence Ministry. Count von Kielmannsegg (who was promoted to the rank of general) was arrested in 1944 after the attempt on Hitler's life, and dismissed from the German General Staff. He later assisted Herr Blank (the Federal Defence Minister) with the rebuilding of Germany's armed forces. General von Kielmannsegg is descended from an ancient Saxon family, one of his ancestors having fought against Napoleon at Waterloo.

The Soviet Tass Agency issued a statement on May 13, broadcast by Moscow radio, declaring that the extension of NATO's activities to non-military spheres, as announced in the Paris communiqué, did not alter the "aggressive character" of the North Atlantic Treaty.—(NATO Information Division, Paris - Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris) **(Prev. rep. NATO, 14617 A.)**

A. UNITED KINGDOM. — Trade Unions. - Mr. Cousins elected General Secretary of the T.G.W.U.

Mr. Frank Cousins (51) was elected general secretary of the Transport and General Workers Union—the largest trade union in Britain—on May 10 in succession to the late Mr. A. E. Tiffin, who died in December last. [Mr. Tiffin had held the post for only six months, having been elected general secretary in June, 1955, after the death of Mr. Arthur Deakin.] Mr. Cousins, who had been acting general secretary since Mr. Tiffin's death, received 503,560 votes against 77,916 for Mr. T. J. Healy, his only opponent. About 46 per cent of the union's membership cast their votes. Mr. Cousins was a candidate at the time of Mr. Tiffin's election, coming third with 74,217 votes.—(Times - Daily Herald) **(14336 C.)**

B. CZECHOSLOVAKIA. — Release of Mr. Oren.

Mr. Mordecai Oren, the Israeli national who had been sentenced to 15 years' imprisonment in 1953 on charges of "espionage and anti-state activities against the Czechoslovak people," arrived in Zurich on May 13 after having been released by the Czechoslovak authorities and allowed to leave the country. Mr. Oren, a leading member of the *Mapam* (Left-wing Socialist) party in Israel, said that he had merely been informed of his release and had been given no reasons. He declined to discuss his four years' imprisonment. The other Israeli national sentenced with Mr. Oren, Mr. Simon Orenstein, had been released in 1954.—(Manchester Guardian - Le Monde, Paris) **(Prev. rep. 13877 D ; 13234 B.)**

C. ITALY. — Pinocchio Memorial.

A bronze monument of Pinocchio, the famous puppet familiar to children throughout the world in the story by Carlo Collodi, was unveiled at the town of Collodi (Tuscany) on May 14 in the presence of President Gronchi. The work of the sculptor Emilio Greco, it is situated in the middle of a square and surrounded by a wall with mosaics recalling episodes from the Pinocchio story. The monument was built with money raised in thousands of small sums by the children of Italy. The real name of the author of *Pinocchio* was Carlo Lorenzini, who took the pen-name of Collodi from his native town.—(Giornale d'Italia, Rome - Corriere della Sera, Milan)

D. UNITED STATES. — New C.-in-C. in Europe.

It was announced at the White House on March 8 that President Eisenhower had appointed Lieut.-General Henry I. Hodes, commander of the U.S. Seventh Army in Europe, as C.-in-C. of the U.S. Army in Europe in succession to General Anthony C. McAuliffe, retiring.—(New York Times) **(14091 A.)**

E. INDIA. — Retention of Death Penalty.

Mr. Datar, Minister in the Home Affairs Ministry, stated in the House of the People on April 21, in reply to a question, that the Government of India could not consider abolishing the death penalty in view of the fact that 9,000 murders were committed every year in India. (The Statesman, Calcutta)

A. WESTERN GERMANY - SOVIET UNION. — Ratification of Agreement on Resumption of Diplomatic Relations. - Exchange of Ambassadors. - Soviet Releases of German Prisoners.

The Moscow agreement for the establishment of diplomatic relations between the German Federal Republic and the Soviet Union was unanimously approved by the German Federal Government on Sept. 19 and by the *Bundestag* on Sept. 23, 1955, and ratified by the Presidium of the Supreme Soviet two days later.

Dr. Adenauer, opening the debate in the *Bundestag* on Sept. 22, reiterated that the Federal Republic's loyalty to the West was undiminished "Germany's partnership with the West," he declared, "goes beyond politics It is rooted in her indissoluble membership in the circle of Christian Western culture. Speaking for myself, and for the populations of Western and Eastern Germany, I solemnly declare . Germany is part of the West, of its spiritual and social structure and its historical traditions. The Government will not relax its efforts towards European integration and the defence of freedom. Rather will it intensify these efforts ."

After reviewing the background of the Moscow negotiations, the Chancellor declared that his decision to exchange Ambassadors with the Soviet Union was "not to be put on a level with a friendly treaty relationship." The Soviet leaders, he said, had pointed out to him that they maintained diplomatic relations with States with which they had substantial political and ideological differences, and the absence of relations between Bonn and Moscow was an "anomaly" which made it impossible to represent German interests *vis-à-vis* the Soviet Union The German delegation, he emphasized, had told the Soviet leaders that a normalization of relations between the two countries could "on no account mean the legalization of the anomalous state of Germany's present partition." The Federal Chancellor added . "There is no inconsistency between our decision to establish diplomatic relations and the line of our foreign policy, which we are determined to pursue under all circumstances."

Moreover (Dr Adenauer continued), the exchange of Ambassadors with the Soviet Union did not mean any change in the Federal Government's attitude to the East German regime, which was not formed on the basis of truly free elections, had no real popular mandate, and was rejected by the overwhelming majority of its own people. "The Federal Government alone is authorized to speak for all Germany," he declared "The member-States of NATO have adopted this position in a joint declaration, and all other States of the free world have adopted it expressly or by implication . . . The treaty of Sept 20 between the Soviet-zone Government and the Soviet Union changes nothing in the existing position. The Soviet-zone Government has no sovereignty, and there is no question of recognizing it. I must make it clear that in the event of recognition of the so-called German Democratic Republic by third parties with whom the Federal Government has official relations, we should consider this as an unfriendly act calculated to intensify the division of Germany"

The Chancellor went on to refer to the exchange of letters between the East German and Soviet Foreign Ministers which accompanied the East German - Soviet Treaty of Sept. 20, 1955, under which responsibility for surface communications between Berlin and Western Germany, except for the traffic of Western forces, was assigned to the German Democratic Republic. Dr. Adenauer said that this was contrary to the four-Power agreement of June 20, 1949, ending the Berlin blockade, under which the Soviet Government had undertaken specific responsibilities for inter-zonal traffic and Berlin traffic. The new Russian move was intended to force the Federal Government to negotiate with, and eventually to recognize, the East German régime, but this it was not prepared to do. Dr. Adenauer said that the Federal Government had drawn the attention of the three Western Powers to this matter, and had asked them "to take the necessary steps."

In conclusion, Dr. Adenauer claimed that "in extraordinarily difficult negotiations" they had "made what was humanly and politically possible out of a given situation," adding: "I am not unmindful of the complex problems raised by the Moscow decisions It is not by avoiding risks, however, that the difficult political problems of our country can be solved or the reunification of Germany achieved"

[It was disclosed after the Chancellor's speech that the Federal Government had sent two Notes to the U S., British, and French Governments—one requesting them to reaffirm their declaration of April 7, 1954, that the Soviet Zone would not be recognized as a sovereign State, and the other calling their attention to the provisions of the Soviet - East German treaty with regard to Berlin traffic.]

Herr Ollenhauer (the Social Democratic leader) welcomed Dr. Adenauer's efforts to secure the release of German prisoners in the Soviet Union, and announced that his party had decided to approve the Moscow Agreement because they wished "to exploit the possibilities of an active reunification policy offered by the normalization of relations between Bonn and Moscow." In giving their consent to this "concrete step," however, they were at the same time fully maintaining their opposition to the foreign policy hitherto pursued by the Federal Government; nor was their agreement "a blank cheque" or "a demonstration of confidence in the Government's future foreign policy."

Herr Ollenhauer maintained that the Moscow talks had shown that the Paris Agreements were not the key to German reunification, and that the Russians would refuse to allow Germany to become united as long as the Federal Republic adhered to NATO. "This is exactly the situation," he added, "which we Social Democrats warned you would arise even before the Paris Agreements were ratified." The Federal Government's argument that membership in the Atlantic alliance would force the Soviet Union to abandon Eastern Germany had been "utterly disproved," and, far from facilitating the reunification of Germany through alliance with the West, Dr. Adenauer's policy had resulted in a Soviet victory and the worsening of the prospects for German reunification.

The Social Democrats, Herr Ollenhauer continued, were disturbed over the future relationship between the two German Governments in the new situation. They disputed the "democratic legitimacy" of the East German régime, and agreed that no diplomatic contacts should be established with it. "All-German talks," as proposed by the Soviet Union, would involve the risk of Germany being treated in the same way as Poland and Czechoslovakia, and perhaps of sharing their fate Herr Ollenhauer expressed regret, however, at the Chancellor's statement with regard to the Federal Government's attitude towards third countries recognizing the East German regime. "The Chancellor himself has said often enough," he declared, "how long and hard is the way to the recovery of the world's confidence in the German nation. When he now says, almost in the manner of an ultimatum, that the Federal Government will regard the establishment of diplomatic relations by third Governments with the German Democratic Republic as an unfriendly act, I ask myself who is served by such strong language. Certainly not the German nation. Such words are liable to open old wounds and endanger new friendships. . . ."

In conclusion, Herr Ollenhauer called for a more determined Western initiative to restore German unity; suggested that the Federal Republic should withdraw from NATO, and that the Great Powers should agree on a European security system satisfactory to all member-countries; and declared "The Chancellor has taken in Moscow a step towards greater freedom of action in German foreign policy. The Paris Agreements gave him the right to do so, and we approve this step Our attitude towards the Government's foreign policy in the new period now opening will be determined by the use he is going to make of this freedom."

In unanimously approving the Moscow Agreement, the *Bundestag* also adopted two all-party resolutions.

The first resolution took note of Marshal Bulganin's personal promise to release German prisoners-of-war still in the Soviet Union, and expressed the "certain expectation" that this promise would be kept.

The second resolution (*a*) endorsed the Chancellor's statement that the establishment of diplomatic relations with the Soviet Union did not imply West German recognition of the present frontiers of Germany pending their determination in a peace treaty, that the German Federal Republic was the only legitimate German regime in international affairs; and that there would be no recognition of the East German regime; (*b*) reiterated the demand for the reunification of Germany in accordance with the *Bundestag* resolution of Feb. 26, 1955 (see page 14171, second column).

The appointment of M. Valerian Zorin as the first Soviet Ambassador to the German Federal Republic was officially announced on Oct. 29, 1955. M. Zorin arrived in Bonn on Dec. 20 and presented his credentials to President Heuss on Jan. 8, 1956. On the latter date it was announced that the Soviet Government had agreed to the appointment of Dr. Wilhelm Haas as the first West German Ambassador in Moscow. The departure of Dr. Haas for Moscow was, however, delayed because of difficulties in finding suitable accommodation for the new Embassy, and it was not until March 2 that he arrived in the Soviet capital to take up his post.

M. Zorin (53), Ambassador to Czechoslovakia from 1945-47, was in Prague at the time of the Communist *coup d'état* in February 1948. From 1949-52 he was a member of the Soviet delegation to the United Nations, eventually becoming chief delegate in succession to M. Malik He has been a Deputy Foreign Minister since 1947.

Dr. Haas (60), a career diplomat, was German Ambassador in Tokio from 1933 to 1937, when he was removed from office because of his wife's Jewish ancestry. He re-entered the diplomatic service after 1945, and had been Ambassador in Ankara since 1952.

Soviet Repatriation of German Military and Civilian Prisoners.

In accordance with Marshal Bulganin's promise to Dr. Adenaur, the repatriation of 9,626 Germans imprisoned in the U.S.S.R. on charges of war crimes began in October 1955, a total of 5,863 being returned between Oct. 6 and Oct. 20, comprising 3,890 former prisoners-of war and 1,973 civilians Of those repatriated, 1,256 were sent to Eastern Germany, but some of them succeeded in escaping later to Western Germany.

On Oct. 20, however, the repatriation of the P.O.W.s was suddenly stopped, and was not resumed until Dec. 11. Although no official announcement was made on the German side attributing any blame to the Soviet authorities, the

hold-up was attributed in the West German press partly to delays in the Soviet-German discussions on the detailed arrangements connected with the establishment of embassies in Bonn and Moscow, and partly to Soviet demands for the repatriation of 100,000 Soviet nationals allegedly held in Western Germany (see below). This assumption was confirmed by the fact that, following German agreement to the proposed appointment of M. Zorin as Soviet Ambassador, and a German statement on the repatriation of Soviet nationals (see below), it was announced by the Soviet authorities on Dec. 8 that further transports of prisoners were on the way.

Accordingly, between Dec. 11, 1955, and Jan. 16, 1956, most of the remaining prisoners, both military and civilian, arrived back in Eastern and Western Germany. M. Semeonov, a Soviet Deputy Foreign Minister and former High Commissioner in Eastern Germany, stated on Jan. 26 that all the 9,626 prisoners had been sent home except for a few who were ill and who would be repatriated after discharge from hospital. This figure was confirmed on Feb. 3 by Professor Oberlander (Federal Minister for Refugee Questions), who added, however, that it was believed that 100,000 of the 600,000 - 750,000 Germans deported by the Red Army from the former German eastern territories were still alive in the Soviet Union.

The majority of those repatriated were released unconditionally, but 269, who arrived on Dec. 17 under escort, were handed over to the East German authorities as war criminals with unexpired terms of imprisonment, and were sent to Bautzen prison. Another 450 former members of the *Wehrmacht*, S.S., or police were returned to the West German authorities on Jan. 14, 1956, being described as "major war criminals"; in this connexion the Soviet authorities informed the Federal Government that documentary evidence of atrocities committed by this group would be delivered in due course, to provide the basis for further imprisonment in Western Germany. Of the remaining 30 prisoners, 22 had previously arrived in Western Germany, two had been detained in Eastern Germany, three were returned with other transports, and three others had died before repatriation. Of those detained in Bautzen prison, 68 were subsequently returned by the East German authorities to Western Germany on April 14, 1956

Those released unconditionally included a considerable number of former *Wehrmacht* generals, among them ex-General Walter von Seydlitz-Kurzbach, who had been second-in-command to Field-Marshal Paulus during the siege of Stalingrad, and who later joined the "Free German Committee" formed by the Soviet Government after the surrender of the German garrison of that city. Former Nazis repatriated included Heinz Linge (Hitler's valet), ex-Major-General Hans Baur (Hitler's personal pilot), ex-Major-General Rattenhuber (commander of Hitler's S S escort battalion), Karl-Heinz Pintsch (former personal aide of Rudolf Hess), Wilhelm Eckold (head of Goebbels' police bodyguard), Rudolf Jordan (ex-*Gauleiter* in the Brunswick area), and Professor Karl Clauberg, head of the "experimental medical centre" at the Auschwitz concentration camp, where he conducted experiments in sterilization on a large number of women prisoners.

Of the civilians released, a considerable number were women, some accompanied by children born in captivity. Others included Kurt Müller, a former Communist member of the *Bundestag* and one-time deputy chairman of the West German Communist Party, who had disappeared during a visit to Berlin in March 1950; Herr Leo Bauer, another German Communist leader and editor-in-chief of East Berlin Radio at the time of his arrest in 1950, who was sentenced to death in East Germany in 1953 for "treasonable activities"; Herr Bernhard von Mutius, who had been assistant to Herr Dertinger (the former East German Foreign Minister arrested in 1953, and sentenced to 15 years' hard labour in 1954); and Herr Dieter Friede, a West Berlin journalist who had been kidnapped and taken to the Eastern sector of Berlin in November 1947.

Soviet Demand for Return of Soviet Refugees in Western Germany.

Following Marshal Bulganin's allegation that more than 100,000 Soviet nationals were "detained" in Western Germany (see page 14426), the Soviet Committee for Return to the Homeland (which has its offices in East Berlin) requested the German Federal authorities on Oct. 31, 1955, to assist in repatriating these Soviet citizens. The East German News Agency announced that Major-General Michailov, chairman of the committee, had written to that effect to the Federal Minister of the Interior, Dr. Schroder.

In a statement on Dec. 2, Herr von Brentano told the *Bundestag* that the Federal Republic would not hold back any Soviet citizens who wanted to return to the U.S.S.R.

"It is beyond dispute," Herr von Brentano declared, "that no Soviet citizen will be hindered by us from returning to the Soviet Union if he wishes to go. If the Soviet Union doubts this, we shall gladly let them see for themselves that no Soviet citizen or any one is prevented from returning if he wishes to do so." The statement was made in reply to a question by Dr. Gille (Refugee Party), who quoted an article in *Izvestia* suggesting that the return of Soviet citizens from Germany was a condition for resuming the repatriation of German prisoners from the Soviet Union, which had stopped suddenly on Oct. 20 (see above).

In reply to a Soviet Note of March 9, 1956, which alleged that large numbers of Soviet citizens were being held against their will in camps and prisons in the Federal Republic, the German Federal Government completely denied this allegation but stated that it was prepared to release 31 Russians who were at present serving sentences in West German prisons, and to hand them over to the Soviet authorities for repatriation.

The German reply said that 51 Russians serving sentences in the Federal Republic had asked to be repatriated; that in 31 cases the judicial authorities of the *Länder* concerned had agreed to the release of the Russians before completion of their sentences; and that the other 20 applications were still under consideration.

With regard to displaced persons and refugees from the U.S.S.R. now living in Western Germany, the German Note pointed out that all such persons enjoyed the protection of the U.N. High Commissioner for Refugees; that they had been given rights equivalent to those of German nationals; that they possessed international travel permits enabling them to leave Germany at any time; and that the Federal Government would "respect" the request of any foreigner for repatriation and would help him to leave Germany. The Note also offered that if any of these displaced persons or refugees were undecided and wished to talk the matter over with a Soviet representative, a meeting could be arranged. It declined, however, a Soviet request for a complete list of all these refugees, and for the visit of Soviet representatives to refugee camps, without the individual refugees' consent.

According to the authorities in Bonn, there were about 30,000 refugees from the Soviet Union in Western Germany, as well as 50,000 refugees from the former Baltic States and those areas of Poland annexed by the U.S.S.R. after the Second World War.

Earlier Soviet Releases of German Prisoners.

Between Sept. 25, 1953, and Nov. 27, 1953, about 4,500 Germans who had been imprisoned on charges of war crimes were returned by the Soviet Union to Eastern and Western Germany, under an agreement between the U.S.S.R. and the East German Government. About 5,000 more were released between Dec. 28, 1953, and the beginning of January, 1954.

Those returned included both military and civilian prisoners, the latter including several hundred women, some accompanied by children born in captivity. The women had all been imprisoned since the end of the war on various charges of "war crimes" or being "members of the *bourgeoisie*." The military included a considerable number of officers, among them some 20 former generals released from a special camp for German generals at Ivanovo, near Moscow.

The most prominent German general released during 1953 was the former Field-Marshal von Paulus, commander of the German Sixth Army at Stalingrad, and leader of the Free German Movement formed in Moscow amongst German officers in captivity. His release was announced on Oct. 26, 1953.

On Jan. 19, 1955, the Soviet High Commission officially announced the release of Field-Marshal Ferdinand Schörner, who commanded the German forces in Czechoslovakia at the end of the war, and of Vice-Admiral Hans Voss, chief naval liaison officer at Hitler's wartime headquarters. Schorner had been sentenced by a Soviet military court in 1948 to 25 years' imprisonment on charges of war crimes committed in the Soviet Union, where he had commanded a German army group.

Upon his return to Western Germany on Jan. 28, 1955, Schörner was received with marked hostility, the German Press alleging that he had behaved with extreme cruelty to his own men and had abandoned them during the closing phases of the war. Specifically, he was accused of having set up summary courts-martial in the final stages of the war which had ordered the execution of numbers of German soldiers for alleged desertion or indiscipline. In reply to a request by Schorner for a court hearing on these charges, Dr. Adenauer informed him on Feb. 1, 1955, that legal proceedings would be initiated. While this investigation was still proceeding it was reported on Feb. 5, 1956, that a Bavarian court had upheld Schörner's claim for financial compensation as a released prisoner-of-war.

The mass release of German prisoners from Soviet prison camps was not resumed until September, 1955, in which month nearly 1,100 soldiers and civilians returned to Eastern or Western Germany. These releases immediately preceded those under Marshal Bulganin's promise to Dr. Adenauer.

It was officially announced in East Berlin on Dec. 22, 1955, that the East German Government had granted an amnesty to 2,616 war criminals whom the Soviet authorities had handed over a considerable time earlier to the custody of the authorities Eastern Germany.

(Frankfurter Allgemeine Zeitung - A.D.N. Agency, East Berlin - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times) **(Prev. rep. Moscow Agreement, 14425 A; War Criminals, 14459 B.)**

A. INDIA. — Reorganization of Indian States. - The States Reorganization Bill and Constitution (Ninth Amendment) Bill. - Agreement with Akali Sikhs on Union of Punjab and PEPSU. - Merger of Andhra and Telengana. - Abandonment of Proposed Merger or Limited Union of West Bengal and Bihar.

A draft of the Indian Government's States Reorganization Bill was placed before both Houses of Parliament on March 16, prior to its submission to the State Legislatures for consideration. The main features of the Bill, under which India would consist of 15 States and seven Centrally-administered Union Territories, are summarized below.

Reorganization of States. (1) The 15 States would be (1) Andhra-Telengana; (2) Assam, (3) Bihar; (4) Gujerat; (5) Kerala; (6) Madhya Pradesh, (7) Madras, (8) Maharashtra, (9) Mysore, (10) Orissa; (11) the Punjab; (12) Rajasthan, (13) Uttar Pradesh, (14) West Bengal; (15) Jammu and Kashmir.

(2) The existing States of Punjab and PEPSU would be merged in a bilingual Punjab State, with regional committees for the Hindi- and Punjabi-speaking areas (see below) A Constitution Amendment Bill would empower the President to define the functions and powers of these committees.

(3) Andhra and the Telengana area of Hyderabad would be united in a single State, with regional committees to safeguard the interests of each (see below). The functions and powers of these committees (which would consist of members of the two State Assemblies, excluding the Chief Minister) would be defined by the President.

(4) No provision was made for territorial adjustments between West Bengal and Bihar or for the proposed merger of the two States, as this question was still under consideration. A separate Bill would implement any decisions which might be taken

(5) Full details were given of the proposed boundaries of each State and Union Territory. The Reorganization Commission's proposal for the transfer of the Bellary district to Andhra, which had been strongly criticized in Mysore, was rejected.

(6) Boundary commissions would be appointed, if necessary, to examine territorial adjustments between States.

(7) The reorganized States would come into being on Oct. 1, 1956.

Union Territories. (1) The following would be administered as Union Territories. (1) Bombay City; (2) Delhi, (3) Himachal Pradesh; (4) Manipur; (5) Tripura, (6) the Andaman and Nicobar Islands; (7) the Laccadive, Minicoy, and Amindivi Islands

(2) The Union Territories would be administered by the President through a Chief Commissioner or other authority appointed by him.

(3) The status of Himachal Pradesh as a Union Territory would be only provisional, as it would ultimately be merged with the Punjab.

Zonal Councils. (1) The States and Union Territories would be grouped into five zones, viz, Northern (the Punjab, Rajasthan, Jammu and Kashmir, Delhi, and Himachal Pradesh); Central (Uttar Pradesh and Madhya Pradesh), Eastern (Bihar, West Bengal, Orissa, Assam, Manipur, and Tripura); Western (Maharashtra, Gujerat, and Bombay City), and Southern (Andhra-Telengana, Madras, Mysore, and Kerala).

(2) A permanent council would be set up for each zone This would consist of a Minister of the Central Government to be nominated by the President; the Chief Minister of the constituent States; two other Ministers from each State, to be nominated by the President; one member from each Union Territory, to be nominated by the President; and (in the Eastern zone) the Adviser for Tribal Affairs to the Governor of Assam. The Union Minister would be chairman of the council, and each Chief Minister would act as vice-chairman for one year in rotation.

(3) Each council would have a permanent secretariat and the following advisers: (*a*) one person nominated by the Planning Commission; (*b*) the Development Commissioners of the States included in the zone, (*c*) the Chief Secretaries of the States.

(4) The functions of the councils would be purely advisory. They would be competent to discuss any matter in which some or all of the member-States and/or the Union had a common interest, and to tender advice to the Governments concerned.

Parliamentary Representation. The representation of the States and Union Territories in the two Houses of Parliament, and the number of seats in the State Assemblies, would be as follows.

States	House of the People	Council of States	State Assembly
Andhra-Telengana	43	18	301
Assam	12	7	108
Bihar	55	23	330
Gujerat ..	22	11	154
Kerala	18	9	126
Madhya Pradesh	36	16	288
Madras . . .	41	17	205
Maharashtra .	40	17	240
Mysore . ..	26	12	182
Orissa ..	20	10	140
Punjab. .. .	22	11	154
Rajasthan . .	22	10	176
Uttar Pradesh .	86	34	430
West Bengal ..	34	15	238
Jammu and Kashmir	6	4	—
Union Territories			
Bombay City	5	3	—
Delhi	4	2	—
Himachal Pradesh .	3	1	—
Manipur	2	1	—
Tripura . ..	2	1	—

Delimitation of Constituencies. In order that general elections might be held early in 1957 and the new State Assemblies properly constituted, a Delimitation Commission would be set up as soon as the Bill was enacted.

State Legislatures. (1) Interim Legislative Assemblies would be set up in the new States, and would function until general elections were completed and the new Assemblies had been summoned.

(2) All sitting members of the existing Assemblies, including those of Coorg, Ajmer, Bhopal, and Vindhya Pradesh, would become members of the provisional Assemblies of the States to which the territory comprised in their present constituencies was transferred either wholly or in part.

(3) Special arrangements were made for Kerala, the Punjab, and Andhra-Telengana, in view of the fact that elections (which are for a five-year period) had been held in Travancore-Cochin and PEPSU in 1954 and in Andhra in 1955 Because in the provisional Kerala Assembly there would be considerable disparity between the representation of the Travancore-Cochin population and that of the Malabar population (to be transferred from Madras), whilst in the new Punjab Assembly the PEPSU region would be over-represented as compared with the present Punjab region, it was proposed to equate the duration of the provisional Kerala and Punjab Assemblies to those of the existing Madras and Punjab Assemblies (i.e to hold elections in 1957). The Andhra Assembly would continue to sit until 1960, but elections would be held in Telengana simultaneously with the next elections to the House of the People in that area.

(4) In Madhya Pradesh an Upper House or "Legislative Council" would be elected by the members of the new Legislative Assembly to be formed after the general elections.

(5) The existing Legislative Councils in the Punjab and Mysore would be enlarged by the inclusion of representatives of the territories to be added to those States

Financial Provisions. (1) In order that the administration of a new State might be carried on until the State Legislature had sanctioned expenditure from the consolidated fund of that State and passed the necessary Appropriation Act, the Governor or *Rajpramukh* would be empowered to authorize such expenditure for a period of three months.

(2) Such assets as land, buildings, stores and other goods, arrears of taxes, and assets of State undertakings would pass to the successor State in which the assets were located, or with which they were territorially connected. Where there was more than one successor State, such assets as treasury and bank balances, the right to recover external loans and advances, and credits in certain funds would be divided between them according to the ratio in which the population of an existing State (as ascertained at the 1951 census) was distributed among them. The Central Government would decide the population ratios in all relevant cases.

(3) The public debts of the States affected by reorganization would be divided according to the population ratio, as had previously been done on the formation of Andhra (see 13165 A) The public debts of Bombay and Hyderabad States, however, would stand transferred to the Central Government on Sept. 30, 1956, and the Central Government would be deemed to have made a loan to each of these States of an amount equal to the debt so transferred, in order that Andhra and Maharashtra, as the principal successor States of Hyderabad and Bombay respectively, might not be saddled with an exaggerated debt which might affect their future borrowings

High Courts. (1) The existing Bombay High Court would become the High Court for Gujerat, Maharashtra, and Bombay City.

(2) The High Courts of Hyderabad, Madhya Bharat, PEPSU, and Saurashtra, and the Judicial Commissioners' Courts in the Part "C" States, would be abolished.

(3) The remaining High Courts would become High Courts for the corresponding new States. The Kerala High Court would have jurisdiction over the Union Territory of the Laccadive, Minicoy, and Amindivi Islands.

(4) The locations of the High Courts and Circuit Courts in the new States would be prescribed by the Chief Justices concerned, with the approval of the Governors.

Administrative and Police Services. (1) The cadres of the Indian Administrative and Police Services for Bombay, Madhya Pradesh, the Punjab, Vindhya Pradesh, and all Part "B" States would be wound up, and the members would be allocated to the State cadres for the new States, or for other existing States, by order of the Central Government.

(2) All other members of the State services in Part "B" or "C" States completely merged in a new State would be deemed to be allotted to that State. Those serving in any other State affected by the reorganization would provisionally continue to serve in the principal successor State, unless required by the Central Government to serve provisionally in another successor State.

(3) The Central Government was empowered to set up one or more advisory committees to assist in the determination of the final allotment of Government servants, in the integration of the services, and in ensuring fair treatment to all persons affected by the reorganization.

(4) The Public Service Commissions for the existing States of Mysore, Punjab, Rajasthan, and Travancore-Cochin would become Public Service Commissions for the corresponding new States.

(5) The Public Service Commissions for Bombay, Hyderabad, Madhya Bharat, Madhya Pradesh, PEPSU, and Saurashtra would cease to exist. Each of their members would be transferred to such of the Public Service Commissions for Andhra-Telengana, Gujerat, Madhya Pradesh, Maharashtra, the Punjab, and Mysore as the President might specify by Order.

Safeguards for Minorities. The Constitution would be amended to ensure that each State and local authority should endeavour to provide "adequate facilities for instruction in the mother-tongue at the primary stage of education to children belonging to linguistic minority groups," and that the President might issue "such directions to any State as he considers necessary or proper for securing the provision of such facilities."

The Home Minister (Pandit Pant) formally introduced in the House of the People on April 18 (*a*) the States Reorganization Bill in the form earlier published, and (*b*) the Constitution (Ninth Amendment) Bill, providing for a number of amendments to the Constitution arising from the proposed reorganization of States.

These amendments included the abolition of the distinction between Part A, B, and C States, the re-allocation of seats in the Council of States and the House of the People between the various States; provision for the appointment of a common Governor for two or more States, an increase in the maximum membership of the Upper Houses of State Legislatures from one-fourth to one-third of the membership of the State Assembly; the introduction of an Upper House for Madhya Pradesh, changes in the provisions relating to the High Courts and High Court judges, including provision for the establishment of common High Courts for two or more States, and for the extension or exclusion of the jurisdiction of a High Court to a Union Territory; the administration of Union Territories, including provision for the possible constitution of a Council of Advisers to the respective Chief Commissioners; and authority for the Governor of a State to delegate to the Union Government or its officers State executive functions (a clause which would make possible the execution of certain development projects in the States by the Central Government).

After consideration of the Bill, the House of the People adopted on April 26 a motion by Pandit Pant to refer the Bill to a joint select committee of both Houses of Parliament, the committee being asked to report back by May 14. On April 27 the *Lok Sabha* also accepted a similar motion to refer the Constitution (Ninth Amendment) Bill to the same joint committee. The Council of States concurred with both decisions.

The debate in the *Lok Sabha* centred largely upon the future of Bombay City. In winding up the debate, Pandit Pant claimed that there had been no marked difference of opinion with regard to any provisions of the States Reorganization Bill except on the Bombay question.

Reactions in the State Assemblies to the States Reorganization Bill, and other recent developments relating to this question, are described below.

Agreement on the Punjab.

Following prolonged negotiations between Mr. Nehru and other Government and Congress leaders, on the one hand, and representatives of the Akali Dal (the Sikh communal organization led by Master Tara Singh), on the other, an agreement was reached early in March on the reorganization of the Punjab, PEPSU, and Himachal Pradesh, and approved on March 11 by the General Council of the Akali Dal. The main provisions of the agreement—which represented a compromise between the Hindu demand for the union of all three States in a "Greater Punjab," and the Akali Sikhs' demand for a separate Punjabi-speaking State—were as follows:

(1) The Punjab and PEPSU would be merged in a single bilingual State with a common Governor, Ministry, Legislature, Public Service Commission, and High Court. The predominantly Hindu State of Himachal Pradesh would provisionally become a Union Territory.

(2) For the transaction of Government business with regard to certain specified matters, the State would be divided into two regions, one Hindi-speaking and the other Punjabi-speaking.

(3) For each region there would be a Regional Committee of the Punjab State Assembly, consisting of members of the Assembly, including the Ministers, belonging to the region, but excluding the Chief Minister.

(4) Legislation regarding the specified matters would be referred to the Regional Committees, who could also make legislative proposals to the State Government. Advice tendered by the Regional Committees would normally be accepted by the Government and the State Legislature, but in the event of a difference of opinion the matter would be referred to the Governor, whose decision would be final and binding.

(5) The Regional Committees would deal *inter alia* with development and economic planning (within the framework of general development plans formulated by the State Legislature), local government; public health; primary and secondary education; agriculture; cottage and small-scale industries, livestock; fisheries; co-operative societies; and charitable and religious institutions.

(6) The demarcation of the Hindi and Punjabi regions would be carried out in consultation with the State Government and other interests concerned.

(7) Both Punjabi and Hindi would be recognized as official languages of the State. At district level and below, the official language of each region would be the regional language. The State Government would set up two separate departments for promoting the Punjabi and Hindi languages.

The proposals contained in the States Reorganization Bill were unanimously approved by the PEPSU Legislative Assembly on March 22.

The Bombay City Controversy.

The Bombay Legislative Council approved the States Reorganization Bill on April 4 by 30 votes to five, 16 Congress members from Marathi-speaking areas abstaining. An amendment for the inclusion of Bombay City in Maharashtra had previously been rejected by 30 votes to seven, with 12 abstentions.

The Hyderabad State Assembly, when discussing the Bill (which provides for the incorporation of five districts of Hyderabad in Maharashtra), adopted on April 12 an Opposition amendment proposing the inclusion of Bombay City in Maharashtra. The voting was 69 to 60, the Congress members from Telengana and Karnataka opposing and 37 Congress members from Marathi-speaking areas abstaining.

Merger of Andhra and Telengana.

Mr. Nehru announced on March 5 that the Central Government had decided to merge Andhra and Telengana without any further waiting period, as originally proposed. However, to remove the fears of the people of Telengana that they might be dominated by Andhra, two regional committees would be set up, with responsibility for regional development, education, and the Government services.

The Andhra Legislative Assembly adopted the States Reorganization Bill on April 6, and the Hyderabad Legislative Assembly on April 12. Both Assemblies passed, without a division, an amendment seeking to change the name of Andhra-Telengana to Andhra-Pradesh. They also voted in favour of Hyderabad City becoming the capital of the combined State.

Madras. - The "Dakshina Pradesh" Question.

The Madras Assembly, when discussing the States Reorganization Bill on March 29, rejected amendments that the State should be renamed "Tamil Nad," and that the largely Tamil-speaking areas of Devicolam and Permeedu should be transferred from Travancore-Cochin to Madras.

Widespread controversy was aroused during the early months of 1956 by a proposal that Madras, Mysore, and Kerala should be united in a single multilingual State, to be known as "Dakshina Pradesh." This plan was supported by an influential section of the Congress Party, including Mr. Rajagopalachari (the former Governor-General of India and Chief Minister of Madras), but was opposed by the left-wing parties, which called a general strike on Feb. 20 in protest against the proposal.

Uttar Pradesh.

Opening the debate in the U.P. Assembly on April 20, the Chief Minister (Dr. Sampurnanand) opposed the formation of a zonal council for Uttar Pradesh and Madhya Pradesh as unnecessary and expensive, on the ground that there was no problem affecting the two States which could not be settled by mutual consultation. He also advocated the merger of Vindhya Pradesh, or at least of the Baghelkhand area of that State, with Uttar Pradesh, emphasizing that the U.P., which was primarily agricultural, needed the mineral resources of that area. A motion in favour of this proposal was carried unanimously.

Abandonment of Proposals for Merger or Union of West Bengal and Bihar.

The Chief Minister of West Bengal, Dr. Roy, reaffirmed his support for the proposed merger of West Bengal and Bihar on Jan. 31, but laid down the following conditions for its implementation:

(1) The new State should be called "the United States of West Bengal and Bihar"; (2) assurances should be given that the culture and language of each State would be protected; (3) both Bengali and Hindi should be official languages, with pre-eminence for Bengali in West Bengal and Hindi in Bihar, (4) the two languages should be equally encouraged in border areas, (5) the development projects and Five-year Plans proposed by each State should continue to be implemented by that State, (6) the resources which would be developed by each area, as approved by the Planning Commission, should continue to be employed in that area; (7) recruitment to the higher posts of the Public Service should be open to residents of either State, (8) recruitment to the lower posts in each area should normally be made from among the residents in that area; (9) there should continue to be two High Courts; (10) in addition to a Chief Minister from one region, there should be a Deputy Chief Minister from the other region, (11) Chief Ministers should be chosen alternately from the two regions; (12) two regional councils should be set up, with power to make recommendations on education, public health, and other social services, (13) the existing land system, tenancy laws, modes of taxation, and provision for social services in each State should not be interfered with except by common consent; (14) Calcutta should be the principal capital, with Patna as a second capital.

These conditions were interpreted by the Indian Press as a reflection of fears in West Bengal that the larger population of Bihar would enable it to dominate the proposed new State. [The 1951 census gave the population of Bihar as 40,218,916, and that of West Bengal as 24,786,683.]

The West Bengal Congress Parliamentary Party decided on Feb. 18 to support the merger, provided that these conditions and a number of others were fulfilled: e g. that there should be parity of representation for the two regions in the Upper Chamber of the united State, and that either unit should have the unilateral right to secede. Finally, the West Bengal Pradesh Congress Committee approved the merger on March 18, on condition that the safeguards outlined by Dr. Roy were given constitutional and statutory sanction; that the unilateral right of secession was granted; and that, in the event of secession, the boundaries of the two States should be readjusted on the basis of the States Reorganization Commission's recommendations as modified by the Central Government.

The proposed merger was approved by the Bihar Assembly on Feb. 25 by 157 votes to 25, after an amendment approving the merger subject to " a clear verdict in favour of union by the people of both States through a plebiscite " had been rejected by 156 votes to 35. The Chief Minister of Bihar (Dr. Sinha) emphasized during the debate, however, that the adoption of the resolution would not mean that Bihar would accept all the conditions laid down by West Bengal, and that only those conditions which were agreed to by both States would be binding. He also expressed the hope that there would be no need to change the existing boundary of the two States after the union.

Outside the Congress Party the merger proposals met with widespread opposition in West Bengal The Senate of Calcutta University adopted on Jan. 31 a resolution requesting that the proposal be dropped, whilst in local elections in two Calcutta suburbs (Feb. 19) left-wing and independent candidates opposed to the merger won 20 out of the 26 seats. A *hartal* called by the Linguistic State Reorganization Committee (comprising representatives of the Communists, Praja Socialists, and other left-wing parties) and other bodies opposed to the merger brought Calcutta to a standstill on Feb. 24; all bazaars, shops, schools, and colleges, and almost all offices and factories, were closed, no public transport or private cars appeared on the streets, and train services were practically suspended throughout West Bengal. The *hartal* was followed by a widespread civil disobedience campaign organized by the Linguistic State Reorganization Committee, as a result of which 2,385 people had been arrested by April 1 for defying orders against public demonstrations.

In view of the disagreement between the two State Governments, and the public opposition to the project, Dr. Roy and Dr. Sinha had discussions in Delhi from April 14-16 with Pandit Pant and Dr. Azad (Minister of Education), as a result of which it was agreed to abandon the merger scheme. The two Chief Ministers were reported, however, to have reached general agreement on the fundamentals of a new scheme proposed by Dr. Roy for a union of West Bengal and Bihar, under which (*a*) the two States, while retaining their separate identities, would have a common Chief Minister and Cabinet; (*b*) the State Legislatures would meet in joint session to deal with matters of common interest; (*c*) Calcutta and Patna would remain State capitals; and (*d*) there would be a High Court for each State.

After further discussions in Delhi, however, Dr. Roy formally announced on May 3 that he had also decided to withdraw his proposal for the union of West Bengal and Bihar. Though he still believed that the problem of West Bengal could not be solved merely by the transfer of a small area from Bihar, he felt that he had to " bow to the opinion of the people." In this connexion he referred to the result of a recent parliamentary by-election in North-West Calcutta in which Mr. Mohit Moitra, secretary of the Linguistic States Reorganization Committee, had defeated the Congress candidate.

On April 26 Dr. Roy had issued a statement in which he reiterated the claims of West Bengal for the transfer of certain border areas from Bihar, as proposed by the States Reorganization Commission and adopted with modifications by the Central Government. Dr. Roy's demand met with strong opposition in Bihar, where the president of the Bihar Pradesh Congress Committee (Mr N. K. Singh) maintained that a union between the two States, as then proposed by Dr. Roy, would completely remove the grounds for such a transfer.

As a result of Dr. Roy's decision to abandon not only the merger but also the union scheme between the two States, the Linguistic States Reorganization Committee in Calcutta announced on May 4 that it had abandoned its *satyagraha* campaign against any such plans.—(The Hindu, Madras - The Statesman, Calcutta - Hindustan Times, Delhi - Indian High Commissioner's Office, London)

(Prev. rep. States Reorganization, 14688 A; 14616 A.)

A. INTERNATIONAL BANK. — Recent Loans.

The following loans were made by the International Bank in recent months:

Burma. Two loans totalling $19,350,000 on May 4: (*a*) $14,000,000 to the Commissioners for the Port of Rangoon to help finance the reconstruction of cargo berths and storage facilities and the purchase of floating equipment, such as dredgers and tugs. Terms: 3¾ per cent per annum interest, plus 1 per cent p a. commission, repayable in 20 years beginning April 15, 1960. The loan was guaranteed by the Burmese Government. (*b*) $5,350,000 to the Burmese Government for the purchase of freight cars, diesel railcars, and bridge construction materials for the rehabilitation and development programme of Burma Railways. Terms: 3¾ per cent p a. interest, plus 1 per cent p.a. commission; repayable in 15 years starting on Oct. 15, 1959.

Ecuador. $5,000,000 on March 29 to the *Empresa Electrica Quito* to help pay for equipment for hydro-electric and thermal power projects which will nearly triple power supplies to Quito, the capital. The Bank of America participated in the loan, without the International Bank's guarantee, to the extent of $197,000. Terms: 3¾ per cent p.a. interest, plus 1 per cent p.a. commission, repayable in 20 years beginning Aug. 1, 1959. The loan was guaranteed by the Government of Ecuador.

Haiti. $2,600,000 on May 7 to the Haitian Government to help finance a three-year highway improvement programme The Royal Bank of Canada participated in the loan, without the International Bank's guarantee, to the extent of $413,000. Terms. 3½ per cent p.a. interest, plus 1 per cent p.a. commission; repayable in 10 years, starting on July 1, 1959

Japan. The equivalent of $8,100,000 on Feb. 21 to the Japan Development Bank to help finance the modernization of four Japanese steel, shipbuilding, and motor-car concerns, to whom the Japan Development Bank would re-lend the proceeds—viz., the Nippon Steel Tube Co. Ltd ($2,600,000), the Mitsubishi Shipbuilding and Engineering Co. Ltd ($1,500,000), the Ishikawajima Heavy Industries Co Ltd ($1,650,000), and the Toyata Motor Company Ltd. ($2,350,000) The total cost of the projects involved will be equivalent to about $25,500,000, and the loan will be used to meet the foreign exchange required for importing more than 100 machines and machine-tools from the U S A., Britain, Western Germany, Switzerland, France and Italy. The Chase Manhattan Bank participated in the loan, without the International Bank's guarantee, to the extent of $1,076,000. Terms. 3¾ per cent p.a. interest, plus 1 per cent p a. commission, repayable within 15 years, beginning Feb. 15, 1958.

Norway. $25,000,000 on May 23 to the Norwegian Government to help finance the Tokke hydro-electric project (see 14674 A). The total estimated cost of the Tokke project will be 500,000,000 kroner ($70,000,000) and the balance not covered by the International Bank's loan will be met by the Norwegian Government out of taxation and from bond issues to local authorities benefiting from the scheme. Terms: 3¾ per cent p.a interest, plus 1 per cent p a. commission; repayable in 20 years, starting in August 1961.

These loans were the first to Burma and Haiti, the second to Ecuador, the third to Norway, and the fifth to Japan They brought the total of loans made by the International Bank since its creation to $2,530,000,000 in 43 countries.
(International Bank, Washington) **(Prev. rep. 14594 A.)**

B. BRITISH TOGOLAND. — Plebiscite on Future Status. - Majority for Integration with Gold Coast.

A plebiscite was held under U.N. supervision in British Togoland on May 9 on the future status of the territory, in accordance with the decision taken at the 10th session of the U.N. General Assembly (see page 14672). It resulted in a considerable majority in favour of the territory's integration with the Gold Coast after the latter had achieved independence. Out of a total of 159,304 votes cast, 92,775 were in favour of integration with the Gold Coast and 66,529 in favour of continued British trusteeship under the U.N. The total electorate numbered 194,613.

Integration with the Gold Coast, which was advocated by the Convention People's Party (the ruling party in the Gold Coast), had overwhelming support in the northern part of the territory, where the unionists polled 48,796 votes, against only 12,740 in favour of the continuation of British trusteeship In the south, however, the unionists polled only 43,979 votes, against 53,789 in favour of continued British trusteeship, which was advocated by the Togoland Congress Party. The southern part of British Togoland is inhabited by the Ewes, who also live in French Togoland and whose aim is the eventual unification of the two territories.

The final decision on the future of British Togoland will be taken at the 11th session of the U.N. General Assembly.
(United Nations Information Centre, London) **(14667 A.)**

C. ITALY. — Press. - New Milan Daily.

A new Italian daily newspaper, *Il Giorno*, published its first issue in Milan on April 21. Issued on popular lines, its lay-out differs in many respects from the traditional pattern of the older-established Italian papers. The editor is Signor G. Baldacci, formerly on the staff of the *Corriere della Sera.* (Times)

A. UNITED KINGDOM. — Royal Navy. - Estimates, 1956-57. - The First Lord's Review. - Naval Developments.

The Navy Estimates for 1956-57 were published as a White Paper (Cmd. 9697) on Feb. 23, and are summarized below.

The net total of £346,000,000 for the Navy shown in the White Paper on Defence included the following principal items (1955-56 figures in parentheses): Hulls and Machinery, £36,500,000 (£39,600,000); Armour, Gun Mountings, etc., £10,500,000 (£12,100,000); Aircraft and Repairs, £19,200,000 (£23,100,000); Ship Repairs, etc., £10,600,000 (£14,200,000); Fuel and Lubricants, £18,800,000 (£18,900,000); Stores, Equipment, etc., £37,500,000 (£38,400,000); Guns, Torpedoes, and Mines £3,700,000 (£6,900,000); Ammunition, £11,700,000 (£10,800,000).

The Estimates provided for a manpower strength of 128,000 at April 1, 1956, and for a reduction of about 6,000 during the year. It was stated that the decline in Regular recruiting had been less acute, with some improvement in the engineering mechanic branch, but that entry for several of the smaller branches had again fallen.

As regards re-engagements, about 40 per cent of Naval (and under 20 per cent of Royal Marine) other ranks completing 12-year engagements during 1955-56 had re-engaged to complete time for pension. The proportion of Naval ratings on seven-year engagements who had decided to stay on, however, was very low.

As it was no longer satisfactory to run side-by-side the existing initial engagements of 12 years' continuous service or of seven years' special service, followed in each case by five years in the Royal Fleet Reserve, these had been replaced by a single initial engagement of nine years from entry or from the age of 18 (whichever might be the later). Re-engagement would in the first place be for a further five years' service, and thereafter to a total of 22 years for pension. This would mean that men who at the end of their initial engagement decided not to remain in the Navy would still be young enough to begin again in new jobs.

Changes had also been made in the system of entry and training of officers, and permanent officers of the executive, engineering, supply and secretariat, and electrical branches would be combined into a General List from Jan. 1, 1957. Except for electrical specialists, there would be a common entry of cadets into Dartmouth, and specialization would be decided on midway through their training. In their subsequent careers the officers of the various specializations would all be eligible for certain appointments (the aim being eventually to pool all promotions to the rank of captain and above), but the command of ships and aircraft would necessarily be reserved to officers with suitable experience. This should enable the talents of officers to be used more effectively, and give greater equality in reaching the higher ranks. The minimum age of compulsory retirement for General List officers would be raised to 50.

An accompanying memorandum by the First Lord of the Admiralty (Viscount Cilcennin) stressed that in addition to the Navy's task of keeping the sea lanes free in global war, naval power also played a prominent role in peacetime in supporting Britain's policy throughout the world, and ensuring that her trade continued unmolested. For example, during 1955-56 ships of the Mediterranean Fleet had kept constant watch against the smuggling of arms to Cyprus, Royal Marine commandos had strengthened the Army's security forces, frigates of the East Indies Squadron had patrolled the Persian Gulf and the Arabian coast, and the Royal Navy (including a naval helicopter squadron) had continued to assist the forces fighting the Communist terrorists in Malaya.

A summary of the memorandum presented by the First Lord is given below:

Aircraft-Carriers. The memorandum stated that the construction of the aircraft-carrier *Hermes* and the modernization of the *Victorious* were proceeding satisfactorily. When completed, these ships would be capable of operating "the next generation of naval aircraft," some of which would be able to deliver atomic weapons. Meanwhile, the four front-line carriers now in the active fleet were the *Ark Royal*, *Eagle*, *Albion*, and *Centaur*; these ships and the training carrier *Bulwark* all had angled decks, whilst the *Ark Royal* also had steam catapults H.M.S. *Centaur* would be fitted with steam catapults and improved radar and communications during 1956-57, and would be replaced in the active fleet by H.M.S. *Bulwark*. The light carrier *Warrior* was also about to complete modernization, including the fitting of an angled deck, and other carriers would be brought up-to-date in their turn.

Other New Construction. Work was proceeding well on the three *Tiger* class cruisers (8,000 tons), which would mount fully-automatic six-inch gun turrets. The design of a new type of cruiser with anti-aircraft guided weapons was also going forward, whilst more powerful guided weapons were being designed and would be fitted in future ships During the year two fleet escorts had been ordered, the first of a new and bigger class derived from the successful *Daring* design; these ships would have guided weapons instead of anti-aircraft guns, as well as modern anti-aircraft equipment, radar, and communications. Two more vessels of this type would be ordered during 1956-57.

Fleet Auxiliaries. The force of fleet auxiliaries would also be built up and modernized during 1956-57, and plans prepared for the conversion of the carrier *Triumph* into a heavy repair ship. The conversion of the carrier *Perseus* into a submarine depot ship would also be begun.

Nuclear Power. Pointing out that nuclear power "might well become the main source of propulsion for both naval and merchant ships" in future, the memorandum explained that the Admiralty intended to employ it in the first instance in submarines, but that it had only recently become possible to start practical work on planning a marine nuclear power plant One of the largest submarine-building firms in Britain would co-operate in the project Meanwhile, the submarine had been shown to be capable of great development, both in fighting power and in underwater speed and endurance, and studies were in hand to ensure that the fleet was equipped with the most modern types

Reserve Fleet. The memorandum said that it would not be financially possible to maintain all ships in the high degree of preparedness for mobilization demanded by thermo-nuclear warfare conditions The Reserve Fleet would therefore have to be smaller, with money, manpower, and resources concentrated on the modernization, refitting, and maintenance of those ships which would be manned quickly for service at the outbreak of war A number of ships—mainly destroyers, escorts, and smaller vessels—had been fully refitted, equipped with stores, and manned by skeleton crews, which could be quickly augmented at short notice. Others, although refitted, were not being kept in such a high state of readiness, but could be ready for service in the early stages of a war. As it would be too expensive to bring the remainder up to modern standards, the best ships had been, or would be, made available to friendly navies, and the rest would be scrapped.

Naval Strength. The present strength of the Royal Navy was given as follows

Ships in the Operational Fleet, or preparing for service Total 187, including 2 fleet aircraft-carriers, 2 light fleet aircraft-carriers, 9 cruisers, 8 *Daring* class ships, 21 destroyers, 28 frigates, 2 fast minelayers, 1 netlayer, 44 submarines, 37 minesweepers, 26 coastal craft, 7 landing vessels.

Ships engaged in trials and training Total 67, including 3 light fleet aircraft-carriers, 1 guided weapons trial ship, 1 cruiser, 2 destroyers, 24 frigates, 28 minesweepers, 3 coastal craft, 1 tank landing ship

Fleet support and auxiliaries. 47 vessels.

Ships under construction: Total 108, including 1 light fleet aircraft-carrier, 3 cruisers, 23 frigates, 2 submarines, 69 minesweepers, 10 coastal craft

Ships in reserve or in dockyards for refit, modernization, or conversion. Total 554, including 3 fleet aircraft-carriers, 4 light fleet aircraft-carriers, 5 battleships, 12 cruisers, 44 destroyers, 110 frigates, 1 fast minelayer, 15 submarines, 190 minesweepers, 41 coastal craft, 54 tank landing vessels, 1 net layer, 1 destroyer depot ship, 1 aircraft repair ship, 2 repair ships, 1 aircraft maintenance carrier, 8 maintenance ships, 1 survey ship, 6 controlled minelayers, 52 boom defence vessels, 1 de-gaussing vessel, 1 radar training ship

Research and Development. The memorandum explained that most of the extra money required during 1956-57 would be used in developing guided missiles and nuclear propulsion plant for the Navy, and valves and electronic devices for all three Services. New facilities for hydro-ballistic research were expected to be completed during the year, and would facilitate the study of the behaviour of hulls moving at high speeds under water A new form of anti-submarine "attack teacher" was being developed and an action speed "tactical teacher" of advanced design would be installed at the R.N. Tactical School during 1956 The Admiralty would also take part in the activities planned for the International Geophysical Year.

The Navy Estimates were passed by the House of Commons on March 8 without a division.

Mr. George Ward (Parliamentary and Financial Secretary, Admiralty) said that all the major powers—including Russia, which in recent years had accelerated the building of an already very powerful fleet—recognized the fact that the advent of thermo-nuclear weapons had not diminished the need for navies. Fortunately, if war came the Royal Navy would not stand alone but would form part of the combined NATO fleet.

Even if unlimited money and men were available, Mr. Ward continued, it was very doubtful whether Britain would want anything like the large concentrations of warships of the past New weapons and guided missiles would give navies a far greater hitting power, and battle groups, though smaller, would be more formidable in attack and defence, easier to disperse, and quicker to re-concentrate. The principal striking power of the Navy today was provided by a balanced force of aircraft operating from floating bases, and a programme had been drawn up for fitting all carriers with steam catapults and more powerful arrester gear to enable them to operate the *N.113* and *DH 110* (see 14122 A) The *N.113* would for the present be fitted with four 30-mm Aden guns only, since it had been found that the original intention of fitting both guns and guided weapons would make it too heavy, it would, however, be able to carry an atomic bomb and have good range and speed, whilst the possibility of arming later versions with guided weapons instead of guns was being investigated. The development of the *DH.110*, which would carry guided weapons, was progressing well. Meanwhile, the re-equipment of the Fleet Air Arm with *Sea Hawk* day fighters, *Sea Venom* all-weather fighters, anti-submarine *Gannets*, and *Wyverns* for the strike role had been almost completed, and the only piston-engined aircraft still in the front line were the American *Skyraiders* for radar early warning; these would later be replaced by a special version of the *Gannet*.

After saying that helicopters were proving very efficient at operating asdic sets from the air, and that the Government were also investigating the possible use of helicopters for minesweeping, Mr Ward stated that the first of the new experimental high-speed submarines would be ready for acceptance in April, whilst the second would be completed later in 1956, these submarines would be extremely useful for developing anti-submarine techniques against targets with high submerged speeds. As regards research into nuclear-powered propulsion, Vickers Ltd were setting up a subsidiary company to be known as Vickers (Nuclear Engineering) Ltd., though great possibilities for nuclear propulsion of warships would open up when nuclear power became cheaper and more plentiful, the laying down of a nuclear submarine was "by no means imminent," the first step being to test a nuclear propulsion plant on land

Mr. Wingfield-Digby (Civil Lord of the Admiralty) announced in the ensuing debate that a high-level committee had been set up "to examine the organization at the Admiralty and out-stations (including the dockyards) for dealing with requirements in material, from research to production, and the repair of ships and weapons, and to make recommendations" The members of the committee would be Sir Barclay Nihill, Lieut.-Col. Eustace Smith, of Smith's Docks Co. Ltd ; Mr. W W Watt, managing director of the British Oxygen Co. Ltd.; Admiral Sir Michael Denny, former C.-in-C., Home Fleet, Rear-Admiral Dawnay, Deputy Controller; and Mr. J. F. Mountain, an under-secretary at the Admiralty.

Important developments in connexion with the Royal Navy during recent months are summarized below :

New Submarines and Equipment. H M S. *Porpoise*, the first fighting submarine of conventional type to be laid down in Britain since the war, and the first of six submarines of this class, was launched by Vickers-Armstrong Ltd at Barrow on April 25. Described as "an interim stage between the 'T' and 'A' classes built during the war and the more radical conceptions of the future," the *Porpoise* is 295 feet long and will be powered by diesel-electric engines of advanced design to give the maximum underwater speed possible with this type of propulsion

H M S. *Explorer*, the first of two experimental submarines to be fuelled by high-test peroxide (see 13493 A), and having an underwater speed of over 20 knots, was commissioned on May 8. It was explained that the *Explorer* and her sister ship, the *Excalibur*, would be unarmed and would be used as underwater targets for training surface forces to combat fast submarines. The principle involved in their propulsion was the break-up of concentrated hydrogen peroxide into water and oxygen, and the combination of the free oxygen with diesel fuel to produce steam and carbon dioxide to drive a turbine One advantage of this method was that no exhaust bubbles reached the surface, since the steam became water and the carbon dioxide was dissolved in the sea. As it was not intended that the submarines should run constantly on the very expensive high-test peroxide fuel, they would also be fitted with conventional diesel-electric engines, and would use their high-test peroxide turbines only for special bursts of speed when attacking and escaping

On June 15, 1955, the Admiralty had announced that the first sea trials of a one-man escape chamber—with which all future British submarines were likely to be equipped—had been successfully carried out in Loch Ewe from H M submarine *Solent* It was explained that the escape chamber was operated from within the submarine and that the escaper came to the surface using the "free ascent" method (without the aid of any breathing apparatus) on one deep breath taken before leaving the submarine. The trials had comprised six ascents, three from a depth of 80 feet and three from a depth of 128 feet. It was hoped that the new method would be effective to depths of 300 ft.

New Frigates. Details were published on March 27, 1956, of the frigate H.M S. *Hardy*, the first of the *Blackwood* class of 12 "second rate" frigates of about 1,000 tons displacement The *Hardy*, with an all-welded, lightweight hull designed for speed and fabricated in sections for rapid construction, is equipped with two three-barrelled anti-submarine mortars, firing projectiles which can be set to explode at a pre-determined depth She is also armed with three 40-mm. Bofors anti-aircraft guns and two twin torpedo-tubes.

H.M.S. *Torquay*, the first of the *Whitby* class of six "first rate" frigates of about 2,000 tons, also equipped with three-barrelled anti-submarine mortars, was commissioned on May 8

The Reserve Fleet and the Disposal List. The Admiralty announced on Sept. 12, 1955, that H.M.S. *Vanguard* (43,500 tons displacement), Britain's largest and only operational battleship, would be placed in reserve when she had completed her refit The manpower thus released would be used for "the commissioning of a guided weapons trial ship (H M.S. *Girdle Ness*) and for retaining in commission certain small ships of particular value to the Fleet at the present time." Meanwhile, the *Vanguard* would be kept at a high state of readiness to enable her to be quickly put into active service if necessary.

[The *Vanguard*, completed in 1946 at a cost of £9,000,000, carried the late King George VI and the Royal Family to South Africa in 1947—see 8413 A.]

On Sept. 26 the Admiralty further announced that 22 vessels had been placed on the disposal list, including the aircraft-carrier *Indomitable* (23,500 tons, launched in 1939), the light cruiser *Argonaut* (launched 1941), the submarine depot ship *Montclare* (19,600 tons), and 10 destroyers and frigates.

New Naval Uniform. The Admiralty announced on March 9 that an improved uniform for seamen of the Royal Navy would come into use in 1956. Whilst retaining the traditional "square rig" of collar, jumper, and bell-bottomed trousers, it would have a new coat-style jumper and smoother serge cloth. Uniform caps with detachable white plastic crowns would also eventually replace the existing white caps worn during the summer months.

New "Junior Rating." The Admiralty also announced on the same date that from April 1 the rating of "boy" (first used over three centuries ago) would be replaced by that of "junior rating," and that this method of entry into the Navy, previously confined to the seaman branch, would be extended to include the electrical and engineering branches and the Fleet Air Arm.

Naval Appointments. The following senior appointments were announced in recent months (dates of announcement in parentheses) ·

Admiral Sir Charles Lambe, lately C -in-C , Far East, as Second Sea Lord and Chief of Naval Personnel in succession to Admiral the Hon Guy Russell, with effect from October, 1955 (June 16, 1955).

Admiral the Hon. Sir Guy Russell to succeed Air Chief Marshal Sir Arthur Sanders as Commandant of the Imperial Defence College, with effect from Jan 1, 1956 (June 16, 1955)

Admiral Sir Mark Pizey, Chief of Naval Staff, Indian Navy, as C.-in-C , Plymouth, *vice* Admiral Sir Alexander Madden, with effect from Nov. 1955 (June 24, 1955).

Vice-Admiral W G A. Robson as C.-in-C., South Atlantic, *vice* Vice-Admiral Sir Ian Campbell, with effect from May 1, 1956 (Nov 30, 1955).

Rear-Admiral Royston Hollis Wright, Commodore of the R N. Barracks, Devonport, as Assistant Chief of Naval Staff in succession to the late Rear Admiral M G Goodenough, with effect from mid-January. Rear-Admiral Wright was also promoted to flag rank (Jan. 6, 1956).

Rear-Admiral H W Biggs as C.-in-C., East Indies, *vice* Vice-Admiral Sir Charles Norris, with effect from August 1956 (March 8)

Vice-Admiral J. P L. Reid as Third Sea Lord and Controller of the Navy *vice* Admiral Sir Ralph Edwards, with effect from October 1956 (March 22, 1956)

A statement on the naval position was also made by Viscount Cilcennin in the House of Lords on May 9.

Replying to criticisms of the delay in supplying modern naval aircraft, the First Lord said that after "disappointing delays" new types of aircraft were beginning to come along, the picture being "nothing like as slack as it was six months ago" In particular, the *N 113* and *DH 110* (see above) had successfully completed their deck-landing trials, and offered "every hope for the future" The suggestion that American aircraft should be used to re-equip the Navy was "not as practical as it seems," for U S. naval aircraft of the next generation would be too big for the lifts of British carriers, and Britain was not building carriers of the size of the 60,000-ton U S.S. *Forrestal*

Turning to capital and other large ships, the First Lord stressed that the *Vanguard* would still be a useful vessel and had been earmarked for assignment to NATO in an emergency. The four *King George V* class battleships (35,000 tons) had not been modernized, but it would be premature to scrap them until it was known that they had reached the end of their useful lives. Meanwhile they were being held in reserve at very little cost, the possibility of converting them into platforms for guided weapons having been examined and rejected The Admiralty could not afford to build more cruisers until it was known what future weapons would be. Meanwhile, the most significant step for many years was the conversion of the *Girdle Ness* (originally a merchant ship which had been converted into a depot ship) for guided missile operations. The *Girdle Ness* had been chosen because her hull was particularly suitable, whereas in the case of a cruiser much more conversion work would have been necessary.

The First Lord added that since the new pay rates came into operation, the rates of transfer to long engagements had shown a distinct improvement. Recruitment was also 40 per cent better than a year ago —(Cmd 9697 - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Royal Navy, 14122 A ; Naval Appointments, 14239 B.)**

A. JORDAN. — Financial Aid from Iraq and Egypt.

It was announced in Baghdad on March 14 that Iraq would make a £1,000,000 loan to Jordan as a contribution to a superphosphate project to be established in that country by the economic organization of the Arab League (see 14658 D). A grant of £625,000 had earlier been made by Iraq to Jordan for the some purpose, as well as a contribution of £100,000 towards the expenses of the Jordanian National Guard.

The Egyptian Government announced on March 18 that it had made a grant-in-aid of £E.100,000 towards the upkeep of the Jordanian National Guard. (Times - Daily Telegraph)

B. SOUTH AFRICA.—Dr. Jonker joins National Party.

Dr. A. H. Jonker, Conservative M.P. for the Cape constituency of Gardens, crossed the floor of the House on April 20 to sit with the National Party. Dr. Jonker was elected to the Gardens seat as a United Party candidate in 1948 and again in 1953, but after being expelled from the U.P. (see 13431 D) he helped to form the new National Conservative Party in November 1954.—(Cape Times) **(Prev. rep. 14003 B.)**

A. ARGENTINA. — Suppression of Anti-Government Plots. - Armed Forces placed under Wartime Regulations. - Confiscation of Former Peronistas' Property. - Ex-President Perón granted Asylum in Panama. - Abolition of Prostitution. - Divorce made Illegal. - National Wage Increase. - Cabinet Changes. - Abolition of Peronista Constitution. - Restoration of 1853 Constitution.

A decree was issued on April 6 placing the Argentine armed forces under wartime regulations, and thereby making them subject to summary jurisdiction for acts of rebellion. Explaining that it was the Government's duty to utilize all legal resources "to bring to an end most rapidly, energetically and efficiently those acts by which the morale, discipline and spirit of the armed forces could be disturbed," the decree stated: "Military personnel who commit any act of rebellion or conspiracy, or propose to do so, or to execute any subversive activity or instigate others into doing the same, will be judged by the respective military tribunal under verbal or summary processes established for time of war."

The promulgation of the decree followed a series of plots against the Government of President Aramburu since his assumption of office by *coup d'état* in November last. Although little information about the plots was published officially, the arrest and subsequent compulsory retirement of a number of Service officers indicated that the armed forces had been implicated in a number of cases.

On Dec 8, 1955, the chief of police in Mendoza Province (a retired general) and a number of other senior officers and civilians were arrested for allegedly plotting against the régime, the Governor of the province stating that the provincial police had retained "all the features typical of Perón's régime" On Dec. 19 the Director-General of the Army issued a communiqué announcing that 24 persons had been arrested in connexion with an alleged plot in the city of La Plata aimed at creating public unrest, whilst on Dec 21 the Government Press Office announced that five retired soldiers and 13 civilians had been arrested in the city of Mendoza.

On Dec. 30 the Argentine Press Secretariat announced the names of 125 persons who had been arrested as "agitators" in the Federal capital and in the provinces of Buenos Aires and Santa Fé, and placed on board a naval vessel in Buenos Aires harbour, they included three former secretaries-general of the General Confederation of Labour under the Perón régime—José Espejo, Eduardo Vuletich, and Hector Di Pietro. A further alleged plot against the Government was reported in mid-January, the Government announcing on Jan. 23 that several groups of "subversive" plotters had been arrested; no official statement was issued as to the number of those arrested, but unofficial estimates varied between 85 and 300 A further anti-Government plot was reported at the beginning of April in Mendoza, where some 100 people were said to have been arrested.

Other developments in Argentina since December last are summarized below:

Confiscation of Peronistas' Property. A decree was issued on Dec. 9, 1955, freezing the properties of individuals and companies accused of having made illicit fortunes under the Peronista regime, with a view to their confiscation. It was stated that the proceeds of the confiscated property would be used for housing poor people and for developing Argentina's petroleum industry. The decree also provided for the setting-up of a National Assets Recovery Board to hear objections by those affected, and to administer all the recovered property. The decree gave a long list of firms and individuals affected, including Señor Peron himself and most of his Cabinet Ministers, among the firms listed were the Argentine agencies of the German concerns of Daimler-Benz, Hanomag, Borgward, Bosch, Siemens, Fahr, and Klockner-Humboldt, all of which had established themselves in Argentina since the end of the war. The assets of a further 97 companies were frozen on Dec. 26 and of another 360 individuals on Dec 27 On March 9, 1956, it was announced that the assets of 17 individuals and concerns had been taken over and placed in the special fund, as the owners had failed to justify their ownership and acquisition of these assets

Other Measures against Peronistas. Under a decree promulgated on March 1 all former officials under the Peron régime were barred from holding elective office in future; the decree applied to all offices from Mayor to Cabinet Minister A second decree published on the same day forbade the use for political propaganda of symbols, photographs, or emblems relating to the Peronista party.

Eighteen of the leading collaborators of ex-President Perón left Buenos Aires in a naval aircraft on Jan 9 for banishment to Tierra del Fuego, in the far south of Argentina They included Señor Alejandro Leloir, former chairman of the Peronista Party; General Gamboa, former police chief; Señor Aloe, ex-Governor of Buenos Aires province, and a number of former Cabinet Ministers [As Argentina has been officially under a state of siege since November last, banishment under such circumstances is permitted under the Constitution].

A decree was approved on April 6 providing for the dissolution of the National Investigating Commission, which had been appointed to report on irregularities committed during the Peronista régime. Where investigations already undertaken suggested that crimes had been committed, the cases will be passed to the courts for further action, whilst incomplete inquiries will be continued by the Government department concerned

Political Asylum in Panama for Senor Perón. The former President of Argentina was granted political asylum in Panama on Feb. 29, 1956. He had been living in Panama since early November after fleeing from Argentina to Paraguay.

Dr. Bramuglia, formerly Foreign Minister under President Perón, arrived in Montevideo by canoe on Nov. 28 and requested political asylum in Uruguay

Church-State Relations. - Abolition of Prostitution. - Prohibition of Divorce. On Dec. 6 the Government ordered the closing of all brothels in Argentina, the legalization of which by the Perón régime had been one of the reasons for the break between the former regime and the Roman Catholic Church. The law allowing divorce in Argentina, also passed by the Perón régime against strong clerical opposition, was suspended on March 2, 1956.

A third subject of dispute between the Perón regime and the Church, that of Church control of religious education in schools, led to student riots in May and to an offer to resign by the Minister of Education, Dr. Dell'Oro Maini. Various schools and university buildings were occupied by liberal students in protest against the alleged extreme nationalism of Dr. Dell'Oro, his slowness in dismissing known Peronista teachers from their posts, and his alleged desire to reintroduce Church control of religious teaching, other schools were occupied by Catholic students supporting Dr. Dell'Oro, some clashes occurring between the two factions

It was reported from Rome on March 26 that the Vatican had revoked the excommunication edict against Señor Remorino, the former Argentine Foreign Minister, which had been issued after the deportation of two Roman Catholic prelates in June 1955 (see 14277 A) It was understood that the revocation of the excommunication order indicated that Señor Remorino had made a formal act of penance and submission to the Church

Ineligibility of Ministers for Elective Office. Under a decree issued by President Aramburu on Dec. 23, 1955, all members of his Government were made ineligible for elective office. The decree declared that the revolution had not been fought "to serve the personal ambitions of anyone or any party," and reassured the nation that it would be able to decide freely what type of government it wanted President Aramburu said that the basic tenet of the revolution which deposed President Perón was that the present Government was strictly provisional in character.

A similar decree, issued on Dec 21, had prohibited members of the armed forces from participating in elections

National Wage Increase. A nation-wide wage increase of 10 per cent was sanctioned by the Argentine Government on Feb. 18 to meet the rising cost of living. The decree also established a basic minimum wage of 1,120 pesos a month for men and women workers who had attained the age of 22. The wage increase was stated to be a temporary measure pending a revision of various collective labour agreements which had recently lapsed

Cabinet Changes. The Minister for Air, Brigadier Amada Abrahim, resigned on Jan 3, 1956, and was succeeded by Commodore Julio Cesar Krause, hitherto Under-Secretary at the Air Ministry.

The Minister of the Interior, Dr Eduardo Busso, resigned on April 27 following charges that he was implicated in a revolutionary conspiracy, at his request the President appointed a five-man court of honour to inquire into the allegations

Señor Carlos Adrogue was sworn-in on May 17 as Minister of Education in succession to Dr. Dell'Oro Maini (see above).

President Aramburu announced on May 1 the revocation of the Peronista Constitution of 1949 and the restoration of the liberal Argentine Constitution of 1853.—(New York Times - New York Herald Tribune - Bank of London and South America, Fortnightly Review - Times - Manchester Guardian - Le Monde, Paris) **(Prev. rep. 14600 C; 14553 A.)**

B. NETHERLANDS - UNITED STATES. — Treaty of Friendship, Trade, and Navigation.

A treaty of friendship, trade, and navigation between the Netherlands and the U.S.A. was signed at The Hague on March 27 by Dr. Luns, the Netherlands co-Foreign Minister, and Mr. H. Freeman Matthews, the U.S. Ambassador. The Netherlands Ministry of Foreign Affairs stated that the treaty would facilitate the economic activities of nationals of each country in the other; regulated the rights enjoyed by each country's nationals in the other, and the mutual treatment of exports and shipping; laid down rights and privileges for investments by nationals of each country in the other; and contained general provisions on trade policy in conformity with the rules of GATT and of the International Monetary Fund. (New York Times - Netherlands News Agency)

C. INDIA. — Decimal Coinage. - Introduction in 1957.

It was announced in New Delhi on May 1 that the Government of India had decided to bring the Indian Coinage (Amendment) Act of 1955 into effect on April 1, 1957, from which date the new decimal coinage system would be introduced. The lowest currency unit in the new system will be the *naya paisa*, 100 of which will be equal to one rupee.—(The Statesman, Calcutta - Indian High Commissioner's Office, London) **(Prev. rep. Decimal Coinage, 14430 F.)**

A. UNITED STATES. — President Eisenhower's Veto of Natural Gas Bill. - Criticism of Excessive Lobbying. - Appointment of Senate Bipartisan Committee.

A Bill to exempt natural gas producers from Federal price control was vetoed by President Eisenhower on Feb. 17, after it had been passed by the Senate on Feb. 6 by 53 votes to 38 and by the House of Representatives on July 28, 1955, by 209 votes to 203. The President's decision to veto the measure arose out of strong criticism expressed by many Senators during the debate that excessive pressure to vote for the Bill had been put upon them by interests favouring its passage. In particular, Senator Case (Rep.) stated on Feb. 3 that $2,500 in cash had been contributed for his re-election campaign in the apparent belief that he would vote in support of the Bill; he added that he had ordered the return of the money to its donor on learning that it had been sent by a lawyer "interested in passage" of the measure.

In his veto message the President said that evidence had accumulated since the passage of the Bill indicating that "private persons, apparently representing only a very small segment of a great and vital industry, have been seeking to further their own interests by highly questionable activities" These had included efforts "so arrogant and so much in defiance of acceptable standards of propriety as to risk creating doubt among the American people concerning the integrity of governmental processes." "I believe I would not be discharging my own duty," the President declared, "were I to approve this legislation before the activities in question have been fully investigated. . . ." President Eisenhower nevertheless expressed regret at having to veto the Bill, saying that he was in agreement with its basic objectives and that he believed some such legislation was needed.

On Feb. 22 the Senate decided by 79 votes to one (Senator Langer, Rep.) to set up a bipartisan committee to inquire into lobbying and corrupt political practices. The committee (whose term will expire on Jan. 31, 1957) was instructed "to investigate . . . attempts to influence improperly or illegally the Senate or any members thereof, or any candidate therefor, or any officer or employee of the Executive branch of Government, through campaign contributions, political activities, lobbying, or any and all other activities or practices."

The committee's membership was subsequently announced as follows. Democrats—Senators John L. McClellan (chairman), Albert Gore, Clinton P Anderson, and John F. Kennedy; Republicans —Senators Styles Bridges, Edward J. Thye, Barry Goldwater, and William A Purtell. As well as being divided equally between Democrats and Republicans, the committee was divided equally between supporters and opponents of the Natural Gas Bill.

A special Senate committee under Senator Walter F. George (Dem.), which had been set up earlier to inquire into Senator Case's allegations, published its findings on April 7.

Although the committee found that no bribe or attempted bribe had been involved in the incident, it criticized Mr. Howard B Keck, president of the Superior Oil Company of California, for "remarkable laxity" in supervising the activities of Mr. John M. Neff and Mr. Elmer Patnam, the two lawyers whom he had entrusted with making contributions to supporters of the Natural Gas Bill from his "personal funds." The two lawyers themselves were "severely censured for their failure to act as responsible citizens," their activities being described by the committee as "galloping irresponsibility." "In utter disregard of his legal knowledge and training," the report added, "Mr Neff acted with consumate indiscretion in making his promiscuous contacts."

The committee also called on the Department of Justice to look into "any other possible violations of Federal statutes," and advised Congress to consider tightening the laws governing lobbying and campaign contributions.

(New York Times - New York Herald Tribune)

B. INDIA. — New Ministers. - Natural Resources Ministry to control New Oil Refineries.

It was announced in New Delhi on April 30 that Mr. Manharlal Shah (a member of the Council of States) had been appointed Minister of Industrial Development and would be attached to the Ministry of Commerce and Industry, whilst Dr. Mono Mohandas (a member of the House of the People) had been appointed Deputy Minister and would be attached to the Ministry of Education.

On March 19 the Minister for Education, Natural Resources, and Scientific Research (Dr. Maulana Azad) had announced that the control of new oil refineries which might be set up in future would become the responsibility of the Ministry of Natural Resources. The Ministry of Production would, however, retain the supervision of the recently established oil refineries in Bombay. The arrangement concerning new refineries in the public sector would cover the establishment of a refinery at Calcutta, in accordance with the proposals of the Assam Oil Company.—(The Hindu, Madras - The Statesman, Calcutta)
(Prev. rep. Cabinet, 14698 E; Oil Refineries, 14103 A.)

C. SOVIET UNION. — The Yakutia Diamond Fields.

The Soviet Minister for Geology and Conservation of Natural Resources, M. Antropov, disclosed on March 6 that very large deposits of diamonds, claimed to equal or surpass those of South Africa, had been discovered in Yakutia (a large and remote area of northern Siberia) in 1954 by Soviet geologists. He also announced that extensive deposits of coal, iron-ore, gold, silver, rock-crystal, mica, and other valuable minerals had been found in Yakutia.

After pointing out that the U S.S R had hitherto possessed virtually no diamond deposits—as far as had been known—except in the Urals, and there only in insufficient quantities, M. Antropov described the discovery of the Yakutia deposits as "an event of colossal importance for our country," the significance of which it was "difficult to over-estimate." He said that the Yakutia diamonds were of both gem and industrial quality; that their discovery would break the South African "monopoly" of precious stones; and that "apart from the wide use to which diamonds can be put in industry, they can prove a first-rate source of income to increase our holdings of foreign currency."

The discovery of the Yakutia diamond deposits, as well as of extensive deposits of ferrous and non-ferrous metals, gold, mica, etc., was widely featured in the Soviet newspapers, which forecast that Yakutia would eventually become one of the principal industrial regions of the U.S.S.R. In outlining the objectives of the Sixth Five-year Plan at the recent Communist Party congress (see 14745 A), Marshal Bulganin had declared that "one of the most remarkable discoveries in recent years is the existence of rich diamond deposits in the Yakut autonomous area."

D. RHODESIA AND NYASALAND FEDERATION. — Immigration Figures, 1954 and 1955.

Statistics recently published by the Central African Statistical Office showed that 20,013 immigrants entered the Federation of Rhodesia and Nyasaland during 1955, compared with 16,275 in 1954. Immigration thus continued to show a rising trend, figures for the years since 1950 having been: 1950—22,934; 1951—24,196; 1952—21,291; 1953—17,696.

Of the 1955 total, 17,179 immigrants were European British subjects, including 7,736 from the United Kingdom, 8,498 from South Africa, 631 from other parts of the Commonwealth, 182 from elsewhere, and 132 naturalized British subjects. European alien immigrants totalled 2,400, the largest contingents being 786 Portuguese, 520 Netherlanders, 376 Italians, and 244 Greeks. Of 434 Asian immigrants, all except one were from British Commonwealth countries.

In 1954 European immigrants had numbered 15,781 and Asian and Coloured immigrants 494, whilst the 1953 totals had been 16,616 and 1,080 respectively.

Of the 1955 total, 12,729 went to Southern Rhodesia; 6,408 to Northern Rhodesia; and 876 to Nyasaland The capital declared by immigrants was £2,827,000.

Lord Malvern, the Federal Prime Minister, stated on April 26 that the Federal Government had decided for the time being to keep future immigration to the 1955 total of 20,000, in order to avoid creating financial difficulties by bringing in more immigrants than the Federation could support.

E. HUNGARY. — Pardon for Archbishop Grösz.

The Austrian Catholic Press Agency (*Kathpress*) reported on May 11 that Mgr. Jozsef Grosz, Roman Catholic Archbishop of Kalosza, had been pardoned by the Hungarian Government. Archbishop Grosz had been sentenced in 1951 to 15 years' imprisonment on charges of attempting to overthrow the regime, but his imprisonment had been suspended in October 1955, though he had remained confined to a monastery.

Budapest Radio announced on May 13 that the Archbishop had been received on the previous day by the Hungarian Prime Minister, M. Hegedus, and had promised him that he would in future act as "a faithful son of the Republic." M. Hegedüs had thereupon informed him that the Government had no objection to his resuming his episcopal duties.

F. NORWAY. — Cabinet Appointment.

Hr. H. J. Lobak became Minister of Agriculture in the Gerhardsen Cabinet on May 14, in succession to Hr. Olav Meisdalshagen. Hr. Lobak, a farmer, has been a Labour member of the *Storting* since 1945.—(Aftenposten, Oslo)
(Prev. rep. 14562 A.)

MAY 19—26, 1956

A. BAGHDAD PACT. — Ministerial Meeting. - Economic Co-operation Projects. - Closer U.S. Association with Baghdad Pact Organization. - Full U.S. Membership of Economic and Counter-subversion Committees.

The second annual meeting of the Council of the Baghdad Pact was held in Teheran from April 16-19 under the chairmanship of M. Hussein Ala, the Prime Minister of Persia. Of the other member-countries, Turkey, Pakistan, and Iraq were represented by their Prime Ministers (respectively M. Menderes, Chaudhri Mohammad Ali, and General Nuri es-Said) and Foreign Ministers, and Great Britain by Sir Walter Monckton, the Minister of Defence. A strong delegation of U.S. observers, including senior officers of the three armed services, was headed by Mr. Loy Henderson, chief administrative officer at the State Department and formerly Ambassador in Teheran.

During the meeting Mr. Henderson announced that the United States would extend its co-operation with the Baghdad Pact countries through the following measures. (i) full membership of the Economic Committee and the Counter-subversion Committee of the Baghdad Pact; (ii) the establishment of a U.S. military liaison office in Baghdad, headed by a general or flag officer; (iii) a contribution to the cost of the permanent General Secretariat to be set up by the member-countries; (iv) continuation of bilateral economic and technical aid to member-countries, and (v) continuation of military aid programmes "on a basis that will take into consideration the aims of the pact." Mr. Henderson added that the U.S.A. would give "sympathetic consideration" to all projects for regional development, and would be "prepared to discuss them with the member-countries either on a bilateral or multilateral basis."

The closer American co-operation announced by Mr Henderson was warmly welcomed in all the member-countries of the Baghdad Pact. A spokesman of the British Foreign Office said that the Baghdad Pact would be "significantly strengthened by this American action, which is a conclusive reply to the suggestion that the U S A. is reluctant to support the pact"

A communiqué—summarized below under cross-headings—was issued at the end of the conference, announcing *inter alia* a number of measures to promote the economic development of the Baghdad Pact area.

General Principles. The communiqué emphasized that the member-countries adhered fully to the principles of the United Nations, on which the Baghdad Pact itself was based. After stressing that the pact was wholly defensive in character, the member-countries declared that "while determined to defend themselves against aggression, they desire at the same time to live in peace with all governments and peoples."

Resistance to Communism. After considering the reports of the various committees of the Baghdad Pact Organization, the Council expressed the opinion that "although there was a change of tactics, the basic objectives of international Communism remain unchanged." Accordingly, there could be "no relaxation of measures designed to strengthen the defensive capacity of the area."

Criticisms of Baghdad Pact. "In the view of the Council" (the communiqué continued) "the criticism and attacks from neutralist and other sources directed against the Baghdad Pact . . spring largely from lack of knowledge and misunderstanding of its true purposes It is the hope of the Council that as these purposes become better known, these criticisms will give way to sympathetic and active co-operation and that the Baghdad Pact will become, as it is intended to be, a unifying factor among the peoples in the region who wish to preserve a free and democratic way of life Meanwhile these criticisms and attacks can only help to keep the region divided and weak, and member-countries have decided to counter them actively and resolutely."

Problems of Baghdad Pact Area. The communiqué said that "specific problems causing tension in the area" had been "discussed thoroughly in a spirit of mutual comprehension" After emphasizing the need for "an early settlement of the Palestine and Kashmir disputes," it added · "In the midst of this troubled political situation, it was the Council's conviction that the Baghdad Pact offered the best means of safeguarding peace and stability and of promoting the welfare and unity of the area, while at the same time effectively serving the cause of world peace."

Economic Co-operation. The Council approved the following measures recommended by its Economic Committee (1) the establishment of a training centre in the use of agricultural machinery and for studies in soil and water conservation; (2) joint training centres for anti-malaria operations and health education, (3) joint surveys in locust control, control of pests, etc., (4) co-ordination of research in certain fields, and exchanges of scientific and technical information and personnel. It was urged that these recommendations should be implemented without delay.

After noting with satisfaction that an Atomic Energy Centre for the area was to be opened in Baghdad in January, 1957, the Council drew special attention to "the importance of joint projects of mutual interest to one or more member-countries." It decided to set up a technical committee in Ankara, consisting of members of interested Governments, "to make a preliminary study of the possibility of a joint development plan for the water resources of the Tigris-Euphrates basin (see 14884 A), and to make recommendations for any further detailed studies which may be required"

The Council also decided to set up a working party (meeting in Teheran in June 1956) "to consider means whereby regional projects of interest to two or more members could be studied and implemented through economic and technical assistance." In this connexion the Council recognized "the far-reaching need for regional co-operation and joint projects in the fields of industry and communications."

American Co-operation with Baghdad Pact. The Council welcomed "the active participation of the United States in the work of the pact organization", declared that "active and continuing U.S support for the pact and its objectives is an essential factor in the strengthening and development of member-countries, and in the realization of their peaceful aims", and noted that the U.S.A. had "reaffirmed its solid support of the pact and had stated that it would continue to lend support to the individual and collective efforts of member-nations to attain the political, economic, and social objectives of the pact"

The U S proposals for closer co-operation with the Baghdad Pact Organization, announced by Mr. Henderson, were 'welcomed and accepted" by the Council. It was pointed out—in connexion with full U S. membership of the Economic and Counter-subversion Committees—that the terms of reference of these two committees "provided for an extension of membership to non-signatory governments at the discretion of the Council."

Permanent Organization to counter Subversion. With the aim of combating subversion in the Baghdad Pact area, the threat of which still existed, the Council decided to set up "a permanent organization under the administrative control of the Secretary-General." The communiqué said in this connexion "The Council recognized that while the threat of subversion could be countered with measures designed to expose its real nature, and to give the widest publicity to the aims and activities of the pact, the essence of combating subversion lay in the eradication of the conditions in which it thrives —namely, economic under-development and defensive weakness. Both must be remedied as soon as possible."

The creation of a permanent organization to combat subversion had been recommended by the Counter-subversion Committee, which had met in Teheran early in April to consider methods of combating Communist and other subversive activities in the Baghdad Pact area.

Military Co-operation. In the light of reports submitted by its Military Committee, the Council decided "to expedite all necessary further measures for the defence of the Baghdad Pact countries." It noted that "considerable progress has already been achieved in the military sphere."

Next Ministerial Meeting. It was decided that the Council of Ministers should hold its next meeting at Karachi in January 1957.

Other recent developments in the Baghdad Pact area are summarized below under cross-headings:

Anglo-Turkish Discussions. During his Middle Eastern tour after returning from the SEATO conference, the British Foreign Secretary (Mr. Selwyn Lloyd) visited Ankara on March 11-12 for discussions with the Turkish Prime Minister, M Menderes, and the Foreign Minister, Professor Koprulu. A joint declaration reaffirmed the support of both Governments for the Baghdad Pact and the North Atlantic Treaty, and declared that they were "determined to do all in their power to ensure the effectiveness of these treaties." It added: "The unity of action between Turkey and Great Britain neither constitutes a threat to any other country nor endangers the legitimate aims or aspirations of any State NATO and the Baghdad Pact are purely defensive alliances in complete conformity with the provisions of the U.N Charter; and the military provisions of these organizations constitute the strongest assurance and guarantee of peace. They have also important economic and other aspects which both Governments intend to develop."

Turkish Ministerial Visit to Pakistan. M Menderes and Professor Koprulu paid an official visit to Pakistan from March 18-25 during which they had discussions in Karachi with the Pakistani Prime Minister, Chaudhri Mohammad Ali, and the Foreign Minister, Mr. Hamidul Huq Choudhry They attended the proclamation of the Islamic Republic of Pakistan (see 14769 A) on behalf of the Turkish Republic, were received by the President of Pakistan, General Iskander Mirza, and visited Lahore, Dacca, and other centres. President Mirza and Chaudhri Mohammad Ali accepted an invitation to visit Turkey.

A communiqué was issued at the end of the visit declaring that both countries "repose their full faith in the Baghdad Pact, which is a purely defensive organization and is not directed against the national interests of any country" After saying that the pact had proved itself to be "an organization with effective possibilities for the development and stability of the Middle East," the communiqué added "Strengthened and developed, the pact will become an important instrument for the settlement of the problems facing the region. The Prime Ministers of Turkey and Pakistan therefore pledge their unwavering support of the pact and undertake to do all in their power to make it an effective organization . . . "

Turkish Reply to Egyptian Attacks on Baghdad Pact. Recent Egyptian press attacks against the Baghdad Pact, and in particular against the Turkish Government and M. Menderes, were answered in a broadcast from Radio Ankara on April 29. After recapitulating the aims and objectives of the Baghdad Pact, and the reasons for its formation, the broadcast said:

"The success achieved by this constructive instrument for peace in the Middle East in the short space of a year is known all over the world. This is the real reason for the indignation of Egypt's rulers. Their unjustified campaign against the Pact has continued without interruption ever since its formation . . . Through its controlled press the Egyptian Government opened a disgusting campaign against our Prime Minister and Government following the Prime Minister's speech at the opening session of the Baghdad Pact Council. Neither in our Prime Minister's speech nor in the communiqué issued after the Teheran conference were the names of persons or countries mentioned . . . The Egyptian leaders are behaving like the last adherents of an imperialism which is going out of fashion, they want to be the leaders of a group in Africa and the Middle East. Since they find it against their aims, they have not been able to restrain themselves from attacking the Baghdad Pact—a constructive work based on equality—from the very beginning Turkey and the other members of the Pact have displayed patience in the face of this campaign, but there is a limit. . ."

Persian Rejection of Third Soviet Protest. A third Soviet protest against Persia's adherence to the Baghdad Pact, following the two earlier protests in October and November last, was presented in Teheran on Feb. 5, and was rejected by the Persian Government on April 6. The latest Soviet Note and the Persian reply were in similar terms to those of the earlier Note exchanges between the two countries (see 14565 A, 14485 A)

The Shah of Persia, accompanied by the Empress Soraya, arrived in Ankara on May 17 on a 12-day State visit to Turkey. They attended official functions given by President Bayar and the Turkish Government, and subsequently visited Istanbul, Izmir, and a number of other centres. (Times - Daily Telegraph - Manchester Guardian - Turkish Embassy Press Office, London - Pakistan High Commissioner's Office, London - New York Times) **(Prev. rep. Baghdad Pact 14680 D; 14565 A.)**

A. UNITED STATES. — Disposal of Agricultural Surpluses. - New Agreements. - Further Australian and New Zealand Representations to U.S. Government.

The following agreements were concluded by the United States in recent months for the disposal of agricultural surpluses:

Burma. Under an agreement signed in Rangoon on Feb. 8, the U.S.A undertook to sell to Burma surplus agricultural commodities to a total value of $20,800,000, comprising raw cotton ($17,500,000), dairy products ($2,000,000), tobacco ($1,100,000), and fruit ($200,000). The agreement also covered transportation costs ($900,000) and provided that all payments would be made in Burmese currency, thereby relieving Burma of the need for foreign exchange expenditure.

Chile. An agreement was signed in Santiago on March 13 whereby Chile agreed to buy $34,600,000 worth of U.S agricultural surpluses, the principal items being wheat, edible oil, frozen meat, and cotton; 80 per cent of the peso proceeds from the sales will take the form of a loan to the Chilean Government (redeemable over 30 years) for financing agricultural development, whilst the remaining 20 per cent will be earmarked for U.S. governmental expenditure in Chile

South Korea. It was announced in Seoul on March 13 that the U.S.A. would make a grant of $43,800,000 of surplus agricultural products—principally cotton, wheat, barley, canned pork, and edible fats and oils—during the year ending June 30, 1956 The major portion of the hwan proceeds would be used by the South Korean Government to obtain military equipment, supplies, and services for the South Korean armed forces

Spain. The gift of over $6,000,000 of foodstuffs—chiefly powdered milk, butter, cheese, and dried beans—to Spaniards who had suffered losses as a result of damage to crops from the recent severe winter weather was announced on March 25. It was stated that this emergency assistance was separate from all other American commodities which were being shipped to Spain under other agreements.

The Australian Ambassador in Washington, Sir Percy Spender, made representations to the State Department on April 27 about the recent U.S.-Indonesian agreement under which the U.S.A. would provide Indonesia with $5,000,000 worth of wheat flour (see page 14779, first column); it was contended that this flour would compete with normal Australian exports through which Indonesia received about 90 per cent of her flour requirements.

A further New Zealand protest to the United States about sales in Western Europe of U.S. surplus dairy produce, especially butter, was made on April 24; the N.Z. Minister of Agriculture, Mr. Holyoake, stated on the same day that the U.S. policy had aggravated the normal seasonal fall in butter prices in Britain.—(New York Times - New York Herald Tribune - Burmese Government Information Dept., Rangoon - Directorate of Information Services, Wellington - Australian News and Information Bureau) **(Prev. rep. 14778 A.)**

B. CANADA. — Governor-General's Term extended.

The Canadian Prime Minister, Mr. St. Laurent, announced on May 22 that the Queen had approved the continuance in office of Mr. Vincent Massey (69) as Governor-General of Canada for an additional period from February 1957 to the spring of 1958.—(Times) **(Prev. rep. 12054 B.)**

C. UNITED KINGDOM. — "Lane Bequest" Painting removed from Tate Gallery by Irish Students. - Subsequent Restoration to Tate Gallery.

The painting *Jour d'Eté*, by the French impressionist Berthe Morisot, was stolen from the Tate Gallery in London on April 12, the Irish National Students' Council admitting responsibility. It was, however, returned unharmed on April 16, on which date it was left by an unidentified caller at the Irish Embassy in Grosvenor Place, where it was called for by Sir John Rothenstein, the director of the Tate Gallery.

Jour d'Eté ("A Summer's Day), painted 90 years ago and valued at about £10,000, is one of 39 paintings forming part of the Lane Bequest, which for many years has been a subject of controversy between London and Dublin. Sir Hugh Lane, formerly Director of the National Gallery of Ireland, lost his life in the *Lusitania* disaster of 1915, when the liner was torpedoed by German U-boats off Cork. In 1913 he made a will leaving certain bequests to the City of Dublin, "other than a group of pictures lent by me to the London National Gallery, which I bequeath to found a collection of modern Continental art in London" In 1915, however, before his voyage on the *Lusitania*, he added a codicil to the effect that "the group of pictures now at the London National Gallery, which I had bequeathed to that institution, I now bequeath to the City of Dublin, providing that a suitable building is provided for them within five years of my death." As this codicil was unwitnessed, and therefore had no force in law, the 1913 will was admitted to probate on Sept. 29, 1915. Since then a controversy has been in progress as to the ownership of the collection, claims on moral grounds having frequently been put forward from Dublin

The theft was not discovered until a man telephoned the London office of the Irish News Agency on April 12 to say that the picture had been taken by members of the Irish National Students' Council. The N.S.C. subsequently issued a statement in Dublin saying that it was "intended to present the masterpiece to the Irish nation," and claiming that the *coup* had been "planned months ago." It said that the picture had been removed by a man who had been "armed with a permit allowing him to do reproduction work in the Tate . . . and to enter and leave the gallery carrying large canvasses."

Both the Irish Government and the Dublin Corporation issued statements on April 13 declaring that it was impossible to accept a picture obtained in such a manner, and that every effort would be made to return it to the Tate Gallery if it were delivered in Dublin. The N.S.C., after expressing "bitter disappointment" at the Irish Government's "supine attitude," said on April 16 that it had "no option" but to hand the painting to the Irish Embassy in London, since the Irish Government had "failed to assert the nation's rightful claim to possess the Lane paintings." It gave an assurance that *Jour d'Eté* was "under proper care and being protected as befits a great masterpiece."

On the same day (April 16) Sir John Rothenstein received a telephone call from the Irish Embassy informing him that an unknown woman had handed in a parcel which, when unwrapped, had proved to be the painting *Jour d'Eté*. Sir John immediately called at the Embassy and received the painting—which was completely unharmed—from the Ambassador, Mr. Boland. The painting was re-hung in the Tate Gallery on the following day. (Times - Daily Telegraph - Irish Times, Dublin)

D. NEW ZEALAND. — Referendum on Death Penalty.

The N.Z. House of Representatives decided on May 7, by 41 votes to 33, that the question of the abolition of the death penalty should be submitted to a referendum of the electorate at the time of the next general election, due to take place at the end of 1957. The vote was taken on an amendment by the Prime Minister, Mr. Holland, to a motion by a Labour backbencher, Mr. W. T. Anderton, calling for the abolition of the death penalty. An amendment by another Labour member, proposing that the referendum should be held not later than December 1956, was rejected.

The death penalty had been suspended in New Zealand in 1935, abolished in 1941, and reintroduced in 1950.
(Directorate of Information Services, Wellington) **(11291 A.)**

E. SOVIET UNION.—Atomic Energy Administration.

It was announced in Moscow on April 18 that a central administration for atomic energy had been set up in the Soviet Union "to ensure the large-scale use of atomic energy in all branches of the national economy, and to develop co-operation between the U.S.S.R. and other countries." Its establishment was linked with the atomic energy development programme under the new Five-year Plan for 1956-60.
(Le Monde, Paris - Daily Telegraph) **(14717 A; 14779 C.)**

A. WESTERN GERMANY. — Sir Winston Churchill's Aachen Speech. - Appeal for European Unity. - Suggested Entry of "New Russia" into NATO.

Sir Winston Churchill visited Aachen on May 10 to receive the Charlemagne Prize for 1955, which had been conferred upon him by the City of Aachen in recognition of his services for the cause of European unity (see last paragraph to 14129 A). The ceremony in the Town Hall of Aachen was attended by President Heuss, Dr. Adenauer, and other leaders of the German Federal Republic.

In receiving the Charlemagne Prize, Sir Winston made a fervent appeal for progress towards European unity, spoke of the changes in the Soviet Union resulting from the repudiation of Stalin's policies, and suggested that the "new Russia" might reinforce the security of Europe by entering the North Atlantic alliance. His speech was as follows:

"It is for me a high honour to receive the Charlemagne Prize in this famous German and European city of Aachen, which some call Aix-la-Chapelle. I am proud that my name should be added to the distinguished list of recipients of the prize, who have all contributed so notably to the inspiring theme of European unity and brotherhood. I find it particularly pleasing that my immediate predecessor should be the Federal Chancellor himself. No individual personality has done more than Dr. Adenauer to bring Germany back into the circle of free nations . . .

"The name of Charlemagne would occur naturally to you here, where Charles the Great was laid to rest. Before his sway, for hundreds of years after the Roman Empire had broken into fragments, a far-reaching part of Europe's population had refused to accept a world consisting of warring tribes whose quarrels dominated their lives. Just as there was a universal church, people were dimly aware that there should be some accepted authority to keep order within and to prevent incursions from without. Thus the resuscitation of the Roman Empire under Charles the Great on that Christmas Day at the turn of the eighth century was welcomed by almost all with a sigh of relief, in the hope that it held a return to the peace, prosperity, and larger unity which had once existed.

"Alas, the idea was too good to be true. Unity was preserved for less than 50 years. Wars razed Europe for more than 1,000 years, and it was exactly 1,100 years after Charles's death that in 1914 a war fiercer and more devastating than any which had gone before broke out between the States whose frontiers lie so close to this city.

"I do not need to trace the succeeding quarter of a century, and the fitful peace and flickering hopes which came to an end in 1939. Nor is it necessary today further to lament the six years which followed. You in this city know them well, but not in such a way as to prevent you from receiving me as you have done.

"I have not been in Germany since I came to attend the meeting at Potsdam 11 years ago. I had to leave before it was concluded because of the general election at home, and I did not return. Much has happened in these 11 years.

"In the first two years Russia pursued a policy which divided her from her allies. We have now been told on high Russian authority that it was the Stalin policy—and Stalin, who was then all-powerful, is now dead But meanwhile events moved. There followed speedily during the Stalin policy a reconciliation between the British Commonwealth and the United States on the one hand, and the great mass of Western Germany on the other. This was indeed an historic event. It led also to the formation of NATO, which now includes 15 countries from Canada and the U.S.A. to Turkey, and from Iceland to Italy and Portugal. This treaty, in which Germany is a partner, is a solemn affirmation of the unity of Europe and of the resolve of the United States to come back across the Atlantic and take what cannot be less than a leading part in maintaining it.

"In these considerations, France and the valiant French people must be much in our thoughts. I have always felt, and I said at Zürich in 1946, that one of the supreme duties and privileges of France after 1945 was to bury all bitterness and lead Germany back by the hand into the European family. . . . Now France is faced in North Africa with the greatest difficulties, and her allies should give her full support in the efforts to reach a just settlement.

"NATO is a striking product and expression of a Europe weary of war and determined to build its own organization in such strength and power that there will be peace. The principle of the treaty is simple and imaginative. We all join hands together in our wish to avoid the aggressor, whoever he may be.

"A new question has been raised by the recent Russian repudiation of Stalin. If it is sincere we have a new Russia to deal with, and I do not see why, if this is so, the new Russia should not join in support of this solemn agreement. We must realize how deep and sincere are Russia's anxieties about the safety of her homeland from foreign invasion. In a true unity of Europe, Russia must have her part.

"I was glad to see that Poland was not unaffected by the changes in Russian outlook that have recently come to pass. It may be that other changes will follow. Czechoslovakia may recover her freedom. Above all, Germany will be reunited.

"We should be rash and blameworthy were we to attempt to solve the problem of European unity, of which German reunification is a vital part, by any violent stroke, and we must avoid violence by every means in our power. The only unity that might come from violence might be a unity of ashes and death. . . .

"I have spoken much of NATO, but I do not wish to leave the impression that I regard it as the sole and exclusive effective expression of the moves towards United Europe. No-one could doubt the usefulness of Western European Union, the Economic Committee [O E E.C.], the Coal and Steel Community, and the Council of Europe With all these many of us here have been closely concerned.

"But I believe our main theme of salvation should be the Grand Alliance of the European Powers linked with Canada and the United States, with the British Commonwealth as a member—Australia, New Zealand, and South Africa, though these are not members of the NATO Treaty. I repeat that the spirit of this arrangement should not exclude Russia and the East European States. It may well be that the great issues which perplex us, of which one of the gravest is the reunification of Germany, can be settled more easily than they can be by rival blocs confronting each other with suspicion and hostility. That is for the future. Let us go forward to it by reinforcing patiently and surely the arrangements which we have so far achieved."

The State Department in Washington said that the U.S.A. "welcomes the spirit and substance" of Sir Winston's Aachen speech. It noted his remarks that there was no reason, if the Soviet repudiation of Stalin was sincere, why the "new Russia" should not join NATO, and said that this suggestion was "in accord" with proposals which the three Western Foreign Ministers had made to the Soviet Union at Geneva on Oct. 27, 1955.—(Frankfurter Allgemeine Zeitung - Times - Daily Telegraph - New York Times)

(Prev. rep. Sir Winston Churchill, 14804 D.)

The Charlemagne Prize. The Charlemagne Prize, consisting of 5,000 Deutschemarks and a medal, was instituted by the City of Aachen in 1949. It is awarded annually to individuals who have rendered distinguished service to the cause of European unity. Previous recipients of the prize were Dr. Konrad Adenauer, the Federal Chancellor; Signor Alcide de Gasperi, the former Italian Prime Minister; M. Jean Monnet (France), the former chairman of the High Authority of the European Coal and Steel Community; Count Coudenhove-Kalergi, the philosopher and writer; and Professor Brugmans (Netherlands), Rector of the *Collège d'Europe* at Bruges.

B. CHILE. — Introduction of Free Exchange System. - Abolition of Exchange Control.

A fundamental change in Chile's foreign exchange system, involving the introduction of a free fluctuating exchange rate, was announced in Santiago on April 16. A similar announcement was made in Washington by the International Monetary Fund, which had approved the new arrangements proposed by the Chilean Government.

Under the new system (which replaced a complex 25-year old structure of exchange control with multiple rates and import licensing regulations), a free exchange market was established in which the rate for commercial imports and exports, Government transactions, and some "invisible" transactions was made dependent on supply and demand, and in which the Chilean Government will, if necessary, intervene through the Central Bank to avoid excessive variations in the rate arising from temporary market irregularities. There will continue to be a second, although lesser, exchange market for other "invisible" transactions.

It was also announced that in order to assist the Chilean authorities, the International Monetary Fund had concluded a one-year stand-by arrangement under which Chile might purchase up to $35,000,000 in currencies held by the Fund. In addition, Chile had made arrangements for credits of up to $30,000,000 from private banks in the U.S.A., as well as an exchange agreement with the U.S. Treasury covering a total amount of $10,000,000.

The introduction of the new free exchange system was accompanied by a comprehensive programme of fiscal and monetary measures directed towards economic stability; of these, certain credit controls and wage policies had already been introduced, whilst other steps were confirmed in legislative proposals now before the Chilean Congress. The I.M.F. statement declared that the Fund had emphasized that the continuation of "vigorous efforts to resist inflationary forces and bring about greater economic stability in Chile" was essential to the success of the new exchange system, and that it (the Fund) expected to remain "in close touch" with the Chilean authorities regarding the implementation of the new system.

The Chilean Minister of Finance announced on April 17 that the new free exchange rate would operate from the following day.—(International Monetary Fund - Financial Times - New York Times) **(Prev. rep. Financial Policy, 14676 B; Devaluation, 13206 D.)**

C. CAMBODIA. — Recognition by Soviet Union.

It was announced on May 17 that the Soviet Union had recognized the sovereignty and independence of Cambodia and had agreed to an exchange of ambassadors between the two countries. (Le Monde, Paris - Daily Telegraph)

A. SOUTH AFRICA. — Introduction of Apartheid on Cape Town Buses and in Cape Town Municipal Offices.

It was announced in Cape Town on April 11 that *apartheid* would be enforced on many of the city's bus and tram routes as from April 16 by order of the National Transport Commission, which had directed that certain seats on public vehicles on a number of routes in the Cape Peninsula should be preserved exclusively for European passengers. Specifically, the Commission directed that European passengers should have the exclusive right to most of the seats on the lower deck, whilst the rear cross-benches on the lower deck and all seats on the upper deck would be available to "all classes."

The decision was taken against the advice of the Cape Town City Council The Mayor of Cape Town, Mr. P. G. Wolmarans, stated on April 11 that he had personally led a three-man deputation of the City Council to the local Road Transportation Board. The delegation had submitted a memorandum (adopted by the City Council on March 29) pointing out the inadvisability of introducing *apartheid* on Cape Town bus routes, on the ground that Cape Town buses had always been used by all races without serious friction, and that segregation would cause hardship to certain sections of the public—especially to elderly and infirm non-Europeans and to women with children, who might have difficulty in climbing to the upper deck of buses.

The South African Coloured People's Organization decided on April 15 to call for a boycott of the bus and tram lines affected, in protest against the introduction of *apartheid.* Similar boycott calls were issued on April 12 by the South African Congress of Democrats (a European left-wing organization) and the African National Congress in Cape Town. Although this boycott was generally observed by non-Europeans, as well as by a number of Europeans, the first day of "bus *apartheid*" (April 16) passed off without incident.

The National Transport Commission, which issued the segregation order, was formed under the Transport (Co-ordination) Act of 1948. Its members are appointed by the Governor-General and include the Secretary for Transport, the Commissioner for Road Transportation, and the Commissioner for Civil Aviation In ordering *apartheid* on certain bus routes, the Commission acted on the recommendations of a governmental inquiry committee which had been appointed by the Minister of Transport in 1952 to inquire into the segregation of European and non-European passengers on public vehicles in the Cape Peninsula.

The Motor Carrier Transportation Amendment Act of 1955 laid down that recommendations made by this inquiry committee might be enforced by the National Transport Commission. It empowered the Commission to order local road transport boards to introduce segregation in public vehicles either by setting aside special vehicles for the different "classes" (i.e. races) of passengers, or by allocating separate portions of the same vehicles to passengers of a particular "class."

On March 29 the Cape Town City Council had adopted without opposition a proposal to provide separate facilities for Europeans and non-Europeans in amenities and offices under municipal control. This action followed an inquiry from the Cape Provincial authorities about the steps which were being taken by the Council to implement the Reservation of Separate Amenities Ordinance, promulgated on Sept. 30, 1955. Under this Ordinance, the Administrator of Cape Province was empowered to order any local authority to provide segregated counters, benches, seats, or other amenities for the exclusive use of people belonging to a particular race or class, as well as separate bus-stops and taxi-stands for the different races.

B. UNITED KINGDOM. — New High Commissioners in Australia and Canada.

The Commonwealth Relations Office announced on May 23 (*a*) that Lord Carrington, Parliamentary Secretary to the Ministry of Defence, had been appointed U.K. High Commissioner in Australia in succession to Sir Stephen Holmes, retiring at the end of the year; and (*b*) that Sir Saville Garner, Under-Secretary of State in the Commonwealth Relations Office, had been appointed U.K. High Commissioner in Canada *vice* Lieut-General Sir Archibald Nye, whose term of office was expiring at the end of the year.—(Times - Daily Telegraph)
(Prev. rep. 12309 B; 12022 B.)

C. HUNGARY. — Cabinet Changes.

It was announced in Budapest on April 14 (*a*) that M. Joszef Bognar, Minister for Internal Trade, had been appointed Minister for External Trade in succession to M. Laszlo Hay; (*b*) that M. Hay had been appointed president of the Hungarian National Bank; and (*c*) that M. Janos Tausz, First Deputy Minister for Internal Trade, had succeeded M. Bognar as Minister for that department. It was also announced that the National Bank would no longer be controlled by the Ministry of Finance but by the Government as a whole.
(Neue Zürcher Zeitung) **(Prev. rep. Cabinet, 14630 B.)**

D. JORDAN.—Resignation of Premier Samir el-Rifai. - New Government formed by Sayed el-Mufti. - New Commander of Arab Legion.

The Government headed by Samir el-Rifai resigned on May 20 after having held office for only four months. It was succeeded on May 22 by a Cabinet headed by Sayed el-Mufti, who had been Prime Minister in December last, when General Sir Gerald Templer (Chief of the British Imperial General Staff) was visiting Amman for discussions on the possibility of Jordan's adherence to the Baghdad Pact.

No statement was made as to the reasons for Samir el-Rifai's resignation, but it was understood that King Hussein had disagreed with a number of his policies. Samir el-Rifai tendered his resignation after returning from Damascus, where he had attended meetings of the Arab League's Political Committee and of the Foreign Ministers of Egypt, Syria, and the Lebanon He had been acting Foreign Minister of Jordan (concurrently with holding the Premiership) for a few weeks before his resignation, consequent upon the retirement through ill-health of Dr. Khalidi, the former Foreign Minister.

The composition of the new Cabinet was announced on May 22, as follows: Sayed el-Mufti, Prime Minister; Fawzi el-Mulki, Deputy Premier, Foreign Affairs, and Education; Mohamed Ajlouni, Defence; Ali Hasna, Justice and Social Affairs; Sayed Ala-addin, Economic Affairs; Bishara Ghaseeb, Finance; Samaan Daoud, Health and Reconstruction; Auni Abdelhadi, Minister of State; Ali Hindawi, Agriculture and Public Works; Salah el-Majali, Posts, Telegraphs, and Civil Aviation.

Sayed el-Mufti became Prime Minister for the third time, having first held that post during King Abdullah's reign Fawzi el-Mulki had also previously served as Prime Minister (the first of King Hussein's reign), and had also held the posts of Defence Minister (under King Abdullah) and of Ambassador in London, Paris, and Cairo Most of the other Ministers had previously held ministerial office. Samaan Daoud was one of the four Ministers who resigned at the time of General Templer's visit in protest against the possibility of Jordan's accession to the Baghdad Pact.

Two leading members of the National Socialist party declined invitations to join the new Cabinet because Sayed el-Mufti had refused certain conditions laid down by them for such participation. These included the dissolution of the present Parliament and the holding of elections, the removal of all "foreign influence" from Jordan; full co-operation with neighbouring Arab States, including military co-operation with those having borders with Israel, and the repeal of restrictions on the Press, publications, and political assemblies. The National Socialist party were among the most vehement opponents of General Sir John Glubb (the former head of the Arab Legion), and campaigned strongly against Jordan's proposed accession to the Baghdad Pact.

In a press statement on May 21, Sayed el-Mufti said that he desired "good relations and full understanding" with Britain, and intimated that Jordan would ask for a revision of the Anglo-Jordanian treaty—a point on which he did not elaborate, except to recall that he had attempted to amend the treaty when he was previously in power. Asked about Jordan's relations with the other Arab countries, he said that Jordan would "pursue a neutral policy" and adopt "a friendly and independent attitude within the Arab world."

It was announced in Amman on May 24 that King Hussein had accepted the resignation of Major-General Radi Innab (60) as commander of the Arab Legion, and had appointed Lieut.-Colonel Ali Abu Nawar (33) as his successor. General Innab had succeeded General Sir John Glubb as chief of the Arab Legion after Sir John's dismissal by King Hussein in March. Colonel Nawar (who was promoted major-general) received part of his military training at the Staff College, Camberley, and had been military attaché in Paris and A.D.C. to King Hussein. A leader of the "young officers" movement within the Arab Legion, he had recently accused Sir John Glubb of having "deliberately centralized all military and political power in Jordan in his own person" and of having been "the worst enemy to Anglo-Jordanian understanding." He added that Jordan desired to pursue a neutral policy, that the Arab Legion still needed British officers to train the Jordanian forces, but that these officers should serve in an advisory capacity only.

E. UNITED STATES. — Opening of Folsom Dam.

The Folsom Dam, built over seven years at a cost of $62,000,000, and the tenth largest in the world, was officially opened on May 5 at Folsom (California), together with a $35,000,000 hydro-electric plant built by the Federal Bureau of Reclamation. Situated 20 miles east of Sacramento, at the confluence of two tributaries of the American River, it will provide domestic water supplies for San Francisco, irrigation for the Upper San Joaquin valley, and hydro-electric power, in addition to help solving flood-control problems.
(New York Times) **(Prev. rep. 10913 A.)**

A. UNITED KINGDOM. — Municipal Elections.

Local elections were held on May 10 in the English and Welsh boroughs and the London metropolitan boroughs, on May 1 in the Scottish burghs, and between May 1 and May 10 in urban and rural districts in England and Wales.

English and Welsh Boroughs.

Of the 401 boroughs in England and Wales (excluding the London metropolitan boroughs—see below), no elections were held in 36 boroughs, where all seats were filled by unopposed returns. The elections in the remaining boroughs were for one-third of the councils' membership. Over England and Wales as a whole (excluding London) the Labour Party made a net gain of 186 seats, the Liberals gained five seats, whilst the Conservatives and Independents lost 191 seats. Party gains and losses were as follows:

	Gains	Losses	Net gains (+) or losses (—)
Conservatives	58	195	—137
Labour	244	58	+186
Liberals . ..	17	12	+ 5
Independents . .	41	95	— 54

No Communist candidates were returned in any of the 401 boroughs.

Labour gained control of seven boroughs—Nottingham, Peterborough, Darlington (for the first time), Ellesmere Port, Blyth, Morley, and Hemel Hempstead—but lost control at Widnes to the Conservatives and at Kidwelly to the Independents. In two Welsh towns—Carmarthen and Llandloes—Labour will control the council through the casting vote of the mayor.

London Metropolitan Boroughs.

The only change in the 28 London metropolitan boroughs was at Lewisham, where Labour gained control from the Conservatives. The elections in London were for the whole council in each case, the results in the 28 boroughs being as follows:

Battersea. Labour 46, Conservatives 18. No change. Labour retained control.

Bermondsey. Labour 52, other parties, nil. No change. Labour retained 100 per cent control

Bethnal Green. Labour 35, other parties nil. No change. Labour retained 100 per cent control

Camberwell. Labour 55, Conservatives 15. Two Labour gains from Conservatives. Labour retained control.

Chelsea. Conservatives 30, Labour 6. Two Labour gains from Conservatives. Conservatives retained control.

Deptford. Labour 33, Conservatives 3. Two Labour gains from Conservatives. Labour retained control.

Finsbury. Labour 37, Conservatives 2 Three Labour gains from Conservatives. Labour retained control.

Fulham. Labour 36, Conservatives 10 Three Labour gains from Conservatives. Labour retained control.

Greenwich. Labour 33, Conservatives 7. No change. Labour retained control.

Hackney. Labour 52, other parties nil. No change. Labour retained 100 per cent control.

Hammersmith. Labour 38, Conservatives 6, Independent 1. No change. Labour retained control.

Hampstead. Conservatives 42, Labour 7. No change. Conservatives retained control.

Holborn. Conservatives 46, Labour 3. One Conservative gain from Labour. Conservatives retained control.

Islington. Labour 70, other parties nil. No change Labour retained 100 per cent control.

Kensington. Conservatives 49, Labour 21. No change. Conservatives retained control.

Lambeth. Labour 45, Conservatives 15. Six Conservative gains from Labour. Labour retained control.

Lewisham. Labour 30, Conservatives 25 Eight Labour gains from Conservatives. Labour gained control from Conservatives.

Paddington. Conservatives 43, Labour 27. One Conservative gain from Labour Conservatives retained control.

Poplar. Labour 42, other parties nil. No change. Labour retained 100 per cent control.

St. Marylebone. Conservatives 59, Labour 11. No change. Conservatives retained control

St. Pancras. Labour 42, Conservatives 28. Five Conservative gains from Labour Labour retained control

Shoreditch. Labour 38, other parties nil. No change. Labour retained 100 per cent control.

Southwark. Labour 60, other parties nil. No change. Labour retained 100 per cent control.

Stepney. Labour 58, Independent Labour 7, Communists 4, Independent 1. Seven Independent Labour gains from Labour; 4 Communist gains from Labour. Labour retained control

The Communists had six councillors on the Stepney Borough Council before 1953, but lost all their former seats in that year. The Independent Labour councillors are members of a group who are dissatisfied with the reallocation of housing in Wapping and have expressed lack of confidence in the local Labour Party.

Stoke Newington. Labour 29, Conservatives 3. Four Labour gains from Conservatives. Labour retained control.

Wandsworth, Conservatives 32, Labour 28. Seven Labour gains from Conservatives. Conservatives retained control.

Westminster. Conservatives 60, other parties nil. No change. Conservatives retained 100 per cent control

Woolwich. Labour 54, Conservatives 9. Six Labour gains from Conservatives. Labour retained control.

Scottish Burgh Elections.

There was no change of control in any of the Scottish town councils resulting from the burgh elections. In the four leading cities, Labour retained control in Glasgow, Aberdeen, and Dundee, whilst the Moderates retained control in Edinburgh. Over Scotland as a whole Labour gained 21 seats and lost 27—a net loss of six.

Labour gained two seats each at Stirling, Peebles, Campbeltown, and Kilmarnock, and one seat each in Edinburgh, Aberdeen, Dundee, Falkirk, Bo'ness, Penicuik, Kinghorn, Leven, Kilwinning, Hawick, Airdrie, Alloa, and Ayr. Labour lost three seats each at Bathgate and Musselburgh, two seats each at Dundee, Kirkcaldy, Motherwell, and Wishaw, and one seat each at Perth, Dunfermline, Inverness, Wick, Arbroath, Fort William, Irvine, Rutherglen, Paisley, Tillicoultry, and some other burghs. There were no gains or losses in Glasgow, where Labour retained its majority of 25 over the Progressives. The Moderates have a majority of 13 in Edinburgh and of 12 in Perth. At Kirkcaldy and Paisley the Labour and anti-Labour parties are equal, the Provost in each case having a casting vote.

Urban and Rural District Council Elections.

The Labour Party claimed a net gain of 127 seats in the urban and rural district council elections in England and Wales (152 gains and 51 losses in urban districts, 31 gains and five losses in rural districts). The Conservative Central Office, analysing the results for 426 urban district councils, stated that Conservatives and Conservative-supported candidates had won 909 seats (a net loss of 71), Labour 914 seats (a net gain of 88), Independent candidates 552 seats (a net loss of 23), and the Liberals 36 seats (six gains). Seven U.D.C. results were still outstanding.

Labour gained control of nine urban district councils—including Billingham (Co Durham), Otley (Yorks.), Hornchurch (Essex), and Gainsborough (Lincs.)—and lost control at Cheshunt (Herts.) and Rishton (Lancs.). The Liberals gained control at Baildon (Yorks.)

Polling varied in different parts of the country, being low in many areas—particularly in Scotland—but considerable in others.—(Times - Daily Telegraph - Manchester Guardian - Daily Herald - The Scotsman, Edinburgh - Glasgow Herald) **(Prev. rep. 14215 C; 14208 A; 13609 B; 13076 A.)**

B. COLOMBO PLAN. — The "Canada-India Atomic Reactor." - Canadian Aid for Construction in India.

An agreement for the joint establishment of an atomic reactor in India under the Colombo Plan was signed on April 28 by Mr. Nehru, the Indian Prime Minister, and Mr. Escott Reid, the Canadian High Commissioner in New Delhi.

The "Canada-India Atomic Reactor" will be erected at the Indian Government's atomic energy establishment at Trombay, near Bombay. The costs of the project, which is a joint Indo-Canadian enterprise, will be shared between the two countries, but when it is completed full title and complete control will pass to the Government of India. The total cost of the reactor will be about 70,000,000 rupees, or a little over $14,000,000. The Canadian contribution will be about $7,500,000 and the Indian contribution the equivalent of over $6,500,000, Canada paying in general for the external costs and India for the internal costs.

Canada will provide the reactor itself, the steel for the surrounding shell (which will be about 135 feet high and 120 feet in diameter), and the necessary designs, whilst Indian contractors and labour will do the major part of the construction work at the site. Atomic Energy of Canada Ltd. (a Canadian Crown Company) will be responsible for supervising the erection and constructional work. In addition, training facilities will be made available in Canada to Indian scientists and technicians

The reactor will be of the high-powered type (similar to the NRX reactor at the Canadian atomic energy establishment at Chalk River) and will be used for atomic research and experimental purposes—specifically for fundamental research in physical, chemical, biological, and metallurgical problems relating to atomic energy. It will also produce radioactive isotopes for use in medicine, agriculture and industry.

The Canadian offer to provide the reactor, and the Indian Government's acceptance, had been announced during the meeting of the Colombo Plan Council at Colombo on Sept. 16, 1955. The facilities of the reactor will be made available by the Indian Government to approved scientists from other countries, including member-countries of the Colombo Plan. (Department of External Affairs, Ottawa - Montreal Star - The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London) **(Prev. rep. 14651 A.)**

A. SOVIET UNION. — Further Cuts in Armed Forces. - Demobilization of 1,200,000 Men by 1957. - American and British Reactions.

The Soviet Government announced on May 14 that it had taken the following decisions in connexion with the reduction of the armed forces of the U.S.S.R., all of which would be implemented by May 1, 1957:

(1) The demobilization of a further 1,200,000 men, additional to the earlier reduction of 640,000 carried out during 1955.

(2) In conformity with this reduction, the disbanding of 63 divisions and independent brigades, three air divisions, and other units, including 30,000 Soviet troops at present stationed in Eastern Germany.

(3) The putting into reserve of 375 warships of the Soviet Navy, which would be taken out of the active fleet.

(4) Corresponding reductions in the Soviet military budget resulting from the above-mentioned measures.

It was stated that the forces to be demobilized would be available for "peaceful and socially useful work" in industry and agriculture, and that the funds made available by reductions in the military budget would be utilized for purposes of "peaceful construction . . . and raising the well-being of the Soviet State."

In an accompanying statement, the Soviet Government said that the creation of "a wide zone of peace embracing the majority of the earth's population" had contributed to the lessening of international tension and to the growth of peaceful co-existence among nations. Declaring that "the main obstacle to the further relaxation of international tension is the continued arms race," it recapitulated the various disarmament proposals presented by the U.S S R. during the last two years (see 14851 A); accused the Western Powers of rejecting the Soviet proposals for banning atomic and thermo-nuclear weapons and limiting conventional armaments, and called for further efforts to achieve all-round disarmament.

The statement continued. "By undertaking this new and very considerable reduction in the strength of the Soviet armed forces, the Soviet Government is striving to contribute to the practical implementation of the disarmament programme which is under consideration in the United Nations . . . Other Governments, including those of the United States, Great Britain, and France, insofar as they are sincerely willing to contribute to the strengthening of peace, cannot but follow this example. The Soviet Government will be ready to discuss a further reduction in its armed forces if the Western Powers make corresponding reductions in their armed forces and armaments . . ."

Whilst the Soviet announcement was welcomed in the Western countries, it was commented in London and Washington that no indication had been given as to the size of the Soviet armed forces after the announced reductions had been carried out. It was pointed out in this connexion that whereas the present strength of the Soviet armed forces was estimated at about 4,000,000, the U.S. forces had been reduced from 3,200,000 to 2,900,000 during the past 12 months (see 14387 A), whilst the British forces were being reduced from 800,000 to 700,000 (see page 14774, first column).

Reactions in America.

Mr. Dulles, at his press conference on May 15, said that the U.S A. welcomed the Soviet announcement "if this proves to be evidence of an intent to forego the use of force in international relations." He suggested, however, that the Soviet move might be prompted not by "love of peace" but by "solid and compelling economic reasons," as the Soviet rulers might well have over-extended their resources by efforts to develop new weapons on a large scale and to expand the country's industrial base, whilst at the same time embarking on a programme of assistance to under-developed countries. At some point, therefore, the Soviet Government had had to "cut back," and the point "where it could cut with the greatest advantage to itself" was to take men out of uniform and put them into factories and farms. The demobilization measures might, he believed, actually reinforce the Soviet Union's military capacity, in which connexion Mr. Dulles said that he would rather see the 1,200,000 men discharged from the armed forces "standing guard duty than making atomic bombs."

After recalling that the U.S.A had cut its own armed forces from 12,300,000 at the end of World War II to fewer than 3,000,000 today, the Secretary of State noted that there would be no way of verifying the announced reduction of the Soviet forces. Moreover, the men demobilized could always be "speedily recalled and equipped" under the Soviet system, whilst the large armed forces maintained by Communist China would still remain intact. Mr Dulles pointed out that in the recent London disarmament talks the U.S A. had proposed that the armed forces of America and Russia should be reduced to 2,500,000 each, as part of an overall disarmament programme that would include restrictions on nuclear weapons. He stressed that manpower could no longer be regarded as a reliable yardstick for disarmament, and that armaments themselves, rather than the number of men under arms, should be the subject of control

Mr. Harold Stassen (President Eisenhower's special assistant on disarmament questions) stated in a press interview on May 18, however, that the Soviet decision was "an initiative we wanted them to take." Whilst refusing to discuss the views put forward by Mr. Dulles, he said that the Secretary of State's remarks "must be taken in their total context." Mr. Stassen listed the following factors as among those which might have influenced the Soviet Government to reduce its armed forces: an increased demand for manpower as a result of planned efforts to expand industry and agriculture in Siberia; the low Soviet birth-rate in the late 'thirties and early 'forties, which made for the smaller-than-normal intake of manpower at the present time; the "new look" in the Soviet military establishment as a result of advances in nuclear weapons, jet aviation, and guided missiles, which put a premium on technical skills and lessened the importance of sheer numbers of men under arms, the psychological impact of the Soviet demobilization measures in Western and neutral countries; rising demands among the Soviet people for more consumer goods; a conviction among the Soviet rulers that the U.S.A. had no intention of starting a war, coupled with their recognition that thermo-nuclear warfare would result in devastation for both sides; and the fact that the U.S S.R. had been reminded throughout the U.N. disarmament discussions that it maintained far larger forces than any other Power in the world

[The *New York Times* commented that Mr. Stassen "evidently wanted to balance the largely negative comments made by Secretary of State Dulles with some discussion of the positive side of the step"]

President Eisenhower said at his press conference on May 23 that the Soviet announcement would be welcomed as a sign of progress when proof was forthcoming that the Russians had reduced their armed manpower by 1,200,000 men. No-one, however, knew for certain what the Russians were doing, though it appeared that they were adjusting their armed forces to the new weapons situation as the U.S.A. had done three or four years ago. Moreover, there was no knowledge of what they were doing with the 1,200,000 men whom they said were to be demobilized, nor with the 115 divisions they still had left. To reduce the Soviet Air Force by 200 or 300 planes out of the 20,000 they possessed, or to reduce the Soviet Navy by a few vessels which were unknown to the rest of the world, did not necessarily mean much, the President added; if, however, the Russians had removed 375 new and modern submarines from their forces "it might mean something." Meanwhile, the U.S.A. would watch "hopefully and carefully" what the Russians had done, with no reaction in its own policy except to consider its own needs and those of America's allies. If the Soviet reduction was in truth as advertised, it was "a step in the right direction" and would be "warmly accepted."

Reactions in Britain.

Sir Walter Monckton, the Minister of Defence, was asked by Mr. Arthur Henderson (Lab) on May 17 whether H.M. Government proposed "to make any further overall reductions in the armed forces of the United Kingdom, including Colonial forces." Sir Walter replied.

"As has already been announced, H.M. Government are engaged in reducing the strength of the U.K. armed forces to 700,000. Their present strength is some 772,000, which is in itself a reduction of 50,000 from the figure at April 1 last year. The Government welcome the announced intention of the Soviet Government to reduce the strength of the Russian armed forces They will themselves continue to ensure that the strength of the forces is no greater than is essential to meet the commitments which they are required to carry out. The primary purpose of Colonial forces is the maintenance of internal security, and I do not think that reductions in the strength of the Soviet forces are a factor which needs to be taken into account in this context."

Asked by Mr. Grimond (Liberal) about the relative strength between the land forces of the Soviet bloc and those of NATO, the Minister said: "According to our latest estimates, the Soviet bloc land forces at present comprise nearly 300 divisions of all types in varying stages of readiness The NATO land forces comprise some 100 divisions, also in varying stages of readiness. According to the Russian statement, when the reductions recently announced have been completed, the number of divisions will fall by 63 The strength of the forces in Eastern Germany will, however, be only very slightly reduced."

The Soviet Government and the central committee of the Soviet Communist Party issued an appeal on May 18 for 500,000 volunteers for industrial and agricultural work in Central Asia and Siberia. The appeal was particularly directed to ex-servicemen.—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune)

(Prev. rep. 14599 B; 14384 C.)

Note. The British Secretary of State for Air (Mr. Birch) had stated in a parliamentary reply on April 18 that, according to the latest British estimates, the Soviet Army (including para-military forces) had a strength of 3,200,000, the Soviet Air Force of 800,000, and the Soviet Navy of about 600,000 men. The figures for the "satellite" countries, including Eastern Germany, were estimated at 1,500,000 for armies, 100,000 for air forces, and 20,000 for navies The period of military service in the U.S.S R. varied between 36 and 48 months, whilst in the "satellite" countries it varied between 24 and 42 months in the different countries except in Eastern Germany, where there was as yet no conscription.

The Supreme Allied Commander, Atlantic (Admiral Jerauld Wright) said at a press conference in Britain on May 11 that the Soviet Union possessed about 400 submarines, and was building others at the rate of 80 to 85 a year. (Times - Daily Telegraph).

A. ITALY. — Electoral Reform Legislation for Parliamentary, Provincial, and Local Elections.

A Government-sponsored Electoral Reform Bill for the next parliamentary elections were approved by the Italian Chamber of Deputies on March 21 and by the Senate on May 8. The Bill restored the system of "straight" proportional representation, without the possibility of putting forward joint lists, which had been abolished in the electoral legislation of 1953 prior to the general elections of that year.

Under the 1953 legislation a party or coalition of parties presenting joint lists was entitled to receive two-thirds of the seats in the Chamber if it polled more than one-half of the total vote, whilst the distribution of seats according to proportional representation applied only if such a majority had not been obtained by any party or electoral alliance. In the 1953 elections the Christian Democrats and their allies—the Democratic Socialists, Liberals, and Republicans—failed by a small margin to obtain such a majority, and the seats were therefore allocated in accordance with the proportionate vote for each of the parties. This system, however, was strongly criticized both by the Left-wing parties (the Communists and Nenni Socialists) and the Right-wing groups (the Monarchists and the neo-fascist M.S.I.). Subsequently, the smaller parties of the Government coalition also demanded its abolition on the grounds (*a*) that their electoral alliance with the Christian Democrats had cost them many votes which had gone to the parties of the Left, and (*b*) that it would be essential for them to regain their complete independence to avoid any further movements towards the extreme Left-wing.

Although there was general agreement on a return to a "straight" system of proportional representation, the final vote in the Chamber was preceded by lengthy debates on details of the new legislation; on several occasions Signor Segni (the Prime Minister) made the voting on the Government's proposals a question of confidence. In its final version, which was approved by 421 votes to 46, the Bill also provided for the application of a quotient as the basis for allocation of seats, which was more favourable to the smaller parties than had previously been the case. Except for the Monarchists and neo-Fascists, all parties supported the Bill.

Under a second Bill, which was also passed by the Chamber of Deputies on March 21 after approval by the Senate, the possibility of pooling votes by joint party lists was similarly abolished for all municipal and provincial elections.

This Bill provided (*a*) that in all communes of less than 10,000 inhabitants four-fifths of the local council seats would go to the list which had obtained a simple majority, and one-fifth to the minority lists; (*b*) that in communes of between 10,000 and 25,000 inhabitants three-fifths of all seats would be allocated to the majority list, and two-fifths to the minority lists; and (*c*) that in all municipalities of more than 25,000 inhabitants the system of straight proportional representation would be applied. It was also laid down that local elections would in future be held throughout Italy at one and the same time, instead of the previous system under which part of the elections had been held in one year and part in another.

Following the promulgation of this Bill, it was announced that the next elections for municipal and provincial councils would take place on May 27, but that no elections would be held in Trieste City and in the former "Zone A."
(Corriere della Sera, Milan - Giornale d'Italia, Rome) **(Prev. rep. Electoral Legislation, 13017 A; Local Elections, 14142 C.)**

B. SOVIET UNION. — Reduction of Working Week.

A Government decree was issued in Moscow on March 8 reducing the normal working week in factories and offices from 48 hours to 46 hours, and providing that working-hours on Saturdays and on the eve of national holidays would in future be limited to six instead of eight. Directives issued by the Government at the same time laid down that workers paid at hourly rates should receive the same pay as they received previously for the 48-hour week; that facilities would be introduced for piece-rate workers to enable them to increase their productivity; and that workers in industries requiring uninterrupted work would get an extra day of rest for every four Saturdays or pre-holiday days worked by them. Heads of Ministries and works managers were made responsible for the "unconditional fulfilment of the set assignments for the volume of production." (Times - Le Monde, Paris)

C. UNITED KINGDOM. — Trade Figures.

Imports into the United Kingdom in March totalled £330,200,000, exports £271,300,000, and re-exports £13,300,000, the adverse visible balance thus amounting to £45,600,000. During the first quarter of 1956 imports amounted to £985,600,000 and exports (including re-exports) to £816,300,000, the adverse visible balance thus totalling £169,300,000. The value of U.K. exports in the first quarter of 1956 was 4½ per cent higher than in the corresponding period of 1955, and the value of imports 2 per cent lower.—(Board of Trade Journal) **(Prev. rep. 14777 E.)**

D. UNITED KINGDOM. — Post Office. - Increases in Postal and Telephone Charges.

Dr. Charles Hill, the Postmaster-General, announced in the House of Commons on April 11 increases in the charges for local and "cheap rate" trunk telephone calls; in fees for money orders and for postal registration; in postal rates on newspapers, printed matter, and samples; and in "cash on delivery" fees. Ordinary postal and telephone trunk rates, telephone rentals, and poundage on postal orders were not affected. On May 1 Dr. Hill announced increases (from June 1) in rates on inland parcels and parcels to the Irish Republic, to take account of the recent increases in railway rates (see 14807 A). The new rates are shown below, with existing rates given in parentheses:

Telephone Charges.

Subscribers' Calls (from July 1) *Local Calls*: Up to 5 miles, 2½d. (2d.); 5-7½ miles, 5d. (4d.); 7½-12½ miles, 7½d. (6d.), 12½-15 miles, 10d (8d.). "*Cheap Rate*" *Trunk Calls* (between 6 p.m. and 10.30 p.m.): up to 25 miles, 10d. (8d.), 25-35 miles, 1s. (9d.); 35-50 miles, 1s. 3d. (1s. 2d.), 50-75 miles, 1s. 6d. (1s. 6d.), 75-125 miles, 2s. (1s 6d.); over 125 miles, 2s. 6d. (1s 6d.).

The charge for alarm calls to subscribers would be reduced from 6d. to 5d. "Business" small users subscribers, who are at present charged 50 per cent above the normal tariff for their first 300 calls annually, would be surcharged on the first 240 calls only. Residential subscribers would continue to be allowed 100 free local calls annually.

Calls from Call Boxes (also from July 1, except the charge for local calls up to 5 miles, which would apply from Jan. 1, 1957): *Local Calls*: Up to 5 miles, 4d. (3d.); 5-7½ miles, 6d (4d.); 7½-12½ miles, 9d (6d.), 12½-15 miles, 1s (8d.). "*Cheap Rate*" *Trunk Calls*: same rates as subscribers' calls plus 3d.

Postal Tariff.

Inland Printed Papers and Samples: 2d for each 4 oz., then 1d. for each further 2 oz. (1½d. for 2 oz., then 1d. for each further 2 oz.).

Inland Newspapers (per copy), 2d for 6 oz., then 1d. for each additional 6 oz. (1½d for 4 oz., then ½d. for each further 6 oz.).

Inland Registration: 1s. minimum, covering compensation up to £10, with an additional 1d. for each further £20 compensation (6d. covering maximum £5 compensation, with 1d. for each additional £20).

Inland Money Orders: Up to £10, 1s. (8d.), with 2d. extra for each additional £10 up to £50.

The above charges would apply to services to the Irish Republic.

Inland Cash-on-Delivery Fees. Fee for trade charge up to £1, 1s. 2d. (10d.); £1-£2, 1s. 4d. (1s. 2d.), £2-£5, 1s. 6d. (1s. 2d.); each subsequent £5 up to £40, 2d. (2d.).

Parcel Rates.

Inland. Up to 2 lb., 1s. 4d. (1s. 3d.), 2 lb.-3 lb., 1s 6d. (1s. 5d.); 3 lb.-4 lb., 1s. 9d. (1s. 8d.); 4 lb.-5 lb., 2s. (1s. 11d.); 5 lb.-6 lb., 2s. 3d. (2s. 1d.), 6 lb.-7 lb., 2s. 6d. (2s. 3d.); 7 lb -8 lb., 2s. 9d. (2s. 6d.); 8 lb -11 lb, 3s. (2s. 8d.); 11 lb.-15 lb., 3s. (2s. 9d.).

To the Irish Republic. Up to 2 lb., 1s 4d. (1s. 3d.); 2 lb.-5 lb., 1s. 10d. (1s. 9d.), 5 lb.-8 lb., 2s. 7d. (2s. 4d.); 8 lb.-11 lb., 3s. (2s. 8d.); 11 lb.-15 lb. 3s 3d. (2s 11d.).

Dr. Hill explained on April 11 that the increase in the salaries and wages of Civil Servants announced on March 31 (see 14847 B), together with other increases in wages and costs since last autumn, had added about £20,000,000 a year to the expenses of running the Post Office. Although he was attempting to absorb as much of the increase as possible by greater efficiency and economy, it was estimated that it would be necessary to raise an additional £15,000,000 in the current year to meet the bill.—(Times - Daily Telegraph) **(14500 A.)**

E. UNITED STATES. — High-Altitude Research Studies by New Stratospheric Plane.

The starting of a new research programme involving repeated and sustained aeroplane flights ten miles above the earth was announced on May 6 by the National Advisory Committee for Aeronautics. It was stated that the research would be carried out by a new Lockheed jet plane, the U-2, which would make it possible for the first time to gather information "in an economical and expeditious manner" on such subjects as meteorological conditions at high altitudes, cosmic rays, and elements in the upper atmosphere. The plane, powered by a Pratt and Whitney jet engine, carries a heavy load of instruments and was described by the *New York Times* as "not a fighter or bomber but a type so new that the Air Force had to invent a designation for it—U for utility." It is designed to gather information that no altitude pressure-chamber laboratory can produce satisfactorily. (New York Times)

F. NETHERLANDS. — Equal Property Rights for Women. - Parliamentary Legislation.

The Lower Chamber of the States-General adopted on April 11, by 56 votes to 16, a proposal by the Minister of Justice (Professor van Oven) giving husbands and wives equal rights with regard to all joint property. The measure was passed by the Upper House a few days later.—(Netherlands News Agency)

A. SOVIET UNION - EASTERN EUROPE.—Restriction of Powers of Security Police in U.S.S.R. and Poland. - Soviet Workers given Freedom to change Employment. - Release of Political Prisoners in Poland and Eastern Germany. - M. Cyrankiewicz on New Role of Polish Parliament. - Polish Cabinet Changes.

The Soviet Government issued two decrees at the beginning of May abolishing the emergency powers exercised by the security police since 1934, and permitting workers to change their employment without previously obtaining permission. Details of these and other developments arising from the repudiation of Stalinist policies are given below.

A decree published on May 3 abolished the emergency powers for the investigation of acts of terrorism and sabotage which had been granted to the security police in 1934 and 1937. It laid down that in future these offences would be dealt with according to "the juridical standards established by law," and established a special commission to supervise the activities of the security police. One of the decrees revoked (that of Dec. 1, 1934, which was issued immediately after the assassination of the Leningrad Communist leader, Sergei Kirov) had provided that investigations of cases of terrorism must be completed within 10 days; that the accused should be informed of the charges against him only 24 hours before his trial, that counsel should not be heard; that the court should give its verdict in the prisoner's absence, and that the death sentence should be carried out immediately, no appeal being allowed. Another revoked decree, (of Sept. 14, 1937) had established special commissions with judiciary powers composed of officials of the security police.

The legal journal *Soviet State and Law* strongly attacked on April 22 the theories of the late M. Vyshinsky (the former Foreign Minister, who acted as Public Prosecutor at the series of political trials during 1936-38), which, the article stated, denied "the need for a court to establish the absolute truth in each case" In particular it denounced the practice of convicting prisoners on the basis of their own confessions, and demanded "the strictest observance of legality by investigating courts and prosecuting organs."

M. Volin, president of the Soviet Supreme Court, told a delegation from the French Socialist Party which was visiting Moscow on May 4 that "since 1953 no extra-judiciary body empowered to arrest or imprison anyone has existed in the Soviet Union," and that such bodies, to which the Government and the Communist Party were strongly opposed, would never be re-established Under a decree issued on Sept. 1, 1953, he explained, the special M.V.D. courts had been suppressed; the ordinary courts were required to consider all petitions for the revision of sentences passed by such courts, whether submitted by the prisoner himself, his relatives, or his friends, and the Public Prosecutor was empowered to demand the dossiers of such cases from the Ministry of the Interior. The new penal code, he added, would permit prisoners to be assisted by counsel during their interrogation, and would abolish the offence of "economic espionage."

A law introduced in 1940, under which change of employment without permission became punishable by four months' imprisonment, and persistent absenteeism or lateness by six months' corrective labour and the loss of 25 per cent of earnings, was abolished on May 11, together with wartime regulations under which workers could be compulsorily transferred from one place of employment to another. The new decree ordered the release of all persons convicted under these laws, and restricted the penalties for persistent absenteeism to dismissal or deprivation of long-service bonuses for up to three months.

In its issue of May 18, the newspaper *Komsomolskaya Pravda* (organ of the Communist youth organization in the U.S S.R.) quoted for the first time the criticisms of Stalin which had been made by Lenin shortly before the latter's death in 1924. The paper wrote: "In the last year of his life Lenin pointed out such negative features in Stalin's character as rudeness, lack of consideration for his colleagues, capriciousness, and a tendency towards abuse of power which could lead to violation of the principles of collective leadership. Unfortunately, this is exactly what happened." *Komsomolskaya Pravda* explained that it had published this article in response to numerous requests from schoolchildren and young people for guidance on the question of the "cult of personality."

The reply given by *Komsomolskaya Pravda* to these inquiries constituted an oblique reference to the "secret testament" of Lenin, issued shortly before his death in 1924. This document has never been published in the Soviet Union, although several different versions have appeared from time to time in the Western countries, notably that issued by Trotsky in 1928. As quoted by Trotsky, the relevant passages of Lenin's testament were: "Stalin is too rude, and this fault becomes insupportable in the office of general secretary [of the Communist Party]. I therefore propose to the comrades to find a way to remove Stalin from that position and to appoint another man . . . more patient, more loyal, more polite, more attentive to the views of comrades, less capricious, etc. . . . "

During April and May a controversy developed in the Soviet military press over Stalin's alleged failure to prepare for the German invasion. The April issue of *Military Herald* (a monthly published by the Soviet Army's Administration for Military Training) stated that the Army had been compelled to retreat in 1941, suffering heavy losses, because industry had not been mobilized in time and the Army was insufficiently equipped with artillery, tanks, and aircraft. These views were strongly criticized on May 9 in *Red Star* (the daily paper published by the Army's Political Administration), which maintained that the Government and the Communist Party had made full preparations for a German attack.

Two possible explanations of this controversy were put forward in the Western Press. On the one hand, it was suggested that fears had been aroused that such criticisms of Stalin would reflect on the present Communist Party leadership, on the other, it was believed that a long-standing rivalry existed between the professional officer class and the Political Administration, which was formerly headed by Marshal Bulganin. The latter theory was supported by the fact that both Marshal Zhukov and Marshal Timoshenko had made statements during April calling for a strengthening of discipline in the armed forces, and criticizing the failure of the Political Administration to support the authority of commanding officers.

Recent developments in other Communist countries arising from the changes in Communist policy are described below.

Developments in Poland. - Cabinet Changes. - Restriction of Powers of Security Police. - Release of Political Prisoners.

The Seym, which met from April 23-28, approved a number of important Cabinet changes on April 27, the new appointments being as follows:

M. Adam Rapacki	..	Foreign Affairs.
M. Kazimierz Mijal	..	Public Services.
M. Franciszek Waniolka	..	Coalmining Industry.
M. Stanislas Zawadzki	..	Labour and Social Welfare.
M. Karol Kuryluk	..	Art and Culture.
M. Antoni Kuligowski	..	Agriculture.
M. Mieczyslaw Moczar	..	State Farms.
M. Stefan Zolkiewski	..	Higher Education.
Mme. Zofia Wasilkowska	..	Justice.
M. Marian Rybicki	..	Prosecutor-General.
M. Edmund Pszczolkowski	..	Chairman of the Committee of Public Security.

It was also announced that M. Jan Domanski, for many years a leader of the peasant movement, had been appointed to the Council of State.

M. Rapacki (previously Minister of Higher Education, and a former member of the central committee of the Polish Socialist Party) succeeded Dr. Stanislaw Skrzeszewski, who was appointed Secretary of the Council of State. Of the other Ministers concerned in the reshuffle, M Zolkiewski is a member of the Presidium of the Academy of Sciences, Mme. Wasilkowska was previously secretary of the Central Council of Trade Unions; and M. Rybicki was previously Secretary of the Council of State.

M. Jakob Berman (a Deputy Premier and a member of the Politburo of the United Workers' Party), who was formerly believed to occupy a position in the party leadership second only to that of the late M. Bierut, resigned his posts on May 6 after the Politburo had examined "mistakes and distortions in party and state work during recent years" and had criticized his activities. He was succeeded as a Deputy Premier by M. Eugeniusz Stawinski, who retained his existing post as Minister for Light Industry.

M. Henryk Cieslak, Deputy Minister of Justice, was dismissed on April 28, whilst M. Roman Romkowski (formerly Deputy Minister of Security) and Colonel Fejgin (a former high official of the Ministry of Security) were arrested on April 24 on charges of "violation of Socialist legality."

During its session the Seym approved the Government's amnesty Bill and a number of other measures, after a debate in which the Prime Minister, M. Cyrankiewicz, stressed the need for a "new democratization of our political and economic life."

In opening the parliamentary session, **M. Cyrankiewicz** said that the preliminary discussions in the Seym committees had shown that "the new debating spirit, the spirit of discussion, criticism, and creative searching, has entered the Polish parliamentary system as it has entered the entire Polish community," and declared that "we are undoubtedly at the threshold of a new historical process of democratization of our political and economic life." He admitted "serious shortcomings" in the country's political organization in the past; said that the Seym had hitherto not been able adequately to fulfil its constitutional role; and declared that the idea that "the establishment of a new class alignment meant that a parliamentary people's democracy in its final form could arise overnight" had been proved erroneous M. Cyrankiewicz continued. "We want the Seym to become in reality what it should be constitutionally—that is, the supreme legislative body, controlling the activity of all inferior State organs. But in order that the Seym may function in a proper manner, it is necessary that the other State organs assume a proper attitude towards it. What matters above all is the attitude of the Government . . . It was undoubtedly not the fault of the Seym if too great a part of legislative activities took the form of issuing decrees. The Seym was called into sessions which were too short and too infrequent, and in these conditions had to confine itself to approving decrees

without the possibility of thoroughly discussing them . . . We will have to break with the practice by which the overwhelming majority of legal acts come into life in the shape of decrees, without previous discussion by Seym committees . . .

" The exercise of parliamentary control over the organs of executive power and the activities of the Government is, of course, a no less essential factor in consolidating the rule of law. But in order to enable the Seym to fulfil this important function, the deputies must have access to sources of information. In this respect the situation was bad in the past On the whole we were not co-operative, we did not assist in making necessary materials available to the Seym, or did not do it sufficiently. There were even cases of hampering access to information. The Government intends to put an end to these incorrect practices . . . The same applies to interventions by deputies. They were often treated as an irritating nuisance . . The Government will see to it that deputies' interventions are treated in an adequate manner by the State organs . . . "

M. Cyrankiewicz went on to promise that all persons guilty of " applying illegal investigation methods and concocting trials " would be punished; that a special commission would be set up to care for the welfare of those released under the amnesty; and that the process of rehabilitation of those wrongly condemned in the past would be continued. More information on the work of Government departments would be made available to the Press, in order that public criticism of abuses might be made more effective. Steps would be taken to introduce greater administrative decentralization, and the powers of district councils would be increased In the final section of his speech, which dealt with international affairs, M. Cyrankiewicz expressed the hope that relations with the Western Powers would improve. Recalling the long-standing friendship between Poland and these countries, he referred in particular to the part played by Polish airmen in the Battle of Britain

In the ensuing debate a Roman Catholic deputy, **M. Horodynski,** appealed for greater mutual tolerance between Marxists and Catholics, whilst another Catholic, **M. Lubienski,** proposed that young Catholics should be allowed to set up their own organization, or that the Polish Youth Union should be transformed into an organization embracing young people of various outlooks He also described the Government departments for religious denominations as " redundant," and suggested that the decree on appointments to Church posts should be re-examined.

The Seym unanimously approved on April 28 the Government's amnesty Bill (see 14817 A), as well as a Bill curtailing the powers of the security police. Under the latter the police were forbidden to detain people without trial for more than a few weeks, and the prosecutor appointed by the court was required to supervise the methods of inquiry used. Other Bills adopted included one reducing the penalties imposed on peasants who failed to deliver their compulsory quotas to the State.

The release of prisoners under the amnesty law began on April 30, over 23,500 people being released during the first week of the amnesty. They were provided with free rail travel to their homes, and promised assistance in finding employment. It was officially estimated that about 80,000 people in all would benefit from the amnesty, including over 9,000 political prisoners, and that 30,000 of these would be released, 4,500 of whom were held on political charges.

The Supreme Military Court annulled on April 24 the sentences passed in 1951 on General Tatar (formerly Chief of Operations of the Polish Home Army) and eight other officers (see 11687 A), on the ground that the evidence on the basis of which they had been convicted of espionage had been obtained by " impermissible methods of investigation."

Developments in Eastern Germany.

The East German Government announced on April 26-27 that President Pieck had pardoned 88 political prisoners, all but one of whom were former Social Democrats; that an amnesty had been granted to 689 war criminals condemned by the Soviet military or East German civil authorities and held in East German prisons; and that 52 other war criminals were being detained pending a further review. Among the political prisoners released were Herr Max Fechner (a Communist), formerly Minister of Justice, who had been under arrest since 1953, and whose election and conviction had never been officially announced; Herr Paul Bender, formerly State Secretary in the Ministry of Supply, who was sentenced to six years' imprisonment for sabotage in 1954; and Herr Paul Szillat, a former member of the executive of the Socialist Unity Party, who was imprisoned in 1951 on a charge of fraud.

Dr. Melsheimer, the Chief Public Prosecutor, announced on May 13 that changes in the penal code would be introduced, under which penalties for minor political offences would be reduced, and major penalties restricted to cases of high treason, espionage, sabotage, and " warmongering." He stated that two new methods of punishment, conditional sentence and public censure, would be introduced; that prisoners would be assumed innocent until proved guilty; and that extenuating circumstances would be taken into consideration by the courts.

Herr Grotewohl, the East German Premier, declared on April 27 that there was no question of dismissing any members of the Government as had been done in Poland, Czechoslovakia, and Bulgaria. He claimed that the mistakes being corrected in those countries had largely been dealt with in Eastern Germany since 1953; in particular, he defended Herr Ulbricht (the Deputy-Premier, and first secretary of the Socialist Unity Party) against allegations that he had become the object of a " cult of the individual."

It was disclosed in East Berlin on May 3 that a pardon would be extended to all members of the Social Democratic Party in Eastern Germany who were serving prison sentences for " violating the law " or for " espionage " activities. A letter to this effect was sent by Herr Grotewohl and Herr Ulbricht to the executive committee of the Social Democratic Party.

Developments in Czechoslovakia.

M. Artur London, the former Deputy Foreign Minister who was condemned to life imprisonment at the Slansky trial in 1952 (see 12685 A), gave details on May 10 of the methods by which he had been induced to plead guilty at the time of his trial.

M. London, who stated that he had been completely rehabilitated by the Supreme Court, attributed his arrest in 1951 to the " disciples of Beria in Czechoslovakia," and explained that for several months he had refused to confess. As a result, however, of the " methods of violence " used against him and of his " mental anguish " at being accused by his comrades, he had finally decided that it was better to plead " guilty " than to accuse the Communist Party of having made a mistake. Asked whether the " methods of violence " to which he had been subjected meant torture, he replied: " It is the same thing " M London added that he had resumed his membership of the Communist Party and hoped to re-enter political life. His wife stated that she had regained her belief in his innocence shortly after the trial, and that this had been strengthened by the overthrow of Beria and the rehabilitation of those accused in the " doctors' plot " in the Soviet Union

[Mme. Londonova had sent a message to the court during her husband's trial asking for " the severest punishment " to be imposed on him She later left Czechoslovakia and until recently had been living in France]

Criticism of political abuses, which had developed more slowly in Czechoslovakia than in Poland, became increasingly outspoken from the end of April onwards. *Prace,* the organ of the trade union movement, criticized the National Assembly for not carrying out its " principal task " of " eliminating errors and shortcomings in the country's political, economic, and cultural life," and denounced the practice whereby whole groups, such as " persons of Jewish origin " and soldiers who had fought in the Western armies during the war, had been condemned for the alleged sins of individuals.

In Hungary, the official newspaper *Szabad Nep* published criticisms of the working of the Hungarian Parliament similar to those made in Poland and Czechoslovakia, whilst in Rumania, Bulgaria, and Albania statements were made by Government leaders stressing the desire of those countries for greater friendship with the Western Powers and with Yugoslavia, Greece, and Turkey.—(Times - Daily Telegraph - Manchester Guardian - Daily Worker - New York Times - Le Monde, Paris - A.D.N. Agency, East Berlin - Polish Embassy Press Office, London)

(Prev. rep. 14817 A; Releases, 14848 B.)

A. CANADA. — Unification of Canadian Labour Movement. - Founding of Canadian Labour Congress.

The two largest Canadian trade union organizations, the Trades and Labour Congress of Canada (T.L.C.C.) and the Canadian Congress of Labour (C.C.L.), merged on April 23 under the name of the Canadian Labour Congress (C.L.C.), representing about 80 per cent of the organized workers of Canada. The merger took place at a founding convention in Toronto attended by 1,600 labour leaders from all parts of the country. The convention, which lasted a week, was addressed on April 24 by Mr. St. Laurent, the Prime Minister of Canada, who welcomed the formation of the C.L.C. as an " historic event " in the development of the Canadian labour movement.

The new Canadian Congress of Labour has a membership of 1,018,000, of whom 640,000 were formerly members of the T.L.C.C. and 378,000 were affiliated to the C.C.L. Negotiations for the merger had been carried out by the former heads of the T.L.C.C. and the C.C.L., respectively Mr. A. G. Mosher and Mr. Claude Jodoin, Mr. Mosher becoming president of the unified organization. The largest Canadian union still outside the C.L.C. is the Canadian and Catholic Confederation of Labour (C.C.C.L.), which has nearly 100,000 members.

(Montreal Star - Department of External Affairs, Ottawa)

(Prev. rep. 14226 B; U.S. Unions, 14595 A.)

A. UNITED KINGDOM. — Coal Industry. - N.C.B. Report for 1955. - Deficit of £19,600,000. - Further Fall in Manpower. - Production Figures. - Scottish Coalfield Extension. - Miners' Wage Increases. - Death of Sir Hubert Houldsworth. - Mr. Bowman appointed Chairman of National Coal Board. - Revised Development Plan.

The tenth annual report and accounts of the National Coal Board, covering the year ended Dec. 31, 1955, were published on May 3. They showed that after meeting taxation and interest, and because of a loss of £27,600,000 on imported coal, the Board had incurred a deficit of £19,600,000. This deficit—the largest since nationalization—compared with a loss of £3,800,000 in 1954, and increased the Board's accumulated deficit since 1947 to £36,000,000.

Saleable output of coal totalled 221,600,000 tons, the decrease on 1954 being entirely due to a decline in the production of deep-mined coal, whereas output from opencast sites was higher. The report attributed the decline in deep-mined output to (*a*) a further fall of 5,200 in manpower; (*b*) labour disputes, which "cost the industry more coal than in any year since nationalization."

Salient points from the report are summarized below:

Costs, Prices, and Profits. Costs of mined coal averaged £3. 7s. 2d a ton, or 5s. 4d. more than in 1954, the largest increase (2s 4d. a ton) having again been in wages. Pithead coal prices rose by an average of 4s. 6d a ton to 68s, resulting in a profit (before deducting interest charges) of only 9d. a ton, compared with 1s. 7d. in 1954.

Profits on opencast coal totalled £4,700,000, or 8s. 4d. a ton.

Divisional Results. Only two divisions increased production in 1955, viz., the East Midlands division (by 500,000 tons) and the Northern division (by 5,000 tons). In the remaining seven divisions output fell, the largest decreases being in the Scottish, North-Eastern, and South-Western divisions. The largest percentage decrease occurred in Kent. The largest profit (7s. 5d a ton) was earned by the East Midlands division, financial results for the other divisions ranging from a profit of 3s 11d. a ton in the North-Eastern division to a loss of 10s. 9d a ton in Kent

Productivity. Production at the coalface averaged 65.5 cwt. per manshift, the highest ever recorded, but men working at coalfaces where power-loading was in operation averaged 103 3 cwt. per manshift. Overall production (i.e. taking into account the whole number of men employed both under and above ground), at 24.5 cwt. per manshift, was 0.1 cwt less than the 1954 record.

Progress of Mechanization. In 1955, 11.1 per cent of the total output of mined coal was mined by machines which loaded it direct on to conveyor belts, an increase of nearly 3 per cent over 1954. During the year 475 power-loading machines were installed, and it was hoped to instal a further 1,175 in 1956.

Opencast Mining. The report stated that the full benefit of new excavating plant installed in 1955 would not be felt until 1956, when three large new sites (with reserves of 17,000,000 tons) would be producing. Preparatory work was now beginning on a fourth site, which would eventually yield 20,000,000 tons. It added that output per manshift from opencast operations was higher, and costs lower, than for deep-mined coal, and the Board's long-term policy was to maintain and if possible increase opencast production. Opencast mining would continue "at least until 1965."

Manpower. There was a net manpower decline of 5,200, and the N.C.B. estimated that at Dec 31, 1955 the industry needed 13,000 more miners, including about 9,000 in the North-Eastern, West Midlands, and South-Western divisions. The report stressed that although the manpower problem had been accentuated by severe competition from other industries, the number of men employed on pit reconstruction and development work "would have made it difficult to avoid a fall in output even if no other difficulties had arisen"

Inland Coal Consumption. This totalled 214,700,000 tons, or 1,400,000 tons more than in 1954. The biggest increases in demand were from power stations (3,300,000 tons more) and gasworks (500,000 tons more); household deliveries were 960,000 tons less (mainly owing to the mild weather), and deliveries to the railways 840,000 tons less. Colliery power-houses used 670,000 tons less, and industry as a whole 160,000 tons less, principally owing to the greater use made of alternative fuels by the steel industry

New Collieries and Colliery Reconstructions. By the end of 1955 about 30 new collieries and 137 major reconstruction schemes had been completed since Vesting Day or were in progress A further 160 schemes (including 14 new collieries and 12 new surface mines) would be begun shortly. The total spent on reconstruction in the coalfields since 1947 amounted to £323,000,000 (nearly half on major reconstruction schemes). Only about £11,000,000 of the amount spent on major schemes had as yet resulted in improved output, however, owing to the time needed to complete such large engineering works.

In this connexion the report gave a warning that of 280 collieries which in 1955 had produced 30,000,000 tons of coal, not one could reasonably be expected to be still working in 15 years' time

Exports and Imports. Exports amounted to 11,700,000 tons, against 13,600,000 tons in 1954. Imports totalled 11,600,000 tons, compared with over 3,000,000 tons in 1954.

Miners' Earnings. These increased during the year by an average of about 6 per cent.

Capital Expenditure and Borrowing. During 1955 the Board spent £93,000,000 on capital account (compared with £84,700,000 in 1954), including £73,700,000 on collieries and £2,300,000 on housing. About £89,500,000 had been borrowed by the Board from the Minister of Fuel and Power, including £70,000,000 funded as 50-year annuities.

Mr. James Bowman, the Board's new chairman (see below), announced on the same day that the N.C.B. intended to apply to the Minister of Fuel and Power for permission to increase coal prices. He explained that the Board "did not intend to go on carrying a deficit indefinitely," and that although a profit of £9,175,000 had been made in the fourth quarter of 1955 and a further profit in the first quarter of 1956, the rate was not large enough to wipe out the deficit, "especially as wage increases amounting to over £14,000,000 have already been granted (see below) and piece-workers will probably get a further increase later in the year." The amount of the proposed increase had not yet been decided, but a decision would be reached very shortly.

Speaking of "the ever-present problem of manpower," Mr. Bowman said that the Board expected—judging by the tendencies at the end of 1955—to have to budget for a further fall in manpower of 5,000 men during 1956 In an attempt to mitigate the results of the shortage it was adopting the following measures: (1) the stepping-up of power loading, which in 1955 had had an effect on output equivalent to the contribution of 4,000 workers, (2) a special inquiry at pit level (undertaken after consultation with the National Union of Mineworkers) into the reasons why miners were leaving the pits; (3) the establishment of training pits in areas of "labour surplus" (e.g. Scotland and Durham) to train men for transfer to deficiency divisions such as Yorkshire and the Midlands; (4) intensified "methods studies" to try to find means of economizing manpower.

With regard to management, Mr. Bowman said that the N C.B. had "by and large brought into being the structure of the Fleck report," but that a large number of staff vacancies still remained to be filled He added that the Board "would not be deterred by criticisms that it is carrying excessive staff"

The following table shows the average weekly rates of coal production and consumption, and of manpower, output, and absenteeism, in the first quarter of 1956:

	Saleable Mined Coal Produced Tons	Plus Opencast Tons	Total Production Tons	Inland Consumption Tons	Overseas Shipments & Bunkers† Tons
January ..	4,231,125	180,275	4,411,400	4,533,750	196,500
February ..	4,277,000	182,400	4,459,400	4,967,000	204,000
March* .	4,258,960	227,100	4,486,060	4,870,200	181,200
1st. Quarter	4,255,695	196,592	4,452,287	4,790,317	193,900

	Wage-earners on colliery books		No. of shifts worked per wage-earner	Output per manshift at coal-face	Output per manshift overall	Percentage of absenteeism
	Total	at coal-face		Tons	Tons	
January ..	702,025	287,075	4 78	3 367	1.259	13.68
February .	703,500	287,275	4.86	3.335	1.248	14.99
March* ..	704,900	287,720	4.89	3.539	1.240	13.49
1st. Quarter	703,475	287,357	4.84	3.413	1.249	14 05

* Average of five weeks. † Including fishing vessels but excluding coastwise bunkers.

Output in January at the coal face was the highest in the history of the industry.

Other developments in the coal mining industry during recent months are summarized below.

Coalfield Reorganization and Extension. Plans to increase the output of the Alloa coalfield (Scotland) from 1,500,000 tons to 2,200,000 tons by 1961, and to 3,000,000 tons by 1965, were announced by the National Coal Board on Feb. 12. The proposals included (1) the establishment of a new colliery, estimated to cost £7,000,000, at Airth (south of the Forth), to employ 2,000 men and yield a daily output of 4,000 tons from workable seams of 500,000 tons; (2) the sinking of four other new pits to supply the bulk of the 700,000 tons of coal to be allocated annually from the area to the new Kincardine generating station (to be the largest in Scotland); (3) the reconstruction and modernization of other pits, with the aim of replacing the existing 18 pits in the area by 10 larger pits. The developments, which were part of the general Scottish plan of replacing exhausted coalfields and providing fresh productive seams in the deeper and less accessible seams of Clackmannan, Fife, Ayrshire, and the Lothians, would increase the capital expenditure programme in the area to £20,000,000, would tap reserves of over 400,000,000 tons, and would necessitate the increase of the labour force in the area from 7,000 to 9,000.

Miners' Wage Increases. Provisional agreement was reached on Feb. 16 between the N.C B. and the National Union of Mineworkers for immediate increases of 2s. 4d. a shift (or 14s. weekly) for day-wage miners and of 2s. 8d a shift (or 16s. weekly) for winding enginemen and craftsmen, including electricians, blacksmiths, and fitters The increases, which affected nearly 400,000 workers and were expected to cost about £14,000,000 a year, were approved by an N.U.M. delegate conference on Feb. 23.

Coal and Coke Prices. Summer prices for house coal operated from April 23, the basic alterations being the same as in past years, but the reductions varying from place to place to take account of merchants' costs and rail freights. The N.C.B. stated that in the Northern Region summer prices would operate until Oct. 31, but that in London and the South the full reduction would be operated only until June 10, after which prices would rise by 2s. 6d. a ton until Aug. 31, and by a further 2s 6d. until Nov. 30, when winter prices would be reintroduced.

Household coke prices were raised from April 23 by an average of 3s. 6d. a ton in districts (such as Newcastle and North Wales) without summer price schemes, but were reduced by an average of 5s a ton in London, Southern England, the Midlands, and the North-West, where summer price reductions operated. Foundry coke prices were increased by 3d. a ton, plus the actual increase in railway rates.

Coal Distribution. The Minister of Fuel and Power (Mr. Aubrey Jones) announced on March 12 that he had decided to set up a departmental committee to inquire into distribution costs and profit margins in respect of home-consumed coal and coke. The committee's chairman would be Sir Thomas Robson (a past president of the Institute of Chartered Accountants), its other members being Mr. C. T. Brunner, a former president of the Institute of Transport and a director of Shell-Mex and B.P. Ltd; Professor A. D. Campbell, Professor of Applied Economics, St. Andrews University; Mrs. F. H. Cantwell, chairman of the Domestic Coal Consumers' Council; Sir Graham Larmor, a member of the Central Council of the Irish Linen Industry; and Mr. W. J. P. Webber, general secretary of the Transport Salaried Staffs Association.

The appointment was announced on Dec. 29 of the following part-time members of the National Coal Board: Mr. S. P. Chambers, a deputy chairman of Imperial Chemical Industries, Ltd.; Mr. J. Crawford, general president of the National Union of Boot and Shoe Operatives, and a member of the T.U.C. General Council; and Sir Henry Wilson Smith, deputy chairman of Powell Duffryn Ltd.

Sir Hubert Houldsworth, Q.C., the chairman of the National Coal Board, died on Feb. 1 and was succeeded by Mr. James Bowman, the chairman-elect. Sir Hubert (who was 66) succeeded Lord Hyndley as chairman of the N.C.B. in 1951, having previously been chairman of the East Midlands Board.

Revised Development Plan for Coal Industry.

Far-reaching revisions of the plan for the reorganization of the coalmining industry published in 1950 by the N.C.B. under the title *Plan for Coal* (see 11093 A) were announced by Mr. Bowman on April 23 He explained that the changes had been necessitated by the discovery that the estimates of costs, rises in production, and manpower needs made in 1950 were no longer valid. Whereas *Plan for Coal* had envisaged the expenditure of £650,000,000 (at 1949 prices) in order to increase the output of deep-mined coal to 240,000 tons annually, the revised plan would cost about twice as much.

The new plan, published under the title *Investing in Coal*, estimated that the objective of 240,000,000 tons could be reached only by including opencast coal and spending £1,350,000,000, at 1955 prices. Of this amount, about £350,000,000 had so far been spent, leaving £1,000,000 to be spent in the next 10 years. As the N.C.B.'s borrowing powers were at present limited to £300,000,000, it was seeking authority to borrow a further £350,000,000, making £650,000,000 in all. "Because reconstruction in the coal industry is not a once-and-for-all effort but a perennial investment," the revised plan continued, "the Board will also have to invest money in major schemes which will not come to fruition until after 1965. A total of £590,000,000 will be spent in the next five years, and £410,000,000 in 1961-65. The Board's provisional view is that investment in the five years after 1965 will not be much lower than the amount it is proposed to spend in 1961-65."

Investment in Coal attributed the increase in costs, as compared with the 1950 plan, to steeply rising prices, under-estimation of difficulties and costs in the original plan, and the inclusion of additional projects. Thus, whereas in 1950 it had been estimated that only 618,000 miners would be required in 1965—or 80,000 fewer than in 1950—the N.C.B. now estimated that in 1960 the industry would require 682,000 miners, with an output per man-year of 319 tons, whilst in 1965 it would still require 672,000, with an output per man-year of 342 tons. Two main reasons were given for this modification (1) the decline in the proportion of saleable coal in total colliery output was proceeding at a rate of about 1,000,000 tons a year, and must be expected to continue for some years; (2) the expected increase of 2½ per cent in the attendance rate had not so far been obtained.

Commenting on the revised proposals, Mr. Bowman maintained that the sum intended to be invested—"no more than 10d. of every £1 invested in the economy as a whole"—was "not excessive for an industry which is the main source of primary fuel for the whole country." Atomic energy, he said, was "unlikely to affect the situation much over the next 15 years," and the "fuel gap" was "likely to grow considerably." Without further investment, output would certainly drop—"perhaps to the extent of producing by 1965-70 some 40,000,000 tons less than in 1955, or 70,000,000 tons less than we hope to produce in 1970 with the investment proposed."—(Ministry of Fuel and Power - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Coal Production, 14661 A; "Plan for Coal," 11093 A; N.C.B. Borrowing Powers, 11656 A; N.C.B. Report, 1954, 14269 A; Fleck Report, 14115 A.)**

A. INDIA.—Report of Prohibition Inquiry Committee. - Recommendation for Nation-wide Prohibition in 1958. - Parliamentary Support. - Omission of Target Date.

The report of the Prohibition Inquiry Committee set up by the Indian Planning Commission was published in New Delhi on Oct. 25, 1955. It recommended that "the target for complete nation-wide prohibition should be April 1, 1958."

The committee pointed out that there was strong support for a nation-wide prohibition policy in every State it had visited, as well as a demand to put that policy into effect as early as possible. In view of the experience of prohibition in States such as Bombay and Madras, the report declared that "prohibition is not only a sound policy but also a practical proposition" In recommending the target date for nation-wide prohibition, the committee explained that it had taken into consideration both the urgency of the situation and the practical difficulties which had to be overcome by the State Governments concerned. It suggested that State Governments should declare their acceptance of this policy and of the target date by the end of 1955, in order to prepare the public to co-operate fully in implementing the prohibition programme, and that the Government of India should also issue a statement to the effect that prohibition had become its national policy. The intervening period should be used to bring into existence the necessary machinery, and to take other preparatory steps towards complete prohibition

States where prohibition was already in force (the report continued) should exercise greater vigilance and put into effect additional measures recommended by the committee to ensure better and more concrete results In States where partial prohibition existed, steps should be taken to widen its scope and to secure effective implementation so as to cover the entire State area Among practical steps to enforce prohibition gradually in States where it was not yet in effect, the committee proposed that all "visible drinking" should be stopped immediately by banning liquor in hotels, bars, restaurants, and clubs, and at social gatherings Tourists and foreign residents would still be able to get liquor in separate drinking-rooms at hotels, but foreign Embassies would be expected to co-operate by not serving alcoholic drinks at public receptions attended by Indians.

In addition, the committee recommended the following steps as from April 1, 1956 · all advertisements for drink should be banned; the number of liquor shops (public-houses) should be progressively reduced, and the shops closed for an increasing number of days; the strength of spirits should be lowered, and liquor shops should be moved to back streets. Abstinence should be made a rule of conduct for all Government servants, and all drinking of liquor (except by foreigners in private, and for certified medicinal purposes) should be banned completely by April 1, 1958.

The House of the People unanimously passed a resolution on March 31 recommending that prohibition should be regarded as an integral part of the second Five-Year Plan, and that the Planning Commission should "formulate the necessary programme to bring about nation-wide prohibition speedily and effectively." No target date was fixed in the resolution, which had been moved by Mr. K. P. Tripathi (Congress) and which replaced one previously moved by another Congress member (Mr. C. R. Narasimhan) calling for the fixing of a target-date for nation-wide prohibition.

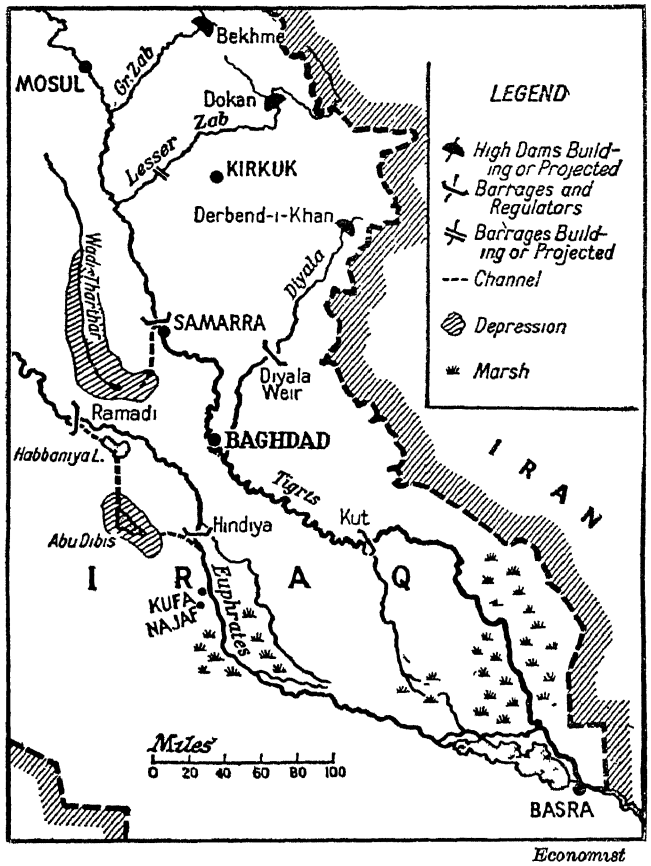
Mr. Tripathi's motion was supported by the Minister for Planning (Mr. G L. Nanda), who argued that a target date for the whole country might delay prohibition instead of speeding it up. Expressing the view that prohibition could succeed on a nation-wide basis, Mr. Nanda pointed out that it was already in force over one-third of the area and one-fourth of the population of India The only aspect of the matter that had to be considered was that there should be "a real, genuine prohibition and not a shadow of it." In this connexion Mr. Nanda gave an assurance that the Central Government had no intention of letting matters drift, and said that they had outlined the programme which they proposed to pursue in the draft Second Five-Year Plan.

Earlier in March it had been reported in the Indian Press that most State Governments had expressed the view that they would be unable to accept the target date recommended by the Inquiry Committee, whilst many State Governments had made increased financial assistance from the Centre a condition for enforcing prohibition. Among States suggesting a more distant target date were Assam, the Punjab, and Uttar Pradesh.

At present only four of the Indian States (Andhra, Bombay, Madras, and Saurashtra) have practically complete prohibition, whilst nine others have partial prohibition in the form of "dry" areas or "dry" days.—(The Hindu, Madras - The Statesman, Calcutta - Times of India, Bombay - Indian High Commissioner's Office, London) **(Prev. rep. Prohibition in Bombay, 10651 A; in Madras, 9562 B.)**

A. IRAQ. — The Tigris-Euphrates Scheme. - Opening of Samarra and Habbaniyah Barrages. - Five-Year Development Plan. - Opening of First Television Station in Middle East.

The Tigris barrage near Samarra (see 14661 A) was officially inaugurated on April 2 by King Faisal II, whilst on April 5 the King inaugurated another flood-control barrage across the Euphrates at Ramadi, near Habbaniyah. These two barrages, together with others to be built (see below) and those already in existence, will eventually be supplemented by an extensive system of irrigation canals, pumping stations, etc., designed to restore the "land of the two rivers" to its ancient fertility, and to re-create the conditions that nurtured the world's first highly-developed civilization in the Tigris-Euphrates valley. It is estimated that the whole project will take 20 to 50 years for its completion.



Economist

The first recorded civilization, that of Sumeria, arose in the "land of the two rivers" in the fourth millenium B C., and was based on an intricate system of irrigation canals. Subsequent civilizations also flourished in the Tigris-Euphrates valley for many centuries. The canal system began to fall into disrepair in the seventh century A D., and was completely destroyed in the Mongol invasions of the 13th century

A British firm—Messrs. Coode and Partners, of London—acted as consulting engineers for both projects, which are described below.

Samarra Barrage. This project, for which the first surveys were made in 1948, was carried out in two parts (1) The digging of a 40-mile canal linking the Tigris River with the Wadi Thartar depression (see map), in which 60,000 million cubic metres of water will be stored for irrigation purposes. The Wadi Thartar is 63 miles long and has an area of about 800 square miles. (2) The construction of a barrage across the Tigris, together with a canal to irrigate 1,300,000 acres A power station (to be completed by the end of 1956) will also be built near the barrage and will provide 100,000 kw. of hydro-electric power for agricultural development in the area The first part of the project cost £6,500,000, and the second part £9,000,000.

The project involved the shifting of the bed of the Tigris River for several miles and the removal of about 50,000,000 cubic yards of sand, soil, and rock—one of the biggest earth-moving contracts ever carried out, and about 60 per cent. of that involved in the construction of the Suez Canal. The earth-moving was carried out by the British firm of Balfour, Beatty & Co., the barrage itself—which carries a roadway—was built by a German firm, E. Zublin A G ; and the sluice-gates were constructed by the British firm of Ransomes and Rapier, Ipswich. As stated in 14661 A, the barrage will not only promote agricultural development but will relieve Baghdad from the frequent and disastrous floods which had occurred on many occasions in the past when the Tigris was in spate.

Habbaniyah Barrage. This barrage, which also carries a roadway, was built by a French firm (*S.A. Hersent Entreprises Metropolitaines et Coloniales*) at a cost of nearly £1,400,000. It is linked by a canal to the nearby Lake Habbaniyah (near the former R A F. base), which acts as a natural reservoir for the waters impounded by the barrage. Work on the barrage began on May 13, 1953, and was completed in less than two years The sluice-gates, like those of the Tigris barrage, were built by Ransomes & Rapier under sub-contract.

In addition to the above-mentioned barrages, a third important barrage—the Dokan dam—is under construction on the Lesser Zab river, a tributary of the Tigris. When completed in 1958 it will have a storage capacity of about 7,500 million cubic yards, sufficient to irrigate a large area of north-eastern Iraq. A fourth barrage, scheduled for completion in 1960, will be built at Derbend-i-Khan, near the headwaters of the Diyala River. Of the barrages built in earlier years, the most important is the Kut Barrage, on the Tigris, constructed by Balfour, Beatty & Co. between 1934 and 1939.

Two new bridges over the Euphrates, designed to facilitate communications and to open up the central part of the river valley, were inaugurated on April 8 by the Prime Minister of Iraq, General Nuri es-Said. One, at Hindiya—65 miles south of Baghdad and close to the site of Babylon—was built by the British firm of Dorman, Long & Co. (Middlesborough) and is 570 feet long and 46 feet wide, with a steel span. The other, built by the German firms of Philip Holzmann (Frankfurt) and C. H Jucho (Dortmund), is at Kufa, about 50 miles south of the Hindiya bridge.

A five-year development plan, covering the period 1955-59 and envisaging expenditure of £108,000,000 was approved on April 3 by King Faisal and the Iraqi Cabinet. It was drawn up by the Minister of Development, M. Abdul Majid Mahmoud, and will be financed largely from Iraq's oil revenues.

The plan provided for the following projects, *inter alia*, during the five-year period the completion of the Samarra and Habbaniyah barrages, mentioned above ; the building of the Dokan dam, the Derbend-i-Khan dam, and other flood-control works ; new canals, irrigation channels, roads, railways, and bridges in different parts of the country , new schools, hospitals, dispensaries, and laboratories, including scientific and technical institutes at Baghdad, Mosul, and Kirkuk ; electrification projects, including large generating stations at Baghdad and Basra ; housing projects , and the construction in Baghdad of an international airport and a sports stadium.

Major industrial enterprises to be built under the plan will include a cotton textile mill at Mosul, to produce 20,000,000 square yards of cotton textiles a year , cement factories at Mosul and Sarchinar, each of which will produce 350 tons of cement a day , a sugar refinery at Mosul, to produce 10,000 tons of sugar a year from Iraqi sugar-beet and 25,000 tons a year from imported raw cane sugar , and a bitumen refinery at Qaiyarah, to produce 60,000 tons of bitumen a year.

The first television station in the world devoted primarily to child and adult education, and also the first television station in the Middle East, was opened in Baghdad on May 2 by King Faisal. Built by the British firm of Pye Ltd. (Cambridge), and installed with British help, it will send out programmes to Iraqi schools during the day and give adult education and cultural programmes in the evenings.
(Iraq Development Plan - Iraqi Embassy, London - Times)
(Prev. rep. 14661 A.)

B. NEW ZEALAND. — Bipartisan Inquiry Committee into Compatibility of Ministers' Private Interests with Holding of Ministerial Office.

The New Zealand Parliament appointed a 12-member select committee on May 14 to inquire into and report on the principles that should be observed by Cabinet Ministers in the arrangement of their private interests while holding office under the Crown. Its members are : National Party—Mr. Holland (Prime Minister), Mr. Holyoake (Deputy Prime Minister and Minister of Agriculture), Mr. Sullivan (Minister of Labour), Mr. Watts (Minister of Finance), Mr. Marshall (Attorney General), Mr. C. G. Harker, and Mr. John Rae ; Labour Party—Mr. Walter Nash (Leader of the Opposition), Mr. C. F. Skinner, Mr. A. McLagan, Mr. H. G. R. Mason, and Mr. A. H. Nordmeyer. The appointment of the committee arose out of the dispute over Mr. Eyre (Minister of Industries, Commerce and Customs) in connexion with the holding of portfolios which allegedly conflicted with his private interests as an importer and manufacturer.—(Directorate of Information Services, Wellington) **(Prev. rep. 14780 D.)**

C. EGYPT. — Recognition of Communist China.

It was announced in Cairo on May 16 that Egypt had formally recognized the People's Republic of China and had withdrawn recognition from the Chinese Nationalist Government in Formosa. The Nationalist Government broke off diplomatic relations with Egypt on the following day and withdrew its Ambassador from Cairo. (Times - Le Monde)

MAY 26—JUNE 2, 1956

A. MIDDLE EAST. — Dr. Hammarskjöld's Peace Mission. - Report to Security Council. - Unconditional Cease-fire accepted by Israel and Arab States. - Strengthening of U.N. Observation Posts in Gaza Area. - Military Pact between Egypt, Saudi Arabia and Yemen. - Jordanian Military Agreements with Egypt and Lebanon.

The U.N. Secretary-General, Dr. Hammarskjold, returned to New York on May 6 after successfully carrying out the mission, entrusted to him by the Security Council (see 14793 A), of relieving the tension between Israel and her Arab neighbours. During his stay in the Middle East (April 10 to May 3), during which he made Beirut his headquarters, Dr. Hammarskjold had a number of meetings with the leaders of Egypt, Israel, Jordan, Syria, and the Lebanon in the capitals of the various countries.

Dr. Hammarskjöld's Report to Security Council.

The results of Dr. Hammarskjold's peace mission to the Middle East were embodied in a voluminous report presented by him to the Security Council on May 10. They were, in brief, as follows: (1) Egypt, Israel, Jordan, Syria, and the Lebanon had all signified their "unconditional acceptance" of the cease-fire provisions of the Palestine armistice agreements, whilst reserving the right of self-defence in the event of any aggression; (2) Egypt and Israel had accepted proposals by General Burns (chief of the U.N. Truce Supervision Organization) for observation posts to be set up along the demarcation lines of the "Gaza strip" and for U.N. mobile patrols to keep watch on the Egyptian-Israeli border; (3) Syria and Israel had agreed in principle to reduce tension and prevent incidents in the area of the Sea of Galilee (Lake Tiberias).

General Observations. After pointing out that he had kept strictly within the scope of the mandate imposed on him by the Security Council's resolution, Dr. Hammarskjold continued. "... I have devoted all my attention to the limited task of re-establishing first of all a cease-fire, and, based on the cease-fire, a state of full compliance with the armistice agreements. It may be said that this does not meet the needs of the situation. In my own view, confirmed by the frank and full discussions I have had with the leaders in the Middle East, I feel that the re-establishment of full compliance with the armistice agreements represents a stage which has to be passed in order to make progress possible on the main issues, which I have considered to be outside my mandate.

"It is still too early to say what has been achieved in substance, but the efforts made, in my view, were necessary as an initial step Their value and effect will depend first of all on the goodwill and the actions taken by the Governments directly concerned, and in the second place on the support given to those Governments by the world community, as represented by the United Nations

"What has been done may open the door to new fruitful developments. The initiative is now in the hands of the Governments who are parties to the armistice agreements It is my feeling that there is a general will to peace, and that this will should be fostered and encouraged, not by attempts to impose from outside solutions to problems of vital significance to everyone in the region, but by a co-operation which facilitates for the Governments concerned the taking unilaterally of steps to increase confidence and to demonstrate their wish for peaceful conditions

"I believe that the present situation offers unique possibilities. If we have previously experienced chain reactions leading to a continuous deterioration of the situation, we may now have the possibility of starting a chain of reactions in the opposite direction The final settlement is probably still far off, but even partial solutions to the harassing problems of the region would be a contribution to the welfare of the peoples concerned and to the peace of the world."

The Cease-Fire Agreements. Assurances of strict compliance with the cease-fire provisions of the Egyptian-Israeli armistice agreement were given to Dr Hammarskjold by Colonel Nasser and Mr. Ben-Gurion on April 12, shortly after the Secretary-General's arrival in the Middle East (see page 14797, first column) Similar unconditional assurances were given to Dr Hammarskjold on April 29 by Samir el-Rifai, then Prime Minister of Jordan, in respect of the Israeli-Jordanian armistice agreement; on May 1 by M Selim Lahoud, Foreign Minister of the Lebanon, in respect of the Israeli-Lebanese armistice agreement; and on May 2 by Sayed Ghazzi, the Prime Minister of Syria, in respect of the Israeli-Syrian armistice agreement On the Israeli side, Mr. Ben-Gurion sent a letter to Dr. Hammarskjöld on May 3 informing him of Israel's "full and unconditional" acceptance of the armistice agreements with Jordan, Syria, and the Lebanon.

As stated above, all the Governments concerned reserved to themselves the right of self-defence against any aggression which might be directed against them. Jordan and the Lebanon also stressed that any unilateral action by Israel in diverting the waters of the Jordan River would constitute a violation of the armistice agreements.

Arrangements on Egyptian-Israeli Border. Dr. Hammarskjöld informed the Security Council in his report that Egypt and Israel had accepted proposals by General Burns "for the establishment of an equal number of U.N. observer posts on each side of the [demarcation] line," the activities of these U.N. military observers being "additional to those provided for under the general armistice agreements." The Government of Israel had set a time-limit of six months (i e until Oct. 31, 1956) for the operation of this system, whilst the Egyptian Government had set no time-limit. It was, however, "understood that the Government of Israel will consider proposals from the Chief of Staff [General Burns] for the continuation of this arrangement after Oct. 31 if, in his view, the situation at the time calls for it." After stating that the new arrangements would be formally adopted by the Egyptian-Israeli Mixed Armistice Commission, Dr. Hammarskjold described them as follows

(1) The location and number of the observation posts on the Egyptian side of the demarcation line would be agreed with Egypt, and of those on the Israeli side with Israel. There would be an equal number of observation posts established on each side It was the intention of General Burns to arrange for six such posts on each side of the line.

(2) U.N observers would have free access to these positions at any time.

(3) If so desired by the party concerned, the observers would be accompanied on their way to and during their stay at the observation posts by an officer of the party on whose side of the demarcation line the post was situated.

(4) Before proceeding to any of the observation posts, the observer would notify the senior Egyptian or Israeli delegate on the Mixed Armistice Commission, as the case might be, to ensure that the Egyptian (Israeli) forces allowed unhindered passage to the posts.

(5) The reports of U.N observers stationed at observation posts would cover violations of the Egyptian-Israeli armistice agreement They would be presented to the Mixed Armistice Commission, and used in the examination of complaints

(6) The parties would designate a route which U N. observers would follow to the observation posts.

(7) The U.N. Truce Supervision Organization might send patrols along the demarcation line between the observation posts when required, arrangements being made beforehand with the Armistice Commission,

Dr. Hammarskjold added that neither Egypt nor Israel had raised objections to proposals for the free movement of U N. observers in the demilitarized zone of El Auja, in order to verify that both parties were complying with the relevant provisions of the armistice agreement.

Arrangements on the Israel-Syrian Border. Dr. Hammarskjold reported as follows on the situation on the Syrian-Israeli border:

"To facilitate compliance with the armistice agreement, and with the special arrangements made in regard to the eastern shore of Lake Tiberias, proposals were made to Syria and Israel for the placing of fixed observation posts manned by U N military observers on the eastern and north-eastern shore of the lake. Approximately two such posts would be on Syrian-controlled territory and one in territory controlled by Israel. Observers would have the right to move to these posts, and to any point where difficulties requiring their intervention might arise, in a special U N. boat.

"Syria accepted these proposals and, in regard to the movement of a U.N. boat on the lake, expressed the view that ... U.N. military observers should have complete freedom of movement thereon.

"Israel does not agree to a U.N. military observer boat on Lake Tiberias, nor to the establishment of a military observer post on Israeli territory, considering these measures as derogating from the rights which she claims over the whole extent of the lake and the territory to the north thereof, as far east as the old Palestine-Syrian boundary Israel would nevertheless be prepared, after the lapse of a month, to consider a proposal by the Chief of Staff for the establishment of a U.N. military observer post should he then consider it desirable.

I find it necessary to maintain the proposal both for a police boat and for a post on Israeli territory Short of these arrangements, I can scarcely find that the patrolling arrangements, mentioned below under (*d*), provide adequate safeguards.

"It will be recalled that in its resolution of Jan. 19, 1956, the Security Council endorsed five proposals in regard to Lake Tiberias which had been made by the Chief of Staff. The present status of these proposals is as follows.

(*a*) The request to refrain from firing in contravention of the Israeli-Syrian armistice agreement is covered by the cease-fire assurances referred to earlier in this report [See above].

"(*b*) The Syrian authorities have agreed to prevent inhabitants of Syria from fishing in the lake pending a solution of the problem of fishing permits The Israelis have agreed to grant fishing permits to inhabitants of villages in Syria and the demilitarized zone near the lake As the Israelis hold that they alone can issue permits to fish in the lake, application must be made through the Syrian representative on the Mixed Armistice Commission to the Israeli representative. The Syrian Government, on the other hand, considers that permits should be issued by the chairman of the Mixed Armistice Commission.

(*c*) The Israeli authorities have agreed not to interfere with inhabitants of Syria drawing water from Lake Tiberias, provided that the water is drawn for domestic purposes only The Syrian authorities have agreed not to interfere with Israeli fishing in Lake Tiberias

(*d*) Israel has agreed to adopt a policy of keeping her police boats back from the eastern shore of the lake, except when it is necessary to approach it 'for security purposes.' I understand this latter phrase to refer only to measures for the preservation of order and the protection of Israeli fishermen."

A section of Dr. Hammarskjöld's report dealing with "special questions" pointed out (1) that Israel had raised the question of "Egyptian interference with Israeli shipping through the Suez Canal," and had maintained that Egypt's continued blockade constituted "a case of non-compliance with Article 1 of the Egyptian-Israeli armistice agreement"; (2) that Jordan and the Lebanon had declared that any unilateral action by Israel in diverting the waters of the Jordan River would be regarded as a violation of the armistice agreements.

The Suez Canal Blockade. The U.N. Secretary-General commented as follows on this matter:

"My attitude has been that the Suez question, as adjudicated by the Security Council [i e. in its resolution of Sept. 1, 1951 (see 11699 A) to which the Israeli Government referred] is not a question of compliance with the armistice agreement in the sense of my mandate For that reason I have not, within the framework of my mandate, discussed the issue with the Egyptian Government For the same reason I have found that I should not in this report evaluate the legal reasons presented by Israel in support of the view that the blockade represents a case of non-compliance of the armistice agreement.

"My mandate is directly concerned with the state of tension along the armistice demarcation lines, and the state of compliance or non-compliance with the armistice agreement as a cause of such tension. In an approach looking beyond the immediate problems it is obvious that the question raised by the Government of Israel should come under consideration in the light of the Council's finding, in its resolution of Sept. 1, 1951, that the blockade is incompatible with the armistice regime, as this regime put an end to a state in which Egypt could avail itself of belligerent rights"

[The exchange of correspondence between Dr. Hammarskjold and Mr. Ben-Gurion on this matter had been released at U.N Headquarters on April 16, while the Secretary-General was still in the Middle East Mr Ben-Gurion, in a letter dated April 13, had asked Dr. Hammarskjold to ascertain, during his discussions in Cairo, whether the Egyptian Government's readiness to implement the armistice agreement meant "that they no longer consider Egypt to be at war with Israel, as they have claimed before the Security Council." He also asked to be informed whether "they [the Egyptians] realize that the observance of the armistice agreement obligates them to discontinue the closing of the Suez Canal to Israeli ships and to desist from other forms of interference with Israeli shipping." In his reply (of that same date) Dr. Hammarskjold pointed out that his mandate under the Security Council's resolution was concerned "primarily with the state of compliance with the armistice agreement relevant to the situation which has developed along the demarcation lines, in the demilitarized zones, and in the defensive areas."

Mr Sharett (Foreign Minister of Israel) sent another message to Dr. Hammarskjold on the following day reiterating his Government's view that Egyptian interference with legitimate Israeli shipping constituted "a hostile act incompatible with the armistice agreement." He added: "This view is endorsed by an express resolution of the Security Council of Sept. 1, 1951, which ruled that, in view of the existence and enforcement of the armistice agreement, Egypt is not entitled to claim and exercise belligerent rights Egypt's acceptance of Article 2 (ii) of the armistice agreement (which prohibits warlike and hostile acts by both parties) cannot be regarded as genuine and unconditional if interpreted as leaving it open for Egypt to engage in such hostile acts as she may deem fit"].

The Jordan Waters Dispute. Dr. Hammarskjold commented on this question as follows

"A judgment on legal grounds about the question raised by Jordan and Lebanon has to take into consideration the status of the demilitarized zone as established by Article 5 of the armistice agreement between Syria and Israel, the effect of the [Jordan River] diversion scheme in the light of the rules relevant to the demilitarized zone as interpreted by the Chief of Staff, and, finally, the situation created by the Security Council resolution of Oct. 27, 1953 [see 13283 A]

Under these circumstances my formal stand under the terms of my mandate must be to request the parties to abide by decisions concerning the matter taken by the Security Council or under the armistice agreements A departure on my side from the stand thus taken would have meant that I interfered with the jurisdiction of the Council or of the Chief of Staff."

Dr. Hammarskjold announced on May 24 that five countries (Australia, Canada, New Zealand, Norway, and Sweden) had responded to his request to assign officers for service as U.N. military observers with the U.N. Truce Supervision Organization in Palestine. The request was made in connexion with the agreement, negotiated by Dr. Hammarskjold with Egypt and Israel, for the setting-up of a number of fixed U.N. observation posts on each side of the demarcation line in the "Gaza strip." The new officers (21 in all) brought the number of U.N. observers in Palestine to 61, of whom ten are from Canada, nine from Sweden, eight each from France and the U.S.A., seven each from Belgium and New Zealand, and four each from Australia, Denmark, and Norway. In addition, four U.S. airmen are serving as U.N. observers.

The cease-fire agreement between Egypt and Israel had come officially into force on April 18, on which date the U.N. Truce Supervision Organization announced that the Egyptian and Israeli Governments had informed Dr. Hammarskjold that "orders are in force to the effect that . . . no military or paramilitary forces, including non-regular forces, may shoot across the demarcation line or pass over that line for any purpose whatsoever."

Despite the cease-fire agreement, two incidents occurred on April 29 in the Gaza area. In the first an Israeli soldier was killed and two others wounded when their truck was wrecked by a land-mine, while in the second incident an Israeli farmer was kidnapped and killed by Egyptian infiltrators while working in the fields at the frontier settlement of Nahal Oz. His mutilated body was subsequently returned to the Israeli authorities, in the presence of U.N observers. Strong Israeli protests were sent to the U.N. Truce Supervision Organization, which instituted an inquiry into the incidents

On April 23 four Israelis were shot dead by a band of raiders from Jordan while travelling in a motor-vehicle through the Wadi Araba, in the southern Negev. The raiding group—believed to be members of a *fedayeen* band—ambushed and set fire to the vehicle, killed the passengers, and subsequently fled across the frontier into Jordan The Israeli-Jordan Mixed Armistice Commission, after investigating the incident, censured Jordan for a grave violation of the armistice agreement, and called upon her to prevent any recurrence.

Military Agreements between Arab States.

The network of military alliances between the Arab states was expanded during April and May by (1) a tripartite pact between Egypt, Saudi Arabia, and the Yemen under which a joint command was set up for the armed forces of the three countries; (2) an agreement for the co-ordination of the Egyptian and Jordanian forces; and (3) a similar agreement on the co-ordination of the Jordanian and Lebanese forces.

Egyptian-Saudi Arabian-Yemeni Pact. This pact was signed in Jeddah on April 21 by Colonel Nasser, King Saud of Saudi Arabia, and the Imam Ahmed of Yemen. It provided (1) that armed aggression against any of the signatories would be regarded as aggression against all of them; (2) that the signatories would hold consultations in the event of international tension causing a threat to the integrity or independence of any of them, (3) that they would take any necessary "preventive and defensive measures" that such a situation might warrant; (4) that a Supreme Council, consisting of the Ministers of Foreign Affairs and Defence of the three countries, would be set up as a policy-making body, with powers to appoint and dismiss the Supreme Commander (see below), (5) that a Military Council, comprising the Chiefs of Staff of the three Powers, would also be set up, and (6) that there would be a permanent Joint Command, operating both in peace and war, consisting of a Supreme Commander and a Chiefs of Staff organization. Other articles provided for the joint organization, training, and equipment of the armed forces of the three Powers General Hakim Amer, C.-in-C of the Egyptian Army, was appointed head of the unified command set up under the Jeddah Pact. He is also head of the Egyptian-Syrian joint command (see 14518 E).

The communiqué said that Colonel Nasser, the King of Saudi Arabia, and the Imam of Yemen had discussed "questions of interest to the three States in particular and to the Arab world in general," and that the provisions of the Jeddah Pact "in no way or in any circumstances affect the rights and obligations of the contracting Powers under the U N Charter and the Security Council's obligations to maintain world peace" It added that the talks (held on April 20-21) had provided an opportunity for "an exchange of views on the formation of practical plans to ensure . . economic, cultural, and technical co-operation between the three countries"

Egyptian-Jordanian Agreement. Following a visit to Egypt by Major-General Radi Innab, who had succeeded Sir John Glubb as commander of the Arab Legion, it was announced in Cairo on May 6 that agreement had been reached on the co-ordination and unification of the Egyptian and Jordanian armed forces in a manner which would "guarantee the defence and interests of the Arab world." The communiqué—which was signed by General Innab and General Mohamed Ibrahim, Chief of Staff of the Egyptian Army—said that the Jordanian military mission visiting Cairo had met with "the response and full co-operation of the Egyptian Army", that there had been "a detailed study of military questions", and that there had been "complete understanding on all points." Unlike the Jordanian-Lebanese statement (see below), the customary references to the threat of Israeli "aggression" were omitted.

Jordanian-Lebanese Agreement. After discussions in Beirut between Major-General Innab and Lebanese military leaders, it was announced on May 22 that Jordan and the Lebanon had agreed to "co-ordinate their military efforts to face the common Israeli danger." No further details were made public.

Colonel Nasser and the British Ambassador in Cairo (Sir Humphrey Trevelyan) had a two-and-a-half hours' meeting on May 26—the first such interview for more than two months. Although no official statement was issued, it was understood that the discussions had been cordial and had covered a wide range of subjects affecting Anglo-Egyptian relations.

A. UNITED KINGDOM.—Defence Policy.- Increases in Service Pay and Pensions.

Comprehensive increases in pay and pensions for all three Services (including the Women's Services and Nursing Services) came into effect on April 1. A White Paper published on Feb. 20, which announced the increases, said that they would be greatest in the case of those engaging for longer periods, and were intended (*a*) to stimulate Regular recruitment, especially for long engagements, and (*b*) to encourage Regulars now serving to extend their present engagements and remain in the Services.

The White Paper explained that in framing the increases the Government had taken account both of the rise in civilian earnings in recent years, and of the fact that recruits who signed on for long periods "committed themselves in a way that has no parallel in civilian life" The underlying principle of the new scheme was the introduction of higher rates of pay for men who engaged for nine years or more—i.e. whereas under existing schemes men who signed on for long periods received the same rates as those who enlisted on short engagements, their pay would in future be scaled from the beginning according to the length of their engagements Thus, Army recruits signing on for nine years would from the start receive £4 11s. weekly (compared with the existing rate of £2. 9s.), whilst those joining for three or six years respectively would be paid £3 3s. and £3. 17s. As a further stimulus to recruiting, pay rates for boys had been nearly doubled and in some cases almost trebled, whilst the increases for National Servicemen (3s. 6d weekly under 21 and 7s weekly over 21) had been kept small in order to increase the incentive to take on Regular engagements

Regulars serving on existing engagements would automatically draw the rate of pay appropriate to the length of their engagements and would be able to sign on for longer periods, thereby qualifying immediately for the higher rates. Each of the three Services would now have a nine-year engagement; in addition the Navy would retain its 12-year engagement for artificer apprentices, whilst the R A F would continue its existing Regular engagements and the Army would work basically on engagements of three, six, and 12 years

The White Paper added that the increases in officers' pay reflected the general movement in salaries since 1950 and the fact that officers were "put to certain inescapable expenditure because of their employment." Allowances themselves had not been altered, but officers' salaries had been brought more into line with civilian salaries in order that they might cover certain items of expenditure for which existing allowances might be inadequate.

Representative new rates for officers, n.c.o.s, and men in the three Services are given below, with former rates for comparison:

Medical Officers and Chaplains (All Services).

The basic annual rates for medical officers would be graduated from £584 for Acting Surgeon Lieutenants (Royal Navy) and equivalent ranks in the Army and R.A.F. (against £483) to £3,650 for Surgeon Vice-Admirals and equivalent ranks (compared with £2,737).

Chaplains' rates would range from £657 a year on entry (compared with £501) to £2,044 for Chaplain-Generals (compared with £1,542).

Officers in the Women's Services.

Daily pay of officers in the Women's Royal Naval Service would range from 16s.–20s. for third officers (against 13s. 3d.) to 58s.–68s. for chief officers (46s.–54s.), 75s.–86s. for superintendants (60s.–69s.), and 90s. for commandants (69s.). For the Women's Royal Army Corps and equivalent ranks in the Women's Royal Air Force pay would range from 17s. for second lieutenants (against 13s. 3d.) to 29s.–37s. for captains (21s. 9d.–29s. 3d.), 75s.–86s. for colonels (60s.–66s. 9d.), and 90s for brigadiers (69s) In the Nursing Services, pay would range from 22s –26s. 6d. for nursing sisters (12s. 9d.–15s.9d.) to 90s. for matrons-in-chief (57s. 9d)

National Service Officers.

In addition to the increase of 3s. 6d. daily (7s. after 21) in the pay of National Servicemen, the following increases were announced in the pay of National Service officers :

Navy : Midshipman, from 9s to 10s. 6d (after 12 months from 12s to 14s 6d); Acting Sub-Lieutenant, from 11s. to 13s (after 18 months from 17s. 6d to 20s. 6d); Sub-Lieutenant, from 13s to 16s. (after 18 months from 17s. 6d. to 20s 6d), Lieutenant, from 17s. to 21s (after 18 months from 21s 6d to 25s 6d) **Army and R.A.F.** Second Lieutenant and Pilot Officer, from 13s to 15s. (after 18 months from 17s 6d. to 19s 6d), Lieutenant or Flying Officer, from 15s. to 18s. (from 19s 6d. to 22s. 6d); Captain or Flight Lieutenant, from 23s. to 26s. 6d. (after 18 months from 29s to 31s), Major or Squadron Leader, from 25s to 40s 6d (after 18 months from 42s to 45s.)

Retired Pay and Terminal Grants.

Ranks for Retired Pay	Standard Service Periods	Standard Retired Pay Rate	Terminal Grant
Captain or below	20 yrs.	£500 (400)	1,500 (1,000)
Major	22 ,,	£625 (500)	1,875 (1,000)
Lieut.-Colonel	24 ,,	£800 (675)	2,400 (1,000)
Colonel	26 ,,	£1,000 (875)	3,000 (1,000)
Brigadier	28 ,,	£1,150 (1,000)	3,450 (1,000)
Major-General	30 ,,	£1,400 (1,300)	4,200 (1,000)
Lieut.-General	30 ,,	£1,600 (1,400)	4,800 (1,000)
General	30 ,,	£1,900 (1,700)	5,700 (1,000)
Field-Marshal (half pay)	—	£2,300 (2,000)	6,900 (1,000)

(Applicable to officers—except quartermasters—with the full standard years of service required for each rank. Old rates shown in parentheses).

Retired pay and terminal grants for officers of other Services are broadly comparable.

Representative weekly pensions and terminal grants for other ranks were as follows (old rates in parentheses) :

Royal Navy : Petty Officer, after 22 years, pension 52s. 7d., terminal grant £225 (41s. 10d., £200); Chief Petty Officer, after 27 years, pension 92s., terminal grant £395 (68s. 4d., £330). **Army :** Sergeant, after 25 years, pension 68s. 3d., terminal grant £285 (46s 10d , £245) ; Warrant Officer 1, after 30 years, pension 120s. 4d., terminal grant £586 (84s. 10d., £460). **R.A.F.** . Flight-Sergeant, after 25 years, pension 75s. 1d., terminal grant £347 (53s. 10d., £298); Warrant Officer, after 37 years, pension 165s. 3d., terminal grant £810 (125s. 1d., £600).

The total cost of the increases in pay, retirement pay, pensions, and terminal grants was put at about £67,000,000 in the first year, increasing in subsequent years according to the success of the scheme in attracting recruits.

The Minister of Defence (Sir Walter Monckton) announced on May 30 that the recruiting figures for April had shown a "definite improvement" on the corresponding figures for the previous year since the new rates of pay came into effect on April 1, though it would be "premature to draw any conclusions from them at this stage."—(Times - Daily Telegraph)

(Prev. rep. Service Pay, 10938 A.)

A. UNITED STATES.—Relaxation of Restrictions on Non-strategic Exports to U.S.S.R. and Satellite Countries.

The U.S. Commerce Department announced on April 26 that controls on exports to the Soviet Union and the Soviet-bloc countries in Europe of over 700 non-strategic items in 57 commodity groups were to be simplified, and that all these goods could in future be shipped by exporters under general licence, thus abolishing the need for individual licences. At the same time the Department published a list of the goods affected, covering a wide range of commodities.

Mr. Sinclair Weeks, the U.S. Secretary of Commerce, stated that all the goods included in the list were of a type that would be approved for export under existing licensing policy, and that the new procedure of putting them under a general licence in no way reflected a change in the U.S. Government's policy of banning strategic goods to Soviet-bloc countries. Nor, he added, did the new step indicate in any way a relaxation of the strict embargo against all shipments to Communist China, North Korea, the Communist-controlled areas of Vietnam and Laos, and the Far Eastern provinces of the U.S.S.R., to which shipments of any kind would continue to require individual export licences.

At the time of the Foreign Ministers' Conference in Geneva, Mr. Weeks had announced that his Department would issue by the end of 1955 a list of goods which could be sent freely to the Soviet Union and Soviet-bloc countries in Europe. It was stated in the American press that difficulties in compiling a satisfactory list had delayed the announcement.

(New York Times - New York Herald Tribune) **(14711 C.)**

A. AUSTRIA. — General Elections. - Victory for People's Party and Socialist Coalition. - Provincial Elections in Upper Austria, Carinthia, and Burgenland.

Elections to the Austrian National Council (*Nationalrat*) took place on May 13, the four contending parties being the People's Party (Catholic) and the Socialist Party (the two parties of the Government coalition), the Communists, and the newly-formed Freedom Party.

The Freedom Party—the new Right-wing party formed in 1955 by the union of three right-wing groups, of which the largest was the League of Independents—had held its first congress in Vienna on April 7. Herr Anton Reinthaller, a former National Socialist minister, was elected chairman of the party, whilst Herr Max Stendebach (the former chairman of the League of Independents) and Herr Wilfried Gredler (a member of the *Nationalrat*) were elected deputy chairmen.

A crisis within the new party developed, however, within a few days, and on April 13 two of its principal founders—Dr. Herbert Kraus (chairman of the parliamentary group of the former League of Independents) and Dr. Viktor Reimann (a member of that group)—announced their withdrawal, although they had both been nominated as Freedom Party candidates for the general election.

In a statement issued on the same date the two deputies said that the party congress had confirmed "the assumption of power in the party by a small group of Right-wing extremists and former Nazis," whilst the moderate representatives of the former League of Independents had been "deprived of practically all influence." They refused to support what amounted to a "successor organization to the National Socialist Party."

The results of the general elections (held by proportional representation) were announced on May 14 as follows, the corresponding figures for the 1953 elections being shown for comparison

	Seats		Votes	
	1956	1953	1956	1953
People's Party (*Volkspartei*) .	82	74	2,000,068	1,781,777
Socialist Party ..	74	73	1,873,250	1,819,817
Freedom Party ..	6	14†	283,713	472,866†
Communists and Left Socialists	3	4	192,432	228,159

† Then League of Independents (*Verband der Unabhängigen*)

The People's Party thus increased its strength by eight seats, being only one seat short of an absolute majority. It was commented in the press that a large number of former adherents of the League of Independents had obviously switched their support to the People's Party, and that the new Freedom Party had lost ground correspondingly, obtaining eight seats less than the former League of Independents —i.e. exactly the same number as had been gained by the People's Party. The Socialists gained one seat and the Communists lost one.

The People's Party polled 45.96 per cent of the votes (against 41.26 per cent in 1953); the Socialists 43.04 per cent (42.11 per cent); the Freedom Party 6.52 per cent (10.95 per cent by the former League of Independents); and the Communists and Left Socialists 4.48 per cent (5.28 per cent). The electorate totalled 4,614,464, the number of valid votes cast being 4,351,937.

In Vienna the Socialists polled 562,618 votes (590,290 in 1953); the People's Party 406,631 votes (362,119), the Communists and Left Socialists 95,503 votes (93,865); and the Freedom Party 63,432 votes (124,673 for the former League of Independents). The considerable drop in the Socialist vote was attributed partly to unpopular tariff increases by municipal transport and utility undertakings.

The Communists, whilst slightly improving their poll in Vienna, lost votes in all the provinces; the drop in Communist votes amounted to 18.5 per cent in Styria, 24.4 per cent in Upper Austria, 36.3 per cent in Lower Austria, and 41.9 per cent in Burgenland (the two latter provinces having been part of the former Soviet Zone).

Dr. Raab, the Austrian Chancellor, and Dr. Schärf, the Vice-Chancellor, submitted the Coalition Government's resignation on May 14 to President Körner, who called upon Dr. Raab to form a new Government.

Provincial elections took place on May 13 in Carinthia and Burgenland, similar elections having been held in Upper Austria on Oct. 23, 1955. The distribution of seats in the new provincial *Landtage* was as follows (former party strengths in parentheses):

Carinthia: Socialists 18 (18); People's Party 12 (11); Freedom Party 5 (6); Communists and Left Socialists 1 (1).

Burgenland: People's Party 16 (16); Socialists 15 (14); Freedom Party 1 (1); Communists and Left Socialists, nil (1).

Upper Austria: People's Party 25 (23); Socialists 19 (15); Electoral Union of Liberals 4 (10 for former League of Independents); Communists and Left Socialists, nil (nil).

(Wiener Zeitung - Neue Zürcher Zeitung) **(Prev. rep. 14762 C; 1953 General Elections, 12908 A; Provincial Elections, 13882 A; New Right-wing Party, 14518 C.)**

B. INTERNATIONAL WHEAT CONFERENCE. — New Three-year International Wheat Agreement. - Non-adherence of British Government.

An International Wheat Conference, sponsored by the United Nations and attended by delegates from over 40 countries, met in Geneva on Oct. 26, 1955, to draft a new International Wheat Agreement to replace the one expiring on July 31, 1956. The conference adjourned on Nov. 16, 1955, reassembled at Geneva from Feb. 20-March 27, 1956, and after a further adjournment met in London from April 16-25. On the latter date a new three-year International Wheat Agreement (the third of its kind, following those of 1949-53 and 1953-56) was approved, to operate from Aug. 1, 1956. It fixed at $1.50 a bushel (for No. 1 Northern Manitoba wheat) the minimum price at which the signatory countries would buy the agreed quantities, and at $2 a bushel the maximum price at which exporting countries undertook to sell the quantities agreed by them if called upon to do so. These prices were five cents lower in each case than those under the expiring agreement.

Argentina and Sweden joined the agreement for the first time as exporters. Total annual guaranteed sales were set at 8,241,000 metric tons (against 10,749,000 tons under the old agreement), divided as follows U S A, 3,595,134 tons, Canada, 2,800,395 tons, Australia, 823,471 tons, Argentina, 400,000 tons; France, 450,000 tons; and Sweden, 175,000 tons. The number of importing member-countries remained unchanged at 44.

The new agreement also provided that the International Wheat Council (at whose request the U.N. had sponsored the conference) might (*a*) study any aspect of the world wheat situation and sponsor exchanges of information and international consultation relating to it; (*b*) make such arrangements as it considered desirable with the U N. Food and Agriculture Organization and other inter-governmental organizations, and (*c*) consult with countries who were not parties to the Agreement but who had a substantial interest in wheat.

The new agreement was to be signed by the participating countries by May 18, and ratified by July 16 If, however, ratifications were not completed by the latter date, the agreement would provisionally go into effect if importing and exporting countries representing at least two-thirds of the total import and export quotas respectively had ratified it. The final date for ratifications would then be Dec. 1, 1956.

The British delegate, Mr. George Bishop, informed the conference on Feb. 20 that Britain, which had refused to sign the expiring agreement, could also not adhere to any new arrangement based on it, as the British Government did not consider that an agreement of the present type would make "a positive contribution" to a solution of the problem.

Mr. Bishop explained that, in the British view, an agreement of the present type was deficient in the following respects: (*a*) it contained no provisions linking the disposal of the existing wheat surpluses to the working of the agreement; (*b*) it did nothing to discourage the continuance of wheat production in excess of effective demand; (*c*) it did nothing to encourage increased wheat consumption; (*d*) it contained no effective provisions to ensure that prices were allowed to move freely within the present price range in accordance with current conditions of supply and demand.

A renewed participation in an agreement of the present type would, moreover, necessitate a reversion to Government control over the import of wheat into the United Kingdom, and perhaps even a return to State trading. The British Government would not find it possible to justify to public opinion this major reversal of domestic policy unless it could be shown that a new agreement made a positive and effective contribution to the solution of the problem now facing the world in regard to wheat.

Mr. Bishop emphasized, however, that it was the British Government's policy to support the orderly settlement of commodity problems on an international basis, and expressed the "fullest support" for any discussions which sought to establish, by a formal convention, a set of internationally agreed rules for the orderly disposal of accumulated wheat surpluses. After suggesting that the International Wheat Council would be an appropriate forum for such discussions, he said that if the Council's constitution were amended to enable it to undertake them, the U.K. would be "very willing," though not a participant in the agreement itself, to play its full part in the discussions on international wheat problems.

It was pointed out in the Press that the new agreement would cover only about one-third of the total world trade in wheat, as compared with nearly one-half under the previous agreement.

Transactions of wheat and flour in 1954-55 under the existing International Wheat Agreement (i.e. for 1953-56) amounted to 7,900,000 metric tons, or 73.8 per cent of the guaranteed quantities which the exporting countries had agreed to supply at the maximum price and the importing countries to buy at the minimum price. This compared with 6,128,000 tons (58 per cent) in 1953-54 (the first year of the existing agreement), and 15,574,607 tons (nearly 99 per cent) in 1952-53 (the last year of the first agreement signed in 1949).—(Times - Financial Times - U.N. Information Centre, London - Economist) **(Prev. rep. 13654 A; 12918 A.)**

A. GOLD COAST. — Proposals for Independence within the British Commonwealth. - Statement by Mr. Lennox-Boyd. - Political Developments. - Changes in Gold Coast Cabinet.

A White Paper outlining the Gold Coast Government's proposals for the independence of the Gold Coast as a full member of the British Commonwealth was published in Accra on April 19. It proposed that the name of the country, when it attained independence, should be changed from Gold Coast to Ghana, and that the new State should remain within the Commonwealth on the same terms as the other sovereign member-states. The principal proposals set out in the White Paper were as follows:

(1) After the attainment of independence, a Governor-General should be appointed by H.M. the Queen on the advice of the Gold Coast Government.

(2) Supreme legislative power should be vested in the Parliament of the Gold Coast, the lifetime of which should be five years.

(3) Appointments, promotions, and dismissals in the Public Service should be made by the Governor-General on the advice of a Public Service Commission.

(4) There should be a unified judiciary consisting of magistrates, puisne judges, and justices of appeal, headed by a Chief Justice appointed by the Governor-General on the advice of the Prime Minister. The West African Court of Appeal would cease to exercise jurisdiction in the Gold Coast, and arrangements would be made for judges to assist the courts in Sierra Leone and Gambia on request. The Judicial Committee of the Privy Council would continue to hear appeals from the Gold Coast.

(5) The Gold Coast Government would have full responsibility for all matters relating to defence and external affairs.

(6) Some measure of devolution was proposed from the Central Government to six regions into which, it was suggested, the Gold Coast should be divided—Eastern, Western, Ashanti, Brong (the northern part of Ashanti), Northern, and Transvolta-Togoland.

(7) No legislation affecting the traditional functions or privileges of chiefs should be introduced without consultation with the appropriate State Council.

(8) A new Constitution "should not, in part or whole, be amended except with a two-thirds majority of all members of the Gold Coast Government."

The British Colonial Secretary (Mr. Lennox-Boyd) informed the House of Commons on May 11 that a firm date for granting independence to the Gold Coast within the Commonwealth would be given by H.M. Government if a reasonable majority for such a step was obtained in the Gold Coast Legislature after a general election.

Mr. Lennox-Boyd said: "The present Gold Coast Constitution marks the last stage before the assumption by the Gold Coast of full responsibility for its own affairs. The grant of such responsibility is a matter for the U.K. Government and Parliament, and it has always been the wish of this Government that the Gold Coast should achieve independence within the Commonwealth.

"Since the present Constitution was introduced there has arisen a dispute within the Gold Coast about the form of Constitution which the country should have when it achieves independence within the Commonwealth. Efforts have been made to bring about a reconciliation between the major parties, but they have so far met with no success.

"I have been in close touch with the Prime Minister of the Gold Coast on these matters. It is the considered view of his Government that the time has now come for the Gold Coast to assume full responsibility within the Commonwealth for its own affairs. I have made my view clear to him that because of the failure to resolve the constitutional dispute, we can only achieve our common aim of the early independence of that country within the Commonwealth in one way—that is, to demonstrate to the world that the peoples of the Gold Coast have had a full and free opportunity to consider their Constitution and to express their views on it in a general election.

"I have told Dr. Nkrumah that if a general election is held, the U.K. Government will be ready to accept a motion calling for independence within the Commonwealth, passed by a reasonable majority in a newly elected legislature, and then to declare a firm date for this purpose. Full membership of the Commonwealth is, of course, a different question, and is a matter for consultation between all existing members of the Commonwealth."

Mr. Creech Jones (Lab.) welcomed the Colonial Secretary's statement on behalf of the Opposition, declaring that the emergence of an independent Gold Coast would be of great significance for Africa and perhaps for the world generally.

A conference to consider the recommendations of Sir Frederick Bourne's report (see 14636 A), convened by Dr. Nkrumah and the Convention People's Party, opened in Accra on Feb. 17 and ended on March 16 after an adjournment during which unsuccessful attempts were made to secure the support of the National Liberation Movement—the principal Opposition party, which had refused to participate in the discussions. The conference was also boycotted by the Asanteman Council, the supreme council of chiefs in Ashanti. The chairman of the conference (Mr. C. W. Tachie-Mason) stated on March 16 that "unanimous conclusions" had been reached on practically all the subjects discussed, and that proposals had been made for a convention "which, if acceptable to all concerned, will facilitate the smooth working of our future Constitution." He added that the conference had dealt with "a mass of practical administrative problems which must be clarified for the guidance of legal draftsmen who will prepare the Constitution."

Professor Busia, a leading member of the Gold Coast Opposition parties, stated in January that Sir Frederick Bourne's report, though "a step in the right direction," did not "go far enough" because of the limitation of Sir Frederick's terms of reference. He contended that the report had proved the Opposition right in their "revolt against centralization" and in their demand that the chiefs and traditional councils should find a place in the new Constitution. Whereas, however, the regional councils proposed in the Bourne Report would be merely deliberative and consultative bodies, the Opposition demanded proper constitutional safeguards against the "whims of the Government of the day."

The Asanteman Council published a statement on May 8 which, though criticizing the Convention People's Party, said that the Council was satisfied "that independence for the Gold Coast is no longer an issue for political strife or differences." It insisted, however, that "the issue of the Constitution must be settled before and not after the attainment of independence," and expressed the Council's "considered view" that there should "first be agreement on the Constitution, followed by a general election before independence."

The following changes in the Gold Coast Cabinet were announced during February and March (former portfolios in parentheses): Mr. Ako Adjei (Trade and Labour), Minister of the Interior; Mr. Aaron Ofori-Atta (Communications), Minister of Local Government; Mr. A. Casely-Hayford (Interior), Minister of Communications; Mr. E. O. Asafu-Adjaye (Local Government), Minister of Trade and Labour; Mr. A. E. Inkumsah (a ministerial secretary), Minister of Housing. Responsibility for housing was formerly borne by the Minister of State, Mr. Kodjo Botsio, who was placed in charge of development planning.

Sir Kobina Arku Korsah, a justice of appeal, was appointed Chief Justice of the Gold Coast Supreme Court on April 18. He was the first African to be appointed to that post.

B. SOVIET UNION - UNITED KINGDOM. — Exchange of Messages between Heads of State.

The text of messages exchanged between President Voroshilov and H.M. Queen Elizabeth II during the recent visit to Britain by Marshal Bulganin and M. Khrushchev was released by the official Soviet news agency (Tass) on May 21.

President Voroshilov's message conveyed to H.M. the Queen and to the British people "sincere greetings and good wishes in the name of the peoples of the Soviet Union, of the Presidium of the Supreme Soviet of the U.S.S.R., and from myself personally." After saying that the Soviet people and the leaders of the U.S.S.R. "always recall with great satisfaction the joint struggle waged by the British and Soviet peoples against the forces of aggression during the Second World War, and the great contribution made by the people of Great Britain in ensuring victory over the common foe," President Voroshilov said that the Presidium of the Supreme Soviet "firmly believes that the strengthening of friendship and co-operation between the Soviet Union and the United Kingdom would not only be in the interests of the peoples of our countries, but also in the interests of preserving peace throughout the world." In conclusion, President Voroshilov expressed the hope that the visit of Marshal Bulganin and M. Khrushchev to Britain would "contribute to better mutual understanding between the United Kingdom and the Soviet Union and the development of friendly co-operation between them." He signed his letter to the Queen, "With assurances of my profound esteem for you."

H.M. the Queen, in thanking President Voroshilov for the "valuable expressions of goodwill" contained in his letter, shared the President's hope that "the visit of the Soviet leaders to the United Kingdom as the guests of my Government may contribute to the improvement of friendship and understanding between the two countries and peoples, which it is my earnest desire to strengthen and preserve." After expressing her best wishes for President Voroshilov's health and welfare and for the well-being of the Soviet peoples, her Majesty signed her letter, "Your good friend, Elizabeth R."

President Voroshilov's letter was delivered personally to H.M. the Queen by Marshal Bulganin and M. Khrushchev during their visit to Windsor on April 22.

C. TURKEY. — Cabinet Appointment.

M. Zeyyad Mandalinci was appointed on May 14 as Minister of Economy and Commerce in M. Menderes' Cabinet in succession to M. Fahrettin Ulas, who had resigned in April.

(Turkish Embassy, London) **(Prev. rep. 14624 A.)**

A. FRANCE - YUGOSLAVIA. — President Tito's State Visit to Paris. - Discussions with French Statesmen.

President Tito of Yugoslavia, accompanied by Mme. Broz-Tito and by the Yugoslav Foreign Minister (M. Koca Popovich), arrived in Paris on a State visit on May 7.

During his stay, which ended on May 12, President Tito attended a State banquet at the Elysée and a luncheon given by President Coty at Versailles, received the Diplomatic Corps (from which the Papal Nuncio was, however, absent because there are no diplomatic relations between the Vatican and Yugoslavia); and was received by the Paris Municipality at the *Hôtel de Ville*. He also visited the D'Assault aircraft works near Paris (where the *Mystère* jet fighters are built), inspected military establishments at Mailly, near Châlons-sur-Marne and paid a visit to the Donzère-Mondragon barrage in the Lower Rhône valley.

President Tito and M. Popovich had a number of discussions with M. Guy Mollet and M. Pineau (the French Prime Minister and Foreign Minister), in which the French and Yugoslav statesmen reviewed international problems in general and Franco-Yugoslav relations in particular. The talks were regarded as especially important in view of the forthcoming visits to Moscow by M. Mollet and M. Pineau on the one hand and by President Tito and M. Popovich on the other.

The following joint communiqué on the Franco-Yugoslav talks was issued on May 11:

"The discussions have made it possible to underline how much alive is the old tradition of alliance between the French people and the peoples of Yugoslavia, proved by the common struggle in the two World Wars and by their equal devotion to national independence and peace. They have provided the occasion for a detailed exchange of views on the actual problems of world policy and on relations between France and Yugoslavia. The two Heads of Government stressed the usefulness of such talks, which have shown a wide identity of views, and they have decided that similar talks should be continued in the future.

"The two Governments, gratified to note an improvement in the international situation during recent years, reiterate their common intention to continue their efforts towards ensuring lasting peace and promoting co-operation between all nations. They intend to adhere to the principles of the U.N. Charter, whose effective implementation should facilitate the solution of all disputes by peaceful means and ensure the independence and security of nations. Their actions will be directed towards strengthening the U.N. Organization so as to enable it fully to play the universal role given it by the Charter.

"They confirm their conviction that lasting peace can be consolidated only if relations between States, irrespective of their political or social systems, are based on mutual respect for their equality, sovereignty, and territorial integrity, and on non-interference in their internal affairs.

"Desirous of putting an end to the armaments race, the two Governments will continue their efforts to help in bringing about an agreement on the basic problem of limitation and control of armaments. They have noted their accord to seek a formula for disarmament by stages, and have underlined the essential importance of nuclear disarmament. Results in this sphere would lead to international relaxation and, among other advantages, would increase the possibilities of assistance to under-developed areas.

"In their opinion, international aid to the under-developed areas constitutes a basic task to which the various States should apply their efforts within the framework of the United Nations, in order to help those territories to achieve social progress, and thereby to make possible a wider international co-operation based on the interdependence of interests. In this respect, the Yugoslav Government has noted with sympathy the French plan for the setting-up of a United Nations Agency for world economic development (see 14861 A).

"During a frank exchange of views on North African problems, M. Mollet explained the special position of Algeria and the policy which the French Government is applying there. President Tito assured him that the Yugoslav Government would support all efforts aimed at ensuring a liberal solution of the Algerian problem.

"The two Governments, while respecting their own alliances and obligations resulting from the U.N. Charter, have decided to strengthen the ties which traditionally link the two countries, by giving a new impetus and a wider scope to their co-operation in the political, economic and cultural fields. They especially agreed to study ways and means of co-operation between Yugoslavia and France in the use of atomic energy for peaceful purposes."

President Tito arrived back in Belgrade on May 13. Addressing the crowds assembled to greet him, he said that French and Yugoslav views were identical on many questions, and that he had met in France with deep understanding of Yugoslavia's policy of improving relations with the Soviet Union and other East European countries as an important contribution to the consolidation of world peace.

During his visit to France President Tito was invested by President Coty with the *Médalle Militaire* in recognition of his leadership of the Yugoslav resistance movement during the German wartime occupation of Yugoslavia.

B. AUSTRALIA. — Increase in Basic Wage.

After hearings which had lasted from Feb. 14 to April 16, the Australian Federal Arbitration Court decided on May 24 to increase the weekly basic wage for male workers (at present averaging £A11. 16s.) by 10s., and for female workers by 7s. 6d. The trade unions had applied for (*a*) a basic wage increase for male workers of £A1; (*b*) the restoration of quarterly cost-of-living adjustments, which had been suspended by the Arbitration Court in 1953; (*c*) an additional 15s. a week in the basic wage as the amount which would have been reached had such adjustments not been abolished. Apart from the 10s. increase, however, these claims were rejected by the Arbitration Court.

In presenting their claim, the unions pointed to the facts (i) that in some States wages for workers covered by State awards were still adjusted according to the fluctuating cost of living; (ii) that wages coming under such State awards had risen since 1953 by nearly £A1, (iii) that this had led to anomalies and injustices for workers coming under Federal awards, where no such adjustments had taken place since 1953; and (iv) that these workers were worse off than before, since the suspension of quarterly adjustments by the Federal Arbitration Court had failed to stop the wage-price spiral.

The employers contended that the unions' claims should not be granted because the general economic situation disclosed a lower capacity of the country to meet the cost-of-living increases since 1953. They argued that the general level of costs in Australia was still much higher than in many other countries, and that there was a risk of Australia's international reserves declining further.

The Arbitration Court, in giving its reasons for rejecting the major part of the unions' claims, said that it could only consider applications for increases in wages and salaries if the economic condition of the country allowed it to do so. Everyone should realize by now, however, that it was not money that was in short supply but that there was too much money in relation to the goods and services available to the rapidly increasing population.

The Court's decision directly affected some 2,500,000 workers—about 50 per cent of the Australian labour force. As a result of the basic wage increase, it was expected that there would be many applications from other working groups for corresponding adjustments.

Mr. Menzies, the Prime Minister, had emphasized on Feb. 6 that Australia's economic problems could not be solved until there was uniformity of wage-fixing. The present difference between the system of wage-fixing for workers coming under Federal awards and those coming under State awards had created a "chaotic" situation, and there was naturally "a sense of injustice" because the Federal Arbitration Court had abolished quarterly cost-of-living adjustments, whereas such adjustments were still being made under State awards. The Prime Minister therefore called on the States to co-operate with the Federal Government in working out a uniform wage system to ensure a healthy development of the Australian economy. C. UNITED KINGDOM. — Final Report of Royal Commission on Awards to Inventors.

The Royal Commission on Awards to Inventors, set up in 1947 under the chairmanship of Lord Justice Cohen, ended its work on May 4, when it issued its fourth and final report. It stated that the Commission had made 150 awards totalling £730,825 during the nine years of its existence, and that hearings had been given to 440 claims.

The Royal Commission's final report covered the period since November 1952. Among the principal awards made during this period were the following: (*a*) A tax-free award of £20,000 to Pye Ltd. (Cambridge) for its work during the war in developing and producing the radio-operated fuse and the No. 19 communication set for tanks; (*b*) an *ex-gratia* payment of £6,000 jointly to the J. R. Geigy Company of Basle, Switzerland, and the Geigy Co. Ltd., of Manchester, in respect of the manufacture of D.D.T., which was used on a large scale in combating malaria, typhus, and other diseases in areas occupied by British forces during the war; (*c*) a joint *ex-gratia* award of £5,000 to three scientists concerned with the development of rocket weapons - Sir Alwyn Crow, an authority on guided missiles, Mr. W. R. J. Cook, deputy director of the Atomic Weapons Research Establishment, and Dr. H. J. Poole, deputy director of the Ministry of Supply's armament research and development establishment; (*d*) an award of £700 to Commander A. J. G. Langley, R.N. (retd.) for his invention of the "time pencil" detonator, which was used extensively by Allied commandos and underground movements against German and Italian military installations.

The biggest single award made by the Royal Commission to an individual was £50,000 (tax-free) to Sir Robert Watson-Watt in respect of the wartime development of radar (see 11993 B). The tax-free award of £100,000 earlier made to Sir Frank Whittle for his jet-propulsion inventions (see 9305 C) had been recommended by the Royal Commission and accepted by the Government, no formal claim having been presented by Sir Frank himself.—(Times - Daily Telegraph) **(Prev. rep. Royal Commission, 11993 B.)**

A. UNITED KINGDOM. — The Case of Commander Crabb. - Soviet Note to Britain. - Parliamentary Debate.

The Admiralty announced on April 29 that Commander Lionel Crabb, R.N.V.R., an experienced naval diver noted for many daring "frogman" exploits in the war, had not returned "from a test dive which took place in connexion with the trials of certain underwater apparatus in Stokes Bay, in the Portsmouth area, about a week ago."

Commander Crabb (who was 46) had been reported missing since the day after the arrival at Portsmouth of the Soviet cruiser *Ordjonikidze*, which brought Marshal Bulganin and M. Khrushchev to Britain for their official visit. On May 4 a member of the Soviet Embassy staff in London said that a watchman on board the *Ordjonikidze* had seen a frogman surface near the cruiser for a few seconds, and then disappear, while the ship was at Portsmouth. No further comment or observations, however, were issued by the British Admiralty after the announcement on April 29 that Commander Crabb was missing.

The circumstances of Commander Crabb's disappearance, and the official reticence about his activities, gave rise to much speculation in the Press. Inquiries by representatives of *The Times*, however, established the following facts:

(1) A man giving his name as Commander Crabb, and a London address, had booked at the Sallyport Hotel, Portsmouth, on either April 16 or 17.

(2) Some time later, another man known to Commander Crabb signed at the hotel in what a witness believed to have been the name of Smith. Both Commander Crabb and "Smith" had only light luggage.

(3) After two nights—i.e. either on April 17 or 18—the two men left. Later in the day Commander Crabb's friend returned to pay the hotel bill.

(4) On April 21 Detective-Supt. Lamport, of the Portsmouth police, was ordered by the Chief Constable of Portsmouth to remove from the Sallyport Hotel register those pages which covered the period during which Commander Crabb and his friend had stayed at the hotel. When he had done so, he had advised the hotel staff not to discuss the matter.

(5) On April 29, after Press inquiries, the Admiralty stated that Commander Crabb had been missing since April 19 in tests of new frogman equipment for which he had been specially employed. He was presumed to be dead. These tests, carried out in Stokes Bay (three miles from Portsmouth Harbour), were made without the knowledge of H.M.S. Vernon, the naval establishment at Portsmouth which has among its responsibilities the training of frogmen.

The Soviet Government announced on May 11 (*a*) that a Soviet Note had been delivered to Britain on May 4 stating that Russian sailors on board the *Ordjonikidze* had seen a frogman approach the vessel while she was in Portsmouth harbour; and (*b*) that a British Note had been received on May 9 expressing regret for the incident, and pointing out that the frogman's activities were carried out without the British Government's permission. The texts of the Soviet and British Notes were broadcast by Moscow radio, as follows:

Soviet Note. "At 7.30 a.m. on April 19, during the stay of Soviet warships in Portsmouth, seamen on board the Soviet ships observed a frogman floating between the Soviet destroyers. The frogman, who wore a black diving suit with flippers on his feet, was seen on the surface of the water for one to two minutes, and then dived again alongside the destroyer *Smotryashchi*.

"The commanding officer of the Soviet ships, Rear-Admiral Kotov, in a conversation with the Chief of Staff of the Portsmouth naval base, Rear-Admiral Burnett, drew his attention to the case. Rear-Admiral Burnett categorically rejected the possibility of the appearance of a frogman alongside the Soviet ships, and stated that at the time indicated there were no operations in the port involving the use of frogmen. In actual fact, however, as it transpired from reports published in the British press on April 30, the fact that the British naval authorities had carried out secret underwater tests in the area where the Soviet warships were anchored at Portsmouth was confirmed. Moreover, these tests resulted in the death of the British frogman.

"It is sufficient to recall that the newspaper *Daily Sketch*, in a brief article on the end of Frogman Crabb, reported the following: 'He dived for the last time in Stokes Bay, at the spot of secret diving operations near the anchorage of the Soviet ship *Ordjonikidze*.'

"Attaching great importance to such an unusual fact as the carrying out of secret frogman tests alongside Soviet ships on a friendly visit, the [Soviet] Embassy would be grateful to the British Foreign Office for an explanation on this matter."

British Note. "As has already been publicly reported, Commander Crabb carried out frogman tests, and, as is assumed, lost his life during these tests. The frogman, who, as reported in the Soviet Note, was discovered from the Soviet ships swimming between the Soviet destroyers, was to all appearances Commander Crabb. His presence in the vicinity of the destroyers occurred without any permission whatever, and H.M. Government express their regret for this incident."

The British Foreign Office stated that the version of the British Note broadcast by Moscow radio corresponded to the actual text except for a few minor differences in translation.

Whilst the Soviet Press accepted Sir Anthony Eden's explanation to the House of Commons (see below) that Commander Crabb's activities were carried out without the knowledge or authority of the British Government, it expressed indignation at what it described as attempts at "underwater espionage" against the Soviet warships while on a friendly visit to Britain.

In reply to a number of Opposition questions in the House of Commons, Sir Anthony Eden said on May 9 that it would not be in the public interest to disclose the circumstances in which Commander Crabb was presumed to have met his death.

Mr. John Dugdale (Lab.) raised the matter by asking the Parliamentary Secretary to the Admiralty (Mr. Ward) (*a*) whether he would state the evidence on which the Admiralty officially presumed the death of Commander Crabb; (*b*) what were the circumstances of Commander Crabb's disappearance; (*c*) whether efforts were still being made to locate his body; and (*d*) whether he (Mr. Ward) would make a statement. Mr. Ward replied that the questions would be dealt with directly by the Prime Minister.

Sir Anthony Eden said in reply to Mr. Dugdale: "It would not be in the public interest to disclose the circumstances in which Commander Crabb is presumed to have met his death. While it is the practice for Ministers to accept responsibility, I think it is necessary, in the special circumstances of this case, to make it clear that what was done was done without the authority or the knowledge of Her Majesty's Ministers. Appropriate disciplinary steps are being taken."

Mr. Dugdale: "This is one of the most extraordinary statements ever made by a Prime Minister in the House of Commons. Whatever you may say to the contrary, it is a complete evasion of Ministerial responsibility. Why was Commander Crabb diving in the close vicinity of the Soviet cruiser, here on a friendly visit? Why and on whose authority was a police officer sent to the hotel at which he was staying, and ordered that the leaves be torn from the register book showing the names both of Commander Crabb and the man with whom he stayed? What was the name of this other man? Why did the police officer threaten the hotel proprietor with action under the Official Secrets Act if he did not allow this to be done?"

Sir Anthony Eden. "I thought it right to make the statement which I have made, and I have nothing to add to it."

Mr. Hugh Gaitskell (Leader of the Opposition): "The Prime Minister will be aware that a great deal of information has already been published in the Press. Does he not think on reflection, and in view of the amount of speculation which undoubtedly will continue in the absence of any information from the Government, that it really would be wiser and in the general interest if a fuller explanation were given?"

Sir Anthony Eden replied that he had given the fullest consideration to this matter. "I can assure Mr. Gaitskell," he added, "that there are certain issues which are the responsibility of the Prime Minister himself; and having given all possible consideration to all the information at our disposal, on reflection I thought it my duty to give the answer I have. I am afraid I must tell the House that I cannot vary from the answer."

Mr. Gaitskell. "That answer is totally unsatisfactory. While we would all wish to protect public security, the suspicion must inevitably arise that your refusal to make a statement on this subject is not so much in the interests of public security but to hide a grave blunder which has occurred."

Sir Anthony Eden: "Of course the House and the country must draw its conclusions from what I have said, and also from what I have declined to say. Naturally, you will understand that I have weighed all these considerations, and they weigh heavily in the answer I have given. Mr. Gaitskell, with his experience, knows that there are some decisions which only the Prime Minister can take. I am convinced, after the most careful reflection, that the decision I have taken is the right and only one."

Mr. Gaitskell: "Are we to take it, in the absence of any further statement from the Prime Minister, and in the light of what he has just said about the public drawing their own conclusions, that in fact officers or an officer of H.M. Forces was engaged upon the business of espionage during the Russian visit?"

Sir Anthony Eden: "Mr. Gaitskell is perfectly entitled to put any wording he likes on what I said. My words stand as they are, without any gloss anyone can put on them."

Mr. Shinwell (Lab.): "Against whom are you taking disciplinary steps? Is it because some individual or individuals gave instructions to Commander Crabb? Against whom is the action being taken and for what reason? Is it because they defied authority or because they acted without consulting H.M. Ministers?"

Sir Anthony Eden said he had nothing to add to the answer he had already given.

Mr. Dugdale, after describing the Prime Minister's answer as "most unsatisfactory," moved the adjournment of the House "to call attention to a matter of urgent public importance, the failure of the Government to give a satisfactory explanation about the events connected with the disappearance of Commander Crabb."

The Speaker (Mr. W. S. Morrison) declined to adjourn the House for the following reason: "This application is governed by authority. When a Minister refuses to answer a question on the grounds of public interest, it has been ruled in the past—and I adhere to it myself—that it is a matter which cannot be raised. Therefore I must decline the application."

The disappearance of Commander Crabb was the subject of a debate in the House of Commons on May 14, at the request of the Opposition.

Mr. Gaitskell, who recalled that Commander Crabb had been awarded the George Medal in 1944 for distinguished war services, opened the debate with a tribute to "a very gallant officer," now presumed dead, who was "the central figure in this strange episode" The Opposition, Mr Gaitskell continued, recognized that in present conditions there was an "unfortunate necessity" for secret services, which Britain must possess equally with other great Powers. They appreciated, also, that details of the activities of the Secret Service could not be disclosed like those of other Government departments. That situation was accepted by Parliament, and members therefore refrained from pressing Ministers on these matters Ministers, on their part, had the undoubted right to refuse information on these matters, given the following assumptions "That the operations of these Services are ultimately effectively controlled by Ministers or a Minister; that the operations are secret, that what they do does not embarrass us in our international relations; and that what they do appears, so far as we can make out, to be reasonably successful."

Mr. Gaitskell continued: "The Prime Minister's statement makes it plain, or at any rate gives me the impression, that in this instance Ministers were not effectively in control. His statement, cryptic though it was, did reveal, through a disclaimer of direct responsibility and through a reference to disciplinary steps, that some wrong action had been taken by some Government servant without authority and, indeed, apparently contrary to the desires of Ministers . . None of us would ask that the Prime Minister should disclose what ought not to be disclosed, either because it might endanger our agents or people in the Secret Service, or because it would involve giving information to a foreign Power But, subject to this, it is the duty of any Opposition to probe any weakness, or what appears to be any blunder or mistake, in Government administration.

"I fully accept the Prime Minister's disclaimer of ministerial knowledge or approval, and I am sure that should be accepted as complete evidence of absolute good faith by the Soviet Government. Nor do I feel that this episode, serious as it is in certain aspects, is likely permanently to damage our relations with the Soviet Government. We all know that the Russians are realists in these matters. There is not very much doubt that they, too, have their agents.

"I am concerned with what appears to be the situation in the Secret Services and the forces which work with them, because it seems to me that what has been suggested by the Prime Minister's statement does reveal a grave lack of control at home and a most unsatisfactory state of affairs within these services . . . Presumably the Secret Service, or a secret service and the Admiralty, must have been mixed up in the plan from the start; but at what sort of level was the decision taken, if a decision was taken, to make this kind of investigation? Presumably it was the duty of the Admiralty to guard the Soviet vessels, and this is one of the extraordinary features of this whole business. If it was their responsibility to guard these vessels, how was it that Commander Crabb, if it was he, was able to approach them? Were the security guards very inadequate, or were they in the secret of Commander Crabb's exploit?"

After saying that it was difficult to understand how the exploit could have been attempted unless it had been known to some high-ranking officers, Mr Gaitskell asked who had authorized the Admiralty statement of April 29, "which is now seen to have been at variance with the statement of the Chief of Staff at Portsmouth to the Russian admiral." Referring to the removal of four pages from the Sallyport Hotel's register by police officers, he also asked: Can the Prime Minister tell us under what authority these officers acted? The Portsmouth police seized part of this register, although, under the Aliens Order, it was the property of the hotel keeper, who was under a statutory duty to preserve it. It is very hard to see what right police officers had to make the hotel keeper break the law in this way . . ."

Mr. Gaitskell reiterated that the Opposition realized the need for a Secret Service, and also that the Secret Service had to go about its work "in a queer way." It was, however, of enormous importance that it should not be above the law. What, then, he asked, was the law under which it operated? Could the Prime Minister say against whom disciplinary steps had been taken, and whether such steps had been taken, for instance, against Service personnel?

In conclusion, Mr. Gaitskell said that the whole affair had given the impression of "a deplorable lack of co-ordination and control" between the Admiralty, the Secret Service, and the Foreign Office, and of "unusual technical incompetence." If decisions had been taken at a high level they showed irresponsibility, and if they were taken at a lower level it seemed that the officers there had got "quite out of hand." He asked the Prime Minister whether he was satisfied with the staffing of the Security Services, and what sort of steps he was taking to prevent a recurrence of such happenings.

Sir Anthony Eden, replying to Mr. Gaitskell, repeated that any action taken had been entirely without the authorization and knowledge of H.M. Government, and declared that he had "not one word more" to add to his earlier statement to the House. The Prime Minister spoke as follows:

". . . We are dealing, I must say bluntly, with circumstances in which no Government here or in any other country would say more than I am prepared to say to the House tonight. Nor is there anything contrary to our practice in taking this attitude. It is often done in Defence. A classic example is the atomic bomb, where the whole expenditure of £100,000,000 was concealed in the Estimates for that particular year.

"Similarly, in international affairs it is often contrary to the public interest to disclose the details of correspondence with a foreign government, or to reveal the course of negotiations with a foreign government leading up to treaties or other agreements And it is an immemorial custom not to publish the receipt of a Note until the reply has been returned and received by the Power who sent the Note . .

"Mr. Gaitskell spoke very freely about Secret Services and speculated about their control, organization, and efficiency. I am not prepared to discuss this matter. It is easy for Mr. Gaitskell to suggest or imply that all is not well. I could not answer him generally or in detail without disclosing matters which, as he himself recognized, must remain secret That is why it is not and never has been the practice to discuss these matters openly in this House, and I am not prepared to break that precedent.

Also I think it must be clear that it must be left to the discretion of Ministers to decide these matters. Only the Minister can judge. His discretion in this respect is absolute, and it should be clear from this practice that the Minister cannot disclose the reasons for his decision. Obviously, if he were to disclose his reasons, he would be disclosing what he judged to be contrary itself to the public interest.

"I have not one word more to say than I announced on May 9 . . . I took the exceptional course of making it plain that what was done was without the authority of H.M. Ministers—and that, of course, includes all Ministers and all aspects of this affair. We all know that many actions are taken by servants of the Crown for which the authority of Ministers is not asked; that must always be so in any complex society such as ours to-day. Mr. Gaitskell is perfectly correct in saying that on these occasions Ministers and the Government collectively are responsible to Parliament for actions by officials.

"I pondered long before I departed from that axiom in this case, and I think the House is entitled to know more of this topic. In this instance there were special circumstances which, I judged, compelled me to state that what happened, or was thought to have happened, had been done without the authority of Ministers At that time my colleagues and I had been conducting important discussions with the Soviet leaders. We were completely unaware of any episode of this kind. Had I not made this clear publicly, doubts would inevitably have been thrown on the sincerity of our position during these discussions. That is a very serious, and a very exceptional, situation. But it explains to the House why on that account I thought it right to take the very unusual course of making that statement

"Having made it clear that what was done was without the authority of Ministers, I felt it also necessary to let it be known that disciplinary steps were being taken That in itself is in part an answer to what Mr. Gaitskell said. It shows that the Government are determined that the proper measures of control and authority should be exercised by Ministers in all matters of this kind.

"It has been suggested that by not informing the House on May 9 of our receipt of the Russian Note, and of our reply thereto, I was in some way holding back information of which the House ought to have been made aware. That was not so. The Soviet Note was delivered to the Foreign Office by messenger on May 4 The Foreign Secretary being away ill, I myself approved the answer to the Soviet Note on the morning of May 9. Of course I was aware when I spoke to the House that the Soviet Government could not by then have received our reply. It would have been discourteous, to say the least, to have disclosed diplomatic correspondence in such circumstances, and I did not do so . . .

"In this business I do not rest wholly on the national interest, important as that is. There is also the important international interest. All I care for is that the outcome of our discussions with the Soviet leaders should prove to be the beginning of a beginning. I intend to safeguard that possibility at all costs. I believe that is also in the minds of the Soviet leaders. For that reason I deplore this debate and will say no more."

Members taking part in the debate included Mr. Bellenger (Lab.), a former Secretary of State for War, Mr. Dugdale (Lab.), Sir Patrick Spens (C.), and Lieut-Colonel Cordeaux (C.).

Mr. Bellenger criticized the fact that the Press had been allowed to speculate freely on the incident, although Parliament itself was expected to exercise discretion in such matters, whilst **Mr. Dugdale** reiterated the Opposition's concern at the apparent lack of co-ordination between different Departments. **Sir Patrick Spens** described the Opposition's action in asking for a debate on such a matter as "irresponsible" and as contrary to all precedent. **Lieut.-Colonel Cordeaux** believed that the Russians would attach little importance to the episode, and that the "Crabb affair" was not likely to detract in any way from the value of the Prime Minister's negotiations with the Soviet leaders.

Mr. Gaitskell announced at the end of the debate that the Opposition would divide the House to mark its disapproval of "this ill-conceived and inept operation" and as a protest against the Prime Minister's "complete refusal to answer any of our questions, many of which in our opinion could have been answered without endangering public security." He accordingly moved a token reduction of £5 in the Treasury and Admiralty Vote. On a division, the motion was defeated by 316 votes to 229 a Government majority of 87. All the opposing votes were cast by Labour members, although six Labour M.P.s—among them Mr. Herbert Morrison and Mr. Shinwell—abstained from voting. (Times - Daily Telegraph - Manchester Guardian)

A. INDIA - PAKISTAN. — Kashmir Plebiscite Scheme abandoned by India. - Mr. Nehru's Proposal for Partition of Kashmir rejected by Pakistan. - Pakistan's Decision to refer Kashmir Question to Security Council. - Indian Claim to Chitral. - Mr. Mohammad Ali's Proposal for "No War" Agreement. - Frontier Incidents.

The Indian Prime Minister, Mr. Nehru, stated in the House of the People on March 29 that talk of a plebiscite in Kashmir was "entirely beside the point" and that the holding of such a plebiscite could not be considered until Pakistan had withdrawn all her armed forces from the State, in accordance with the Security Council's resolution of 1948. This statement, and a subsequent one in which Mr. Nehru intimated that he was no longer in favour of a plebiscite, gave rise to an embittered controversy between the two Governments, culminating in Pakistan's decision to refer the Kashmir question back to the U.N. Security Council.

In his speech on March 29, Mr. Nehru said that he had told the representatives of Pakistan that while he was always willing to discuss any aspect of the Kashmir problem, "we must take existing facts as they are and proceed on that basis" in seeking to find a solution. He was surprised at the "ignorance of eminent foreign observers" who clung to the idea of a plebiscite whilst forgetting "the entire sequence of essential developments which must precede its implementation," and who did not realize that Pakistan's armed forces still remained on Kashmir territory eight years after the Security Council had categorically demanded their withdrawal. India's responsibility to safeguard the security of Kashmir had been recognized by the U.N., and only the bulk, and not all, of her forces in the State were required to be withdrawn.

"In any consideration of the problem," Mr. Nehru continued, "it must be borne in mind that there has been an invasion of Kashmir through Pakistan and by Pakistan in the latter half of October 1947 . . . The second fact to be remembered is that Kashmir acceded to India legally and constitutionally. Therefore it became the duty of the Indian Union to defend Kashmir from aggression and to drive out the invaders. I would go further and say that even if Kashmir had not acceded to India, it would have been our duty to defend it. India being a continuing entity, whatever did not opt out remained with India . . The fact that Kashmir was not in Pakistan imposed a duty upon us to protect it against any attack. However, this point does not arise because in fact Kashmir did accede to India."

After recapitualting the history of the Kashmir dispute, Mr. Nehru said that the U.N. Commission's resolution of August 1948 had required Pakistan to withdraw all her forces from Kashmir as a prelude to a plebiscite, followed by a reduction of Indian forces to the level required for police and protection; after 7½ years, however, Pakistani forces were still in the State. Much had happened in Kashmir during those years, and it was obvious that the Government of India and the Government of Jammu and Kashmir could not in the meantime "remain in a state of suspended animation." A Kashmir Constituent Assembly had been convened which had drawn up a Constitution, introduced important land reforms, and undertaken great development works. The people had settled down, and the State had, he claimed, never been so prosperous.

Meanwhile a new development had taken place—namely, the promise of U.S. military aid to Pakistan and the subsequent implementation of that promise "This," Mr. Nehru said, "created not only a new military situation but a new political situation, and procedures thus far followed by us became out of date . . . That situation has become progressively worse because of the flow of military aid to Pakistan and the conclusion of SEATO and the Baghdad Pact." Reiterating his previous denunciations of these two pacts, Mr. Nehru declared:

"SEATO and the Baghdad Pact, apart from being basically in the wrong direction, affect us intimately and, in a sense, tend to encircle us. The Baghdad Pact has created in Western Asia far greater tension and conflict than ever before . . . Presumably the pact is meant for defence against aggression if it takes place from the Soviet Union. But surely nobody imagines that the Pakistan Government entered it because it expected imminent or eventual invasion from the Soviet Union. From Pakistani newspapers, and statements made by responsible people in Pakistan, it is perfectly clear that they entered the pact either because they were rather apprehensive of India or because they wanted to speak to India from a 'position of strength.' Whatever the reason, they joined the Baghdad Pact and SEATO ostensibly because of their hostility to India."

Referring to the proposal for a no-war declaration made by the present Prime Minister of Pakistan, Chaudri Mohammad Ali (see below), Mr. Nehru recalled his earlier exchanges with the late Liaquat Ali Khan on this subject; he said whilst he welcomed Chaudri Mohammad Ali's suggestion, it was clear that a no-war declaration should not be "tied up with other matters."

Chaudri Mohammad Ali, replying in the Pakistan National Assembly on March 31 to Mr. Nehru's speech, deprecated the latter's interpretation of the situation, and reaffirmed Pakistan's insistence on the holding of a plebiscite in Kashmir.

The Prime Minister of Pakistan strongly criticized Mr. Nehru's statement that it would have been India's duty to defend Kashmir even if Kashmir had not acceded to India, on the ground that what did not "opt out" remained Indian. Mr. Mohammad Ali described this claim as "novel" and "wholly fallacious," declaring that it was "contrary to the very basis of partition" since "so long as a State did not accede to India it could not have been presumed to have remained in India"

Referring to the Indian allegation that Pakistan had committed aggression in Kashmir, Mr Mohammad Ali maintained that the population of Kashmir, which was 77 per cent Moslem, had been in favour of accession to Pakistan, but the Hindu Maharaja, who had taken refuge in Jammu, had "surreptitiously" signed an instrument of accession to India Indian forces had then been flown into Kashmir "to prop up the tottering regime of the Maharaja and to fight and subjugate the Moslem population," and there had been "naked Indian aggression against a defenceless people" Severe fighting had followed between the Indian troops sent to Kashmir and the "tribesmen and others" from Pakistan who had gone to the assistance of the Moslem population Subsequently, however, the Indian Government had made it clear that as soon as law and order were restored the question of the State's accession would be settled by reference to the people, and this undertaking had been reinforced by the resolutions of the U.N. Commission of August 1948 and January 1949, whereby both India and Pakistan had agreed that the question should be settled through a plebiscite.

Continuing, Chaudri Mohammad Ali refuted Mr. Nehru's contention that a plebiscite could not be held until Pakistan had first withdrawn her forces. Under the U.N Commission's resolution of 1948, he said, the withdrawal of Pakistani forces from Kashmir was to take place simultaneously with the withdrawal of the bulk of the Indian forces from the State. He also rejected as "strange logic," and as "irrelevant" to the Kashmir question, Mr Nehru's references to Pakistan's decision to obtain military aid from the U.S.A., and to her participation in SEATO and the Baghdad Pact.

Recalling his suggestion of a "no war" agreement (see below), Mr. Mohammad Ali said that Mr. Nehru was prepared to sign such a declaration but not to accept any proposal that disputes should be settled by arbitration. He continued . "Considering that the Indian Constitution itself provides for the settlement of international disputes by peaceful means, I find it difficult to appreciate his hesitation in agreeing to my proposal. It has never been Pakistan's case that a settlement of the Kashmir question should be the subject of arbitration. . . . Both Pakistan and India are agreed that the question of accession shall be decided by the Kashmiris themselves in a free and impartial plebiscite . . . It has not been possible to hold a plebiscite because of India's refusal to withdraw the bulk of her forces from Kashmir, and she has been seeking to cover this refusal by misinterpreting the U.N. Commission's resolution. It is this question of interpretation that should be submitted to arbitration. There is nothing unusual in this proposal. The U.N. Charter provides for it; the Bandung Resolution endorses it; and the Indian Constitution itself recognises such procedure. An Indian refusal can lead to only one conclusion—that India is not prepared to allow the Kashmiris an opportunity to decide their fate by means of a free vote."

The Prime Minister concluded: "We consider the continued Indian occupation of Kashmir by force not only immoral but illegal. We consider that the Kashmiris have the right freely to decide for themselves whether the State shall accede to India or Pakistan. They must be permitted to exercise that right. We are pledged to see that they do so. India, too, is similarly pledged. We shall honour that pledge and continue to fight for its fulfilment, come what may . . . The Indian Premier's statemnt makes at least one thing quite clear that the continuation of direct negotiations with India holds out no prospect of a settlement of this dispute. The world must take note of this. It is a vital question for the maintenance of international peace."

At a press conference on April 2, Mr. Nehru replied to the points raised by Mr. Mohammad Ali, and reiterated that a new approach to the Kashmir question was necessary in view of the transformation of the situation by U.S. military aid to Pakistan.

Describing Mr. Mohammad Ali's statements as "utterly incorrect," Mr. Nehru said that India had "absolute 100 per cent proof" that the Pakistani Army had entered Kashmir in November 1947, and not in May 1948, as was officially claimed in Karachi. Legally and constitutionally the accession of Kashmir to India was a fact, and the developments of the last eight years on both sides of the cease-fire line could no longer be left out of account. Mr. Nehru reiterated that U.S. military aid to Pakistan had altered the whole situation, and said that it was now virtually immaterial whether Pakistan withdrew her troops, in view of the increased military potential poised on the borders of Kashmir. Moreover, "with large bases surrounding India, and not only surrounding India but, so far as my knowledge goes, in the Pakistan-occupied territory of Kashmir," the defence of India itself had to be considered. Asked whether he was no longer in favour of a plebiscite, Mr. Nehru said that this inference was "largely correct."

In view of Mr. Nehru's statements, Chaudri Mohammad Ali announced on April 6 that Pakistan would refer the Kashmir question once again to the Security Council.

Mr. Mohammad Ali maintained that any suggestion that the Kashmir Constituent Assembly was competent to express an opinion on the question of accession was contrary to India's own undertakings, and accused the Indian Government of planning "to go forward with this bogus Constituent Assembly, to allow it to frame a Constitution for Kashmir, to hold elections on the basis of that Constitution under the shadow of Indian bayonets, and then to claim that Kashmir had finally become part of India." After denying that

there were bases of any kind in "Azad Kashmir" or in any part of Pakistan, he alleged that India herself was massing armed forces against the frontiers of West and East Pakistan, and was planning to reduce the Moslem population of Kashmir to an "ineffective minority" by settling non-Moslems in the State. Mr Nehru's statements, he concluded, had confirmed his view that continuation of direct negotiations no longer held any prospect of a settlement, and the dispute would therefore revert to the Security Council.

Mr. Nehru announced on April 13 that as U.S. military aid to Pakistan, and Pakistan's membership of SEATO and the Baghdad Pact, had "destroyed the entire basis for a plebiscite in Kashmir," he had suggested to the Pakistani Government the holding of discussions to settle the question by a demarcation of the border on the basis of the present cease-fire line. Mr. Mohammad Ali, however, declared on April 14 that this proposal was "preposterous," and said that there was no question of Pakistan ever considering it; Mr. Nehru, he added, had made a similar proposal in October 1948 and again in May 1955, but on both occasions the then Prime Minister of Pakistan had rejected it outright.

The Pakistani Foreign Ministry announced on April 17 that Pakistan's permanent delegate to the U.N. had informed the Security Council that direct negotiations with India on the Kashmir question had failed, and that the Council would therefore be asked to resume consideration of the dispute.

In a statement to the House of the People on May 27, Mr. Nehru laid claim to Indian suzerainty over Chitral, which had been under Pakistani administration since the partition of undivided India in 1947.

Mr. Nehru recalled that Chitral had been under the suzerainty of the Maharaja of Kashmir since 1876, and that the Ruler of Chitral had sent annual tribute to the Government of Kashmir. In 1947 the State of Jammu and Kashmir had acceded to India, and this accession had included "the entire territories within the suzerainty of the Maharaja." The Government of India was not aware of any formal accession of Chitral to Pakistan, although it had been incorporated into that country. Referring to the incorporation of Chitral in the new Province of West Pakistan, Mr. Nehru added: "There is no question of the Government of India having recognized this change in the status of Chitral." Mr. Nehru also put forward India's claim to the northern principalities of Hunza, Nagar, and Punial, which are at present in the Pakistani-held area of "Azad Kashmir."

Chitral, the north-westernmost of the former Indian States, was incorporated in the North-West Frontier Province on its creation in 1901, together with the neighbouring States of Dir and Swat. In 1947, after the Frontier Province had decided by a referendum to join Pakistan, the Rulers of the three States signed instruments of accession to that country. Under the "one-unit" scheme all three States were merged in 1955 in the Province of West Pakistan, together with the other areas of the former North-West Frontier Province.

Mr. Nehru's statement caused great indignation in Pakistan. The West Pakistan Assembly unanimously passed a resolution on May 28 strongly condemning the statement; affirming that Chitral was an integral part of Pakistan and that the other three States formed part of Azad Kashmir; and rejecting "any encroachment on Pakistani territory by India or any other country."

In a statement on May 30, Mr. Hamidul Huq Chowdhry (Foreign Minister of Pakistan) denounced Mr. Nehru's "territorial ambitions" and accused him of "forgetting his own emphatic assertions whenever it suits him." Mr. Chowdhry declared that when Junagadh had acceded to Pakistan, Mr. Nehru had said that he was not prepared to recognize that accession as valid because the Ruler was a Moslem and the population predominatly Hindu. In that case he had claimed that paramountcy had reverted to the people after the departure of the British, and that it was therefore for the people to decide by referendum to which country they should accede. On this plea Indian forces had subsequently marched into Junagadh, which had been forcibly annexed by India. In the case of Kashmir, however, Mr. Nehru had reversed his argument and India had marched her armies into that State on the plea that the Maharaja had acceded to India. "This latest statement" Mr. Chowdhry concluded, "is yet another smoke-screen behind which Mr. Nehru seeks to justify his illegal and forcible seizure of Kashmir."

On May 19, in a speech at Srinagar, Mr. Krishna Menon (Indian Minister without portfolio, and Mr. Nehru's principal adviser on foreign affairs) had indicated that if the Kashmir question was brought before the Security Council, India would press the Council to settle "in unambiguous terms" the question of India's original complaint about Pakistan's "unprovoked aggression" against Kashmir. Mr. Menon declared that "Pakistan comes into the picture only as the accused, and there can therefore be no question of her having equal status with India."

Prior to these developments a series of frontier incidents had occurred along the Indo-Pakistani borders, for which each side accused the other of responsibility. Details of these incidents are given below in chronological order.

The Assam Border Incidents. Indian and Pakistani troops exchanged fire across the River Surma, on the border of East Pakistan and Assam, on Feb. 24-25 and on March 1, one Indian civilian being killed in the first incident and two (including a policeman) seriously wounded. A cease-fire was agreed between the Assam and East Pakistan Governments on March 2. Maps issued by the Indian Government before partition differ on the position of the river, some showing it as wholly in territory now in Pakistan, others as in present-day India, and yet others giving the mid-stream as the boundary.

The Chhad Bet Incident. Shots were exchanged on Feb 19 between armed Pakistani police and Indian troops at the island of Chhad Bet, in the Rann of Kutch, on the border of Kutch and West Pakistan, three Indian soldiers were wounded, two of them seriously. On the approach of an Indian force on Feb. 25 the Pakistani police withdrew from the area.

A Pakistani Government statement issued on Feb. 26 claimed that Chhad Bet was situated in the former Sind Province and now formed part of West Pakistan, that India had never been in possession of it, and that Indian forces had violated Pakistani territory there on Feb. 17, 19 and 24. Mr Nehru, on the other hand, maintained in a statement in the *Lok Sabha* on March 3 that Chhad Bet was situated some miles south of the boundary between Kutch and Sind, which had been finally settled in 1923-24, and that by occupying the area Pakistani police had thereby violated Indian territory. He added that attempts by the Government of Pakistan to claim the area had been rejected by India on May 9, 1955, and that no reply had been received either to this Note or to another of Jan. 12, 1956, complaining of previous Pakistani incursions into Chhad Bet. Chhad Bet, he explained, was an uninhabited islet which was under water for four months of the year and was otherwise used as a grazing ground.

The Punjab Border Incidents. In order to repair flood damage to the Ferozepur headworks of the Dipalpur canal (which supplies water to Pakistan) Indian labourers began early in March to remove earth from a mound on the right bank of the Sutlej River, the ownership of which is disputed between India and Pakistan. Although this operation had been agreed upon between the two Governments, a number of incidents occurred between March 8 and 19 between Indian troops, who had been sent to protect the workmen, and Pakistani troops, who disputed the right of the Indian troops to enter the area, and shots were exchanged along the frontier between Muthianwala, near Khemkaran (25 miles S.W. of Amritsar) and Husseiniwala. In the most serious clash, in the Husseiniwala area on March 18-19, ten Pakistani and four Indian soldiers were killed and 12 Indian and five Pakistani soldiers wounded, firing, in which mortars and automatic weapons were used, lasted nearly 12 hours until a cease-fire came into effect, each side accusing the other of having fired first. Further shooting occurred during the night of March 20-21 at Nushera Dall, in the Wagah district about 20 miles west of Amritsar.

Measures for the avoidance of further incidents, the undisturbed repair of the headworks at Ferozepur, and the withdrawal of all additional troops brought into the area as a result of the incidents, were agreed by the Commanding Generals of both sides on March 22 and 26. Indian and Pakistani police officials who met at Wagah on March 26 agreed that trenches and other defence works near the border in that area should be demolished, and that a joint inquiry should be held into any future incidents.

Mr. Mohammad Ali announced in the Pakistani National Assembly on March 19 that he had proposed to the Indian Government the setting-up of a joint boundary commission and the signing of a declaration repudiating war as a means of settling disputes between the two countries.

He alleged that India had created a "war psychosis," started a "vicious and immoral" propaganda campaign to deter the U.S.A. from giving military assistance to Pakistan, and "staged border incidents to create insecurity." In all the incidents which had occurred, he declared, "it has been aggression from the Indian side." These incidents had arisen because the Indo-Pakistani border on the West Pakistan side was not properly demarcated, and he had therefore sent a personal message to Mr. Nehru on March 17 proposing that a boundary delimitation commission should be set up and that a meeting at ministerial level should take place. In the interests of peace and good neighbourly relations, he added, India and Pakistan should sign an agreement pledging themselves not to go to war against each other and to settle all disputes by negotiation and mediation, or, failing this, by arbitration.

Mr. Nehru replied to Mr. Mohammad Ali's speech in the House of the People on March 20, when he welcomed his proposal for a "no war" declaration.

Stating that he had read the speech with "sorrow and surprise," he denied that India was conducting a propaganda campaign against Pakistan or had been responsible for the recent incidents. He referred in this connexion to the frequent appeals for *jehad* (holy war) against India made in Pakistan, to the mass migration from East Pakistan to India, and to Pakistan's failure to take action against those responsible for the Nekowal incident (see 14656 A). He welcomed, however, Mr. Mohammad Ali's proposal for the demarcation of the frontier and a "no war" declaration, and pointed out that proposals by India for such a declaration had been rejected in the past by Pakistan (see 13925 A).

In a Note of April 9, the Pakistani Government alleged that Indian troops were being concentrated along the West Pakistan border, and demanded their immediate withdrawal to their peacetime stations. Mr. A. K. Chanda, the Indian Deputy Foreign Minister, completely denied this allegation on April 10. The Indian Government subsequently accused Pakistan on April 16 of concentrating troops near the Husseiniwala headworks, and in a second Note on April 17 alleged that Pakistani aircraft had repeatedly flown over the Punjab during the past three weeks. These allegations were in turn denied by the Pakistani Foreign Ministry on April 23.

It was announced on April 12, following a meeting in Delhi between the Surveyors-General of India and Pakistan, that preliminary work on the demarcation of the borders would begin immediately, starting with the boundary between the Punjab and West Pakistan. Mr. Chanda stated on April 10 that the borders of India and West Pakistan (excluding Kashmir) were 1,503 miles long, of which 779 miles had not so far been demarcated by boundary posts, and those of India and East Pakistan 2,463 miles long, of which about 1,500 miles had not been demarcated.—(Indian and Pakistani High Commissioners' Offices, London - The Statesman, Calcutta - The Hindu, Madras)

A. PERSIA.—U.S. Aid for Development of Khuzistan.

A five-year contract for the drawing-up of a development and industrialization plan for the province of Khuzistan, in south-western Persia, was signed in Teheran on March 15 between the Persian Government and two American specialists in regional development—Mr. David E. Lilienthal and Mr. Gordon Clapp, both former chairmen of the Tennessee Valley Authority.

Following a visit to the area at the request of the Persian Government, Mr. Lilienthal and Mr. Clapp agreed to organize an extensive survey of the resources of Khuzistan—agricultural, industrial, and mineral—as a basis for the unified development of the region over the next 10 or 15 years. Though today a barren and virtually desert province, it was one of the most fertile areas of the ancient world, producing sufficient grain—according to the Greek historian Herodotus—to feed 10,000,000 people. The present-day province of Khuzistan corresponds largely to the ancient kingdom of Susiana (the land described in the Bible as Elam), whose principal city, Susa, was the capital of the Persian Empire under Darius nearly 2,500 years ago. It reverted to desert since the destruction of the ancient irrigation works and canals, its principal source of income at the present day being the oilfields at Abadan.

At a press conference in Teheran, Mr. Lilienthal and Mr. Clapp said that Khuzistan, with its vast natural resources of oil, natural gas, and minerals, could become "the key to the industrialization of Iran" and the "T.V.A. of the Middle East."

The Khuzistan survey will be undertaken by the Development and Resources Corporation, of which Mr. Lilienthal is chairman and Mr. Clapp president. It will be carried out in the framework of the Persian seven-year economic development plan, and will be financed by the Persian Government's oil revenues. (Times - New York Times - New York Herald Tribune)

B. UNITED STATES. — New Secretary of Interior.

Mr. Frederick Andrew Seaton (46), of Nebraska, was nominated by President Eisenhower on May 28 as Secretary of the Interior in succession to Mr. Douglas Mackay, who had resigned in order to contest the Senate seat held by Senator Wayne Morse (Democrat, Oregon). Mr. Seaton had served for the past 15 months as a Presidential assistant at the White House, and had previously been Assistant Secretary of Defence. He sat for one year in the Senate in 1952 for the unexpired term of the late Senator Wherry (Nebraska). Mr. Seaton, who owns several newspapers in the Middle Western States, was one of the strongest supporters of General Eisenhower's nomination for the presidency in 1952.—(New York Herald Tribune)

(Prev. rep. Administration, 14732 B; Mr. Seaton, 11918 D.)

C. CHILE. — Airport for Easter Island.

It was announced in Santiago on May 28 that Chilean and U.S. specialists had completed plans for the building of a major airport on Easter Island, in the Pacific, as a link for direct flights between America and Australia and southern Asia. The airport will have a 10,000 ft. runway capable of taking jet airliners, and is expected to be completed in 18 months at a cost of about $8,500,000. Easter Island, which is under Chilean sovereignty, is over 2,000 miles west of the South American mainland. One of the remotest islands in the Pacific, it is famous for its hundreds of great stone statues, the origin of which has never been determined.—(New York Times)

D. RELIGIOUS LIFE. — Spiritual Healing. - British Medical Association Report to Archbishops' Commission.

A special committee of the British Medical Association published a report on May 11 on the question of spiritual healing. The committee had been appointed by the B.M.A. to prepare a memorandum of evidence for submission to the Commission on Divine Healing which had been set up in 1953 by the Archbishops of Canterbury and York (see 13226 C).

The committee threw doubt upon the claims made for divine healing and miraculous cures, declaring that it could find "no evidence that there is any type of illness cured by spiritual healing alone which could not have been cured by medical treatment." It agreed, however, that there was considerable evidence of the value of religious ministration in the treatment of various disorders. A person's emotional life, it was pointed out, had a direct bearing upon his physical well-being, and religious ministration—on whatever basis it rested—might have an important bearing on the emotional and spiritual life of the patient, and thus contribute to his recovery.

The report pointed out that many individuals said to be cured by non-medical methods would appear to have been suffering from disturbances in which physical symptoms resulted from emotional disturbances—e.g. nervous headache due to worry, or nervous indigestion due to anxiety or unrecognized resentment. In some cases there were apparent cures of an organic disorder, for example the "miracles" of Lourdes and alleged cures by spiritual healing of patients who had been pronounced by their doctors as incurable. The report commented, however: "Most of these cures come under one or another of the following categories: (*a*) mistake in diagnosis; (*b*) mistake in prognosis; (*c*) alleviation; (*d*) remission, (*e*) spontaneous cures, and (*f*) combined treatment."

As regards (*d*), the report pointed out that some diseases were subject to "remissions"—i.e. symptoms disappeared and the patient appeared to have recovered, but as the disease condition remained the illness tended to return and the patient to relapse. It added in this connexion. "The 'miracle' may be reported in the Press. Later the patient relapses and the relapse receives no publicity, but remains the secret of the patient, his friends, and his doctor." With regard to (*f*) the report stated that it was often found, in investigating "cures" attributed to spiritual healing, that the patient was at the same time continuing treatment prescribed by a doctor, although this fact was not stated by those claiming the "cures."

In a sense (the report continued) all healing might be considered divine; "many aspects of healing are still outside our present knowledge, and this we should humbly admit." Nevertheless, when all possibilities were exhausted "it leaves little room for miraculous cures of organic disease by spiritual healing . . . The cases claimed as cures of a miraculous nature present no features of a unique and unexpected character outside the knowledge of any experienced physician or psychiatrist."

On the religious aspects of healing, the committee said: "A religious conversion, in which there is a complete upheaval of the emotional life of the patient, is capable not only of reorientating his mode of living, but of curing various forms of neurosis, alcoholism, and other functional disorders. While we regard many of the cures effected by unorthodox means, including spiritual healing, as mainly due to suggestion, we are of opinion that such suggestion is likely to be more effective when it has a religious background and when backed by the belief in Divine help."

In a section on the "miracles" of Lourdes, the report said that in spite of the "immense pressure of popular enthusiasm" the number of miracles actually attested and registered over the years had been exceedingly small. "In any event, spontaneous or unexpected cures in this country—like those of Lourdes, which cannot be explained—are very few, and in the committee's opinion it is probably better to acknowledge that they are at present inexplicable on scientific grounds."

The committee considered that some information should be sought on alleged cures associated with magic or witchcraft. Little information on this subject was forthcoming, although one doctor had told the committee: "The practice of magic, both white and black, was widely spread in my Devon practice. I had one definite death from witchcraft—or I suppose I should say suggestion—while I was there. The practice of charming away warts is extremely effective."

[Commenting on this section of the report, the Press quoted statements by persons living in the West Country to the effect that belief in magic and witchcraft was still widespread in parts of Devon and Cornwall.]

In conclusion, the report expressed the opinion that doctors and clergy could meet and co-operate in their work. The best co-operation would be where the doctor and clergyman discussed how they could best help the individual patient. Informal gatherings between small groups of doctors and clergy in a particular locality would also be of value, and often bring to light cases of people in need. Regret was expressed that three Roman Catholic doctors, all prominent members of the medical profession, had declined invitations to serve on the special committee appointed by the British Medical Association. (Times - Daily Telegraph - Manchester Guardian)

JUNE 2—9, 1956

A. UNITED KINGDOM. — Government Plans for Expansion of Technological Education. - Five-year Development Scheme for Technical Colleges. - Increase in Technical Scholarships. - Industrial Fund for Scientific Education in Schools. - Expansion of Imperial College of Science. - Creation of National Council for Technological Awards. - New Diploma in Technology.

Plans involving the expenditure of about £97,000,000 on buildings and equipment in an effort to increase the number of technologists, technicians, and craftsmen were announced in a White Paper published on Feb. 29. A summary is given below under cross-headings.

Need for Expansion in Scientific and Technical Education. Although the number of students in science and technology at British universities had doubled between 1948 and 1955, and more schools and technical colleges had been built since the Education Acts of 1944 and 1945, the need and demand for technical education was quickening with the pace of economic change, and other countries were making an immense effort to train more scientific and technical manpower. In the light of this, the scale of expansion in Britain had been "much too small," and the U.K. was in danger of being left behind After reviewing the system of technical education throughout the country, the Government had therefore made plans for "a new major advance"

Existing Technical Training Facilities. There were at present about 500 technical or commercial educational establishments in England and Wales, varying from large colleges of technology (mostly in London or the county boroughs) to small technical institutes, nearly all maintained by local education authorities There was no uniform pattern of technical education, and the courses organized in technical colleges ranged from preliminary courses for boys and girls of 15 to post-graduate work. Some courses were held during the day, but most were evening classes, and although some staff were full-time, many were part-time only. In this connexion the White Paper stressed the flexibility of the British system of technical education, and pointed out that part-time students could work towards Higher National Certificates or University of London degrees, whereas in most other countries it was very unusual for anyone leaving school before the age of 18 to embark on a career leading to high technological qualifications.

Expansion of Technological Training at Universities. The White Paper pointed out that the training of technologists was shared between the universities and technological colleges, and explained that the Government aimed at expanding facilities at both. Stressing the great expansion in the number of university students in science and technology since the war, it stated that in the current session such students numbered 29,013, or 124 per cent above the 1938-39 figure, and represented 34½ per cent of the university student population, compared with only 26 per cent in 1938-39. In allocating grants for capital expenditure since the war, high priority had been given to buildings for teaching and research in science and technology. In addition, the Government had undertaken in 1953 a large expansion (expected ultimately to cost about £15,000,000) at the Imperial College of Science and Technology (University of London), and, later, a programme of developments at other universities (see below). The universities were now working out plans for the quinquennium 1957-62, and the University Grants Committee would report on them during the coming year.

Five-Year Development Programme for Technical Colleges. The five-year programme, which the Government proposed to put in hand immediately, aimed at (*a*) increasing by about one-half the output of students from advanced courses, and (*b*) doubling the numbers of employed boys and girls released by their employers for part-time courses during the day, as part of a proportionate increase at the lower level. To carry out the programme it would be necessary during 1956-61 to start a building programme to cost about £70,000,000 in England and Wales and £10,000,000 in Scotland, and to spend an additional £10,000,000 and £2,000,000 respectively on equipment.

The present number of students completing advanced courses at technical colleges in England and Wales was about 9,500, and it was planned to raise the number as soon as possible to 15,000. The Government believed that for the higher technological qualifications "sandwich" courses would become increasingly suitable; these courses, lasting four or five years, would consist of alternate periods (usually of three to six months' duration) of theoretical education in a technical college and of specially designed practical training in industry. Students taking "sandwich" courses at the highest level would be eligible for the new award to be given by the recently constituted National Council for Technological Awards (see below), and also for the Technical State Scholarships now available to help students of outstanding ability employed in industry to take honours degree courses at universities, or equivalent courses elsewhere.

Most full-time or "sandwich" courses, it was considered, should be carried out in colleges concentrating on advanced work. At present there were 24 regional technical colleges which received the 75 per cent grant introduced in 1952; the Government wished to see the proportion of advanced work at these colleges rapidly increase, so that as many of them as possible might develop into colleges of advanced technology.

Increased Number of Technical Scholarships. The number of Technical State Scholarships would be increased as the technological courses developed. To encourage entry on the courses straight from school, it was proposed to allow ordinary State scholarships to be held in future courses leading to a Technological Award, as well as for university honours courses. Local education authorities would be asked to make their own major awards available for these courses, at rates equivalent to those paid for university students

The Need for More Technicians. Stressing that the need for more technologists was accompanied by an urgent need for technicians, the White Paper stated that the Minister of Labour and National Service had asked the National Joint Advisory Council to consider how future needs for craftsmen and technicians should be met. It pointed out that the traditional method of training in Britain was apprenticeship, and stated that employers in most industries with apprenticeship schemes had agreed to release their apprentices for one day a week for attendance at technical classes where facilities existed However, although there had been a great increase since the war in the use of these "day release" facilities, the number of apprentices under 18 released by their employers in 1953-54 to attend day classes in England and Wales was still only 210,384, or 27 per cent of male apprentices and seven per cent of girls, with wide variations from one industry to another. Serious wastage occurred in courses for craftsmen and technicians, and in many courses only about 25 per cent of those who started reached and passed the final examination; wastage from part-time classes, however, was much less than from evening classes. The Government would therefore urge industrialists and local education authorities to enable more boys and girls to study during the day instead of in the evening.

Other Matters. The White Paper also stressed the need to find a place in technical studies for liberal education, and in particular for the teaching of English In addition, it discussed the scope for recruiting more girls and women for courses in technical colleges, and examined the prospects of increasing the supply of teachers, including the possibility of industry releasing more employees for part-time teaching.

The Minister of Education (Sir David Eccles) stated in the House of Commons on the same day that the Government felt that the programme outlined in the White Paper was "fundamental to Britain's economic prosperity." It would therefore be "exempt from cuts, delays, and postponements of any kind," and would have the same priority as was being accorded to the development of atomic power.

The publication of the White Paper followed a number of Government statements since 1954 on technological education, as summarized below:

Mr. R. A. Butler (then Chancellor of the Exchequer) announced in the House of Commons on July 13, 1954, that he had approved plans submitted by the University Grants Committee for developments in technological education outside London. The main centres would be Glasgow, Manchester, Leeds, and Birmingham, but provision would be made for developments elsewhere. Developments would take place at institutions already receiving recurrent grants on the Committee's recommendation, since it was considered that to increase the number of institutions concerned with higher technological education would involve an unjustified dispersal of effort.

Lord Salisbury (Lord President of the Council) stated in the House of Lords on Dec. 7, 1954, that the Government's plans provided for a "massive" expansion of the Imperial College of Science and Technology in London; major developments at Glasgow, Manchester, Leeds, and Birmingham; "fairly large-scale" developments at Cambridge and Sheffield; and specialized developments at other large centres, including Edinburgh, Newcastle, Southampton, and Swansea. The Government believed that higher technological education must be closely linked with other university studies, and that the best progress could be made by linking technological development as closely as possible with existing university institutions, rather than by starting entirely technological institutions. [This remark referred to proposals by the Parliamentary and Scientific Committee, which in a memorandum published on July 26, 1954, had recommended the establishment of Royal Chartered Colleges of Technology, with power to award degrees. The committee suggested that up to 20 existing technological colleges might be eligible for charters, and should offer full-time "sandwich" courses, part-time day and evening courses, and facilities for full- and part-time research.]

Lord Salisbury added that about one-eighth of the total recurrent grants to universities (i.e. about £3,000,000 annually) was used for technology, and that the Government was now making additional recurrent grants for technology of £196,000 for the current year (i.e. 1954-55), £404,000 for 1955-56, and £704,000 for 1956-57. In the next two years there would also be an increase in recurrent expenditure of about 25 per cent in special extra grants. For building and equipment, the capital expenditure and liabilities against public funds incurred in recent years amounted to about £10,000,000, including work in progress at the Imperial College, the Royal Technical College, Glasgow, and the Manchester College of Technology. The Chancellor of the Exchequer had authorized further buildings costing £1,000,000, in addition to the normal university building programme for 1955-56. Other technological projects were contained in the University Grants Committee's plans for development, the total cost of which might amount to £10,000,000 over the next 10 years.

Other recent developments in connexion with scientific and technological education are summarized below:

Industrial Fund for Scientific Education in Schools.

It was announced on Oct. 31, 1955, that a group of companies in the chemical, electrical, and mechanical engineering industries had established an industrial trust fund for the advancement of scientific education.

It was explained that the sponsoring companies "viewed with growing disquiet the shortage of scientists, mathematicians, and technologists," and had therefore decided to take steps to assist the teaching of pure and applied mathematics and science in independent and grant-aided technical schools, which lacked help from public funds and often had no adequate capital resources. The fund—to be known as the Industrial Fund for the Advancement of Scientific Education in Schools—would assist these schools by providing capital grants towards the building, expansion, and equipping of school buildings. Over £1,500,000 had already been guaranteed, and it was expected that many other companies which depended on adequate supplies of scientists and mathematicians would add their support.

The companies so far connected with the fund (i.e. at Oct. 31, 1955) were: Associated Electrical Industries Ltd., British Insulated Callenders Cables Co. Ltd., British Petroleum Co. Ltd., British Portland Cement Manufacturers Ltd., Courtaulds Ltd.; The Distillers Co. Ltd., English Electric Co. Ltd., Esso Petroleum Co. Ltd.; General Electric Co. Ltd., Arthur Guinness, Son and Co. Ltd.; Imperial Chemical Industries Ltd.; Imperial Tobacco (Great Britain and Ireland) Co. Ltd., Rolls-Royce Ltd., Shell Petroleum Co. Ltd.; Tube Investments Ltd., Vickers Ltd., and the Wellcome Foundation Ltd. The statement added that an executive committee had been formed, with Sir Hugh Beaver as chairman, to adjudge and assess applications from schools for aid.

The executive committee announced on April 3, 1956, that a total of 90 companies had joined the fund and had subscribed an aggregate amount of £2,900,000. As of that date, 429 schools (including 294 independent schools) had applied for grants totalling about £10,000,000, but the committee had reduced the figure to £3,500,000. Four assessors had been appointed as technical advisers to the committee in administering the fund, and principles had been laid down for determining the qualifications, amounts, and priorities for grants. In general, grants would be restricted to the teaching of the fundamental sciences of physics, chemistry, and mathematics, and would not exceed two-thirds of the cost of each project. Priority would usually be given to schools having at least 250 pupils over the age of 13, and having at least 10 per cent of these pupils in the mathematics and science sixth forms.

Expansion of Imperial College of Science and Technology.

Lord Home, Secretary of State for Commonwealth Relations, announced in the House of Lords on Jan 26, 1956, that the Government had decided to proceed with full-scale plans, expected to cost about £15,000,000, for the expansion of the Imperial College of Science and Technology at South Kensington, London. The decision had been made, "notwithstanding the difficulties involved," in view of "the urgent need to increase the country's output of scientists and technologists."

The plans referred to by Lord Home had originally been announced in January 1953, and aimed at making the Imperial College "the equal of any of pure and applied scientific education in the world." They envisaged the doubling of the College's teaching capacity by providing for 3,000 students, an increase in floor-space to about 1,500,000 square feet, and the replacement of over-crowded and obsolescent buildings by "very large" new ones for civil, mechanical, and electrical engineering. As originally conceived, the plans called for the demolition of the Imperial Institute, which faces the Imperial College and was built as a memorial to Queen Victoria's Golden Jubilee (1887). This proposal was strongly criticized on the ground that the Imperial Institute was one of the finest examples of Victorian architecture, and pleas for the retention of the building were made by the Royal Fine Art Commission and other bodies. In particular, there was considerable opposition to the proposed demolition of the Institute's bell-tower—the Collcutt Tower, named after the architect who built the Imperial Institute, and a landmark of present-day South Kensington. When, however, the first detailed plans were made public on March 15, 1956, the hope was expressed that it might be possible to preserve the Imperial Institute buildings.

National Awards in Technology.

Sir David Eccles announced in the House of Commons on Dec. 1, 1955, the setting-up of a National Council for Awards in Technology, with the duty of "creating and administering awards in technology" available to students in technical colleges who had passed courses approved by the Council.

The Minister stated that the Council had been set up on the advice of the National Advisory Council for Industry and Commerce, and that its chairman would be Lord Hives, chairman of Rolls-Royce Ltd. The following five members had been appointed by the Ministry of Education: Sir Harold Roxbee Cox (director of the Brush Group), Sir Arnold Hall (technical director of the Hawker Siddeley Group), Dr. Willis Jackson, F.R.S. (director of research and education of Metropolitan Vickers Electrical Co. Ltd.), Mr. Idris Jones (director-general of the scientific department of the National Coal Board), and Mr. E. L. Russell (Chief Education Officer of Birmingham). There would be six more members, three nominated by a board of studies in engineering and three by a board of studies in technology.

The Council announced on May 14, 1956, that it proposed to grant Diplomas in Technology, the courses for which would be equivalent in standard to honours degree courses of a British university. The awards would be denoted by "Dip. Tech. (Eng.)" for engineering, and by "Dip. Tech." for other technologies. There would be two honours classes, the intention being that students should normally reach second-class honours level; those failing to do so might be considered for "pass" diplomas. Courses would be "full time" (three years) or "sandwich" (four years), but students attending "full time" courses would be expected to have at least one year's previous training in industry. The minimum age of admission to courses would normally be 18 years.—(Times - Daily Telegraph - Manchester Guardian - Ministry of Labour Gazette)

(Prev. rep. 12376 D; Prime Minister's Statement on Technological Education, 14639 A.)

A. UNITED KINGDOM. — Tonbridge By-election.

Voting took place on June 7 in the Tonbridge division of Kent, the by-election being caused by the resignation through ill-health of Mr. Gerald Williams (Conservative). Result:

Hornby, Richard (Conservative)	20,515
Fagg, Robert (Labour)	18,913
No change. Conservative majority	1,602

Figures at the general election were: G. W. Williams (C.) 29,521, R. L. Fagg (Labour) 19,325—Conservative majority, 10,196.

The Conservative candidate received 52.03 per cent of the votes in the by-election and the Labour candidate 47.97 per cent, compared with general election percentages of 60.44 and 39.56 respectively. The Conservative proportion of the total vote thus fell by 8.41 per cent and the Labour proportion rose correspondingly.

The electorate numbered 67,701 (an increase of 2,992 since the general election), of whom 58.24 per cent went to the poll, compared with 75.48 per cent at the general election.

Mr. Hornby (33) is an advertising executive, and was formerly a master at Eton. He contested the recent West Walthamstow by-election (see 14730 A).

Mr. Gerald Williams had been Member for Tonbridge since 1945. In 1952 he introduced a private member's Bill (subsequently enacted) which allowed people to bequeath the corneas of their eyes to help in restoring the sight of blind persons. (Daily Telegraph) **(Prev. rep. By-elections, 14857 A.)**

B. NEPAL. — Coronation of King Mahendra.

The King of Nepal, H.M. Mahendra Bir Bikram Shah Deva, was crowned in Khatmandu on May 2 with the traditional Vedic ceremonies. The Coronation of King Mahendra and of Queen Ratna Rajya Laxmi took place at the Hanuman Dhoka palace (the Temple of the Monkey God), where the Nepalese sovereigns have been crowned for many centuries, and was attended by representatives of 15 foreign countries, including Great Britain, India, Pakistan, and the People's Republic of China. The British delegation included the Earl of Scarbrough (Lord Chamberlain) and Viscount De L'Isle, V.C., whilst the Indian and Pakistani delegations were led respectively by Vice-President Radhakrishnan and Mr. Hamidul Huq Chowdhry, the Foreign Minister. The hour of the Coronation was chosen by the Royal Astrologer in accordance with ancient custom.

King Mahendra (who is 36) is the ninth sovereign of the Shah dynasty, founded in 1742. He ascended the throne of Nepal in March, 1955, following the death of his father, the late King Tribhuvana. In a proclamation issued after his Coronation he announced his aim of establishing a Welfare State in Nepal. (The Hindu, Madras - The Statesman, Calcutta - Times)

(Prev. rep. King Mahendra, 14716 A; 14116 A.)

C. BRITISH TOGOLAND. — Plebiscite on Future Status. - Final Voting Figures.

The final results of the British Togoland plebiscite on the future status of the territory, held under U.N. supervision on May 9, were: 93,365 votes in favour of the territory's integration with the Gold Coast; 67,422 votes in favour of continued British trusteeship under the U.N. pending final determination of the territory's status.

In the two Northern districts - Dagomba and Mamprusi - the vote was 45,953 in favour of union with the Gold Coast and 9,978 in favour of continued U.N. trusteeship. In the two Southern districts—Ho and Kpandu—35,940 voted for separation from the Gold Coast and only 16,068 for union. In the two remaining districts—Buem-Krachi and Gonja - the majority vote was for union.

The votes cast numbered 161,882, of which 1,095 were void. (U.N. Information Centre, London) **(Prev. rep. 14868 B.)**

A. LONDON. — Abandonment of Plan for rebuilding of Queen's Hall. - Proposed Music Centre in Regent's Park. - Mermaid Theatre for City of London.

The Financial Secretary to the Treasury (Mr. Henry Brooke) stated in a parliamentary written answer on Dec. 21, 1955, that the Government had decided to abandon the project for rebuilding the Queen's Hall in view of the "closely reasoned" arguments of the committee which had been appointed to consider this matter (see below). At the same time Mr. Brooke stated that the Government had accepted the committee's recommendation for a "comprehensive survey of the needs for cultural buildings in London and the rest of the country," a task which the Arts Council had agreed to undertake. He added that the survey would include in its scope a plan for a music centre in Regent's Park.

The committee to inquire into the practicability of building a new and larger Queen's Hall had been appointed by the Chancellor of the Exchequer (then Mr. Butler) in October 1954 (see 13883 C), and issued its report as a White Paper on May 27, 1955. It recommended that the scheme announced in June 1951 (see 11567 B) by Mr. Gaitskell, then Chancellor of the Exchequer in the Labour Government, should be dropped, and that, in its place, a plan for a music centre in Regent's Park, put forward by the London Society, should be put in hand as soon as possible This plan provided for the building in Regent's Park of concert halls to seat 1,100 and 540 people respectively, together with a school for opera and other musical facilities

After thoroughly investigating the need for, and prospects of, a new hall on the Queen's Hall site, the committee found that on musical and cultural grounds it was certainly desirable that London should eventually have another concert hall with good acoustic qualities. It was doubtful, however, whether there was at present enough demand for such a hall to enable it to be run at reasonable capacity without seriously subtracting from the audiences at existing halls—e.g. the Albert Hall and the Royal Festival Hall.

The direct annual subsidy necessary for a larger hall on the Queen's Hall site, as contemplated in Mr Gaitskell's statement in 1951, would be between £55,000 and £75,000, assuming a probable annual cost (including capital charges) of £147,000–£167,000 and receipts—taking "the rosiest view of the number of lettings at the highest conceivable rents"—of £91,500. In addition to the "possibly heavy" loss which the presence of the new hall might cause to other subsidized institutions, it was doubtful whether a hall as large as that proposed could be fitted even into the Queen's Hall and St. George's Hall sites and still be acoustically satisfactory. There was also the question of parking space. Since there was good ground for thinking that it would be much less expensive to build a hall where there was room for parking cars at ground level, and where it would not be so expensive to exclude noise, the committee "could not think it a disaster if, when the time arrived, the site in Langham Place were to be used for something else"

The committe also investigated the possibility of moving the Promenade Concerts (at which the average attendance during the last season had been 4,340) from the Albert Hall to a new and acoustically improved hall. They found, however, that the B.B.C. regarded the acoustics of the Albert Hall as "satisfactory for broadcasting", even if less satisfactory for the audience in the hall, and would therefore not move the Promenade Concerts to a better hall of less capacity.

Proposals for the lease of a blitzed site in Upper Thames Street to the trustees of the Mermaid Theatre were approved on Feb. 16, 1956, by the Common Council of the City of London. The Mermaid Theatre—named after the famous playhouse in the London of Elizabeth I—was founded after the Second World War by Mr. Bernard Miles, the actor, and is at present housed in St. John's Wood. When transferred to its new site it will be the first theatre in the City of London for nearly 300 years.—(Times - Daily Telegraph) **(13883 C; 11567 B.)**

B. DENMARK - SOVIET UNION.—Trade Agreement.

A two-year trade agreement between Denmark and the Soviet Union was signed in Copenhagen on May 15, following negotiations which had resulted from the arrangements made at the time of the Danish Prime Minister's visit to Moscow in March last.

The agreement provided for mutual exchanges totalling 270,000,000 Danish kroner (£13,500,000) annually in each direction. Danish deliveries will principally comprise two fast freighters of 10,000 tons each, nine small refrigerator ships, modern diesel engines for 14 ships, machinery for the cement, food, and textile industries, chemical plant, refrigeration plant, and radio equipment. Danish agricultural supplies will consist of butter (10,000 tons), meat, salted herrings, and cheese. The Soviet Union will send to Denmark food grains, fertilizers, building timber, petroleum products, coal and coke, iron ore, ferrous alloys, chemicals, machine-tools, tractors and other agricultural machinery, loading and transport machinery, motor-cars, and lorries.

It was arranged that the annual turnover between the two countries during the currency of the agreement should on the average be double that of 1955. (Politiken, Copenhagen) **(Prev. rep. 14768 A.)**

C. UNITED STATES. — Pulitzer Prize Awards.

The annual Pulitzer Prize awards (for 1955) were announced on May 7 by the trustees of Columbia University, N.Y., the recipients of the principal awards being as follows:

Literature Prize. Awarded to MacKinlay Kantor for his novel *Andersonville*, a story of the American Civil War published in October last Mr Kantor has written some 30 books, including novels, verse, and short stories He was the author of the original story for the motion picture *The Best Years of Our Lives*.

Drama Prize. Awarded to Frances Goodrich and Albert Hackett for their stage version of *The Diary of Anne Frank* Miss Goodrich and Mr. Hackett are married, and have collaborated in writing a number of plays.

[Anne Frank was a 16-year-old German-Jewish girl who lived underground in Amsterdam during the German occupation of Holland. Her hiding-place in an empty house was betrayed to the Gestapo, and she perished in the Belsen concentration camp. She left behind her a diary which was discovered at the end of the war, and which has been published in many countries]

History Prize. Awarded to Richard Hofstadter for his book *The Age of Reform*, an examination of the half-century between 1890 and 1940. Mr. Hofstadter is Professor of History at Columbia University.

Biography Prize. Awarded to Talbot F Hamlin for his biography of Benjamin Henry Latrobe, America's first professional architect. Mr Hamlin taught architecture at Columbia University for 38 years, and has been Professor Emeritus since 1954.

Music Prize. Awarded to Dr Ernst Toch for his *Symphony No. 3*, first performed by the Pittsburgh Symphony Orchestra in December last. A Viennese by birth, Dr. Toch came to the U.S.A. in 1934 and subsequently joined the staff of the University of California.

Poetry Prize. Awarded to Elizabeth Bishop for her collected poems, published under the title *North and South—A Cold Spring* Miss Bishop was formerly poetry consultant at the Library of Congress. She has lived in Brazil since 1951.

National Reporting. The prize for distinguished national reporting was awarded to Charles L Bartlett, of the *Chattanooga Times* (Tennessee), "for the original disclosures that led to the resignation of Harold E. Talbott as Secretary of the Air Force."

[Mr. Talbott resigned on Aug 1, 1955, following an inquiry into allegations that he had misused his office to obtain business for an engineering firm of which he was a partner—see 14375 A The matter had first been raised in a series of articles by Mr Bartlett.]

International Reporting. The prize for distinguished international reporting was awarded jointly to William Randolph Hearst jr. (of Hearst Newspapers), Kingsbury Smith (of the International News Service), and Frank Conniff (editorial assistant to Mr Hearst) for a series of exclusive interviews with Soviet leaders, described as a "distinguished example of reporting on international affairs" Mr. Hearst, Mr. Kingsbury Smith, and Mr. Conniff were in Moscow at the time of M. Malenkov's resignation from the Soviet Premiership, and succeeded in obtaining exclusive interviews with Marshal Bulganin, M. Khrushchev, M. Molotov, and Marshal Zhukov.

A small Californian newspaper with a circulation of only 7,800, the *Watsonville Register-Pajaronian*, was awarded the annual prize (a gold medal) for meritorious public service by a newspaper. It was made for the paper's "courageous exposure of corruption in public office, which led to the resignation of a district attorney and the conviction of one of his associates." (New York Times - New York Herald Tribune) **(14231 B.)**

Note. The Pulitzer Prizes are awarded from a fund established under the will of Joseph Pulitzer (1847-1911), a Hungarian immigrant who became one of America's leading journalists. Awarded annually since 1917, they are regarded as the leading American prizes in the fields of literature, drama, history, biography, music, poetry, and journalism. The awards, made by the trustees of Columbia University, are of a value of $500 each except those for journalism, which are $1,000. Awards to newspapers take the form of a gold medal.

(Ed. K.C.A.).

D. AUSTRALIA. — All-Party Constitutional Reform Committee. - Examination of Australian Constitution.

A proposal by the Australian Prime Minister, Mr. Menzies, to establish an all-party parliamentary committee to review the Australian Constitution and consider its revision was unanimously accepted on May 16 by the Federal Parliamentary Labour Party, and was adopted by the Australian House of Representatives on May 24.

The committee will consist of six Government and six Opposition members of both Houses of Paliament, under the chairmanship of the Attorney-General, Senator Spicer, who will have a casting vote on matters of procedure. Mr. Menzies and the Leader of the Opposition (Dr. Evatt) will be *ex-officio* members of the committee, with liberty to attend its discussions as they desire.

The formation of such a committee had first been suggested by Mr. Menzies in his policy statement before the 1954 general elections. (Australian News and Information Bureau)

A. EASTERN EUROPE. — Berlin Meeting of Council of Mutual Economic Assistance. - Specialization of Economic Production among Member-Countries.

A meeting of the East European Council of Mutual Economic Assistance was held in East Berlin from May 18-25, being attended by representatives of the eight member-countries—the Soviet Union, Poland, Eastern Germany, Czechoslovakia, Hungary, Bulgaria, Rumania, and Albania.

The meeting discussed the co-ordination of the development during the five-year period 1956-60 of the most important branches of the national economies of the member-countries, viz., the engineering, optical and precision instrument, iron and non-ferrous metals, coal-mining, oil and gas, and chemical industries, as well as of agriculture. Among the decisions announced in the official communiqué were :

(1) Recommendations concerning the level of production in and mutual deliveries between member-countries of basic types of machines, equipment, raw materials, fuel, and foodstuffs

(2) Further specialization of production among the countries concerned in the engineering, precision-instrument, and optical industries

(3) Economic co-operation between member-countries in developing the output of iron-ore, coking coal and coke, and non-ferrous metals, including Polish coal supplies and Soviet iron-ore deliveries to other member-countries.

(4) Approval of a programme for increased mutual deliveries of electric power, and a large-scale plan for the exploitation of the power resources of the Danube.

(5) In connexion with the long-range plans for agricultural development, the meeting stressed the need for a considerable increase in agricultural production, particularly of grain, and in the area under maize. It also recommended a large expansion of the artificial fertilizer industry and the further development of the production of agricultural machinery.

(6) Improvements in the organization of economic, scientific, and technical co-operation between member-countries.

Representatives of the Chinese People's Republic and of Yugoslavia attended the meeting as observers.

The East German newspaper *Neues Deutschland* announced on May 5 that the eight member-countries of the Warsaw Treaty Organization had launched a co-ordinated system of "division of work" for their basic industries. It was stated that Eastern Germany, for example, would concentrate on the production of brown coal (lignite), chemicals, high-quality steels, potash, and fertilizers; Poland and Czechoslovakia on the expansion of their hard coal output; Hungary on aluminium production; and Rumania on the production of oil and natural gas. At its Prague meeting in December last (see 14704 A) the Council of Mutual Economic Assistance had agreed that the various countries should specialize in certain lines of production for which they were best fitted for the benefit of the "Warsaw Treaty" area as a whole.
(Polish Embassy Press Office, London) **(Prev. rep. 14704 A.)**

B. SOVIET UNION. — Resignation of M. Molotov. - M. Shepilov appointed Foreign Minister.

It was announced in Moscow on June 1 that M. Molotov had asked to be relieved of his duties as Foreign Minister of the U.S.S.R.; that the Presidium of the Supreme Soviet had accepted this request; and that he had been succeeded as Foreign Minister by M. Dimitri Shepilov, editor-in-chief of *Pravda* and secretary of the central committee of the Soviet Communist Party. M. Molotov remained a First Deputy-Premier in the Soviet Government.

M Shepilov (50), a close collaborator of M. Khrushchev, was appointed Editor-in-Chief of *Pravda* (organ of the Soviet Communist Party) in 1952, and for the past two years had been chairman of the Foreign Affairs Commission of the Supreme Soviet, in which capacity he had played an increasingly important part in shaping foreign policy. In July, 1955, he was appointed secretary of the central committee of the Communist Party, and at the party congress in February last he became one of the six candidate members of the party presidium (see page 14748, second column). He accompanied Marshal Bulganin and M. Khruschev on their visit to Yugoslavia.

M. Vyacheslav Molotov (66) had been Foreign Minister of the U.S.S.R. for 13 years—from 1939 to 1949, and from 1953 until his resignation One of the few remaining leaders of the October Revolution, he worked closely with Lenin and Stalin and was Prime Minister of the U.S.S.R. in 1930.

M. Molotov's resignation was announced on the eve of a visit to Moscow by President Tito of Yugoslavia, and was regarded in the Western countries as being linked with the new anti-Stalinist policy. Together with the late Marshal Stalin, M. Molotov signed the letter to the Yugoslav Communist Party in 1948 which denounced the course that the party was taking, and which was followed by Yugoslavia's expulsion from the Cominform.—(Times - Le Monde, Paris - Manchester Guardian)
(Prev. rep. M. Molotov, 12797 A.)

C. AUSTRALIA. — Increased Salaries and Allowances for M.P.s and Senators.

The Australian House of Representatives passed a Bill on May 29, with only one dissentient vote, providing for increased salaries and expense allowances for Members of Parliament and Senators. The Bill implemented in their entirety the recommendations of a committee of three businessmen which had been appointed in 1955 to review parliamentary salaries and allowances. The report of the committee, which was presided over by Sir Frank Richardson (a Melbourne businessman), had been placed before Parliament by the Prime Minister on April 18.

The principal provisions of the Bill were as follows :

(1) The salaries of Members of Parliament and Senators would be increased from £A1,750 to £A2,350 a year, and expenses allowances to £A600 for city members, £A800 for country members, and £A700 for Senators [These allowances had hitherto been on a sliding scale of £A400 to £A500 for M.P.s, and at a flat rate of £A550 for Senators.] Allowances, however, which were formerly tax-free, would become subject to income-tax. The attendance allowance of M.P.s and Senators while in Canberra for parliamentary sittings remained unchanged at £A2. 10s. a day.

(2) The right of free travel on parliamentary passes would be replaced by the issue of travel warrants when Members or Senators were on parliamentary and constituency business.

(3) The Prime Minister's travelling allowance would be raised from five to ten guineas a day (in addition to the cost of transport), and the travelling allowances of Ministers and of the Leader of the Opposition would be raised from five to seven guineas

(4) The Speaker of the House of Representatives and the President of the Senate would receive the same travelling allowance (seven guineas a day).

(5) A salary of £A375 and an expense allowance of £A250 would be paid to the Deputy Leader of the Opposition in the Senate, for whom no special provision had previously been made.

(6) The increases would become effective from July 1, 1956.

In accordance with the committee's recommendations, no changes were made in the amounts of ministerial salaries and expense allowances, apart from Ministers' parliamentary salaries. Ministerial salaries and allowances are: Prime Minister—£A4,000, plus £A3,000 allowance; Treasurer, £A2,500, plus £A1,000 allowance; senior Ministers, £A2,178, plus £A1,000; other Ministers, £A1,750, plus £A1,000.

The salaries of M.P.s and Senators had last been increased in 1952 (from £A1,500 to £A1,750). Since that year there had been sharp increases in prices and substantial increases in most salaries and wages. —(Australian News and Information Bureau)

D. SOUTHERN RHODESIA. — Five-Year Plan for African Education.

A five-year plan for African education, which would cost an additional £3,800,000 and increase total expenditure over the period to £12,500,000, was announced on March 15 by Mr. R. S. Garfield Todd, the Prime Minister of Southern Rhodesia. The plan aims at providing a five-year course for all children and at ending illiteracy among the African population, its main points being as follows :

Primary Education. Although large numbers of Africans started school at the age of seven, 70 per cent never progressed beyond the primary stage. The real weakness had been the number of untrained teachers, e.g. in 1954, out of a total staff of 8,000 teachers, 4,665 had been untrained, all of them employed in the lower classes. A drive had therefore been started, with the co-operation of 24 mission training schools, for the training of 4,000 men and women teachers by the end of 1960. A second teachers' training school would be opened in January 1958, and by that year at least 750 men and women capable of teaching in primary schools would graduate annually. The total enrolment in the first five classes would not increase greatly during the five-year period, but the numerical structure of the classes would become more evenly balanced than in 1954, when 286,000 pupils were enrolled in the three lower standards and only 23,000 in the three higher standards.

Secondary Education. By December 1960 the Government planned to have 1,000 entrants for the Rhodesian Junior Certificate Examination (a two-year secondary course) and 250 for the Cambridge Certificate, through the establishment of three new high schools and an increase in the number of secondary classes at existing centres. Higher teacher-training courses would be established to take full advantage of all the available entrants.

Commercial and Technical Education. It was planned to open courses in commercial and technical education.

Finance. The increased expenditure, added to the steadily increasing vote for other specifically African services, had made the total vote so substantial that the Government had decided to increase African taxation from £1 to £2 per head per annum, which would provide about £50,000 annually from the African people themselves.

Under the Constitution establishing the Federation of Rhodesia and Nyasaland, African education remained a territorial responsibility.—(Federal Information Dept., Salisbury)

A. **CYPRUS. — Intensification of Terrorist Outrages. - Communal Tension between Greek and Turkish Cypriots. - Compulsory Identity Cards for Cypriots. - Military Operation against Eoka Hide-outs. - Capture of Terrorist Leaders. - Execution of Eoka Terrorists. - House of Commons Debate on Cyprus. - Archbishop of Canterbury's Criticism of Government Policy.**

Intensified terrorist activities during the past ten weeks resulted in the murder of a number of British servicemen, Turkish Cypriot policemen, and Greek Cypriot civilians in Nicosia, Limassol, Famagusta, and other centres. The increasing number of terrorist attacks against Turkish policemen led to retaliatory Turkish attacks against Greek Cypriot shops and premises, as a result of which the British authorities decided to separate the Greek and Turkish areas of Nicosia by a barbed-wire barrier.

Apart from the terrorist attacks and the increase in communal tension, the principal events in Cyprus during the period covered were the execution of the terrorists Karaoulis and Demetriou, after their appeals had been rejected by the Judicial Committee of the Privy Council; the Governor's decision to issue identity cards to the entire Cypriot population for purposes of registration; and an important success by the British security forces during the first week of June, when two Eoka gangs were smashed and a number of terrorists captured in large-scale operations in north-western Cyprus. The principal happenings in the island in this period (from the last week of March to the first week of June) are described below chronologically, in continuation of 14757 A:

March 27 Two soldiers of the Royal Leicestershire Regiment were killed when an Army car was ambushed by terrorists near the village of Phrenaros, six miles from Famagusta. At Limassol, a Greek Cypriot customs official was shot dead by an unknown man who escaped.

March 28 A collective fine of £1,500 was imposed on Phrenaros (population under 400) after house-to-house searches by British troops had led to the discovery of a number of home-made bombs and grenades and several stolen shot-guns.

April 1. A British civil engineer, Mr J. C Cooke, was shot dead by terrorists in the main street of Limassol, whilst a Greek Cypriot woman nearby was dangerously wounded by a stray bullet. Eight British soldiers were injured, none seriously, in bomb-throwing incidents in Limassol and Famagusta. Mr. Cooke—who was shot in the back, his murderers escaping—was the first British civilian to be killed by Eoka terrorists.

April 2 A bomb was thrown at two British civilians (Mr. and Mrs. R. Parker, an elderly couple) in the same street in which Mr Cooke was killed; both were taken to hospital with slight injuries. At Paphos, the security forces were called out to deal with students demonstrating in favour of *enosis* and carrying Greek flags.

April 3. A bomb thrown by a terrorist at a British officer's car in Nicosia missed the vehicle but killed a 12-year-old Greek Cypriot girl.

April 4. British troops using mine detectors discovered a large store of dynamite - over 50 sticks—in a walled-up safe in the Kykko monastery, near Nicosia

April 8. Two Greek Cypriots a police inspector in Nicosia and a mineworker at a copper mine near Mistero were shot dead by terrorists, the assailants escaped. A large haul of explosives was discovered by British troops during a search at a Limassol foundry.

April 9. It was officially announced that the time-bomb which wrecked an airliner at Nicosia Airport on March 4 had been placed there by Eoka terrorists. The statement said that a letter from "Dhigenis" (the terrorist leader), addressed to a certain "Kimon" and dated March 30, had come into the hands of the authorities showing that the placing of a time-bomb in the airliner had been directly authorized by "Dhigenis." As a result, the R.A.F. took over full control of the airport, which is an important staging point for services to and from Cairo, Lydda, Beirut, Athens, and other centres.

April 10. A sergeant of the Royal Leicestershire Regiment was killed when three Army vehicles were ambushed near Kalopsida, a village eight miles from Famagusta. A collective fine of £1,000 was subsequently imposed on the village.

April 13. Another British soldier was killed when two military vehicles were ambushed in the foothills of the Troodos mountains.

April 15. A Greek Cypriot police officer, Supt. Aristoteles Kyriakos, was shot dead in Nicosia by masked terrorists as he was leaving a maternity clinic after visiting his wife and four-days'-old child; the murderers escaped. In Larnaca, a Greek Cypriot policeman was shot dead by two terrorists in a cinema.

April 18. By order of the Governor, a new type of collective punishment the first of its kind—was imposed on Nicosia as a penalty for the murder of Supt. Kyriakos. Every shop, restaurant, hotel, bar, club, café, cabaret, cinema, and other place of entertainment owned by a Greek Cypriot was ordered to close for one week; the city was placed under curfew for the same period; and all motor-traffic, except by the armed forces and persons engaged in essential services, was banned for a week. *The Times* correspondent in Nicosia said that 90 per cent of the city's establishments would be affected by the compulsory closure, and that the financial loss to the owners "must be reckoned in many thousands of pounds."

April 19. A Greek Cypriot (Vassos Stephanou) employed as a waiter in an R.A.F. sergeants' mess was shot dead in Limassol by masked terrorists who broke into his home and subsequently escaped. In Famagusta, a bomb thrown by a terrorist at a British patrol car missed the vehicle but killed two Greek Cypriot civilians nearby, one of them a child

April 20 Restrictions identical with those imposed on Nicosia were imposed on Limassol, also for the duration of one week, as a collective penalty for the murder of Stephanou.

April 20. Theodore Bogdanovich, G.C., a Yugoslav who had served many years with the British Army, was shot dead by terrorists outside his home at Xeros, on the northern coast He was chief security officer of the American-owned Cyprus Mining Corporation.

Ezekias Papaionannou, general secretary of the proscribed Akel (Communist) organization, escaped from the Government Hospital in Nicosia in his pyjamas. He had been detained since December last and had been transferred to the hospital from prison.

April 23. Fighting broke out in Nicosia between Turkish and Greek Cypriots after terrorists had shot dead a Turkish policeman and a Turkish worker in a cigarette factory. The assailants were seized by Turkish civilians before they could escape, and handed over to the police British troops were called out to restore order after communal riots in which a number of Greek shops were smashed.

April 24 Further communal rioting in Nicosia between Greeks and Turks led to the imposition of a curfew after British troops had restored order. A number of Greek-owned shops and cafés were wrecked

April 25 Communal rioting broke out in Nicosia for the third successive day, while several bomb-throwing incidents occurred in which two Greek Cypriot civilians were wounded Two suspects were detained.

April 26 Two Cypriots, aged 20 and 22, were sentenced to life imprisonment for being in possession of six bombs, having pleaded "guilty." They had been caught by a patrol of the Royal Horse Guards led by Lieut James Butler, son of Mr. R. A. Butler, the Lord Privy Seal.

April 27. In Famagusta, two bombs were thrown at jeeps containing a British Army concert party led by Jimmy Edwards, the stage and radio comedian, no member of the troupe was hurt. In Nicosia, a Dakota of Cyprus Airways was blown up by an explosion in a hangar, no casualties being caused; it was subsequently announced that evidence of sabotage had been found.

Damage estimated at £220,000 was caused at the Ardath Tobacco Company's warehouse in Nicosia, which was burned out during the night. Evidence of arson was found and it was suspected that Turkish Cypriots were responsible. Earlier attempts had been made to burn down the warehouse, where a Turkish employee had been shot four days earlier (see above).

April 29. A Greek Cypriot journalist, Odysseus Wideson, was shot dead by terrorists in Larnaca, whilst another Greek Cypriot—a street hawker - was killed at Famagusta. Two earlier attempts had been made against Mr Wideson, who was known to be opposed to the terrorist campaign.

May 3. The Cyprus Government offered a reward of £10,000 for information leading to the arrest of George Grivas, the leader of Eoka, who was described as about 58 years old, with "a small Hitler-like moustache" and "large ears set low on the head." It was stated that anyone giving information leading to his capture would be taken into protective custody if he so desired, and given a free passage under British protection to any place outside Cyprus.

Grivas, formerly a colonel in the Greek Army, was trained by British officers for guerrilla warfare in German-occupied Greece. During the German occupation he became leader of resistance units in the Athens area, and subsequently commanded a right-wing anti-Communist guerrilla unit during the Communist revolt of 1945. After the war he entered political life as a Royalist, unsuccessfully contesting a parliamentary seat in 1946. He was born in the Dodecanese, brought up in Cyprus, and was believed to have entered the island secretly about 18 months ago. It was not known whether or not Grivas was identical with "Dhigenis" a pseudonym which, it was thought, might refer not to an individual but to the leaders of Eoka collectively.

May 9. A British Royal Marine Commando officer (Lieut. L. F. M. Dick, son of Rear-Admiral Dick) was killed in Paphos when terrorists threw a bomb at a patrol car. Six youths were detained for questioning.

May 10. Two Greek Cypriot terrorists, Savva Michael Karaoulis (23) and Andreas Demetriou (22), were hanged in Nicosia prison, both men having been allowed the last rites of the Greek Orthodox Church. Practically all Greek Cypriot shops, factories and restaurants in the island closed for the day after the official announcement of the executions.

Karaoulis was executed for the murder of a Greek Cypriot policeman in Nicosia in August last, and Demetriou for shooting and wounding a British businessman in Famagusta. The death sentences had been confirmed on May 8 by the Executive Council of Cyprus, after the Judicial Committee of the Privy Council had rejected an appeal by Karaoulis on April 13.

May 11. Leaflets signed "Dhigenis" were distributed in Nicosia claiming that Eoka had hanged two British soldiers as a "reprisal for the judicial murder of Karaoulis and Demetriou." The leaflets claimed that the two men - stated to be "Corporal" Gordon Hill and "Corporal" Ronald Shilton, both of the Royal Leicestershire Regt. - had been prisoners of Eoka since November last, and that their bodies had been buried secretly.

An official statement was issued by Sir John Harding casting doubt upon the terrorists' claim to have executed two British soldiers. It was worded as follows :

" Leaflets in English and Greek purporting to come from Eoka were distributed in Nicosia to-day claiming that ' Corporal ' Gordon Hill and ' Corporal ' Ronnie Shilton had been hanged by Eoka on May 10 as a reprisal for the execution of Karoulis and Demetriou, and that their bodies had been buried secretly. Lance-Corporal Hill, of the 1st Battn., Leicestershire Regiment, disappeared from his unit on Dec. 19 In February this year, rumours circulated that he was held as a hostage by Eoka, but no evidence of any sort was found to substantiate even the allegation that Eoka claimed to hold him.

" Private Shilton, of the same battalion, who has on more than one occasion been absent without leave, went absent on April 17, 1956, after being charged and reprimanded for sending home false reports that he had been seriously wounded. He has not been seen since. Security authorities have never at any time come across the slightest evidence that these soldiers were held by Eoka. Eoka has never previously claimed to hold them.

" No effort was made by Eoka pending the decision on the execution of Karaoulis and Demetriou to put forward a claim that they held the hostages as a bargaining factor to obtain a reprieve for the condemned murders Nor have Eoka produced any evidence to prove that they ever held these men or executed them on May 10.

" The leaflet, which is incorrect on the ranks of both soldiers, claims that Eoka has held Gordon Hill since November, 1955, while in fact he went absent on Dec. 19. Failing the reappearance of the two soldiers, both of whom are missing, it is impossible to say what has happened to them or where they are. The leaflets in question are, however, patently an attempt to make propaganda capital from the fact that the two men are known to be missing."

A Greek Cypriot distributing the above-mentioned leaflets in Nicosia was fired on by security forces after he had three times disobeyed orders to halt, he died while being taken to hospital.

May 13. Three British soldiers were injured, one seriously, in a bombing attack at Famagusta. A collective fine of £5,500 was imposed on two districts of Paphos which had been the scene of a number of terrorist attacks, culminating in the murder of Lieutenant Dick on May 9.

May 14. Colonel Guy Thompson (56) a retired officer of the Indian Army, was found shot dead on a road near the village of Monarga (Famagusta area), where he had been living for many years

At Polis, a village on the north coast, a Greek Cypriot was shot dead by the security forces after he had broken through a cordon, stoned a sentry, and refused to halt when called upon to do so.

May 15. Mr. Julian Wathen, the British manager of Barclay's Bank at Limassol, was wounded (not seriously) by a masked youth who broke into his office, fired at him, and escaped.

May 16. An R.A.F. corporal was killed when terrorists fired into a hut near Nicosia Airport. Two R.A.F. helicopters took off in pursuit of the gunmen within a few seconds of the murder, with the result that three Greek Cypriot youths (one of whom was hiding in a tree) were captured within 20 minutes.

May 17. A British sergeant-major was killed when terrorists ambushed two military vehicles near Famagusta. The attackers opened fire from orange-groves by the roadside, a youth being detained after the area had been cordoned off and searched.

May 20. The Paphos Bishopric was closed under the emergency regulations after five revolvers had been found on the premises during a search by security forces. The Bishop of Paphos was visiting Greece at the time.

A lance-corporal of the British Military Police died in hospital from injuries received when a bomb was thrown into his billet at Famagusta a few days earlier.

May 21. Another British serviceman—the 30th to be killed by the terrorists since the emergency—lost his life in Nicosia when grenades were thrown from roof-tops at British troops who were clearing rioting schoolchildren from Ledra Street, in the city centre. Three other servicemen and seven civilians were injured.

May 22. A British civilian, Mr. Henry Moseley, was shot dead by masked gunmen who fired into a British-owned bar in Limassol.

May 23. An Order was issued by Sir John Harding requiring the entire population of Cyprus (about 450,000) to possess identity cards bearing the holder's fingerprints and photograph. It was stated that the immediate purpose was to facilitate the movement of persons going about their lawful business and to prevent inconvenience caused by road-blocks and identity checks, whilst the long-term purpose was to obtain statistical and administrative information. Persons failing to register, giving false information, or forging or altering identity cards were made liable to imprisonment for up to ten years. It was announced that registration would begin in Nicosia, Limassol, and villages in the Troodos mountains, notorious as a terrorist-infested area. Regulations were also issued banning all wall-slogans, etc.

May 24. Terrorist attacks on British military vehicles in the Paphos and Famagusta areas caused the death of one soldier and injuries to two others. At the village of Polis, a Turkish policeman (P.C. Lisani Ahmed) was shot dead by terrorists while sitting in a coffee-shop.

May 25. In revenge for the murder of P.C. Ahmed the previous evening, crowds of Turkish Cypriots attacked and smashed Greek shops and premises in Nicosia, Limassol, Larnaca, and Paphos. Both Nicosia and Limassol were placed under curfew after British troops had dispersed the rioters with tear-gas. Dr. Kutchuk, leader of the Turkish Cypriots, sent telegrams to the Prime Minister of Turkey, the U.N. Secretary-General, the British Colonial Secretary, and the U.S. Secretary of State denouncing the terrorists and declaring that the Turkish Cypriots were determined " never to live under Greek rule."

The severest communal punishment yet inflicted since the start of the emergency began in Nicosia, where 34 shops and 17 dwelling-houses were shut down for three months in the area where a British serviceman was killed on May 21 (see above). The area included a number of Nicosia's largest stores in Ledra Street, as well as the precincts of the Phaneromeni church, though the church itself remained open for religious purposes (The precincts had been used on numerous occasions for unlawful assemblies) The Pan-Cyprian Academy for girls was also closed down for an indefinite period. Pupils from this school had started the rioting on May 21 when they marched in procession down Ledra Street chanting *enosis* slogans, carrying Greek flags, and forcibly resisting British troops who were trying to seize the flags.

Shopkeepers and householders in the affected area were called together by Mr. Martin Clemens (the District Commissioner), who informed them of the punishment and ordered them to vacate their premises within three days

May 26. The 5,500-ton Greek liner *Agamemnon* was boarded in Cyprus territorial waters by a naval party from the minesweeper H.M.S. *Ursa*. She was escorted to Limassol and searched for two hours, after which she was allowed to proceed. There were no reports of any seizure of illegal cargo.

The *Agamemnon* was on her scheduled route from the Piraeus (her home port) to Alexandria, which includes a stop at Limassol. Royal Naval patrols off the Cyprus coast to check arms smuggling were instituted in the autumn of 1955, when ten minesweepers were sent out from Britain especially for these duties.

May 27. Another Turkish policeman was killed by a bomb at Paphos, leading to further communal riots in Nicosia in which several Greek-owned premises were set on fire. A pitched battle was fought between the Greek and Turkish communities of the village of Aphania (12 miles from Nicosia), where a Turkish auxiliary policeman was pulled off his motor-cycle and beaten to death, a Greek Cypriot was shot dead by British troops rushed to the village to restore order. Five Greek Cypriots injured in the rioting were taken to hospital.

May 28. Owing to the growing communal tension in Nicosia, the District Commissioner (Mr. Clemens) decided to separate the Greek and Turkish areas of the walled city by a permanent barbed-wire barricade almost a mile long. The barricade was erected by British troops during the next few days.

A British soldier was killed in a bomb outrage near Polis, whilst a Turkish auxiliary policeman was shot dead by terrorists near Kinousa, in the Paphos area.

A collective fine of £6,000 was imposed on the adjoining villages of Pano and Zodhia (total population 3,000, all Greek Cypriots). The villages had been the scene of many acts of sabotage and attacks on the security forces, the inhabitants having persistently refused to give any information or assistance to the authorities.

May 29. A Greek Cypriot was killed and 18 others wounded in a communal clash between Greeks and Turks in Nicosia, following the funeral of a Turkish policeman who had been killed by terrorists. Another Greek Cypriot was killed presumably by Turks when a lorry was ambushed near Aphania, scene of the disorders of May 27.

May 30. Two British soldiers were killed and 19 injured, several seriously, when a bomb was flung into a lorry-load of troops at Famagusta. At Paphos, a Greek Cypriot trying to break through a cordon while a search was in progress was shot dead by the security forces.

May 31. A bomb explosion at the Episkopi military base (the new headquarters of British Middle East Land Forces, near Limassol) led to the discovery of 12 sticks of dynamite. One Cypriot workman was slightly injured.

June 1. A collective fine of £40,000—the heaviest to date was levied on the Greek Cypriot population of Famagusta as a penalty for numerous acts of terrorism in the town during the past seven months in which 11 people had been killed and 77 wounded, culminating in the killing of two soldiers and the wounding of 19 others on May 30 (see above).

June 3. It was officially announced that British troops had carried out a successful large-scale operation during the past three weeks in the thickly wooded and mountainous country along the north-west coast from Polis to Xeros, and extending 20 miles inland. As a result of these operations, two " hard core " terrorist gangs had been smashed, another had been virtually eliminated, and a fourth had lost its leader. Seven " hard core " terrorists, including two notorious gang leaders with prices of £5,000 on their heads, had been captured, together with a large haul of weapons and ammunition, including 41 shotguns, some light machine-guns, 31 bombs, nearly 3,000 rounds of ammunition, and large quantities of dynamite, gelignite, and gunpowder. Many secret documents were also seized, as well as large quantities of food, blankets, and clothing, whilst a number of caves used by the terrorists were discovered and rendered unusable.

The operation was carried out by men of the Royal Horse Guards, Royal Marine Commandos, King's Own Yorkshire Light Infantry, Gordon Highlanders, and the Parachute Regt., aided by R.A.F. helicopters, police forces, and tracker dogs. Though contact was made with heavily-armed gangs, no resistance was offered and the terrorists fled after abandoning their weapons; they were captured after exhausting chases across the mountains, resulting in the capture on May 20 of the two " hard core " terrorist leaders. It was announced that law-abiding villagers in the area had helped the security forces during the operation. Extracts were published from some of the captured documents, including two signed by " Dhigenis "—one admitting that the Eoka organization was in a " critical " situation, and another in which " Dhigenis " gave a warning that anyone disobeying his orders would be shot.

A terrorist with a £5,000 price on his head was captured in Nicosia when the police raided the home of Onisiferous Antoniou, manager of the Nicosia Labour Exchange. Antoniou was also arrested, as well as a Greek Cypriot police-sergeant who was found in the house. The terrorist, Polycarpos Geroghadjis, had escaped from a detention camp in January.

A Turkish constable was killed and another wounded in an ambush in the Paphos area In Famagusta, the security forces rounded up 500 youths between the ages of 15 and 22 and took them to a camp where they were finger-printed and photographed; the great majority were later released. It was explained that the round-up was in connexion with recent bombing incidents in Famagusta.

June 4. In an ambush near a military cantonment in the Limassol area, terrorists killed a British soldier and seized an 18-year-old British youth (Roy Garrett, son of an Army warrant officer) with whom he was walking. After binding Garrett hand and foot, the terrorists shot him in the back and fled, leaving him for dead Garrett, though severely wounded, succeeded in crawling to a nearby church, where he summoned aid by lighting candles which attracted the notice of security forces. He was taken to hospital seriously ill. It was disclosed that four Greek Cypriot passers-by had refused to help Garrett as he was trying to reach the church.

Serious communal rioting broke out in Famagusta after a Turkish member of the security forces had been murdered by terrorists Several hundred Turkish youths attacked Greek shops and cars, wrecked and looted a number of premises, and wounded seven Greek Cypriots, several seriously A curfew was imposed.

It was officially announced that a terrorist leader with a price of £5,000 on his head had been captured in the Paphos area during a round-up by security forces.

June 5. Six British soldiers were wounded in an ambush on a mountain road near Aghios Nikolaos, a village 25 miles north-west of Famagusta Two other members of the security forces were wounded, one seriously, in a bomb-throwing incident near Paphos.

June 6. Mr. Thomas Mylrea (28), a British schoolteacher, was shot dead by a gunman in Limassol as he was alighting from a taxi outside a school He was the fifth British civilian to be murdered by terrorists.

House of Commons Debate on Cyprus.

The Cyprus situation was debated by the House of Commons on May 14, when the Colonial Secretary (Mr. Lennox-Boyd) replied to a number of criticisms by Mr. James Griffiths (Lab.), the principal Opposition spokesman.

Mr. Griffiths expressed the Opposition's "grievous disappointment" with the Government's handling of the Cyprus problem. He declared that the situation in Cyprus had become more bitter and tense since the breakdown of negotiations, and thought that there was a danger of "drifting to a stage where a settlement would become impossible because of the depth of bitterness that would have grown up between us and the people of Cyprus."

With regard to the execution of Karaoulis and Demetriou, Mr. Griffiths disclosed that certain members of the Labour Party had "made representations privately to the Government, and through the Government to the Governor [Sir John Harding]." He added. "We hold the view that, in the present situation, an act of clemency might have transformed the situation and might have created a new opportunity for reconciliation and settlement. It is not because we condone the acts of criminal violence of which they were found guilty that we made these representations, but because we firmly believe that a real attempt should be made to break through this tragic deadlock and create circumstances in which another approach might be made, and which might lead to success."

After accusing the Government of creating hostility between the Greek and Turkish Cypriots, and pointing out that the serious impairment of Anglo-Greek relations had weakened the position of NATO in a vital area of the world, Mr Griffiths suggested that the Cyprus problem could be solved in the following manner: (1) a firm declaration by the Government accepting the principle of self-determination for Cyprus; (2) safeguards for the Turkish minority in the new Constitution; and (3) negotiations on the date and method of self-determination with a Cypriot Government containing an elected Greek Cypriot majority. Responsibility for internal security might remain with the Governor for a period of one year from the date on which a new Constitution came into force, whilst amnesty terms should be settled after agreement had been reached on all constitutional issues. Mr. Griffiths urged the Government to release Archbishop Makarios at once, and suggested that the Ethnarchy Council should be invited to send representatives to London for discussions in which the Archbishop should participate.

Mr. Lennox-Boyd said that the Government's policy remained as stated in the White Paper, in which the principle of self-determination had been conceded; "where we part company," he declared, "is in the application of that principle in the present difficult situation in the world." After rejecting as "wild and inaccurate" the allegation by Mr. Griffiths that the Government's policy had created hostility between Greek and Turkish Cypriots, Mr. Lennox-Boyd said that people often tended to forget the "acts of beastliness" committed by the terrorists in Cyprus -often against their own people -in the name of democracy. So far from fighting for freedom, or being a resistance movement enjoying the support of all Cypriots, the Eoka terrorists were a small and well-organized minority, the very callousness of whose crimes tended to alienate people from the organization. After recalling such crimes as the killing of 30 British servicemen, many of whom had been shot in the back, the attempted murder of 68 men, women, and children by placing a time-bomb in an airliner, and the killing of 50 Greek Cypriot civilians, Mr. Lennox-Boyd declared. "If anyone suggests that the Government could surrender to this murderous blackmail, they don't understand the feelings of the British people."

Continuing, Mr. Lennox-Boyd referred to the existence of documents which, he said, showed that in 1951 the then British Labour Government had rejected proposals for self-determination in Cyprus made by the Greek Government. Though he did not have access to the Cabinet records of that time, he did have access to executive instruments of Government such as telegrams. Asked by Mr. Aneurin Bevan (Lab.) whether he would table these telegrams, the Colonial Secretary said that he was prepared to discuss with the Prime Minister "whether ex-Ministers should be shown the telegrams so that they could refresh their memory, and then discuss with them whether they would really like them published"

Mr. Bevan retorted that Mr. Lennox-Boyd was "purporting to make references to documents which are not in the possession of the House," and added that "we do not know whether he is telling the truth or not" **Mr. Lennox-Boyd** replied. "These documents are known to many people in Greece, and I think it is about time that people in the United Kingdom knew about them too As to whether I am telling the truth or not, I have been at pains, as Dr Jowitt said, 'to verify my quotations,' and I would be ready with the Prime Minister to show them to any ex-Ministers concerned Then the matter could certainly be ventilated. I know very well what those proposals were. They are being published now." **Mr. Bevan** interpellated. "The Minister has just said that he is not reading from a document. He now says the telegrams are being published now Which position is he taking up? Is he reading from documents or making references to documents? Is he publishing or not publishing?"

Mr. Lennox-Boyd, in reply, said that in 1951 the Greek Government had proposed to the British Labour Government (1) that if Cyprus were ceded to Greece, the Greek Government would place at the disposal of Britain such bases in Cyprus and in other parts of Greek territory as the British Government might desire, or (2) that, if the British Government could not agree to the cession of Cyprus because of the international situation, it should announce its willingness to ascertain the wishes of the inhabitants of Cyprus within a reasonable period. To these proposals the then British Government had replied that the strategic position of Cyprus was of the greatest importance to the U.K., and for that reason alone it could not contemplate any change of sovereignty.

Mr. Griffiths (Lab.) asserted that the Colonial Secretary was now "quoting from a document," and asked whether it should not be laid before the House. **Sir Rhys Hopkin Morris** (Liberal), Deputy Chairman of Ways and Means, ruled that a Minister could summarize the contents of a document, though it was a different matter if he was actually quoting from it. After further discussion, **Mr. Lennox-Boyd** said that he had "summarized the purpose of the documents" - which he was prepared to lay before the House if, on reflection, it was desired- -because he "did not want the absurd legend to get about that the Socialist Government, when confronted with the problems of Cyprus, would have acted in the irresponsible way that their attitude in Opposition might have led the House to believe."

Continuing, the Colonial Secretary said, with reference to the execution of Karaoulis and Demetriou, that he did not see how the Governor could have come to any other conclusions The suggestion that the death sentences should not have been carried out because a Bill to abolish capital punishment was under discussion in the U.K. Parliament was not relevant, since the legislation was not applicable to Cyprus. Even if it were relevant, it would, in his view, not be a conclusive consideration, since circumstances in Cyprus were very different from those in Britain.

In conclusion, Mr Lennox-Boyd emphasized that the Government were "slamming no doors" with regard to the constitutional question, and said that full discussions on this and other matters affecting Cyprus would be held with Sir John Harding on his forthcoming visit to London (see below). Dismissing the suggestion (made during the debate by Sir Robert Boothby, Conservative) that the problem should be handed over to NATO or the Council of Europe, he asserted that if H.M. Government abrogated its responsibilities and left the matter to an international body, one of the two other countries involved—either Greece or Turkey would walk out of those bodies, with grave consequences for the future of the world.

Mr. Paget (Lab.) suggested during the debate that when a crime had been committed in a Cyprus village and the inhabitants refused to co-operate with the authorities, a compulsory purchase order should be served on all owners of private property, and the inhabitants themselves deported to Greece.

Mr. Clement Davies, the Liberal leader, described Mr. Paget's suggestion as "the kind of doctrine we heard from Berlin in the old days, and more recently from Moscow." After emphasizing that law and order could not be maintained by force alone, and that it was necessary that the people should realize that justice and fair government existed, Mr. Davies suggested that an all-party delegation of M.P.s should "visit Cyprus, hear all points of view, and report to the House of Commons."

An Opposition motion to reduce the Colonial Office Vote by £100 was defeated by 314 votes (all Conservatives) to 286 (284 Labour and two Liberals, Mr. Clement Davies and Mr. Holt)--a Government majority of 78.

Archbishop Makarios sent a cable to Mr Clement Davies on May 16 saying that he was "delighted from my place of exile to hear your voice in the House of Commons advocating an honest and just solution of the Cyprus question." After thanking the Liberal Party and Mr. Davies personally, the Archbishop added:

"The Cyprus problem is not a military one to be solved by the measures now in practice, but a political one that should be settled by showing goodwill and understanding. Please continue urging the Government in this direction."

Other Developments.

Other recent developments in connexion with the Cyprus situation are summarized below under cross-headings:

Archbishop of Canterbury's Criticisms of Government. The Archbishop of Canterbury (Dr Fisher), in his presidential address to the British Council of Churches in London on April 24, criticized the "complete inaction of the Government" over Cyprus, and urged that a Constitution should be drafted as a basis for renewed negotiations. After referring to his proposals in the House of Lords (see page 14785), which he described as "a step away from pure negation back to something constructive," Dr. Fisher continued:

"Nearly six weeks have passed, and all the Prime Minister can say in the House of Commons on April 17 [see below] is: 'There can be no question of negotiation in Cyprus until law and order are restored.' That is to surrender to the terrorists and to put the whole future of Cyprus into their hands. If there is not yet room for negotiation, there is, as I suggested, room to set someone to work to draft a Constitution along the lines of the correspondence between the Governor and the Archbishop. That would have had a healing effect, if taken quickly: it may not yet be too late. I have direct evidence that moderates in Cyprus welcomed my suggestions. I have direct evidence that every delay decreases the number of moderates and decreases the likelihood that the Government will find any Cypriot to take the place of Archbishop Makarios as spokesman for his fellow-countrymen."

Dr. Fisher expressed the hope that Mr. Lennox-Boyd, "an able, irenic, and liberal-minded person," would take "some constructive and healing step before inaction injures his friends and incites his enemies more."

[Sir Anthony Eden's statement of April 17, referred to by the Archbishop of Canterbury, was made in reply to a House of Commons question by Mr. Aneurin Bevan.]

Formation of Cyprus Conciliation Committee. The formation of a Cyprus Conciliation Committee, comprising representatives of both Houses of Parliament and several prominent people outside Parliament, was announced in London on April 16. It consisted of Lords Attlee, Amulree, Faringdon, Listowel, Lucan, and Strabolgi, nine Labour M.P.s (Mr. Aneurin Bevan, Mr. Creech Jones, Mr. Crossman, Mr. Dugdale, Mr. John Parker, Mr. Kenneth Robinson, Mr. Anthony Wedgwood Benn, Mrs. Lena Jeger, and Sir Lynn Ungoed-Thomas), two Liberal M.P.s (Mr. Clement Davies and Mr. Holt), one Conservative M.P. (Mr. William Yates), Sir Compton Mackenzie (the novelist), Sir Harold Nicolson (the writer and critic) and Mr. Tom Driberg, the former Labour M.P.

The committee issued a statement saying that it was "completely unrealistic" to think that moderate leaders "will emerge from somewhere [in Cyprus] to co-operate with the British Government at the present time," and declaring that "a fresh start must be made to reopen negotiations." After expressing its belief that "conciliation in Cyprus is possible and essential," it urged (1) that a parliamentary commission should visit the island "to seek ways and means of reopening negotiations"; (2) that it should be invited to make recommendations on the progressive repeal of the emergency laws and the terms and timing of an amnesty, following the restoration of order; (3) that negotiations should be resumed "on the basis of immediate self-government and an unequivocal guarantee of the right of the Cypriot people to self-determination", (4) that Archbishop Makarios should be informed that his exile was temporary, and that it would end as soon as public order was restored in Cyprus; and (5) that the following assurances relating to the new Constitution should be accepted by all sides: (*a*) foreign affairs and defence would be reserved to the Governor, as had been agreed before the breakdown of negotiations; (*b*) internal security would be reserved to the Governor for a limited period to be agreed; (*c*) there should be an elected Greek Cypriot majority, with safeguards for the rights of the Turkish Cypriots and other minorities.

Archbishop Makarios's Complaints to East African Newspaper. A letter signed "P.S. Ioannides," secretary to Archbishop Makarios, was delivered on May 21 by ordinary mail to the editor of the *East African Standard* (Nairobi) containing a copy of a protest which, it was stated, had been sent by the Archbishop and his three companions in detention to the Governor of the Seychelles, Sir William Addis. The letter (which was apparently posted in the ordinary way, and bore no evidence of official examination) listed a number of grievances, asked that they should be brought to the attention of the Colonial Secretary, and stated that the detainees intended to go on a hunger-strike from "the day of our Easter" (i.e. May 6, the date of Easter in the Greek Orthodox Church).

Specific grievances listed were (*a*) that books, papers, and letters addressed to the detainees had not been delivered; (*b*) that the detainees had been "hurt and insulted" by the Seychelles Government's action in putting a second barbed-wire round "Sans Souci," the Governor's country house where they were interned; (*c*) that the Roman Catholic Archbishop of the Seychelles had been refused permission to visit them, (*d*) that the Seychelles Government had represented the detainees as "malefactors" in an official bulletin, (*e*) that Archbishop Makarios and his companions had had no opportunity "of defending ourselves against the epithet hurled against us."

A Colonial Office spokesman in London said that Archbishop Makarios and his companions had gone on hunger-strike "for a day or so," but had ended it after the dispute had been cleared up with Sir William Addis, the Governor.

Demands for the return of Archbishop Makarios were made in Cyprus on April 29-30 by the Ethnarchy Council headed by Bishop Anthimos of Kition, the senior Greek bishop in Cyprus since the Archbishop's deportation, by the Cyprus Federation of Trade and Industry, and by 54 leading Greek Cypriot lawyers, including three Queen's Counsel—among them a former Attorney-General of Cyprus, Mr. Pavlides, Q.C., and a former non-official member of the Executive Council, Mr. John Clerides, Q.C.

Annual Report of Cyprus Government. In its annual report for 1955, published on June 5, the Cyprus Government said that the most disturbing feature of the year was the "active defiance of all authority" by Greek Cypriot youth, which had resulted in "the widespread disruption of education" by the year's end. After describing 1955 as "an unhappy year for Cyprus, with peace and material progress giving place to violence and intimidation," the report stated that a total of 30 people had been killed and 291 wounded between April 1, 1955 (the launching of the Eoka terrorist campaign) and Dec. 31. It went on:

"Leaders of opinion among Greek Cypriots refrained from condemning the use of violence, and as the year wore on the public became more inured to the ruthless brutality of the terrorists and ever less inclined to question methods so alien to the true character of the island's inhabitants and so detrimental to their true interests . . . Nevertheless, the security forces were progressively getting control of the situation, and it was encouraging that, towards the close of the year, people were beginning to come forward and give information about terrorists."

Despite this "sombre background," considerable progress had been achieved by many Government departments, including the completion of new water-supply schemes for Nicosia, Limassol, and Famagusta; new housing for the victims of the 1953 earthquake at Paphos; and surveys for impending harbour developments at Famagusta, Paphos, and Limassol. Trade had been buoyant throughout the year, especially the export of minerals. Over £12,300,000 had been spent by the Services on major installations between March 1952 and March 1955, and "the annual revenue accruing to Cyprus as a result of the presence of British armed forces is at present not less than £12,000,000."

Armed Guards for British Ministers. It was announced in London on May 21 that police officers guarding Ministers and Government departments had been issued with arms as a precaution against possible acts of terrorism by Cypriot extremists in Britain. It was stated in *The Times* that "precautionary and preventive measures have been taken because there are grounds for believing that a small subversive group of Cypriots in London might attempt some outrage." Special Branch officers instituted inquiries in Soho and other areas where Cypriots were living, whilst special precautions were taken at Downing Street, Whitehall, the Turkish Embassy, and the homes of Ministers.

Typewritten leaflets threatening to assassinate Sir John Harding were found in a Manchester street on June 4 and handed over to the police. They were signed by an organization calling itself "Cyprus Liberation Sub-Committee, Great Britain, Eoka," and accused Sir John Harding of responsibility for "violence, assaults, depression, and deportation."

Police Chief for Cyprus. The Colonial Office announced on June 5 that Lieut.-Colonel G. C. White, Chief Constable of Warwickshire, had been appointed Commissioner of Police in Cyprus for a period not exceeding two years, with effect from July next. It was also announced that 50 more police officers from Britain had joined the security forces in Cyprus, bringing the total seconded for duty in the Colony to 184 inspectors and sergeants.

Colonel White commanded the military police in Naples during the war, and was subsequently in charge of all Allied police forces in Rome. He was later responsible for organizing an effective police force in Trieste and Venezia Giulia, where he was associated with Sir John Harding, then commanding British troops in the area. He had been Chief Constable of Warwickshire since 1948. The Warwickshire County Council agreed to his secondment to Cyprus at the request of the Government.

Sir John Harding arrived in London on June 3 for discussions with the Government on the Cyprus situation. It was stated that he would remain for about a week before returning to Nicosia. On June 4 he had discussions at 10, Downing Street, with Sir Anthony Eden, Mr. Lennox-Boyd, Sir Walter Monckton (Minister of Defence), Mr. Selwyn Lloyd (Foreign Secretary), and Service chiefs, and on June 6 addressed an all-party meeting of M.P.s and peers on the Cyprus situation. (Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Cyprus, 14757 A; Parliamentary Debate, 14783 A.)**

A. UNITED KINGDOM. — The Birthday Honours.

The Birthday Honours List was published on May 31, the principal awards being set out below:

Viscount. Lord Cherwell, lately Professor of Experimental Philosophy at Oxford, Paymaster-General in 1942-45 and 1951-53 For public services.

[Lord Cherwell (formerly Professor F A Lindemann) recently announced his intention of retiring from the Chair of Experimental Philosophy at Oxford, which he has held since 1919. He was personal scientific adviser to Sir Winston Churchill throughout the last war, and twice held office under him as Paymaster-General In his second tenure of that office he had responsibility for atomic energy matters It was announced on June 6 that Lord Cherwell had been succeeded as Professor of Experimental Philosophy at Oxford by Sir Francis Simon, Professor of Thermodynamics since 1949]

Barons. Sir Henry Cohen, Professor of Medicine in the University of Liverpool, and chairman of the Standing Advisory Committee, Ministry of Health; Lieut-General Sir Ronald Weeks, chairman of Vickers Ltd., chairman of the National Advisory Council for Education in Industry and Commerce, and president of the British Scientific Instrument Research Association.

[Sir Henry Cohen, the eminent scientist, has served on many Government committees concerned with medical and scientific questions The barony was conferred on him for services to medicine. Sir Ronald Weeks retired from the Army in 1945 after a distinguished military career, his last post being that of Deputy Military Governor of the British zone of Germany. It was announced on May 31 that he was retiring from the chairmanship of Vickers Ltd]

Privy Councillor. Mr Hugh Molson, M.P., Joint Parliamentary Secretary, Ministry of Transport and Civil Aviation

Order of Merit. Lord Hailey (84), the authority on Colonial administration.

[Lord Hailey has held the posts of Governor of the Punjab (1924-28), Governor of the United Provinces (1928-30 and 1931-34), Director of the African Research Survey (1935-38), head of the Economic Mission to the Belgian Congo (1941), and chairman of the Colonial Research Committee (1943-48). He has written several books on Colonial problems]

Companions of Honour. Mr. Edward Gordon Craig (84), for services to the theatre; Professor Arnold Toynbee, the historian, lately Director of Studies, Royal Institute of International Affairs.

[Mr. Gordon Craig, the pioneer producer and son of the famous actress Ellen Terry, has been prominently associated with the theatre for over 50 years. He is the author of many books on theatrical life, his *Art of the Theatre* having first appeared in 1905. Professor Toynbee retired from the Royal Institute of International Affairs in 1955, shortly after completing his 10-volume *Study of History*]

Baronets. Alderman Cuthbert Ackroyd, Lord Mayor of London; Major W. J. Anstruther-Gray, M.P. (Conservative, Berwickshire and East Lothian), for political and public services; Sir Thomas Moore, M.P. (Conservative, Ayr), for political and public services; Mr. H. G. Studholme, M.P. (Conservative, Tavistock), lately Vice-Chamberlain of H.M. Household and a Government Whip.

Knights Bachelor. Mr. Austin Anderson, for services to the British shipping industry; Mr. W. F. Beale, chairman, Board of Management Navy, Army, and Air Force Institutes; Brigadier E. H. L. Beddington, chairman, Hertfordshire County Council; Professor S. P. Bedson, Professor Emeritus of Bacteriology, University of London; Mr. Basil Blackwell, the Oxford bookseller and publisher; Mr. John Burgoyne, for political and public services in Luton; Professor H. G Champion, Professor of Forestry, University of Oxford; Mr. Douglas Clarke, for political and public services in Stockport; Mr. H W. Clarke, chairman, Aluminium Industry Council; Professor William Coldstream, the painter, Slade Professor of Fine Art, University of London; Mr. C. B Crabbe, Chief Registrar of Friendly Societies and Industrial Assurance Commissioner; Mr. G. H Dowty, chairman, Cheltenham and North Gloucestershire Disablement Advisory Committee; Mr. G. U. Farrant, for political and public services in Somerset; Mr. H. S. Gibson, managing director, Iraq Petroleum Company Ltd.; Mr. F. C. Hooper, for services to Government departments; Mr. Leonard Hutton, for services to cricket; Mr. James McKinnon, Chief Inspector, Board of Customs and Excise; Mr. Arthur Massey, Chief Medical Officer, Ministry of Pensions and National Insurance; Mr. W. C. Norton, President of the Law Society; Mr. F. J. Osborn, chairman, executive committee, Town and Country Planning Association; Mr. Thomas Peacock, chairman, Milk Marketing Board; Professor W. J. Pugh, Director of the Geological Survey of Great Britain; Mr. A. S. Quartermaine, President of the Institution of Civil Engineers, 1951-1952, for services to civil engineering; Mr. J. J. Robertson, Rector of Aberdeen Grammar School; Alderman S. G. Rowlandson, for political and public services in Middlesex; Brigadier A. D. Buchanan-Smith, for political and public services in Scotland; Mr. A. M. Spearman, M.P. (Conservative, Scarborough and Whitby), for political and public services; Mr. G. Spencer Summers, M.P. (Conservative, Aylesbury), for political and public services; Mr. J. W. Tudor Thomas, ophthalmic surgeon, United Cardiff Hospitals; Mr. Thomas Williamson, secretary, National Union of General and Municipal Workers; Mr. M. G. Willmott, Chief Chancery Master, High Court of Justice; Mr. J. F. Wolfenden, Vice-Chancellor, University of Reading.

[Mr. Len Hutton (39), the former Yorkshire and England captain, announced his retirement from first-class cricket in January last after consultation with an orthopaedic specialist. The first professional cricketer to captain England, he scored 39,950 runs and hit 129 centuries in the course of his career, and captained England in 23 Test matches with Australia and other Commonwealth countries. He was the fifth cricketer to receive a knighthood, the others being Sir Pelham Warner, Sir Donald Bradman, Sir Henry Leveson-Gower, and Sir John Hobbs]

Other recipients of knighthoods (in addition to those enumerated above) and other awards included the following:

Foreign Office List. Mr. J K Dunlop, H M Consul-General at Hamburg, Mr. Charles Duke, H.M. Ambassador in Amman; Captain Vyvyan Holt, lately H M Minister in San Salvador; Mr Hugh Stephenson, H.M. Ambassador in Saigon, Mr. J G. Ward, Deputy Under-Secretary of State, Foreign Office.

[Captain Holt, formerly Ambassador in Seoul, was a prisoner in Communist hands for three years during the Korean War].

Commonwealth of Australia List. Mr H G Alderson, chairman of the Australian Olympic Federation, for services to amateur sport, Lieut-General William Bridgeford, Chief Executive Officer for the 1956 Melbourne Olympiad, Mr. Ivan Holyman, managing director of Australian National Airways; Mr. Edward Knox, chairman of the Colonial Sugar Refining Company, Mr E D Lindsay, formerly Director of the National Gallery of Victoria, the Hon. K. W. Street, Chief Justice of the Supreme Court of New South Wales, Mr. F. S. Tait, of Toorak (Victoria) for services to the theatre

New Zealand List. Mr B C. Ashwin, formerly Secretary to the Treasury; Mr. R L Macalister, Mayor of Wellington

Commonwealth Relations Office List. Mr G A Davenport, formerly Minister of Lands, Mines, and Surveys, Southern Rhodesia; Mr. Norman Myer, for public and philanthropic services in Victoria, Australia; Mr G A Sim, president of the Bengal Chamber of Commerce and Industry and the Associated Chambers of Commerce of India, 1955-56; Mr A G. Warner, Minister of Transport in the Victorian Government, Australia; Major-General Harold Williams (retd.), formerly Engineer-in-Chief, Indian Army

Colonial Office List. Mr. T A Brown, Chief Justice, Northern Region, Nigeria, Mr Chan Tsun-nin, for public services in Hong Kong, Colonel R B Emerson, chairman, Nigerian Railway Corporation; Dr. J. W. P. Harkness, Medical Advisor to the Comptroller for Development and Welfare, British West Indies; Mr G W. Henderson, Q.C., Chief Justice of the Bahamas; Mr A. M. B. Hutt, Administrator, East Africa High Commission; Commander R. G. A. Jackson, chairman, Preparatory Commission for the Volta River Project, Gold Coast; Major-General W. R. Norris, lately Deputy Director of Operations in Kenya; Mr. T S. Page, for public services in Northern Rhodesia; Mr. H. S. Potter, British Resident at Zanzibar; Mr. R. L. Prain, for public services in Northern Rhodesia; Mr. R. O. Sinclair, vice-president, East African Court of Appeal.

The K.C.M.G. (honorary) was conferred on the Raja of Perlis, Federation of Malaya.

Royal Navy List, Army List, and Royal Air Force List. Recipients of knighthoods in the armed forces included Vice-Admirals E. G. Clifford, J. W. M. Eaton, Caspar John, and W. G. A. Robson, Lieut.-General G. W. Lathbury, Lieut.-General W. P. Oliver, Major-General A. D. Campbell, Air Marshals R. L. Atcherley (A.O.C.-in-C., Flying Training Command), R B Jordan (A.O.C.-in-C., Maintenance Command), T. N. McEvoy (Chief of Staff, Allied Air Forces, Central Europe), and G. E. Nicholetts (A.O.C., Malta), and Air Vice-Marshal J. R. Whitley.

D.B.E. Awards. The D.B.E. was conferred on Miss Peggy Ashcroft (Mrs. Edith Margaret Hutchinson), the actress, and on Brigadier Mary Rallton, Women's Royal Army Corps.

Other Awards. Among other awards, the **K.C.V.O.** was conferred on Professor Anthony Blunt, Professor of the History of Art, University of London, and Keeper of the Queen's Pictures. Recipients of the **C.B.E.** included Mr. John Clements, the actor, manager, and producer; Mr. Tahu Hole, News Editor at the B.B.C; Mr. Christopher Hussey, for services to architecture; Mr. Anthony Powell the novelist; Mr. Ernest Read, professor at the Royal Academy of Music; and Mr. Norman Tucker, director and opera producer at Sadler's Wells Theatre.

Among many recipients of the **O.B.E.** were Mr. J. D. Forman, lately Director of the British Film Institute; Mr. Gilbert Ledward, R.A., president of the Royal Society of British Sculptors, and designer of the Great Seal of the Realm; Mr. E. I. Musgrave, Director of the Leeds City Gallery; Miss Pat Smythe (27), the champion rider and show jumper; and Mr. Cyril Wood, former regional director of the Arts Council for South-West England.

The appointment by H.M. the Queen of two new Knights of the Thistle Lord Mathers and Mr. John Stirling, in place of the late Duke of Montrose and the late Earl of Mar and Kellie - had been announced on May 11.

Lord Mathers, who began life as a railway clerk, was Labour M.P. for East Edinburgh for many years before his elevation to the peerage, and was prominently identified with trade union activities. He represented the Sovereign as Lord High Commissioner to the General Assembly of the Church of Scotland from 1946-48, and again in 1951. Mr. Stirling, Convenor of Ross and Cromarty County Council since 1935, is widely known throughout the Highlands for his work on the Forestry Commission.

The Order of the Thistle, the senior Scottish Order of Knighthood, is limited to 16 members. There is one vacancy, caused by the death of Lord Elphinstone. - (Times - Daily Telegraph - Manchester Guardian - The Scotsman, Edinburgh)

(Prev. rep. New Year Honours, 14623 A.)

A. UNITED STATES. — Agricultural Policy. - President Eisenhower vetoes Farm Bill. - New Farm Bill passed by Congress. - Presidential Approval. - Creation of "Soil Bank." - New Price Supports for Maize, Wheat, and Rice. - Continued Decline in Farm Incomes.

A Bill implementing the President's "soil bank" proposals, but providing for rigid price supports for basic crops at 90 per cent of "parity" in place of the existing flexible system, was vetoed by President Eisenhower on April 16. The Bill was a compromise version of measures previously adopted by the House of Representatives and the Senate. That passed by the House had—against the President's advice—restored rigid price supports at 90 per cent of "parity" on five basic crops (wheat, maize, cotton, rice, and peanuts) and had also set the minimum price support level on dairy products at 80 per cent of "parity"; it had been approved by the House on May 5, 1955, during the first session of the present Congress, by 206 votes (185 Democrats, 21 Republicans) to 201 (172 Republicans, 29 Democrats).

No action was taken on the matter by the Senate, however, before Congress adjourned in August, 1955. Subsequently, on Jan. 9, 1956, President Eisenhower submitted his proposals for a "soil bank" and other measures to deal with the mounting agricultural surpluses (see 14778 A). These were considered by the Senate Agriculture Committee, which on Feb. 10 (by eight votes to seven) approved a Bill providing not only for the "soil bank" but also for the reintroduction of rigid price supports as voted by the House. The full Senate, however, after lengthy debate and after adopting a number of further amendments, passed a Bill on March 19 (by 93 votes to two) from which the rigid price-support provisions were excluded.

A conference committee of the two Houses agreed on April 6 to a compromise version which included the rigid price-support system proposed in the House Bill. Despite last-minute Administration proposals designed to modify this provision by introducing some measure of flexibility, the Bill in its final form was approved by Congress on April 11, the voting being 50 (35 Dem., 15 Rep.) to 35 (31 Rep., 4 Dem.) in the Senate and 237 (189 Dem., 48 Rep.) to 181 (146 Rep., 35 Dem.) in the House of Representatives.

The Bill in its final form included the following principal provisions: (1) Rigid price supports at 90 per cent of parity should be restored for wheat, maize, cotton, rice, and peanuts.

(2) $1,200,000,000 should be provided to operate the President's "soil bank" proposals.

(3) There should be a two-price, or "domestic parity," plan for wheat and rice, under which that part of the crop sold for domestic consumption would be supported at 100 per cent of "parity" for wheat and 90 per cent of "parity" for rice, and the remainder at a lower support price fixed by the Government.

(4) "Dual parity," under which the old or the new formula (whichever was higher) could be used for computing the "parity" prices of the basic crops, should be restored.

(5) Price supports for small grain feeding stuffs (oats, rye, barley, and grain sorghum) should be mandatory rather than discretionary.

In his veto message to Congress, and also in a broadcast the same evening, President Eisenhower gave his reasons for vetoing the Bill. He also announced a number of measures which would be taken immediately by the Administration to raise farmers' incomes, and asked Congress to pass "a straight soil bank Bill" as promptly as possible so that it might be in operation before the next autumn sowing of 1957 crops. In this connexion he asked for authority to make, as from July 1, advance payments to farmers (estimated at $500,000,000) who agreed to withdraw land from surplus production next year.

The President explained in his message to Congress that the problem facing U.S. farmers was one of "price-depressing surpluses," and said that any sound programme must be designed to reduce these surpluses. The Bill passed by Congress, however, was "self-defeating," for whilst the soil bank proposal was "constructive" it had been "encumbered by contradictory provisions."

He listed four principal reasons which made the Bill unacceptable: (1) The return to rigid support prices at 90 per cent of "parity" for the basic crops would only increase the existing surpluses. (2) The provision for "dual parity" would result in a permanent double standard of parity for determining price supports; moreover, there was no justification for applying such preferential treatment to only a few of the 160 products for which "parity" prices were calculated. (3) Mandatory price supports for small grain feeding-stuffs would only create more problems for farmers, as the market for such feeding-stuffs would shrink as livestock production came to depend more on forage and less on grains. (4) The two-price plan for wheat and rice would have adverse effects on producers of other crops, on America's relations with friendly foreign countries, and on American consumers.

"After the most careful analysis," the President declared, "I conclude that the Bill is contradictory and self-defeating even as an emergency relief measure, and would lead to such serious consequences in additional surpluses and production controls as to further threaten the income and the welfare of our farm people." The President then announced the following measures to be taken by the Administration:

(1) The 1956 support price for wheat, maize, cotton, rice, and peanuts would be raised (see below)

(2) The support price for manufactured milk in 1956 would be increased to $3.25 per 100 lb. and for butter fat to 58.6 cents per lb.

(3) Department of Agriculture funds would be used to strengthen the prices of perishable crops, well over $400,000,000 becoming available for this purpose in the year beginning July 1, 1956.

After the President's veto the Bill was reconsidered by the House of Representatives on April 18, but was rejected by 211 votes (173 Rep., 38 Dem.) to 202 (182 Dem., 20 Rep.); it therefore not only failed to get the two-thirds majority required to override the President's veto, but even to obtain a simple majority.

New price supports for maize, wheat, and rice, in accordance with President Eisenhower's statement, were announced on April 23 as follows:

Maize. An average of $1.50 a bushel (86.2 per cent of "parity") compared with $1.40 (81 per cent) as fixed in February. In addition, a new guaranteed price of $1.25 a bushel was fixed for farmers who failed to comply with Federal acreage allotments; those had previously been denied a guaranteed price.

Wheat. An average of $2 a bushel (83.7 per cent of "parity") compared with the $1.81 (76 per cent of "parity") fixed in June, 1955.

Rice. $4.50 per 100 lb. (82.7 per cent of "parity") compared with $4.04 (75 per cent of "parity") announced on Dec. 30, 1955.

Further difficulties arose in Congress over a new Farm Bill which was introduced by the Democrats on April 27. It was approved by the Agriculture Committee of the House of Representatives on April 30 and was passed by the full House on May 3 by 314 votes to 78; the majority comprised 191 Democrats and 123 Republicans, whilst 62 Republicans and 16 Democrats opposed the Bill.

The new Bill provided a $1,200,000,000 fund for a "Soil Bank," but denied the President's authority to make immediate advance payments to farmers willing to take land out of production next year. The President had requested such authority, which it was estimated would have enabled farmers to receive at least $500,000,000 as from July 1, but a Republican amendment to that effect was defeated by 211 votes (207 Dem., 4 Rep.) to 184 (183 Rep., 1 Dem.), the Democrats alleging that such prepayments were only aimed at buying farmers' votes for the Presidential elections in November.

Among other provisions, the Bill adopted by the House also (*a*) reintroduced fixed parity price supports for small grain feeding-stuffs (rye, oats, barley, and grain sorghum), which the President had denounced in his veto of the previous Bill; (*b*) included grazing land in the farm activities covered by the "Soil Bank"; and (*c*) authorized price support to maize-growing farmers even if they disregarded acreage controls.

The Senate Agriculture Committee approved the Bill on May 13 by 13 votes to one, the full Senate passing it on May 18 (by a voice vote) in a somewhat revised form.

The Senate eliminated mandatory price supports for small grain feeding-stuffs, though it increased discretionary price supports for them. On the other hand it refused to accept requests by President Eisenhower and Mr. Dulles for (*a*) the elimination of a directive ordering sales of surplus cotton stocks on world markets at "competitive prices" (i.e. at subsidized rates below world market prices), and (*b*) the deletion of a clause introducing a "two-price" support system for wheat sales at home and abroad. Although the President and Mr. Dulles pointed out that these provisions might endanger U.S. relations with friendly countries which objected to the sale of U.S. surplus wheat and cotton abroad below market prices, the Senate rejected the Administration's proposals by 71 votes to 13.

The Bill also maintained, against the President's wishes, a one-year continuation of the existing parity prices for wheat, maize, and peanuts; a "two-price" system for rice sales at home and abroad; and a provision restricting U.S. imports of long-staple and extra fine cotton.

A compromise version of the Bill, agreed upon by a joint conference committee of the two Houses on May 22, was adopted by the Senate without a dissenting vote later on the same day, and was passed by the House of Representatives on May 23 by 304 votes to 59. The principal provisions of the Bill in its final version were as follows:

"Soil Bank." A $1,200,000,000 fund was provided for the setting up of a "Soil Bank," of which $750,000,000 would be available to farmers agreeing to withdraw land from production of wheat, cotton, maize, peanuts, rice, and tobacco, and another $450,000,000 for the conversion of other land to soil-preserving uses on a longer-term basis. Congress nevertheless maintained its refusal to grant the President

authority to draw on the fund for advance payments to farmers who would withdraw land from production next year, although it agreed that payment should be available for farmers who would withdraw such land in the present year. [It was, however, agreed that the volume of such payments would be very much limited, since most of the 1956 crops had already been planted]

Small Grain Feeding-stuffs. There would be "quasi-mandatory" price supports, but these would only be raised from 70 to 76 per cent of parity. There would be no acreage controls for these grains, which the President had strongly opposed.

Wheat, Maize, Cotton, Rice, and Peanuts. The provision for rigid mandatory price supports at 90 per cent of parity was eliminated, but the existing flexible parities for wheat, maize, and peanuts were maintained for 1957. The earlier proposals for the restoration of the "dual parity" system for basic crops were modified.

A mandatory two-price system was retained for the disposal of rice in world markets at prices below the domestic support level, but the two-price system for wheat (with the foreign price lower than the domestic) was dropped. A discretionary two-price system was introduced for maize disposals abroad.

Acreage Allotments. The Bill froze acreage allotments for cotton and rice at the 1956 level for two further years, although cotton allotments for any State might be reduced by not more than one per cent in each of these years. A nine per cent reduction in cotton acreages, which would have come into effect in 1957 under the existing law, was thereby suspended.

Disposal of Cotton Surpluses. The Bill directed the Secretary of Agriculture to determine the U.S. share of the world market in cotton, and then to sell from the Government's surplus stocks the amount of cotton so determined "at or below prevailing world prices". An explanatory statement explained that the sale of 5,000,000 bales of cotton a year "at or below" prices of a recent 1,000,000-bale disposal programme would be "satisfactory" and was not expected to lower the world market price.

Cotton Imports. Existing restrictions on imports of long-staple cotton (which come principally from Egypt) were tightened up.

Farm Commodity Imports. The President was authorised to negotiate agreements limiting imports of farm products into the United States.

Although the Bill thus retained several provisions which the Administration had described as "highly objectionable," the President signed it on May 28, declaring that its advantages outweighed its shortcomings and expressing the hope that Congress would "review and repair" farm legislation next year.

In his accompanying message the President expressed disappointment that Congress had not agreed to advance payments under the "Soil Bank" scheme. He also objected to the provisions requiring the Government to follow an inflexible programme of cotton disposals abroad, "with little regard for costs and without adequate regard to the far-reaching economic consequences at home and abroad." This part of the Bill, he stated, would have to be administered with "extreme caution" if "seriously disruptive effects" were to be avoided. The President was also highly critical of the further import restrictions on long-staple cotton. In addition, he expressed the view that in freezing acreage allotments for rice and cotton for the next two years at the 1956 level, the Bill "runs counter to the adjustment principle which underlies our basic agricultural legislation."

The Department of Agriculture published figures on March 6 showing that farmers' net incomes from operations in 1955 had fallen to $10,770,000,000—a drop of $1,044,000,000, or 9 per cent, compared with 1954. This was the fourth consecutive year in which farmers' income had fallen. It was also stated that *per capita* farm income had declined by 6 per cent in 1955 to $860, which was less than half the individual average of $1,922 for the non-agricultural population.—(New York Times - New York Herald Tribune) **(Prev. rep. 14778 A.)**

A. IRAQ. — Development Programme approved by Chamber of Deputies.

The Iraqi Chamber of Deputies approved the Government's development programme for the six-year period 1955-60 on May 23, at the same time increasing the total estimated expenditure from 448,000,000 Iraqi dinars to 500,000,000 dinars. [One Iraqi dinar = £1 sterling.]

Dr. Pachachi, the Minister of Economics, stated during the debate that Iraq's oil revenues in the next five years would reach 464,000,000 dinars, based on present oil prices and the present cost of production. Output from the three main fields at Kirkuk, Zubair, and Ain Zalah was estimated to reach 34,000,000 tons at the end of the current year, not including a possible increase in output after the projected diversion of the Kirkuk-Haifa pipeline to an Arab seaport on the Mediterranean. He also said that Iraq's oil royalties this year were expected to total 80,000,000 dinars—the highest amount since the signing of the present contract with the Iraq Petroleum Company in 1954.

Of the grand total of 500,000,000 dinars provided for under the programme, 46,000,000 dinars had already been spent during the fiscal year, whilst the remaining 454,000,000 dinars will be spent at an approximate rate of 91,000,000 dinars annually during the coming five years.—(Financial Times) **(Prev. rep. 14884 A.)**

B. ARGENTINA. — Economic Policy. - Multilateral Trade, Payments and Debt Settlement Scheme with West European Countries.

The British Treasury announced on May 30 that agreement had been reached between Argentina on the one hand, and Austria, Belgium, France, Italy, the Netherlands, Norway, Sweden, Switzerland, and the U.K. on the other, on Argentine proposals for the introduction of a multilateral trade and payments system, and for the settlement of Argentina's debts.

The statement said that trade and payments would be conducted in transferable currencies with effect from a date as early as possible in June; that Argentina's debts to her main creditors would be settled on an equal footing by progressively increasing annuities over a period of ten years; and that interest would be paid at an average rate of 3½ per cent per annum.

Within the general framework agreed upon, Argentina and each participating country would hold any necessary bilateral discussions about the procedure for introducing the multilateral system, and for the conclusion of new definitive agreements for the settlement of Argentine debts. West German representatives had expressed the readiness of the Federal Republic to join the multilateral system as soon as possible.

The Treasury also issued an explanatory statement pointing out that the new Argentine system was not a "club" like the Brazilian "Hague club", where special arrangements were required to fit the scheme to the Brazilian exchange auction system.

The following further details of the scheme were also given:

Payments. No great change was involved as far as sterling was concerned, since Argentina was in the transferable account area. She could therefore already use sterling throughout the non-dollar world, and would still be able to do so. All payments between Argentina and the participating countries would then be made in sterling or in any other transferable currency.

All transactions on the official market would be made at the official cross-rates, and all differentials against transferable currencies would be discontinued.

Trade. The new system would not alter existing trade arrangements between the U.K. and Argentina, and did not imply any relaxation in Argentina's import policy. However, Argentina would neither discriminate among participating countries nor undertake commitments to non-participating countries which might result in discrimination against participating countries.

Debts. Argentina's total debts to Western Europe amounted to about $150,000,000. They fell into three categories: (*a*) Governmental debt, (*b*) debts due to Central Banks under "swings", and (*c*) liabilities to private concerns under long-term orders already placed.

The main creditor countries were Italy, Western Germany, France, and the United Kingdom. Argentina's debt to the U.K. was mainly under category (*a*) £19,000,000, drawn under the credit facilities of the 1955 agreement (see 14180 A). The remainder were commercial liabilities of the order of £5,000,000 or £6,000,000 due to private concerns over the next few years; these would not be affected in any way by the new arrangements.

Interest. This related to categories (*a*) and (*b*), whilst interest on category (*c*) would have been fixed in the terms of existing contracts.

Position of Germany. The difficulty for Western Germany was that she had not so far been able to establish the size of Argentina's commercial liabilities to her traders, thought to be about $100,000,000. With commercial liabilities of this size, some re-financing would almost certainly be necessary. In addition there was a certain amount of Governmental debt. If Western Germany could see her way to accept terms for the settlement of her debts over 10 years on the same basis as the other major creditors, she would also participate in the multilateral payments arrangements; otherwise payments between Western Germany and Argentina would continue to be made through the bilateral clearing.

New Members. Denmark was at present considering participation in the new arrangements.

Operational Date. The new system would be brought into force as soon as the necessary technical arrangements could be made by the Central Banks concerned. It was expected to be in operation before the end of June, 1956.

The return of Argentina to a system of multilateral trading ended the bilateral system which had characterized the Perón regime.—(Treasury Press Office, London - Financial Times - Le Monde, Paris - Neue Zürcher Zeitung) **(Prev. rep. U.K.-Argentine Agreement, 14180A.)**

C. ITALY. — Recognition of Sovereignty of Morocco and Tunisia.

It was officially announced in Rome on May 11 that the Italian Government had formally recognized the independence and sovereignty of Morocco and Tunisia, and that direct diplomatic relations would be established with these two countries after the agreements on diplomatic representation now being negotiated between the French and the Moroccan and Tunisian Governments had been concluded.—(Giornale d'Italia) **(Prev. rep. British Recognition, 14858 C.)**

A. BURMA. — Trade Agreements with U.S.S.R. and other East European Countries. - M. Mikoyan's Visit to Rangoon. - Soviet Technical Aid to Burma.

M. Anastas Mikoyan, the Soviet First Deputy Premier, visited Rangoon from March 30-April 2 during a tour of Asian countries. During his visit the following agreements between Burma and the Soviet Union were signed on April 1, in implementation of the understandings reached during Marshal Bulganin's and M. Khrushchev's visit to Burma :

(*a*) A supplementary trade agreement extending the period of the Burmese-Soviet trade agreement of July 1, 1955 (see 14408 A) from three years to five years.

(*b*) A protocol for the delivery by Burma of 400,000 tons of rice annually, during the remaining four years of the trade agreement, against Soviet supplies of machinery, equipment, and other goods, as well as technical services

(*c*) Arrangements for the settlement of mutual accounts on a sterling basis.

A joint statement was issued by U Nu (the Burmese Prime Minister) and M. Mikoyan announcing (*a*) that the Soviet Government had offered to construct and equip in Rangoon a hospital, a theatre, a cultural and sports centre, and premises for industrial and agricultural exhibitions, as a gift from the Soviet people ; and (*b*) that the Government of Burma had reciprocally offered to the Soviet people the gift of an appropriate quantity of rice.

A Burmese industrial mission left Rangoon for Moscow on April 24 to discuss details of Soviet technical aid to Burma.

In a statement in Calcutta on April 24, the leader of the mission (U Ba Thay) said that the U.S.S.R. had offered to build a modern steel plant in Burma of the same type as that being erected by Soviet technicians at Bhilai, in India, but with a smaller capacity. Soviet experts would also be invited to advise on the development of rich iron-ore deposits recently discovered in the Shan States, whilst a plan was being prepared by them to expand the production of Burma's only steel plant, which at present produced 40,000 tons of ingot-steel annually. U Ba Thay said that the Soviet team would include experts in other branches of industry, in agriculture, and in housing, and that the main emphasis would be placed on schemes for developing Burma's metallurgical and machine-tool industries and mechanizing her agriculture.

Several other trade agreements, summarized below, were also recently concluded between Burma and several East European countries.

Agreement with Poland. A three-year trade agreement (1956-58) between Burma and Poland was signed in Rangoon on Nov. 1, 1955. Under the agreement Burma will deliver rice and other agricultural products, minerals, ores, timber, and rubber, in return for Polish supplies of consumer goods, machinery, ships, and other capital equipment. A separate one-year protocol provided for Polish purchases from Burma in 1956 of 50,000-60,000 long tons of rice, against Burmese imports to an equivalent value of consumer goods, machinery, ships, river craft, motor-vehicles, etc. Settlement will be on a sterling basis, a Polish trade mission being established in Rangoon.

Agreement with Rumania. A three-year trade agreement, signed in Rangoon on Feb. 17, 1956, provided that Burma would export to Rumania rice and other agricultural products, mineral products, timber, rubber, etc., in exchange for Rumanian deliveries of oil-drilling machinery, mining and electrical equipment, machine-tools, other capital equipment, oil products, and certain consumer goods.

Agreement with Czechoslovakia. Under an agreement signed in Rangoon on Nov. 17, 1955, Czechoslovakia undertook to buy 50,000 long tons of Burmese rice on a barter basis.

A protocol relating to the exchange of 150,000 long tons of Burmese rice against an equivalent volume of Chinese commodity supplies in the year 1955-56 was signed in Rangoon on Dec. 29, 1955. The agreement implemented the Sino-Burmese trade agreement of 1954.—(Burmese Government Information Department, Rangoon) **(Prev. rep. Bulganin-Khrushchev Visit, 14603 A ; Sino-Burmese Trade Agreement, 13613 D.)**

B. SAUDI ARABIA. — Expulsion of British Locust Control Organization.

The U.N. Food and Agriculture Organization announced on April 29 that the Saudi Arabian Government had ordered the British Desert Locust Control mission to close its headquarters in Jedda and to leave the country by May 1.

The British Desert Control Locust organization, which had been working in Saudi Arabia for 14 years, had operated for some time under F.A.O. and not as a British Government unit. It was pointed out in the Press that it had been the only official body able to fight the locust menace in this vital region, where the chief locust-breeding grounds were to be found, and that its work had been essential for the food production of the entire area of the Middle East and of large parts of Africa.

It was announced on April 30 that Saudi Arabia had asked the F.A.O. to recruit in future non-British teams of locust control experts to replace the former British mission.

(Times - Manchester Guardian)

C. UNITED STATES. — Supreme Court Decisions on Constitutionality of Immunity Act and Right of invoking Fifth Amendment to U.S. Constitution.

The U.S. Supreme Court, in a ruling on March 26, upheld the constitutionality of the Immunity Act of 1954. This Act gives the Government the right to compel a witness to testify in national security cases in exchange for immunity from prosecution, and in that respect supersedes the privilege (granted by the Fifth Amendment to the U.S. Constitution) whereby a witness may refuse to give testimony that might incriminate him.

The case arose out of the conviction for contempt of William Ludwig Ullmann, a former Treasury Department official, who had been sentenced to six months' imprisonment after refusing to answer questions before a grand jury investigating espionage, in spite of a court order to do so. Ullmann had been named by Miss Elizabeth Bentley, a self-confessed Communist agent, as a member of an espionage ring during the war Ullmann, in refusing to testify, claimed the protection of the Fifth Amendment, saying that although he had been promised immunity from prosecution by the Federal authorities, there was still a real possibility that he might be prosecuted in State courts, as Congress had no power to pass a law giving witnesses immunity from State prosecutions.

Justice Felix Frankfurter, announcing the Supreme Court's majority decision, rejected Ullmann's contention on the ground that Congress had " paramount authority " to safeguard national security, and therefore had the constitutional power to pass a law exempting a witness from State prosecution and thereby restricting State power " for the more effective exercise of conceded Federal power." The two dissenting votes were cast by Justices Douglas and Black.

In another decision given on April 9, the Supreme Court denied, however, the right of college authorities to dismiss a college employee for invoking the protection of the Fifth Amendment.

This decision referred to the case of a Dr. Harry Slochower, who, after being employed as a teacher at Brooklyn College for 27 years, had been summarily dismissed by New York City in 1952 following his invocation of the Fifth Amendment when asked by a Senate Judiciary sub-committee whether he had been a member of the Communist Party in 1940-41.

The Supreme Court's ruling (given by five votes to four) condemned the " practice of imputing a sinister meaning to the exercise of a person's constitutional right under the Fifth Amendment," and said that " the privilege against self-incrimination would be reduced to a hollow mockery if its exercise could be taken as equivalent either to a confession of guilt or a conclusive presumption of perjury." The majority of the Supreme Court therefore agreed with Dr. Slochower's contention that his summary dismissal had deprived him of " due process of law." The majority decison was supported by Chief Justice Warren and Justices Black, Frankfurter, Douglas, and Clark, whilst dissenting opinions were given by Justices Reed, Burton, Minton, and Harlan.

The president of Brooklyn College (Dr. Harry D. Gideonse) announced on April 19 that Dr. Slochower would be reinstated with retrospective effect, but would then be suspended on new charges of " untruthfulness and perjury."

(New York Times) **(Prev. rep. Immunity Act, 13842 A.)**

D. SOVIET UNION - UNITED KINGDOM. — New Anglo-Soviet Fisheries Agreement.

A new fisheries agreement was signed in Moscow on May 25 between the U.K. and Soviet Governments under which British trawlers will be able to fish up to three miles off the Russian coast in two areas of the Barents Sea. An exchange of letters said that the agreement did not prejudice the claims or views of either Government with respect to the limits of territorial waters—i.e., the U.S.S.R. continued to adhere to a 12-mile limit, which it has maintained since 1927, and Britain to a three-mile limit.

The agreement defined three areas in which British vessels would be allowed to fish in the waters off Northern Russia : (1) the coast of the Kola Peninsula between the meridians of 36 deg. and 37 deg. 50 min. E. longitude ; (2) an area to the east of Cape Kanin between 43 deg. 17 min. and 51 deg. E. longitude ; and (3) the coast of Kolguyev Island, north-east of Cape Kanin.

The new agreement replaced a previous one which had been signed in 1930 and which expired in July 1955. As under the 1930 agreement, British trawlers will continue to be excluded from a 100-mile stretch of coastline (including the port of Murmansk) in the western part of the Kola Peninsula, and also from part of the entrance to the White Sea. On the other hand, they will be allowed to fish along a 100-mile coastline east of the entrance to the White Sea, an area which had been closed to them under the former agreement.

The agreement will run for five years from the date of ratification, and will be automatically renewable for further five-year periods unless denounced by either party, in which case one year's notice of termination must be given.

(Times - Daily Telegraph - Soviet Weekly)

JUNE 9—16, 1956

A. SINGAPORE. — Breakdown of London Conference on Constitutional Future of Singapore. - Resignation of Mr. Marshall. - Mr. Lim Yew Hock becomes Chief Minister of Singapore.

In conformity with the decision taken in August last (see 14576 A), a conference on the constitutional future of Singapore opened in London on April 23. After three weeks of negotiations, however, it broke down on May 15, mainly over the question of responsibility for internal security after Singapore had attained full self-government within the British Commonwealth. Mr. David Marshall, the Chief Minister of Singapore, resigned after returning from the London talks, at which he had led the Singapore delegation, and was succeeded by Mr. Lim Yew Hock, Minister for Labour and Social Welfare in Mr. Marshall's Government. These developments are described below under cross-headings.

Preparations for London Conference.

Mr. Marshall visited London from Dec. 9-17, 1955, for discussions with the Colonial Secretary (Mr. Lennox-Boyd) in connexion with the forthcoming constitutional conference. At the end of these discussions, which were officially described as " cordial and constructive," it was agreed that the conference should open on April 23, 1956, with the following agenda: (1) a definition of internal self-government, (2) a date for the introduction of internal self-government, (3) the structure of the Singapore Legislative Assembly; (4) the future of the public service; (5) external relations and external defence; and (6) any other matters that might arise.

The members of the Singapore delegation to the London conference were announced in Singapore on March 16, comprising seven members of the Labour Front Government headed by Mr. Marshall, and six members of the Opposition. It was stated that the Governor of Singapore (Sir Robert Black) and the Attorney-General (Mr. C. H. Butterfield) would also attend the talks.

The Government members of the Singapore delegation were Mr Marshall (Chief Minister), Mr Lim Yew Hock (Minister of Labour and Social Welfare), Mr. Abdul Hamid Bin Haji Jumat (Minister of Local Government, Lands, and Housing), Mr. A. J. Braga (Minister of Health), Mr. J. H. Junabhoy (Minister of Industry and Commerce), and two members of the Legislative Assembly, Mr Soah Peng Chuan and Mr. Wong Foo Nam. The Opposition delegates comprised four members of the right-wing Liberal Socialist Party (Mr. Lim Choon Mong, Mr. William Tan, Mr. Lim Koon Teck, and Mr. Lim Cher Keng) and two members of the left-wing People's Action Party (Mr. Lee Kuan Yew and Mr. Lim Chin Siong).

[The Liberal Socialist Party had been formed in January by a merger of the Progressive and Democratic parties, which were dissolved. It commands six seats in the Legislative Assembly, and is thus the second largest group. Its programme calls, *inter alia*, for a " united, democratic and independent " confederation of Singapore, Malaya, North Borneo, Sarawak, and Brunei, and in the economic field for free trade, relaxation of controls, increased food production, and the establishment of secondary industries.]

Singapore Legislative Assembly's Resolution on Independence within British Commonwealth.

Before the Singapore delegation left for London, the Legislative Assembly adopted on April 5 a resolution instructing the delegation " to seek forthwith for Singapore the status of an independent territory within the Commonwealth," while reserving to Britain control over external defence and external relations. The resolution, presented by Mr. Marshall, was adopted without a dissentient vote, with four members abstaining —Mr. Sutherland, the European nominated member, and the three British *ex-officio* members of the Council of Ministers.

Mr. Marshall began his speech by referring to the " basic right of peoples to governments of their own choice," as laid down in the Washington Declaration signed by Sir Anthony Eden and President Eisenhower in February last. After declaring that the mission to London would seek from the British Government " full legislative autonomy and equality in status with other independent members of the Commonwealth," he said that the type of Constitution envisaged was one in which there would be " an end to official members of the Executive Council, an end to nominated and official members in the Assembly, and an end to the Governor's veto powers. In fact, in the type of Constitution we envisage there will be no Governor, and her Majesty's representative would only have the decorative and necessary functions associated with a monarchy under parliamentary rule."

As regards defence (Mr. Marshall continued) the primary factor was not the defence of Singapore itself, but of the other member-States of the Commonwealth and allied nations. Singapore was vital to the defensive policy of the free world, and it would be unreasonable and impractical if it was not used " as a fort for the defence of all." All parties were agreed that Britain should continue to maintain the base at Singapore, and to exercise responsibility for Singapore's external defence. With regard to external relations, Singapore would seek the right to appoint Ambassadors and High Commissioners, but would accept the " advice " of the British Government on all matters appertaining to foreign relations.

While agreeing that defence and external affairs should continue to remain British responsibilities, Mr. Marshall rejected any suggestion that control of internal security should remain in British hands. " To cede control over internal security," he declared, " is to make a mockery of independence. If H.M. Government insists on control over our internal security forces, the Labour Front will be no party to any agreement that may be arrived at "

Mr. Lee Kuan Yew, leader of the People's Action Party, agreed that Singapore should remain in the British Commonwealth, declaring that there was no reason why 5,000,000 Malayans should remain outside the Commonwealth if 300,000,000 Indians had decided to remain inside it. He agreed also that Britain should continue to have responsibility for the external defence of Singapore, but stressed that any consequential British demand for control over the internal security forces would be unacceptable.

Opening of London Conference.

The London conference opened at Lancaster House on April 23, when speeches were made by Mr. Lennox-Boyd and Mr. Marshall.

Mr. Lennox-Boyd said that the task of the conference was "to work out how Singapore is to achieve its true destiny in our remarkable family of nations." He continued: "You [the Singapore delegation] come here with certain quite natural aspirations. I understand and sympathize with these aspirations. It has long been our aim to guide Colonial territories to responsible self-government in the Commonwealth, on conditions that ensure to the people concerned both a fair standard of living and an expanding one, and freedom from oppression from any quarter."

Singapore, Mr Lennox-Boyd pointed out, was in a unique position in the world: a very great port, the commercial hub of South-East Asia, a bastion in the defence system of the free world, and an illustration of a " wonderful co-operative effort " between Eastern and Western peoples. Because of this, she had become a " particular target for resentment, envy, and the ambitions of the Communist world." Attacks did not always come from without but also from within —and in Singapore had already started. For this reason external defence and internal security were inevitably intertwined in Singapore.

" Over all our talks," Mr. Lennox-Boyd concluded, " must hang the threat of Communist subversion, and the substitution of ruthless despotism for the British liberal tradition. I can assure the people of Singapore and the people of Britain . . that the British Government will not allow Singapore to fall under the domination of Communist rule. We do not intend that Singapore should become an outpost of Communist China, a colony of Peking."

Mr. Marshall spoke as follows: " We come in no spirit of antagonism or bitterness, nor do we seek to deprive the United Kingdom of her interests. We come seeking to be friends. We are heartened by the new agreement of the U.K. Government to grant self-government to our brothers of the Federation of Malaya [see 14710 A]. We are particularly heartened when we remember this was agreed to although the internal security position of the Federation requires unceasing military operations against a group of Communists that have for seven years now used murder, arson, and physical brutality as its weapons of ideological persuasion.

" Singapore could become a stabilizing point in South Asia, a dynamic force of democracy in an area over which looms the threatening shadow of totalitarian colonialism. It is in this spirit that we come to seek our right to manhood, our right to live as free human beings. In Singapore the need for an immediate decision for self-government is all the more vital if the true nationalists are to have any opportunity to repel the threatened flood of an ideology that seeks to destroy the democratic process."

Breakdown of London Conference.

No information as to the progress of the conference was made public until May 15, when it was announced that the discussions had broken down. The Colonial Office issued on that date (1) a statement setting out the chief features of the British Government's offer of self-government for Singapore, and (2) a summary of the proceedings of the conference. The texts are given below:

British Offer of Self-government for Singapore.

" A Constitution offered by H.M. Government was refused by the Singapore delegation, although it would have given the people of Singapore full internal self-government, a citizenship status within the Commonwealth equivalent to that enjoyed by the fully self-governing members of the Commonwealth, and an important share in the conduct of external affairs, subject only to a limited right on the part of H.M. Government to take action in Singapore in exceptional circumstances.

" The Singapore delegation at first put forward proposals for complete independence. Later, they suggested a Constitution which conceded to H.M. Government control of external defence and external affairs (except trade and commerce), but contained no powers whereby H.M. Government could ensure the discharge of those responsibilities short of suspending the Constitution.

"After long discussion, the delegation said they would acquiesce in the retention of limited powers by H.M. Government only if U.K. representatives were not in a majority on the body on whose recommendations these powers would be exercised.

"In the light of Singapore's great strategic importance in the defences of the free world, and bearing also in mind the growing menace of Communist subversion in the island, H.M. Government considered that it was unreasonable to expect them to accept this position, which involved responsibilities without adequate powers.

"The chief features of H.M. Government's offer were :

(1) In recognition of the advanced status of Singapore, the territory should no longer be referred to as a Colony but should be called the 'State of Singapore'

(2) For the same reason the Queen's representative, instead of being a Governor, should become High Commissioner

(3) The official and nominated members of the Legislative Assembly and the official Ministers on the Council of Ministers should be withdrawn, and the size of the Assembly doubled. This would give Singapore a completely elected Assembly of 50 seats and a fully elected Council of Ministers which would be in control of all the internal affairs of the territory. The Chief Minister would preside over the Council of Ministers.

(4) There would be provision for a separate Singapore citizenship within the Commonwealth on the same basis as that enjoyed by the fully self-governing members of the Commonwealth

(5) There would be full internal self-government, including responsibility for internal security [subject only to the reservations in (8) below], and the Commissioner of Police would be responsible to an elected Minister

(6) External defence and external affairs would remain the responsibility of the U.K. Government, who would, however, devolve upon Singapore Ministers the conduct of their own commercial and trade relations, subject to such safeguards as might be necessary to avoid conflict with H.M. Government's international obligations. In all matters save external affairs and external defence, the High Commissioner would act in accordance with the advice of the Council of Ministers He would not attend meetings of the Council, which would be presided over by the Chief Minister.

(7) In recognition of the fact that external defence and external affairs would be matters of mutual interest, and to take account of the link between internal security and external defence and of H.M. Government's continuing responsibility to help Singapore to maintain law and order in the absence of adequate local forces, there should be set up a Defence and Security Council. On this Council would sit representatives of the Singapore Government and the U.K. Government, with the High Commissioner as chairman. The functions of the Council would be to discuss those aspects of external affairs and external defence which were of common concern ; to receive regular reports on the internal security situation ; to consider what action, if any, was called for in consequence of these reports ; and to make recommendations to the U.K. and/or Singapore Governments as appropriate.

(8) As long as H.M. Government retained responsibility for external defence and external affairs, an ultimate measure of authority would be necessary, but this would be limited to external defence and external affairs, and internal security so far as it affected these subjects. The power to make Orders-in-Council for Singapore would therefore be restricted to those circumstances where it was clear, in the light of advice from the Defence and Security Council, that H.M. Government would be unable otherwise to carry out its responsibilities for external defence and external affairs. H.M. Government would undertake that the power to act in these circumstances would not be used unreasonably.

"H.M. Government consider that these imaginative proposals indicate how greatly they desire to promote the constitutional advance of Singapore, while at the same time taking properly into account the position of Singapore as a mercantile centre depending on stable government for its prosperity and as a major strategic base in the defence system of the free world. They would certainly be willing to negotiate on the basis of its proposals with any Government in Singapore willing to recognize that the dangers and difficulties surrounding and within the fortress-island make an immediate leap forward to complete independence dangerous and precipitate."

Summary of Conference Proceedings.

"In their first proposals the Singapore delegation demanded sovereign independence within the Commonwealth by April 1957. They proposed that in the Independence Act conferring this upon the territory there should be provision to allow H.M. Government to maintain bases on the island and to have a concurrent interest in external affairs, though the effect of the provisions they proposed was that the Singapore Government would at all times have a veto on the proposed arrangements.

"The Secretary of State [Mr. Lennox-Boyd], in reply, explained why H.M. Government could not accept these proposals at the present time. There had been no appreciable period of stable democratic government in Singapore. No political party at present held a commanding majority. The subversive forces of Communism were strongly at work in Singapore, as the Chief Minister [Mr. Marshall] himself had recognized, and it was impossible to foresee what the future might hold in internal political development. H.M. Government did not therefore think they would be honourably discharging their responsibilities if they now took the irrevocable step of abrogating all rights and powers of any sort in connexion with Singapore for all time.

"The [Singapore] delegation therefore modified their demands and proposed an Independence Bill for Singapore which, while containing the main provisions of the Statute of Westminster normally brought into force when a territory achieves complete independence, also contained the reservation that the U.K. Government, through its High Commissioner, should have power to act in relation to external affairs, so far as responsibility for such affairs shall not have been vested in the Government of Singapore , and power to provide for the external defence of Singapore.'

"The delegation also proposed that for a transitional period of six years only there should be a Defence and Security Council on the lines and for the purposes already mentioned, and that the U.K. Government should have the right during this period to suspend the Constitution and assume full responsibility for governing Singapore if the internal security situation so far deteriorated as to threaten the efficacy of the external defence installations, or if the Government of Singapore acted in contravention of the Independence Act or of the Constitution of Singapore.

"The U K delegation welcomed the understanding of the difficulties of the situation of which these new proposals gave evidence. The Secretary of State, however, questioned the propriety of introducing a Singapore Independence Bill into the House of Commons when the Bill would not confer independence as the word is usually understood.

"He also suggested to the delegation that if H.M. Government were to be in a position to discharge their responsibilities in the field of external affairs and defence, and, in the last resort, to take action in Singapore in an internal crisis, it was both right and logical that the U.K. Government should have powers, which they could use in an emergency, less drastic than the right to take the distasteful step of suspending the Constitution.

"It was not in any way the U.K. Government's desire to use these powers to interfere with the ordinary government of the Colony ; but if emergency circumstances arose in which H.M Government had to act, it would surely be better for them to have some means of acting without going to the extreme lengths of taking away from the people of Singapore the advanced Constitution the U.K. Government were now offering them.

"Throughout the conference the Chief Minister refused to concede that H.M. Government should have any powers in Singapore other than the right to suspend the Constitution. At the last moment, however, he said that the majority of the delegation would reluctantly acquiesce in the retention of the limited powers required by the U.K. Government, but only on the two conditions that the use of these powers would be dependent on the recommendation of the Defence and Security Council ; and that U.K. representatives should not be in a majority on the Council

"These conditions would effectively remove from H.M. Government their power to carry out their responsibilities in the light of their own judgment. H.M. Government considered that to accept this position, in which they had clear responsibilities not only affecting Singapore but important to her neighbour Malaya and to the whole free world, without any certain power to take action other than to suspend the Constitution and to take over the entire government of the territory, would put them in a quite unacceptable position

"It proved impossible to reach agreement on this matter, and the conference concluded."

Abortive Efforts to resume Negotiations.

In a press statement after the breakdown of the conference, Mr. Marshall said that he had suffered "the bitterest disappointment of my life" and that "a great opportunity has been lost." He added that the breakdown of negotiations represented "a triumph for the Communists," and likened the British Government's offer to "a Christmas pudding with arsenic sauce."

Mr. Lennox-Boyd, on the other hand, said that the British offer would have gone "very far to satisfying the aspirations of the people of Singapore without ignoring strategic realities and the menace of Communism in the island." Like Mr. Marshall, he expressed great disappointment that the talks had broken down, but said that "we shall always be ready to try again."

A statement on the breakdown of the conference was made by the Colonial Secretary to the House of Commons on May 16.

Mr. Lennox-Boyd said : "We have been trying to find a Constitution for Singapore which would satisfy the aspirations of its people, and which would at the same time take proper account both of Singapore's importance in the defence system of the free world, and of the vulnerability of her mercantile and political life.

"H.M. Government offered such a Constitution to the delegation. It gave them the widest possible measure of internal self-government, the conduct of their own external affairs in trade and commerce, and an agreed solution to their citizenship problem which would have created a citizenship for Singapore equivalent to that enjoyed by the fully self-governing members of the Commonwealth. H.M. Government considered it necessary to retain, as a safeguard, the power to make Orders-in-Council for Singapore, but were willing to limit this power to matters affecting U.K. responsibilities for external defence and external affairs. This Constitution was refused by the majority of the delegation.

"Both sides agreed that the control of external affairs (other than trade and commerce) and of external defence should remain with the U.K. Government. But the majority of the delegation would not agree that any powers to act in Singapore (except within already defined defence establishments) should remain in the discretion of the U.K. Government, other than the right in the last resort to take the repugnant step of suspending the Constitution and assuming direct responsibility for the whole machinery of government in the island. This was not a position H.M. Government could accept.

"I could not in the space of this statement do justice to the details and complexities of the constitutional arrangements discussed. I will therefore set out the constitutional proposals and counter-proposals which were considered by the conference in a White Paper.

"I am certain many people in Singapore will regret that the majority of the delegation would not accept the imaginative and constructive proposals made to them. But no doors are closed, and I hope that moderation and good sense will recognize in these proposals a basis on which fruitful negotiations can yet take place.

Mr. Aneurin Bevan (Lab.) said that Mr. Lennox-Boyd had made "an exceedingly serious statement" which might have "very serious consequences." As he (Mr. Bevan) understood it, the conference had broken down on one point only—"the interpretation of where the frontiers lie between H.M. Government's rights in the island and the rights of the local government for internal security." In view of the fact that a wide area of agreement had been reached in the London talks, he asked whether Mr. Lennox-Boyd was prepared to have further discussions with Mr. Marshall before the Chief Minister returned to Singapore.

Mr. Lennox-Boyd said that Mr. Bevan's interpretation of the cause of the breakdown was "not by any means correct." The conference had not broken down "on the limited field of internal security" but fundamentally on two points. "First, on the refusal to recognize that we must have some power in the field of external defence reserved to us, other than the power totally to suspend the Constitution. Secondly, on the fact that we could not accept a constitution for the Defence and Security Council which would put the Government in a permanent minority on a body without whose authority we could take no action other than that of suspending the Constitution." Mr. Lennox-Boyd added that he would be having a personal meeting with Mr. Marshall the same evening, and that H.M. Government were "always prepared to renew discussions on the basis of our present proposals with this or any other Government of Singapore."

After a meeting on May 16 with three leading members of the Labour Party—Mr. James Griffiths, Mr. Aneurin Bevan, and Mr. Creech Jones—Mr. Marshall said that he had "an idea for a new approach which I believe would be acceptable to the British people and may be acceptable to our own people." The same evening he had a personal discussion with Mr. Lennox-Boyd at the latter's home, at which, however, he was accompanied by only two other members of the Singapore delegation. Mr. Lee Kuan Yew, the leader of the People's Action Party, described Mr. Marshall's attempt to reopen the negotiations as "madness," and said that the P.A.P. would not participate in the private talks with Mr. Lennox-Boyd. No agreement was reached in these private discussions, and Mr. Marshall, after taking leave of Mr. Lennox-Boyd, said there would be "no resumption of the conference."

Correspondence between Mr. Marshall and Mr. Lennox-Boyd was released on the same day (May 16), containing (*a*) Mr. Marshall's new proposals for overcoming the deadlock, which, as he pointed out in his letter, were made "entirely on my initiative and responsibility"; and (*b*) Mr. Lennox-Boyd's reply, in which the Colonial Secretary noted that Mr. Marshall's letter represented "an entirely personal approach" on the Chief Minister's part, and in which he said that because the majority of the Singapore delegation failed to support the new proposals, these "did not represent a basis on which the conference could resume its work."

Mr. Marshall to Mr. Lennox-Boyd. "Since the breakdown of the conference an idea for a new approach to our differences has occurred to me. I am putting forward the suggestion contained in this letter entirely on my own initiative and responsibility. You are aware how repugnant the whole principle of overriding powers of legislation is to me personally, and how dangerous I consider the existence of such powers is to the principle I seek to establish of stable and friendly relations with the United Kingdom.

"These imperial powers of legislation (as defined by you) are far outside the scope of what is normally understood by the phrase 'external defence.' This question of overriding powers is also very repugnant to the majority of my colleagues, and in the circumstances I do not wish to raise the matter with them again until I have got some assurance that there is a prospect that my suggestion would be acceptable to the Colonial Office as a basis for negotiation. The suggestion is this:

(1) That the overriding powers of legislation by Orders-in-Council and emergency regulations sought by you, in the context of your proposal for the composition of the Defence and Security Council, should be subject to affirmative resolution of the House of Commons.

(2) In order to meet the very real need of the people of Singapore for an end of colonial rule, the relationship of the State of Singapore with the U.K. should be outside the scope of the Colonial Office.

(3) That there should be a representative of her Majesty in Singapore, as the head of the State in Singapore, through whom the loyalty of the people of this nascent State would find a means of coalescing. Her Majesty's representative should be a Malayan and completely distinct from the political representatives of H.M. Government in Singapore.

"If you consider this a basis for reopening negotiations, I should be glad to hear from you and will seek to persuade my colleagues to agree. If this suggestion proves unacceptable to you, and this becomes my last official communication with you, permit me to express my appreciation of the personal friendliness you have shown towards me, and my admiration for your very real abilities."

Mr. Lennox-Boyd to Mr. Marshall. ". . . I note that the letter represents an entirely personal approach on your part. You repeat the suggestion you had made to me in conversation that the limited powers to make Orders-in-Council for Singapore, which I had proposed should, as a safeguard, be retained, should only be exercised subject to approval by affirmative resolution of the House of Commons.

"I told you that if the delegation supported your suggestion, and were willing to reach agreement on the basis of the proposals I had put to the conference, modified accordingly, I thought it offered a possible solution to the central problem on which the conference broke down. And, as I said to you later, if the Singapore Government wished to enter into fresh Government-to-Government negotiations on this basis, I would be very willing to meet them.

"But it seemed clear to me that we should only reconvene the conference if there were a reasonable prospect of reaching agreement. Nothing could do greater harm at the present time than to have a second breakdown in the talks. I felt, therefore, that I must ask you to let me know whether the proposal made in your letter had the support of the delegation as a whole before I could properly undertake to reopen the conference, and I invited you and all the members of the delegation still in London to meet me privately.

"Unfortunately only two members of the delegation, besides yourself, came to the meeting, and it became clear that the proposals did not represent a basis on which the conference could resume its work.

"I greatly appreciate the generous remarks with which you ended your letter to me. I would like, in my turn, to say how sorry I am that we were not able to reach agreement in our conference, and to thank you for your courtesy and your many personal kindnesses."

In a further statement to the House of Commons on May 18, Mr. Lennox-Boyd reiterated that Mr. Marshall's latest proposals were "purely his own personal suggestions" and not those of the Singapore delegation as a whole, which had "clearly disintegrated." Although he (Mr. Lennox-Boyd) had invited all the members of the delegation to meet him for informal talks, "all who came in the end were the Chief Minister and two of his colleagues." "It cannot possibly be said," he added, "that the delegation was behind these proposals . . . Had Mr. Marshall come forward on behalf of the delegation, or even with a majority of the delegation in favour of these proposals, I would have discussed the matter . . ." Mr. Lennox-Boyd declared that it was "now for the political pattern of Singapore to sort itself out before we can usefully resume negotiations," and emphasized that H.M. Government were "always prepared to resume discussions on the basis of our present proposals with this or any other Government of Singapore."

Mr. Marshall's Return to Singapore.

Mr. Marshall arrived back in Singapore on May 25, having broken his return journey in New Delhi for private discussions with Mr. Nehru on May 23.

In a broadcast to the people of Singapore on May 28, Mr. Marshall recalled that he had promised to resign if he failed in his London mission, and said that he intended to keep that promise. "The high hopes with which you sent your *merdeka* (independence) mission to London," he declared, "are like a dead bird at your feet." The Singapore delegation, he continued, had agreed that Britain should retain her military, naval, and air bases in Singapore, and had also agreed to include in the Constitution an undertaking to co-operate in providing civilian facilities for the bases, such as water supplies and the use of roads. Britain, however, wanted the right to make Orders-in-Council which, "though nominally concerned with external defence and foreign affairs, would touch every aspect of public life." Moreover, she was also unwilling to appoint a Malayan as High Commissioner, and desired to keep Singapore under the jurisdiction of the Colonial Office.

"Any arrangement that leaves you under the Colonial Office," Mr. Marshall declared, "is an arrangement which leaves you a subject people. No matter what written assurances you get, the centuries-old tradition of the Colonial Office is something distinct and separate from the democratic principles of the British people. The Colonial Office is a thing apart. The very essence of its philosophy is one of fascism in the international sphere, and no amount of written assurances and promises can make the leopard change its spots."

Mr. Marshall added, however, that "If Mr. Lennox-Boyd meant what he said to the House of Commons on May 18, there is a basis for reopening negotiations—not for full *merdeka*, but for something that is temporarily adequate." [This referred to Mr. Lennox-Boyd's statement that H.M. Government were always prepared to resume discussions "with this or any other Government of Singapore."]

An assurance that Britain was still "committed unequivocally to leading the people of Singapore to full self-government within the Commonwealth" was conveyed in a message from Mr. Lennox-Boyd to Mr. Marshall, the text of which was published in Singapore on May 31. It was indicated, however, that the Secretary of State could not accept the appointment of a Malayan as the Queen's representative in Singapore, or the detachment of Singapore from the Colonial Office to another Ministry, as such steps would be "premature and unwise." Commenting on this message, Mr. Marshall said that it was "now plain that the Colonial Office talk about asking only for powers to discharge external defence responsibilities is pure eyewash to fool public opinion; the truth is that the Colonial Office wants to retain complete control over Singapore as a colony at all times."

Resignation of Mr. Marshall.

The Singapore Labour Front, meeting on June 3, "sorrowfully endorsed" Mr. Marshall's decision to resign as Chief Minister following the failure of his "*merdeka* mission" to London. It designated Mr. Lim Yew Hock as Chief Minister on Mr. Marshall's resignation; appointed Mr. Marshall president of the Labour Front (a position formerly held by Mr. Lim); and paid tribute to his "unrelenting efforts to free the people of Singapore from colonial rule." Mr. Marshall formally tendered his resignation to the Governor (Sir Robert Black) on June 7, after making a "farewell speech" in the Legislative Assembly on the previous day.

In the course of this speech Mr. Marshall bitterly attacked the Colonial Office, alleging that it wished to keep Singapore in a state of "colonial slavery", accused the British Government of making Singapore "a live offering to their god of brass -SEATO"; and also attacked the Australian Government for "hurrying to the support of the U.K stand," although it had "at no time sought to ascertain the views of the Singapore Government on the British proposals, nor made any effort to obtain information as to our understanding of the facts." Mr. Marshall emphasized, nevertheless, that Singapore's long-term welfare required close and friendly collaboration with Britain within the framework of the Commonwealth, and declared that "the door must be kept open against the time when reason, justice, and good will can prevail."

Mr. Sutherland (the European nominated Independent member) repudiated Mr Marshall's allegations against the Colonial Office, declaring that it was not "all-powerful," as Mr Marshall seemed to imagine, and that it could in no sense whatsoever be described as "fascist" or as an "exploiter of humanity" [phrases used by Mr. Marshall].

Mr. Lim Yew Hock appointed Chief Minister.

Mr. Lim Yew Hock was asked by Sir Robert Black to form a new Government after the resignation of Mr. Marshall. Mr. Lim's administration was sworn-in on June 8, with the following membership:

Mr. Lim Yew Hock	Chief Minister and Minister of Labour and Social Welfare.
Mr. Abdul Hamid ..	Deputy Chief Minister, Local Government, Lands, and Housing.
Mr. W. A. C. Goode	Chief Secretary.
Mr. T. M. Hart ..	Financial Secretary.
Mr. C. H. Butterfield	Attorney-General.
Mr. Chew Swee Kee	Education.
Mr. A. J. Braga ..	Health.
Mr. J. M. Jumabhoy	Commerce and Industry.
Mr. Francis Thomas	Communications and Works.

Mr. Lim Yew Hock (41), regarded as a moderate, has played a leading part in the Singapore trade union movement, and was president of the Labour Front before becoming Chief Minister. Born in Singapore, he entered public life in 1948, when he was nominated by the Governor as a member of the Legislative Council. In 1951 he became an elected member of the Council, polling the highest number of votes of any candidate.

The Chief Secretary, Financial Secretary, and Attorney-General are European officials who, under the present Constitution, are Ministers *ex-officio*. Mr. Thomas is the only European non-official Minister, but is not elected. Mr. Abdul Hamid, the Deputy Premier, is the only Malay Minister and the only representative of the Malay-Chinese Alliance, which is part of the Labour Front coalition.

In a policy statement on June 8, Mr. Lim Yew Hock said that his Government would be prepared to hold fresh talks with Britain on Singapore's constitutional future; "the next move lies with the Colonial Office, but talks there must be and talks there will be." He added that he would approach the problem with a fresh mind, and that his Government were determined that Singapore should attain "full stature within the Commonwealth" at the earliest moment. In a subsequent statement Mr. Lim declared that he wished to build up "a national anti-Communist front."

Australian and New Zealand Support for British Attitude in Singapore Discussions.

The Prime Ministers of Australia (Mr. Menzies) and New Zealand (Mr. Holland) issued statements endorsing the attitude of the British Government in the discussions with Mr. Marshall and the Singapore delegation.

Mr. Menzies, in a statement on June 4 in Colombo (which he was visiting *en route* for the forthcoming London Conference of Commonwealth Prime Ministers), said that the Australian Government approved of the attitude taken by Britain in the discussions on Singapore. The negotiations had broken down on the question of internal security, and he personally shared the U.K. Government's view that it was "difficult to draw a line between the defence of a nation and its internal security." Denying that Britain was reluctant to grant independence to Singapore, Mr Menzies pointed out that no country had a greater record than Britain in granting self-government to its colonies by stages—as in the case of Ceylon.

Mr. Holland issued the following statement in Wellington on May 16: "New Zealand strongly supports the aspirations of the people of Singapore for self-government and independence. At the same time it shares the concern of the U.K. for the internal security of Singapore, the preservation of which is essential for the defence of the peoples of South-East Asia . . . The U.K. made very substantial proposals to the Singapore delegation, and these would mark a real advance in the constitutional progress of the Island. Singapore would have virtually complete responsibility for internal self-government, only questions of external affairs, defence, and certain reserved powers in internal security remaining with the United Kindom . . . The New Zealand Government is satisfied that the U.K. has done, and is doing, everything to advance the territory towards self-government. In the interest of Singapore itself, and of the protection and well-being of its inhabitants, the U.K. has had no alternative but to act as it has. The New Zealand Government therefore feels bound to express its endorsement of the U.K.'s stand . . ."

Ceylonese Premier's Statement on Singapore.

At a press conference on May 16, the new Prime Minister of Ceylon (Mr. Bandaranaike) made the following comment on the Singapore situation: "There is no question that Singapore is a key spot in the defence of the Commonwealth, and it is not to be wondered at that the British Government wishes to retain control of external and internal defence. I imagine that my own attitude on the bases in Ceylon perhaps had something to do with the stiffening of the British attitude to Singapore. I sympathize with the desire of the people of Singapore for absolute freedom, but I also understand the British point of view in this matter." - (Times - Daily Telegraph - Manchester Guardian - Australian News and Information Bureau - Directorate of Information Services, Wellington - Ceylon Government Information Department, Colombo)

A. UNITED KINGDOM. — Disclosure of Espionage Trial in 1939. - Statement by Foreign Office.

The Foreign Office disclosed on June 7, for the first time, that a retired Army officer, Captain John Herbert King, had been sentenced to ten years' penal servitude in 1939 for passing information to the Soviet Government. A Foreign Office spokesman stated that King had worked in the Communications Department of the Foreign Office, which handles messages in code; that he had been tried and sentenced on Oct. 18, 1939 (i.e. six weeks after the outbreak of war), being then 55 years of age; and that the trial had been held in secret under the Emergency Powers Regulations then in force. The spokesman added that King had been released without serving the full term, having been given the usual remissions for good conduct; that he was believed to be still alive and living in the U.K.; and that he had been convicted on evidence supplied by the United States.

The disclosure followed a statement made in Washington on the previous day by an American author, Mr. Isaac Don Levine, in the course of testimony given to a Senate security sub-committee. Mr. Levine, described as an expert on Russian questions, was reported to have said that King had been "quietly shot" in the Tower of London, and to have described him as one of two Britons working for the Soviet Government the other being, he believed, Donald Maclean, the British diplomat who disappeared in 1951 and was now known to be working in Moscow. The Foreign Office spokesman said that the information from the U.S.A. about this second person was "too imprecise to identify the individual," but that, as Maclean had later disappeared, it was naturally suggested that he might have been this second man.

In a written reply to Mr. Arthur Henderson (Lab.), the Under-Secretary for War (Mr. Fitzroy Maclean) stated on June 11 that no British subject had been executed in the Tower of London from 1939 to the present.—(Times - Daily Telegraph)

A. ALGERIA. — Political Developments, September 1955 - June 1956. - "Soustelle Plan" rejected by Algerian Assembly. - Emergency Powers Bill passed by French National Assembly - Emergency Powers granted to Governor-General. - Policy Declarations by M. Mollet. - Administrative, Economic, and Social Reforms. - M. Fehrat Abbas joins National Liberation Front.

The French National Assembly approved on March 12 a Bill granting M. Mollet's Government emergency powers to deal with the situation in Algeria, both by means of exceptional measures needed to restore order and by the introduction of administrative, social, and economic reforms. The Government subsequently issued a series of decrees during March and April under which (1) the Governor-General, M. Lacoste, received far-reaching emergency powers; (2) military courts were authorized to deal summarily with crimes against persons or property; (3) the Algerian Assembly was dissolved, (4) provision was made for the admission of an increased number of Moslems to the public service; and (5) agrarian reforms intended to benefit tenants, landless peasants, and agricultural labourers were introduced. An earlier programme of administrative and agrarian reforms put forward by M. Soustelle, M. Lacoste's predecessor, had been rejected in September 1955 by the Moslem members of the Algerian Assembly, on the ground that it was inadequate to meet Algerian needs.

Details of these and other recent political developments relating to Algeria are given below under cross-headings.

"Soustelle Plan" rejected by Algerian Assembly.

A special session of the Algerian Assembly was summoned for Sept. 27, 1955, to vote on a programme of administrative, educational, and agrarian reforms put forward by M. Soustelle The main provisions of this programme were as follows:

(1) The system whereby rural areas were under the control of an administrator, assisted by a native caïd and a council of village representatives, was abolished Instead, "rural centres" (roughly corresponding to villages) would be administered by elected councils; the presidents and vice-presidents of these councils in each area would form the council of the "rural commune"; and the administrator would play a purely advisory role.

(2) The Moslem religion would be freed from State control i.e. the Governor-General's approval would no longer be required for religious appointments, and religious associations would be free to make their own appointments and to administer their own property. A Commissioner for Religious Affairs would be appointed by the Governor-General, and a consultative commission set up for each religious denomination.

(3) Teaching of Arabic would be compulsory in all State schools and at all stages of education. [These three reforms were all provided for by the Statute of Algeria in 1947, but had never been put into force.]

(4) The laws relating to land tenure would be simplified, in order to facilitate the exchange and redistribution of small holdings, the establishment of clear titles of ownership, and the construction of roads and drainage trenches.

(5) A fund for the expansion and modernization of rural property would be set up, under a chairman nominated by the Governor-General. The authority responsible for this fund would be empowered to acquire land, either by agreement or compulsorily, and to grant long-term loans, with a view to increasing the number of smallholders.

(6) A land tax would be introduced in irrigated areas as an incentive to landowners to increase the productivity of their land, and special loans would be granted to them for this purpose. If landowners in these areas had not taken advantage of the facilities available by a fixed date, their land might be confiscated and redistributed to smallholders.

(7) The *khamessa* system [whereby a landowner supplies seed and equipment to a tenant in return for four-fifths of his crop] would be abolished. Under such contracts, including those already in force, the crop would in future be equally divided between the landlord and the tenant.

The members elected by the first college announced their willingness to consider M. Soustelle's proposals. [The Algerian electorate is divided into two colleges, the first consisting of Frenchmen, Algerians possessing certain property or other qualifications, and their wives, and the second of all other male Algerians.] A meeting of Moslem representatives, however, which was also attended by Moslem members of the French Parliament, decided on the same day to reject the French Government's policy of integration, and to work for the recognition of Algerian nationality. This motion was adopted by 25 votes to 18, with seven abstentions and nine of the delegates absent; it was subsequently signed by four of the seven Moslem members of the Assembly of the French Union, five of the seven Moslem senators, 10 of the 15 Moslem members of the National Assembly, and 42 of the 59 Moslem members of the Algerian Assembly. The members of the French Parliament who signed it (many of whom had supported a policy of integration in the past) included senators and deputies of the Socialist, U.D.S.R., R.G.R., M.R.P., Independent Republican, *Paysan*, Social Republican (Gaullist), and Dissident Gaullist (A.R.S.) parties.

The motion formally condemned "the blind repression which strikes at a considerable number of innocent people, applying the principle of collective responsibility to defenceless populations," and demanded "the immediate cessation of this repression and a return to a more healthy and normal conception of the rules of justice." "After analysing the deeper reasons for the present disturbances," the motion continued, "they [the signatories] solemnly affirm that these reasons are essentially political They are thus led to state that the so-called policy of integration, which has never been honestly applied despite the repeated demands of the representatives of the second college, is now out of date. The immense majority of the population has at the present time been won over to the idea of an Algerian nationality. As faithful interpreters of these desires, the undersigned representatives consider it their duty to direct their activities towards the realization of this aspiration." The signatories (who from their number were usually referred to as "the 61") announced, in conclusion, their decision to form a permanent committee to co-ordinate their political activities.

A second motion was adopted thanking the Roman Catholic bishops of Algeria and the Chief Rabbi of Algiers for their public statements, in which they had "recognized the necessity of respecting the dignity of the people of Algeria without distinction of origin." The Archbishop of Algiers and the three other Algerian bishops had previously issued a statement appealing for measures to alleviate the acute poverty existing in Algeria, for equal rights for all sections of the population, and for mutual understanding and friendly co-operation between the different communities.

In view of this development M. Soustelle cancelled the proposed session of the Algerian Assembly (for Sept. 27, 1955) on the ground that, as many members of the Assembly had been subjected to threats, his proposals could not be discussed in the necessary peaceful atmosphere. The allegation that they had been influenced by pressure or threats was, however, formally denied by "the 61" on Sept. 29. The representatives of the first college, on the other hand, adopted a motion on Sept. 27 criticizing the postponement of the session, denouncing "any idea of separatism," and affirming their "unshakeable determination to maintain French sovereignty in Algeria."

In opposition to the motion of "the 61," 21 other representatives of the second college—including two members of the Assembly of the French Union, two senators, five members of the National Assembly, and 12 members of the Algerian Assembly -issued a statement on Sept. 28 announcing their support for the policy of integration, and emphasizing the grave consequences which might arise from a refusal to discuss M. Soustelle's proposals.

When the Algerian Assembly met on Nov. 29, 1955, for its normal budget session, M. Soustelle's proposals were submitted to its legislative committee. The vice-chairman of this committee (M. Gator), however, announced on Dec. 1 that the members of the "61" group refused to discuss them, as the situation called for more radical measures than the "mere palliatives" suggested by the Government. M. Gator thereupon withdrew with other members of the group, and, in consequence, the proposals were not placed before the Assembly.

The Algerian Assembly adopted on Dec. 8, by 67 votes to 10 with four abstentions, a resolution demanding the postponement of the elections to the National Assembly, which had been fixed for Jan. 2, 1956. M. Mesbah, a member of the Algerian Assembly, stated on Dec. 9 that the "61" were opposed to the holding of elections because the internment of many nationalists, the suppression of the nationalist parties, limitations on freedom of speech, the press, and assembly, and the military operations then in progress, made it impossible to hold a free vote. The French Government decided on Dec. 11 to postpone the elections indefinitely (see 14577 A).

Resignations of Algerian Representatives.

Moslem members of the Algerian municipal councils resigned in increasing numbers from November, 1955, onwards, on the ground that the repressive measures in force had made normal political life impossible. On Dec. 22 the co-ordinating committee of "the 61" called on members of the group to remain at their posts to "defend the idea of Algerian nationality and the liberties of the Moslem population" and decided to send a delegation to Paris as soon as a new Government was formed to win support for a policy of "autonomy within interdependence." The moderate nationalist *Union Démocratique du Manifeste Algérien* (U.D.M.A.), however, appealed on the same day to all its supporters who were members of public bodies to resign their seats, and a large number of new resignations were announced during the following fortnight.

Among those who resigned were two members of the Assembly of the French Union (M. Lechani and M. Bentchichou) and three members of the Algerian Assembly (Dr Bensalem, M. Bayoud, and M. Abdelmajid). Dr. Bensalem also resigned his position as president of the Constantine general council, together with 19 other members of the council M. Justrabo, a Frenchman and the only Communist member of the Algerian Assembly, resigned on Jan. 7, 1956

M. Sayah Abdelkader, president of the Algerian Assembly, resigned both the presidency and his membership on March 18, 1956. In a letter to M. Lacoste, he stated that the policy of unity with France which he had pursued in the past had failed, and expressed his belief that "new men will soon arise to represent the population of Algeria." The "61" group, in a statement issued on March 20, declared that the Algerian Assembly and local councils could no longer serve the country's interests, and demanded their abolition, the recognition of Algerian nationality, and a political amnesty.

Algerian Policy of M. Faure's Government.

Political Policy. M. Soustelle submitted proposals for the complete integration of Algeria with France to M. Faure's Government on Jan. 11, 1956.

M Soustelle suggested (*a*) that the French National Assembly should issue a solemn declaration proclaiming the "equality of rights and duties" between Moslems and other French citizens, and (*b*) that the Government should undertake to put this principle into effect within a given period. This policy would involve the unification of the French and Algerian public services, and the raising of wages and social security benefits in Algeria to the same level as in France. The Governor-General would be replaced by a Minister for Algeria, and the Algerian Assembly would be abolished. Three groups of *départements* would be set up in Algeria, each being placed under an inspector-general or "super-prefect" as in France Parity of representation for the Moslem and European communities would be guaranteed in communes where the latter formed a certain percentage of the population The division of the electorate into two colleges would be abolished, and the number of Moslem representatives in the National Assembly would be greatly increased.

Military Policy. The French Government's co-ordinating committee for North Africa approved on Sept. 22, 1955, proposals by M. Soustelle for the formation of "pacification zones" similar to that already established in the Aurès region under the direction of General Parlange.

Under this plan, 300 officers with special knowledge of native language and customs would be sent to strategic areas where fortified administrative headquarters would be set up, and would be responsible for the pacification of their areas and for the improvement of social and economic conditions. Each would be accompanied by a military unit or a mobile police group; in addition, native self-defence units would be formed, equipped with cars and radio. A "pacification zone" was established throughout the Kabylie in January, 1956, after a mission headed by General Jacquot had reported on the military situation in Algeria and recommended a more flexible deployment of the security forces,

Social and Economic Policy. M. Faure's Cabinet approved on Oct. 19, 1955, four Bills dealing with agrarian reforms in Algeria, similar to those already submitted to the Algerian Assembly by M. Soustelle. Action on these measures was prevented, however, by the subsequent dissolution of the French National Assembly.

M. Abel Thomas, of the Ministry of Interior, was appointed Commissioner-General for the Industrialization of Algeria on Jan. 21, 1956. The formation of an industrialization commission had previously been proposed by M. Soustelle and approved by the Algerian Assembly.

Termination of State of Emergency.

The state of emergency in Algeria having been automatically terminated by the dissolution of the National Assembly on Dec. 2, 1955, the following decree was issued on Dec. 5: "The Governor-General and Prefects of Algeria will report to the Government within 20 days on the measures which the exceptional circumstances oblige them to take to assure the maintenance of public order, the safety of persons and property, and the maintenance of the integrity of the territory. The Minister of Justice, the Minister of the Interior, and the Minister of National Defence and the Armed Forces are entrusted, within their own spheres, with the execution of the decree."

M. Faure (then Prime Minister) explained (*a*) that a number of laws and decrees existed which allowed special police measures to be taken for the protection of persons and property and the repression of certain criminal acts; (*b*) that the Government had recognized the right of the Governor-General and Prefects to take such measures in the light of circumstances, the exceptional character of which had to be judged on the spot; and (*c*) that the responsible authorities were required to report to the Government in order to avoid abuse of their emergency powers. A decree issued on Dec. 6 stated that all persons interned under the state of emergency were "mobilized until further notice for public works."

Policy Statements by M. Mollet.

General Catroux was appointed Resident Minister for Algeria on Jan. 31, 1956, when M. Mollet's Government took office, but resigned on Feb 6 following the violently hostile demonstrations by the French population which greeted M. Mollet's arrival in Algiers on the same day. M. Robert Lacoste was accordingly appointed Minister Governor-General on Feb. 9. [For details of these developments see 14681 A.]

The ex-servicemen's committee which, together with Poujadist and student organizations, had been responsible for the Algiers riots, formed on Feb. 7 a "Committee of Public Safety" (*Comité du salut public*) to agitate for the following objectives: (1) stronger military measures against the insurgents, (2) the use of "all methods, including military methods," to end foreign [i.e. Egyptian] intervention in North Africa, (3) an unequivocal affirmation of French sovereignty in Algeria; (4) the abandonment of the Government's proposals for a single electoral register in Algeria. A demonstration organized by this body led to further rioting in Algiers on Feb. 10, as a result of which the Ex-Servicemen's Federation dissociated itself from its activities.

After visiting the disturbed areas in the Constantine *département*, M. Mollet returned to Paris on Feb. 11. In a report on the Algerian situation, presented to the National Assembly on Feb. 16, he gave details of the programme of political, social, and economic reforms which his Government proposed to introduce in Algeria.

Referring to the Algiers riots, M. Mollet expressed the opinion that many of the demonstrators had acted in good faith, but had been misled by extremists. His visit, however, had succeeded in dispelling much of the tension in Algeria The rebels' activities, he continued, were conducted primarily on a political and psychological level, and France's reply would remain inadequate so long as it was confined to military measures. "The military leaders themselves have told me that the Army can keep terrorism within bounds, but not eliminate it so long as it is supported by a considerable section of the population The Government will therefore take the measures necessary to ensure respect for law and order, but at the same time it will give the Moslems ground for hope, and will itself make use of political and propaganda weapons. To ensure the security and protect the lives of the Europeans and Moslems of Algeria is France's first duty, but it is not the solution of the Algerian problem. That lies on the economic, social, and political plane."

The average yearly income of the Moslems, M. Mollet pointed out, was 33,000 francs a head, compared with 208,000 francs a head for the European population Half the Moslem population was under 18, and it was increasing at the rate of 200,000 a year The Government's first task would therefore be to provide the necessities of life for the 1,000,000 unemployed, to open a system of credits to provide work for them, and to limit immigration. France would make "an immense financial effort" to provide equipment, to exploit Algeria's natural resources, and to promote industrialization. This programme would begin with investments in small-scale agricultural development, such as soil improvement and the provision of irrigation facilities, and would also include "a vast plan of agrarian reform." The minimum wage of agricultural workers, which varied in different districts between 340 and 427 francs a day, would be substantially increased, and the system of family allowances would be extended to cover farm workers.

Turning to the political situation, M. Mollet refuted the suggestion that the European population were all "colonialists," although, he said, they included a small selfish minority wielding great financial power which stood behind the [European] extremist organizations and "shock groups." The great majority of Europeans in Algeria, however, were not prepared to follow the extremists, and France must restore their confidence by guaranteeing them security. At the same time it was necessary to satisfy the political aspirations of the Moslem population "To both Europeans and Moslems," M. Mollet went on, "I solemnly declare once more that the union between metropolitan France and Algeria is indissoluble. The Government will fight so that France can stay in Algeria . . . To both Europeans and Moslems I solemnly declare that France recognizes and respects the personality of Algeria. To both Europeans and Moslems the Government solemnly announces that the form which this personality will take will not be decided unilaterally. It will result from free discussions with the genuine representatives of the population, chosen by free and controlled elections. We shall not choose those with whom we shall negotiate; they will be chosen by universal suffrage. One of the Government's first preoccupations will be to hold free elections as soon as possible. The Government will give priority to the election of deputies from Algeria to the National Assembly. It will then proceed to the renewal of the Algerian Assembly . . ."

M. Lacoste made his first report to the Government on Feb. 27, recommending that reinforcements should be sent to Algeria in view of the deterioration of the military situation and the doubtful loyalty of Moslem units. After a meeting of the French National Defence Committee on Feb. 28, at which differences on the conduct of the Algerian campaign were reported to have arisen between members of the Government and certain Army leaders, General Guillaume resigned his post as

Chief of the General Staff of the Armed Forces. General Zeller, Chief of Staff and Inspector-General of the French Army, had already tendered his resignation a week earlier. The appointment of General Ely, the former C.-in-C. in Indo-China, as Chief of the General Staff of the Armed Forces, of General Piatte as Chief of Staff of the Army, and of General Blanc as Inspector-General of the Army, was announced on Feb. 29 (see 14768 B).

In a broadcast on Feb. 28, M. Mollet appealed to the population of Algeria to end the fighting, and promised that free elections would be held within three months of the restoration of peace.

After reiterating that "France recognizes and respects the personality of Algeria," but that "Algeria is and will remain indissolubly linked with metropolitan France," the Prime Minister continued "The definitive future status of Algeria will be fixed by free discussion with the elected representatives of the Algerian population. It will assure to the Moslem community recognition and respect for their distinctive characteristics and their rights, and to the European community their legitimate share To both it will guarantee respect for their dignity as free men and equality of rights, and to all equal justice, whether it is a question of ensuring respect for law, political democracy, or social democracy . . . All the Government's actions are intended to make free elections possible, but they cannot be held until peace is restored . . To Algerians of European origin the Government declares: Your lives and those of your families, your property, and your rights will be respected . . . But the Government also expects you to accept its policy of progress and to co-operate in carrying it out, so that an equal division of resources, labour, and responsibilities with your Moslem brothers may be attained To all the Moslems of Algeria I repeat, in the Government's name, this solemn undertaking: the guns must be silent, and then free and fair elections will be organized within three months after the fighting and acts of violence have ended . . . France sincerely and generously offers you justice and equality. If, however, you were to reject them, if you were to allow the gap to be widened, if you were not to agree with us in preventing further crimes such as all religions and laws condemn—crimes against women, children, and the aged—France would be forced to mobilize all her resources to ensure the security of the population . . "

Debate on Emergency Powers Bill. - Vote of Confidence for M. Mollet.

An Emergency Powers Bill was introduced in the French Assembly on March 1, under which the Government was empowered (1) to legislate by decree on the development of Algeria's economy, agrarian reforms, the improvement of the Moslems' living standards and working conditions, and the reorganization of local administration; (2) to extend to Algeria the application of laws and decrees already in force in France; and (3) to "take any exceptional measures demanded by circumstances with a view to restoring order, protecting life and property, and safeguarding the territory." These powers would automatically cease when the existing Government ceased to be in power. The debate on the Bill, which the Government made a question of confidence, opened in the National Assembly on March 8.

M. Lacoste stated that since November 1954 the rebellion had spread until it now covered one-third of northern Algeria. Unity of action had been established among the rebel bands, which had increased in size from 20 to 200 men The number of casualties had risen from 30 in November 1954 to 285 in January 1956; these included 95 soldiers and police and eight European civilians, the remainder being Moslem civilians. The average number of attacks on motor-vehicles had risen from 20 a month in the summer of 1955 to 50 a month in the autumn and 86 in January, and the number of cases of sabotage from 1,000 in December 1954 to 1,500 in January 1956. Out of 1,500 farms owned by Europeans in the Constantine area, 300 had been destroyed. In an increasing number of villages the rebels had set up their own administration.

The restoration of order, M. Lacoste continued, could not be subordinated to any conditions, but, on the other hand, the organization of free elections and the introduction of reforms could not await the complete restoration of order To postpone these reforms would give Moslems the impression that France intended to enslave them by force to "the great colonialist interests for which their hatred is unlimited." The Government needed special powers to enable it to co-ordinate the political, administrative, military, and judicial measures necessary both for the restoration of order and the introduction of reforms Since the dissolution of the previous Assembly and the consequent termination of the state of emergency, acts of terrorism had increased from 1,200 in December to 1,803 in January. As the authorities no longer had the right to search houses by day or night, they could no longer control the movement of weapons A stronger press and radio censorship was necessary, and normal juridical processes were inadequate to ensure security.

The Algerian peasantry, M Lacoste said, were conscious of their poverty, and many of them were "prepared to die fighting because they could no longer live by working." The law reserving certain municipal posts for Moslem ex-servicemen was not being enforced, and it was untrue to say that Moslems and Europeans had equal access to public employment. The Bill, however, would enable more Moslems to be employed in public administration It was also necessary to raise the wages of agricultural workers and to improve the social services, but the major problem of raising the living standards of a population which was increasing by 200,000 a year could be solved only by a comprehensive economic plan. The Government intended to end the exploitation of tenant-farmers, and to facilitate the establishment of peasants on the land by the expropriation of large estates. Irrigable land which was left uncultivated would be handed over to unemployed *fellahs* if it was not brought under cultivation. Plans for the establishment of oil refineries and an automobile industry were being studied, and prospecting for minerals was in progress. Local government would have to be transferred to the elected representatives of the people, although the application of the French system to all Algerian communes, many of which were impoverished villages, would be very difficult; some towns could immediately receive the same status as French communes, whilst in other areas "rural centres" would be set up. "Some maintain that the time for reforms is past," M Lacoste concluded. "That is the excuse of those who wish to do nothing. What is past is the time for promises. What has arrived is the time for firm and rapid action."

M. Mamadou Dia (Overseas Independent), a Moslem deputy for Senegal, said that the policy of administrative reforms was out of date, as the great political issue was now Algerian nationalism. The Government, he suggested, should grant Algeria a large measure of autonomy, an Algerian Assembly elected by universal suffrage on the basis of a single electoral register, and an Algerian executive, and should negotiate a new status for Algeria whereby it would become "a State integrated into the French Republic."

M. Soustelle declared that the loss of Algeria would be "a national disaster comparable to Sedan or June 1940." It would mean that France would cease to be a great Power, and would no longer be able to remain in Dakar and Brazzaville Accusing Egypt of being the centre of an "anti-French conspiracy," he stated that instructions and money regularly reached the insurgents from Cairo, where a three-man committee (Ben Bella, Bou Diaf, and Messas) directed the Algerian uprising with the assistance of Egyptian officers The rebels' arms were largely of local origin or came from the black market, but U.S. and British material was also reaching them from Egypt. He himself had seen a receipt, signed by an insurgent leader, thanking Colonel Nasser (the Egyptian Premier) for a consignment of American machine-guns and British rifles, and also a message from Ben Bella bearing the words "done on the instructions of Big Brother"—whom the insurgents understood to be Colonel Nasser. Arms were sent through Libya, and meetings of insurgent leaders were held in that country with the Libyan Government's approval; in November 1955 seven tons of arms sent through the Fezzan had been intercepted. Ben Bella and Bou Diaf also made frequent visits to Spanish Morocco, where recruiting was carried on. This conspiracy—which, M. Soustelle said, aimed at replacing the "Paris-Algiers-Brazzaville axis" by a "Cairo-Morocco axis"—endangered the policies of both France and her allies.

M. Lejeune (State Secretary for the Armed Forces) gave an assurance that the troops in Algeria, which numbered 200,000, were being steadily reinforced. It was necessary, however, for the Army, which had been supplied with heavy equipment in preparation for a possible conflict in Europe, to recover its mobility in order that it might penetrate rural areas, some of which had not been visited by a Frenchman for 10 years. Aircraft would also play a greater part in reconnaissance and the protection of convoys, and for this purpose helicopters would be supplied by France's allies.

M. Maurice Schumann (M.R.P.) expressed the opinion that the insurgents would ignore M Mollet's appeal, because those who inspired them from Cairo were determined to fight to the end and aimed at the formation of "an immense Arab empire" Deprecating demands which had been put forward for the breaking-off of diplomatic relations with Egypt, he observed that "Egypt has become too accustomed to being wooed by the United States—especially since the Soviet Union made eyes at her—for representations from France alone to make any impression." M Schumann urged that Britain, the U.S.A., and France should make it clear to Egypt that intervention in North African affairs was irreconcilable with neutrality, and should "extend the Atlantic community by a Mediterranean community."

M. Guyot (Communist) appealed for the opening of negotiations with the Algerian insurgents. He maintained that it was possible, "if we recognize Algeria's national claims, to make that country an ally and a friend of France inside a French Union founded on equality of rights between the peoples composing it."

M. Mollet emphasized that the Algerian problem was unlike any other, and that the solution must therefore be different from those in Indo-China, Tunisia, or Morocco. Two distinct communities lived in Algeria, both numerically important and economically interdependent. The great majority of the 1,000,000 Europeans were workers born in Algeria, who meant to stay there because they would feel like exiles anywhere else The 8,000,000 Moslems had never formed a nation but were closely united by their religion, every day they were becoming more united, some under the influence of propaganda, others because they felt that France had denied them equality of rights. M. Mollet declared: "I must plainly tell those who make the restoration of order the only objective, a sort of precondition for all reforms, that if you offer only a military reply, combined with promises for the distant future, to the great majority of Moslems who today are still seeking anxiously for reasons for hope, you will make them think that the handful of extremists are right . . . We shall not democratize Algeria unless we are strong and resolute, but we shall not keep Algeria unless we abandon our conservatism."

Continuing, M Mollet said that everyone agreed that the links between Algeria and France must be preserved, but not all agreed how this should be done "Some say it is simple, Algeria is a French province Others, on the contrary, believe that it is necessary to recognize the fact of Algerian nationality by granting independence, and then to discuss the links of interdependence As a democrat and a Socialist, I can imagine no finer task for France than to transform all the inhabitants of Algeria into free and equal French citizens of a just and fraternal republic France, perhaps because of certain Frenchmen in Algeria, has been unwilling or unable to do so. Today the truth can no longer be concealed Because it contains 8,000,000 unassimilated Moslems, Algeria is not a French province like Artois or Normandy At the same time, because it contains 1,000,000 Frenchmen of metropolitan origin, it cannot be a Moslem national State We completely reject the idea of an Algerian State, which does not correspond to any reality"

M. Mollet said that one-fifth of the French Army was already in Algeria, and that an increasing number of conscripts would be sent there every day. The security of the European population would be assured, but the tiny majority of large property-owners would have to renounce their privileges, if they refused, the Government would use its emergency powers to force them to do so. Fundamental reforms would be introduced immediately wherever possible, but at the same time "our enemies will be made aware of the presence of the French Army."

M. Bidault (M R P.) declared that his party would vote for the Bill, although the Government's concessions in Morocco and Tunisia did not inspire confidence in its Algerian policy He demanded that, as its appeal to the insurgents had produced "no response except more murders," the Government should put an end to its "indulgent attitude towards crime"

M. Paul Reynaud (Independent) gave warning that if the next few weeks were wasted almost all the Algerian people would turn against France, and demanded an "immediate and massive military action" He criticized the proposal for a single electoral register, and called for "equal rights for each of the two communities" in Algeria

M. Daladier (Radical) deprecated all talk of negotiations, but appealed to the Government to pursue its policy of reforms concurrently and with the same energy as the task of pacification

M. Duclos (Communist) said that his party favoured the "existence and permanence of political, economic, and cultural links between France and Algeria," but that it was necessary to "recognize Algerian nationality as a fact," to negotiate a cease-fire, and to end repressive measures

The Bill was adopted on March 12 by 455 votes to 76, being supported by the Socialists, Communists, U.D.S.R., R.G R (the dissident Radicals under M. Edgar Faure), and Overseas Independents, and by the majority of the Radicals, M.R.P., Social Republicans, Independents, and *Paysans*. The opposition comprised 48 Poujadists, 21 Independents, one Radical, one M.R.P. deputy, one Social Republican, two *Paysans*, and two *non-inscrits*. The Council of the Republic approved the Bill on March 16 by 288 votes to six—three Independents, two *Paysans*, and one R.G.R. member.

Issue of Emergency Decrees.

On the basis of the Emergency Powers Act, the French Cabinet approved on March 17 a series of decrees, details of which are given below.

Emergency Powers of Governor-General. M Lacoste, in his capacity as Governor-General, was empowered to forbid all traffic in any given area, to regulate or forbid the import, export, sale, or transport of any commodity; to regulate or forbid residence in certain zones; to order anyone sheltering a person not a member of his family to report the fact, to control the movement into or out of Algeria of any person, French or foreign; to assign an obligatory residence to any person, to forbid public or private meetings likely to cause disorder, to close any hall, café, shop, or other public meeting-place, to order the registration or removal of arms and explosives, to authorize house searches by day or night, to censor the Press, publications, broadcasts, films, plays, and telegraph and telephone messages, to suspend any official; to dissolve any organization, to carry out requisitions, to order any persons who had damaged public or private property to repair it; to order ships in Algerian harbours to be searched, to postpone by-elections, to suspend members of public bodies; to transfer to a commission the powers of public bodies more than half the members of which had resigned; to transfer the powers of mayors to his own nominees; to delegate to the Prefects the powers granted to himself; to transfer police powers in a given area from the civil to the military authorities, and to punish breaches of orders issued under the decree by imprisonment from one week to two years and/or fines of 5,000 to 2,000,000 francs.

Powers of Military Courts. Military courts were empowered to deal with the following offences, if committed after Oct 30, 1954 · crimes against the security of the State, armed rebellion, illegal possession of arms, murder, assault, kidnapping, rape, arson, and robbery. The military authorities might order the immediate trial by a military court of persons arrested in the act of committing crimes against persons or property and found to be in possession of arms or explosives. Any member of the armed forces deserting to the insurgents with his arms would be liable to the death penalty.

Command of the Armed Forces. The Supreme Military Commander in Algeria would be General Lorillot, under whom would be the Commanders of the Algiers, Oran, and Constantine military areas, the General Commanding the Southern territories, and the Commanders of the 7th Mechanized Division and the 5th Armoured Division, whose transfer from Western Germany to Algeria had been decided upon by the Government

Recruitment of Moslems for the Public Service. For a period of 10 years, the age-limit for admission to the public services would be raised by five years for Moslems Until Dec 31, 1960, Moslems who did not possess the normal qualifications might be admitted into the public service on trial, and a certain proportion of vacancies (to be fixed each year by the Governor-General) would be reserved for Moslems. This proportion was subsequently fixed at 50 per cent

Agricultural Wages. The wages of agricultural workers would be raised as from March 26

M. Lacoste issued an order on March 20 under which no Frenchman or foreigner might enter Algeria without an official pass. Large numbers of Algerian workers had left France during the preceding weeks to join the insurgents, especially since the Algiers riots of Feb. 6; according to statistics published by the Ministry of the Interior, 8,576 had left by sea during February (as compared with 4,217 in February 1955) and 2,177 during the week March 1-6. A similar increase was recorded in the number leaving by air.

During M. Lacoste's absence in France strong feeling was aroused in Algeria over the question of those insurgents (numbering over 60) who had been sentenced to death, but none of whom had yet been executed. The "Co-ordinating Committee for the Defence of French Algeria" (an unofficial body including many mayors) had threatened on March 14 to call an administrative strike if none of the sentences had been carried out by March 21, to which the insurgents replied on the following day by threatening to kill two French officers for every nationalist executed After a meeting on March 19 between M. Lacoste and the "Co-ordinating Committee," at which he gave an assurance that vigorous measures would be taken against terrorism and that sentences passed by military courts would be carried out immediately, the Committee agreed to call off the proposed strike.

Administrative, Economic, and Social Reforms.

Seven decrees providing for economic and social reforms in Algeria were published on March 27. These laid down (1) that at least half the new employees recruited by public undertakings —such as the gas and electricity services and the railways— should be Moslems; (2) that a consultative committee should be set up to study, encourage, and co-ordinate measures for the redistribution of landed property; (3) that an agricultural bank (*caisse*) should be set up to grant loans and credits to small farmers receiving land under the reform, these credits to be repaid over a maximum period of 25 years; (4) that rents payable by farmer-tenants in kind should not exceed half the total crop; (5) that uncultivated land might be expropriated in whole or part; (6) that the existing agricultural credit institutions should be unified. These decrees were followed on April 26 by another providing that no-one should own more than 50 hectares (about 125 acres) of irrigable land, and that any land held in excess of that limit could be expropriated by a simple administrative decision and placed at the disposal of Moslem peasants, who would be eligible for long-term loans.

The Algerian Assembly was dissolved, and its powers provisionally transferred to M. Lacoste, under a decree published on April 13. M. Chaussade (Prefect of the Marne *département*) was appointed Secretary-General to the Governor-General's office on April 24, whilst M. Papon (formerly Secretary-General for Morocco) was appointed Prefect of Constantine (a post he had previously held from 1949-51) and Inspector-General for the Bône and Constantine *départements*. M. Cutloli and M. Dupuch, the retiring Secretary-General and Prefect of Constantine respectively, were both closely associated with M. René Mayer, the former Radical Premier, who had frequently acted as spokesman in the National Assembly for the right-wing Algerian settlers.

M. Mollet discussed the significance of these measures in relationship to the Government's general policy in a speech to press representatives on April 13.

Military measures, said M. Mollet, formed only part of "a vast political, economic, and social programme for the peaceful solution of the Algerian problem" His appeal to the rebels to surrender still held good; where necessary the Government would authorize local contacts with them, and those who agreed to a cease-fire would be protected by guarantees, provided they were not guilty of crimes. The military effort would in any case not lead to a return to the situation existing before the rebellion, as the Government had proved by its administrative and social measures The Algerian Assembly had been dissolved because, with the resignation of many of its members, it had ceased to be representative. The Government's agrarian reform decree would affect 400 large landowners and would make tens of thousands of hectares available for redistribution. The

Government were also studying proposals for an old-age pension scheme for the Moslem population. As a result of this policy, M Mollet claimed, the extremist minority had lost its influence among the Algerians of European origin, and hope was being reborn among the Moslems.

The dissolution of the Algerian Assembly led to strong protests from the members of the first college and from the Federation of Algerian Mayors. A section of the European students of Algiers University went on strike on May 4 as a protest against the proposal to increase the number of Moslem civil servants, the Moslem students retaliating on May 19 with a counter-strike. On May 22 the Moslem Students' Association issued an appeal to all its members to abandon their studies and join the insurgents.

M. Fehrat Abbas joins National Liberation Front.

A major political sensation was caused by the arrival in Cairo on April 21 of M. Fehrat Abbas, president of the *Union Démocratique du Manifeste Algérien* (U.D.M.A.), which was described in the French Press as "a turning-point in the history of the rebellion."

M. Fehrat Abbas, the most prominent Moslem member of the Algerian Assembly, had at one time supported a policy of complete assimilation of Algeria to France, since 1943, however, he had advocated the establishment of an autonomous Algerian republic federated to France, and in recent interviews with M Lacoste had emphasized the necessity of recognizing Algerian nationality. He was accompanied on his arrival in Cairo by Dr Ahmed Francis, a member of the U D M A executive, Sheikh Ahmed Tawfik El Madani, general secretary of the association of *ulema* (Moslem religious teachers), and Sheikh Abbas, a member of the council of the association All four were received on their arrival by M Khidder, the political leader of the "National Liberation Front," and M Ben Bella, C.-in-C. of the "National Liberation Army"

At a press conference in Cairo on April 25, M. Fehrat Abbas announced his own and his party's adhesion to the National Liberation Front. He added:

"The French leaders ask with whom they can negotiate We reply—undoubtedly with the men of the National Liberation Front, who are fighting for the freedom of their people . . All the forces struggling for the liberation of North Africa are united under a single command Henceforward there are no more political divisions or parties in Algeria . . . There will be neither peace, nor truce, nor armistice, but only an intensification of the struggle which the French have forced on us, until the colonialist forces and the mercenaries of the French are destroyed or evacuated . . We are ready to negotiate with France in the name of the Algerian National Front. We lay down one condition only for negotiations—France must recognize the existence of an Algerian nation"

M. Kiouane, leader of the right-wing group which broke away from the Movement for the Triumph of Democratic Liberties (M.T.L.D.) in 1954, also arrived in Cairo on April 26. The adherence of these political leaders meant that only the left-wing of the M.T.L.D. (less M. Messali Hadj)—now calling itself the Algerian National Movement—and the Communists remained outside the National Liberation Front.

Police Measures.

A number of French journalists and other individuals were arrested during the period under review on charges of attempted demoralization of the armed forces or establishing unauthorized contacts with the insurgents, whilst several persons, both of right-wing and left-wing views were expelled from Algeria.

M Robert Barrat, formerly general secretary of the Catholic Centre of French Intellectuals, who had met and interviewed the insurgent leader Bou Amrane and had published a report of their meeting in the left-wing weekly *France-Observateur*, was arrested on Sept. 26, 1955, and charged with "non-denunciation of crimes compromising the internal and external security of the State", he was, however, released on the following day M Claude Bourdet, editor of *France-Observateur*, was arrested on March 31, 1956, and charged with attempted demoralization of the Army, but was granted bail in view of his distinguished record in the Resistance movement M. de Maisonseul, head of the town planning department in Algiers, was arrested on May 27 on a charge of establishing contacts with the insurgents with a view to opening negotiations. Similar proceedings had been initiated against Professor Mandouze, of Algiers University, who had settled in France after right-wing students had sacked his house as a protest against his views

Mlle. Claude Gérard, who played a distinguished role in the French Resistance movement as commandant of the *maquis* in the Dordogne, was arrested on May 29 on a charge of endangering the external security of the State Mlle Gérard, who had spent 10 days with units of the Algerian National (i e. the Messalist) movement, had reported her experiences in an article in *Demain* (a weekly) in which she drew a close parallel between the Algerian resistance to the French and the French resistance to the Germans; although it was originally proposed to try her in Algiers, it was announced on June 2 that the trial would take place in Paris

Father Augros, a priest of Soul-Ahras, and his two curates were expelled from the *départements* of Bone and Constantine on April 24. The three priests had co-operated closely with members of the Moslem community, including prominent nationalists, in their charitable activities, and had issued a statement which, while condemning all forms of terrorism, had appealed to Christians to work for the removal of the political and social injustices responsible for the uprising Another priest, the Abbé Berenguer, was expelled from the Oran *département* on May 5 for "activities liable to disturb public order."

The expulsion from Algeria of two alleged right-wing agitators—M. Boyer-Banse, president of the French North African Union, and Professor Bousquet, of Algiers University—was ordered by M Lacoste on May 9

A force of 7,500 soldiers and police carried out a house-to-house search of the Kasbah (the densely-populated Moslem quarter of Algiers) on May 27, during which 4,731 suspects were arrested. The police subsequently claimed to have seized large quantities of arms, ammunition, explosives, uniforms, and documents.

Nationalist Trade Union Federations.

The formation of two new Algerian trade union federations under nationalist leadership was announced on Feb. 20 and March 2 respectively—the *Union des syndicats des travailleurs algériens* (U.S.T A) and the *Union générale des travailleurs algériens* (U.G.T.A.), both of which applied for membership of the International Confederation of Free Trade Unions. The former of these was supported by the "Messalist" Algerian National Movement, and the latter by the National Liberation Front. The U.G.T.A. claimed in May that it had been joined by 50,000 Moslem members of the Communist-led General Union of Algerian Trade Unions (U.G.S.A.).

M. Lacoste ordered on May 9 the expulsion from Algeria of M. Goumis, an Algerian union leader who was accused of "entering into relations with U.S. special services in order to create an anti-French trade union," and of Mr. Irving Brown, a U S. trade union official who had assisted in the formation of both the new unions.—(Le Monde, Paris - Le Figaro, Paris)

(Prev. rep. Political Developments, 14681 A; State of Emergency in Algeria, 14577 A.)

A. UNITED KINGDOM. — Defence Policy. - Appointment of Director-General of Atomic Weapons.

It was announced by the Ministry of Supply on March 27 that Mr. E. S. Jackson had been appointed Director-General of Atomic Weapons as from April 1—a new post to be established when Lieut.-General Sir Frederick Morgan ended his term of office as Controller of Atomic Weapons.

The statement recalled that when the Atomic Energy Authority had been set up in January 1954, the responsibilities of the Ministry of Supply in this field had become limited to trials and the supply of nuclear weapons for the Services General Morgan had then been asked to continue to direct this work as Controller of Atomic Weapons, but "in the light of the progress made and experience gained in the past two years" it had now been decided to integrate these responsibilities more closely with the work of the Controllers of Aircraft, Munitions, and Guided Weapons

Mr. Jackson (46) was Director-General of the aircraft branch of the Allied Control Commission in Berlin in 1945.

B. NEW ZEALAND. — Salary Increases for State Employees. - New Salary Scales.

A new scale of increased salaries for State employees was announced by the New Zealand Prime Minister, Mr. Holland, on May 5 The increases were: (*a*) from £15 to £80 on salaries up to £1,220 a year, (*b*) from £80 to £240 on salaries up to £1,960, and (*c*) from £275 to £410 on salaries above £1,960 (subject to parliamentary appropriations).

Mr Holland explained that the increases were aimed at bringing State service salaries into line with salaries outside; at providing adequate margins for responsible positions; and at providing scope for the recognition of professional training and specialized knowledge.

The increases, affecting 125,000 employees and costing some £NZ.4,000,000 a year, came into retrospective effect from April 1, 1956. (Directorate of Information Services, Wellington)

C. UNESCO. — New Members.

The U.N. Educational, Scientific, and Cultural Organization (Unesco) announced on May 23 that Bulgaria had become the 75th member of the Organization, having deposited her formal adherence on May 17. Paraguay (the 73rd member) had formally assumed membership on June 28, 1955, and Ethiopia on July 4, 1955.

Monsignor Pirozzi, of the Vatican State Secretariat, was nominated by Pope Pius XII on June 27, 1955, as the Holy See's permanent observer to the Organization. (Le Monde, Paris)
(Prev. rep. 14084 A.)

A. FRANCE - INDIA. — De Jure Transfer of Former French Settlements to Indian Sovereignty.

A treaty formally ceding to India the former French settlements of Pondicherry, Karikal, Mahé, and Yanaon (Yanam) was signed in New Delhi on May 28 by Mr. Nehru, in his capacity as Minister of External Affairs, and by Count Ostrorog, the French Ambassador.

The treaty, which superseded the agreement of Oct. 21, 1954, under which the settlements had been transferred *de facto*, consisted of 31 Articles and an annexe, its principal provisions being as follows:

(1) "France cedes to India in full sovereignty the territory of the Settlements of Pondicherry, Karikal, Mahé, and Yanaon (Yanam)."

(2) The Settlements would retain the benefit of the special administrative status which was in force prior to the *de facto* transfer in November 1954, and any future constitutional changes would be made only after ascertaining the wishes of the inhabitants.

(3) French nationals born in the Settlements and domiciled there at the date of the treaty becoming operative would become nationals and citizens of the Indian Union, unless they chose to retain French nationality by means of a written declaration made within six months of the treaty coming into force. Provision was made for children under 18 to change, within six months of reaching their 18th birthday, the nationality chosen by their parents.

(4) The Government of India would take over, with safeguards for conditions of service, remuneration, pensions, etc., all civil servants employed in the Settlements, except those belonging to the French Metropolitan Civil Service.

(5) The Government of India would take over from the French Government all the Administration's credits, debts, and deficits, and would repay to the French Government the full amount of French Treasury loans and advances made to the Settlements.

(6) Persons retaining French nationality would enjoy freedom of residence, movement, trade, profession, etc.

(7) French nationals and businesses could freely repatriate capital and property to France within ten years from Nov 1, 1954.

(8) All provisions guaranteeing the freedom of religion and religious bodies which were in force before the transfer would be respected by the Indian Government. Religious institutions would continue to function as hitherto, and would have the right to own their properties.

(9) The *Collège Française de Pondichéry* would continue in its present premises as a French educational establishment. The French Government would remain in charge of its administration and teaching, and would continue to own the premises.

Private French educational institutions in existence on Nov. 1, 1954, would be maintained They would continue to impart French education, receive the subsidies and other facilities hitherto enjoyed from the local authorities, and be permitted to receive aid from France.

(10) Existing French scientific and cultural institutions would likewise continue to function, and facilities would be granted by agreement between the two Governments for the opening of similar institutions in future

The French Institute of Higher Studies at Pondicherry (inaugurated in March 1955—see 14126 A) would continue to be owned and maintained by the French Government as a research and advanced educational establishment. The Government of India would provide facilities to further its activities.

(11) The equivalence of French diplomas and degrees would be recognized by the Indian Government for admission to higher studies and administrative careers in India.

(12) French would continue to be the official language of the Settlements until such time as the elected representatives of the population decided otherwise.

(13) The French Government retained the custody of all records of historical interest, while transferring to the Indian authorities such records as were required for purposes of administration.

(14) The treaty would become effective on ratification by both countries.

Immediately after its signing, Mr. Nehru presented the treaty to Parliament. In a brief speech he expressed "high appreciation" of the French attitude throughout the negotiations which followed the *de facto* transfer of the Settlements to Indian administration 19 months ago, and added: "Thus far, results have not been achieved in regard to the Portuguese settlements. Nevertheless, the process of completing the political unity of India proceeds apace; and I have no doubt the time will come when it will be my privilege to report to this House that the Portuguese establishments have also been transferred to the Indian Union."

Chandernagore, the fifth former French Settlement in India, had already been transferred *de jure* to the Indian Government in 1952.—(Le Monde, Paris - The Hindu, Madras)

B. DENMARK. — New Defence Minister.

Hr. Rasmus Hansen, the Danish Defence Minister, resigned on May 23 for reasons of health and was succeeded by Hr. Poul Hansen, chairman of the Social Democratic Party.

(Berlingske Tidende, Copenhagen) **(Prev. rep. 14439 B.)**

C. NORTHERN RHODESIA. — New Copper Mine.

The Chibuluma copper mine, near Kitwe, was opened by the Governor-General of the Federation of Rhodesia and Nyasaland (Lord Llewellin) on May 5.

The mine, which is owned by the Rhodesian Selection Trust group, is the first to go into production in the Northern Rhodesian copperbelt since just before the outbreak of the Second World War. It will produce 16,000 tons of copper and 500,000 lb. of cobalt annually when fully working The copper concentrate will be smelted at Mufulira, another mine of the group, and the cobalt concentrate will be treated at a plant now being built by Chibuluma Mines Ltd. at Ndola. The cost of building and equipping the new mine was about £6,000,000, of which £5,000,000 was obtained through a loan from the U S. Government under the European Recovery Programme

Mr. R. L. Prain, chairman of the Rhodesian Selection Trust, announced on May 22 that his group planned to open a new copper mine at Chambishi and to increase production at the Mufulira mine by up to 50 per cent, making it the largest copper mine in the Federation and one of the largest in the world. The implementation of these schemes, he said, would be dependent upon the completion of the Kariba scheme and the assurance of adequate rail facilities.

The Chambishi mine was one of the earliest copper deposits discovered in the Copperbelt in 1902, but preparatory work was abandoned in the 'thirties. The copper production of the Mufulira mine totalled 83,193 long tons in 1954-55.

D. WESTERN GERMANY. — Growth of German Branches and Investments Abroad.

The Federal Ministry of Economics announced on May 18 that permits for the setting-up of branches and for the acquisition of capital investments abroad by West German industrial and commercial firms totalled 937,432,800 Deutschemarks during the period Feb. 1, 1952 to March 31, 1956. The total, showing the growing tendency of West German undertakings to extend their activities abroad, was divided as follows: 1952, 27,066,700 DM.; 1953, 130,888,500 DM.; 1954, 200,561,700 DM.; 1955, 436,088,500 DM.; 1956 (first quarter), 142,827,400 DM.

The largest German investments were made in Brazil (175,541,000 DM.), Canada (110,054,900 DM.), the franc area (101,742,900 DM.), the U.S.A. (96,148,300 DM.), Argentina (61,192,300 DM.), Switzerland (49,303,900 DM.), Spain (33,363,800 DM.), South Africa (25,338,600 DM.), Egypt (19,525,600 DM.), Italy (18,077,900 DM.), India (15,177,600 DM.), and Turkey (15,160,800 DM.).

(Federal Government Bulletin, Bonn)

E. SOUTH AFRICA. — New High Commissioners to Britain and Rhodesia-Nyasaland Federation.

The Union Minister for External Affairs (Mr. Louw) announced on May 29 that Dr. J. E. Holloway, South African Ambassador in Washington, had been appointed High Commissioner in London in succession to Mr. G. P. Jooste, who would become secretary of the Department of External Affairs.

Mr. Robert Kirsten, head of the international and economic trade division of the Department of External Affairs, had been appointed High Commissioner to the Federation of Rhodesia and Nyasaland on Jan. 25 *vice* Mr. T. H. Eustace, who became South African Ambassador in Rio de Janeiro.—(Cape Times)

(Prev. rep. 13552 B.)

F. RUMANIA. — Population Census.

The results of a census held on Feb. 21, 1956, published on May 7, showed the population of Rumania as 17,489,794, an increase of 1,617,714 since the last census in 1948. Bucharest, the capital, had a population of 1,236,906, the other leading cities being Cluj (154,752), Timisoara (142,251), Stalin (formerly Brasov) (123,882), Ploesti (114,560), Jassy (112,989), Arad (106,457), and Braila (102,491). The urban population comprised 31.3 per cent of the total, compared with 28.4 per cent in 1948.—(Agerpres, Bucharest)

(Prev. rep. 1948 Census, 9323 G.)

G. SUDAN. — Security Council approves Sudanese Application for U.N. Membership.

An application by the Sudan for membership of the United Nations was unanimously approved by the Security Council on Jan. 31, 1956. The General Assembly will vote on the application at its forthcoming eleventh session.

(United Nations Information Centre, London)

A. IRISH REPUBLIC. — Population Census. - Decline in Population as Result of Emigration. - Report of Commission on Emigration and Population Problems. - Recommendations for National Population Policy.

Provisional figures of a census taken on April 8-9, published in Dublin on June 1, showed that the population of the Irish Republic was 2,894,822—a decline of 65,771 since the last (1951) census, and the lowest figure ever recorded.

The returns showed that the natural population increase (i.e. the excess of births over deaths) during the inter-censal period (1951-56) was 134,623, the highest since 1881. Nevertheless, this was more than counter-balanced by a record increase in emigration during the same period, amounting to 200,394 and resulting in a net population decline of 65,771. Of the 200,394 persons who emigrated—an average of 40,079 a year—109,221 were males and 91,173 were females, whereas in the previous five-year period the figures were 50,552 males and 69,016 females—a total of 119,568. The net emigration of males was therefore more than doubled, while the net emigration of females increased by about one-third. The annual rate of emigration had risen from 8.2 per 1,000 in 1946-51 to 13 7 per 1,000 in 1951-56.

Statistics from the report are given below, referring to the five-year period 1951-56 .

	Males.	Females.	Total.
Births . .	160,333	152,137	312,470
Deaths .	95,612	82,235	177,847
Natural increase (excess of births over deaths)	64,721	69,902	134,623
Decrease in population	44,500	21,271	65,771
Net emigration (emigrants less immigrants)	109,221	91,173	200,394

The report pointed out that the natural increase of population had shown a substantial rise during the past 30 years, being 9.2 per 1,000 annually in the period 1951-56 compared with 5 5 per 1,000 in the ten years 1926-36. Up to 1951, net emigration was at such a level as to be almost exactly equal to the natural increase, and there was accordingly little change in the total population. " Between 1951 and 1956, however (the report continued), despite the fact that the natural increase was about one-and-three-quarters the level in 1926-36—and, in fact, was the highest recorded since 1871—the rate of net emigration was so great that the decline in population amounted to 4.5 per 1,000, a rate not exceeded during this century "

Population declines were registered in all four provinces, though the population of Leinster remained practically stationary at 1,336,397—a decline of only 84 Of the other three provinces, Munster had a population of 876,620, a decline of 22,345 (2 5 per cent); Connacht (Connaught) of 446,008, a decline of 25,887 (5 5 per cent); and Ulster (i e those counties of Ulster in the Republic) of 235,797, a decline of 17,455 (6 9 per cent) The population of the City of Dublin was 537,878 (a decline of 13,274) and of Dun Laoghaire 47,355 (a decline of 565) Dublin County, on the other hand, increased its population by 13,274 to 118,257, the rise being attributable partly to boundary changes

With the exception of Dublin County, Counties Louth and Meath, and the county boroughs of Limerick and Waterford, all other areas showed decreases in population. The greatest declines were in Counties Leitrim. Donegal, Cavan, Roscommon, Mayo, Sligo, Monaghan, and Clare

The unfavourable demographic situation facing the Irish Republic as a result of increasing emigration, brought out in the census returns, had been stressed in a report published two years earlier (July 12, 1954) by a " Commission of Emigration and other Population Problems " appointed by the Eire Government. The report is summarized below under cross-headings :

Terms of Reference. These were · " To investigate the causes and consequences of the present level and trend in population; to examine in particular the social and economic effects of birth, death, migration, and marriage-rates at present and their probable course in the near future; to consider what measures, if any, should be taken in the national interest to influence the future trend in population; and generally to consider the desirability of formulating a national population policy "

The Demographic Background. The report said that while in other countries population had increased considerably, in Ireland it had remained stationary for 25 years as a result of large-scale emigration. Moreover, the sex-distribution of the population was unbalanced, with a marked excess of females in urban areas and of males in rural areas; the proportion of elderly people in the population was high by international comparison; the marriage-rate in the Republic was one of the lowest in the world; an exceptionally high proportion of the population never married; and family size and fertility were declining, though the fall had not approached the point where the population was not reproducing itself. Finally, the Republic lost every year through emigration a number of people roughly equivalent to one-third of the annual number of births.

This demographic background (the report continued) tended to retard progress and to induce in the minds of many an attitude of " helplessness and hopelessness." The report commented in this connexion : " Industrially, commercially, and in the domain of public utilities, social services, and amenities, our achievements and potentialities are those of a small and—except in Dublin and other urban areas—a thinly-distributed and declining population." Nevertheless, the Commission expressed the opinion that " our geographical position, our soil, and our natural and human resources are not such as to condemn us to a demographic position so unlike that of other countries."

Population Policy. In a chapter dealing with population policy, the report pointed out that population trends, especially those affecting marriage and births, were not " the inevitably determined result of forces beyond human control" but " depended primarily on the deliberate free decision of individual citizens." It added . " Our present population problems are so acute, and the under-development of resources so marked, that policy should be concentrated on creating the conditions for the maximum possible increase in population within the foreseeable future. We think there is no reason to fear that this short-term policy need, within this century at any rate, produce a predominantly urban population similar to that of some highly industrialized, overcrowded European countries . . . "

Giving estimates and assumptions about future population, the report said that, given no emigration, the population in 1986 would be 4,663,100. With the present rate of emigration and present fertility, the population in 1986 would be 2,889,500; with a decreasing emigration rate, 3,694,600 ; and with an increasing rate of emigration, 2,780,700. With increasing fertility and no emigration, there would be an estimated 5,639,500

The Marriage-Rate. In a special section, the report said that Ireland's low marriage-rate over such a long period " has had an unfavourable effect on the outlook of young people, and has contributed to discontent, unsettlement, and emigration. Unmarried people, having fewer ties or responsibilities than married people, can more easily leave their surroundings, and respond more readily to the attractions (including the more favourable marriage prospects) of other countries . . In rural areas, and especially in the West, girls find few opportunities for remunerative employment The men have little prospect of employment either ; but in each farming family, responsibility for his parents prevents one son at least from emigrating, even though he may consider the holding insufficient to support a home. In such a setting girls are attracted towards emigration They may not realize that the poor marriage prospects enter deeply into their decision to emigrate, but it is the opinion of the Commission that, until men can find employment which can support homes, even those girls who could find employment locally will continue to emigrate. On the other hand, both men and women, even from an early age, often have the intention to emigrate, and this militates against early marriage In short, a low marriage-rate contributes to emigration, and the intention to emigrate tends to keep the marriage-rate low."

Causes of Emigration. In the section on emigration, the report said that while the fundamental cause of emigration was economic, in most cases the decision to emigrate could not be ascribed to any single motive but to the interplay of a number of motives—principally economic, but also social, political, cultural, and psychological. It was not possible, therefore, to attribute emigration to a single cause.

The report pointed out that high standards of organized entertainment had developed in modern urban life, with a wide range of recreational facilitites By contrast, and particularly to the young mind, rural areas appeared " dull, drab, monotonous, backward and lonely." It was not actual want, but a desire to secure improved economic and social status, which urged people in remote rural areas to seek the apparent attractions of a changed environment. The report added : " Recent emigration to Great Britain is building up centres of attraction in that country, and, because of the facility of movement between the two countries, there is a danger that these may become magnets as powerful as the Irish centres in the United States in the 19th and early 20th centuries."

Recommendations. The Commission made some 60 specific recommendations for remedying the adverse demographic situation in the Irish Republic. They included large-scale industrial development so as to provide greater opportunities of employment ; the decentralization of industry and of Government departments ; the creation of an Investment Advisory Council to direct expanded investment ; the establishment of a Ministry for Land Utilization ; and, in particular, a great increase in agricultural production. The Commission expressed its conviction that " agricultural productivity has such a vital bearing on population problems that, even on this account alone, it ought to be a primary aim of national policy to increase it "

The Commission consisted of 20 members, including prominent Irish ecclesiastics, under the chairmanship of Dr. J. P. Beddy. It held 115 meetings during its six years of existence, while another 250 meetings were held by a co-ordinating committee. Much evidence was taken from intending emigrants and other persons.

A minority report was submitted by the Bishop of Cork (the Most Rev. Dr. C. Lucey) which, while accepting the factual analyses of the report itself, dissented from some of its conclusions. In particular, Dr. Lucey urged a stronger attitude towards decentralization, declaring in this connexion that Dublin was overgrown as a result of State action.

B. ADEN PROTECTORATE. — New Governor.

It was announced in London on June 7 that the Queen had approved the appointment of Sir William Luce, formerly adviser on constitutional and external affairs to the Governor-General of the Sudan, as Governor of Aden in succession to Sir Tom Hickinbotham, retiring.—(Times) **(Prev. rep. 12296 A.)**

A. GREECE. — Resignation of M. Theotokis. - M. Averoff appointed Foreign Minister. - Greek Campaign for Union with Cyprus. - Declarations by King Paul and M. Karamanlis. - Anti-British Riots in Athens.

The Greek Foreign Minister, M. Theotokis, resigned on May 27 following an intensive campaign by the Opposition parties in which the Government had been urged to take a stronger line on the Cyprus question with the aim of securing self-determination for the island at the earliest possible opportunity. M. Theotokis had been attacked by the Opposition, and also by the Ethnarchy Council in Cyprus, for alleged "incompetence" in handling the Cyprus question. He was succeeded as Foreign Minister by M. Giorgios Averoff, the Minister of Agriculture, whose former portfolio was taken by M. Apostolides, the Vice-Premier.

The Prime Minister, **M. Karamanlis,** speaking in the Greek Parliament on April 4-5, accused Britain of responsibility for the breakdown of the negotiations on Cyprus, denounced the deportation of Archbishop Makarios as an "unprecedented and despicable act," and declared that Greece would continue to give "unconditional support" to the Archbishop He announced that the Greek Government had told the British and U S. Governments that a final settlement of the Cyprus issue could be achieved only by immediate British recognition of the principle of Cypriot self-determination, by the application of "full and genuine" self-government for the Cypriots, and by the granting of self-determination within a fixed period.

In the subsequent debate, **M. Venizelos** (leader of the Liberal Democratic Union) complained that the Greek Government was leaving Cypriot affairs to the "patriotism and self-struggle of the Cypriot fighters," whilst **M. Papandreou** (leader of the Liberal Party) urged the Government to launch a "world crusade" to arouse all possible moral and material support for "the just aspirations of the Cypriots" The Opposition leaders later moved a vote of censure on the Government, accusing it of "mishandling" the Cyprus question and of "incapacity in domestic affairs" After a five-day debate, the Government was given a vote of confidence on May 25 by 162 votes to 125, a majority of 37.

M. Theotokis, who had been strongly attacked by the Opposition during the debate, said in a statement on May 28 that his resignation was a form of protest against both "British intransigence" on the Cyprus question and against the "lack of understanding" he had encountered in Greece itself It was understood that M. Theotokis had declined an offer by M. Karamanlis to take another portfolio—understood to be that of Defence.

M. Averoff, on taking office as Foreign Minister, declared (1) that the Government's foreign policy would be continued "as endorsed by the majority of Greek political parties"; (2) that the Government would continue to give the fullest support to the "vindication of the Cypriots' struggle"; and (3) that every effort would be made to secure the liberation of Archbishop Makarios, whom he described as a "worthy upholder of the lofty traditions of the Greek Orthodox Church."

M. Karamanlis made a statement on June 2 in reply to the speech by Sir Anthony Eden at Norwich on the previous day (see 14924 A), in which the British Prime Minister had spoken of the Cyprus situation.

Declaring that Sir Anthony's speech had revealed "the true nature of the British Government's motives in refusing self-determination to the Cypriots," M Karamanlis said that the British argument had hitherto been that strategic considerations necessitated continued British sovereignty over Cyprus. This argument, he said, had become obsolete since Greece had expressed her willingness to give Britain bases in the island, together with any additional guarantees to safeguard the strategic interests of Britain and of the free world as a whole. "But it is now revealed," M. Karamanlis declared, "that all the arguments the British Government have been invoking were mere pretexts to impress and mislead democratic peoples."

The real reason for Britain's attitude, M. Karamanlis asserted, had now been divulged by Sir Anthony Eden, namely, Britain's interest in Middle East oil—"a crude protection of purely material interests." Thanks to the British Prime Minister's "confession," the free peoples of the world would be better able to appreciate the "base reasons" for which the British Government had "stubbornly refused the Cypriot people the right of self-determination." M Karamanlis added that "the Greek Government, morally strengthened by Sir Anthony Eden's revealing statement, will continue to strive for Cypriot self-determination, with the unshakeable faith that the United Nations and the whole civilized world will refuse to accept that oil interests—which are in no way threatened by Greece—can prevail over moral principles, liberty, and justice."

Several statements upholding the Greek demand for *enosis* had also been made by King Paul of the Hellenes.

At the first session of the new Greek Parliament (April 2), King Paul had declared in the Speech from the Throne that the entire Greek people and the Orthodox Church were "united as a single soul" in their support of the Cypriot demand for self-determination, and would "pursue with unswerving will their efforts for the satisfaction of the [Cypriot] national struggle." The King described Archbishop Makarios as a "brilliant exponent of the Greek tradition of freedom and democracy." At the same time he deplored the deterioration in Anglo-Greek relations, declaring that "Greece is deeply grieved by events which have disturbed her friendly feelings towards a people with whom she has been linked by bonds of traditional friendship"

At a State banquet given on May 5 to the President of the German Federal Republic (Professor Heuss), who was then on an official visit to Greece, King Paul compared the demand for *enosis* (the union of Greece and Cyprus) with the demand for unification of Germany "All Greeks," he declared, "are today waging a determined struggle to enable the Greeks in Cyprus to exercise their sacred right to self-determination This allows us to appreciate how every German heart feels about the unjust partition of Germany . . ."

Intense feeling was aroused in Greece by the execution of the Eoka terrorists Karaoulis and Demetriou in Cyprus on May 10 (see page 14901, second column). Prior to their execution, M. Theotokis had announced on May 8 that the "strongest" *démarche* had been made to the British Ambassador in Athens (Sir Charles Peake) pointing out the possible repercussions in Greece of the execution of the two "Cypriot fighters." M. Karamanlis also made a last-minute appeal for clemency for Karaoulis and Demetriou, while the Primate of the Greek Orthodox Church (Archbishop Dorotheos) sent a message to the Archbishop of Canterbury asking him to use his influence to prevent the executions. On May 11—the day after Karaoulis and Demetriou had been executed—the Athens municipal council changed the name of the street in which the British Embassy is situated from Loukianou Street to Karaoulis-Demetriou Street.

Serious rioting broke out in Athens on May 9 after Archbishop Dorotheos (who had succeeded the late Archbishop Spyridon as chairman of the Pan-Hellenic Committee for *Enosis*) had addressed a crowd of 10,000 anti-British demonstrators in Omonia Square. In the course of his speech the Archbishop described Karaoulis and Demetriou as "gallant fighters for freedom" and declared that their execution would create an "unbridgeable gap" between Greece and Britain After a resolution had been passed calling for clemency for Karaoulis and Demetriou, the crowds—disregarding the Archbishop's appeal to disperse peacefully—attempted to march on the British Embassy but were prevented from doing so by strong police forces. The mob then attacked the police with stones and clubs and set fire to a police car, whereupon the police opened fire Three people were killed and 124 wounded (59 of whom were policemen) before order was restored. The rioters smashed the windows of the U.S Information Service's library, but were prevented by strong troop reinforcements from reaching the British Embassy. The U.S. and Turkish Embassies were also heavily guarded by troops and police.

A further example of anti-British feeling occurred on May 13, when the mayor of Athens ceremonially smashed a marble plaque commemorating the dedication of the Chapel of St Philip and St. Elizabeth on the occasion of the wedding of Queen Elizabeth II and the Duke of Edinburgh (The plaque had been unveiled when the Queen, then Princess Elizabeth, and the Duke of Edinburgh were visiting Athens in 1950) The chapel—situated in a suburb of Athens—was renamed the Chapel of St. Irene.

The graves of 11 Australian servicemen who fell in Greece during the war were desecrated on March 31 by unknown persons who broke into the Phaleron cemetery (near Athens) and painted anti-British slogans on the tombstones. Representations were made by the Australian Consul-General to M. Theotokis, who expressed the Greek Government's deepest regret for the outrage, which he attributed to hooligan or "anti-national" elements.

It was announced in Strasbourg on June 3 that the Greek Government had lodged an "urgent petition" with the Human Rights Commission of the Council of Europe alleging that Britain had violated human rights in Cyprus. It was stated that the petition had been ruled "admissible" and that it would be considered by a special sub-committee before the next meeting of the Human Rights Commission in September. (Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. Cyprus, 14901 A; Greek Reactions, 14757 A; Karamanlis Cabinet, 14732 A.)

B. INDIA. — Introduction of Metric System for Weights and Measures in 1958.

It was announced in New Delhi on May 21 that the Standing Metric Committee of the Government of India had proposed that Jan. 1, 1958, should be tentatively fixed as the date for the introduction of the metric system of weights and measures "in certain sectors." The committee, which had sat under the chairmanship of Mr. Kanungo, Union Minister of Industries, also approved the draft of a Standards of Weights and Measures Bill covering not only standards of weight, length, area, volume, and capacity, but also mass, time, temperature, electric current, and luminous intensity. It proposed a maximum period of 10 years for bringing the Act into effect throughout the country.—(The Statesman, Calcutta - Indian High Commissioner's Office, London) **(Prev. rep. 14318 B.)**

A. UNITED NATIONS. — Draft Statute for International Atomic Energy Agency. - Vienna proposed as Headquarters of Agency.

A 12-power conference held in Washington on the proposed International Atomic Energy Agency reached unanimous agreement on a draft Statute on April 18. The conference, which had opened on Feb. 27, had been called in implementation of the resolution adopted by the tenth session of the U.N. General Assembly on Dec. 3, 1955, and based on President Eisenhower's "atoms for peace" proposal. The countries represented were Australia, Belgium, Brazil, Canada, Czechoslovakia, France, India, Portugal, South Africa, the U.S.S.R., the U.K., and the U.S.A., comprising the countries most advanced in atomic technology, together with the principal producers of fissionable material. The draft Statute, the text of which (comprising 23 Articles) was published at U.N. headquarters in New York on April 25, will be submitted for final approval to a general conference of member-countries of the U.N. and its specialized agencies, tentatively scheduled to open in New York on Sept. 24, 1956. Its main provisions are summarized below:

Aims and Organization. The draft Statute described the object of the Agency as the encouragement of the development and application of atomic energy for peaceful purposes, especially in under-developed countries, in accordance with the U.N.'s policy of achieving general disarmament.

The principal organs of the Agency mentioned in the draft Statute were a General Assembly and a Board of Governors.

The Assembly would be composed of all member-countries, each represented by one delegate Its sessions would ordinarily take place annually, but provision was made for the convening of extraordinary sessions. The Assembly's functions would comprise chiefly (i) the admission of new members, (ii) the election of certain members of the Board of Governors, and (iii) approving the Agency's budget and such reports as it might make to the United Nations

The Board of Governors would be composed of representatives of 23 member-countries, each with one vote, and distributed in five categories as follows:

(1) The five member-countries "most advanced in the technology of atomic energy, including the production of source materials" (initially presumed to be Canada, France, the Soviet Union, the United Kingdom, and the United States);

(2) five member-countries (to be nominated by the Board of Governors) representing the most advanced nations in atomic technology and production other than the above, and drawn from the following geographical regions—North America, Latin America, Western Europe, Eastern Europe, Africa and the Middle East, South Asia, South-East Asia and the Pacific, the Far East,

(3) two members nominated by the Board from four specifically-named producers of source materials—Belgium, Czechoslovakia, Poland, Portugal,

(4) one member nominated by the Board as "a supplier of technical assistance";

(5) ten members elected by the Assembly, with the aim of ensuring equitable regional representation on the Board [The ten countries concerned were expected to be largely recipient ones]

The ten elected members would serve for a two-year period and the remainder, designated by the outgoing Board of Governors, would serve for one year. The initial group of designated members would be named by an 18-nation Preparatory Commission, which would commence work as soon as the Statute was opened for signature. Membership of the Preparatory Commission would consist of the 12 countries participating in the Washington conference, together with six others to be elected by the New York conference of member-countries of the U N. and its specialized agencies referred to above.

The Agency would be headed by a Director-General, to be appointed for a four-year term of office.

Membership of the Agency. At the outset this would be limited to any member of the United Nations or its specialized agencies which might subscribe to the Statute within 90 days after it was opened for signature. Thereafter any country would be eligible to apply for membership. Admission would be a matter for decision by the General Assembly on a recommendation of the Board of Governors. In making this recommendation, the Board "shall determine that the State is able and willing to carry out the obligations of membership in the Agency, giving due consideration to its ability and willingness to act in accordance with the aims and principles of the United Nations."

Functions of the Agency. The Agency would function both as a storehouse for atomic materials and, if requested, would act as "an intermediary" for the supply of services or materials between its members, thus acting both as a "banker" and "broker."

(*a*) Member-countries would be obliged to submit to the Agency all scientific information acquired as a result of assistance received from it. [This would therefore be mandatory] They would be requested to submit, in addition, any independently acquired information which might prove of use to the Agency as a whole. [Mr. Wadsworth, the U.S. delegate, pointed out that this would be non-mandatory, explaining that the members of the conference wished to preserve the spirit of the Geneva atomic conference of 1955, when a large amount of information was voluntarily supplied.] The Agency would then make available the information it had received for the benefit of all its members.

(*b*) Members would make available to the Agency such quantities of fissionable material "as they deem advisable, and on such terms as shall be agreed with the Agency" The Agency would agree to buy all fissionable materials made available to it, as well as certain quantities of raw materials At the discretion of the supplying member, the materials would be stored either by the member itself, or (by agreement with the Agency) "in the Agency's depots." The Agency would ensure the geographical distribution of materials entrusted to it "in such a way as not to allow concentration of large amounts in any one country or region of the world," and would be free to distribute materials as it should think fit. As regards materials in its possession, the Agency would be responsible for safeguarding them against weather hazards, unauthorized removal or diversion, damage or destruction, including sabotage, and forcible seizure

(*c*) Countries applying for aid in the form of materials or equipment would be supplied either directly by the Agency or indirectly by another member.

The Agency would have wide powers of control over the utilization of materials and equipment supplied by it, and would be authorized to establish a staff of suitably qualified inspectors who could be sent into the territory of countries to whom aid had been granted These inspectors would "have access at all times to all places, persons and data necessary to account for source and special fissionable materials supplied, and fissionable products, and to determine whether there is compliance with the undertaking against use in furtherance of any military purpose," and with health and safety measures Member-nations would be consulted on the appointment of inspectors concerned with their territory, and would be entitled to inform the Agency that they would prefer not to accept any particular person or group of persons

(*d*) Certain punitive powers would be conferred upon the Agency, such as the right to suspend members or to curtail or suspend assistance to offending States

Financial Provisions. Under the Statute, the Agency's administrative expenses would be covered by contributions from member-countries, while its other expenses would be defrayed out of its revenue for services rendered by it In this connexion, the Board of Governors would be required to "establish periodically a scale of charges, including reasonable uniform storing and handling charges, for materials, services, equipment and facilities furnished." No direct provision for the financing of development projects by the Agency was made in the Statute; the proceeds from the above-mentioned charges would be used to pay contributing member-countries for materials or services supplied by them, and to meet certain technical expenses incurred by the Agency

The Statute did not determine the exact ratio of members' contributions to the administrative budget of the Agency, but a quota system similar to that applied by the U N was suggested at the conference.

Financial measures taken by the Agency would require a two-thirds majority both in the Assembly and of the Board of Governors

Entry into Force. The Statute would come into force automatically after ratification by 18 member-countries, provided that these included at least three of the five major atomic Powers.

Relationship with United Nations. Published simultaneously with the draft Statute was a study of the relationship of the proposed Agency with the U N Organization, drawn up by Dr. Hammarskjold (the U N. Secretary-General) and his inter-departmental advisory committee (see page 13994). Both the study and the draft Statute provided that the Agency should submit reports to the U N General Assembly, to the U.N. Economic and Social Council, to other U N. organs on matters within their competence, and to the U.N. Security Council "when appropriate" In this way the proposed Agency would differ from the existing "specialized agencies," which report only to the U N. Economic and Social Council.

By not being placed under the Security Council's jurisdiction, the Agency will (except for security matters referred to below) not be subject to any veto—an apparent compromise between the positions of the U.S.A., which had proposed complete autonomy for the Agency, and of the Soviet Union, which had urged that the Agency should be directly responsible to the Security Council. India had submitted a proposal similar to that finally adopted With regard to questions of security falling within the competence of the Security Council, the Agency would be empowered in case of need to notify the Council "as the organ bearing the main responsibility for the maintenance of international peace and security"

Dr Hammarskjold's study also suggested that the Secretary-General should report to the U N on the common activities of the U.N. and the Agency, and should be entitled to participate without a vote in the Agency's meetings Moreover, representatives of the Agency should have the right to be invited to attend meetings of the Security Council, in order to give assistance on matters within their competence.

The Austrian Government decided on April 25 to invite the International Atomic Energy Agency to make its permanent headquarters in Vienna. This proposal was subsequently approved by the U.S. and Soviet Governments.

A. WESTERN EUROPE - UNITED STATES. — Reactions of Western Communist Parties to Anti-Stalinist Policy in U.S.S.R. - Signor Togliatti's Visit to Belgrade.

Intense controversy was aroused in the Communist parties of Western Europe and the U.S.A. by M. Khrushchev's attack on Stalin's policies, and by the new anti-Stalinist line announced at the 20th congress of the Soviet Communist Party. Reactions in the Italian, French, British, and U S. Communist parties are described below :

Italy. Signor Togliatti, general secretary of the Italian Communist Party, presented a report on the Soviet congress to the party's Central Committee on March 14, in which he severely criticized Stalin's theory of the continuance of the class struggle after the establishment of Socialism, his substitution of personal for collective leadership, his mistakes in agricultural policy and the conduct of the war, and the distortion of historical facts resulting from the " Stalin cult." " Great new victories have been won," Signor Togliatti declared, " but they have been achieved at perhaps too high a price . . and have been accompanied by an accumulation of negative elements which could not but weigh heavily upon the party, the State, and the Socialist society." Signor Togliatti's report, which was published in full in *L'Unita* (the Italian Communist organ), was among the earliest detailed attacks on Stalin published after the Soviet congress, preceding by a fortnight that published in *Pravda* (see 14817 A).

The disclosure of these facts was reported to have caused surprise and confusion among many members of the Italian Communist Party. At a meeting of Communist deputies, held in Rome on March 22-23, it was reported that Signor Togliatti had had to defend himself against criticisms of his failure to reveal these aspects of the Stalinist dictatorship, particularly as he had admitted that some of the accusations against Stalin had been known to him for some time beforehand. At a meeting of the party's National Council on April 3-4, however, it was decided to shelve the matter.

At the invitation of the Yugoslav League of Communists, Signor Togliatti visited Belgrade on May 29-30 for discussions with President Tito and other leaders of the Yugoslav League of Communists, including M. Kardelj, M. Rankovich, M. Pijade, and M. Vukmanovich. In a statement on May 31, Signor Togliatti said that President Tito had emphasized his desire for the re-establishment of normal relations between the Yugoslav Communist League and the Italian Socialist movement, and had proposed that a delegation from the Italian Communist Party should visit Belgrade.

France. The Central Committee of the French Communist Party, after hearing a report by M. Jacques Duclos, adopted on March 22 a long resolution dealing with the political issues raised by the Moscow congress It reaffirmed the party's support for the view that Socialism could be achieved by parliamentary means , called for unity with the French Socialist Party as the nucleus of a new " Popular Front " ; and recalled that the French Communist party, despite its opposition to " military and repressive measures," had voted for the Bill giving the Government emergency powers in Algeria in the interests of such unity. The resolution went on to condemn Stalin's theoretical errors and his " violation of the Leninist principle of collective leadership," adding, however, that " the frank criticism of the [Soviet] 20th congress on this subject does not suppress Stalin's role and merits as a theoretician and leader, but puts them in their proper perspective "

M. Maurice Thorez (the party's leader and general secretary), who was not present at this meeting, made his first public comment on the Stalin controversy in an article published on March 27 Like the Central Committee's resolution, it was couched in much milder terms than the criticisms of Stalin published by Communist leaders in other countries, maintaining that " the necessary criticism of certain errors could in no way detract from Stalin's historic merits."

Great Britain. At the 24th congress of the British Communist Party, held in London from March 30 - April 2, a statement by Mr. Harry Pollitt (the party's general secretary) on the Moscow congress was discussed at a secret session. In his general report to the congress, Mr. Pollitt stated that the membership of the British Communist Party was 33,959 , that it had fluctuated between 33,000 and 35,000 for the past five years , and that the circulation of the *Daily Worker* was 83,000.

In the voting for the new executive committee of the British Communist Party (consisting of 42 members), Mr. Abe Moffat, the Scottish miners' leader, headed the list with 473 votes He was followed by Mr. Frank Haxell (470), general secretary of the Electrical Trades Union, Mr R Palme Dutt (469), and Mr. Harry Pollitt and Mr. John Gollan (467 votes each). Six new members of the executive were elected, among them Mrs. Annie Powell, who unsuccessfully contested East Rhondda at the general election

When the new executive met on May 13, Mr. Pollitt (who is 65, and had been general secretary for 27 years) tendered his resignation, stating that he had been ordered complete rest by his doctors. The executive accepted his resignation and elected Mr. John Gollan (45), the party's national organizer, to succeed him as secretary of the party Mr. Pollitt himself was elected chairman of the party, whilst Mr. William Gallacher (hitherto the party chairman, and formerly M P. for East Fife), was appointed to the newly-created post of president of the party.

The executive adopted a resolution which, while referring to Stalin as " an outstanding Marxist leader," condemned as " alien to Socialism " the " abuses and injustices " associated with Stalin's rule, and in particular the execution of " devoted patriots and Communists " on the basis of " deliberate provocations and fabricated evidence " Admitting that the party's thinking suffered from " a certain dogmatism, rigidity, and sectarianism," the resolution called for fuller discussion on questions of principle, and, in particular, on how " democratic liberties " could be maintained and extended and " Socialist legality " guaranteed during the transition to Socialism The resolution stated that a special commission had been set up to examine the working of the party congress, the method of election of the executive (which had been criticized at the congress), and " the improvement of inner-party democracy."

In an article in the *Daily Worker* (March 24), Mr. Harry Pollitt wrote *inter alia* that Stalin had " made serious mistakes in connexion with agricultural policy, ignored warnings about Hitler's invasion plans, and adopted wrong policies in relation to Yugoslavia "

United States. The U S Communist Party announced on May 3 that its leaders had held a four-day meeting, described as " the most self-critical in the party's history," at which they had unanimously adopted a report by Mr. Dennis, the general secretary, dealing with the party's activities in the past 10 years. The announcement added that Mr. Dennis had criticized " left-sectarian " errors in the party's work, and emphasized that the party sought " constitutional and democratic solutions to current and fundamental problems "

Similar criticisms of Stalin's mistakes, and of the Stalinist policy generally, were also made by the Communist parties of Belgium, Denmark, Austria, and other West European countries.—(Times - Manchester Guardian - Daily Worker - Le Monde, Paris - Humanité, Paris - Giornale d'Italia, Rome - Corriere della Sera, Milan - Tanjug Agency, Belgrade)

C. UNITED KINGDOM. — Gold and Dollar Reserves in May. - Increase of $41,000,000.

The sterling area had a gold and dollar surplus in May of $41,000,000 after taking account of (*a*) $3,000,000 received in U.S. defence aid ; (*b*) $29,000,000 received in gold or dollars from the E.P.U. in respect of the April settlement ; (*c*) $2,000,000 paid to creditors of the E.P.U. in bilateral settlements. As a result, the sterling area's gold and dollar reserves rose to $2,369,000,000 on May 31.

Provisional figures for the E.P.U. May settlement showed that the U.K. had a surplus of £8,000,000, which would be settled in June, three-quarters in gold or dollars and one-quarter by a reduction in the U.K. debt to the Union. (Treasury Press Office) **(Prev. rep. 14838 B.)**

D. TURKEY. — Martial Law lifted in Istanbul.

The state of martial law was ended on June 6 in Istanbul, where it had been in force since the anti-Greek riots of September last. Martial law had also been imposed at the time in Ankara and Izmir, but was lifted from those cities in November. (Times) **(Prev. rep. Istanbul Riots, 14424 A.)**

A. UNITED KINGDOM.—New Cost-of-Living Index. - Wholesale and Retail Prices, October 1955 - April 1956.

A report by the Cost-of-Living Advisory Committee on proposals for a new index of retail prices was published as a White Paper (Cmd. 9710) on March 13. On the same day the Minister of Labour, Mr. Macleod, informed the House of Commons that the Government had accepted the recommendations and that the new index would be introduced immediately, showing the level of prices on Feb. 14.

The new index, which replaced the interim index of retail prices introduced in 1947 (see 8678 B) and modified in 1952 (see 12124 C), was based on an inquiry into consumer expenditure carried out in 1953, and is designed to reflect more accurately the changes in the cost of living by taking account of the new pattern of consumer expenditure revealed by the inquiry. The committee's report and principal recommendations are summarized below.

Inquiry into Household Expenditure. This inquiry had been carried out over a period of 12 months starting at the end of January 1953, and 12,911 households of all kinds had provided information. In 460 of these households, however, the recorded gross income of the head of the household exceeded £20 a week, and the committee recommended that as these particular households, as a group, displayed a pattern of spending which differed considerably from that of the bulk of households in the sample, their budgets should be excluded in the compilation of the new index. Similarly, at the other end of the scale, the committee recommended that the 813 households in the inquiry, in which at least three-quarters of the total household income of 1953 was derived from National Insurance retirement or similar pensions and/or National Assistance paid in supplementation or lieu of such pensions, should also be excluded. The index should thus be based on the budgets of the remaining 11,638 households, which the committee believed reflected the expenditure pattern of nearly nine-tenths of all households in Britain. The committee stated that a few adjustments to these budgets had been made for the householders' underestimates of expenditure on tobacco, alcoholic drink, and meals eaten away from home.

Calculation of New Index. The committee recommended that the new index should be divided into 10 main groups, corresponding with the main groups of the existing index except that the importance of transport, including the considerable expenditure on private motoring, now justified a separate main group. The main groups of the new index should be divided into 91 separately weighted sections, compared with 50 sections in the interim index. Some 120,000 price quotations would be collected monthly in order to calculate the index figure, of which 90,000 would be food prices. It was emphasized, however, that the new index would not reflect only the prices of the items about which inquiries were made, because these items were carefully selected as being representative and the changes in their average prices could be safely applied to all commodities in the appropriate section.

The committee recommended that several items used in the calculation of the old index should be dropped, and several others included for the first time. Among those dropped were the prices of rabbits, lump sugar, turnips, wax candles, distemper, and women's rubberized mackintoshes, whilst those taken into account for the first time included brown bread, processed cheese, coffee, beetroot, eating apples, pears, dog-biscuits, soda-water, paint, television sets, washing machines, men's made-to-measure suits, men's pyjamas, women's plastic mackintoshes, nylon stockings, second-hand cars, National Health Service prescription charges, football boots, camera films, private telephone rental charges, the price of admission to dance halls, and many other items in the food, clothing and household equipment groups The report emphasized that the inclusion of such expensive items as television sets and cars would not make the index higher than it would otherwise be, as the index measured not prices but changes in prices, and the original level was therefore immaterial.

It was also pointed out that the index did not refer to the cost of living generally, and therefore, for example, took no account of income tax, National Insurance contributions, savings, insurance premiums, subscriptions to trade unions, friendly societies or hospital funds, betting payments, fees to doctors and dentists, or mortgage payments, apart from the allowance for a rental equivalent in owner-occupiers' houses.

The report contained few recommendations for alterations in the methods of collecting prices and in the procedure for computing the index, though for the housing group it was recommended that information about changes in rents and rates should be collected regularly from an extended sample of tenants throughout the country It was also recommended that provision should be made for calculating changes in the prices charged for repairs and decorations, and in the prices of materials bought by occupiers doing their own repairs and decorations.

Weighting. The report stated that the interim index was found to have given too much weight to food prices, and had therefore over-estimated the rise in the cost of living; a rise of 9 per cent reported in prices generally between 1953 and 1955 should have been correctly recorded as 8 per cent. In calculating the index figure on the new basis, considerably less weighting would be given to food prices and rather less to fuel and light costs, but greater weight would be given to the other groups.

The new weights (1953-54 consumption, at January 1956 prices) would be as follows, the existing weights (1950 consumption, at January 1956 prices) being shown in parentheses : food, 350 (432); alcoholic drink, 71 (69); tobacco, 80 (80); housing, 87 (73); fuel and light, 55 (73); durable household goods, 66 (55); clothing and footwear, 106 (84); transport and vehicles, 68 (formerly included with "services"); services, 58 (94—i.e. the combined weight of these two groups had been raised from 94 to 126); miscellaneous goods, 59 (40).

Link with Interim Index. The index figure for Jan. 17, 1956, should be used as the base and taken as 100. For the time being, however, the interim index (June 1947 = 100), which stood at 153 in January, should be linked to the new index by a supplementary calculation so as to continue to show the change in the average level of retail prices since June 1947. This would be for the convenience of industries where wages were related to the index under sliding-scale arrangements, and would be discontinued when they had had time to amend their agreements.

The index of retail prices on Feb. 14, the first date for which the new index was used, showed no change as compared with Jan. 17, a slight rise in the prices of some items being counterbalanced by slight falls in the prices of others. The "all items" index (Jan. 17, 1956 = 100) therefore remained at 100.0, and the index on the basis of June 1947 = 100 at 153.4. In March (March 13) the retail prices index (January 1956=100) rose to 101.3, largely as a result of higher food prices, whilst the "all items" index on the basis of June 1947=100 rose to 155.4. The index figure for April (April 17) rose by nearly two points to 103—attributable to further increases in food prices and in rent and rates. On the basis of the former (1947) index the April figure was 158.

The movement of retail prices in the fourth quarter of 1955 and in January 1956 on the basis of the old interim index are shown below :

	October*	November*	December*	January*
	(Jan. 15, 1952 = 100)			
Food	125 9	128.0	127.1	125.4
Rent and rates	116.4	116.6	116.7	117.9
Clothing	96.5	97.4	98 3	98.7
Fuel and light	121 6	125.7	127.5	127.6
Household durable goods	97.6	100.9	101.6	102.5
Miscellaneous goods	103.7	106.2	106.5	106.6
Services	116 8	117.1	117.6	119.1
Alcoholic drink	103 1	103 1	103.1	103.1
Tobacco	100.7	102.9	102.9	102.9
All items (Jan. 1952 =100)	114.4	116.2	116.2	115.8
All items (June 1947 =100)	151 6	154.0	154.0	153.4

* On Oct. 18, Nov. 15, Dec. 13, and Jan. 17 respectively.

The Board of Trade Basic Materials index in the fourth quarter of 1955 (June 30, 1949 = 100) was 153.1 in October and November and 155.3 in December. In January 1956 the index fell to 154.7, and in February and March rose again to 154.9 and 155.8 respectively.

The Economic Secretary to the Treasury, Sir Edward Boyle, stated in a written parliamentary reply on Jan. 27 that two-thirds of the rise of 25 points in the cost-of-living index since October 1951 was due to rises in food prices, and one-third to price increases for other items.—(Cmd. 9710 - Ministry of Labour Gazette) **(Prev. rep. 14586 A ; 12124 C ; 8678 B.)**

B. EUROPEAN TRANSPORT. — Abolition of "Third Class" on British and West European Railways.

As from June 3, "third class" travel was abolished on British Railways and on all Western European railways except those in Spain and Portugal—the only European countries (in addition to Greece) to retain three classes of rail travel, first, second and third. Both in Britain and the other countries concerned, accommodation previously known as "first" or "second" class was amalgamated and termed "first" class, whilst coaches formerly marked "third class" became "second class." Second-class travel remained at the old third-class rates.

The change-over in Britain was introduced to conform to Continental practice. Though "first," "second" and "third" class coaches on the railways of Britain were introduced in the early days of the railway age, the "second" class had in fact ceased to exist (except on Continental boat trains) for many years, and there were only two classes—"first" and "third." (Times - Le Monde, Paris - Giornale d'Italia, Rome) **(14531 C.)**

C. NEPAL. — Lifting of Ban on Communist Party.

The ban imposed on the Nepal Communist Party in 1952 was lifted on April 15 following a written assurance by the party that it would conduct its activities peacefully and constitutionally, and that it acknowledged King Mahendra as the constitutional head of the State.—(The Hindu, Madras)

(Prev. rep. 12020 A.)

A. UNITED KINGDOM. — Sir Anthony Eden on the Cyprus Situation. - Denunciation of Greek Support for Terrorists. - Defence of Middle East Oil Supplies.

In the course of a speech at Norwich on June 1, the Prime Minister emphasized that the Cyprus question was neither a "colonial" one nor a question affecting Britain and Greece only, but was essentially of an international character. Extracts from his speech—which was replied to on the following day by the Greek Prime Minister, M. Karamanlis (see 14920 A)—are given below:

". . It is contrary to the whole spirit of NATO that one of its members [i e. Greece] should seek by radio propaganda of the foulest character, directed from Athens month after month, to stir up terrorist activity in the territory of another There can be no confidence, still less friendship, while that continues. The Governor of Cyprus, Field-Marshal Sir John Harding, has been subjected to the most scurrilous attacks by the Greek Press and radio So have our troops. The Governor and our forces on the island have shown courage and restraint in conditions of the utmost provocation.

"A relatively small minority of terrorists is directing its savage attacks against Cypriots and British alike. A few days ago some pistols were found in the buildings of the Bishopric of Paphos. Ballistic tests have proved that one of these pistols was used to shoot a Greek civilian and a Turkish policeman. How can anyone defend an attitude in which leading priests not only refuse to condemn violence but aid and abet it?

"The Greek wireless talks of British troops desecrating Greek churches. The only desecration of a church was that on Palm Sunday, when Eoka terrorists entered a church during a service and shot dead a Greek Cypriot in the choir, despite the protests of the priest and the cries of the congregation. But no bishop in Cyprus has had one word to say against this dastardly deed

"It is sometimes suggested that a NATO base on Greek soil should suffice for our needs This is not so, and any such suggestion ignores a major part of the problem. Cyprus is a NATO interest, but it is not only that. The United Kingdom's vital interest in Cyprus is not confined to its NATO aspect Our country's industrial life and that of Western Europe depends to-day, and must depend for many years to come, on oil supplies from the Middle East If ever our oil resources were in peril, we should be compelled to defend them The facilities we need in Cyprus are part of that defence. We cannot, therefore, accept any doubt about their availability . .

"All this does not mean that we are going back on our proposal for constitutional progress in Cyprus on the lines we put forward during the talks with Archbishop Makarios. These allowed for a more generous measure of self-government than has ever been contemplated before. I am sorry that they were not accepted. Nonetheless, we shall persevere in our efforts to find a solution . ."

Emphasizing that the facilities in Cyprus were part of the defence of Middle East oil supplies, the Prime Minister declared "I want everyone, including our friends, to heed that there can be no question of this country yielding over any essential element in the defence of its legitimate and vital interests Examples of this are the Persian Gulf, Cyprus, and Aden. No Cyprus—no certain facilities to protect our supply of oil. No oil—unemployment and hunger in Britain. It is as simple as that."—(Daily Telegraph) **(Prev. rep. Cyprus, 14901 A.)**

B. NETHERLANDS. — The Groesbeek Memorial.

A memorial commemorating 1,103 officers and men of the British Commonwealth forces (993 British, 108 Canadian, and two South African) who fell in the advance through the Low Countries to the German frontier, and who have no known grave, was unveiled by the Duke of Gloucester on June 3 at the village of Groesbeek (near Nijmegen) in the presence of Prince Bernhard of the Netherlands, the Ambassadors of the British Commonwealth countries in The Hague, and the Netherlands Minister of Defence. The memorial consists of two cloisters in red rock and Portland stone, and stands on ground overlooking the scene of some of the fiercest fighting by British and Canadian troops on the Dutch-German frontier.
(Algemeen Handelsblad, Amsterdam) **(Prev. rep. 14254 A.)**

C. CANADA. — Diplomatic Appointments.

The following appointments in the Canadian diplomatic service were announced on April 3 in Ottawa—Mr. D. M. Johnson, Canadian commissioner on the International Supervisory Commission for Vietnam, as Ambassador to the Soviet Union in succession to Mr. J. B. Watkins, who had been appointed Assistant Under-Secretary of State for External Affairs; Mr. E. H. Norman, Canadian High Commissioner in New Zealand, as Ambassador to Egypt and concurrently Minister to the Lebanon *vice* Mr. K. P. Kirkwood; Mr. Kirkwood as High Commissioner to New Zealand *vice* Mr. Norman.
(Department of External Affairs, Ottawa)
(Prev. rep. 14777 C.)

D. MALAYA - SINGAPORE. — Authorization of Limited Rubber Exports to Communist China.

The Governments of the Malayan Federation and Singapore announced on June 4 that the British Colonial Office had authorized the resumption of rubber exports in "reasonable quantities" to Communist China. The Foreign Office stated on June 6 that the relaxation permitting the export of rubber to Communist China came under the "exceptions procedure," that the policy would only apply to exports which had no strategic value, and that no infringement of the resolution was involved. The "reasonable quantities" mentioned in the announcement were stated in the Press to be about 2,000 tons a month.

Mr. Nutting, Minister of State for Foreign Affairs, had stated on May 14 that more use would be made of this "exceptions procedure" whereby it would be possible to export goods to Communist China on the embargo list for that country but not controlled for the Soviet bloc Colonial Governments would have authority to consider applications for export licences within the framework of this policy.

The ban on strategic goods to China had been in force since October 1951 (i e. following the outbreak of the Korean War), and control of strategic goods to the Soviet bloc since October 1954. About 450 items were on the list banned for export to China, about 200 of which (including rubber) did not appear on the Russian list.—(Financial Times - Manchester Guardian)
(Prev. rep. British Embargo on Strategic Exports, 11478 A; U.N. Embargo, 11490 A.)

E. UNITED KINGDOM. — Royal Navy. - Abandonment of Scapa Flow Naval Base.

The Civil Lord of the Admiralty (Mr. Wingfield-Digby) announced in the House of Commons on June 6 that the Government had decided to abandon Scapa Flow as a naval base and to close all naval establishments in the area (including the boom-defence depot and wireless telegraph station), with the exception of the oil fuel depot and the services necessary to maintain it. He explained that this step had been decided on because the Admiralty could no longer foresee sufficient work for the installations, either in peace or in war, to justify the expense of their retention. (Times - Daily Telegraph)

Note. Scapa Flow, a natural deep-water harbour about 15 miles long and eight miles across, is formed by the Orkney islands of Pomona, Hoy, and South Ronaldshay It was chosen by the late Admiral of the Fleet Lord Jellicoe in 1914 as the main base for the Grand Fleet, and was the scene of the scuttling of the German High Seas Fleet after its surrender in 1919. Falling into virtual disuse between the wars, it was again brought into use in 1939, but after the torpedoing of the battleship *Royal Oak* in October of that year (with the loss of 833 officers and ratings) it was temporarily abandoned until its underwater defences had been strengthened. For several years the harbour has been virtually on a care and maintenance basis, with only occasional visits by H.M ships. (Times)

F. AUSTRALIA.—Sir Eric Harrison appointed High Commissioner in London.

It was announced by Mr. Menzies on May 23 that Sir Eric Harrison, Minister for Defence Production and Vice-President of the Executive Council, would become High Commissioner in London in succession to Sir Thomas White, who had completed five years' service in the United Kingdom and was returning to Australia. Mr. Menzies explained that Sir Eric would remain in his present ministerial posts until he (Mr. Menzies) had returned to Australia from an overseas tour, which was expected to be at the end of August. In the meantime Sir Edward McCarthy would act as High Commissioner in London.

Sir Eric Harrison (63) had been Resident Minister in London in 1950-51. Mr. Menzies said that the appointment of a successor to Sir Eric as deputy leader of the Liberal Party and Leader of the House of Representatives, and any consequential Cabinet changes, would be dealt with after his return from his overseas tour.—(Australian News and Information Bureau)
(Prev. rep. 11461 C.)

G. BELGIUM. — Expansion Plan for Port of Antwerp.

Plans for the expansion and modernization of the port of Antwerp at a cost of 4,200 million Belgian francs (about £30,000,000) were announced on June 11 by the Prime Minister, M. Van Acker. He said that the work was expected to be finished by 1963; that the State would contribute 3,500 million francs (about £25,000,000) of the total expenditure; and that additional credits would be provided for the construction of 20 to 30 ships, totalling 250,000 to 300,000 tons, with the aim of expanding Belgium's merchant marine to 800,000 tons.
(La Nation Belge, Brussels)

JUNE 16—23, 1956

A. FRANCE - GERMANY. — Agreement on Future of the Saar. - Saarland to unite with Germany on Jan. 1, 1957. - Canalization of Moselle River. - French Coal Supplies from Warndt Mines.

Full agreement between France and the German Federal Republic on the future of the Saar, and on related issues, was reached on June 4 in discussions at Luxemburg between M. Mollet, the French Prime Minister, and Dr. Adenauer, the German Federal Chancellor. The respective Foreign Ministers, M. Pineau and Herr von Brentano, also took part in the discussions.

The Franco-German negotiations on the Saar (see page 14722) had been continued in Paris during April and May by M Maurice Faure and Dr Hallstein, the respective Secretaries of State in the French and German Foreign Ministries, following earlier discussions between M. Pineau and Herr von Brentano in Bonn on Feb. 21-22. Difficulties on several questions had prevented final agreement during the Paris negotiations, but these were successfully resolved at the Luxemburg meeting between the German Federal Chancellor and the French Prime Minister.

The principal provisions of the agreement were as follows:

(1) The Saar would be reunited politically with the German Federal Republic on Jan. 1, 1957, and would become a *Land* with representation in the *Bundesrat*.

(2) The Saar would be economically integrated in the Federal Republic by stages over a three-year period to be completed by Jan. 1, 1960.

During the three-year period the Franco-Saar Customs Union would be maintained, and French or Saar legislation relating to currency and Customs matters would remain in force Saar exports to the Federal Republic during the transitional period would be unrestricted by quantitative limitations or Customs duties As regards German exports of investment goods to the Saar, the Saar Government would work out a plan providing for a progressively liberal importation régime.

After the end of the three-year period, the Saar would be accorded a special economic status within the Federal Republic in order to maintain Franco-Saar commercial exchanges on a continued high level. For an indefinite period it would be able to import, duty free, French goods worth 160,000,000,000 francs (£160,000,000), and to export to France, duty free, goods worth 110,000,000,000 francs (£110,000,000) annually—these figures being based on the 1955 level of exchanges between the two countries. With a view to maintaining the overall volume of trade, provision was made for adjusting the quotas of goods if the relation between Saar exports to France and French exports to the Saar fell materially below the 1955 level

It was also agreed that measures would be taken to prevent any abuses of the special economic régime for the Saar within the German economy, that a joint Franco-German commission would be set up to supervise commercial exchanges; and that special facilities would be granted for capital remittances and the transfer of wages and salaries, covering, in particular, transactions affecting the border population and remittances by French undertakings carrying on industrial or commercial activities in the Saar, and Saar undertakings working in France.

During the transitional period experts would work out the necessary financial arrangements for the replacement of the French franc by the Deutschemark in the Saarland

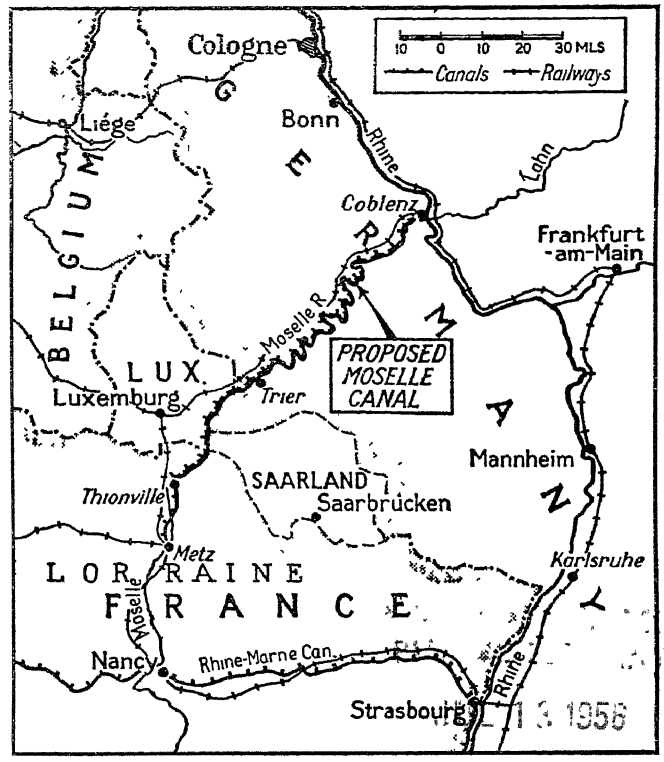
Agreement was also reached (*a*) that the German Federal Republic and France would continue to enjoy equal status within the European Coal and Steel Community; (*b*) that further discussions would be held on questions connected with the maintenance of coal supplies to France from those Saar mines formerly owned by the German Reich.

(3) Between the present time and 1980, France would obtain 90,000,000 tons of coal from the Warndt mines.

The future of the coal deposits of the Warndt Forest was one of the most difficult problems in the negotiations, as the French were particularly anxious to ensure that these coal supplies remained available for the Lorraine iron-ore industry. The Warndt mines (which extend across the frontier between France and the Saar) are at present only worked from the French side, and contain the largest and best coal deposits of the Saar territory. Considerable French investments have been made in these mines

Ultimately, it was agreed that France should have the right to take 90,000,000 tons of coal from the Warndt by 1980, in the following manner (*a*) During the first five years (1956-1960) France would be entitled to mine just over 20,000,000 tons of coal from the Warndt deposits—i.e., to maintain the present level of exploitation. (*b*) By the end of 1960 France would relinquish the north-eastern part of the Warndt coalfield, which would then be exploited from the Saar; during the five-year period a new shaft would be sunk on the Saar side. (*c*) From 1961 to 1980 France would have the right to work three specific coal seams constituting the south-western part of the Warndt coalfield, from which she would obtain about 46,000,000 tons—making a total of 66,000,000 tons over the 25-year period. (*d*) In addition, France would be allowed to buy another 24,000,000 tons of Warndt coal from the Saar at cost price over the whole period (i.e., until the expiration of the agreement in 1980). The German Federal Government would compensate the Saar mines for the difference between the cost price and the nominal sales price.

(4) The Moselle River would be canalized between Coblenz and Thionville (see accompanying map), a distance of 168 miles. The costs of the project would be shared between the French and Federal German Governments, the German share being about 300,000,000 DM. (approx. £25,000,000) and the French share about 250,000,000 DM. (approx. £21,000,000). Of the German share, 160,000,000 DM.—representing the cost of building electricity stations at dams on the Moselle—would be



(*Economist*)

borne by the *Rheinisch-Westfalische Electrizitatswerke*. Tolls for the use of the canalized river would be fixed on the basis of the average tolls charged for shipping on the Main and Neckar rivers, and there would thus be no discrimination in favour of German interests. It was agreed that Luxemburg interests in the project should be discussed in tripartite talks, and that the Belgian Government should also be consulted.

Throughout the Saar negotiations the canalization of the Moselle had been consistently sought by the French Government, which, in effect, had made agreement on this project a pre-condition for agreement on the future of the Saar. It thus represented an important German concession to France, in return for French acceptance of the Saar's political and economic union with Germany. When the Moselle Canal is completed, barges with a carrying capacity of 1,500 tons will be able to ply between the Lorraine and Ruhr industrial areas, carrying Ruhr coal to Lorraine and Lorraine iron-ore and steel to Germany. French experts estimated that shipping on the Moselle River would amount to about 10,000,000 tons a year when the Canal had been completed

(5) The French Government, in deference to German objections, agreed to abandon its plans for a northward extension of the existing Upper Rhine canal between the Swiss frontier and Markolsheim.

This canal—known as the Alsace Canal, and running parallel to the Upper Rhine— had been completed before the Second World War. The French Government had proposed (*a*) to extend it northwards from Markolsheim to the Strasbourg area, and (*b*) to build several hydro-electric dams along the projected extension. Strong objections had been raised from the German side, particularly by the *Land* Government of Württemberg-Baden, on the ground that the projected dams would affect the level of the Rhine and draw water away from the plain on the German bank of the river

In view of these objections, the French Government agreed (*a*) to abandon its plan for extending the Alsace Canal and for building new hydro-electric dams; (*b*) to discontinue work on the 20-mile extension which had already been built northwards from Markolsheim; (*c*) to "build back" this extension into the Rhine, involving an alteration in the course of the river, and (*d*) to pay compensation to the *Land* Government of Württemberg-Baden for damage to crops caused by the diversion of the Rhine. The extent of this compensation will be determined by an arbitration tribunal.

In addition, to the agreements on the Saar, the communiqué signed by Dr. Adenauer and M. Mollet also said that there had been an exchange of views on international and European problems, on which the two Governments were in complete agreement.

The communiqué stated (*a*) that there was "complete identity of views" between France and the German Federal Republic on international problems generally; (*b*) that both countries had reaffirmed their loyalty to the North Atlantic Treaty, (*c*) that they were agreed that NATO should extend its activities to the economic and political fields; (*d*) that they recognized that disarmament was dependent on a solution of problems threatening world peace, in which connexion "the solution of the problem of German reunification occupies first place"; (*e*) that both countries would make continued efforts to bring about East-West understanding; (*f*) that they had noted with satisfaction the steps being taken to set up the "Euratom" project and to establish a common market between the member-countries of the European Coal and Steel Community

As regards the Saar, the Moselle Canal project, and the Alsace Canal, the communiqué emphasized that the statesmen on both sides had been at pains to reconcile the "essential national interests" of the two countries in view of the extreme importance of these questions to Franco-German understanding, West European co-operation, and the "solidarity of the West." Dr Adenauer and M. Mollet expressed the hope that Franco-German understanding would develop in future "in an atmosphere of close co-operation and confidence which would create the best conditions for realising their joint aim—the building of Europe."

The communiqué added that practical details of implementing the Saar agreement would be worked out by French and German experts.

During the Luxemburg discussions M Mollet and M. Pineau gave an account of their recent visit to U.S S R and their discussions with Soviet leaders (see 14934 A) It was stated in the Press that the French Prime Minister had repeated to Dr Adenauer a reported remark by M Khrushchev in which the latter was alleged to have said that Russia "preferred having 17,000,000 Germans inside the Soviet bloc to the possibility of 70,000,000 in a neutral reunited Germany." In a press statement on June 5 after his return to Bonn, Dr. Adenauer described M Khrushchev's reported remark as "brutal and outrageous," and said that it demonstrated that nothing had changed in the U S S R since the death of Stalin. The Chancellor stressed that the Federal Government would continue to work for the reunification of Germany, and added that he would review the situation with the British, U S, and French Governments

Satisfaction at the settlement of the Saar question was expressed both in France and in Western Germany. In Paris, a spokesman of the *Quai d'Orsay* said that "we can now really consider that the Saar problem is settled between France and Germany; despite immense difficulties, agreement was reached thanks to the European spirit and determination of M. Mollet and Dr. Adenauer." The Saar Government unanimously approved the Luxemburg agreement on June 5, and the German Federal Government on June 6.

Recent developments in the Saar are summarized below under cross-headings

Dissolution of Saar Socialist Party. The Saar Socialist Party decided on March 18 (by 228 votes to 21, with 10 abstentions) to dissolve itself and allow its members to join the Social Democratic Party.

Revised Landtag Election Results. It was announced on April 25 that the Saar Electoral Commission had decided to allocate one additional seat to the Saar Democrats at the expense of the Christian People's Party. This decision, together with the merger of the Saar Socialist Party with the Social Democratic Party, changed the strength of the parties in the Saar *Landtag* as follows Christian Democratic Union, 14; Saar Democrats, 13, Christian People's Party, 12, Social Democratic Party, 9, Communist Party, 2

Local Elections. Local elections in the Saar on May 13 resulted in the three pro-German parties (the Christian Democrats, Saar Democrats, and Social Democrats) obtaining 110 out of 150 seats in the seven district councils (*Kreisräte*), 34 of the remaining seats went to the Christian People's Party, and six to the Communists. The pro-German parties also gained majorities in all but one of the 344 urban and village councils.

Of the three pro-German parties, the Christian Democrats polled 152,936 votes (28 8 per cent), the Saar Democrats 134,186 votes (22 3 per cent), and the Social Democrats 103,361 votes (19 4 per cent) The Christian People's Party polled 123,456 votes (23 1 per cent), while the Communists polled 29,893 votes (5.9 per cent) Various "splinter" parties and local groups polled 0.5 per cent between them

The Rochling Steelworks. The Röchling family notified the French and Federal German Governments on April 26 that it no longer considered as valid the option given to the two Governments for the purchase of the steel plant at Volklingen [This option had been agreed upon in April, 1955, by Dr Adenauer and the then French Foreign Minister, M. Pinay] Although the text of the letters was not published, it was understood that the Rochling family had taken the view that the rejection of the proposed Saar Statute at the plebiscite in October last had eliminated the pre-conditions for this option. The Saar Parliament had adopted a resolution in January last (see 14721 A) calling for the return of the Völklingen steelworks—at present under French sequestration—to the Röchling family.

East German Representations on Saar.

It was announced in East Berlin on May 6 that Herr Grotewohl (the Prime Minister of Eastern Germany) had sent letters to Dr. Adenauer and Dr. Ney (the Premier of the Saar) suggesting talks between Eastern and Western Germany, with the participation of the Saar, as a demonstration of all-German solidarity on the question of the Saar's reunion with Germany. It was suggested that joint action in this matter by the two German States could serve as a starting-point for wider understanding between them. The letter to Dr. Ney also proposed that Eastern Germany and the Saar should exchange diplomatic representatives.

At the same time the East German Foreign Minister (Dr. Bolz) sent a letter to M Pineau stating that any settlement of the Saar question without the participation of the East German Government would be regarded as "inadmissible and ineffective," and as "incompatible with the existence of two German States" Whilst declaring that the Saar was indisputably German territory, Dr Bolz said that a solution of the Saar question must serve "the strengthening of peace in Europe and the peaceful—particularly the economic—interests of the French and German peoples" He alleged that the current negotiations between France and the Federal German Republic were aimed at making the Saar's industrial potential serve the remilitarization of Western Germany "by way of an *Anschluss*"

Dr. Ney declared on May 7 that it was "out of the question" that Eastern Germany should take part in the Saar discussions. Dr. Schneider, president of the Saar *Landtag* and leader of the Saar Democratic Party, said that the Saarland would agree in principle to discuss its future with Eastern Germany if the East German Government would press for the return of the former German territories beyond the Oder-Neisse line. (Le Monde, Paris - Le Figaro, Paris - Federal Government Bulletin, Bonn - Frankfurter Allgemeine Zeitung - Die Welt, Hamburg - Neue Zurcher Zeitung) **(Prev. rep. Saar, 14721 A.)**

A. AUSTRIA. — New Coalition Cabinet.

A new Government—based, as hitherto, on the coalition between the People's Party (Catholics) and the Socialists—was formed on June 22 by Dr. Raab, the outgoing Chancellor, with the following membership:

Dr. Julius Raab (People's Party) ..	Chancellor.
Dr. Adolf Scharf (Socialist) .	Vice-Chancellor.
Dr. Leopold Figl (People's Party)	Foreign Affairs.
Herr Oskar Helmer (Socialist) .. .	Interior.
Dr. Reinhard Kamitz (non-party) ..	Finance.
Dr. Otto Tschadek (Socialist) .	Justice.
Herr Franz Thoma (People's Party) .	Agriculture and Forestry.
Dr Udo Illig (People's Party) ..	Trade and Reconstruction.
Herr Ferdinand Graf (People's Party)	Defence.
Herr Karl Proksch (Socialist) ..	Social Welfare.
Herr Karl Waldbrunner (Socialist)	Transport and Electricity Industry.
Dr Heinrich Drimmel (People's Party)	Education.

The following State Secretaries were appointed. Dr. Bruno Kreisky (Socialist) and Dr. Franz Gschnitzer (People's Party)—Foreign Ministetry, Herr Franz Grubhofer (P P.) Ministry of the Interior; Dr Karl Stefani (Socialist)—Ministry of Defence, and Herr Eduard Weikhart—Ministry of Trade and Reconstruction.

The principal change was the appointment of a Minister of Defence—a new portfolio, resulting from the creation of Austrian armed forces following the entry into force of the Austrian State Treaty. With the exception of the new Defence Minister (Herr Graf), all the Ministers held office in the former Cabinet except Dr. Tschadek, who succeeded Herr Kapfer (non-party) as Minister of Justice—a portfolio which Dr. Tschadek had held in former administrations.

The former extensive powers of the Ministry of Transport over the nationalized industries were curtailed, the industries concerned being placed under the direct control of the Cabinet as a whole. -(Wiener Zeitung - Neue Zürcher Zeitung) **(Prev. rep. Elections, 14889 A; Cabinet, 14730 D; 14016 E; 13909 D; 13274 B; 12908 A.)**

B. TURKEY. — Resignation of Foreign Minister.

Professor Köprulü, Foreign Minister of Turkey since 1950 (except for the period April to December 1955), resigned from the Cabinet on June 20, no official statement being issued as to the reasons for his resignation. The portfolio of Foreign Affairs was taken over *ad interim* by M. Ethem Menderes, the Minister of the Interior. The latter is not related to the Turkish Prime Minister, M. Adnan Menderes.—(Times - Le Monde, Paris) **(Prev. rep. 14890 C; 14624 A.)**

A. EGYPT.—New Constitution. - Forthcoming Constitutional Plebiscite and Presidential Elections. - Creation of Supreme Court. - Abolition of Religious Tribunals.

Colonel Nasser, the Egyptian Prime Minister, proclaimed a new Constitution on Jan. 16, 1956, thus ending the three-year transitional period since the dissolution of all political parties in February 1953.

It was officially stated that the new Constitution was of a "socialistic nature," and would abolish social distinctions and prohibit the creation of civil titles. Sovereignty would be vested in the people, and the regime of the State would be "republican and democratic." The religion of the State would be Islam, and Arabic would be the official language. The Constitution would be based on the presidential system, with legislative powers vested in a single National Assembly and executive authority vested in a President. A plebiscite on the Constitution, and elections for a President of the Egyptian Republic, would take place on June 23, and the Assembly was expected to meet in October. Until the new Constitution came into force, the present Government would remain in office.

The principal provisions of the Constitution were as set out below:

Elections. Political parties would remain suspended until the Government introduced a law regulating them. Pending such a measure, "a National Union would be established by the people to work for the realization of the aims of the revolution." The National Union would nominate candidates for the National Assembly, and the manner in which the Union should be formed would be defined by the President. The rules regulating the methods of electing the Assembly were "left to be defined by a special law to be issued at a later date to ensure a measure of elasticity and adaptability." All citizens over the age of 18, including women, would be entitled to vote in these elections, and voting would be compulsory.

National Assembly. The National Assembly, whose term would be five years, would have the usual powers of legislation and supervision over the executive authority. It would nominate the President, whose name would then be submitted for public approval by means of a referendum. The Constitution would "thus be on this point a combination of the parliamentary and presidential systems, avoiding the defects of both"

President. The President, whose term of office would be six years, would be the Head of State and the chief executive. He would formulate the general policy of the Government in collaboration with his Ministers, and would have power to veto or propose laws, although the Assembly could over-ride his veto by a two-thirds majority vote He would also be Commander-in-Chief of the armed forces, and would have authority to declare war, with the approval of the National Assembly. Furthermore, the President would have power to nominate and dismiss officials, and would be able, after consulting the National Assembly, to refer matters to popular plebiscite. Eligibility to the office of President would be confined to persons over 35 years of age and unrelated to the former Royal family.

Judiciary. The Constitution emphasized the independence of the judiciary, and laid down that judges would not be liable to dismissal and would be subject to no other authority but the law

Local Government. Egypt would be divided into administrative units, and Provincial Councils would be elected whose members would be responsible for all public services.

Civil Rights. The Constitution guaranteed freedom of person, life, residence, abode, and religious faith Freedom of the Press, publication, and copyright would be safeguarded "in the interest of public welfare and within the limits prescribed by law" The present censorship would therefore continue until a new law was passed

Economic Policy. The national economy would be organized "according to principles of social justice" and would aim at promoting national productivity and raising the standard of living The Constitution provided for the sanctity of private property, although there would be a maximum limit to land ownership. Private economic activity would be free from State interference provided it did not run counter to the public interest or infringe upon individual freedom.

Social Policy. All Egyptians would be entitled to State aid in respect of old age, sickness, and inability to work, and social insurance and public health services would be created Elementary education would be compulsory, and freely provided in State schools

In a speech at Cairo University on June 1, Colonel Nasser promised an end to military rule in Egypt and the development of a "co-operative society." He announced that the Revolutionary Command Council would be dissolved after the plebiscite on June 23, and would then "hand over rule to the people in a way that will preserve the people's rights." All Egyptians would be eligible to stand for election to the proposed National Assembly, except "those who in the past have supported imperialists and colonialists." There would, however, be no political parties, "because it has been Egypt's experience that political parties supported selfish interests and imperialism." All Egyptians of good reputation would be eligible for membership of the National Union, which he described as "a kind of Popular Front organization with no political orientation." Colonel Nasser also announced that 571 political prisoners would be released, and that press censorship would be abolished before the plebiscite.

Among leading political prisoners whose release had been earlier announced was Ibrahim Farrag, the former Wafdist Foreign Minister, who had been sentenced to life imprisonment in October 1953 on charges of high treason. [The sentence was originally one of death, but had been later commuted to life imprisonment.] M. Farrag was released on Nov 14, 1955, and placed in house custody for health reasons.

Colonel Nasser was nominated by the Council of the Revolution on June 8 as sole candidate for the Presidency.

Creation of Supreme Court.

A Government decree was issued on June 13 creating a Supreme Court. It laid down (*a*) that the Court would have 12 members—six elected by the National Assembly and six elder members of the Judiciary; (*b*) that it would have unlimited powers of judicial review; (*c*) that the President's actions would not be outside the Court's competence; and (*d*) that any future President or Minister found guilty of high treason or disloyalty would be liable to the death penalty, or to imprisonment for life or for a limited term.

Abolition of Religious Tribunals.

All religious tribunals in Egypt, including the ancient Moslem *Sharia* courts, were abolished on Jan. 1, 1956, from which date all cases of personal status hitherto brought before such courts were heard in the ordinary civil courts. Islamic laws, or the laws of the non-Moslem (i.e. Christian and Jewish) communities, continued to be applied in such cases, and *Sharia* judges (or the appropriate non-Moslem jurists) continued to sit with the civil judges for this purpose.

The abolition of the religious tribunals constituted a further step in the unification of the Egyptian legal system—which had been largely rationalized in 1949 by the abolition of the former consular and mixed courts—and the entrenchment of State courts as the sole judicial authorities Egypt became the first Moslem country to abolish the *Sharia* courts (once the supreme legal bodies of all Moslem states, interpreting the *Sharia* or Canon Law of Islam), whose competence in Egypt had lately been confined to cases of personal status—marriage, divorce, care of children, inheritance, etc The Government's decision involved the abolition of the Supreme *Sharia* Court in Cairo, of over 100 lower *Sharia* courts in different parts of Egypt, and of 14 non-Moslem courts.

The Greek Catholic Bishop of Egypt and a number of his clergy were detained by the Egyptian Government on Dec.18, 1955, following the publication of a proclamation setting forth Greek Catholic objections to certain provisions concerning divorce in the new law on personal status. As a protest against these provisions, the Greek Catholic churches in Egypt were closed on Christmas Eve and the traditional Christmas ceremonies were not held. On Jan. 9, 1956, however, a compromise was arrived at between the Egyptian Government and the Christian communities which provided (*a*) that a husband's conversion from the Christian religion to another would constitute a valid ground for granting divorce to the wife, (*b*) that a Christian clergyman would sit on the bench during the hearings of all divorce cases concerning Christians; and (*c*) that religious marriage ceremonies would always precede the civil marriage ceremony.—(Le Monde, Paris - Times - Daily Telegraph - Manchester Guardian - New York Times) **(Prev. rep. Political Parties, Dissolution, 12748 A; Colonel Nasser, Assumption of Premiership, 13554 A; 13449 A.)**

B. WESTERN GERMANY. — Civil Aviation Agreements with Australia and Irish Republic. - Deutsche Lufthansa Service to South America.

Civil aviation agreements between Western Germany on the one hand and Australia and the Irish Republic on the other were signed in Bonn in May and June respectively.

The agreement with Australia allowed scheduled German airlines to operate a service to Darwin and Sydney *via* Egypt, Pakistan, India, Burma, Siam, Singapore, and Indonesia, and for Australian scheduled airlines to operate a service to Frankfurt.

Under the agreement with the Irish Republic (June 12) a scheduled German airline was allowed to operate a service to Dublin *via* the Netherlands or Belgium and Manchester, as well as to operate transatlantic flights *via* Shannon Airport. *Aer Lingus* received corresponding rights to operate services to the German Federal Republic, and also a line to Switzerland and Italy *via* Stuttgart.

It was also announced in May that *Deutsche Lufthansa* would operate a commercial air service between Western Germany and Argentina, with intermediate stops at Paris, Dakar, Recife, Rio de Janeiro, São Paulo, and Montevideo. (Frankfurter Allgemeine Zeitung - Australian News and Information Bureau - Irish Times, Dublin)

(Prev. rep. 14456 D; 14348 B; 14167 D.)

A. UNITED KINGDOM. — Atomic Energy. - Opening of Calder Hall Reactor. - "Atomic Electricity" fed into National Grid. - First Report of Atomic Energy Authority. - New Reactors at Harwell.

The first of two atomic piles at the Calder Hall (Cumberland) nuclear power station—which will be the first in the world to supply electricity on a large scale from nuclear sources—went into operation on May 22. The U.K. Atomic Energy Authority said that "the first important step in the start-up of the Calder Hall station took place . . . when sufficient uranium had been loaded for the chain reaction to take place and for the first pile to become self-sustaining." The statement added that by Oct. 17, 1956, when the Calder Hall station would be officially opened by the Queen, "for the first time in the history of the world electricity will be supplied from a nuclear power station to a national electricity network."

A spokesman for the Authority said that Whitehaven would be the first town in Britain to receive "atomic electricity" to add to its "coal electricity"; this would take place within a few weeks, the atomic electricity from Calder Hall entering the "grid" system at Whitehaven and being dispersed over an area of North-West England which would include Barrow-in-Furness and Lancaster.

Calder Hall is part of the Atomic Energy Authority's programme for nuclear power stations, but is not included in the national plan which envisages the construction of 12 such stations during the next ten years at an estimated cost of £300,000,000.

Other recent important developments in the field of atomic energy are described below under cross-headings:

Sites for Electricity Authority's Nuclear Power Stations. The Central Electricity Authority announced on Oct 14, 1955 that it proposed to build its first two nuclear power stations at Bradwell at the mouth of the Blackwater River in Essex, and at Berkeley, on the Severn estuary in Gloucestershire. If the sites were approved by the local planning authorities and the Minister of Fuel and Power, it was planned to begin construction of the stations in 1957, and they should be contributing to public electricity supplies by 1960 or 1961. Each station would provide two to three times the amount of power to be generated at the Calder Hall station, where electricity was a by-product. The announcement added that comprehensive precautions would be taken in the design of the reactors and ancillary plant to ensure the effective containment of all radio-active materials in every foreseeable contingency. There would be no chimney emissions as from the combustion of coal, and the stations would therefore contribute to the "clean air" policy.

On Oct. 26 the Central Electricity Authority announced that six more sites had been selected as being suitable for the erection of atomic power stations. Their location was not disclosed because negotiations with local authorities and other bodies concerned had not been completed.

First Report of Atomic Energy Authority. The first report of the U.K. Atomic Energy Authority, covering the period from July 1954 (when the Authority came into being) to March 1955, was published on Nov. 3. Stressing the difficulty of obtaining sufficient numbers of trained scientific personnel, it stated that although material shortages had never been insuperable, the difficulty of recruiting and retaining sufficient skilled scientists, engineers, and craftsmen had been acute throughout the 10 years since the atomic energy project began in 1945, and showed no signs of becoming easier.

The report pointed out that the Authority was competing for staff with industry, notably with sections of industry which were themselves building up staff to enter the field of nuclear energy; as a body dependent on public funds, the Authority had not the same freedom of manoeuvre as industry in the matter of salaries. Whilst the Authority was aware that the shortage of technological skill was nation-wide and that efforts were being made to meet it, the development of atomic energy was unique in the variety of special skills demanded, and the demand was not being met at present. The staff which the Authority had taken over on Aug. 1, 1954, had been inadequate to fulfil the programmes then in hand, and since then both the military and civil programmes had been enlarged. Most of the Authority's establishments were in isolated areas, and the labour resources of the surrounding localities had since been exhausted.

The Authority (the report continued) was doing its utmost to train future managers and executives from among its own staff, but had been forced to look outside for a large number of senior staff. Difficulties in this respect had been anticipated, but the difficulty in recruiting younger engineers and technicians was more disquieting. "In the industrial group in particular," the report stated, "recruitment of professional and scientific staff has done no more, over the past 18 months, than keep pace with wastage: there has been no increase in manpower to match the increased programmes, civil and military. Inadequacy of staff is a constant threat to the achievement of the Authority's programmes, and there is always the fear that, even if the dates are achieved, as so far they have been, details will have been skimped that will be the cause of operating troubles for the future."

As regards supplies of uranium, the report said that it was realized that while minerals bearing small quantities of uranium were fairly plentiful, the low metallic content and the difficulty of treatment ruled out most of them as economic sources. Nevertheless, the procurement programmes of the past few years were now bearing fruit and an easier supply position seemed probable over the next decade. Prospecting in Britain had not so far resulted in the discovery of any deposits which could be exploited economically.

The report went on to say that while atomic power was now the principal civil objective, exploitation of radio-active isotopes continued at a rapid pace. The combined output during the year (from the Isotope Division at Harwell and the Radio-chemical Centre at Amersham) was 18,835 consignments, an increase of 16 per cent on the calendar year 1953 Of this total, 35.6 per cent had been exported and 40 countries were using British isotopes in 1954. The value of radio-active products sold during that year was about £450,000.

The report contained the following paragraphs on the subject of atomic patents policy:

"The many inventions that have arisen [in the field of atomic energy] have created for the Authority a substantial holding of patents and patent applications. Until recently the utilization of atomic energy inventions has been largely confined to the Authority themselves, but the programme for nuclear power will extend their use to industry and to the electricity authorities. Some of the inventions also have general applications in the chemical, engineering, metallurgical and instrument fields. Where inventions are not secret, the Authority follow a policy of granting non-exclusive licences to suitable U.K. recipients unless the invention can be more appropriately exploited by the National Research Development Corporation

"To implement this policy the Authority have a staff of Patent Officers who work closely with the scientists and engineers in assessing the value of inventions and taking appropriate action to patent them . . . Some inventions are, of course, devised specifically for use in atomic energy—for example, in processing of plutonium—but many others can be applied to a wide range of industry One example of this was the Sprayrack method of distillation evolved at Harwell. Although it was designed to assist in the production of heavy water, it is applicable to other industries using distillation, and licences have been granted for its use in America, France, and Germany, as well as in this country. In studying applications, the Authority's Patents Branch do not ignore the possibility that it is advisable in some cases to take out patents in foreign countries

"In order to make information known about inventions which have been patented, the Authority is appointing an officer whose task will be to ensure that details reach such branches of industry as may be interested, and who will also be prepared to deal with inquiries from firms who may consider that processes or methods used in atomic energy might be of use to them."

Research on Atomic Power for Aircraft. The Hawker Siddeley Group announced on Nov. 18 that it was negotiating for a site on which to build a research establishment to investigate the possibilities of using atomic power in aircraft propulsion. It was stated that this site "may possibly be in the Gerrard's Cross area" (Buckinghamshire). Sir Frank Spriggs, managing director of the Hawker Siddeley Group, confirmed on Jan. 4, 1956, that his group had drawn up plans for entry into the atomic energy field, and announced that the Hawker Siddeley Nuclear Power Company had been formed to carry out research and development work.

New Research Reactors. The Atomic Energy Authority announced on Jan. 17, 1956, that two new research reactors, or atomic piles, were operating at Harwell—"Zeus" (zero energy uranium system) and "Zetr" (zero energy thermal reactor) "Zeus" had been built to check the nuclear calculations on which the design of the fast reactor being built at Dounreay (Caithness) depended, and was in many ways a full-scale model of the Dounreay reactor. "Zetr," however, was a new type of research reactor, the existence of which was made known for the first time. Its purpose was to obtain information of value in the design of "homogeneous" reactors in which the nuclear fuel was circulated in solution, and in which chemical processing would probably in the long run be made continuous.

The Atomic Energy Authority announced on Oct. 17 the appointment of Mr. W. Strath (a Third Secretary at the Treasury) as a full-time member of the Authority, and of Sir Rowland Smith (chairman of the Ford Motor Company) and Mr. C. F. Kearton (a director of Courtaulds) as part-time members. It was stated that Mr. Strath would be largely concerned with the Authority's relations with industry, with overseas atomic energy organizations, and with raw material procurement. The appointments brought the membership of the Authority up to the limit of 10 (excluding the chairman) laid down in the Atomic Energy Authority Act.—(Times - Daily Telegraph - Manchester Guardian - Financial Times)

(Prev. rep. Atomic Energy, 14416 A; 14360 A.)

B. POLAND. — Releases under Amnesty Law. - Ex-Premier of Government-in-Exile returns to Poland.

The Polish Prosecutor-General's Office announced early in June that nearly 86,000 people had benefited from the amnesty granted by the law of April 27.

It was stated that nearly 28,000 of this total (including 3,500 women) had been released from imprisonment, while the remainder had had their sentences reduced. In addition, 10,700 applications for amnesties had been referred to the courts for further decision. Those released included 1,300 who had been sentenced for anti-State activities.

It was reported on June 9 that M. Stanislaw Mackiewicz, at one time Premier of the Polish Government-in-exile in Britain, had decided to return to Poland. (Polish Embassy, London)

(Prev. rep. 14880 A; Emigrés, 14817 A; 14510 A.)

A. EUROPE. — Coal and Steel Production in 1955. - O.E.E.C. Report on Europe's Energy Needs.

Coal production in the principal European coal-producing countries during 1955 is shown in the following table:

	Production (metric tons)	Output per manshift*	Workers on books at Dec. 31, 1955
Belgium	29,975,000	1.148	151,000
Czechoslovakia	23,200,000	n.a.	n.a
France	55,336,000	1.583	206,000
Saar	17,330,000	1 810	56,500
Western Germany	130,727,000†	1.544	428,000‡
Italy	1,134,000	n.a	6,600
Netherlands	11,893,000	1.486	47,200
Poland	94,500,000	n.a.	n a.
Spain	12,432,000	n.a.	n a.
United Kingdom	225,152,000	1 602	700,000

*Underground production only. †Not including 90,531,000 metric tons of lignite ‡Not including 30,600 workers employed in the production of lignite. n.a. not available.

The major coal-importing countries during the year were Western Germany (17,341,000 metric tons), United Kingdom (11,548,000), France (11,223,000), Italy (10,415,000), the Netherlands (8,096,000), Denmark (5,113,000), Austria (4,129,000) and Sweden (3,210,000). The principal exporting countries were Western Germany (13,136,000 metric tons), United Kingdom (11,615,000), and the Saar (9,771,000). Figures for Poland were not available.

The United States exported 26,535,000 metric tons of coal to Western European countries in 1955, compared with 9,810,000 metric tons in 1954. Of the 1955 exports, 6,068,000 metric tons went to Western Germany, 5,974,000 to Italy, 4,467,000 to the Netherlands, and 4,408,000 to the United Kingdom.

It was announced in Washington on June 13, 1956, that the U.S. coal industry, the coal-carrying railways, and the United Mineworkers' Union had combined to set up a new company, to be called the American Coal Shipping Inc., to buy modern vessels and "promote the export coal trade on the broadest possible basis."

Crude steel production in the principal European producing countries in 1955 was as follows (in metric tons): Western Germany 21,336,000, United Kingdom 20,108,000; France 12,592,000; Belgium 5,892,000; Italy 5,395,000; Czechoslovakia 4,530,000; Poland 4,420,000; Luxemburg 3,225,000; Saar 3,165,000; Eastern Germany 2,500,000; Sweden 2,149,000; Austria 1,826,000; Hungary 1,630,000; Spain 1,202,000; the Netherlands 973,000; Yugoslavia 806,000; and Rumania 765,000.

A report by the O.E.E.C.'s Commission for Energy was published on June 5 under the title *Europe's Growing Needs of Energy*.

The report anticipated a continuing rise in the energy requirements of Western European countries, and stressed that such an increase would be necessary to preserve Western Europe's competitive position in world trade. In 1953 the annual industrial consumption of energy per worker in the O.E.E.C. countries was equivalent to only 8 tons of coal, while the U.S. equivalent was 25 tons. The Commission estimated that the consumption of all forms of energy in Europe, which was equivalent to 730,000,000 tons of coal in 1955, would in favourable conditions rise to the equivalent of 1,200,000,000 tons or more in 1975. Western Europe had been a net importer of energy since 1927, and it would be necessary to develop all indigenous resources of energy if increased expenditure on imports was to be minimized.

The Commission estimated that nuclear energy would be unlikely to provide more than 8 per cent of the total energy required in Western Europe in 1975, and it emphasized that coal would be the mainstay of the "energy economy" in Western Europe for many years. It therefore urged the need for a "new outlook" on the coal industry which would encourage long-term investment and technical development.

The O.E.E.C. Coal Committee, in their report on the European coal industry in 1955 (published in April 1956), also stressed that without long-term investment there was the prospect of a future fuel crisis of unprecedented severity. (Economic Commission for Europe, Geneva - O.E.E.C. Information Division, Paris) **(Prev. rep. Commission for Energy, 14383 A; Coal and Steel Production, 14281 C.)**

B. SOVIET UNION. — Resignation of M. Kaganovich.

It was announced in Moscow on June 10 that M. Lazar Kaganovich had resigned at his own request from the chairmanship of the State Committee on Labour and Wages, and had been succeeded in that post by M. Alexander Volkov. M. Kaganovich remained a First Deputy-Premier in the Soviet Government.—(Le Monde, Paris - New York Times)

(Prev. rep. 14315 C; M. Molotov, 14900 B.)

C. ISRAEL. — Resignation of Mr. Sharett. - Mrs. Myerson appointed Foreign Minister.

The Prime Minister of Israel (Mr. Ben-Gurion) informed the *Knesset* on June 18 that Mr. Moshe Sharett had resigned as Foreign Minister; that he would be succeeded by Mrs. Golda Myerson, the Minister of Labour; and that Mrs. Myerson's former portfolio would be taken by Mr. Mordecai Namil, secretary-general of the General Confederation of Labour (*Histadruth*).

Although it was known for some time that differences of opinion had existed between Mr. Ben-Gurion and Mr. Sharett no definite announcement was made as to the causes of Mr. Sharett's resignation from the post of Foreign Minister, which he had held uninterruptedly since the foundation of the State of Israel in 1948. In his statement to the *Knesset*, Mr. Ben-Gurion said that he had always worked with Mr. Sharett "in confidence and mutual respect" despite differences of opinion, and expressed confidence that much activity lay ahead for "the man who stood at the helm of our foreign policy for almost a quarter of a century." [A reference to Mr. Sharett's services as head of the Jewish Agency for many years before the establishment of the State of Israel.] The Prime Minister added that there would be no change in Israel's foreign policy as a result of Mr. Sharett's resignation from the Foreign Ministry.

Mr Sharett made a statement which, without giving any reasons for his resignation, disclosed that he had first made an unsuccessful attempt to leave the Foreign Ministry when Mr. Ben-Gurion was forming his Cabinet after the general elections of 1955. Since then, co-operation between the Prime Minister and himself had been subjected to "several difficult tests," and in recent weeks it had become clear to him that his resignation was unavoidable—a fact, however, which had "nothing to do with any specific policy matter, event, or incident." Mr Sharett added that his final decision to resign had been taken after a conversation with the Prime Minister on June 3, when he had realized that it was "impossible to remain in a Government headed by Mr Ben-Gurion."

Mr. Sharett's resignation from the Foreign Ministry had been accepted the previous evening (June 17) by the central committee of the Israel Labour Party (*Mapai*). The voting was 35 for acceptance of the resignation and seven against, with 47 abstentions. In addition to having been Foreign Minister since the foundation of the State of Israel, Mr. Sharett had been Prime Minister in 1954-55.

Mrs. Golda Myerson had been Minister of Labour in every Israeli Cabinet since 1949. She was previously Israeli Ambassador in Moscow.—(Times - Manchester Guardian)

(Prev. rep. Cabinet, 14520 A.)

D. SWEDEN - UNITED KINGDOM. — Reciprocal Social Security Benefits for U.K. and Swedish Nationals.

An agreement on reciprocal social services between Sweden and the United Kingdom was signed in Stockholm on June 9.

Mr. Boyd-Carpenter, Minister of Pensions and National Insurance, gave details of the agreement in the House of Commons on June 11. He said that it covered (*a*) benefits available to Swedish nationals in Britain under the National Insurance scheme, the Industrial Injuries scheme, and National Assistance, and the equivalent benefits in Sweden available to British nationals in that country; (*b*) family allowances for British families resident in Sweden and for Swedish families resident in the U.K.—in the latter case after a clause to that effect had been added to the Family Allowances Bill now before Parliament.

An innovation, which Mr. Boyd-Carpenter described as "an important feature" of the agreement, was that Swedish health service benefits became available not only to U.K. nationals resident in Sweden, but also to British tourists. Under British agreements with other European countries, British nationals could make use of foreign health services only if they were working in the country concerned. As foreign nationals from any country may receive the benefits of the National Health Service in the U.K., Sweden thus became the first country outside the British Commonwealth to offer full reciprocal rights.

The agreement was signed on behalf of Britain by Mr. Selwyn Lloyd, who was in Stockholm as Minister-in-Attendance on H.M. the Queen during her State visit (see 14933 C). It is subject to ratification by the U.K. and Swedish Parliaments.

(Manchester Guardian - Svenska Dagbladet, Stockholm)

E. JAPAN. — Legislation against Prostitution.

A Bill outlawing prostitution, the first of its kind adopted in Japan, was enacted on May 21 after approval by both Houses of the Imperial Diet. It provided for the closure of all brothels by April 1, 1957, and imposed (as from April 1, 1958) maximum penalties of two years' imprisonment or fines on persons who continued to run such establishments. An appropriation of 40,000,000 yen (about $111,000) was made for the rehabilitation of prostitutes. It was estimated by the Japanese News Agency that some 40,000 brothel-keepers and about 180,000 prostitutes were affected by the legislation.

(Times - New York Times)

A. SOUTH KOREA. — Re-election of President Rhee. - Dr. John Chang elected Vice-President.

Presidential and vice-presidential elections were held in South Korea on May 15. Although Dr. Syngman Rhee (81), leader of the Liberal Party, was re-elected for a third presidential term, his "running mate" (Mr. Lee Ki Poong) was defeated in the vice-presidential election by Dr. John Chang, the candidate of the Democratic Party—an opposition group which had been formed in September 1955. An anomalous situation was thereby created, since President Rhee and Vice-President Chang belong to different parties.

The Democratic Party was formed as a result of mounting dissatisfaction with a number of constitutional amendments adopted by the Liberal majority in the National Assembly—in particular, a provision making it possible for President Rhee to seek as many terms of office as he wished, which his opponents declared to be unconstitutional. The new party absorbed the Democratic Nationalists (the only Opposition party then existing) and was joined by some 35 members of the Assembly, its leaders including Dr John Chang and Mr P H Shinicky, a former Speaker of the Assembly.

President Rhee had originally announced that he would not stand for re-election, in view of his age and in order "to make way for a younger and stronger leader." His supporters, however, formed a "Pro-Rhee National Society" which announced that it would hold mass demonstrations every day until President Rhee changed his mind and consented to stand for a third term. After three weeks of such demonstrations, Dr. Rhee accepted the Liberal Party's nomination for the presidency on March 23, saying that he had "bowed to the popular will" and that he had been "besieged" by letters and telegrams urging him to stand for re-election.

The principal candidates for the presidential election were Dr. Syngman Rhee, nominee of the Liberal Party; Mr. P. H. Shinicky, chairman of the Democratic Party; and Mr. Cho Bong Am, candidate of the Progressive Party (a left-centre group) and a former Communist. The principal vice-presidential candidates were Mr. Lee Ki Poong (Liberal), Speaker of the National Assembly, and Dr. John Chang (Democrat), other candidates included Mr. Pak Ki Choo (Progressive) and General Lee Bum Suk, the former Defence Minister. Mr. Shinicky, however, died suddenly of a heart attack during the election campaign, whilst Mr. Cho Bong Am went into hiding a week before the election. As a result, Dr. Rhee had no effective opposition to contend with in the presidential election.

Out of 9,068,247 votes cast in the presidential election (about 94 per cent of the electorate), Dr. Rhee received 5,046,437 votes, while nearly 2,000,000 were cast for Mr. Bong Am. Over 1,600,000 "memorial" votes were cast for the late Mr. Shinicky, who posthumously polled more votes in Seoul than President Rhee. In the vice-presidential election, Dr. Chang received 4,102,654 votes and Mr. Lee Ki Poong 3,805,502, the remaining votes being distributed among six other candidates. The elections were held in an orderly manner and without incident, but many allegations of irregularities were made by the Opposition parties.

Vice-President Chang (57), a Roman Catholic, was educated in the U.S A (where his eldest son is a professor at Brown University), and was Ambassador in Washington from 1948-51. He served as Prime Minister of the Republic of Korea for one year, before the office was abolished by President Rhee.

In a press statement after his election as Vice-President, Dr Chang said that he expected to "get along fairly well" with President Rhee, as both were anti-Communists and supporters of close co-operation with the United States The "only major difference" between himself and President Rhee was that the latter wished to maintain the American presidential system (i.e to combine the offices of President and Prime Minister in one individual, as Dr Rhee had done by abolishing the post of Prime Minister), whilst he (Dr. Chang) favoured a Cabinet system on the French model, with reduced powers for the President.

Dr. Syngman Rhee issued a post-election statement saying that there was "no precedent for having a President of one party and a Vice-President of another," and expressing his disappointment at the situation that had arisen.
(New York Times - New York Herald Tribune) **(12397 A.)**

B. CZECHOSLOVAKIA. — Abolition of Capital Punishment and Life Imprisonment.

The newspaper *Rude Pravo*, organ of the Czechoslovak Communist Party, announced on June 18 that capital punishment and life imprisonment would be abolished from the beginning of 1957. Under a new penal code to come into force in that year, the maximum punishment for criminals would be twenty-five years' hard labour. (Le Monde, Paris)

C. UNITED KINGDOM. — Further Increases in Coal and Coke Prices. - Stabilization of Electricity Charges. - Twelve-month Stabilization of New Coal Prices.

The National Coal Board announced on May 23 that prices of all grades of coal would be raised from June 1 by eight per cent, or an average of 6s. a ton, the increase for house coal ranging from 4s. 3d a ton to 10s. 1d. according to grade. The increases—foreshadowed by Mr. J Bowman, chairman of the N.C.B., on May 3—were expected to yield about £35,000,000 in 1956 and £61,000,000 in 1957, enabling the Board to reduce its accumulated deficit of nearly £37,000,000 as at Dec. 31, 1955.

It was explained that the increases would be added to the delivered price of house coal, which at present carried a reduction under the summer price scheme (see 14882 A). Specimen prices of Grade 4 coal (the most popular grade) delivered at various centres would be (per ton): London, £7 12s. 9d., Glasgow, £6 8s , Newcastle, £5 17s 7s , Leeds, £6 2s 10d., Liverpool, £6 9s. 2d., Nottingham, £5 16s 7d , Birmingham, £6 8s. 2d , Cardiff, £6 9s. 8d., Brighton, £8 3s 5d

The Gas Council announced on the same date that the price of domestic coke would be raised by 9s. a ton from June 1 except in the West Midlands Region, where the increase would be 8s. 9d. a ton. The British Coking Industry Association announced increases of 8s. 8d. and 8s. 8d. - 9s. 6d. a ton respectively in the prices of blast-furnace and foundry coke.

The annual cost of the increases to the nationalized electricity and gas industries and to the railways was estimated by the Central Electricity Authority, the Gas Council, and the British Transport Commission as £11,000,000, £8,500,000, and £4,500,000 respectively. On May 29 the National Union of Manufacturers protested against the increases as "cutting completely across the Government's declared intention that inflation should be halted," and as "making nonsense" of the Government's "repeated requests to manufacturers to hold their prices steady."

The Central Electricity Authority announced on June 18, however, that it had requested Area Boards not to increase their tariffs in spite of the increase in coal prices.

The announcement explained that the decision that the industry itself should "carry the added burden" of the increases in coal prices had been reached in view of "the present critical stage of the national economy" and "recent Government statements about steadiness in prices." After pointing out that the Authority consumed 40,000,000 tons of coal annually, and that coal accounted for two-thirds of generating costs, the statement continued: "The latest increase in coal prices would thus, in the normal course, have necessitated an advance in tariffs in order to preserve . . . the surplus hitherto achieved by the industry. Nevertheless, having regard to the national situation, the Authority consider that the Area Boards should, for the present, avoid increases in their tariffs, despite the severe strain this course will impose on them Apart from the automatic increases which apply to those consumers whose charges are subject to a coal price variation clause, tariffs in general will thus be maintained at their present level. Before the announcement of the last increase, proposals to raise tariffs had been made by the South Wales, Yorkshire, and North-Western Boards . . . The Authority has, as an additional measure, requested those Boards to suspend action on their proposals The whole financial position of the industry, and the policy to be pursued, will be specially reviewed before the end of the current financial year—March 31, 1957 It is the policy of the C.E.A. to maintain this measure of price stabilization at least until that date."

This statement was followed on June 20 by an announcement by the National Coal Board that, "unless something quite unexpected or exceptional happens," pithead coal prices would not be increased during the next 12 months.

The National Coal Board recalled that in its announcement of the latest increases on May 28 it had made it clear that these were "intended to cover coal costs in 1956 and 1957 and also to recover part of the accumulated deficit"

The N.C.B.'s announcement was welcomed by the Federation of British Industries as "a valuable contribution to the holding of prices generally," and by the National Union of Manufacturers as "a most realistic step towards the fulfilment of the Government's intention to check the price-wage spiral." (Times - Daily Telegraph - Manchester Guardian) **(14882 A.)**

D. FRANCE. — New Atlantic Liner.

The Under-Secretary of State for the Merchant Marine (M. Duveau) informed the National Assembly on June 21 that the Government had agreed on the construction of a new 55,000-ton French liner for the North Atlantic service. M. Duveau said that the vessel would be built for the *Compagnie Générale Transatlantique* at the Penhoët shipyards at a total cost of 27,360 million francs (over £27,000,000), of which 19,700 million francs would be provided by the C.G.T. and 7,600 million francs by the Government. (Le Monde, Paris)
(Prev. rep. 13942 C.)

A. UNITED KINGDOM. — The Army. - Estimates for 1956-57. - Formation of Emergency Army Task Force for Overseas. - Inquiry Committee into Employment of National Servicemen. - Reorganization of Active and Reserve Armies.

The Army Estimates for 1956-57 were published as a White Paper (Cmd. 9688) on Feb. 21, together with an accompanying memorandum by the Secretary of State for War (Mr. Anthony Head) reviewing the Army's tasks and activities in 1956-57.

The net total of £472,000,000 shown for the Army in the Defence Estimates included the following items (1956-55 figures in parentheses): Pay and Allowances £100,000,000 (£64,000,000), Mechanical Transport £45,200,000 (£58,700,000); Ammunition £22,400,000 (£25,700,000), Guns and Small Arms £5,200,000 (£6,800,000), Signals and Wireless £6,200,000 (£7,600,000), Food and Rations £41,800,000 (£46,000,000); Liquid Fuel, etc £10,200,000 (£10,500,000), Clothing £9,600,000 (£18,100,000); General Stores £22,100,000 (£25,500,000); Works and Maintenance £35,000,000 (£33,000,000).

The memorandum presented by Mr. Head announced (1) that a specially selected and trained infantry brigade would be kept in immediate readiness to take part in emergency operations in support of civil administrations overseas, (2) that the reorganized infantry division tried out in Germany last autumn, with integrated armour and medium artillery and fewer wheeled vehicles, would be adopted as the pattern for Regular Army divisions. The memorandum is summarized below:

The Army's Achievements in 1955-56.

Although the Army's commitments had continued to decrease during 1955-56, they still constituted "a very heavy burden" which "stretched the available resources to the limit." The main activities of the military forces in the various theatres were as follows:

Aden. The internal situation in the Aden Protectorate had deteriorated during the first half of 1955 owing to the supply by the Yemen of arms, ammunition, and money to certain disruptive elements, notably the Rabizi tribesmen. It was therefore decided in July, 1955, to reinforce the troops already in the Protectorate by a battalion of the Seaforth Highlanders and a troop of armoured scout-cars from the Life Guards. These reinforcements, brought in by air lift, quickly restored confidence and took part in several small operations. It had been decided to maintain a British battalion in the area for the present.

Cyprus. The progressive deterioration of internal security conditions had made it necessary to increase the Cyprus garrison from four major units to 14, and to employ troops widely for policing the island. The memorandum pointed out that the sudden influx of troops just before the onset of winter had necessitated the hasty erection of weather-proof camps throughout the island, placing a heavy strain on the Royal Engineers.

Kenya. Despite the immense difficulties of the terrain, the Army's success in hunting down terrorists in their hide-outs on the slopes of Mount Kenya and the Aberdare range had resulted in the killing or capture of over 1,000 terrorists in 1955. Although at the end of the year between 50 and 100 terrorists were still being accounted for monthly, it had been possible to reduce the security forces substantially (see 14859 A).

Korea. Although British troops still held a sector of the U.N. defensive line, the need to retain them had recently been examined, and further reductions would be made in 1956-57.

Libya. In reply to an urgent appeal by the Libyan authorities, British troops stationed in Tripolitania had played an important part in destroying unprecedented swarms of locusts which had threatened a major disaster to the country. Assistance had also been given in the building-up of the Libyan Army, both by lending British officers and N.C.O.s and by combined exercises with the Libyan forces.

Malaya. U.K., Commonwealth, and Nepalese [Gurkha] troops had continued to serve with the police and security forces, some having been engaged almost continuously against the terrorists since 1948. The outstanding military success of 1955 had been the victory in Pahang, but complete success had also been achieved in the southern part of Selangor, as a result, a wedge had been driven into the Communist Party organization and its north-south communications had been severed. Steady progress had been achieved elsewhere, and a further 14,000 square miles had been declared "white" (i.e. free from emergency restrictions), bringing the number of people living in "white" areas to 2,675,000, or nearly half the population.

West Africa. Arrangements had been made to hand over administrative control of the Gold Coast forces to the Gold Coast Government on July 1, 1956. This would necessitate a reorganization of the existing command organization in West Africa, since the remaining forces in the area would for the time being continue to be administered by the War Office.

Other Areas. The memorandum also dealt with the arrangements for the evacuation of British forces from the Suez Canal zone (see 14030 D, 14860 B), with the recent operations in Muscat (see 14782 A), and with the altered status of the British Army of the Rhine following the attainment of sovereignty by the German Federal Republic.

Army Organization.

Announcing the selection and training of an infantry brigade for emergency operations overseas, the memorandum explained that the support of civil administrations in overseas territories for which Britain was responsible had been one of the Army's main operational tasks for the past 10 years. The Communist aims in the "cold war" made it essential to keep some units in constant readiness for this duty, but a serious disadvantage was the time taken to train units on arrival in an overseas theatre before they were ready to take part in emergency operations. To overcome this handicap, an independent infantry brigade had been earmarked for such tasks, and the Air Ministry had agreed to provide a flight of light aircraft to support it. The main feature would be the immediate readiness of the brigade to move to any part of the world in support of the civil administration, and its ability to operate on arrival with the minimum of delay. Its equipment would be varied to suit the particular terrain in which it would be operating.

The Government had also decided that there was no justification under modern conditions for retaining the existing Coast Artillery organization, since the threat to ports could best be countered by the Royal Navy and the R.A.F., moreover, in an emergency other types of artillery could be deployed to meet an enemy attack from the sea. Regular Coastal Artillery batteries would therefore "go into suspended animation," and Territorial batteries would be amalgamated with other units.

Weapons and Development.

The memorandum explained that the smaller Production Vote reflected the reduced maintenance requirements following the run-down of the Army, and also the reduced provision of war reserves. It was, however, planned to spend more in 1956-57 than in 1955-56 on arms and equipment, with the aim of increasing mobility and flexibility.

Meanwhile, *Conqueror* heavy tanks were continuing to be issued to the B.A.O.R., and deliveries were expected to be completed by the end of 1958. In 1956-57 trials would take place of the *Saladin* armoured car (probably the best armoured car in existence), training would proceed in the handling and deployment of the *Corporal* surface-to-surface guided missile; and large-scale troop trials of new signal equipment would be held in the Middle East prior to its general introduction for regimental communications. The new sub-machine carbine—a great improvement on the Sten gun—was now in production, and production plans had been made for the F.N. rifle, which had successfully passed its trials.

Other developments included (1) the setting-up of an Army-R.A.F. Joint Experimental Helicopter Unit to test the probable usefulness of helicopters in solving the Army's problems of mobility in a future war, (2) the development of instruments to measure radiation from nuclear explosions and radio-active fall-out, (3) a new range of mobile map reproduction equipment to provide a means of reproducing maps in the field to a NATO standardized size, (4) troop trials of a new range of combat clothing and personal equipment.

Movement of Troops.

During 1955-56 air trooping had again been the main means of moving army personnel to and from the Middle East, the Mediterranean area, East and West Africa, and the Caribbean, whilst over 1,000 Service passengers a month had been carried to and from the Far East.

Two new troopships would come into service during 1956, and four older ships had been given up.

Manpower.

Regular Recruitment and Prolongation of Service. During 1955, 23 per cent of men due for call-up had enlisted on Regular engagements, against 24·8 per cent in 1954; 55 per cent of Regular enlistments during the year were for 22 years, compared with 61 per cent in 1954.

Only about five per cent of men completing three-year Regular engagements during 1955 had remained in the Army, but about 16 per cent of those on 22-year engagements had chosen to stay on after their first option period of three years, of these, about 40 per cent had extended to 12 years.

National Servicemen. Although the Army's share of men called-up in 1955 had been about 123,000, as in 1954, the changes announced in October (see 14076 A) would result in a reduction to about 115,000 in 1956.

Women's Corps. Recruitment for the Women's Royal Army Corps had been disappointing, and its strength was insufficient to meet requirements. Recruitment for the Queen Alexandra's Royal Army Nursing Corps had also been disappointing, but should be stimulated by the opening of a new Nurse Training School at Aldershot.

Pay and Pensions.

In view of the manpower position, and in order to attract more long-service recruits, the Government had decided to increase substantially the pay, retired pay, and pensions of Regular officers and men. The highest rates would go to men who engaged to serve for nine years, or who, after nine years' service, engaged to serve for a further six years. The memorandum gave details of the new rates as set forth in the White Paper of Feb. 20 (see 14887 A).

Works and Buildings.

During 1956-57 a further £2,000,000 would be spent on the construction and maintenance of buildings at home and abroad. At home, modernization or rebuilding was already proceeding on about 30 barracks, and it was planned to start seven more during the year;

since 1945 nearly 10,000 new married quarters had been built, and 1,800 old ones modernized. Abroad, the chief works undertaken had been the construction of new cantonments in Cyprus (see above) and of temporary camps in Malaya to serve as bases after the emergency had ended and until permanent camps could be built.

Reorganization of the Active Army.

Tactical operations carried out in Western Germany had shown that though the general structure of the infantry division was suited to operations in a nuclear war, it was necessary to make it capable of being split into hard-hitting, self-contained groups, so that, when necessary, decentralization could take place while retaining the command structure to concentrate the power of the division at the right moment. To give flexibility, simplify administration, and guard against congestion, the multiplicity of weapons within the division would be reduced, and attempts would no longer be made to equip any one arm with every type of weapon. Armour would in future be integrated in the infantry brigade, and medium artillery would be added to the division to provide increased range and shell-power. The organization of this type of infantry division could easily be varied to suit all conditions, short of nuclear war, by leaving out as much as desired of its armour or medium artillery. Territorial divisions required for early reinforcement of the Regular Army would be organized on similar lines.

The present armoured division (the memorandum explained) had shown itself too cumbersome to be able to exploit quickly the opportunities which could be created by the use of nuclear weapons; moreover, it had not sufficient infantry for sustained fighting. It was essential to have a formation which could move quickly and which depended principally on the fighting capacity of skilfully-used armoured regiments. Such a formation would have to be small; it could not be "cluttered up" with all the units needed to give it sustained fighting capacity, and would have to be a specialized formation comprising only armour and the minimum supporting units For occasions when it would have to perform tasks outside those for which it was designed, it would be necessary to group under it additional infantry, armoured, or engineer units, depending on the task. Further trials, however, would be carried out in Germany before a final decision was reached.

The Army Estimates were passed by the House of Commons on March 1 without a division. In presenting them, Mr. Head announced the setting-up of an independent civilian committee to inquire into the alleged employment of National Servicemen on "menial and time-wasting" tasks.

Mr. Head explained that the saving of about £100,000,000 in expenditure on the Army since 1958 had been achieved by drastic pruning of non-essentials, and that the reduction in numbers by about 31,000 in 1956-57 and by a further 60,000 in 1957-58 would be obtained by cutting the number of non-effectives, including those at the War Office. The extent to which the reduction in strength would decrease the dependence on National Servicemen would naturally be related to the success of Regular recruiting, but he believed that, with the new pay increases and "given reasonable good fortune," it should be possible to recruit a Regular Army of 200,000 with adequate long-service content. During the next two years the National Service intake would be controlled by age, if Regular recruitment proved better than expected, the National Service intake could be run down by raising the call-up age, while if it were less successful than anticipated, the call-up age would not rise so steeply. At present it looked as if the age would be 19 by 1958.

Turning to the "persistent disquiet" felt about the alleged employment of National Servicemen on "menial, humdrum, or time-wasting" tasks, Mr. Head announced the setting-up of the inquiry committee referred to above. He said that its chairman would be Mr. [now Sir] J. F. Wolfenden, Vice-Chancellor of Reading University, and its other members Mr. Walter Goss (national secretary of the Government and Municipal Workers' Branch of the Transport and General Workers' Union) and Mr. F. C. Hooper (managing director of Schweppes Ltd). Its terms of reference would be "to examine the employment of National Servicemen in this country, with special reference to static organizations and establishments," and it was expected to complete its inquiry by the summer. Action was also being taken to prevent waste of time throughout the Army, and modern labour-saving devices were being introduced in barracks and other Army establishments.

The Minister pointed out that over 1,000,000 young men had been through the Army since National Service began, of whom over one-third had been given positions of responsibility—25,000 having been granted commissions and 324,000 having become n.c o.s. All thinking members of the Regular Army, however, considered that National Service was inefficient and wasteful, and that the constant "in and out" of National Servicemen had an unsettling effect, and was probably the biggest single deterrent to Regular recruiting If, however, the Government were to work for the abolition of National Service, a strategic reserve must be created to give the Army stability.

It had been argued, Mr. Head went on, that in the present "thermo-nuclear age" concentration should be on streamlined atomic weapons, but the introduction of such weapons was "still a long-term prospect." Although the *Corporal* missile, which had a range of 75 miles and was really the equivalent of long-range heavy artillery, would be able to break up concentrations, it was "fatuous" to suppose that it could stop the gradual infiltration and penetration of troops. Men could only be stopped by preventing them from getting too close, and there was as yet no substitute for bullets, tanks, artillery, and machine-gun fire. After trials and manoeuvres in Germany over the past two years it had been decided to reorganize infantry divisions into "brigade groups," of which the basic organization would be three infantry battalions, one armoured regiment, and artillery These self-contained groups would be able to operate over wide areas up to 15 miles, and would be capable of fighting independently or of being controlled by central organization, as the situation required.

Meanwhile, the 24th Infantry Brigade was being specially trained for emergency service overseas, and the R A.F. were providing three *Pioneer* squadrons for its support—one in the Far East, one in the Middle East, and one at home In addition, two squadrons of *Beverleys* would go into service during 1956 This would enable R A.F. Transport Command to take considerably over two-thirds of the Brigade in one lift.

In conclusion, Mr Head dealt with the reorganization of the Reserve Army (see 14676 A), stressing that as nobody knew what form a future war might take, it would be "folly" to have no reserves in Britain Although the Government had agreed to a reduction in the number of training periods for the Territorial Army from three to one, it was essential to have that one period It was proposed to earmark two Territorial divisions for NATO—the 43rd (Wessex) and 57th (Welsh)—and to organize the remainder on the same lines without, however, as much armour and medium artillery. The existing 34 Territorial regiments would be reduced by amalgamations and conversions to nine armoured infantry regiments and 11 divisional Royal Armoured Corps regiments, while the 57 artillery regiments would be reduced by amalgamation to 48. Eighteen regiments of coast artillery would be converted to artillery, engineer, or infantry units

Other recent developments in connexion with the Army are summarized below:

Committee on Future Structure of Army. It was announced on April 16 that the Army Council had set up a War Office committee to examine "the future structure of the Army in the light of probable commitments," and, in particular, to inquire into ways "in which demands for military manpower for the maintenance of the Army can be reduced and the extent to which use can be made of civilians and outside organizations." The chairman of the committee will be Lieut.-General Sir Richard Hull, who will take up his new appointment as Deputy Chief of the Imperial General Staff [see below] in the autumn.

Lightweight Rations. Details were published on March 16 of a new 24-hour "combat" ration to be issued to the Army in the field, weighing only 27 oz. as compared with nearly 4 lb for the emergency rations issued in World War II. The rations, representing an energy value of 3,000 calories, comprise dehydrated meat, soup powder, pre-cooked compressed oatmeal, cheese, biscuits, chocolate, and sufficient dehydrated tea to make two pints.

End of Call-Up of Grade 3 National Servicemen. The Parliamentary Under-Secretary for War (Mr. Fitzroy Maclean) announced on May 18 that no more men in medical Grade 3 would be called up for National Service Men of this grade already serving (about 10,000 in the Army and 3,000 in the R.A.F.) would, however, be required to finish their engagements, as their immediate release would cause dislocation

The Ministry of Labour stated on the same day that 4,000-5,000 Grade 3 men would have been called up in 1956, compared with 7,000 in 1955. Grade 3 men had first been called-up under the National Service Acts in February, 1951, at a time when manpower shortage caused by the Korean War was considered serious enough to outweigh the disadvantages of using men whose health placed limitations on their military employment]

Select Committee Report on Army Barracks, etc. A report by the House of Commons Select Committee on Estimates, dealing with Army works and buildings, was published on June 8. It said that some of the accommodation in Army barracks and hutted camps "came as a severe shock" to the Committee's members, and stressed the waste of public money caused by high expenditure on the maintenance of "sub-standard accommodation," as well as the effect of such accommodation in "driving people out of the Army rather than encouraging them to join or remain in it" After pointing out that £10,000,000 had been allotted in 1955-56 for maintenance work in the Home Commands, it stated that in one Command a high proportion of troops was living in sub-standard accommodation, including obsolete barracks such as those at Woolwich, Knightsbridge, Dover, Folkestone, Colchester, Windsor, and Shorncliffe. In another Command many troops still occupied huts built by prisoners-of-war in the first World War, and others lived in 18th-century stables over 50 yards from a lavatory.

Besides recommending that the War Office should pay special attention to the uneconomic aspect of maintaining sub-standard accommodation, the Select Committee considered that it should re-examine the economic possibility of hastening the de-requisitioning of land acquired during the war by reducing the number of artillery ranges and concentrating them into the smallest area compatible with safety, and by accelerating the restoration of abandoned camp sites to agricultural use.

British Division in Libya. It was announced on June 7 that engineer and signal units of the 10th Armoured Division would take part in a joint British-Libyan Army exercise which had begun outside Tripoli on that date. This was the first official mention of the existence of the division, which has been built up since 1954 and has its headquarters in Libya.

Army Appointments.

The following senior appointments in the Army had been announced in recent months (date of announcement in parentheses):

Lieut.-General Sir Richard Hull, G.O.C. British Troops, Egypt, as Deputy Chief of the Imperial General Staff (Jan 19, 1956).

Lieut-General Sir Geoffrey Bourne, Director of Operations in Malaya, as C.-in-C. Middle East Land Forces *vice* General Sir Charles Keightley (April 20, 1956).

Lieut-General Sir Francis Festing, G.O.C.-in-C., Eastern Command, as C.-in-C. Far East Land Forces *vice* General Sir Charles Loewen (Feb 13, 1956).

Sir Charles Loewen (a Canadian by birth) as Adjutant-General to the Forces *vice* General Sir Cameron Nicholson (Feb. 13, 1956).

Major-General C. F. C. Coleman, Chief of Staff, British Army of the Rhine, as G.O.C.-in-C., Eastern Command, *vice* Sir Francis Festing (Feb 13, 1956). with temporary rank of lieutenant-general.

Major-General R. H. Bower, lately Chief of Staff, Allied Forces, Northern Europe, as G.O C. Malaya (April 9, 1956), with temporary rank of lieutenant-general.

General Sir George Erskine, C.-in-C. East Africa, as G O.C -in-C., Southern Command (effective from Nov. 1, 1955).

The promotion of H.R.H. the Duke of Gloucester to the rank of field-marshal had been announced on March 30, 1955. (Cmd. 9688 - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14267 A; Reorganization of Reserve Army, 14676 A; Defence Estimates, Recruitment, 14773 A; Service Pay, 14887 A.)**

A. FRANCE. — Resignation of M. Mendès-France.

M. Pierre Mendès-France, the leader of the Radical Party, resigned on May 23 from M. Mollet's Cabinet, in which he had been Minister of State without portfolio since the formation of the Government in January last.

M. Mendès-France tendered his resignation as a result of disagreement with the Government's Algerian policy, of which he had been critical for some time. His reasons for resigning were set forth in a letter to M. Mollet which was published on the same day.

In this letter M. Mendès-France recalled that he had sent an earlier communication to M Mollet at the end of April enumerating seven "significant measures" which, in his (M Mendès-France's) opinion, were essential for a "moral and political" settlement of the Algerian problem They were:

(1) An amnesty for all political *détenus* who had not committed crimes of violence.

(2) Freedom of the press for newspapers "expressing the point of view of the indigenous population," with the reservation that papers "appealing to hatred" and "inciting to crime and violence" should continue to be banned. Similar restrictions should be imposed on the "colonialist and racist" Press.

(3) Dismissal of officials who "had orientated, and were still orientating, the Algerian administration to the detriment of the indigenous population, of law, and of justice."

(4) Promulgation of a new municipal law, and the dissolution of municipal authorities who had acted against the interests of the Moslem population.

(5) "Effective expropriation" of large estates, and their transfer to small peasant proprietors.

(6) "Fundamental reform" of agricultural credit, "which must be taken out of the egoistic hands which have always used it for the benefit of big landowners and to the detriment of small producers."

(7) An "appreciable increase" in wages; control of social legislation "by officials animated by a new spirit and loyally respecting the interests of the workers", and "active support" for Moslem trade union organizations

M. Mendès-France made it clear that he was not opposed to the despatch of reinforcements to Algeria, or to the recall of reservists for service there. He felt equally strongly, however, that "the use of arms alone will not suffice," and that "any policy which ignores the miseries of the indigenous population will lead to the loss of the Algerian people, of Algeria, and then, inevitably, of all North Africa." After complaining that none of the measures he had outlined in April had been adopted, and declaring that the situation had deteriorated since then, M Mendès-France wrote: "Unfortunately, the moderate Moslem elements whom we should have supported continue to be bullied by a municipal administration and a Press animated by a spirit which does us great harm" He also criticized the Government for having, he alleged, been unduly influenced by extremist right-wing elements among the European settlers, and for failing to make clear the type of bi-racial community it envisaged in Algeria.

It was announced after M. Mendès-France's resignation that the other Radical Ministers in M. Mollet's Government would continue in office. The executive committee of the Radical Party adopted a motion of confidence in M. Mendès-France on June 8, with only two dissentient votes. (Le Monde, Paris) **(Prev. rep. Mollet Cabinet, 14719 A; 14681 A; Algerian Policy, 14913 A.)**

B. RHODESIA AND NYASALAND FEDERATION. — Creation of Merchant Bank of Central Africa. - Establishment of Bank of Rhodesia and Nyasaland.

The forthcoming formation of the Federation's first merchant bank, under the name of the Merchant Bank of Central Africa, was announced in Salisbury on May 28. The bank, which is to open business early in 1957, will be sponsored by N. M. Rothschild and Sons and Philip Hill, Higginson and Co. Ltd., both of London, in conjunction with Rhodesian Selection Trust Ltd.; Dillon Read and Co., New York; de Rothschild Frères, Paris; the Banque Lambert, Brussels; Messina (Transvaal) Development Co. Ltd.; and Leben Investment (Rhodesia) (Pvt.) Ltd., Bulawayo. Its chairman will be Mr. (now Sir) R. L. Prain, chairman of the Rhodesian Selection Trust Group.

It was pointed out that the new bank would not compete with existing commercial ones, and that it was intended to specialize in the financing of the movement of goods and raw materials, assistance in the underwriting of internal Government loan issues, the raising of finance for established and/or new industrial and commercial undertakings, the underwriting of public issues, investment advisory services to overseas investors on Rhodesian investments, and an advisory service to Rhodesian investors in respect of overseas investments.

A proclamation issued on March 15 brought into formal existence the Federation's new central bank—the Bank of Rhodesia and Nyasaland. Mr. A. P. Grafftey-Smith (the bank's first Governor), hitherto chairman of the Central African Currency Board, stated that the latter body would cease to exist on March 31, and that the central bank would take over all its assets and liabilities, as well as those of the Central African Currency Fund.—(Federal Information Department) **(Prev. rep. 14762 A.)**

C. SWEDEN. — British Royal Visit.

Her Majesty Queen Elizabeth II and the Duke of Edinburgh paid a three-day State visit to Stockholm on June 8-10 at the invitation of King Gustav VI and Queen Louise, who had paid a similar visit to London in 1954 (see 13801 A). The Queen and the Duke were accompanied by Mr. Selwyn Lloyd, the Foreign Secretary, and Admiral of the Fleet Earl Mountbatten, who acted as personal *aide-de-camp* to the Queen.

Her Majesty and the Duke sailed for Stockholm in the Royal yacht *Britannia*, which left Teesport (near Middlesbrough) on June 4 During their State visit to the Swedish capital, where they were enthusiastically welcomed by great crowds, the Queen and the Duke attended a State banquet given by the King and Queen of Sweden at the Royal Palace; received the heads of Commonwealth missions and foreign diplomatists; visited the Stockholm Opera House with King Gustav and Queen Louise; gave a dinner for the King and Queen of Sweden on board the *Britannia*; and attended a luncheon given in their honour by the City of Stockholm The Duke of Edinburgh also attended a reception given by the Swedish Chamber of Commerce. On the last day of their official visit (Sunday, June 10) her Majesty and the Duke attended Divine service at the English church in Stockholm—the Church of SS. Peter and Sigfrid.

At the end of their State visit the Queen and the Duke of Edinburgh remained in Stockholm for a further week to attend the Equestrian Olympic Games, which began in the Swedish capital on June 10. They returned to London on June 18. (Times - Svenska Dagbladet, Stockholm) **(Prev. rep. 13801 A.)**

D. BENELUX. — Single Labour Market.

A Benelux labour treaty making Belgium, the Netherlands, and Luxembourg into a single labour market, with free movement of workers, was signed at The Hague on June 7. It provided that workers from each of the "partner" countries would have the same rights as nationals of the countries in which they worked, thus enabling labour permits to be abolished within the Benelux community. The treaty is subject to parliamentary approval and will become operative, at latest, on the day on which the proposed Benelux economic union treaty (at present being negotiated) enters into force. (Netherlands News Agency) **(Prev. rep. 11204 B; 11146 C.)**

E. UNITED STATES. — Embassy in Morocco.

The U.S. diplomatic mission in Morocco was elevated to the status of an embassy on June 11. Mr. William J. Porter, Consul-General in Rabat, was appointed Chargé d'Affaires pending the nomination of an ambassador. (New York Times) **(Prev. rep. 14907 C; 14858 C.)**

F. UNITED KINGDOM. — Civil Service Pay.

The Government's proposals for revised pay and conditions for Civil Servants were approved on June 18 by the staff side of the Civil Service National Whitley Council, which agreed with the Treasury that they should be put into immediate effect.—(Times) **(Prev. rep. Civil Service, 14847 B.)**

A. FRANCE - SOVIET UNION. — Moscow Visit by M. Mollet and M. Pineau. - Discussions with Soviet Leaders. - Joint Franco-Soviet Statement. - Extension of Cultural Co-operation.

M. Guy Mollet and M. Christian Pineau, the French Prime Minister and Foreign Minister, arrived in Moscow on March 15 on an official visit to the Soviet Union. In a brief statement on arrival at Moscow Airport, M. Mollet declared: "France belongs to alliances—I would even say to a community—to which she will remain faithful. This goes hand-in-hand with a continuous, incessant concern to seek a peaceful settlement of all disagreements which exist in the world . . . Our presence here is witness of this."

During their stay in Moscow the French Ministers had a number of lengthy discussions with Marshal Bulganin, M. Khrushchev, M. Molotov, M. Mikoyan, and other Soviet statesmen. They also called upon President Voroshilov, attended a reception given by Marshal Bulganin, and unveiled a plaque commemorating those members of the Free French Normandie-Niemen air squadron who fell during the Second World War, when the squadron fought on the Eastern front in support of the Soviet Army.

The following joint statement was issued on May 19 at the end of the Franco-Soviet discussions:

Introduction. "During the talks, which were held in an atmosphere of friendliness and cordial sincerity and in a spirit of mutual understanding, a useful exchange of views took place on the subject of Franco-Soviet relations, on ways of improving them, and on the whole complex of international problems. On a number of questions there was identity of views As regards problems on which differences of opinion could not be reduced, the talks have at least led to a better understanding of the positions of both sides

The representatives of the two Governments noted unanimously that the good relations between the Soviet Union and the French Republic, united by long-standing traditions of friendship, are developing on a basis of mutual understanding and respect."

Relaxation of International Tension. "Inspired by a joint desire to work for an easing of international tension, the two Governments recognized that the development and improvement of Franco-Soviet relations in all spheres corresponds with the interests of the two peoples and represents a substantial contribution to the strengthening of universal peace and security.

They noted with satisfaction the improvement which has already been achieved in the international situation. As they considered, however, that there is not yet that confidence between States which is indispensable, the French and Soviet representatives emphasized their firm resolve to take measures to contribute to the strengthening of mutual confidence and for improving relations between States, irrespective of differences in their political, economic, and social systems. Recognizing in this connexion the importance of personal contacts by leaders, the representatives of the Soviet Union and of France expressed the hope that such contacts would develop in the future between statesmen of various countries

The Soviet and French representatives stress their adherence to the principles of the U N Charter, the effective application of which must contribute to the gradual settlement of outstanding problems They reaffirm the desire of their Governments to adhere to the provisions of the Charter, which lay down that any dispute should be settled by peaceful means, and which forbids the threat or use of force except in cases of self-defence They express their conviction that the fundamental basis for peaceful co-existence and friendly co-operation between States is mutual respect for territorial integrity and sovereignty, non-aggression, and non-interference in each other's internal affairs"

European Security. "The exchange of opinions on the subject of European security showed that both Governments were agreed that peace and security in Europe are of decisive importance in maintaining universal peace They failed, however, to reach agreement on the means of settling European problems In the interest of strengthening universal peace, both Governments will continue to co-operate in finding a solution to the questions still outstanding They are convinced that, thanks to their efforts and the efforts of other Governments inspired by the same will for peace, international confidence will be established, the 'cold war' finally liquidated, the armaments race stopped, and the peoples freed from the threat of a new war"

Disarmament. "In the course of their talks the Soviet and French representatives broadly examined the disarmament problem They agreed that in present conditions this problem is an urgent international task They are convinced that its solution will play an exceptionally important part in easing international tension, strengthening confidence, and alleviating the burden of defence expenditure The Soviet and French Governments will continue their efforts to achieve an agreement on disarmament within the framework of the United Nations. They emphasize the essential importance of nuclear disarmament, and the need for using atomic energy exclusively for peaceful purposes. This remains their common aim, and they will continue their efforts to achieve it.

Both Governments will strive to reach agreement on measures to bring about a substantial reduction of all armed forces, with proper international control, and accompanied by a corresponding reduction in armaments—especially in the armed forces and armaments of the five great Powers. The French Government recognized the importance of the unilateral decision taken by the Soviet Government to reduce its armed forces [see 14878 A], and regards this decision as one which will facilitate the talks on disarmament."

Aid to Under-developed Countries. "Problems of economic and technical aid to under-developed countries were also examined The French and Soviet Governments are in complete agreement on the need for common efforts to provide such aid to under-developed countries as would make possible closer international co-operation and contribute to the relaxation of international tension The main purpose of such aid would be to enable the beneficiary countries to advance more quickly along the path of economic and social progress by means freely chosen by them. The Government of France and the U S S R consider that the United Nations can play an important role in this sphere. The Soviet leaders were informed about the French Government's plans in this respect They received with sympathy the basic ideas of these projects, though reserving their views about the manner of implementing the plan which had been submitted to them, and which deserves profound study The French leaders will examine, in the same spirit of understanding, the Soviet proposals for a European agreement on economic co-operation"

The Middle East. "In the course of their exchange of views, the Soviet and French representatives examined the situation in the Middle and Near East It was recognized that this situation deserves the serious attention of all Governments interested in an international *détente* and the consolidation of world peace

The French representatives noted with interest the Soviet statement of April 17 on the Middle East situation [see 14829 A].

Both Governments are agreed upon giving all the necessary support to the U.N in its efforts to strengthen peace in the Palestine area and to ensure the implementation of Security Council decisions They will support the initiatives taken by the U.N. aimed at ensuring a peaceful settlement of the questions in dispute between the Arab States and Israel, on a basis acceptable to the interested parties. They will also support the U N. in its efforts to improve the position of the refugees"

Indo-China. "The representatives of the two Governments have studied the results of the talks held in London by the co-chairmen of the Geneva Conference They welcome the contribution which has thus been made to the implementation of the 1954 agreements and the strengthening of peace in South-East Asia."

Trade Relations. "An exchange of views also took place on the development of trade between the two countries. The representatives of the two countries agreed to encourage by every means the development of Franco-Soviet commercial exchanges, recognizing that this corresponds with their mutual economic interests and will represent an important factor in creating *rapprochement* and mutual understanding between the peoples.

With the object of contributing to the growth and stability of these exchanges, the representatives of the two countries agreed to conclude a long-term agreement . . which would provide for a considerable increase from year to year in French deliveries to the Soviet Union of machinery and equipment for various branches of industry, of raw materials, and of industrial goods, and in corresponding Soviet supplies of goods of interest to France. In addition, it is intended that the agreement should not only provide for deliveries of goods and materials traditional for the trade between the two countries, but also of other goods and materials to be mutually agreed by the parties The representatives of the two Governments also agreed to examine the question of exchanges of consumer goods, and methods of facilitating contacts between buyers and sellers.

It was decided that negotiations for the conclusion of this agreement, which would be valid for three years, should open in Paris in September, 1956, so that the agreement could come into force on Jan 1, 1957 The Soviet representatives declared that, in the absence of trade restrictions and discrimination, the Soviet Union could, within the above-mentioned period, considerably increase its purchases of French products and, correspondingly, the sale of Soviet products in France, so that by the end of the three-year period the volume of Franco-Soviet exchanges would be approximately three to four times higher than in 1955.

The representatives of the two Governments noted with satisfaction that agreement had been reached on establishing a shipping line between French ports and Soviet ports in the Baltic."

Cultural Relations. "The representatives of both countries devoted particular attention to the question of cultural, scientific, and technical exchanges between France and the U.S.S.R., and found themselves in full agreement on the need to encourage every possible development of these exchanges.

The French Government informed the Soviet Government of its desire to increase contacts in the spheres of science and the arts. It expressed its willingness to invite a group of Soviet scientists and engineers to visit installations of the French High Commissariat for Atomic Energy, and to organize in Paris performances of the ballet company from the Moscow Bolshoi Theatre. The Soviet Government, in turn, expressed its intention of expanding cultural relations with France in the fields of science and the arts, particularly with regard to the exchange of books and periodicals.

Both Governments approved the text of a joint statement, annexed to this communiqué [see below], which defines the principles and forms of Franco-Soviet cultural co-operation."

European Atomic Co-operation. "The French and Soviet representatives explained their respective views concerning the creation of European organizations, notably in the field of using atomic power for peaceful purposes. Both Governments agreed to co-operate in this sphere, especially within the framework of the United Nations."

Algeria. "The French representatives informed their Soviet colleagues about the problems facing them in Algeria, and the policy pursued there by the French Government. The Soviet representatives expressed the hope that the French Government, acting in the liberal spirit which animates it, will be able to find for this important problem an appropriate solution reflecting the spirit of our times and the interests of the peoples."

Conclusion. "The representatives of the two Governments expressed their mutual satisfaction with the results of these discussions, and agreed upon the usefulness of the renewal of similar contacts"

The Annex to the joint communiqué announced the following results of the discussions on Franco-Soviet cultural relations:

(1) Both Governments had agreed to ensure maximum co-operation, on a reciprocal basis, in the spheres of literature and art, science and technology, health services, education, etc., by means of exchanges of delegations and individuals; and to promote the exchange of students to an increasing extent

(2) They would also promote on a reciprocal basis the "exchange of achievements" in the above-mentioned spheres through the mutual supply of relevant information, the holding of exhibitions, the exchange of text-books, scientific and technical literature, and periodicals; and the organization of guest performances by theatre companies and concert artists In response to an invitation by the French Government, the ballet of the Bolshoi Theatre [Moscow] would visit France to give guest performances.

(3) The two Governments had expressed the wish for closer co-operation in radio and television, notably through relays of concerts and exchanges of radio and television programmes on a reciprocal basis

(4) In the matter of film exchanges they had agreed to conclude a draft agreement, to be signed in the very near future. They had expressed the wish that each country should have the opportunity of showing documentary and scientific films of the other on a non-commercial basis

(5) They would promote the development of sporting contacts and exchange experience in the sphere of physical culture.

(6) They would encourage the development of tourism by individuals and groups.

(7) They would "endeavour to promote the . . development of contacts between the most representative and competent organizations of the two countries concerned with cultural relations"

(8) They had agreed (*a*) to co-operate in a broad and freer exchange of information between the two countries, with the aim of extending the two peoples' knowledge of each other's culture, way of life, and social structure, (*b*) to the publication in the U S S R, on a reciprocal basis, of a French periodical in the Russian language by competent French bodies. They would also examine the possibility of opening, on a reciprocal basis, a French reading-room in the U S S R containing French *belles-lettres*, scientific and technical literature and periodicals, as well as music recordings, and of a Soviet reading-room in France containing Soviet *belles-lettres* and scientific and technical literature and periodicals, as well as recordings of Russian music

(9) The two Governments agreed to search for and examine other measures which would contribute to the improvement of cultural relations between France and the Soviet Union

(10) They also agreed on the desirability of drafting and signing at a later date a cultural co-operation convention, to be drawn up by the competent departments.

At a press conference on May 19 M. Mollet said that he and M. Pineau had explained to the Soviet leaders, before signing the joint declaration, that the decisions reached "were quite compatible with the obligations which we have undertaken at an earlier time."

M. Mollet also said, in reply to a question, that the Soviet leaders were not hostile to the principle of German reunification, but that there was disagreement on the methods of carrying it out. Asked about Algeria, M. Mollet replied that this was "essentially a French problem" and that the French Government had not intended to make it the subject of discussion "The same spirit," he added, "animated the Soviet representatives, so much so that at no time during the official discussions was this question raised." Only during the final reception had views been exchanged with the Soviet leaders on the Algerian question, and it had then been decided by both sides, because of its importance, to include a reference to it in the final communiqué.

M. Mollet left Moscow on May 20, returning to Paris by air the same evening. Before his departure he invited Marshal Bulganin and M. Khrushchev to visit France. M. Pineau visited Leningrad, Kiev, and Erivan before returning to Paris on May 25, stopping *en route* in Prague for talks with the Czechoslovak Foreign Minister.

It had become known that at the reception given by Marshal Bulganin to the French Ministers on May 19, M. Krushchev had drunk a toast to "all the Arab peoples" in the presence of the Egyptian, Lebanese, and Syrian Ambassadors. M. Khrushchev was reported to have said "We are for all oppressed peoples, and for all those who fight for their national and social liberation. It is impossible to turn back the wheel of history, and those who fail to understand this will be swept away by the current . . ."

The first issue of *Nouvelles de Moscou*, a new Soviet publication in the French language, appeared in the Soviet capital on May 16. It is published twice a week and deals with foreign and internal political affairs.—(Le Monde, Paris - Soviet Weekly) **(Prev. rep. 14815 A.)**

A. SOVIET UNION. — Execution of Ex-Premier of Azerbaijan and Police Officials.

The newspaper *Baku Rabotchnik* (Baku Worker) announced on May 28 that Mir Jafar Bagirov, Premier of Azerbaijan until the downfall of Beria in 1953, had been executed after having been found guilty of treason, counter-revolutionary activities, acts of terrorism, and responsibility for the liquidation of innocent persons. It was stated that three senior police officials had also been executed for similar crimes, and that two others had been given sentences of 25 years' imprisonment.

Bagirov was accused of having collaborated with Beria in numerous "terroristic and anti-revolutionary" activities dating back to the early days of the Revolution, of having liquidated persons opposed to Beria including three former secretaries of the Azerbaijan Communist Party, and of having intrigued with Beria against Sergei Ordjonikidze [the Georgian Communist leader who played a prominent role in the October Revolution and who died in mysterious circumstances in 1937] All the accused were found guilty of extracting forced confessions from innocent people by illegal means, compelling persons to bear false witness against innocent prisoners, and participating in terrorist and counter-revolutionary acts.

The police officials executed with Bagirov were R A Makarian (a former vice-commissar for security in Azerbaijan), K I. Grigorian, and T M Bortschev Those sentenced to 25 years' imprisonment were S F Emelyanov and A S Atakishev.

The paper stated that the trials had been held before a military court in Baku from April 12-26, and that appeals by the condemned men for clemency had been rejected by the Supreme Court of the U S.S.R. No mention of the trials or of the execution of Bagirov was made in the Moscow press or radio. (Times - Le Monde, Paris) **(Prev. rep. Bagirov, 13029 A.)**

B. PERSIA. — Claim to Sovereignty over Bahrein.

The Persian Foreign Minister, M. Ardalan, made a statement on April 8 reiterating Persian claims of sovereignty over Bahrein, in reply to a British Foreign Office statement of April 5 to the effect that Bahrein was an independent sheikhdom.

M Ardalan affirmed that Bahrein was "an inseparable part of Persia," that the Persian Government could not recognize it as an independent British-protected sheikhdom, and that Persia intended firmly to defend her "juridical and political" claim He maintained that Persian sovereignty over the island had been recognized several times in the 19th century by Britain, and that the ruling dynasty of Bahrein had on several [unspecified] occasions sworn fealty and paid taxes to Persia The Persian Government, however, did not intend to place this dispute before the Baghdad Pact Council, and discussions with Britain would be maintained in a "direct and friendly manner."

Bahrein, originally under Persian suzerainty, was captured in 1783 by a Kuwaiti sheikh whose family has since ruled it as an independent sheikhdom. In 1861 the then ruling sheikh sought and was granted British protection. The status of Bahrein has been a subject of controversy between Britain and Persia for many years.—(Times - Sunday Times - Observer) **(Prev. rep. 12327 B.)**

C. UNITED KINGDOM. — Labour and Manpower. - Revocation of Notification of Vacancies Orders.

The Notification of Vacancies Orders, 1952, which had required employers to engage workers through employment exchanges, were revoked on May 7. They had applied—with some exceptions—to men between the ages of 18 and 65 and women between 18 and 60, and had been designed to steer people into jobs of national importance.

The Minister of Labour (Mr. Iain Macleod) had explained on May 1 that the usefulness of the Orders was no longer sufficient to justify the restrictions they had placed on the engagement of workers by employers, and he had accordingly decided to revoke them. This decision had been taken in agreement with the National Joint Advisory Council (the body consisting of representatives of employers, workers, and the nationalized industries which advises the Government on labour questions), and it was hoped that the step would save employers, workers, and the Ministry of Labour a good deal of work. Mr. Macleod pointed out that the labour exchanges would still remain available for use by employers and workers.

The revocation of these Orders meant that the prefaratory notices in "situations vacant" advertisements in newspapers were no longer required.—(Daily Telegraph) **(11973 A.)**

A. UNITED KINGDOM. — Central Pool of Overseas Civil Servants.

Mr. Lennox-Boyd (the Colonial Secretary) announced in the House of Commons on May 18 that the Government had decided in principle to establish in Britain a central pool of officers of the Overseas Civil Service with exceptional administrative or professional qualifications, who would be employed by the U.K. Government but would be made available as required on secondment to overseas Governments. It had also been decided to introduce a scheme whereby pensionable overseas Civil Servants serving in a territory which had attained self-government might transfer, on certain conditions, to a Special List, and would thenceforth be in the service of the U.K. Government and seconded to overseas Governments.

Explaining that an urgent staffing position had arisen in the territories comprising the Federation of Nigeria, Mr. Lennox-Boyd said that H.M. Government realized "the anxieties and uncertainties which affected the service there" and wished to help the Nigerian Governments to keep experienced staff who might otherwise retire under compensation schemes. It was therefore prepared to accept certain important obligations towards existing staff, and proposed—subject to the agreement of the Nigerian Governments—to introduce the scheme for transfer to a Special List. This scheme would be in a form which would enable it to be applied to other territories as and when H.M. Government were satisfied that circumstances made this desirable.

A White Paper (Cmd. 9768) published on the same day pointed out that as Colonial territories approached and attained self-government, they would from time to time need the assistance of officers with exceptional qualifications, many overseas Governments had already said that they would like to be able to look to Britain for help in finding such officers. In order to meet these prospective needs, the Government intended to recruit people with the necessary qualifications for secondment to overseas Governments as required. Lists of persons ready to accept service of this kind would be prepared. If the demand rose to substantial proportions, and regular employment for a number of years could be foreseen, these persons would come into the regular employment of the U.K. Government, after consultation with the employing Government, and their pensions and any compensation payments for which they might qualify on retirement would be paid to them by the U.K. Government and recovered from the employing Government. The employing Government would be asked to agree not to terminate the secondment of any officer (except on ground of ill-health, misconduct, or inefficiency) without giving one year's notice, and to consult the U.K. Government before introducing any reorganization scheme which might involve terminating the secondment of a considerable number of officers.

Officers transferred to the Special List (the White Paper continued) would accept an obligation to serve the U.K. Government up to the age of 50 in any post to which they might be assigned, except that they would not be required to accept assignments to posts which, in the British Government's opinion, were of less value than those in which they were currently serving. The Government hoped to find continuous employment for all officers on the Special List up to the age of 50, but any officer who became unemployed through no fault of his own would be kept on full pay for as long as necessary up to a maximum of five years, or until he reached 50, while efforts were being made to place him. If in the last resort he could not be found suitable employment, he would get his pension, plus any additional compensation for which he would have been eligible if he had remained in his former service instead of transferring to the Special List.

The White Paper stated that there were at present about 15,000 overseas Civil Servants, including about 6,000 serving in territories where the introduction of full self-government might affect their position. (Cmd. 9768 - Daily Telegraph)

B. BELGIUM. — National Institute of Sport to be financed from Tax on Football Pools.

Legislation for the creation of a National Institute of Sport, to be financed from a tax on football pools, was passed by the Belgian Chamber of Deputies on March 9 after earlier approval by the Senate. The National Institute of Sport is designed to "propagate physical education and sport among the whole population," its funds being provided by a 20 per cent tax on football pool receipts. (La Nation Belge, Brussels)

C. TURKEY. — Increase in Bank Rate.

The Turkish Central Bank increased its Bank Rate from 4½ per cent to 6 per cent on June 6, stating that the increase had been made to check inflationary tendencies. The previous increase from 3 to 4½ per cent had been made in June 1955. (Financial Times) **(Prev. rep. 14311 B.)**

D. SPAIN. — Recognition of Tunisian Independence.

Spanish recognition of Tunisia as a sovereign and independent State was announced in Madrid on May 15. It was stated that diplomatic relations would shortly be established between the two countries.—(A.B.C., Madrid) **(14907 C; 14858 C.)**

E. NETHERLANDS. — General Election.

General elections were held in the Netherlands on June 13 for a new Lower House of the States-General (100 members). The distribution of seats in the new House and the votes cast for the various parties are shown below, with comparative figures for the last (1952) elections:

	Seats		Votes		Gain (+) or
	New House	Old House	1956	1952†	Loss (−)
Labour Party	34	30	1,871,990	1,545,304	+ 4
Catholic People's Party	33	30	1,815,242	1,529,289	+ 3
Anti-Revolutionary Party*	10	12	567,517	603,111	− 2
Party of Freedom and Democracy (Liberals)	9	9	502,325	470,820	unchanged
Christian Historical Union*	8	9	482,848	476,097	− 1
Communists	4	6	272,167	328,641	− 2
Political Reform Party*	2	2	129,572	129,057	unchanged
Catholic National Party	—	2	—	144,517	

*Protestant parties. † Revised figures

The Labour Party, led by Dr. Drees (the Prime Minister), emerged as the strongest political group in the new Lower House, gaining four seats and increasing its poll by over 300,000 votes. The Catholic People's Party also polled nearly 300,000 votes more than in 1952, gaining three seats. The three Protestant parties polled almost the same number of votes as in 1952 but lost three seats, while the Liberals increased their poll by about 30,000, their representation remaining unchanged. The biggest setback was suffered by the Communists, whose vote fell by over 56,000 and who lost two seats. The Catholic National Party, which had two seats in the last Parliament, is now absorbed in the Catholic People's Party.

Three other parties also submitted lists but failed to obtain the necessary minimum of one per cent of the total number of votes cast, and are therefore unrepresented in the new House. They were the Reformed Political Union; the National Union, a Christian right-wing group led by former members of the Catholic National Party; and the Netherlands Opposition Union, which has analogies with the Poujadist movement in France. The Netherlands Government had refused to allow M. Poujade to enter Holland to address a meeting of the last-named party during the electoral campaign.

Of the three Protestant parties, the Political Reform Party (the smallest of the three) is "rightist"; the Anti-Revolutionary Party is moderate or "centrist"; and the Christian Historical Union is, broadly speaking, "liberal."

Unlike Britain, the Netherlands is not divided into constituencies but the whole country is considered as a single electoral territory, the electors voting for parties and not for individual candidates. The 100 seats in the Lower House are distributed in proportion to the total number of votes polled by the various parties, a minimum of one per cent of the total being required for parliamentary representation. Voting is compulsory for all citizens, male and female, over 23 years of age; however, though attendance at polling stations is compulsory, the individual voter may, if he wishes, leave his ballot-paper blank. The total number of votes cast at the general election was 5,727,355, representing 93 per cent of the electorate.

The Upper House of the States-General (50 members) was elected by the Provincial Councils after the general elections, the membership of the new House being as follows: Catholic People's Party, 17; Labour Party, 15; Anti-Revolutionary Party, 7; Christian Historical Union, 6; Party of Freedom and Democracy, 4; Communists, 1. The only change was a Labour gain of one seat from the Communists.

Dr. Drees, the outgoing Prime Minister, was asked by Queen Juliana on June 17 to form a new coalition government. He subsequently invited the leaders of the five major parties—the Labour Party, the Catholic People's Party, the Anti-Revolutionary Party, the Christian Historical Union, and the Party of Freedom of Democracy—to take part in consultations for this purpose.—(Netherlands News Agency - Algemeen Handelsblad, Amsterdam - Nieuwe Rotterdamse Courant)
(Prev. rep. 12382 A; Constitutional Reform, 14858 B.)

F. NEPAL. — Creation of State Bank.

King Mahendra inaugurated Nepal's first State Bank—officially described as a "royal gift to the nation" in connexion with the King's coronation—on April 26. The State Bank, besides issuing bank notes, will regulate the Nepalese currency, fix foreign exchange rates, and help in the preparation of a national budget. (The Statesman, Calcutta)

JUNE 23—30, 1956

A. YUGOSLAVIA. — President Tito's Visits to the U.S.S.R. and Rumania. - Soviet-Yugoslav Statement on International Problems. - Re-establishment of Contacts between Soviet and Yugoslav Communist Parties.

In response to an invitation extended by Marshal Bulganin and M. Khrushchev during their visit to Yugoslavia in 1955, President Tito paid a three-weeks' visit to the Soviet Union from June 2-23, accompanied by Mme. Broz-Tito, M. Kardelj, vice-president of the Yugoslav Federal Council, and M. Koca Popovich, the Yugoslav Foreign Minister.

President Tito travelled by train to Moscow *via* Rumania, arriving in the Soviet capital on June 2. He was welcomed at the station by President Voroshilov and all leading members of the Soviet Government—including Marshal Bulganin, M. Khrushchev, M. Mikoyan, M. Kaganovich, M. Shepilov, the new Foreign Minister, and M. Molotov, his predecessor—and replied as follows to an address of welcome by President Voroshilov :

" The joint struggle of our peoples against the common enemy from 1941 to the end of the war testifies to the great truth that our fates are inseparable, and that the two peoples esteem and respect each other. However, something tragic and unheard-of took place [i e Yugoslavia's post-war expulsion from the Cominform and the resultant break in Soviet-Yugoslav relations], which was the fault neither of the peoples of Yugoslavia nor of the peoples of the Soviet Union Nevertheless we believed that the time would come when everything that kept us apart would be transformed, and that our friendship would acquire new and firm foundations That time has now come, thanks to the Leninist policy of the Government and Communist Party of the Soviet Union The recent visit of Bulganin, Khrushchev, Mikoyan, and others to Yugoslavia, the talks with them, the declaration that was drawn up, the courageous and far-sighted policy of the collective leadership of the Soviet Union—all constitute a guarantee that nothing of the kind will ever happen again between countries which follow the principles of Marx, Engels, and Lenin " Marshal Tito expressed his conviction that his talks with the Soviet leaders would " establish mutual understanding between us "

During his first week in the U.S.S.R. President Tito had a number of discussions with Soviet leaders on international affairs and questions affecting Soviet-Yugoslav relations. In addition he attended a State reception given at the Kremlin in his honour, and paid visits to the University of Moscow, the Soviet atomic energy establishment at Obninskoye (about 90 miles from Moscow), an agricultural exhibition, and the Bolshoi Theatre. On June 4 Marshal Tito went to the Lenin-Stalin Mausoleum in Red Square to lay a wreath on Lenin's tomb ; he ignored the tomb of Stalin, which is next to that of Lenin. On all his public appearances in Moscow the Yugoslav President was enthusiastically acclaimed by hundreds of thousands of people, his reception being the most enthusiastic ever accorded to any foreign statesman visiting the Soviet capital.

After a two-day visit to Leningrad (June 7-8) President Tito returned to Moscow for further political discussions with Soviet leaders, after which he visited Stalingrad (June 11), Krasnodar, Novorossisk, and the Black Sea resort of Sochi. During his visit to Stalingrad, on which he was accompanied by M. Khrushchev, his reception was so overwhelming that the great crowds swept aside the security police and almost " mobbed " the two statesmen.

On returning to Moscow (June 19) both Marshal Tito and M. Khrushchev addressed a crowd of 80,000 people in the Dynamo Stadium. They both emphasized that cordial and sincere relations had been re-established between Yugoslavia and the U.S.S.R., and that both Yugoslavia and the Soviet Union recognized the need to ease international tension and to establish friendly relations between all peoples, irrespective of their political and social systems

On June 20 two declarations were signed at the Kremlin at the conclusion of Marshal Tito's discussions with the Soviet leaders . (1) a joint declaration on the international situation, signed by President Tito and Marshal Bulganin ; and (2) a joint declaration on the restoration of relations between the League of Communists of Yugoslavia [the name under which the Communist party is known in Yugoslavia] and the Communist Party of the Soviet Union, signed by President Tito and M. Khrushchev.

Declaration on International Affairs.

After stating that the talks had been held in a " cordial and friendly " atmosphere, the joint statement enumerated the various subjects discussed (cross-headings inserted) .

Relaxation of International Tension. Both Governments noted with satisfaction that " general international tension has continued to diminish during the past year," and both welcomed " the ever-increasing tendency towards solving international disputes by negotiation." After noting that " a significant role in this respect was played by the Conference of the Heads of Government of the four great Powers in Geneva in 1955," the statement added : " Although the development of events during the past year has shown that it is not possible to expect a speedy solution of problems which have accumulated in the course of the ' cold war ' . . . it is of decisive significance that the efforts to expand international co-operation have grown, which contributes to the strengthening of confidence between nations."

The Role of the United Nations. " This new atmosphere," the statement continued, " has strengthened the power and ability of the United Nations to examine and successfully solve problems by the organized and equal participation of all countries The success of the Conference on the Peaceful Uses of Atomic Energy, organized by the U.N at Geneva in 1955, and the promising beginning of work on the creation of an International Atomic Energy Agency, are closely connected with this atmosphere. The strengthened role of the U N. has also found expression in the progress made towards universality by the admission of new members . . . "

China and the Formosan Question. The Soviet and Yugoslav Governments " noted with regret " that the People's Republic of China had not yet been admitted to the U N and said that they would " persistently strive that the right of this great country [to U.N. representation] be recognized." They also expressed their conviction that Taiwan (Formosa) and the Chinese offshore islands should revert to the sovereignty of the People's Republic of China, " of whose territory they legally formed part."

Disarmament and the " Cold War." This section of the joint statement was worded as follows : " Such opposing views were formed and so much distrust accumulated during the ' cold war ' that it would be neither logical nor just to expect every obstacle preventing the solution of international disputes to be easily removed, and for rapid agreement to be accomplished on every problem. In view of this, the two Governments are convinced that it is necessary to achieve agreements on questions which can be solved to-day. They are agreed that insistence on a definite priority regarding the order of examing disputes, and a definite pace in solving them, cannot yield beneficial results. In this light they have examined the questions of disarmament and collective security, as well as other questions which divide the world, especially Europe

" Bearing in mind the importance of disarmament for the future of mankind, the two Governments are agreed that the conditions are ripe for its urgent solution. At the same time they have underlined the significance even of a partial agreement on disarmament, and express the unanimous hope that such an agreement can be accelerated and facilitated by unilateral reductions of armed forces In this respect the Yugoslav Government welcomes the decision of the Soviet Government to reduce its armaments and armed forces, and regards it as a very great contribution to facilitating the solution of the question of general disarmament.

" Believing that the application of atomic power for peaceful purposes is of epoch-making significance for the economic and social development of mankind, the two Governments have agreed on the necessity to encourage every form of equal and democratic co-operation between the peoples in this field. Consequently, they have also agreed that the common goal should be the prohibition of atomic weapons generally, so that atomic power may serve only the peaceful purposes of mankind

" They consider that the present international situation enables decisive steps to be made towards removing the negative elements which hampered co-operation between the European nations during the period of the ' cold war,' and that broader agreements on general European collective security, on economic co-operation, and on the strengthening of cultural ties would contribute to liquidating the division of Europe into military blocs, and facilitate the solution of the principal disputes standing in the way of comprehensive co-operation between the European nations."

The German Question. " The two Governments consider that as two German States have taken shape on post-war German territory, negotiations are indispensable between the German Federal Republic and the German Democratic Republic for achieving their unification. They consider also that other States, primarily the great Powers, are under an obligation to work in the same direction, both in the interest of the German people and in the general interest."

Removal of Threats to Peace. " In the perspectives already opened up by the relaxation of international tension, the two Governments devoted special attention to the danger which may arise from local conflicts and disputes between States. They expressed their firm intention to co-operate in removing such threats, both in the United Nations and in their direct relations with States "

International Economic Co-operation. The two Governments expressed " their firm conviction that one of the fundamental reasons for the improvement of the international situation is the growing economic integration of the world, the ever more intensive participation of all nations in the exchange of goods, and the ever-increasing support of the peoples for international co-operation and *rapprochement* to achieve general prosperity, peace, and progress in the world." To this end (the statement continued) " it is necessary to exert maximum efforts to develop international trade and economic co-operation to the greatest possible extent, and to abolish all forms of discrimination in international economic relations . . The two Governments consider that the strengthening of contacts and co-operation in the fields of culture and scientific exchanges are important factors which can serve the same aim. In this spirit they will continue to support the dependent territories in their progress of gaining independence, in which a leading role should belong to the United Nations."

Aid to Under-developed Countries. "The two Governments are agreed that the great gap between the advanced and the under-developed countries is one of the most difficult problems of the present-day world, and that assistance to the under-developed countries—primarily by collective international action—is necessary to solve this question. They will continue their endeavours to ensure that broader and more effective measures for rendering economic and technical assistance to under-developed areas are taken within the United Nations Such assistance . should be free from any military or political conditions."

Peaceful Co-existence. The Soviet and Yugoslav Governments "reaffirmed their devotion to the policy of peaceful and active co-existence, based on the principles of sovereignty, independence, territorial integrity, non-aggression, equality, mutual respect, and non-interference in internal affairs." Such a policy would provide "the most successful means for the consolidation and strengthening of comprehensive co-existence between countries, irrespective of differences in their social, economic and political systems"

Soviet-Yugoslav Relations. After saying that special attention had been devoted "to examining the relations between the two countries," the statement declared that it had been "established with great satisfaction that the principles expressed in the Declaration of the Governments of Yugoslavia and the U.S.S.R. of June 2, 1955 [see page 14266], on which their relations are based, have created foundations for friendly all-round co-operation and have served the interests of peace and international co-operation"

The statement recalled "with satisfaction" that the two Governments had successfully settled the question of mutual claims; that they had developed economic co-operation "upon mutually beneficial foundations", that trade exchanges had been regulated, and that agreements had been signed on scientific-technical co-operation, the utilization of atomic energy for peaceful purposes, and cultural co-operation. Moreover, the two Governments had decided "to increase scientific co-operation and the exchange of scientists, specialists, students, and scientific literature"

In conclusion, the joint statement said that President Tito's visit to the Soviet Union "will constitute a new important stage in the development of co-operation and friendship between the peoples of Yugoslavia and the U.S.S.R."

Restoration of Relations between Soviet and Yugoslav Communist Parties. - Agreement on Mutual Co-operation.

After saying that "representatives of the League of Communists of Yugoslavia (L.C.Y.) and of the Communist Party of the Soviet Union (C.P.S.U.) have exchanged views on relations and co-operation between the two parties in a spirit of comradely sincerity and frankness," the joint statement announced that agreement had been reached on the following:

"(1) The Belgrade Declaration of June 2, 1955, placed the relations between the two Socialist countries upon sound foundations, and the principles contained therein are finding even broader application in their mutual co-operation

"(2) Co-operation and the general development of relations between the two countries since the Belgrade Declaration . . have created favourable political conditions for co-operation between the L.C.Y. and the C.P.S.U. Proceeding from this, and taking into consideration the concrete conditions under which present-day Socialist movements are developing, and the spirit of the internationalistic principles of Marxism-Leninism, the L.C.Y. and the C.P.S.U. have agreed that it is useful and indispensable that the existing contacts between the two parties should develop . with a view to co-operation in the international workers' movement, in numerous matters relating the present-day development of Socialism, in developing peaceful co-existence and co-operation between peoples of the whole world, irrespective of differences in their social and political systems, and in the interest of the consolidation of peace, freedom, and independence of nations . .

"Co-operation between the L.C.Y. and the C.P.S.U. . . . will undoubtedly contribute to the development of further co-operation between Yugoslavia and the U.S.S.R., and to the consolidation of lasting friendship between the peoples of Yugoslavia and the Soviet Union.

"(3) Holding the view that the roads to and the conditions of Socialist development are different in different countries and that any tendency to impose one's own views in determining the roads and forms of Socialist development are alien to both sides, the two parties have agreed that their co-operation should be based on complete freedom of will and equality, on friendly criticism, and on the comradely character of the exchange of views on disputes between our parties.

"(4) On the above-mentioned foundations co-operation between the L.C.Y. and the C.P.S.U. will evolve primarily through (*a*) a comprehensive mutual study of the forms and methods of Socialist developments in the two countries, (*b*) the free and comradely exchange of experiences and views on questions of general interest for the development of Socialist practice and the promotion of Socialist thought, and also on questions relating to peace, *rapprochement*, and co-operation between nations, and the progress of mankind in general

"(5) The modern material and spiritual transformation of the world . . confronts the international workers' movement with many tasks of the first magnitude. It also makes indispensable a scientific analysis of the . fundamental material and social factors and tendencies in the present-day world For these reasons the delegations have agreed, guided by the principles of Marxism-Leninism, to exchange views in the field of Socialistic scientific thought both in their mutual relations and in the international workers' movement generally.

"(6) As regards concrete forms of co-operation between the L.C.Y. and the C.P.S.U., the delegations agreed that it should be implemented by personal contacts, written and oral declarations, exchanges of views, exchange of delegations and literature, mutual meetings of party workers with a view to examining current questions of general interest, and generally by way of all forms of constructive comradely discussion

"(7) The workers' movement of the two countries consider such mutual co-operation as a component part of all contacts with other Communist and workers' parties, as well as with Socialist and other progressive movements in the world

"(8) The L.C.Y. and the C.P.S.U. consider that it is in the interests of the struggle for lasting peace and security, as well as of social progress, to ensure the wide co-operation of all progressive and peaceful forces, which is increasingly being manifested in the most varied forms and on a world-wide scale This co-operation is one of the most pressing needs of modern social development

"These ties should be equal, frank, democratic, and accessible to world public opinion They should aid mutual acquaintance and consultation on different problems of general interest, and contribute to mutual understanding on the basis of a patient explanation of the attitudes and views of the different sides This means the freedom of action of each individual participant in that co-operation, according to the conditions of his development and in keeping with the general progressive aims to which they aspire

"The L.C.Y. and the C.P.S.U. are convinced that co-operation between the workers' movements of Yugoslavia and the Soviet Union, on the basis of the above-mentioned principles, will serve the interests of their peoples and the interests of Socialist construction in their countries They are convinced that this co-operation will contribute to a general *rapprochement* between Socialist and other progressive movements in the world, and will serve the interests of world peace and the general progress of mankind"

President Tito's Visit to Rumania. - Return to Belgrade.

After a visit to Kiev (June 20) President Tito arrived in Bucharest on June 24 for discussions with leaders of the Rumanian Government, including M. Chivu Stoica, the Prime Minister, and M. Gheorghiu-Dej, first secretary of the Rumanian Workers' (Communist) Party. As in the U.S.S.R., he was given an enthusiastic reception by great crowds, and was greeted by M. Stoica as "our honoured and beloved comrade." During his three days' stay in Rumania Marshal Tito also visited the oil city of Ploesti.

Communiqués issued at the end of President Tito's visit said that there had been a general exchange of views on international problems and Rumanian-Yugoslav relations; that both Governments would support international co-operation through U.N. action; and that the Rumanian and Yugoslav Communist parties would establish "friendly co-operation" through exchanges of information, literature, and delegations. It was also announced that Rumania and Yugoslavia would co-operate in building a large power-station to harness the waters of the Danube at the Iron Gates (on the Rumanian-Yugoslav frontier), and that agreements would be drawn up for economic co-operation between the two countries. Speaking at a mass demonstration in Bucharest, Marshal Tito declared that Yugoslavia and Rumania had "agreed to forget the past and start on a new road of friendship."

On returning to Belgrade (June 27) President Tito expressed his conviction that the leaders of the U.S.S.R. did not want war and strongly desired peace in order to build Socialism. After welcoming the re-establishment of friendly relations between the two countries, he emphasized that Yugoslavia also wanted to develop her relations with the West, and that it was absurd to suggest that the restoration of good relations between the Communist countries implied any sort of "line-up" against the non-Communist nations. Deploring the fact that a section of American opinion wished to stop U.S. economic aid to Yugoslavia, apparently because Yugoslavia had restored friendly relations with the U.S.S.R., Marshal Tito said that Yugoslavia had always expressed her thanks for U.S. aid, but had "never agreed to receive it under degrading conditions or in a way which would tie our hands in our foreign policy. That has been so hitherto, and it holds good for the future." He expressed satisfaction, however, that the most responsible leaders in the U.S.A. had understood the aims of his visit to Moscow, and said that the Soviet leaders agreed with Yugoslavia that relations with the West should be broadened. During his stay in Moscow he had also discussed the Balkan Pact and explained that its role was "not to make an assault on open doors" but to develop useful friendship between the Balkan countries. In conclusion, he mentioned that the Rumanian Government had promised to return to their homes all the members of the Serbian minority whom they had deported from the border area with Yugoslavia during the time of Yugoslavia's dispute with the Cominform countries.

Soviet-Yugoslav Economic and Cultural Agreements.

Prior to Marshal Tito's visit to the Soviet Union, a number of agreements had been concluded between Yugoslavia and the U.S.S.R. in the fields of economic and cultural co-operation, as summarized below:

(1) An agreement on scientific and technical co-operation, signed in Belgrade on Dec. 19, 1955, provided for the exchange of experience in industry and agriculture, the mutual exchange of patents, licences, and technical treatises, and the establishment of a joint commission to promote the objectives of the agreement

(2) A protocol on trade exchanges during 1956 of a minimum value of $35,000,000 in each direction, signed in Belgrade on Jan 6, 1956. It provided for Yugoslav exports to the U.S S.R. of cement (50,000 tons), tobacco, hemp, meat, dried prunes, lead, bauxite, woollen textiles, leather, chemicals, and timber products, against Soviet exports to Yugoslavia of coal (200,000 tons), cotton, naphtha, artificial fertilizers, oats, manganese ore, non-ferrous metals, and machinery.

(3) An agreement embodying the principles of the "September protocol" (see 14412 A) on industrial co-operation between the two countries, also signed in Belgrade in January 1956. It provided for Soviet assistance in the construction of (*a*) a factory for nitrogen fertilizers to produce 100,000 tons annually, (*b*) a factory for the production of super-phosphates with a potential annual production of 250,000 tons of super-phosphates and 20,000 tons of sulphuric acid; (*c*) a power plant of 100,000 kw. capacity; and (*d*) the expansion and reconstruction of three Yugoslav mines It was stated that work on these projects would be spread over the next three years; that Soviet organizations would draw up the building plans, and supply equipment and part of the material needed for the factories, that the Soviet Government would send industrial experts to Yugoslavia, and accept Yugoslav technicians for training in Soviet factories; and that it would grant a credit to Yugoslavia, repayable within ten years at two per cent interest, to cover the costs of the planning work, equipment, and materials

(4) An agreement on Soviet assistance in the construction of a nuclear reactor in Yugoslavia, signed in Belgrade on Jan 28, 1956 It provided for exchange of information on nuclear development, and for Soviet scientific and technical assistance in drawing up the necessary plans for the reactor.

(5) A cultural convention, signed in Belgrade on March 30, 1956, providing for intensified cultural relations in the fields of art, science and education, and for exchanges of students and scientists.

M. Veljko Micunovich, Under-Secretary of State for Foreign Affairs, was appointed Yugoslav Ambassador in Moscow on March 5. He succeeded M. Vidich, who had held the post since 1953, when Yugoslavia and the U.S.S.R. exchanged ambassadors for the first time since the Cominform split in 1948. (Tanjug Agency, Belgrade) **(Prev. rep. Bulganin-Khrushchev Visit to Yugoslavia, 14265 A; Tito Visit to France, 14891 A; Soviet-Yugoslav Economic Co-operation, 14412 A; Atomic Co-operation, 14631 B.)**

A. URUGUAY. — Cabinet Reorganization.

A Cabinet crisis within the Batllista party, principally over budgetary proposals, caused the resignation of several Ministers of the Uruguayan Government on May 11. A Cabinet reorganization was announced on May 15, the membership of the reformed Cabinet being as follows:

Dr. Francisco Gamarra ..	Foreign Affairs.
Dr. Alberto Abdala .. .	Interior.
Dr. Armando R. Malet ..	Finance.
Señor Florentino Guimaraens ..	National Defence.
Señor Washington Fernandez	Public Works.
Dr. Vicente Basaguti ..	Health.
Dr. Amilcar Vasconcellos	Livestock and Agriculture.
Señor Fermin Sorhueta .	Industry.
Professor Clemente I. Ruggia ..	Education.

Only Dr. Malet and Sr. Fernandez retained their portfolios, while Dr. Gamarra, the new Foreign Minister, had previously held the portfolio of the Interior. Dr. Malet, however, resigned on June 12 and was succeeded as Finance Minister by Señor Ledo Arroyo Torres (the President of the Senate), who had held the portfolio of Finance from 1947 to 1949.

The differences within the Batllista party (the principal party represented in the Government) were caused by an economic and financial crisis due to an inflationary situation characterized by sharp increases in wages and prices, and resulting in the fall of the Uruguayan peso to its lowest-known level—the free market quotation of 417 pesos = $100 on May 11 comparing with 285 pesos to $100 a month earlier, and 85 pesos in 1945. Dr. Malet's Budget proposals included a modest income-tax—an innovation, as no such tax had hitherto been imposed in Uruguay. This, however, was opposed by one wing of the Batllista Party (commonly known as "List 14") headed by Señor Cesar Batlle (son of the late President Batlle y Ordoñez), while Dr. Malet's proposals had the support of the party faction known as "List 15," led by Señor Luis Batlle Berres (a cousin of the late President), himself a former President of Uruguay, and President of the Council of Government in 1955-56.—(New York Times - Bank of London and South America, Fortnightly Review) **(14762 F; 14052 C.)**

B. UNITED KINGDOM. — New Towns Development. - Government Advances, Capital Expenditure, and Building Progress. - New Town Project for Kent.

The annual accounts for the New Towns, published on June 18 by the Ministry of Housing and Local Government and the Department of Health for Scotland, showed that total Government advances to the development corporations of the New Towns at March 31, 1955, amounted to £108,257,465, of which £97,170,335 had been advanced to English and £11,087,130 to Scottish corporations.

Total capital expenditure on capital account for which ministerial approval had been given by March 31, 1955, was approximately £145,500,000. Total Exchequer commitments in the period to March 31, 1955, were estimated at £300,000,000-£325,000,000, but repayments of advances to corporations were thought to have amounted to £20,000,000

The report stated that 33,334 dwellings had been completed in the 14 New Towns as at March 31, 1955, and that 11,034 were under construction. Expenditure on land, buildings, and main services totalled £30,240,000 in 1954-55, compared with £30,119,016 in 1953-54 and £24,579,412 in 1952-53.

The 14 New Towns (intended populations in brackets) designated under the New Towns Act, 1946, were: Harlow (80,000) and Basildon (80,000), in Essex; Stevenage (60,000), Hemel Hempstead (60,000), Welwyn (50,000) and Hatfield (25,000), in Hertfordshire, Crawley (50,000), in Sussex; Bracknell (25,000), in Berkshire; Corby (40,000), in Northamptonshire; Cwmbran (35,000), in Monmouthshire; Peterlee (35,000) and Aycliffe (10,000), in Durham; Glenrothes (32,000), in Fifeshire; and East Kilbride (45,000), near Glasgow.

The eight New Towns in the Home Counties—Harlow, Basildon, Stevenage, Hemel Hempstead, Welwyn, Hatfield, Crawley, and Bracknell—are designed to relieve congestion in the London and Greater London areas. and to decentralize industries from the metropolis Corby is built around the Stewart and Lloyds' steelworks, Cwmbran and Aycliffe are based upon existing industrial estates, Peterlee is designed as a new industrial community to absorb surplus labour in a declining coalfield, Glenrothes is designed as a residential centre for an expanding coalfield; and East Kilbride is built to relieve housing congestion in Glasgow.

A fifteenth New Town—Cumbernauld (Lanarkshire)—was designated by the Secretary of State for Scotland in July 1955 (see 14714 B) Like East Kilbride, it is designed to relieve "overspill" from Glasgow, and is intended to house 50,000 people.

A £20,000,000 scheme for the building of a new town by private enterprise at Allhallows-on-Sea (Kent), on the Thames estuary opposite Southend, was announced on June 1, 1956.

The new town, designed to house 25,000 people and light industries, is planned by the Dolphin Development and Management Co Ltd, a subsidiary of Richard Costain Ltd. If the plan is approved by the Kent County Council, the town will be built on an 800-acre site at present used partly for agriculture and partly as a caravan and pleasure resort The development of the British Petroleum Co's oil refinery (which is adjacent to the site), and a proposed new plant for the South-Eastern Gas Board, mean that hundreds of workers have at present to travel many miles to and from their homes, and the new town scheme is mainly aimed at selling houses to these people, as well as attracting light industry. The designer, Mr. Frederick Gibberd (formerly architect-planner for the Harlow New Town), envisages three neighbourhoods with shopping facilities, a town centre with 60 shops, a central park, and seafront development.

Members of the development company include Sir Richard Costain and Sir Howard Roberts, lately Clerk to the London County Council until his retirement. (Times - Daily Telegraph) **(Prev. rep. 13783 A; 11461 A; New Towns Act, 8070 A.)**

C. FRANCE. — Restoration of Rouen Cathedral.

Rouen Cathedral, which was severely damaged during the war in Allied air attacks, was officially reopened on June 24 after the post-war work of restoration had been completed.

The service commemorating the restoration of the Cathedral was attended by President Coty, many members of the French Government, the Papal Nuncio (Mgr. Marella), the British Ambassador (Sir Gladwyn Jebb), most of the leading Roman Catholic clergy of France (including Cardinals Feltin, Gerlier, and Liénart), and Cardinal Griffin, Roman Catholic Archbishop of Westminster. Civic representatives from abroad included the Burgomaster of Amsterdam and the Lord Mayor of Bristol

The work of restoration was carried out by craftsmen working under the direction of two local architects, M Chauvel and M. Lenfry Though all the more modern glass was shattered by wartime bombing and had to be replaced, the medieval stained glass windows had been removed for safety at the beginning of the war and were reinstalled without loss. One new window has been offered by a British Roman Catholic association as "reparation" for the burning of Joan of Arc in 1431 The Cathedral has a new High Altar of green marble.

The restoration of Rouen Cathedral coincided with local celebrations of the 500th anniversary of the rehabilitation of Joan of Arc. (Le Monde, Paris - Times)

A. UNITED KINGDOM - AUSTRALIA. — Nuclear Weapon Tests in Monte Bello Islands. - Projected Tests in Pacific Ocean in 1957.

The British Ministry of Supply announced on Sept. 12, 1955, that two series of nuclear weapons tests would be held in Australia during 1956—the first in the Monte Bello Islands, off the north-western coast (the site of the first British atomic weapon tests in 1952), and the second at the new proving ground at Maralinga, South Australia (see 14141 B).

The statement also said that Mr. C. A. Adams would be scientific director of the Monte Bello tests, while a further announcement by the Ministry (April 3, 1956) stated that Commodore Hugh Martell, R.N., would be operational commander for the tests.

Mr. Adams (48), Chief of Research at the Aldermaston Atomic Weapons Research Establishment, was deputy scientific superintendent at the 1952 tests, and was scientific superintendent for the second series under Sir William Penney at Woomera in 1953.

The Monte Bello Tests.

The first detonation took place on May 16. According to official announcements, the "device" had been placed on a high steel tower at the northern end of one of the smaller islands in the group, and the explosion was "small" and "unspectacular." Press reports suggested that the device was probably a "trigger mechanism" for a hydrogen bomb, although there was no official comment upon the nature of the device tested.

A much larger explosion took place in the Monte Bellos on June 19, when a mushroom-shaped vapour cloud was visible at Port Hedland, 265 miles to the east. Blast effects were felt at Marble Bar, 280 miles from the scene of the explosion.

Special precautions had been announced before the tests, during which, it was stated, radioactive fall-out would be less than that following the 1952 explosions. As from May 1, a "danger zone" was proclaimed within a 150-mile radius of Flag Island in the Monte Bellos, while aircraft were advised to keep outside a radius of 600 miles over the sea and to fly at a height of less than 5,000 feet when over land within that distance.

In view of the fact that some public concern had been expressed about the fall-out after the explosion, the Australian Minister of Supply (Mr Beale) denied on June 20 that there was any cause for anxiety. At 5,000-10,000 feet, he said, all significant radioactive particles had gone into the sea; at 15,000-20,000 feet some cloud containing minute radioactive particles had drifted inland, but this was now tending to drift back towards the coast. [By June 21 this cloud had moved 100 miles out to sea.]

Sir Arthur Fadden, the Acting Prime Minister, commented on June 25 upon reports of radioactivity recorded at Marble Bar and of the falling of radioactive rain in Queensland. Pointing out that there was a simple explanation of these occurrences, he said that particles possessing insignificant radioactivity might remain airborne and travel round the world several times before being washed down by rain, but no danger to health could arise from them. The Australian Weapons Test Safety Committee had confirmed that the particles had been over the sea until all harmful concentrations had fallen out.

Forthcoming Tests at Maralinga.

Mr. Beale announced on June 19 that the second 1956 series of explosions would take place at Maralinga "not before the end of August." Various types of explosion would occur, mostly from towers, but it was possible that there would also be aerial tests. Some 200 Servicemen, largely from the U.K. but also a few from Canada and Australia, would be present as observers at the tests; they would be "indoctrinated into what can be expected" after an atomic explosion, but would not be exposed to any danger.

British Hydrogen Bomb Tests in 1957.

Sir Anthony Eden informed the House of Commons on June 7 that the U.K. Government proposed to carry out "a limited number of nuclear explosions in the megaton range" during 1957 "in a remote part of the Pacific Ocean." The Prime Minister spoke as follows:

"In the Statement on Defence, 1955 [see 14089 A] H.M. Government announced their intention to manufacture thermo-nuclear weapons. As I have previously stated, the holding of tests is an essential part of the process of providing ourselves with such weapons. The U.S.A. and the U.S.S.R. have already held such tests, and H.M Government have decided to carry out a limited number of nuclear test explosions in the megaton range.

"These will take place during the first half of 1957 in a remote part of the Pacific Ocean. The explosions will take place far from any inhabited islands, and the tests will be so arranged to avoid danger to persons or property. The tests will be high air-bursts which will not involve heavy fall-out. All safety precautions will be taken in the light of our knowledge and of experience gained from the tests of other countries.

"The main base of the R.A.F. aircraft taking part will be Christmas Island in the Pacific Ocean, and meteorological facilities will be installed there. H.M. Governments in Australia and New Zealand have agreed to make available to the task force various forms of aid and ancillary support from Australian and New Zealand territory.

"In reaching this decision H.M. Government in the United Kingdom have given full weight to the anxiety which exists about the indefinite continuance of tests of nuclear weapons without control and limitation. I emphasized on Dec. 6 [see 14566 A] that H.M Government were prepared to discuss methods of regulating and limiting test explosions which take account of their position and that of other Powers. This remains the policy of H M Government, and we shall seek every opportunity to put it into effect"

Mr. K. J. Holyoake, the acting Prime Minister of New Zealand, confirmed on June 8 that the N Z. Government had been consulted before the decision to use Christmas Island was taken.—(Times - Daily Telegraph - Manchester Guardian - Australian News and Information Bureau - Directorate of Information Services, Wellington) **(Prev. rep. Hydrogen Bomb, 14093 A; 14089A; Nuclear Weapon Tests, 13222 A.)**

Note. Christmas Island, just north of the Equator, is in a remote area of the Western Pacific about midway between Samoa and Hawaii. The largest atoll in the Pacific Ocean, it is one of the Line Islands, a group under British sovereignty which comprises Christmas, Fanning, and Washington Islands.

B. SYRIA. — New Government.

The Government headed by Sayed Ghazzi resigned on June 3. The immediate cause of the crisis was understood to be a dispute within the Cabinet over the proposed ban on Syrian wheat shipments to France and to French troops in Algeria, as a token of the Syrian Government's opposition to France's policy in North Africa. The ban on wheat exports had been imposed on May 30, lifted on June 1, but reimposed on June 2 after stevedores at Latakia had refused to load a wheat cargo for France, and after students had demonstrated at the Ministry of National Economy in Damascus.

After inter-party negotiations, a "Government of national union" was formed on June 15 by M. Sabry Assali, a former Prime Minister and leader of the National Party. It included representatives of all the Syrian parties except the Communists, its membership being as follows:

M. Sabry Assali (National Party), Prime Minister and Finance; M. Ahmed Kambar (People's Party), Interior; M. Salah-eddine Bittar (Socialist), Foreign Affairs, M. Khalil Kallass (Socialist), National Economy, M. Abdel Hassib Reslan (Constitutional Group), Defence; M. Majeddine Jabry (National Party), Public Works; M Rashad Jabry (National Party), Agriculture; M. Abdel Haoumad (People's Party), Education; M. Mustafa Zarka (Constitutional Group), Justice; M Abdel Hakki Nizzameddine (Liberal Democrat), Health, M. Mohamed Eliaesh (Liberal Democrat), Minister of State.

The Socialist Party—also known as the Arab Socialist (*Baath*) party—is strongly nationalist in outlook (see 14315 B). According to *Le Monde* (Paris) it is "tacitly linked to the Syrian Communist Party by a pact of common action"

In a statement to the Syrian Parliament on June 27, M. Assali said that the new Government would follow a neutralist foreign policy, would resist "Israeli imperialism" and all foreign pacts, and would support the Moslems of Algeria. (Le Monde, Paris) **(Prev. rep. 14454 A.)**

C. UNITED STATES. — Operation on President Eisenhower for Intestinal Complaint.

After he had been taken ill during the night of June 8-9, it was announced by President Eisenhower's doctors that the President was suffering from ileitis—inflammation of the lower part of the small intestine, which X-ray examination had shown to be partially obstructed. A successful operation was performed on the President on June 9 at the Walter Reed Military Hospital (Washington), the first bulletin stating that the President's condition was "very satisfactory" and that the heart action had remained "normal throughout." Subsequent bulletins stated that the President's pulse, blood-pressure, temperature and respiration were "essentially normal," and that, if all went well, the President should be able to resume the normal duties of his office within four to six weeks.

Dr. Paul Dudley White, the specialist who treated President Eisenhower after his heart attack last September, was flown to Washington in case any heart complications should develop. It was emphasized, however, that the attack of ileitis - a non-malignant disease—was not connected in any way with the President's former heart trouble, and that there were no adverse heart complications.

The President left the Walter Reed Hospital on June 30 to convalesce at his farm at Gettysburg (Pennsylvania). It was announced that the President would spend at least two weeks at Gettysburg, and that no further medical bulletins would be issued. (New York Times - New York Herald Tribune) **(Prev. rep. President Eisenhower, 14743 A.)**

A. NEW ZEALAND. — Report of Royal Commission on Monetary Affairs. - Increase in Interest Rates and Reserve Ratios. - Relaxation of Hire-Purchase Restrictions. - Overseas Exchange Position.

The Report of the Royal Commission on Monetary Affairs set up on March 16, 1955, to examine New Zealand's monetary, banking, and credit systems was laid before the N.Z. Parliament on April 19, 1956. The Commission expressed the view that no radical reforms were required in the present systems, but suggested that their administration might be improved.

The report reviewed the economic conditions prevailing between 1934 and 1955 and pointed out that New Zealand's recent economic problems had been mainly inflationary. The balance-of-payments deficits in 1951-52 and 1954-55 had resulted from an attempt by the country to live beyond its means The root cause of these problems lay in the failure to achieve a balance between private and public savings on the one hand and capital investment on the other. The internal value of the New Zealand £ had fallen from 20s. in the years 1926-30 to 10s. 7d in the last quarter of 1955 ; this compared with a fall in the purchasing power of the £ to 10s. 9d. in the U K. and to 8s. 3d. in Australia.

The Commission received evidence in favour of various schemes for reform of the monetary, banking and credit systems, but decided that none of them provided an acceptable solution to the problem of price instability. The proposals submitted to them, and rejected, included schemes for social credit, a state monopoly of credit creation, loanable bank deposit funds, and the issue of commodity currency.

The Commission pointed out that New Zealand could not be protected from every fluctuation in overseas markets, but they thought that the authorities had from time to time failed to prevent domestic spending from expanding unduly and creating an excessive demand for labour and other resources. The report attributed this failure to slowness in applying reserve ratio controls, to exaggerated reliance on voluntary co-operation from the trading banks, and to lack of co-ordination between various official fiscal policies, rather then to any inherent weakness in the reserve ratio system.

Suggested improvements were that Reserve Bank objectives should be made clearer to the trading banks ; that restriction of bank advances should be supported by other means more closely then they had been in the past two years ; and that greater attention should be given to stimulating voluntary saving through interest-rates and budgetary and housing policy.

Other recommendations by the Commission were :

(1) The monetary authorities, in co-operation with the trading banks, should assess appropriate levels of bank credit for several months ahead and provide direct financial incentives for co-operation with their policy.

(2) The cash held by the trading banks should be included with the balances in the Reserve Bank for the purpose of meeting the reserve requirements , fluctuation in bankers' cash should be reduced by the introduction of pay-as-you-earn taxation and the " staggering " of other taxes ; and more use should be made of overdraft charges and limits as an aid to credit policy.

(3) Although the profits made by the trading banks in 1943-54 were reasonable, the Government should have powers to enable it to investigate the banks' profits at any time in the future.

(4) Interest-rates should be gradually freed from control, and the rates themselves should be allowed to increase immediately.

(5) More businessmen should be included on the Capital Issues Committee; the limit of £10,000 on capital issues not requiring the Committee's consent should be raised appreciably; and the issue of preference shares (unless redeemable or subject to non-cumulative dividends) should be freed from control

(6) More facilities should be made available to the small investor.

(7) A short-term money market should be established in New Zealand.

(8) An Industrial Finance Corporation need not be established at present, although it might be desirable in the future.

(9) Overseas exchange reserves should be built up while export prices remained high.

(10) A " support price " scheme would be more desirable for farm products than a guaranteed price based on average cost of production.

(11) Borrowing from overseas should not be relied on to achieve stability when export prices were high, although New Zealand could properly borrow from the dollar area in line with general sterling area policy. [It had been announced on July 29, 1955, that the ban on remitting invested dollar capital and capital gains would be relaxed to encourage investment of U.S. capital.]

(12) Part of the increased proceeds resulting from sudden, sharp price rises of farm products, etc , expected to be temporary should be initially " frozen " and released over a period of years.

(13) New Zealand should join the International Monetary Fund and the International Bank for Reconstruction and Development.

(14) Better statistics should be obtained as a basis for policy, and an independent Economic Research Institute created.

(15) The relationship between the Government and the Reserve Bank should be defined by legislation.

(16) The accounts of statutory marketing agencies should be transferred from the Reserve Bank to the trading banks, with the exception of the Dairy Products Marketing Commission, whose account was exceptionally large.

(17) An Economic Advisory Council of five independent members should be set up to advise the Government on economic policies and to report on the state of the national economy.

(18) A longer parliamentary term would help the Government of the day to initiate unpopular but ultimately beneficial measures.

The Minister of Finance, Mr. J. T. Watts, stated on June 7 that the Government would await the final opinions of the Treasury and Reserve Bank and the parliamentary debate on the report before it decided what legislation to introduce to implement some of its recommendations.

Monetary measures announced either before the publication of the Royal Commission's report, or in implementation of it, included the following :

Reserve Ratios. These were increased as from June 1, 1956, to 32 per cent of demand liabilities and 10 per cent of time liabilities, calculated on a new basis which included the banks' holdings of bank-notes in their minimum cash reserves. [Previous rates, on the old basis excluding holdings of notes, were—in supersession of those announced in May 1953—24 per cent of demand liabilities and 3 per cent of time liabilities]. The purpose of the change was to relate the trading banks' borrowings from the Reserve Bank to the amount by which their actual advances and discounts exceeded what was regarded by the Reserve Bank as an appropriate level. The increase meant that the banks had to borrow up to £15,000,000 from the Reserve Bank at the Bank rate of 7 per cent operative from Oct. 19, 1955.

Overdraft Rate. The existing average overdraft rate of 4¾ per cent agreed between the trading banks and the Government was increased to 5 per cent on Feb 9, 1956, and the control of minimum and maximum rates (4 per cent and 5 per cent respectively) was abolished. The Minister of Finance said in a broadcast on June 12, 1956, that overdrafts had risen by £16,000,000 in the first five months of 1955, but had since fallen by £24,000,000

Other Interest Rates. It was announced on April 26, 1956, that the maximum rates of interest payable on private loans by building and investment societies and trading companies would be increased by ¼ or ½ per cent, up to 3¾ per cent for loans for four years or more Interest on deposits in the P.O. Savings Bank and Trustee Savings Banks was raised by ½ to 1 per cent according to the amount in the account ; up to £1,000, the new rate was 3 per cent The maximum rate for new issues of preference shares and debentures by companies was raised from 5 per cent to 5¼ per cent

Hire Purchase. The statutory minimum deposit on the hire purchase of a number of household goods was reduced on April 11, 1956, from 15 per cent to 7½ per cent. The Minister of Industries and Commerce, Mr Halstead, said that the effectiveness of the regulations had been proved and would not be in any way diminished.

New Zealand's deficit on her overseas exchange transactions rose from £16,000,000 in 1954 to £26,500,000 in 1955. In 1953 there had been a surplus of £26,200,000. Compared with 1954, receipts rose by £22,800,000 in 1955 to £294,100,000, but payments increased by £32,800,000 to £320,600,000. Import controls were reimposed on woollen goods and jams on Oct. 28, 1955.

Mr. Watts stated in a broadcast on June 12 that New Zealand's overseas assets had increased by £38,000,000 in the first five months of 1956, and that imports had been £5,000,000 less than in the same period in 1955. (Directorate of Information Services, Wellington - N.Z. Government Office, London - Reserve Bank of New Zealand Bulletin and News Review)

B. BRITISH WEST AFRICA. — Reorganization of West Africa Military Command.

The War Office in London announced on June 29 that the following changes would come into effect on July 1 as a prelude to the attainment of self-government by the Gold Coast : (1) The Governor of the Gold Coast (Sir Charles Arden-Clarke) would assume responsibility for the control and administration of the Gold Coast military forces ; (2) the War Office would relinquish control of those forces, and the headquarters of West Africa Command would be abolished ; (3) Nigeria and Sierra Leone-Gambia would become separate military organizations, each with its own Commander and staff and working directly under the control of the War Office ; (4) the existing West African Advisory Council would be retained so that some form of defence co-ordination between the four West African governments should continue.—(Times)

(Prev. rep. 14890 A ; Gold Coast Forces, 14931 A.)

A. CHINA. — Twelve-Year Agricultural Development Plan. - Collectivization of Agriculture by 1960. - New Industrial Ministries. - Regional Autonomy for Sinkiang. - Preparations for Tibetan Regional Autonomy. - Abolition of Jehol and Sikang Provinces.

A 12-year agricultural development plan, based upon the complete collectivization of Chinese agriculture, was published in Peking on Jan. 26, 1956, when it was submitted to a State Conference of some 300 Communist and non-party officials presided over by Mao Tse-tung, chairman of the Council of Government. The plan also envisaged the complete abolition of illiteracy within the 12-year period, in which connexion schools for adults would be established in all localities; the introduction of compulsory education throughout China within a period of five to seven years, and the training of five to six million "technicians" (i.e. agricultural specialists) to help and direct the collective farms.

A fortnight earlier (Jan. 12) Mao Tse-tung had declared that the rapid progress in the collectivization of agriculture during 1955 had made it possible to envisage (*a*) the "complete semi-socialization" of agriculture during the year 1956, and (*b*) the "total socialization" (i.e. complete collectivization) of agriculture by 1959 or 1960. Mao Tse-tung also called for a concurrent and rapid increase in the "scale and tempo" of China's industrialization so that the "Socialist revolution" could be "basically completed on a national scale" within three years. The new policy constituted a radical departure from the earlier official declarations (see 14403 A) that the "Socialist transformation" of China would take about 15 years to accomplish, and that the collectivization of agriculture could only be carried through by gradual stages.

In the preface to a book on the socialization of agriculture, published in December 1955, Mao Tse-tung had stated that more than 70,000,000 families, constituting over 60 per cent of the total number of peasant households, had joined collective farms by the end of the year—a figure far in excess of the original target. This "event of historic importance" showed that "semi-socialist agricultural co-operation can be virtually completed in 1956 alone" and that "in three to four years—that is, by 1959 or 1960—the change-over from a semi-socialist to a completely socialist system can be essentially completed."

The Twelve-Year Agricultural Plan.

It was stated that the plan would be submitted for discussion to "local party organizations and the departments concerned" before being finally approved, and that the views of "workers, peasants, scientists, and patriots" would also be sought before it was officially promulgated. The principal provisions of the 12-year plan (covering the years 1956-1967) were as set out below:

(1) An overall expansion in grain output by raising the yield per hectare (one hectare = 2.47 acres) in the following proportions: (*a*) in North China, by 167 per cent, (*b*) in Central China, by 140 per cent, (*c*) in South China, by 100 per cent. The increases (per acre) in these areas were envisaged as follows: in North China, from 1,000 lb to 2,700 lb.; in Central China, from 1,400 lb to 3,250 lb.; in South China, from 2,700 lb. to 5,400 lb.

(2) Similar increases in the area devoted to multiple and industrial crops, with a maximum increase (in the South) of 260 per cent.

(3) Increases of 71 to 185 per cent (depending on local conditions) in the average annual yield of ginned cotton—at present about 557 lb. per hectare.

(4) In conformity with the new policy announced by Mao Tse-tung, the "semi-socialization" of agriculture would be virtually completed during 1956, and the complete socialization of agriculture by 1959 or 1960, when the individual peasant economy would have disappeared. The present "producer co-operatives" (in which farmers are allowed to keep a percentage of their production after State quotas have been met) would be progressively transformed into full collectives on the Soviet *kolkhoz* model.

As regards the position of the "richer peasants," it was stated that those who had "conducted themselves well" would be allowed to join the co-operative farms; that those who had only conducted themselves "fairly well" could join as "candidate members" until they had proved themselves deserving of full membership; that those with "bad records" would work on the farms under supervision; and that those who had committed "sabotage" would be dealt with according to law. The "middle peasants"—described as the "allies of the poorer peasants and the working class"—would not be subjected to any form of discrimination and would enter the collective farms on equal terms with all other workers.

Other recent political and economic developments in China are summarized below under cross-headings:

Creation of Industrial Ministries. A National Economic Commission, a National Technological Commission, and ten new Ministries were created on May 12 with the aim of promoting the industrialization of China and "adjusting the administrative machinery." The new Ministries were for the Metallurgical Industry, Power Equipment Industry, Food Industry, Chemical Industry, Building Materials Industry, Timber Industry, Marine Products, Land Reclamation, City Construction, and City Services. At the same time the Government abolished the Ministry of Heavy Industries, the Ministry of Local Building and Municipal Construction, and the Third Ministry of Machine-building (There had originally been First, Second, and Third Ministries of Machine-building, the first two continuing to exist).

Mr Po Yi-po, formerly head of the existing National Construction Commission, was appointed chairman of the new National Economic Commission, Mr. Wang Ho-shou became chairman of the National Construction Commission, and concurrently Minister for the Metallurgical Industry; and Mr Huang Ching became chairman of the National Technological Commission, remaining in charge of the First Ministry for the Machine-building Industry.

Soviet Economic Aid Agreements. M. Mikoyan (First Deputy Premier in the Soviet Governmnet) visited Peking during the first week of April for discussions with Mao Tse-tung, Chou En-lai, and other Chinese leaders, following his earlier visits to India and Burma (see 14908 A). Before leaving the Chinese capital he signed two agreements on April 7 on increased Soviet economic aid to China.

The first agreement provided that 55 new factories and plants would be built in China with Soviet assistance, in addition to the 156 industrial enterprises stipulated under earlier Sino-Soviet agreements (see 13855 A, 13252 A). The new installations to be built would include metallurgical, engineering, and chemical plants, factories to produce plastics and artificial fibres, electro-technical and radio plants, power stations, an artificial liquid fuel plant, and aviation industry research institutes. The total cost of these installations would amount to about 2,500 million roubles (approx. £227,000,000 at nominal rates), which the Chinese Government would defray by supplying goods of various kinds to the Soviet Union.

The second agreement provided that the railway from Lanchow (North-West China) to Aktogai (near Alma-Ata, in the Soviet Republic of Kazakhstan) would be completed by 1960, thereby linking the Chinese rail system with the "Turksib" line in Soviet Central Asia.

[The Lanchow-Alma Ata line—see map, page 13855—will be one of two new rail links between China and the U.S.S.R. The other is the trans-Mongolian line, which was opened to through traffic in January last—see 14647 C.]

Preparations for Tibetan Regional Autonomy. The preparatory committee to prepare Tibet for regional autonomy within the Chinese People's Republic was inaugurated in Lhasa on April 22, 1956, when Marshal Chen Yi, a Deputy Prime Minister in the Chinese Government, formally invested the Dalai Lama as chairman of the committee. [The members of the committee, and the subsidiary bodies through which the committee will work, are described in 14128 F.] In a speech at the inaugural ceremony, Marshal Chen Yi said that "the transition of the nationalities of our country to Socialism will be achieved separately and in different ways," and that the Chinese Government and Communist Party held the view that "reforms in Tibet can only be carried out when the Tibetan leaders and people unanimously demand them." He added that Tibetan affairs would continue to be decided "by the leaders and people of all strata of society."

Reported Uprising in Tibet. It was reported in the Indian Press during the first week of May, and also in press despatches from Khatmandu, that a serious rising had occurred two months earlier among the Golok tribesmen of eastern Tibet. According to these reports—of which there was no official confirmation—the tribesmen were said to have risen under a leader named Ma Bofano and to have massacred an entire Chinese garrison of 800-900 men, leading to retaliatory Chinese military action in which a number of Golok villages were said to have been bombed, with heavy civilian casualties. The reasons for the alleged rising were said to have included high taxation imposed by the Chinese authorities, resentment at inroads made on the Dalai Lama's authority, the compulsory indoctrination of youth, and requisitioning of grain for the Chinese Army. Official Chinese and Tibetan representatives, who were in Khatmandu at the time for the Coronation of King Mahendra of Nepal (see 14898 B), denied that any disturbances had occurred and said that the reports were completely untrue.

Creation of Sinkiang Autonomous Region. The New China News Agency announced on Sept. 13, 1955, that Sinkiang (Chinese Turkestan)—the largest province of China, comprising one-sixth of the total area—had been converted into a "Sinkiang-Uigur Autonomous Region," and that autonomous local governments had been set up by the various nationalities inhabiting the area—Uigurs, Kazakhs, Tadjiks, etc.

Out of the approximately 5,000,000 inhabitants of Sinkiang, some 4,000,000 are Uigurs—a Turki-speaking people of Moslem religion, racially related to the Turks and to the peoples of the Soviet Central Asian Republics.

Abolition of Jehol and Sikang Provinces. An earlier official statement (July 19, 1955) had announced the abolition of the provinces of Jehol and Sikang "in view of the needs of the planned construction of the State and to facilitate administrative measures." The north-eastern province of Jehol (which extended from the Peking area to Manchuria) was divided between the provinces of Hopei and Liaoning and the Inner Mongolian Autonomous Region, while the large and sparsely populated south-western province of Sikang (between Szechwan and Tibet) was absorbed in Szechwan province.

[The effect of the provincial reorganizations carried out during the past five years—including, *inter alia*, the abolition of Suiyuan, Ninghsia, Jehol, and Sikang provinces and the creation of several new provinces—has been to concentrate the non-Chinese populations of the Republic almost entirely in the two existing autonomous regions (Inner Mongolia and Sinkiang) and the projected autonomous region of Tibet.]

Afforestation Programme. A nation-wide, 12-year afforestation programme was launched in February 1956, when the Government approved plans drawn up by the Ministry of Forestry. It envisages the planting of trees on all roads, river banks, and streets in the major cities, and, in particular, the afforestation of vast areas of barren hill and loess country, the denudation of which—especially in North-West China—has been for centuries a contributory cause of disastrous floods. The tree-planting programme along the banks of the Yellow River, and other large Chinese rivers, is designed to prevent erosion and heavy silting and to control the floodwaters Youth organizations and other bodies were called upon to volunteer for work on the national afforestation project

Elimination of the "Four Evils." As part of the 12-year agricultural plan, mentioned above, the Chinese Government announced an intensified campaign to eradicate what it described as the "four evils" of China—rats, flies, mosquitos, and sparrows. This campaign—described as the "get-rid-of-the-harmful-four" movement—set a target date of 1962 for the complete eradication of all "four evils" throughout China. Sparrows were included in the "harmful four" because of the damage they did to crops, the New China News Agency describing the sparrow as "a glutton whose daily grain intake amounts to about 30 per cent of its weight."

In a report on June 22, 1956, to the National People's Congress in Peking, both the Minister of Public Security (Mr. Lo Jui-chang) and the Procurator-General of the Republic (Mr. Chang Ting-cheng) admitted that "mistakes" had been made in "the struggle against counter-revolutionaries." Mr. Chang admitted that in some individual cases persons had been wrongly arrested and sentenced, while Mr. Lo emphasized that the Government had strictly forbidden the practice of forced confessions, that security officials should not "too easily believe oral testimony," and that they should rely only on material evidence. Mr. Lo also said that during the past year 27 "pretenders to the throne" had been arrested, some of these men having wanted to set up new Imperial dynasties and claiming to be emperors.—(Times - Manchester Guardian Economist - New York Times - New York Herald Tribune - Le Monde, Paris - Soviet Weekly - The Statesman, Calcutta) **(Prev. rep. Five-Year Plan, 12784 A; Economic Development, 14403 A; New Constitution, 14051 A; Provincial Reorganization, 13819 C; Ministries, 14051 A; 12784 A; Sino-Soviet Relations, 14220 B; Tibet, 14664 F.)**

A. UNITED KINGDOM. — Parliamentary Salaries. - Labour-Liberal Request for Independent Committee of Inquiry. - Refusal by Prime Minister.

An Opposition request for the appointment of an independent committee of inquiry to advise on the remuneration and allowances of M.P.s was refused by the Prime Minister in a letter to Mr. Gaitskell (leader of the Labour Party) and Mr. Clement Davies (leader of the Liberal Party) published on June 15.

The proposal was submitted to the Prime Minister in a letter signed jointly by Mr Gaitskell and Mr. Clement Davies on June 7 which explained that many M.P.s were suffering "real hardship" and that "financial difficulties have been undoubtedly affecting their attendance in the House." They suggested that "an independent committee of persons who were not members of Parliament" should consider and make recommendations on the level of remuneration and allowances to be paid to M P.s, and on pension arrangements to be provided. The letter added that there was no objection to the inclusion of the level of ministerial salaries in the terms of reference

The Prime Minister, in reply, said that the Government had reconsidered the whole situation "in the light of present economic circumstances" and had decided that, at a time when the Government was calling for restraint in wage and salary demands, it would be wrong for Ministers or M.P 's, "who were rightly expected to set an example," to increase their own remuneration Sir Anthony added that as soon as the opportunity occurred, the Government would be prepared to discuss the problem with the leaders of the other parties, "bearing in mind the desirability of Parliament itself retaining control of these matters"

The present salary of M.P.s is £1,000 a year. Although a recommendation by the Select Committee on Members' Expenses for an increase of £500 a year was rejected by the Government in 1954, M.P.s have since received an additional sum of about £280 a year in sessional allowances. The Select Committee also recommended an improvement in the financial position of Junior Ministers, who receive a salary of £1,500 but draw only £500 of their payment as M.P.s and do not receive sessional allowances. (Times - Daily Telegraph) **(Prev. rep. M.P.'s Salaries, 13719 A.)**

B. JAPAN - PHILIPPINES.—Reparations Agreement.

A reparations agreement, and an agreement on economic development loans, were signed by Japan and the Philippines in Manila on May 9. The reparations agreement and its annexes contained the following provisions:

(1) Japan would supply the Philippines with services and capital goods to a total value of $550,000,000 (equivalent at the present rate of exchange to 198,000,000,000 yen) as reparations for damage and losses resulting from the Japanese occupation of the Philippines during the Second World War.

(2) During the first 10 years supplies would, on the average, be equivalent to $25,000,000 annually, and during the next 10-year period to $30,000,000 annually.

(3) The services or capital goods would be selected from projects enumerated in an Annex to the agreement, covering the development of agriculture and fisheries, electric power supplies, mineral resources, transportation, and communications, as well as industrial development, public works, and various other projects—including the removal of shipping wreckage in Philippine waters left from the war. An annual schedule specifying the services and products to be supplied would be fixed by consultation between the two Governments.

(4) Reparations would be supplied by the "direct method," i.e, a Philippine Government Mission to be established in Tokio would conclude directly with Japanese business firms contracts for the goods and services desired The Japanese Government would then pay the firms concerned in yen for the implementation of the contracts.

(5) The Philippine Mission would enjoy diplomatic immunity. In the event, however, of any dispute arising in connexion with reparations contracts, which had not been settled by arbitration or the fulfilment of an arbitral award, the matter might be brought before the Japanese courts and the Mission itself might sue or be sued.

A separate exchange of Notes provided that loans totalling $250,000,000 (equivalent to 90,000,000,000 yen at the present rate of exchange) would be extended by Japanese commercial firms or nationals to Philippine firms or nationals for economic development.

It was stipulated that the loans would be in yen and would be extended on a commercial basis, in accordance with the laws and regulations of the two countries, that terms and conditions would be agreed upon between the parties concerned, that the loans would be repayable in instalments, either in kind or cash; that the period of repayment would be arranged as long, and the interest rate as low, as would be warranted on a commercial basis; and that disputes arising out of or in connexion with any loan would be settled either through arbitration, if the parties concerned agreed on this procedure, or in accordance with the ordinary judicial processes of the country having jurisdiction over such disputes. Both Governments would facilitate the granting of such loans and would jointly review the progress of the agreement from time to time

The duration of the agreement would be 20 years from the date of the Philippine ratification of the Japanese Peace Treaty. After 19 years both countries might discuss an extension at the request of either of them.

The reparations and loan agreements, which were expected to lead to close economic co-operation between Japan and the Philippines, were ratified by the Lower House of the Japanese Diet on May 29.—(Japanese Embassy, London - New York Times - New York Herald Tribune) **(Prev. rep. 14400 B.)**

C. SOVIET UNION. — Nuclear Weapon Tests.

The U.S. Atomic Energy Commission and the British Defence Ministry announced on March 21 that the Soviet Union had "exploded another nuclear device within the past few days." On April 2 the A.E.C. stated that a further Soviet test had been completed, this being the sixth announcement of an explosion in the Soviet Union within eight months. A report from scientists at the University of Niigata (Japan) indicated that an atomic bomb had been detonated in Siberia about June 19 or 20.

It had been officially announced in Tokio on Dec. 6, 1955, that according to calculations based on reports collected from weather stations throughout Japan by the Central Meteorological Office, the Soviet Union's hydrogen bomb explosion on Nov. 22, 1955, had taken place in the Lake Baikal area, some 1,700 miles north-west of Japan.

No announcement as to the holding of nuclear weapon tests was made in the Soviet Union.—(Times - Daily Telegraph - New York Times - New York Herald Tribune) **(Prev. rep. 14566 A.)**

D. INDIA. — Nationalization of Life Insurance. - Enactment of Legislation.

The Life Insurance Corporation Bill, confirming the presidential Orders nationalizing life insurance in India and establishing a State Corporation to handle it, was passed by the House of the People on May 23 and by the Council of States on May 30. During the debate in the *Lok Sabha* (House of the People) the Finance Minister, Sir Chintaman Deshmukh, estimated the total compensation payable to the nationalized companies under the Bill's provisions at 45,000,000 rupees (£3,375,000)—an amount which he described as "reasonable and fair." (Indian High Commissioner's Office, London) **(14714 A.)**

A. UNITED KINGDOM. — R.A.F. Estimates, 1956-57. - Air Secretary's Review. - Reorganization of Middle East Air Command. - R.A.F. Appointments.

The Royal Air Force Estimates for 1956-57, with an accompanying memorandum by the Secretary for Air (Mr. Nigel Birch), were published as a White Paper (Cmd. 9696) on Feb. 23.

The net total of £479,500,000 shown in the Defence Estimates included the following principal items (1955-56 figures in parentheses): Airframes, £65,500,000 (£80,000,000); Aero-engines, £74,500,000 (£80,000,000); Spares, Components, etc., £25,500,000 (£26,000,000); Fuel, £51,000,000 (£63,200,000); Armament, Ammunition, and Explosives, £30,500,000 (£37,400,000); Instruments, £8,500,000 (£9,000,000). The Estimates included increases of about £23,500,000 for improvements in Service pay and allowances, and of about £2,150,000 in civilian pay.

The memorandum explained that the reduced provision for aircraft and equipment, as compared with 1955-56, took account of the "serious underspending" in that year as a result of the cancellation of certain marks of the *Swift* and the readjustment of orders for *Javelins* to give a better balance between early and later marks. Similarly, the decrease in the provision for fuel and oil reflected (*a*) anticipated delays in modifying certain aircraft to the change-over from kerosene fuel, which was not liable for duty, to gasoline, which was; (*b*) a revised assessment of requirements based on experience in 1955-56.

Other points from the memorandum are summarized below:

The "V" Bomber Force. Stressing that the R.A.F.'s contribution to the "nuclear deterrent" would consist mainly of the "V" bomber force, the memorandum stated that the *Valiant* had passed its proving trials and that the first *Valiant* squadrons been formed, a small number of these aircraft would be used in the forthcoming trials of atomic weapons in Australia. Present plans, however, provided for a high proportion of *Vulcans* and *Victors* in the atomic bomber force, and the former was expected to be in service during 1956-57, while it was intended to develop both types further. Meanwhile, orders for a number of *Valiants* had been cancelled, although this bomber would provide an effective contribution to the deterrent for many years. The memorandum added that the growth of the "V" bomber force would be matched by a corresponding decrease in the *Canberra* force, though "substantial" numbers of *Canberras* would still be employed in tactical roles.

Home Defence. The larger part of the day-fighter squadrons of Fighter Command had now been re-equipped with *Hunters*, and modifications to meet the development troubles experienced with this type of fighter were being incorporated in existing aircraft. Meanwhile, *Javelins* had come into service and a steady build-up of *Javelin* squadrons could be looked for, whilst the English Electric *P* 1 had shown "great promise". After reviewing fighter requirements as a whole, the Air Ministry had therefore decided to cancel orders for some *Hunters* so as to make funds available for the purchase of other types of aircraft.

Good progress had been made in installing new equipment in the Control and Reporting system and in linking it with the continental network, and the performance of the latest radar had proved very satisfactory. The first of the air-to-air guided missiles would be developed during 1956-57 and would be used to develop operational and handling techniques. Plans for surface-to-air guided weapons envisaged the build-up of a system capable of dealing with enemy bombers well out to sea, and a production order had been placed for the first of these weapons for full-scale Service trials.

Coastal and Transport Commands. The Mark III *Shackleton*, with tricycle undercarriage and more powerful engines, would be introduced into Coastal Command during 1956-57; but some orders for these aircraft, and also for *Seamews*, had been cancelled to allow other commitments to take precedence. For Transport Command, orders had been given for *Britannias*, and the *Comet III's* would also be a valued addition. Deliveries of *Beverley* heavy freighters, however, had been delayed by difficulties which were now being overcome.

[The Air Ministry announced on May 29 that it had ordered a further four *Britannias* for Transport Command, in addition to six ordered in November 1955.]

Second Tactical Air Force. The fighter reconnaissance version of the *Swift* was now in service, the *Canberra* night interdictor was expected to reach the squadrons during the coming year, and, thanks to the generosity of the U.S. Government, the fighter squadrons had been largely re-equipped with *Hunters* (see below).

U.S. and Canadian Aid. This included the replacement of the *Sabres* now in service with the R.A.F. by *Hunters* delivered under an off-shore procurement contract placed in Britain by the U.S. Government. The memorandum explained that between 300 and 400 *Sabres* had been supplied to the R.A.F. by Canada in 1952-53 under a joint U.S.-Canadian mutual aid agreement (see 12539 C), whilst further aircraft of this type had been provided by the U.S.A. early in 1953. "This very generous assistance from the U.S.A. and Canada," it pointed out, "enabled the United Kingdom to equip part of the R.A.F. fighter force with modern swept-wing jet aircraft at an earlier date than would otherwise have been possible, and at a critical time in our re-equipment programme." The memorandum added that the U.S.A. was providing a further batch of over 100 *Hunters* under a separate arrangement, over and above the financial assistance set out in the White Paper on Defence.

Reorganization of Middle East Air Command. In consequence of the evacuation of British forces from the Canal Zone, and the handing-over of R.A.F. bases in Iraq to the Iraqi Government (see 14807 D), the organization of the Middle East Air Force had been revised. The C.-in-C. now controlled two groups from his new Cyprus headquarters. (1) Air Headquarters, Levant, responsible for R.A.F. units in Cyprus, Jordan, Iraq, and Libya, and for overseeing the staging facilities in the Canal Zone, (2) British Forces H.Q. at Aden, responsible for the southern and eastern areas, including units in Aden, East Africa, Pakistan, and along the Persian Gulf and South Arabian coast.

[The reorganization of the Middle East Air Command—which is the largest R.A.F. overseas command, covering an operational area of 2,500,000 square miles—had been announced on Jan. 15, 1956. The new headquarters of the Command are at Episkopi (Cyprus), ten miles from Limassol.]

Manpower and Recruiting. The memorandum explained that the Government's decision to reduce the strength of the Armed Forces by 100,000 by April, 1958, meant a reduction of the R.A.F. by that date to about 235,000 men. As a result of economies made in 1955-56, the strength of the R.A.F. at April 1, 1956, was expected to be 245,000, compared with the forecast of 254,000 made in 1955. Meanwhile the system of command and administration in the U.K. had been overhauled, following a review carried out by a committee under Air Chief Marshal Sir Leslie Hollinghurst, and the officer establishment of higher formations in the U.K. had been reduced by about 15 per cent. Headquarters staffs in overseas Commands had also been reduced, while manpower-saving experiments in Transport Command had led to substantial savings. A second committee, also under Sir Leslie Hollinghurst, had examined R.A.F. arrangements for servicing and repairing aircraft, with a view to securing economies in skilled technical manpower.

Regular recruiting for the R.A.F. had declined in 1955-56, with the result that the Regular strength had fallen from 157,400 at April 1, 1955, to 142,800 in December, and was expected to fall still further to about 139,500 at March 31, 1956. As a result, the proportion of National Servicemen to Regulars in the R.A.F. had increased. The memorandum stated that although the manning position in skilled engineering trade groups had improved, it was still "far from satisfactory," with far too high a proportion of short-term Regulars and National Servicemen. The improvement in the numbers extending their engagements or re-engaging for pension had, however, been maintained, and the numbers serving on engagements of 12 years or more had risen from 40,800 in April, 1955, to 43,400 by the beginning of 1956. The numbers of apprentices and boy entrants had also been "fairly satisfactory," and a new school for boy entrants had been opened at St. Albans during the year.

As regards officer cadets, the length of the Cranwell training course had been extended to three years to allow for additional flying training. A new officer category—to be known as Air Electronics Officer—had been introduced, primarily for service in "V" bombers.

Reserves and Mobilization. Plans had been made to form additional fighter squadrons in an emergency from reserve units under the control of Fighter Command, and changes were being made in reinforcement and mobilization planning to take account of the nuclear threat and the re-equipment of front-line squadrons. It had also been arranged that the Royal Observer Corps, in addition to its role in the Air Defence System, should undertake the task of measuring nuclear "fall-out" if an atomic attack were made on Britain.

The Air Estimates were passed by the House of Commons on March 5 without a division.

Mr. Birch, moving their adoption, stressed that whatever progress was made with guided weapons, aircraft would always be required for local action in "cold" and limited wars, although the greater power and effectiveness of modern weapons and their much greater cost would mean that Britain could not afford an Air Force of very great size. Reviewing the present shape of the R.A.F., he said that the *Valiant* was proving an excellent aircraft—fully equal, in relation to the task it had to perform, to anything in Russia or the U.S.A.; both the *Victor* and the *Vulcan*, however, would have superior performances. Similarly, the *Canberra*, with which the Tactical Air Force was equipped, remained superior to its counterparts behind the Iron Curtain, and the limits of its developments had not yet been reached. Although the position with regard to fighters was "less encouraging," it was "not altogether black." The *Hunter* had had many troubles and was still not altogether free from them, but the troubles which had beset the *Javelin* designed to carry the "second generation" of air-to-air guided weapons - were being overcome. The delay in bringing this aircraft into service had meant that squadrons would be equipped with a higher proportion of the later marks, with more developed engines.

After speaking of the "considerable advance" made in 1955-56 in the efficiency of Britain's air defence system, Mr. Birch explained that the continual improvement in the speed of bomber aircraft made it essential to increase still further the warning-time available. Britain was therefore installing in Western Germany, for operation by the Second Tactical Air Force, the same long-range radars as had been made available at home. Information from these stations would be fed into the home air defence organization and would greatly increase the early warning ranges of British fighters, and also the warning time for bombers and for the civilian population. Some of the ancillary equipment for this programme had been provided by the U.S. Government.

Although hundreds of rounds of surface-to-air guided weapons had already been fired, it was not intended to bring these weapons into operational use until full tests of the missiles themselves, and of

an operational system, had been carried out. Britain could not afford to deploy this "complex and extensive weapons system" on a large scale until she was sure that it was adapted to long-term requirements and would meet the probable course of future development in the performance of enemy aircraft Stressing that "the old concept of area defence is completely out-of-date," Mr. Birch explained that "the aim must be to destroy bombers over the sea well away from these shores."

As regards manpower, Mr. Birch said that although it was still too early to judge the effect on recruiting of the new pay codes (see 14887 A), the first indications were encouraging, and steps were being taken to reduce to a minimum the frequent re-postings of personnel, which had been disliked and had doubtless acted as a deterrent. Meanwhile, apart from the two committees presided over by Sir Leslie Hollinghurst (see above), a committee presided over by Mr. W. J. Taylor, M P., had reported on the administration of the Air Training Corps, while investigations carried out at Lyneham R.A.F. station had shown that the number of servicing personnel might be reduced by a slight increase in supervision. Another investigation had been carried out at the Benson R.A F. station to find out why airmen did or did not engage for further service, and a special Manpower Utilization Committee had been set up to investigate the possibility of splitting-up R.A F. stations on a squadron basis—i.e. with engineering, signals, and administrative squadrons, as well as flying squadrons—so as to give a more direct relationship between officers and men. At the same time the higher direction in the Air Ministry had been strengthened, and a new section, headed by Air Vice-Marshal W. L. Freebody (lately senior technical staff officer of Coastal Command), would be set up to adjust the organization and administration of R.A.F. operational airfields so as to save manpower and increase efficiency

Other developments in connexion with the R.A.F. during recent months are summarized below:

Helicopter Rescue Chain. The Air Ministry announced on Aug. 30, 1955, that two further helicopter rescue units, in addition to those at Thorney Island (Portsmouth), Martlesham Heath (Suffolk), Thornaby (Yorks), Leuchars (Scotland), and North Coates (Lincs.), would be established at Valley (Anglesey) and at Horsham St. Faith (Norfolk).

Air Appointments. The following senior R.A F. appointments were announced during the past twelve months (dates of announcement in parentheses):

Air Vice-Marshal G. R Beamish, A O C.-in-C Transport Command, as A.O C -in-C Technical Training Command (with acting rank of air marshal) in succession to Air Marshal Sir Victor Groom, retiring. (May 4, 1955).

Air Vice-Marshal A McKee (a New Zealander), Senior Air Staff Officer, Bomber Command, as A O C -in-C. Transport Command *vice* Air Vice-Marshal Beamish. (May 4, 1955)

Air Marshal Sir George Mills, A O C -in-C Bomber Command, as Commander of Allied Air Forces, Central Europe (a NATO appointment) *vice* Air Chief Marshal Sir Basil Embry, retiring (Sept 28, 1955) Sir George Mills was given the acting rank of Air Chief Marshal

Air Marshal Sir Harry Broadhurst, A O C.-in-C. Second Tactical Air Force in Germany, as A.O C.-in-C. Bomber Command *vice* Sir George Mills (Sept. 28, 1955).

Air Vice-Marshal Lord Bandon, Assistant Chief of Air Staff (Training), as A.O C.-in-C Second Tactical Air Force (with acting rank of Air Marshal) *vice* Sir Harry Broadhurst (Sept 28, 1955). The appointment carried with it the NATO post of Commander, Second Allied Tactical Air Force

Air Vice-Marshal R. B. Jordan. Director-General of Organization at the Air Ministry, as A O C.-in-C. Maintenance Command (with acting rank of air marshal) *vice* Air Marshal Sir Gordon Harvey, retiring (Sept. 28, 1955)

Air Marshal R. L Atcherley (a former winner of the King's Cup Air Race), head of the Air Force Staff, British Joint Services Mission in Washington, as A.O.C.-in-C Flying Training Command (with acting rank of air marshal) *vice* Air Marshal Sir Lawrence Pendred, retiring (Sept 28, 1955).

Air Vice-Marshal G E. Nicholetts, A.O.C -in-C No 21 (Flying Training) Group, as A.O C. Malta (with acting rank of air marshal) *vice* Air Marshal Sir Bryan Reynolds. (Sept. 28, 1955). The appointment carried with it the NATO post of Air Deputy to the C -in-C. Allied Forces, Mediterranean

Air Marshal Sir Dermot Boyle, A O.C.-in-C Fighter Command, as Chief of the Air Staff *vice* Marshal of the R A.F. Sir William Dickson. (Nov 10, 1955). The appointment of Sir William Dickson to the new post of Chairman of the Chiefs of Staff Committee had been announced by the Prime Minister on Oct. 25—see page 14776, second column.

Air Marshal Sir Thomas Pike, Deputy Chief of Air Staff, as A.O.C -in-C. Fighter Command *vice* Sir Dermot Boyle (Nov. 10, 1955)

Air Marshal Sir Bryan Reynolds, A.O.C. Malta, as A.O C.-in-C. Coastal Command *vice* Air Chief Marshal Sir John Bootham, retiring, (Nov. 10, 1955). The post carried with it the NATO appointments of Air C.-in-C., Channel Command, and Air C.-in-C , Eastern Atlantic Area.

Air Vice-Marshal D Macfadyen, Commandant of the R A.F Staff College, Bracknell, as A O C.-in-C. Home Command (with acting rank of air marshal) *vice* Air Marshal Sir Henry Lydford, retiring (Nov 10, 1955).

Air Vice-Marshal F. J. St. G. Braithwaite, A.O.C. No. 61 Group, Home Command, as Chief of Staff, Far East Air Force. (March 4, 1956) [This was a new post, made because the Royal Australian and Royal New Zealand Air Forces now operate under the C.-in-C., Far East Air Force The holder of this post will act as deputy to the C -in-C , Far East Air Force]

Air Marshal Sir Walter Dawson, Deputy Chief of Staff (Plans and Operations) at SHAPE, as Inspector-General of the R.A.F. (May 15, 1956).

Air Marshal H. L. Patch, A O.C -in-C. Fighter Command, as C.-in-C. Middle East Air Force (June 10, 1956).

Group Officer Mary Henrietta Barnett, the only woman station commander in the R A.F., as Director of the Women's Royal Air Force (with acting rank of air commandant) *vice* Dame Nancy Salmon, retiring. (March 12, 1956). Group Officer Barnett had commanded the R.A F. station at Hawkinge, Kent—where the officer cadet training unit of the W R A F is based—since November, 1952.

It was announced on March 26 that the Ministry of Supply had placed a prototype order on behalf of the R.A.F. with A. V. Roe and Co., Manchester (builders of the *Vulcan* delta-wing bomber) for a bomber capable of supersonic speed. No details were given, the aircraft remaining on the Secret List. (Cmd. 9696 - Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. Defence Estimates, 14773 A; 14310 A.)

A. INDIA. — Protection of Press Reports on Parliamentary Proceedings. - Expiry of Press (Objectionable Matters) Act.

A private member's Bill introduced by Mr. Feroze Gandhi (a son-in-law of Mr. Nehru), providing that no newspaper, news agency, or broadcasting station should be liable for civil or criminal proceedings for libel or defamation in any court of law for publishing a substantially true and fair report of parliamentary proceedings, was passed by the House of the People on May 4 and by the Council of States on May 11. The only other proviso laid down in the Bill was that publication should be for the public good and without malice.

A number of members in both Houses pleaded for the extension of the Bill to the proceedings of State Legislatures, but the Minister for Legal Affairs (Mr Pataskar) explained that this could not be done because it was doubtful whether the Union Parliament was competent to make laws in this respect

On April 12 the Indian Government had announced that it was abandoning the Press (Objectionable Matters) Act, which had been frequently attacked by newspaper editors as a threat to the freedom of the Press Pandit Pant, the Home Minister, told the House of the People that the Government recognized the widespread criticism against the five-year-old Act—which had been renewed several times, but had lapsed at the end of January—and had no intention of renewing it again.

The Act had empowered the Government to demand that newspapers should deposit a cash security as a guarantee against the publication of "objectionable matter"; if they published anything that officials considered to be "objectionable," the security was to be forfeited and the papers seized and destroyed.—(The Hindu, Madras - The Statesman, Calcutta)

(Prev. rep. Press Commission Report, 13949 A; Press (Objectionable Matters) Act, 11862 A.)

B. RHODESIA AND NYASALAND FEDERATION. — First Population Census.

Preliminary results of the first census held in the Federation of Rhodesia and Nyasaland on May 8 were announced on June 7. The census covered the non-African population, as well as the African population in employment. Figures for the Federation and its constituent territories were as follows:

Federation: Europeans, 247,300; Asians, 18,950, Coloureds, 10,750, Africans in employment, 1,021,600—making a total of 1,298,600

Southern Rhodesia: Europeans, 175,800; Asians, 5,030; Coloureds, 8,000; Africans in employment, 601,000. The corresponding figures at the last (1951) census were . 135,596 Europeans, 4,292 Asians, 5,911 Coloureds, and 530,203 Africans in employment.

Northern Rhodesia · Europeans, 64,800; Asians, 5,410; Coloureds, 1,550; Africans in employment, 258,300. Corresponding 1951 figures · 37,079 Europeans, 2,524 Asians, 1,112 Coloureds, 228,676 Africans in employment.

Nyasaland . Europeans, 6,700; Asians, 8,510; Coloureds, 1,200; Africans in employment, 162,300, compared with 1,948 Europeans, 2,804 Asians, and 455 Coloureds in 1945, when the last census was taken in Nyasaland Figures for Africans in employment were not available in 1945

The census did not include those Africans not in employment. The total African population of the Federation was estimated in 1955 at 6,800,000.—(Federal Information Department)

(Prev. rep. 14435 D.)

A. MOROCCO. — Franco-Moroccan Diplomatic Agreement. - Appointment of Moroccan Ambassadors to France and Spain and of French and Spanish Ambassadors to Morocco. - Formation of Moroccan Army. - Agreement on Transfer of Former Spanish Zone. - Negotiations on Status of Tangier. - M. Balafrej appointed Foreign Minister. - Activities of "Liberation Army." - Restrictions on Jewish Emigration.

A diplomatic agreement between France and Morocco, recognizing Morocco's sovereign status in the field of foreign affairs and providing for continued co-operation between the two countries in this field, was initialled in Rabat on May 19 by M. Alain Savary (State Secretary for Moroccan and Tunisian Affairs) and M. Ahmed Balafrej (the new Moroccan Foreign Minister), and was signed in Paris on May 28 by M. Pineau and M. Balafrej. The text of the agreement—officially known as the Rabat Agreement—was as follows :

" (1) The two contracting parties, resolved to maintain relations of permanent friendship and mutual aid and assistance, will keep each other informed on all questions affecting their common interests, and will regularly exchange views on problems of general concern

(2) If the common interests of the parties are threatened in any way, they will immediately consult each other on measures to meet the danger, if the situation demands it.

(3) In order to ensure concerted action in the field of foreign policy, the Foreign Ministers of the two Governments will meet periodically or at the request of either party.

(4) The contracting parties both undertake not to adhere to a policy which they shall recognize, after joint examination, to be incompatible with the interests of either of them.

(5) Each of the parties undertakes not to conclude international agreements which render void the rights which it has granted by agreement to the other party.

(6) None of the present arrangements shall be interpreted as affecting obligations arising from the U N Charter, or from engagements, treaties, or conventions in force between one of the contracting parties and third Powers, or as limiting in any way the power of either of the contracting parties to negotiate and conclude international treaties, conventions, or other agreements

(7) The contracting parties agree that any disagreement on the application or interpretation of the present treaty which they are unable to settle by direct negotiations may be referred, on the initiative of either party, to the International Court of Justice.

(8) France will support Morocco's candidature for membership of international organizations in which she is not represented. The two Governments' delegations to international organizations will keep each other informed of their activities, will consult each other, and will discuss their activities in the spirit of the present agreement.

(9) In countries to which Morocco shall decide not to send a permanent diplomatic mission, the French Republic is prepared, if the Moroccan Government so requests, to undertake the representation and protection of Moroccan citizens and interests In such cases, French diplomatic and consular agents will act in accordance with the directions of the Moroccan Government.

(10) The diplomatic representatives to be accredited by the contracting parties to each other will have the title of Ambassador Extraordinary . . .

(11) Morocco assumes the obligations arising from international treaties concluded by France in Morocco's name, as well as those arising from international agreements relating to Morocco which shall not have given rise to any observations on her part."

The published text of the treaty was accompanied by an exchange of letters in which (*a*) M. Balafrej informed M. Pineau that "the Moroccan Government reserves entirely its position concerning the Franco-American agreement of Dec. 22, 1950," and (*b*) the two Governments agreed that the French Ambassador to Morocco should take precedence over all other members of the Diplomatic Corps in Rabat, and that the Moroccan Ambassador to France should be accorded "a privileged position." It was officially stated in Paris that the terms of the Franco-American agreement, under which U.S. air bases were set up in Morocco, remained secret, and that it was therefore normal for the Moroccan Government to reserve its position on an agreement the contents of which had not been communicated to it.

The appointment of M. Abderrahim Bouabid (Minister of State in the Moroccan Government) as Ambassador to France, and of M. Abdelkhalek Torres (formerly leader of the Reformist Party in the Spanish zone) as Ambassador to Spain, was announced on June 4. M. André Dubois, hitherto French High Commissioner in Rabat, presented letters of credence as Ambassador on June 15, following the ratification of the Franco-Moroccan agreements by the National Assembly Señor Alcover y Sureda, the Spanish Consul-General in Rabat, had previously been appointed Ambassador to Morocco on May 15, and presented letters of credence to the Sultan on June 6.

The Spanish Government decided on June 8 to protest to the French and Moroccan Governments against the special privileges granted to their respective Ambassadors under the agreement reached between M Pineau and M Balafrej

Other recent developments affecting Franco-Moroccan and Spanish-Moroccan relations, together with internal Moroccan developments, are described below under cross-headings :

Formation of Moroccan Army.

The French Government announced on April 26 that agreement had been reached on the formation of a Moroccan Army of about 15,000 men, consisting of 10 infantry battalions, three cavalry squadrons, two armoured squadrons, a battalion of engineers, and various technical units. The Sultan reviewed the new Army in Rabat on May 14, and formally appointed his eldest son, Prince Moulay Hassan, as Chief of the General Staff. In addition to units which had formerly been part of the French Army, and had been transferred together with their equipment and most of their French officers, two infantry battalions which had previously formed part of the Spanish Army in the northern zone took part in the parade. The military school at Dar-El-Beida (near Meknès), hitherto used for training Moroccan officers for the French Army, was handed over to the Moroccan Army on May 30.

Transfer of Control of Police.

The French High Commissioner's Office announced on April 26 that the control of the police would be transferred immediately to the Moroccan Ministry of the Interior. At the Moroccan Government's request, however, the French *gendarmerie* stationed in Morocco would continue to function as hitherto until a protocol on their future status had been signed.

Moroccan Relations with Spain.

A Moroccan delegation headed by Prince Moulay Hassan and M. Balafrej visited Madrid from June 10-14 for negotiations with the Spanish Government on the handing-over of the northern zone (i.e. the former Spanish zone). The Spanish Foreign Ministry announced on June 14 that it had been agreed to transfer this zone to the Moroccan authorities within 15 days ; that certain problems relating to the army, the economy of the zone, finance, currency, and the future of officials would be referred to committees for further study, and that further negotiations would be held in Madrid on final agreements concerning economic, financial, and cultural co-operation between the two countries, technical and administrative assistance by Spain, the rights of their respective subjects, and Spanish assistance to Morocco in external relations and defence.

Immediately after the Sultan's recent visit to Madrid (see 14857 B) demonstrations demanding reunion with Morocco took place on April 10 in the Spanish *enclave* of Ifni, two of the demonstrators being killed and four policemen and two demonstrators injured. A deputation of about 1,000 tribesmen from Ifni was received on June 6 by the Sultan, who assured them that "all territory which historically has been Moroccan must return to Morocco."

[Ifni, which lies on the Atlantic coast of Morocco south of Agadir, has an area of 741 square miles and a population of about 50,000 ; it was ceded to Spain under a treaty of 1860, but had been under effective Spanish occupation only since 1935. Whereas the Spanish Government claims that Ifni belongs to Spain in full sovereignty, like Ceuta and Melilla, France and Morocco maintain that it was granted to Spain merely as a concession.]

Negotiations on Status of Tangier.

The International Control Committee of Tangier informed the Moroccan Foreign Ministry on May 18 that the Powers concerned were not opposed to the integration of the International Zone with the rest of Morocco, and suggested that negotiations should be opened for the modification of the existing Statute. M. Balafrej subsequently met the members of the Committee on June 1, and submitted to them proposals for a transitional system of government pending the final integration of the zone. Under this plan (*a*) the Moroccan Government would exercise legislative authority over Tangier ; (*b*) a Moroccan Governor (responsible to the Minister of the Interior) would direct the administration, certain posts in which would gradually be transferred to Moroccans ; (*c*) control of the police would be transferred to the Ministry of the Interior ; and (*d*) the Moroccan Legislative Assembly and the Tangier International Control Committee would lose their legislative powers and confine themselves to local affairs.

Under the Statute of 1923, as modified in 1928 and 1953, Tangier was permanently neutralized and placed under international control. The Control Committee, consisting of the Administrator-General and the Consuls of France, Great Britain, Spain, Italy, the U.S.A., Belgium, the Netherlands, Sweden, and Portugal, ensures that the terms of the Statute are enforced. The Administrator-General, who must be a Belgian, Dutch, Portuguese, or Swedish citizen, is nomin-

ated by the Sultan, directs the administration (which is drawn from among the Control Powers in fixed proportions), and is responsible for the maintenance of order. The Legislative Assembly, representing the native and foreign communities, contains a majority of European members, the six Moslem and three Jewish members are appointed by the *Mendoub* (the Sultan's representative), who presides over the Assembly and exercises control over native affairs

Cabinet Changes. - M. Balafrej appointed Foreign Minister.

M. Balafrej (48) was appointed Morocco's first Foreign Minister on April 26. Educated at the Sorbonne and Cairo, he joined the nationalist movement at the age of 18. Since 1944 he has been one of the leading members of the Istiqlal party, of which he became general secretary in 1951.

Following the Marrakesh riots (see below), Si Lahcen Lyoussi, the Independent Minister of the Interior, resigned on May 4. The Sultan appointed Maître Driss M'Hamedi, a Minister of State and a member of the Istiqlal executive, as acting Minister of the Interior, while Si Lahcen Lyoussi was appointed a Minister of State.

Activities of the "Liberation Army."

The ambiguous status of the "Army of Liberation" (the body responsible for the recent revolt in the Rif area), which was not officially recognized by the Moroccan authorities but was allowed to remain in being side by side with the new Moroccan Army and the French forces retained in Morocco, led to a strained situation between the Moroccan and French authorities and to a number of serious incidents.

Between March 1 and mid-May the "Liberation Army" was reported to have increased its number from some 2,500 men to about 6,000 by recruiting tribesmen, deserters from the French Army, and other elements, and to have regrouped its forces in a number of areas scattered over Morocco, in some of which it virtually took control of the administration. By the middle of May its strongest concentrations were in the Rif (about 2,500 men properly organized) and around Oujda, near the Algerian frontier, but smaller groups were installed around Rabat and Moulay-Idriss, in the area north of Fez, and in the Middle Atlas. In some areas, notably in the Taza district, its officers tried to maintain strict discipline, but in others the "army" consisted of loosely-connected bands living on the country by pillage and forced contributions.

A leaflet issued on March 29 by the "high command of the Moroccan Resistance Movement and the Liberation Army" announced that it had been decided "provisionally to end military operations," but that the "Liberation Army" would maintain its positions until Moroccan territory had been "entirely and unconditionally liberated." On the following day 30 leaders of the "Liberation Army" presented themselves in Rabat to pay homage to the Sultan. Abd-el-Krim Khahib, who claimed to be the Chief of Staff of the "Army of Liberation," declared on May 14 that "the task of the Army of Liberation is not completed" and that "its fight will only be over when all North Africa, including Algeria, is free"

In a communiqué issued on May 29, and published by the Government's Information Department, the leaders of the "Liberation Army" announced (*a*) that they had decided to cease the activities which "circumstances had obliged us to undertake to ensure the maintenance of public security," and (*b*) that they had ordered their followers not to carry arms "outside their own zones" The statement strongly denounced the French Army in Morocco, alleging that it was taking "absolute control of various regions" and committing "provocations"—an allegation which was categorically denied by the French authorities M Dubois (the French High Commissioner) emphasized in a press statement that in all the incidents which had occurred since the beginning of March it had been members of the French forces who had been attacked, and that the French authorities had repeatedly made representations to the Moroccan Government asking it to end this state of affairs

The most serious incidents were the following: (i) A French colonel was kidnapped by the "Liberation Army" at Oujda on April 26, following the arrest by the French of three men suspected of smuggling arms, who were later claimed to have been "officers" of the "Liberation Army", he was only released when the men concerned were freed by the Moroccan authorities (ii) On May 7 a patrol of Senegalese soldiers was attacked near Fez, 10 men being killed and six captured, attempts by the French Army to rescue these men were prevented through the personal intervention of the Sultan, who said that only the Moroccan authorities had the right to deal with the situation, but eventually the six men were handed over to the Moroccan authorities on May 15, representatives of the Liberation Army asserting that the patrol had been engaged in a "provocation" (iii) A French major was kidnapped in Fez on May 8 and was only freed on May 16 after strong representations to the Moroccan authorities. (iv) On May 22 a French lieutenant and six men on patrol were kidnapped in the Oujda area, while on the following day an attempt was made to kidnap a high French officer in an ambush This latter attempt, however, was frustrated by the officer's *gendarmerie* escort.

In order to clarify the situation and end these incidents, General Ely (Chief of General Staff of the French Armed Forces) flew to Rabat, where he had conferences on June 1-2 with Prince Moulay Hassan (the Sultan's eldest son, and Chief of Staff of the new Moroccan Army), Si Bekkai (the Moroccan Prime Minister), and M. Guedira (the Moroccan Defence Minister). The meetings were also attended by General Bourgund (French C.-in-C. in Morocco) and M. Dubois (the High Commissioner).

Internal Disorders.

Serious riots occurred at Marrakesh on May 2-3, when a large crowd hunted down and murdered former supporters of the late pasha, El Glaoui; the number of victims was officially given as 19. Order was restored only after the personal intervention of Si Mohammed Zeghari (the Vice-Premier) and Si Lahcen Lyoussi. Seventeen of the rioters were sentenced to terms of imprisonment ranging from one to six months.

At Larache, in the former Spanish zone, the Pasha's palace was stormed on April 18 after his guards had fired on nationalist demonstrators. The Pasha himself succeeded in escaping, but three of his guards and a local caïd were murdered.

Acts of individual terrorism continued during the period under review, notably in Casablanca, where several leading members and officials of the Istiqlal and the Communist Party were murdered during March and April. Growing insecurity was also reported from other areas—notably in the Oujda area, where at least 15 people (including 10 Moroccan Jews) were kidnapped and held for ransom.

Restrictions on Jewish Emigration.

The Moroccan Government on June 11 ordered the Cadima Society, which had organized the emigration of Moroccan Jews to Israel, to suspend its activities and to place all its property at the disposable of charitable institutions. On June 15 23 Israeli citizens, many of them members of the society, were ordered to leave the country. An official spokesman explained that the Moroccan Jews were regarded as full and equal citizens, that the Government wished them to remain in the country, but that individual Jews would be permitted to emigrate.—(Le Monde, Paris - Le Figaro, Paris - A.B.C., Madrid)

A. SOVIET UNION. — Abolition of All-Union Ministry of Justice. - Transfer of Powers to Union Republics. - Decentralization of Economic Ministries.

The Soviet Government and the Central Committee of the Soviet Communist Party announced on June 3 that the All-Union Ministry of Justice had been abolished and its functions and responsibilities transferred to the appropriate Ministries of the 16 Union Republics. It was explained that this decision had been taken "with the aim of eliminating superfluous centralization in the work of the juridical institutions and organs of justice, and to strengthen the role of the Union Republics in this matter."

It was also announced that the functions of a number of other All-Union Ministries were being transferred to the appropriate bodies in the Republics in the interests of greater efficiency through decentralization. The Ministries affected were those responsible for foodstuffs, meat and dairy products, the fishing industry, procurement, light industry, textile industry, building materials, paper and woodworking, motor transport and highways, health, retail trade and catering. The announcement added that the Ministries of Light Industry and the Textile Industry had been amalgamated as an All-Union Ministry of Light Industry headed by M. Nikita Ryzhov, formerly Minister in charge of the textile industry.

After recalling that the 20th congress of the Soviet Communist Party had called for greater delegation of economic powers to the Union Republics (see page 14747, second column), the statement said that "the level of economic development of the Republics, and the existence of experienced cadres of managerial, engineering, and technical staff, make it possible to hand over [to the Republics] the enterprises of a number of branches of the national economy of the U.S.S.R., thus contributing to the more effective management of the enterprises, the better use of available reserves for increasing output, and the fuller satisfaction of national economic requirements."

The functions of the All-Union Ministry for the Coal Industry had been transferred to the Union Republics in April last.

(Times - Manchester Guardian - Le Monde, Paris)

B. FRANCE. — Abolition of By-elections.

A Bill for the abolition of parliamentary by-elections (*elections partielles*), presented by M. Daniel Mayer (Socialist), was adopted by the French National Assembly on June 28 by 320 votes to 250. It provided that if a deputy died or resigned, he would be succeeded by the next candidate on the relevant party list at the original election. (Le Monde, Paris)

A. MOUNTAINEERING. — Swiss Expedition climbs Everest and Lhotse. - Japanese Ascent of Manaslu. - Unsuccessful Argentine Attempt on Dhaulagiri.

An 11-man Swiss Himalayan Expedition, led by Herr Albert Eggler (a Berne lawyer), successfully climbed Mount Lhotse (27,890 ft.), the highest unclimbed peak in the world, on May 18. Members of the Swiss Expedition also reached the summit of Everest (29,002 ft.) on May 23 and May 24. Everest had been climbed only once before—by the British Expedition of 1953, when the summit was reached by Sir Edmund Hillary and Sherpa Tensing. Lhotse, the twin peak of Everest and the fourth highest mountain in the world, was the first Himalayan peak conquered by a Swiss expedition. The triple Swiss victory in climbing Lhotse and in twice reaching the summit of Everest was a record for Himalayan climbing.

The ascent of Lhotse—which is considered by some mountaineers as an even stiffer test than Everest—was dogged by illness to three members of the Swiss expedition, which forced Herr Eggler to abandon his planned acclimatization period. Fritz Luchsinger developed acute appendicitis at the Himalayan hill village of Namche Bazar, which is 13,000 ft. high; Wolfgang Diehl, another member of the expedition, was taken ill and had to be sent down to the base camp on the Khumbu glacier; whilst Sherpa Pasang Dawa Lama (an experienced mountaineer who was with the successful Austrian expedition to Cho Oyu in 1954) was also taken ill on the mountain and had to retire from the expedition. Although Herr Luchsinger was so ill that it was planned to fly him to Khatmandu for an operation, he nevertheless recovered from his appendicitis attack and was one of the two men who reached the peak of Lhotse on May 18, the other being Ernst Reiss. The peak of Everest was reached on May 23 by Ernst Schmeid and Jurg Marmet, and on May 24 by Adolf Reist and Hansrudolf von Gunten.

Luchsinger and Reiss climbed to the summit of Lhotse from the South Col of Everest (a climb of 1,890 ft.), using oxygen apparatus of the open-circuit type. The two assaults on the summit of Everest were also made from the South Col, involving a climb of 3,028 ft. As stated above, Lhotse is the twin peak of Everest and is part of the same massif as Everest itself; its ascent lies up the Khumbu glacier, which pours through a narrow gap from the Western Cwm—the same route as taken by the British Expedition. The Swiss had made two unsuccessful attempts on Everest in 1952, when Raymond Lambert and Sherpa Tensing reached 28,215 feet. (See 12330 A)

Congratulations were sent from all the parts of the world to the Swiss Government and the Swiss Foundation for Alpine Research, which organized the expedition. Sir John Hunt, leader of the British Expedition of 1953, described the triple Swiss victory as "a very fine show indeed," and said that the Swiss "have well deserved their success after their two great attempts on Everest in 1952."

The summit of Manaslu (26,658 ft.), the third highest unclimbed peak in the world, was reached for the first time on May 9, and again on May 11, by members of a 12-man Japanese expedition led by Mr. Yuko Maki, president of the Alpine Club of Japan. Japanese expeditions had made two previous attempts on Manaslu, which is situated in west-central Nepal and is notorious for its treacherous icefall.

With the ascent of Lhotse and Manaslu, all the ten highest peaks in the Himalayas had been climbed in the last six years with the exception of Dhaulagiri (26,795 ft.), an exceptionally difficult mountain which has defied French, Argentine, Swiss, and Swiss-German expeditions since 1950. The ascents are listed below:

Mountain	Height (feet)	Climbed in	Expedition	Reference in K.C.A.
Everest	29,002	May 1953	British	13052 A; 12949 A
K-2	28,250	July 1954	Italian	13955 C
Kanchenjunga	28,146	May 1955	British	14299 B
Lhotse	27,890	May 1956	Swiss	
Makalu	27,824	May 1955	French	14299 B
Cho Oyu	26,967	Oct. 1954	Austrian	13955 C
Annapurna	26,926	June 1950	French	11128 F
Dhaulagiri	26,795	*unclimbed*		
Manaslu	26,658	May 1955	Japanese	
Nanga Parbat	26,629	July 1953	Austro-German	13124 A

An eight-man Argentine expedition led by Lieut.-Colonel Emiliano Huerta was attempting the ascent of Dhaulagiri at the time of the Swiss ascent of Lhotse and Everest. On June 25, however, it was announced in Khatmandu that the expedition had abandoned the attempt 1,600 feet from the summit after it had been driven back by avalanches, violent snowstorms, and the onset of monsoon conditions.—(Neue Zürcher Zeitung - Times - Daily Telegraph - The Statesman, Calcutta) **(14299 B.)**

B. UNITED STATES. — The Chief Joseph Dam.

The Chief Joseph Dam, built on the Columbia River (Washington State), was officially opened on June 12. One of the world's largest hydro-electric plants, it is 51 miles downstream from the Grand Coulee Dam and has a planned capacity of 1,748,000 kilowatts, compared with the Grand Coulee's 1,974,000 kilowatts.—(New York Times) **(Prev. rep. 14876 E.)**

C. LONDON. — The St. Paul's Plan.

A new development plan for the area around St. Paul's Cathedral, drawn up by Sir William Holford (Professor of Town Planning in the University of London), was approved in principle by the Common Council of the City of London on June 14, and received the "whole-hearted support" of the London County Council on June 19.

Objections to the redevelopment plan for the St. Paul's area contained in the post-war London Development Plan had been raised in March, 1955, by the Minister of Housing and Local Government (Mr. Duncan Sandys), who declared that "a unique opportunity was being missed to provide a truly worthy setting for Wren's world-famous cathedral." In April, 1955, the Common Council of the City of London accordingly commissioned Sir William Holford to draw up a new plan for the area. Sir William was assisted in this task by a committee, under the chairmanship of Mr. Sandys, which included the chairmen of the planning committees of the City of London and the L.C.C.

The "Holford plan" embodied the principle of open planning with blocks of different heights and a varied skyline. This, it was pointed out in Sir William's report, would permit a less congested lay-out and would offer views between the taller buildings to "the silhouettes of trees, towers, spires, and domes in which the area is rich." Specifically, the plan provided for (*a*) a skyscraper office-block of 22 storeys; (*b*) three office-blocks of ten storeys; (*c*) a new shopping centre; (*d*) a green lawn, 1½ acres in extent, stretching up to the Cathedral on the south-eastern side; (*e*) a large paved forecourt in front of the Cathedral, of which the historic Temple Bar (now at Theobalds Park, in North London) would form one of the gateways. The plan involved considerable road alterations round St. Paul's, including a new road on the site of Carter Lane.

In a press statement on March 16, Sir William Holford emphasized that his design would preserve the famous views of St. Paul's from Fleet Street, the South Bank, and Hampstead, and that the sky-scraper office-block would have a total height of about 250 ft., as compared with the Cathedral's height of 365 ft. It would be a "slender block" on a site about 600 feet from the Cathedral, and there would not be "a tall block in competition with the dome." The height of the 10-storey blocks would be about 110 ft. (similar to that of the roof parapet of the Cathedral), while the other commercial buildings would range from seven storeys (84 ft.) to four storeys.

The precincts, designed to "give more space and more tranquillity in front of the Cathedral," would consist of a series of open spaces of different character, and would include a paved forecourt at the west entrance about 100 yards across. On the site of Paternoster Square there would be a terrace which would serve as a floor for temporary exhibition buildings and for ceremonial occasions. Below it would be two levels of covered car parks. (The plan also envisaged underground car parks at Cannon Street and Carter Lane, and combined car parks for the office-blocks). The new shopping centre, with buildings only three storeys in height, would be built between Newgate Street and the existing steps on the north side of St. Paul's Churchyard, while a new choir school was planned at the east end of the Cathedral. It was proposed to re-erect Temple Bar as the north-east gateway to the forecourt from the direction of Cheapside, and it would thus be seen to advantage from both sides.

Though the Holford plan was accepted "subject to further consideration of the financial implications," it was pointed out that the Corporation of the City of London were not "irrevocably committed" to some of the detailed proposals; e.g. to the proposed re-erection of Temple Bar in the Cathedral's precincts, or the erection of the proposed 22-storey office block. The probable cost of the plan was estimated as "of the order of £10,000,000 to £12,000,000."—(Times - Daily Telegraph) **(Prev. rep. 8691 A.)**

D. FRANCE.—Shipping Line to Russian Baltic Ports.

It was announced in Paris on May 24 that the *Compagnie Générale Transatlantique* would inaugurate (as from July) a regular commercial service between Le Havre and four Soviet Baltic ports—Klaipeda (Memel), Ventspils (Windau), Riga, and Leningrad—and that vessels on this route would call at Antwerp, Rotterdam, Bremen, and Hamburg. The establishment of a shipping line between French ports and Soviet Baltic ports had been mentioned in the joint communiqué issued at the end of the recent Franco-Soviet discussions in Moscow. (Le Monde, Paris) **(Prev. rep. 14934 A.)**

E. INDIA. — New Ministerial Designations.

It was announced in New Delhi on June 13 that Mr. D. P. Karmarkar, Minister of Commerce, would be designated Minister of Trade; that Mr. Nityanand Kanungo, Minister of Industries, would be designated Minister of Consumer Industries; and that Mr. M. M. Shah, Minister of Industrial Development, would be designated Minister of Heavy Industries.—(Indian High Commissioner's Office, London) **(Prev. rep. 14872 B.)**

JUNE 30—JULY 7, 1956

A. SOUTH VIETNAM. — Political Developments, July 1954-June 1956. - Suppression of Opposition Sects by M. Ngo Dinh-Diem's Government. - Deposition of Bao Dai. - M. Ngo Dinh-Diem proclaimed President of Vietnamese Republic. - General Elections to Constituent Assembly. - Three-Power Talks on Vietnam. - Evacuation of French Expeditionary Corps.

The Emperor Bao Dai was deposed from the position of Chief of State of South Vietnam on Oct. 26, 1955, and a republic was proclaimed with M. Ngo Dinh-Diem as President and Prime Minister. General elections for a Constituent Assembly were subsequently held on March 4, 1956, and resulted in an overwhelming victory for M. Ngo Dinh-Diem's Government. These developments marked the culmination of a long internal struggle, beginning in September 1954, in the course of which M. Ngo Dinh-Diem had succeeded in suppressing or winning over almost all organized opposition to his rule. The main stages of this struggle, and their repercussions on relations between South Vietnam and France, are described below under cross-headings.

The Situation after the Cease-fire.

During the period immediately following the cease-fire of August 1954, the Government's authority was confined to Saigon and a few other large towns, the greater part of the country being controlled by the Caodaist, Hoa-Hao, and Binh-Xuyen sects through their private armies, or by the Vietminh through its political organizations. Although Bao Dai was supported by a section of the Army High Command and by the Binh-Xuyen, his prestige and authority had been greatly weakened by his frequent and prolonged visits to France, where he had been living since April, 1954. M. Ngo Dinh-Diem was not supported by any organized political movement, and had aroused strong opposition by his autocratic methods, and in particular by his strict control of the Press. The most important of the numerous political parties, the Socialist Party and the Dai-Viet (a nationalist organization with strong support in Annam), maintained a hostile attitude towards both Bao Dai and M. Ngo Dinh-Diem.

The **Cao Dai** (" High Church ") sect originated in 1919 as a synthesis of Christianity, Buddhism, and other religions, and claims 2,000,000 adherents After collaborating with the Japanese and later with the Vietminh, they allied with the French in 1946, although part of the sect continued to support the Vietminh The Caodaist army, like those of the other sects, was originally armed by the Japanese, and later received financial support from the French. Numbering about 30,000 men, it controlled a large area around Tayninh (about 50 miles N.W. of Saigon), and was commanded by General Nguyen Thanh-Phuong The political and religious leader of the sect was M. Pham Cong-Tac, the Caodaist " Pope." A dissident Caodaist army of about 5,000 men led by General Trinh Minh-Thé had mutinied in 1951, waged war against both the French and the Vietminh, and carried out numerous political assassinations, some of which, such as the murder of General Chanson (see 12959 A), were erroneously attributed at the time to the Vietminh.

The **Hoa-Hao** sect, which preaches a simplified form of Buddhism, was founded in 1939 by a peasant named Huynh Phu-So, born in the Cochin-Chinese village of Hoa-Hao. It collaborated in turn with the Japanese and the Vietminh, but joined the French in 1947, with the exception of a minority which remained with the Vietminh Huynh Phu-So was captured by the Vietminh and shot, and the leadership of the movement passed to General Tran Van-Soai, who commanded an army about 30,000 strong The sect controlled an area west of Saigon and extending to the Cambodian border, with a population of about 1,000,000. A dissident force of 5,000 men led by General Bacut was engaged from September 1954 onwards in a private war with General Trinh Minh-Thé for control of the Plaine des Joncs, which had then been evacuated by the Vietminh army under the armistice

The **Binh-Xuyen,** although usually classed among the sects, was not a religious body. Originating as a gang of bandits and river pirates operating from the village of Binh-Xuyen (near Saigon), it supported the Vietminh for a time, and in 1948 was granted control by the French of a zone between Saigon and the sea By an arrangement with Bao Dai, it also secured control in 1954 of both the Saigon police and the national security police, as well as a monopoly of the gaming houses, opium dens, and brothels in Saigon Its forces numbered about 15,000 men, commanded by General Le Van-Vien

The Dismissal of General Nguyen Van-Hinh.

Following the arrest of two staff officers accused of conspiring against the Government, M. Ngo Dinh-Diem suspended the Chief of Staff, General Nguyen Van-Hinh, from his command on Sept. 11, 1954, and ordered him to leave for France. The general refused to obey or to lay down his command, and was supported by the sects, which issued a manifesto demanding the Government's resignation. On Sept. 22, however, the Caodaist and Hoa-Hao leaders announced that they would support the Prime Minister if he formed a strong government in which they held a dominant position. M. Ngo Dinh-Diem accordingly formed a coalition government on Sept. 24 consisting of six Independents, three Caodaists, three Hoa-Hao representatives, and five members of the Thin-Thai (a cultural organization). He himself combined the Premiership with the portfolios of the Interior and Defence; Generals Nguyen Thanh-Phuong and Tran Van-Soai (the respective Caodaist and Hoa-Hao commanders) became Ministers of State; and Dr. Tran Van-Do (Thin Thai) retained the post of Foreign Minister.

The strained relations between the Government and the Army leaders gave rise during October and November 1954 to grave fears of a military *coup* and civil war. In view of this danger, General Collins (President Eisenhower's special representative in South Vietnam) gave warning on Nov. 17 that the Army would receive U.S. military aid only if it supported M. Ngo Dinh-Diem (see 14161 A). General Nguyen Van-Hinh left for Paris two days later to seek the support of Bao Dai; the latter, however, dismissed him from his post on Nov. 29, and the Prime Minister ordered that he should not be permitted to re-enter Vietnam. General Van-Ty was appointed to succeed him on Dec. 8, 1954.

Political and Agrarian Reforms

General Trinh Minh-Thé, the dissident Caodaist leader, rallied to the Government on Jan. 31, 1955, and the only serious military opposition encountered by the Government during January and February was from General Bacut's dissident Hoa-Hao forces. The more peaceful conditions prevailing enabled the Government to introduce a number of measures for agrarian and political reform and for the suppression of corruption, the most important of which were the following.

(1) A decree was issued on Feb. 16, 1955, providing for the establishment, at an unspecified date, of a provisional and consultative National Assembly which would include members elected by provincial, municipal, and communal councils, nominated representatives of political, religious, and professional groups, refugees from North Vietnam, and national minorities

(2) A decree issued on Jan. 8, 1955, fixed the maximum rent for farm land at 15-25 per cent of the value of the crop, according to the fertility of the soil, and provided that individual rents should be fixed by local committees of landowners and tenants. Leases would run for a minimum of five years, and would be renewable for another five, if the tenant maintained his payments for 10 years he would become the owner of the land. A previous land reform decree issued in 1953 (see 12983 A) had remained ineffective in practice, as the maximum rent laid down (15 per cent of the crop) had been considered too low by the landowners

(3) A decree issued on Feb 11, 1955, ordered that the use of uncultivated land should be granted for three years to tenants chosen by the Government

(4) The Government announced on Jan. 21, 1955, that M. Pham Van-Giao, formerly Vice-Premier in M Nguyen Van-Tam's Cabinet, had been ordered to appear before the courts to answer charges of misappropriating 5,650,000 piastres of State funds. M. Pham Van-Giao, however, escaped arrest by fleeing to France.

(5) In order to weaken the financial position of the Binh-Xuyen, gambling was declared illegal from Jan 15, 1955, when the Binh-Xuyen's monopoly expired.

An agreement transferring the command of all military forces in South Vietnam—except the French Expeditionary Corps—to the South Vietnamese Government, and terminating the financial assistance previously granted by the French Government to the armies of the sects, was signed on Feb. 10, 1955.

The Struggle with the United Front.

The situation seriously deteriorated during March 1955, following the formation by the Caodaists, the Hoa-Hao, the Binh-Xuyen, and the Socialist Party on March 4 of a " United Front of Nationalist Forces." Its manifesto, which was signed by the leaders of the various groups and also by Generals Trinh Minh-Thé and Bacut, demanded the formation of a strong " Government of national unity," and stated that when such a Government had been formed they would merge their private forces in a single national army.

The revival of unrest among the sects was attributed to the cessation of French financial assistance under the agreement of Feb. 10, and to M. Ngo Dinh-Diem's refusal to incorporate their forces into the Army on their own terms. The new political crisis coincided with a revival of military activity by General Bacut's forces in the Camau peninsula (in the extreme south of Cochin China), and with a mutiny of about 1,000 auxiliary troops under Dai-Viet leadership in the Balang area, a few miles south of the border with North Vietnam.

The United Front delivered an ultimatum to M. Ngo Dinh-Diem on March 21, 1955, demanding the formation of a government approved by themselves, and on the same day issued a press statement accusing him of totalitarianism, nepotism, and suppression of freedom of the Press. Although the Prime

Minister refused to compromise on the unification of all armed forces under a single command, and the abolition of the sects' privilege of levying taxes in the areas under their control, he offered on March 27 to replace those Ministers who were regarded as his personal followers. This proposal was followed by a split in the United Front, the Hoa-Hao Ministers resigning from the Government on March 29, and several Independent and Thin-Thai Ministers following their example during the next three weeks. General Trinh Minh-Thé, on the other hand, announced his support for N Mgo Dinh-Diem on March 27, as did the other Caodaist leaders on March 31, in return for a concession whereby the whole of the Caodaist forces (instead of only part of them, as had previously been envisaged) were incorporated in the Army.

M. Ngo Dinh-Diem had meanwhile opened an attack on the Binh-Xuyen on March 28 by transferring the command of the Saigon police to the Prefect of the city, and by sending troops to take over the city's police headquarters from the Binh-Xuyen, who withdrew without resistance. During the night of March 29-30, however, fighting broke out between these troops and Binh-Xuyen forces encamped nearby, 26 people being killed. As a counter-move to M. Ngo Dinh-Diem's strategy, Saigon was blockaded from March 29 onwards by the Hoa-Hao forces of Generals Tran Van-Soai and Bacut, which controlled all but one of the roads to the west of the city, and also by the Binh-Xuyen forces, which cut off Saigon from its suburb of Cholon.

On April 26, 1955, M. Ngo Dinh-Diem again attacked the Binh-Xuyen's control of the police by dismissing M. Lai Van-Sang, director-general of the national security police. The Binh-Xuyen refused to hand over the security headquarters building, and as a result a pitched battle between Government and Binh-Xuyen troops raged over a large area of Saigon on April 28-29. During the fighting a petroleum depot caught fire and the flames spread to a thickly-populated area, destroying 8,000 houses and leaving 35,000 people homeless. After a desperate resistance the Binh-Xuyen were expelled from most of their strongpoints in Saigon and Cholon, and withdrew to the marshy ground south and west of the city.

The Intervention of Bao Dai.

On April 28, 1955, Bao Dai announced that he had transferred control of the armed forces from M. Ngo Dinh-Diem to General Nguyen Van-Vy (Inspector-General of the Army), who had fled to Dalat two days before and placed himself under the protection of the Imperial Guard. At the same time Bao Dai sent a message to M. Ngo Dinh-Diem summoning him to Cannes for a conference of political and religious leaders, which he proposed should take place on May 5. To this message M. Ngo Dinh-Diem replied on April 29 that the Cabinet regarded his presence in Saigon as indispensable, and also considered that General Nguyen Van-Vy should retain his present post. On April 30, in a telegram to the Prime Minister, Bao Dai accused him of being responsible for the bloodshed in Saigon, and repeated his order that he should go to Cannes. Bao Dai had previously announced on April 29 that he had ordered the former Chief of Staff, General Nguyen Van-Hinh, to leave for Vietnam in order to discuss the problem of unification of the armed forces with the leaders of the United Front; General Nguyen Van-Hinh accordingly arrived by air at Pnom-Penh, the capital of Cambodia, on May 2.

On April 29 General Nguyen Van-Vy arrived back in Saigon, and was promised support against M. Ngo Dinh-Diem by General Le Van-Ty (the Chief of Staff) and many other Army leaders. On April 20, however, a "Revolutionary Committee" led by the Caodaist generals Trinh Minh-Thé and Nguyen Thanh-Phuong, but whose other supporters remained obscure, installed itself in the Prime Minister's palace, and on the same afternoon organized a "General Assembly of the Revolutionary Forces of the Nation" which met in the City Hall. This body declared Bao Dai deposed, and called on M. Ngo Dinh-Diem to form a new provisional Government which would organize elections for a National Assembly and secure the withdrawal of the French Expeditionary Corps. During the evening Generals Nguyen Van-Vy and Le Van-Ty went to the Prime Minister's palace, where they were arrested by the "Revolutionary Committee," forced to sign a document approving Bao Dai's deposition, and held prisoners until the Army compelled their release by threatening to storm the building.

On May 1 General Nguyen Van-Vy repudiated the statement which he had signed, and declared that M. Ngo Dinh-Diem was "no longer a free agent." Shortly afterwards, however, General Le Van-Ty again visited the Prime Minister's palace, where he met M. Ngo Dinh-Diem and the Revolutionary Committee. As a result of their discussions, the Committee issued a statement declaring that it fully supported General Le Van-Ty, and refusing to recognize any delegation of powers to Generals Nguyen Van-Vy and Nguyen Van-Hinh which might be ordered by Bao Dai. The officer corps rallied to the Prime Minister, and during the afternoon General Nguyen Van-Vy again fled to Dalat; he subsequently escaped to France, and on Jan. 13, 1956, was condemned to death *in absentia*.

General Le Van-Ty's *volte-face* was variously attributed to the diplomacy of M Ngo Dinh-Diem, who played upon the professional rivalry between him and General Nguyen Van-Vy and promoted him to the rank of *général de division*, at the same time promoting a number of other officers, and to a message said to have been received during the morning of May 1, in which the U S Government was reported to have assured the Prime Minister of its continued support.

M. Ngo Dinh-Nhu (the Prime Minister's brother) announced on May 2 that a "States-General" composed of members of the provincial and municipal councils would meet on May 4 to depose Bao Dai and select a provisional Government Later in the day, however, M Ngo Dinh-Diem met General Collins, who had just returned from a visit to Washington and was reported to have refused to give an assurance of continued U.S. support in the event of Bao Dai's deposition. Although this item was accordingly dropped from the agenda of the "States-General," the Prime Minister announced on May 3 his approval of a proposal by the Revolutionary Committee to summon, independently of the "States-General," an unofficial congress of "provincial revolutionary committees" to approve its resolution of April 30.

The "States-General," which met on May 4-5, consisted of a majority of officials and a minority of provincial and municipal councillors selected by the Government After heated debates between Government supporters from Tongking and Annam and the delegates from Cochin China, most of whom were opposed to both Bao Dai and M Ngo Dinh-Diem, a committee was elected to draft a resolution The Cochin-Chinese members, however, withdrew as a protest against a proposal to grant the Prime Minister supreme power, and the two factions adopted opposing resolutions

The Tongkingese and Annamese delegates approved a Government-sponsored resolution calling on Bao Dai to hand over his powers to an elected National Assembly when it met, to restore his military powers to M Ngo Dinh-Diem, and to undertake not to dismiss him, to withdraw his full powers, or to interfere in the country's affairs The Cochin-Chinese delegates' resolution called for the immediate formation of an "Assembly of the People," composed of provincial and municipal councillors, which would choose a provisional Government, control the elections to a National Assembly, and draw up a provisional Constitutional Charter defining the people's rights and liberties

The "National Congress of Revolutionary Forces" (the congress of its supporters in the provinces summoned by the Revolutionary Committee) met on May 5 and adopted a resolution demanding the deposition of Bao Dai, the formation of a new provisional Government by M. Ngo Dinh-Diem, the election of a National Assembly, and the withdrawal of the French Expeditionary Corps

New Cabinet formed by M. Ngo Dinh-Diem.

M. Ngo Dinh-Diem formed a new Cabinet on May 10, 1955, most of the members of which were his personal supporters and had no political following. The composition of the new Government was as follows: M. Ngo Dinh-Diem, Prime Minister and Defence; M. Bui Van-Thinh, Interior; M. Vu Van-Mau, Foreign Affairs; M. Nguyen Van-Sy, Justice; M. Tran Trun-Dung, Deputy Defence Minister; M. Tran Chanh-Thanh, Information, M. Tran Huu-Phuong, Economic Affairs and Finance; M. Tran Van-Meo, Public Works; M. Nguyen Van-Thoi, Agrarian Affairs, M. Nguyen Duong-Don, Education; M. Vu Quoc-Thong, Social Action and Health; M. Huynh Huu-Nghia, Labour; M. Nguyen Cong-Vien, Agriculture; M. Nguyen Huu-Chau, Minister of State.

M. Bui Van-Thinh, M Tran Huu-Phuong, and M. Nguyen Duong-Don had held the portfolios of Justice, Finance, and Education respectively in M Ngo Dinh-Diem's previous Government Of the new Ministers, the best-known, M. Vu Van-Mau, was a former Professor of Law at Hanoi University; M. Nguyen Van-Sy was a former president of the Saigon Appeal Court; M. Tran Chanh-Thanh was State Secretary to the Prime Minister in M. Ngo Dinh-Diem's first Cabinet; M. Huynh Huu-Nghia and M. Nguyen Cong-Vien were Caodaists; and M Nguyen Huu-Chau, a lawyer, was related to the Prime Minister.

During May and June 1955 the Government adopted a number of measures intended to weaken the status and prestige of Bao Dai.

On May 15 the Imperial Guard, which had supported General Nguyen Van-Vy's attempted *coup*, was abolished as such and incorporated into the Army; on June 12 the Imperial domains (a large mountainous area in southern Annam and northern Cochin China) were officially transferred to the State; and on June 16 the Council of the Imperial Family proclaimed Bao Dai deprived of his functions

as Chief of State, and requested M. Ngo Dinh-Diem to become "President of the Vietnamese Republic." A communiqué issued by Bao Dai's office in Paris on June 17 pointed out, however, that the Council had been abolished in 1945, and therefore had no legal existence.

The Suppression of the Sects.

The Government's troops (including Caodaist forces commanded by General Trinh Minh-Thé, who was killed in the fighting) renewed on May 2, 1955, their offensive against the Binh-Xuyen, who abandoned their last post in Saigon during the night of May 9-10. Total casualties in the fighting since April 28 were given on May 22 as 215 killed and 1,500 wounded, including 60 civilians killed and 600 wounded. Although the main body of the Binh-Xuyen linked up with Hoa-Hao forces of Generals Bacut and Tran Van-Soai, about 1,500 Binh-Xuyen troops continued to operate to the south of Saigon, while during the summer Binh-Xuyen agents conducted a terrorist campaign inside Saigon. On Sept. 21, 1955, Government troops launched an offensive against the Binh-Xuyen headquarters in the Rungsat marshes (35 miles south of Saigon), as a result of which it was claimed that the rebels had been finally exterminated. The Binh-Xuyen commander, General Le Van-Vien, escaped and fled to France, and on Jan. 13, 1956, was sentenced by a military tribunal to death *in absentia*.

On the Hoa-Hao side, General Bacut renewed his operations against the Government in the Sadec area (75 miles S.W. of Saigon) during the first week of May, 1955, whilst General Tran Van-Soai, who had established his headquarters near Cantho (80 miles S W. of Saigon), announced on May 13 his support for Bao Dai and his opposition to the Government. On May 27 the United Front's radio announced that General Nguyen Van-Hinh, whose whereabouts had remained obscure since his arrival in Pnom-Penh (see above), had taken command of the Hoa-Hao and Binh Xuyen forces. Following a successful offensive by Government troops in the Cantho area during the fortnight June 5-18, however, General Nguyen Van-Hinh fled to Cambodia, whence he returned to Paris.

General Bacut had meanwhile withdrawn to the Cambodian frontier area, where he conducted a guerilla campaign which tied down 50 to 80 battalions of the Government forces for the next nine months. The rebel forces were greatly weakened, however, by the surrender of General Tran Van-Soai on Feb. 19, 1956, with 4,700 of his men. On April 13, 1956, armed resistance to the Government was virtually brought to an end by the capture of General Bacut, who was sentenced to death by a civil court on June 11, 1956 for murder, pillage, and arson. He appealed against the sentence to a court martial, but was again condemned to death on July 4 after being found guilty of treason.

Relations between the Government and the Caodaists again deteriorated during the first two months of 1956. About 2,000 of the troops formerly commanded by General Trinh Minh-Thé revolted at the beginning of January, and on Feb. 19 Government troops occupied Tayninh, the Caodaist "capital." The leader of the sect, M. Pham Cong-Tac, subsequently fled to Cambodia.

Proclamation of the Vietnamese Republic.

The Ministry of the Interior announced on Oct. 6, 1955, that a referendum would be held on Oct. 23 to decide whether Bao Dai should be deposed. This decision was denounced by Bao Dai, who, in a Note on Oct. 13 to the French Government and the British, U.S., Soviet, and Indian Embassies in Paris, dissociated himself from M. Ngo Dinh-Diem's policy.

Bao Dai said in this Note that in the present situation it was the duty of every Vietnamese politician to work for the consolidation of peace, which could be done in two ways. "In the first place, it is necessary to organize or develop democratic and representative institutions . . . In the second place, the Governments of both South and North Vietnam, without renouncing their convictions, should try to reduce their antagonism, and even to co-operate sincerely in certain fields . . . M. Ngo Dinh-Diem's Government has refused to be guided by these principles . . . In order to free himself from all control, M. Ngo Dinh-Diem has sought to deny the authority of the man who appointed him, and to announce his deposition, which will be brought about by a so-called referendum engineered by his staff I do not attach great importance to this manoeuvre . . What is much more important is M Ngo Dinh-Diem's general attitude, both in its anti-democratic aspects and in its tendency systematically to aggravate relations between South and North Vietnam If this policy is continued, there is reason to fear . . . that it will compromise world peace. That is why I must not only dissociate myself unequivocally from it, but must also ask other Governments, and particularly the great Powers wielding most influence in that part of the world, not to encourage or support in any way a policy which responds neither to the deepest feelings of the Vietnamese people nor to the common cause of peace."

A communiqué issued by Bao Dai's office in Paris on Oct. 18 announced that he had dismissed M. Ngo Dinh-Diem from the Premiership and had annulled the full powers delegated to him. In a message to the Vietnamese people, published on the following day, Bao Dai explained that he had taken this action because "police methods and personal dictatorship must be brought to an end, and I can no longer continue to lend my name and my authority to a man who will drag you into ruin, famine, and war."

The referendum held on Oct. 23 resulted in a 98 per cent majority against Bao Dai, the official results being as follows: for Bao Dai's deposition, 5,721,735; against, 63,017; spoiled votes, 44,105.

The voting, during which polling stations were guarded by troops and police, generally passed off peacefully except in Sadec province, where several polling stations were bombarded by Hoa-Hao troops. The number of votes cast exceeded the number of names on the electoral registers in certain areas, notably in Saigon, where 605,000 votes were recorded although the electorate totalled only 454,000. This discrepancy was attributed by the Government to the fact that electors were not obliged to vote in their own constituencies

South Vietnam was officially proclaimed a republic, with M. Ngo Dinh-Diem as its President, on Oct. 26, 1955. President Ngo Dinh-Diem, who retained the posts of Prime Minister and Defence Minister, and assumed that of Supreme Commander of the Armed Forces, reappointed his previous Cabinet on Oct. 29, the only change being that the portfolio of Economic Affairs was transferred from M. Tran Huu-Phuong (Finance Minister) to M. Tran Van-Meo (Minister of Public Works). The new régime was recognized on Oct. 26-27 by France, the U.S.A., Great Britain, Australia, New Zealand, Italy, Japan, Siam, and South Korea, and on Dec. 12 by the Holy See.

Election of Constituent Assembly.

The Government announced on Jan. 23, 1956, that general elections for a Constituent Assembly would be held on March 4. Under the electoral law, the Assembly was required to ratify a Constitution to be drafted by the President; if it failed to do so within 45 days it would be dissolved, and the Constitution would be submitted to a referendum. The Assembly would be elected by all South Vietnamese citizens over 18 years of age, and would consist of 123 members, of whom 63 would represent Cochin China, 39 Annam, 12 the refugees from North Vietnam, and 9 the ethnic minorities of Annam. Candidates were required to be over 25, to have lived in South Vietnam for the six months preceding the elections, and to produce a "judicial certificate" establishing that they were not Communist or rebel sympathizers.

Before the elections a number of measures were taken against suspected opponents of the régime. It was announced on Jan 11 that the "Revolutionary Committee" had been dissolved, and when this was denied by its president, M. Nguyen Bao-Toan, its headquarters were occupied by troops. Dr. Pham Quang-Dan, leader of the Republican Party (a Caodaist organization), was arrested on Feb 19 for distributing leaflets protesting against the electoral law; many alleged Communists (reported as about 8,000) were also arrested, and numerous Independent candidatures were suppressed. The Press censorship was temporarily lifted during the election campaign, but the publication of news or comment favouring "Communist or anti-national" activities remained punishable by six months' to five years' imprisonment. Most of the Opposition parties boycotted the elections in consequence, on the ground that no genuine freedom of speech or of the Press existed, although a number of Opposition candidates stood as Independents.

The voting, in which about 85 per cent of the electorate took part, passed off peacefully in most areas; in some country districts, however, polling stations were burned down, or grenades were thrown into them while voting was in progress. The results, issued on March 9, showed that at least 101 of the 123 members of the Assembly were expected to support the Government, the distribution of seats being as follows:

National Revolution Movement	66*
Citizens' Rally	18
Workers' Party	10†
Conquest of Liberty Party ..	7
Social Democrats	2
Dai-Viet	1
Independents	19

*Including eight affiliated Independents. †Including six affiliated Independents.

Four pro-Government parties were represented in the Assembly: the National Revolution Movement, led by M. Tran Chanh-Thanh (Minister of Information); the Citizens' Rally, a Roman Catholic organization led by M. Tran Van-Lam; the Conquest of Liberty Party, led by M. Bui Van-Thinh (Minister of the Interior); and the Workers' Party. The Social Democrats and the Dai-Viet were the only Opposition parties represented.

The Assembly held its first session in Saigon on March 15. In a message to the Assembly, President Ngo Dinh-Diem proposed on March 19 that it should itself draft the Constitution, which, he suggested, should be modelled on that of the United States. The period of 45 days granted to the Assembly in which to draw up a Constitution expired on April 29, but was subsequently extended on June 2 by another 30 days.

Three-Power Talks on Vietnam.

The political crisis of March-May 1955 brought to a head differences of opinion which had arisen between the French and U.S. Governments over their policies in South Vietnam. Whereas M. Faure, the then French Prime Minister, stated on April 29, 1955, that it had been evident for some time that M. Ngo Dinh-Diem's Government was "not adapted to its mission," a U.S. State Department spokesman reaffirmed on the same day the U.S. Government's full support for M. Ngo Dinh-Diem.

The differences between France and the U S A. were further aggravated following the appearance of the "Revolutionary Committee," which, French sources alleged, had been set up on U S advice to give the South Vietnamese Government a semblance of popular support. Deep offence was caused in France by the violent anti-French propaganda carried on by the South Vietnamese Government and the "Revolutionary Committee," and in particular by allegations—made by both South Vietnamese and U S official sources—that the French military authorities had assisted the Binh-Xuyen. These charges were categorically denied on May 4 by both M Faure and General Ely, the French Commissioner-General and C.-in-C in South Vietnam.

In view of these differences, three-Power talks on the South Vietnamese question were held in Paris from May 7-12, 1955, between M. Faure, M. Pinay (then French Foreign Minister), Mr. Dulles (U.S. Secretary of State), and Mr. Macmillan (then British Foreign Secretary). M. Faure stated on May 13 that a complete understanding had been reached; that neither France nor the U.S.A. intended to interfere in South Vietnam's internal affairs; and that both countries supported M. Ngo Dinh-Diem's Government, though they wished to see it become more representative. M. Faure added that no official request had been received from South Vietnam for the withdrawal of the French Expeditionary Corps, but that a programme had been laid down for its repatriation.

Commenting on the Paris talks, M. Ngo Dinh-Diem declared on May 14 that as a sovereign country South Vietnam could not be bound by decisions taken at conferences in which she was not a participant.

Relations between France and South Vietnam. - M. Hoppenot succeeds General Ely as High Commissioner.

Relations between the French and South Vietnamese Governments remained strained after the Paris talks, despite M. Faure's pledge of support for M Ngo Dinh-Diem. General Ely, whose repeated attempts at conciliation during the struggle between the Government and the sects had been strongly criticized by M. Ngo Dinh-Diem, tendered his resignation on May 20, 1955, and left Saigon on June 2. The appointment of M. Henri Hoppenot, the permanent French representative on the U.N. Security Council, as his successor was announced on June 4, 1955. In view of South Vietnamese objections to the title of "Commissioner-General," however, he was appointed Ambassador-Extraordinary in South East Asia, charged with the functions of High Commissioner in Vietnam. General Ely was succeeded as C.-in-C. by General Jacquot.

Negotiations for the conclusion of military and cultural agreements, which opened in Paris on Aug. 14, 1955, remained deadlocked, as France was unable to accept certain South Vietnamese demands—notably that the Expeditionary Corps should be placed under Vietnamese command. The negotiations were accordingly broken off by South Vietnam on Oct. 13.

On Oct. 29, 1955, the South Vietnamese Government gave notice of termination of the general monetary and trade agreement with France concluded on Dec. 30, 1954 (see 14116 B), which provided for free monetary transfers between the two countries and granted preferential tariff treatment to French imports. The supplementary agreement of Dec. 30, 1954, which laid down the parity between the piastre and the franc, continued to remain in force.

Official South Vietnamese sources explained that this action (which followed shortly after the conclusion of trade and payments agreements between France and North Vietnam on Oct. 14—see 14486 A) had been taken because South Vietnam's shortage of francs had rendered free monetary transfers impossible.

In a Note of Nov. 30, 1955, President Ngo Dinh-Diem proposed that economic, financial, military, and cultural negotiations should be reopened, provided that France accepted certain political demands. These were that France should recognize the independence of Vietnam, undertake not to interfere in internal Vietnamese affairs, break off negotiations with North Vietnam, and support South Vietnam's demand for the postponement of the all-Vietnamese elections scheduled to take place in 1956 under the Geneva Agreements. The French Government rejected these conditions on Dec. 1.

The South Vietnamese Government announced on Dec. 20 that the monetary and trade agreement would be extended for two months until Feb. 29, 1956, whilst on the latter date it informed the French Government that it would apply to French imports (as from March 1) the minimum Customs tariff, from which 14 other States already benefited. M. Pineau, the French Foreign Minister, told the Council of the Republic on Feb. 23 that the opening of negotiations for a new trade agreement had been prevented by the political conditions laid down by President Ngo Dinh-Diem.

Radio-France-Asie, the radio station in Saigon controlled by the French Government under the Franco-Vietnamese conventions of 1949, ceased to broadcast at the end of February, 1956, following an Order signed by President Ngo Dinh-Diem which established a State monopoly of broadcasting and cancelled all previous agreements Two of the leading French correspondents in South Vietnam, M Max Clos of *Le Monde* and M Lucien Bodard of *France-Soir*, had been expelled from the country on Nov 18, 1955, on the ground that they had previously visited Hanoi, the capital of North Vietnam

Evacuation of French Expeditionary Corps.

The South Vietnamese Government informed the French Government at the end of January 1956 that it wished the French Expeditionary Corps to be withdrawn, in accordance with France's commitment under the Geneva Agreements to evacuate her troops from Indo-China when requested by the Governments concerned. The main body of the Expeditionary Corps was accordingly withdrawn by April 25, with the exception of 3,000 men entrusted with the liquidation of the French bases in South Vietnam—which, under an agreement concluded on March 22, was to be completed by June 30. The French High Command in South Vietnam was formally dissolved on April 28, when General Jacquot left Saigon for France.—(Le Monde, Paris - Le Figaro, Paris - Times - New York Times) **(Prev. rep. 13657 A; 13689 A.)**

A. AUSTRALIA. — Further Import Restrictions. - Fifty per cent Cut in Imports of Cars.

The Acting Australian Prime Minister, Sir Arthur Fadden, announced on June 28 that the Government would introduce new licensing arrangements designed to reduce imports by about £A.40,000,000 in a full year.

Sir Arthur said that although Australian exports would be higher in the current year than had been expected earlier, there was need for further restraint in the flow of imports—which, at the existing rate, could exceed £A700,000,000 a year The effect of the restrictions imposed in October 1955 had been moderated by "flexibilities in administration," and there were licenses outstanding from earlier periods which had been fully taken up. Moreover, unrestricted imports of petroleum products had exceeded anticipated quantities.

The Acting Minister for Trade, Mr. McMahon, gave details of the changes on the same date.

Mr. McMahon said that there would be no changes of policy in regard to those items which were not at present subject to control on a quota basis However, in the administration of licensing within this group there would be some tightening and readjustment of allocations to permit foreign exchange requirements of the essential development programme to be met

Among the other goods imported, those in category 'A' (including essential raw materials and producer goods) were to be licensed at varying percentages of the quotas available to importers as at June 25, 1956, and would be subject to periodical review Imports of goods in category 'B' (including some metal goods, textiles, clothing, paper, foodstuffs, and fancy goods) were to be subject to quotas based on 1954-55 imports and reduced by 25 to 33⅓ per cent below the current level of imports Some goods formerly in category 'B' were transferred to category 'A,' as were other goods in the special administrative category of essential imports In addition, the previous freedom of interchangeability of licenses for 'B' category goods was restricted by the establishment of separate quotas for seven sub-categories.

It was announced that under the new restrictions, imports of fully assembled cars (in category 'B') would be reduced by 50 per cent and those of unassembled chassis and engines (in category 'A') by 30 per cent. Whisky imports were cut by 25 per cent, cigarettes by 50 per cent, and a variety of prepared foodstuffs by 25 per cent. Imports of refrigerators and washing-machines were cut to 10 per cent of the 1954-55 figure.

It was estimated in London that half the Australian cuts might fall on British exporters. In 1955 Australia took 49,587 complete cars and 49,626 chassis from the U.K. at a total value of over £26,000,000.—(Australian News and Information Bureau - Times - Financial Times) **(Prev. rep. 14470 A.)**

A. EGYPT. — Completion of British Evacuation of Canal Zone. - National Celebrations. - Colonel Nasser elected President of Egypt. - Adoption of New Constitution. - Abolition of Martial Law and Press Censorship. - Dissolution of Revolution Command Council. - Appointment of Civilian Ministers.

The final evacuation of the Suez Canal Zone by British forces was commemorated by a week's nation-wide celebrations throughout Egypt. The celebrations began on June 18 (Egypt's National Day) and ended on June 23, on which date Colonel Nasser was elected President of the Egyptian Republic in an election at which he was the only candidate. The new Egyptian Constitution was also approved in a plebiscite held on the same day.

Evacuation of Suez Canal Zone.

The last British troops in the Canal Zone, consisting of a rearguard party of 11 officers and 68 other ranks under the command of Brigadier J. A. Lucey, sailed from Port Said for Cyprus on June 13—five days before the expiration of the 20-month period laid down in the Anglo-Egyptian agreement of 1954.

A statement issued simultaneously in Cairo, Port Said, and Nicosia said that "final arrangements for taking over the Suez Canal base by civilian contractors have been completed according to plan," and that "from now on the base will be run by Suez Contractors, who, in accordance with the Anglo-Egyptian agreement, will carry out on a civilian basis the task required for serving the British Middle East Command."

Colonel Nasser formally hoisted the Egyptian flag over Navy House in Port Said on June 18 to mark the end of the British occupation of the Canal Zone. In a broadcast to the nation he declared that the occasion marked "the culmination of a lifetime's struggle" against "a foreign occupier who for over 70 years had the final say in our homeland."

Ending of Martial Law.

Speaking on June 19 at a mass rally in Republic Square, Cairo, Colonel Nasser announced the ending of martial law, the abolition of press censorship, and the release of all political prisoners who had been held for "plotting against the revolution."

In a speech broadcast to all the Arab countries, Colonel Nasser said that Britain had "fulfilled her obligations" by withdrawing from the Canal Zone, and that Egypt had "no aggressive intentions towards her." He added that Egypt was prepared to "hold out the hand of friendship" to Britain, the U.S.A., the Soviet Union, and all other Powers, "but not at the expense of our independence and dignity." After announcing the end of martial law, Colonel Nasser declared: "Today Egypt is entirely free. Not a single foreign flag flies over Egyptian soil. For the first time in centuries we are completely free to fight for our own destiny . . . The new Constitution aims at building a society based on freedom, justice, and equality for all . . We shall rule in the name of the Constitution and law."

At the end of his speech Colonel Nasser called for the strengthening of Egypt's forces "to liberate all Arabs so that the lands of the Arabs may belong to them, and so that the Palestine tragedy may not be repeated and we may be able to restore to the people of Palestine their right to freedom and existence."

Martial law was officially abolished on June 26 except in the Sinai and Red Sea provinces (i.e. the areas adjacent to the Israeli border), where it was maintained for a further year. Egypt had been under martial law continuously for the past 16 years, except for a few months.

National Day Celebrations.

The National Day celebrations in Cairo were attended by representatives of all the Arab countries except Iraq, by the Soviet Foreign Minister (M. Shepilov), and by General Sir Brian Robertson (formerly C.-in-C., British Middle East Land Forces), who had accepted an invitation extended by the Egyptian Government. General Robertson—now chairman of the British Transport Commission—was the chief British negotiator in the Anglo-Egyptian discussions which led to the agreement of 1953 on the evacuation of the Suez base.

The celebrations culminated on June 20 with a military parade in Cairo in which the participants included Syrian, Lebanese, Jordanian, Saudi Arabian, Yemeni, and Sudanese troops in addition to the Egyptian armed forces. A contingent of the "Palestine Arab" army also took part in the parade, which lasted nearly four hours. A considerable amount of the new military equipment from Communist sources was on view, including about 100 troop-carrying vehicles of Czechoslovak manufacture, about 30 heavy *Stalin* tanks, over 100 medium (T-34) tanks, 20 Soviet-type MIG fighters, and 10 jet bombers of Czechoslovak type. Most of the aircraft, however, appeared to be British *Meteors* and *Vampires*, while there were also a number of British *Valentine* and *Centurion* tanks and French light tanks.

British Foreign Secretary's Message to Egypt.

A message from the British Foreign Secretary (Mr. Selwyn Lloyd) expressing H.M. Government's desire for friendly relations with Egypt was published in the Cairo newspaper *El Akhbar* on the occasion of the Egyptian National Day. It was worded as follows:

"It was always our hope and belief that the signature of the Suez Base agreement would lead to a new era of friendship and understanding between the two countries. It is a disappointment that this has not been so. There are no actual disputes or conflicts between Great Britain and Egypt which justify the present lack of confidence between the two countries. We have shown that we want good relations with Egypt, not only by the Canal Base Agreement but also by the Sudan Agreement, the Sterling Balances Agreement, the Cotton Futures Market Agreement, and the exchange of trade missions.

We are told sometimes that in our policy in the Middle East we are trying to isolate Egypt and deprive her of her legitimate position in the Arab world. This is not true at all . We consider that all Arab countries, great and small, have equal rights, and we intend to prove loyal and reliable friends to those who will co-operate with us and to those who rely on our support. I hope the Egyptian people will not lend too ready an ear to any who attempt to foment bad relations between Arab peoples and the West. I am sure that if we respect one another's legitimate interests and treat one another with fairness and mutual respect, the British and Egyptian peoples can build up a new friendship for the future. That is certainly the desire of H.M. Government."

In a press statement before leaving Cairo, General Sir Brian Robertson said that he had had personal discussions with Colonel Nasser, General Hakim Amer (the Egyptian War Minister and C.-in-C.), and other Egyptian leaders, and had been treated throughout "with great courtesy." Saying that he had been much encouraged by Colonel Nasser's declaration on June 19 that Egypt was ready to "hold out the hand of friendship to Britain," Sir Brian pointed out that "our Foreign Secretary [Mr. Selwyn Lloyd], in his statement to the Egyptian Press, has made it clear that the hand has been offered." Before leaving Egypt, Sir Brian received from Colonel Nasser the Order of the Egyptian Republic—an honour also conferred on M. Shepilov.

On returning to London (June 21) Sir Brian Robertson said that he had gone to Cairo "because it was thought appropriate that I should accept the courteous invitation from Colonel Nasser, and also because it was felt that my presence there at this critical moment in the history of Anglo-Egyptian relations might perhaps do some good." He added that he had been treated throughout as "an honoured guest."

Presidential Election and Constitutional Plebiscite.

Over 5,500,000 electors—including women voters, for the first time in Egyptian history—went to the polls on June 23 for the presidential election and the constitutional plebiscite, attendance at polling-stations being compulsory for male voters and optional for female voters. The electors were required to answer "yes" or "no" to the questions (*a*) whether they approved the nomination of Colonel Nasser as President of Egypt, and (*b*) whether they approved the new Constitution published in January last (see 14927 A).

It was officially announced on June 26 (*a*) that 5,496,965 votes had been cast for Colonel Nasser as President of the Republic (99·9 per cent of the total) and 2,857 against; (*b*) that the new Constitution had been approved by 5,488,225 votes (99.8 per cent) against 10,046.

Dissolution of Revolution Command Council.

The Revolution Command Council—the nine-man military *junta* which had ruled Egypt since the deposition of King Farouk—was dissolved on June 24. As its last act it approved a decree giving the Minister of the Interior powers, valid for a ten-year period, to arrest or imprison persons who had previously been condemned by the various revolutionary tribunals.

This decree implied that former political prisoners—all of whom, as announced by Colonel Nasser, had been released (see above)—could be re-arrested and imprisoned if the authorities considered it necessary.

Appointment of Civilian Ministers.

A Cabinet reorganization was carried out by President Nasser on June 30 involving the following new appointments:

(i) Dr. Aziz Sidky as Minister for Industry in place of Wing-Commander Hassan Ibrahim, formerly Minister of National Production. The Ministry for Industry—a new portfolio—was created by dividing the former Minister of Commerce and Industry into two. Dr. Sidky holds a doctorate in engineering of Harvard University.

(ii) Dr. Said Marei as Minister of State for Agrarian Reform *vice* Colonel Anwar Sadat.

(iii) Dr. Mustafa Khalil as Minister of Communications *vice* Wing-Commander Gamal Salem.

The effect of the changes was that three leading members of the Revolution Command Council were succeeded by civilian Ministers, all of whom were doctors of engineering with high technical qualifications and Western training and experience Wing-Commander Ibrahim, Colonel Anwar Sadat (editor of *Al Goumhouria*, and known for his violently anti-British attitude), and Wing-Commander Gamal Salem (a brother of Major Salah Salem, who was placed on "indefinite leave of absence" in August last—see 14391 D) had all held positions of great influence since the overthrow of the monarchy, and their disappearance from the Government gave civilian Ministers a two-to-one preponderance in the administration. This development was seen by foreign correspondents as marking a decline in the influence of the more radical and anti-western elements in the Egyptian Government, and as indicating a new emphasis by President Nasser on problems of economic development and industrial and agricultural organization

Another innovation was that all military titles were dropped in the official Cabinet list except in the case of Major-General Hakim Amer, Minister of War and C.-in-C. of the Egyptian Army.

The new Cabinet was sworn in by President Nasser on June 30, taking an oath "to safeguard the republican regime, respect the Constitution and the law, and watch over the people's interests."—(Le Monde, Paris - Times - Manchester Guardian) **(Prev. rep. New Constitution, 14927 A; Suez Base, 14860 B; Cabinet, 13772 C.)**

A. INDIA. — The Hindu Succession Act.

The Hindu Succession Bill, codifying and revising the traditional Hindu laws relating to intestate succession and women's property rights, was passed by the House of the People on May 8 by acclamation. Its most important provisions were as follows:

(1) Women were granted the right to inherit and hold property on the same terms as men. In the past women had possessed only a limited right over inherited property—e.g. they could not sell it, except in certain circumstances, or bequeath it by will.

(2) If a man died intestate, his property would be inherited by his widow, or, if his wife had pre-deceased him, it would be equally divided between his sons and daughters In the past a daughter had no claim to a share in her father's property.

(3) If a woman died intestate, her children would become her first heirs, followed by her husband and her parents In the absence of issue, property inherited from her father would revert to his family, and property inherited from her husband or father-in-law would revert to her husband's heirs

(4) An unmarried woman, a widow, or a woman deserted by or separated from her husband, was granted the right of residence in her father's home.

The Bill had been passed by the Council of States on Nov. 30, 1955, in a somewhat different form from that subsequently adopted by the *Lok Sabha* (House of the People). It was, however, given the Presidential assent on June 18, 1956, after the Council of States had concurred with amendments made by the Lower House. The Bill is one of a series covering the whole field of Hindu law, the first such Bill—the Hindu Marriage Act—having been passed by the Indian Parliament in May 1955. (The Hindu, Madras - The Statesman, Calcutta) **14231 A.)**

B. ALGERIA. — Reorganization of Departments.

Administrative changes were approved by the French Cabinet on June 20 whereby the four existing Algerian *départements* (Algiers, Constantine, Bône, and Oran) were divided into 12 departments, as follows: (i) the Algiers department was divided into the departments of Algiers, Tizi-Ouzou, Médéa, and Orléansville; (ii) the Oran department was divided into the departments of Oran, Tlemçen, Tiaret, and Mostaganem; (iii) the Constantine department was divided into the departments of Constantine, Sétif, and Batna; (iv) the Bône department (created in 1955, and the smallest in Algeria) remained unchanged. No alteration was made in the status of the Southern territory—the Saharan hinterland. The names of the new departments were taken from their administrative centres.

The new departments were officially created by a decree of July 3, and at the same time were grouped for administrative purposes into three *Inspections générales de l'administration*—abbreviated in French *igamies*, a neologism—headed respectively by the Prefects of the former departments of Algiers, Oran, and Constantine. (Le Monde, Paris) **(Prev. rep. 14431 A.)**

C. NORWAY. — The North Cape Road.

The North Cape Road, running from Honningsvåg to the North Cape—the northernmost point of Europe—was officially opened on June 30 by the Norwegian Minister of Transport, Hr. Kolbjorn Varmann. The road will make North Cape accessible for tourists by coach or car, whereas in the past it could only be reached by sea. (Aftenposten, Oslo)

D. RUMANIA - YUGOSLAVIA.—Joint Declarations on International Affairs, Rumanian-Yugoslav Relations, and Collaboration between Rumanian and Yugoslav Communist Parties.

Joint statements on the talks between President Tito and the Rumanian Government during the Yugoslav President's visit to Bucharest (see page 14938) were published on June 26 in Bucharest and Belgrade. Like the documents signed at the end of President Tito's visit to Moscow, they consisted of (*a*) a joint declaration on international affairs and Rumanian-Yugoslav relations, and (*b*) a statement on the restoration of relations and mutual co-operation between the Communist parties of Rumania and Yugoslavia. These documents (the text of which was received too late for publication in 14937 A) are summarized below:

International Affairs and Rumanian-Yugoslav Relations.

That part of the communiqué dealing with international relations was practically identical with the similar Soviet-Yugoslav declaration It declared, *inter alia*, that Rumania and Yugoslavia were fully agreed that "direct contacts between statesmen constitute one of the most important means for settling controversial issues between States . . . and for strengthening mutual trust and co-operation", that "disarmament and the banning of weapons of mass destruction represents a primary problem for all peoples and States"; that both Governments were convinced of "the need for unimpeded international trade and the abolition of artificial barriers"; and that "the policy of active peaceful co-existence between all States, irrespective of their social and political systems, is the only way to strengthen and develop international co-operation" Both countries pledged their full support for the United Nations, and their co-operation in all efforts to achieve world peace and disarmament.

After expressing their satisfaction at the recent improvement in relations between the two countries, in particular since the signing of the "Belgrade Declaration" [i.e. the joint declaration signed by Yugoslavia and the U.S.S.R. during the Bulganin-Khrushchev visit to Yugoslavia in 1955], the communiqué said that "significant results have been accomplished in this direction" through the normalization of conditions on the Rumanian-Yugoslav frontier, the regulation of rail, river and air communications between the two countries, mutual visits of scientific and cultural workers, and the "satisfactory solution of the question of habilities" between the two countries. Both Governments expressed their intention of developing and strengthening Rumanian-Yugoslav relations "in the spirit of friendship and on the basis of the principles of sovereignty, territorial integrity, equality, mutual respect, and non-interference in internal affairs."

Specifically, the two Governments announced their intention of (*a*) concluding a long-term trade agreement, (*g*) setting up a mixed commission to examine the joint construction of a power-station in the Iron Gates area, on the Danube (see page 14938, second column), (*c*) concluding a convention on scientific and technical co-operation; (*d*) drawing up a cultural agreement, and expanding Rumanian-Yugoslav cultural and scientific exchanges; and (*e*) facilitating "direct contacts between political, trade union, and other social organizations of the two countries."

Relations between Rumanian and Yugoslav Communist Parties.

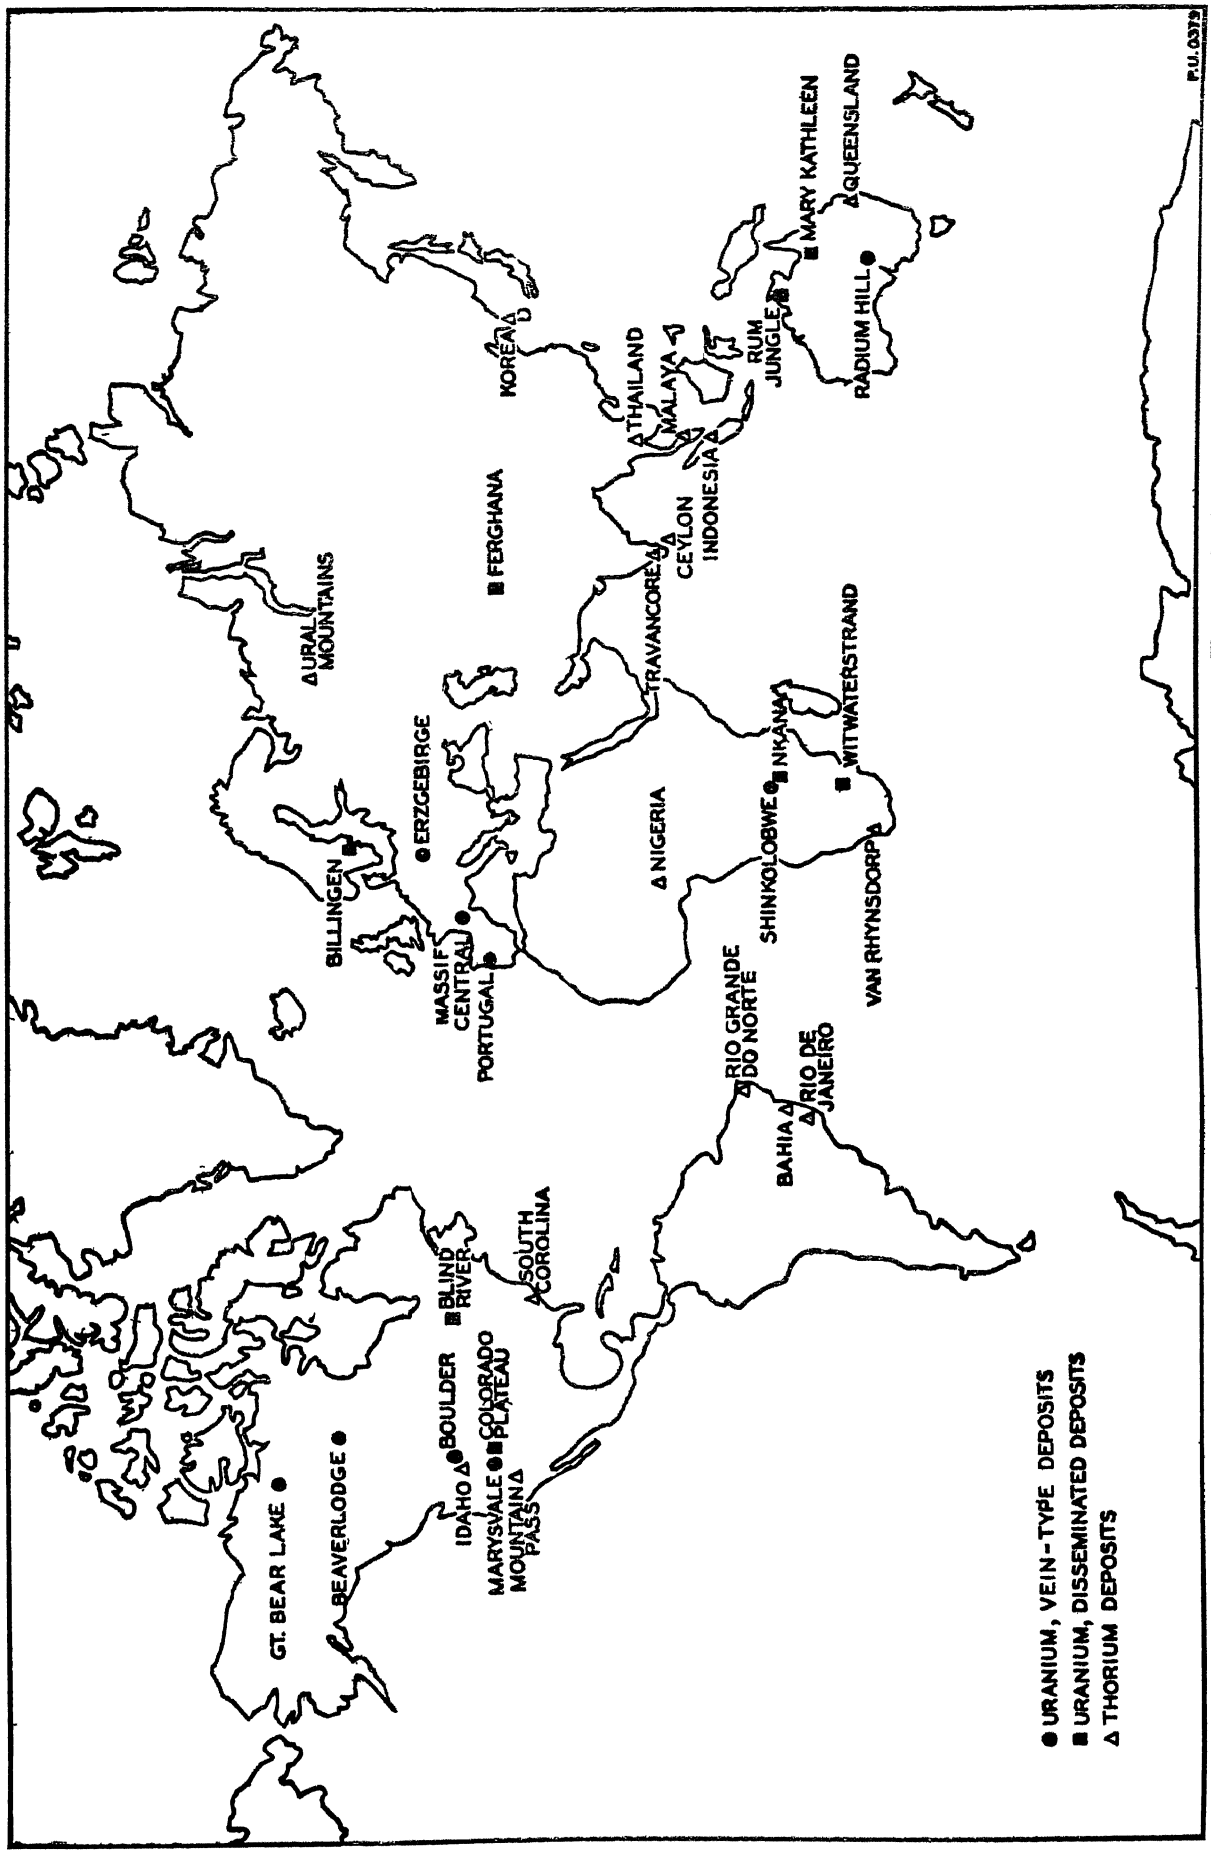
After referring to the "open and comradely exchange of views" on this matter, the communiqué announced (*a*) that both sides were agreed on "the need for the establishment and development of contacts and comradely co-operation" between the Rumanian Workers' Party and the League of Communists of Yugoslavia; (*b*) that the two parties would establish personal contacts and exchange delegations and literature, and (*c*) that a delegation from the Rumanian Workers' Party would visit Belgrade at the invitation of the League of Communists of Yugoslavia.

The joint statement on international affairs and Rumanian-Yugoslav relations was signed by President Tito and M. Chivu Stoica, the Rumanian Prime Minister, while the declaration on relations between the two Communist parties was signed by President Tito and M. Gheorghiu-Dej, first secretary of the Rumanian Workers' Party.—(Tanjug Agency, Belgrade) **(Prev. rep. 14937 A.)**

E. UNITED KINGDOM. — Trade Unions. - New President of Amalgamated Engineering Union.

Mr. W. J. Carron (53), a member of the General Council of the T.U.C., was elected president of the Amalgamated Engineering Union on June 27, obtaining 83,847 votes against 35,400 for Mr. R. Birch (a leading Communist trade unionist) on the second ballot. Mr. Birch headed the first ballot but failed to secure election because he did not get the necessary clear majority over the three other candidates. The A.E.U. is the second largest union in Britain, with some 950,000 members. Only about 12 per cent of the union's membership voted in the final election for the new president.

Mr. Carron, a full-time officer of the A.E.U. since 1953, will succeed Mr. R. Openshaw on his retirement from the presidency in September. He has taken a special interest in automation and has visited automatic plants in a number of countries. (Times - Manchester Guardian) **(Prev. rep. 14863 A.)**



The map, showing the world distribution of uranium and thorium deposits, was published by the *Financial Times* (London) on April 9, 1956, in a Special Supplement on Atomic Energy.

A. UNITED KINGDOM. — Anglo-Soviet Trade. - Trade and Payments Agreements with Foreign Countries. - Reduced Export Guarantee Premiums.

The Board of Trade announced on April 30 that 42 of the 87 categories of goods in the list of Soviet trade requirements handed to U.K. representatives at the time of the visit of Marshal Bulganin and M. Khrushchev (see 14833 A) were not affected by strategic export controls; 18 categories were subject to embargo, 10 were subject to embargo for certain types only, and four were subject to quantitive restriction. Further information was required about the remainder.

U.K imports from the Soviet Union in 1955 amounted to £62,777,000, and British exports to the U S.S R. totalled £22,904,000

The principal trade and payments agreements concluded by Britain with other countries during the past twelve months are given below. Agreements on bilateral quotas were reached with several other countries.

Bulgaria. An Anglo-Bulgarian financial agreement and trade arrangement were signed on Sept 22, 1955, as a result of the first negotiations to be held between the two countries on trade and debts since the war.

The financial agreement provided for the payment by Bulgaria to the U K. of £400,000 in settlement of outstanding claims (other than holdings in Bulgarian Government bonds), payment to be effected by annual instalments of 5 per cent of the sterling proceeds of goods imported into the U K. from Bulgaria Settlement of the question of the Bulgarian bonded debt was deferred, as a Bulgarian offer of £186,000 (equivalent to 6 7 per cent of the nominal capital value of the bonds held by U K residents) had been unacceptable to the British negotiators.

The trade arrangement provided (*a*) for the issue, by September 1956, of import licences for £1,500,000 worth of Bulgarian goods (mainly fruit and vegetables) not already covered by an open general licence, and (*b*) for the purchase by Bulgaria in the same period of £2,500,000 worth of British goods, including machinery and textiles Details of trade between September 1956 and the end of 1957 were left to later negotiations.

Burma. Under an agreement signed on June 18, 1956, Britain undertook to supply Burma with cotton textiles valued at about £940,000, payment will be made in raw cotton supplied by the U S.A. to Burma as part of the U.S. aid programme (see 14874 A)

Hungary. Financial and trade agreements between the United Kingdom and Hungary were signed on June 28, 1956.

The financial agreement provided that the Hungarian Government would pay the U K £4,050,000 in full settlement of U K claims arising from the Peace Treaty and certain pre-war debts and other claims. It would also pay £450,000 to representatives of short-term creditors and Treasury Bill holders. Payment would be made by annual instalments of 6½ per cent of the sterling proceeds of Hungarian imports into Britain. Settlement of the question of the Hungarian bonded debt was excluded from the agreement, the Hungarian offer being unacceptable to the British representatives.

The trade agreement provided for the issue by Britain in the next 12 months of import licences for £3,000,000 worth of Hungarian goods not subject to open general licence Hungary agreed to purchase £4,500,000 worth of U K goods, including textiles, chemicals and machinery, in the same period.

Total Anglo-Hungarian trade increased from £2,450,000 in 1954 to £5,350,000 in 1955

Iraq. The Iraqi Finance Minister, Dr. Jafar, announced on October 27, 1955 that Britain and Iraq had reached an agreement under which (*a*) Iraq would buy £5,000,000 worth of gold from the U.K for payment in sterling; (*b*) Britain would provide up to $2,000,000 to cover Iraq's obligations to the International Monetary Fund (see 14565 A)

Dr Jafar also said that Britain had agreed that Iraqi dates could be imported free of duty, while Iraq would lift duties on certain British goods.

Japan. After prolonged negotiations, a new Anglo-Japanese trade and payments agreement was signed in Tokio on Oct. 17, 1955

The existing payments agreement between the two countries, which regulates payments between Japan and the sterling area, was extended to Sept 30, 1956, whilst assurances were given by the Japanese that they would take measures to correct the imbalance of payments between Japan and the sterling area (estimated at that time at £70,000,000 in Japan's favour) In this connexion the Japanese authorities undertook to eliminate all regulations tending to encourage imports from non-sterling sources in preference to sterling area sources, except for certain provisions covering some commodities imported from Indonesia

Japan undertook to set aside £127,500,000 for expenditure in the sterling area between October 1955 and March 1956, compared with £209,500,000 for a 12-month period under the previous agreement

As regards U.K -Japanese trade, it was estimated that in the year ending Sept. 30, 1956, Japanese imports from Britain would reach £18,000,000, and exports to the U K. £22,000,000 The quota allowed for imports of British woollen textiles was increased from £2,000,000 to £2,800,000, a quota of £200,000 was fixed for cotton piece-goods; and improved facilities were offered for other imports. The U.K. agreed to increase its quota of canned salmon imports from Japan from £2,200,000 to £4,700,000

As regards British dependent territories, the agreement laid down (*a*) that they would be allowed to export to Japan all that they had asked to be allowed to export, provided such exports were commercially competitive, (*b*) that they would continue to license imports from Japan up to the amount required

Further Anglo-Japanese trade talks in London were concluded in April 1956. It was agreed to arrange new quotas permitting additional trade between the U.K. and Japan of a value of about £150,000 each way. Japan also undertook to earmark a further £127,500,000 for imports from the sterling area in the six months ending Sept 30, 1956

Paraguay. A five-year trade and payments agreement between the U K and Paraguay was signed on Nov 21, 1955 It maintained reciprocal most-favoured nation treatment between the two countries.

Poland. Agreement was reached on Feb 6, 1956, on details of Anglo-Polish trade in 1956—the last year covered by the trade agreement of 1954

In 1955 British imports from Poland had totalled £29,400,000, but exports to Poland amounted to only £6,400,000. Commenting on these figures, the Minister of State, Board of Trade (Mr Austin Low) said in the House of Commons on Feb 7 that there was "room for considerably increased purchases by Poland."

Spain. Anglo-Spanish trade talks were held from Nov 30-Dec 23, 1955, to discuss the working of the 1955 arrangements and to make new arrangements for 1956

The President of the Board of Trade (Mr. Thorneycroft) stated on April 12, 1956, that the Exports Credit Guarantee Department had decided to make reductions in its premiums for short-term business with some 110 out of the 170 markets for which it issued guarantees. The markets affected accounted for over 80 per cent of U.K. export trade in 1955.—(Treasury Press Office - Board of Trade Journal - Financial Times)

(Prev. rep. Trade and Payments Agreements, 14180 A; Export Credit Guarantees, 12558 A.)

B. WESTERN GERMANY. — German Social Union formed by Dr. Otto Strasser.

A new political party under the name of the German Social Union was founded at Miltenberg (Bavaria) on June 15 by Dr. Otto Strasser, formerly a close associate of Hitler in the early days of the Nazi movement. Dr. Strasser, who had returned to Germany in 1955 after 21 years' exile in Canada, broke with Hitler in the early 'thirties and set up a rival "Black Front" organization. He was deprived of his German citizenship by the Nazi Government in 1935 after he had fled the country, and had been living in Nova Scotia since that year as a stateless person. His brother, Gregor Strasser, was executed by the Gestapo in 1934.

An application by Dr Strasser for the restoration of his German citizenship and for permission to return to Germany was granted on April 29, 1953, by the administrative court of North Rhine-Westphalia at Cologne The Federal Ministry of the Interior appealed against this decision to the Supreme Administrative Court, which, however, ruled on Nov. 19, 1954, that Dr Strasser could not be denied citizenship of the Federal Republic.

Dr. Strasser (who is 59) said at the Miltenberg meeting that the new party aimed at a strong, reunited, and neutralist Germany linked neither to the East nor to the West. He proposed that direct talks should be undertaken with the Soviet and East German Governments, and that a plan for reunification should be drawn up by West German, East German, and Saar representatives. Other features of the new party's policy included economic and financial reforms to benefit the middle classes and farmers; reorganization of commerce and industry to give workers a share in the ownership, direction, and profits of industrial enterprises; the establishment of an economic parliament parallel with the existing Legislature; the creation of a *Rechtstaat* (State based on law) with equal rights for all citizens; a strong foreign policy; and the return of their homes to Germans who had been deported from Germany's former eastern provinces. Dr. Strasser described his programme as substantially that of National Socialism before it was "perverted" by Hitler. The Miltenberg meeting was interrupted by anti-nazi demonstrators, the police being called in to restore order. (Times - Frankfurter Allgemeine Zeitung)

C. UNITED STATES. — Senatorial Appointment.

Mr. Robert Humphreys (61), chairman of the Democratic Party organization in Kentucky, was nominated by Governor Chandler on June 21 as a Senator for Kentucky in place of the late Senator Alben W. Barkley (Democrat), who died on April 30, 1956. Mr. Humphreys, a pharmacist by profession, was State Highway Commissioner for Kentucky prior to his appointment. He will sit in the Senate until the senatorial elections in November, 1956.—(New York Times)

A. GOLD - SILVER. — World Production and Consumption Figures in 1955.

The following estimates of gold production in the leading producing countries in 1955 (in thousands of fine oz.) were published in the Annual Bullion Review issued by Samuel Montagu & Co. Ltd., from figures compiled by the Union Corporation Ltd. (revised 1954 estimates in parentheses):

South Africa	14,591	(13,237)	Fiji	70*	(72)
Canada	4,545	(4,366)	Tanganyika	70*	(74)
U.S.A.	1,891	(1,859)	Sweden	70*	(70)*
Australia	1,055	(1,118)	New Zealand	40*	(42)
Gold Coast	687	(787)	Elsewhere	1,064*	(1,083)*
Southern Rhodesia	525	(536)	World Total excluding U S S.R †	27,150*	(25,850)*
Philippines	415*	(416)			
Mexico	380*	(396)	British Commonwealth	21,930*	(20,623)
Colombia	381	(377)			
Congo	375	(365)	British Commonwealth percentage	80.8	(79 8)
Japan	289	(300)			
India	212	(241)	South African percentage	53 7	(51.2)
Brazil	145	(153)			
Chile	125*	(125)			
Peru	145*	(147)			
New Guinea	75*	(86)			

* Estimated or provisional figure.

† Production in the U.S.S R. is thought to have amounted to more than 10,000,000 oz. The low notional figure of 2,000,000 oz per annum, published in previous reviews, almost certainly underestimated actual production.

The first full year of operation of the London Gold Market since 1938 confirmed the 1954 experience that this market had more than regained its pre-war eminence, and it was estimated to have handled not less than 85 per cent of the fresh gold supplies coming on the international free market. Largely through selling South African gold under the agreement with the Union, the Bank of England was the biggest single operator in international gold trading in 1955.

The official gold price in London averaged 251s. 7 12d per fine oz. in January, 1955, and after reaching its highest point at 251s 11d in February fell to 250s. 4½d during April Prices again rose to 251s. 9¾d in July but fell during the second half of the year The lowest point reached in December was 249s 4¾d.

International gold prices from the beginning of 1955 until early August ranged from $35 03 to $35 06½ After wavering slightly below this level during the rest of August, prices sagged and were quoted in London at $34 98 to $34 99 on Sept 13. During the rest of the year they varied between $34 95½ and $34 99½

Details regarding the world silver market in 1955 were given as follows:

Silver Production. Estimates, with revised 1954 figures in parentheses, were as follows (in fine oz): Mexico, 45,000,000 (39,900,000), U.S.A., 36,000,000 (37,100,000), Central and South America, 31,000,000 (32,400,000), Canada, 27,700,000 (30,700,000); Australia, 11,000,000 (11,500,000), U S S.R, 24,000,000 (24,000,000); Japan, 6,800,000 (6,900,000), Rest of World, 23,220,000 (25,200,000) Total world output was thus estimated at 204,700,000 oz, against 207,700,000 oz in 1954

Silver Consumption. Industrial consumption in 1955 was estimated at about 179,000,000 oz, of which no less than 100,000,000 oz were used in the U S A. In Europe the largest consumer was again Western Germany, with 31,500,000 oz The U K consumed about 14,000,000 oz. in essential industries and for export in fully or partly manufactured form

Saudi Arabia acquired 17,000,000 oz. of the estimated total of 38,000,000 oz absorbed in 1955 for coinage U S. use of silver for coinage declined to 8,000,000 oz from 53,000,000 oz in 1954

On these estimates the offtake for industry and coinage amounted to some 217,000,000 oz —nearly 13,000,000 oz more than the estimated world production

U.K. Silver Bullion Imports and Exports. U K. imports of silver bullion were estimated at 29,438,200 troy oz, compared with 23,119,900 oz in 1954. Exports were estimated at 11,392,500 troy oz., compared with 12,049,200 oz in 1954 The largest imports came from the U S S R. (9,160,700 oz), the U S A (7,088,600 oz), Australia (6,534,000 oz), Lebanon (1,386,300 oz), and Mexico (1,300,000 oz) The largest exports went to France (3,816,900 oz), Italy (2,052,900 oz), and Portugal (1,806,400 oz)

Silver Prices. Silver prices during the year were influenced by the Bank of Mexico's abandonment of its long-standing policy of stabilizing the New York market London prices, which varied between 73¾d. and 74¼d per oz in Jan and Feb, rose to 77¼d. in March following an increase in the New York price (for the first time since Jan 16, 1953) from 85¼ cents to 89¾ cents After a lull both New York and London prices rose further—the London price to 78½d in May, 79d. in June, and 80½d. in Oct., the highest price recorded since 1920. The price fell to 77¾d at the end of November and rose again to 78½d at the end of the year.

At the end of 1955, 381,315,670 oz. of silver were still owed by various countries to the U.S.A. in respect of Lend-Lease borrowings. The largest debtors were India and Pakistan (225,999,904 oz.) and the U.K. (88,073,878 oz.). Repayment of the U.K.'s debt has since begun (see 14845 B).

(Samuel Montagu & Co.'s Annual Bullion Review) **(14132 B.)**

B. AUSTRALIA. — Queensland Elections. - Labour Party returned to Power. - The Foley Case.

Elections to the State Legislature took place in Queensland on May 19, the final results being as follows (party strengths in the old Assembly shown in parentheses). Labour 49 (49); Country Party 16 (15); Liberal Party 8 (8); Independents 2 (3). Six members, including five from the Opposition parties, were returned unopposed. Mr. Gair, the Queensland Premier, Mr. Duggan (the Deputy Premier), and all other members of the State Ministry, were re-elected, as well as Mr. Nicklin (Country Party), the Leader of the Opposition.

At a meeting of the State Parliamentary Labour Party on May 25, Mr. Gair was re-elected State Premier—a position he has held since 1952. On June 7 it was announced that the composition of the State Cabinet would remain unchanged, but that the following alterations in the allocation of portfolios had been made: Mr. P. J. R. Hilton (Minister for Works and Housing) as Minister for Lands and Irrigation; Mr. T. A. Foley (Lands and Irrigation) as Minister for Mines; and Mr. C. G. McCathie (Mines and Immigration) as Minister for Works, Housing, and Immigration.

On June 14, however, it was announced that Mr. Foley had resigned from the Cabinet following the publication of the report of the Royal Commission on Land Leases, which had enquired into matters associated with the Lands Department and which had found him guilty of corrupt practices.

The Commission found that Mr Foley had pleaded "guilty" on two counts of corrupt practices involving his dealings with a Queensland grazier. It also found that he had been guilty of soliciting a donation of £A1,000 for Labour Party funds from another Queensland grazier, promising in return that he would consider granting the grazier a new lease of certain land (to this charge Mr. Foley had pleaded "not guilty") The Commission did not suggest, however, that Mr. Foley had personally benefited in any way from his actions.

Mr Foley, who stated that he would retain his parliamentary seat, had been relieved of his duties as Minister for Lands at his own request in April last, after the allegations of having solicited a gift of £A1,000 for Labour Party funds had been mentioned before the Royal Commission Subsequently, however, a Brisbane magistrate dismissed a criminal charge in this connexion against Mr Foley, who then resumed his ministerial duties

The Labour Party has held office in Queensland uninterruptedly since 1932 —(Australian News and Information Bureau - Office of the Agent-General for Queensland, London)

(Prev. rep. Queensland Elections, 13160 A.)

C. UNITED KINGDOM. — Relaxation of Crown Privileges in Lawsuits. - Changes in Court Procedure.

Important relaxations of the rules under which Crown privilege had prevented the production of documents in the courts were announced by Viscount Kilmuir, the Lord Chancellor, on June 6. Lord Kilmuir said that in future privilege would not be claimed for (1) reports concerning road and other accidents involving Government employees and premises; (2) medical records and reports kept by Government departments concerning their employees; (3) reports by Government doctors in cases where the Crown was being sued for negligence; and (4) medical reports relevant to the defence in criminal cases.

Lord Kilmuir pointed out that the law in England had enabled Crown privilege to be claimed for documents and oral evidence on two alternative grounds. (1) that disclosure of the contents of a document would injure the public interest, e g by endangering security or diplomatic relations, or (2) that it should be withheld in the interest of the proper functioning of the public service The claiming of privilege for the second category, however, had been widely criticized on the ground that the administration of justice was itself a matter of public interest A large part of Crown litigation consisted of actions arising out of road or other accidents involving Government employees or Government premises, and in these cases the most relevant documents were reports by employees and eye-witnesses, and reports by foremen and other officials about the machinery, premises, or vehicles involved "In our opinion," Lord Kilmuir added, "Crown privilege ought not to be claimed for these documents, and we do not propose to do so in future. We believe that our proposals will eliminate many of the grounds of complaint that have arisen in the past."

With regard, however, to departmental minutes and memoranda—"the documents by which the administrative machine thinks and works"—Lord Kilmuir said that the Government considered that Crown privilege must still be maintained

Lord Kilmuir pointed out that the changes would affect the majority of suits against the Crown coming before the civil courts. He explained that they would not require parliamentary legislation and would come into immediate effect.

(Times - Daily Telegraph)

A. UNITED KINGDOM. — Deportation of Greek Orthodox Priest. - Statement by Home Secretary.

A Greek Orthodox priest in London—Fr. Kallinikos Macheriotis, Archimandrite of All Saints' Greek Orthodox Church, Camden Town—was deported from Britain on June 12. In a statement to the House of Commons on the following day, the Home Secretary (Major Lloyd-George) stated that Fr. Macheriotis—a Cypriot by birth and a Greek citizen by naturalization—had been deported because his church had been used as a centre for anti-British propaganda. Major Lloyd-George's statement was as follows:

"Mr. Macheriotis was born in Cyprus in 1908 and was therefore at one time a British subject. He lived in Greece between 1936 and 1951 and acquired Greek nationality in 1948. He returned to Cyprus in 1950, where he held the appointment of Archimandrite of Limassol, and in 1952 was allowed to come to the U.K. to take up an appointment as priest in charge of the Greek Orthodox Church at Camden Town.

"Acting under a power of attorney given by Archbishop Makarios on Jan. 5 [1956] authorizing the establishment of a committee for the collection of funds in England 'for the Cyprus national struggle', Mr. Macheriotis, as chairman of the committee, has taken a leading part in the issue of an appeal for subscriptions directed to the 'patriotism and religious feelings' of the recipients of the appeal.

"Collections for this purpose have been raised from the community attending the church, which has been used under the auspices of Mr. Macheriotis as a centre for the dissemination of anti-British propaganda. Concern has been expressed by loyal Cypriots and Greek nationals living in London at the pressure brought to bear upon them.

"H.M. Government decided that in the circumstances Mr. Macheriotis should be required to leave this country forthwith. The deportation order was executed by police officers who called at Mr. Macheriotis's flat at 8 p.m. on June 11. He was given every facility to pack and to communicate with his friends before being taken to London Airport, where he embarked for Athens shortly after 1.45 a.m. [June 12]."

The deportation of Fr. Macheriotis was criticized by several Labour members, notably by Mr. Kenneth Robinson and Mr. Francis Noel-Baker.

Mr. Robinson asserted that the Home Secretary had failed to justify the deportation, which had "not only further embittered Anglo-Greek relations but deeply affronted a religious minority in Britain, some thousands of whom are my constituents." He asked whether Fr. Macheriotis had been given any warning that his activities were giving offence to the Home Office, whether any formal notice of the deportation had been received by the Greek Embassy, and whether any communication had been made to Archbishop Thyateira, the head of the Greek Orthodox Church in Western Europe.

Major Lloyd-George replied that "rightly or wrongly" he thought it "in the best interests that Mr. Macheriotis should not be allowed to stay longer than necessary to carry on the activities which led to his being asked to leave." He added: "H.M. Government are absolutely determined . . . to see that people in this country, British subjects or otherwise, are allowed to go about their ordinary day-to-day work free from the kind of thing for which Mr. Macheriotis was responsible. Mr. Macheriotis was given permission to come here as a priest, and if he had conducted himself as a priest he would have been here today. It was because he indulged in activities entirely outside his functions that he had to go, and I think that is perfectly fair. After all, if you come here as a foreigner you are welcome as long as you behave yourself. The fact is that the church was the centre of anti-British propaganda. I think it is intolerable, with what is happening in Cyprus, that people should be using a church to gather money for this purpose."

Captain Waterhouse (C.) declared that the whole country would applaud the Home Secretary's firm action. He asked Major Lloyd-George whether he would consider "the advisability of making it a criminal offence to acquire funds in this country, either by an individual or by an organization, British or foreign, which are being transmitted for the benefit of an organization murdering British soldiers."

Mr. Patrick Wall (C.) said that the Cypriot community in Britain had been subjected to increasing pressure "by highly-paid agents of the Ethnarchy and others." The great majority of this community were loyal citizens who did not want *enosis*, which would deprive them of their British nationality.

Mr. Francis Noel-Baker said that the Home Secretary had made "a number of charges which will shock a lot of people in this House and elsewhere." He asked Major Lloyd-George whether he could produce evidence to show that any of the money collected by Macheriotis had ever left Britain.

Major Lloyd-George, in reply, said that it had been made perfectly clear that the money had been collected for the "Cyprus national struggle"; whether or not it had been sent abroad he was not prepared to say, but it was clear what was going on in Cyprus.

Angry exchanges occurred in the House of Lords on June 20, when the deportation of Fr. Macheriotis was strongly criticized by the Bishop of Chichester (Dr. Bell) and by Viscount Stansgate, a Labour peer.

Dr. Bell asked whether H.M. Government had complained to Fr. Macheriotis' ecclesiastical superiors, whether it had any evidence that the funds collected had been used for any purpose other than the support of families of detainees in Cyprus, and whether the collection of funds for such a purpose was improper.

Lord Mancroft (Under-Secretary, Home Office) replied that no communication had been sent to Macheriotis' superiors, nor would it have been appropriate for such representations to be made. "In this country," he declared, "a foreigner who does not possess diplomatic immunity or status must be held personally responsible for his conduct. A foreigner cannot expect to be allowed to indulge in activities hostile to this country and to abuse the hospitality extended to him."

Dr. Bell maintained that the question was not one of Holy Orders, but of the particular clergyman's responsibility to the authorities of the Greek Orthodox Church. He regretted that some mode of representation had not been made by H.M. Government.

Earl Howe interjected. "Is this not a fund for the dependants of those who shot our soldiers in the back?. Only the intercession of the Almighty prevented them [the terrorists] from 'doing in' an aeroplane with 68 Servicemen, women, and children on board. I am surprised that the right reverend prelate can ask such a question, which must be of great comfort to our enemies."

Viscount Stansgate asked whether it was not a fact that funds of this kind could be legally raised in Cyprus. **Lord Mancroft** replied that collections for the terrorists would be illegal under the emergency laws, though collections for the dependants of detainees would probably not be illegal—a matter, however, which was not beyond legal argument. **Viscount Stansgate** maintained that the funds had been raised solely for people subjected to fines and curfews, and that there was no proof that they were intended for the terrorists killing British soldiers. In reply, **Lord Mancroft** quoted the authority given to Fr. Macheriotis by Archbishop Makarios · 'to form a committee in order to carry out collections in England for the Cyprus national struggle.' "I should have thought that was final," Lord Mancroft added. **Viscount Stansgate's** comment that he could "see no harm in those words," and a further remark in which he described the Home Office as "an office not notable in the past for obeying the law," gave rise to heated exchanges in which **Lord Munster** (Minister without portfolio) described Lord Stansgate's comments as "disgraceful."

Lord Home (Secretary of State for Commonwealth Relations), replying to the debate, said that Macheriotis had been exercising pressure over his parishioners—some of whom had complained against his activities—"under the cover of the most respected profession in our country and as a foreigner enjoying our hospitality." He did not think that the deportation of Fr. Macheriotis to his own country was an unjust punishment.

Photostatic copies and translations of the documents concerning the activities of Macheriotis were placed in the libraries of the House of Lords and the House of Commons. They consisted of the authorization sent by Archbishop Makarios to Macheriotis to collect funds in Britain for the "Cyprus national struggle," and of circulars by Macheriotis and his "committee" soliciting donations from Cypriots in London for this purpose.

(Times - Daily Telegraph - Manchester Guardian)

B. LITERATURE. — Book Selections for June.

Selected books published in Great Britain, the United States, France, and Italy are given below:

Great Britain. Beaty, David—"The Proving Flight." (Secker and Warburg, 14s.).

Burn, Michael—"Mr. Lyward's Answer." The Problems of Maladjusted Children and Adolescents. (Hamish Hamilton, 21s.).

Charques, Richard—"A Short History of Russia." (Phoenix House, 18s.).

Crawley, Aidan—"Escape from Germany: A History of R.A.F. Escapes during the War." (Collins, 16s.).

Lord, Walter—"A Night to Remember." The Loss of the *Titanic*. (Longmans, 16s.).

Mendès-France, Pierre—"The Pursuit of Freedom." Translated from the French. (Longmans, 18s.).

O'Connor, Edwin—"The Last Hurrah." (Max Reinhardt, 18s.). Atlantic Prize Novel.

Smith, J. L. B.—"Old Fourlegs: The Story of the Coelacanth." (Longmans, 21s.).

Wilson, Colin—"The Outsider: An Enquiry into . . . the Sickness of Mankind in Mid-twentieth Century." (Victor Gollancz, 21s.).

Wingfield-Stratford, Esmé—"The Squire and his Relations." (Cassell, 42s.).

United States. Havighurst, Walter—"Wilderness for Sale: The Story of the First Western Land Rush." (Hastings House, New York, $4.50).

Hersey, John—"A Single Pebble." The Story of an American Engineer's Voyage by Junk into the Interior of China. (Alfred A. Knopf, New York, $3.00).

Smith, Walter Bedell—"Eisenhower's Six Great Decisions: Europe 1944-45." (Longmans, Green & Co., New York, $3.95).

France. Picard, Raymond—"La carrière de Jean Racine." (Gallimard, Paris).

Italy. Renzulli, Michele—"John Keats: L'uomo e il poeta." (Francesco Giordano, Rome, 2,200 lire).

(Ed. K.C.A.) **(Prev. rep. Book Selections, 14922 B.)**

A. SOVIET UNION - ARAB STATES.—M. Shepilov's Visits to Egypt, Syria, and Lebanon. - Crown Prince of Yemen's Visit to Soviet Union.

M. Shepilov, the new Soviet Foreign Minister, had discussions with Colonel Nasser and other leaders of the Egyptian Government during his visit to Cairo in connexion with the national celebrations in Egypt (see 14953 A). Before returning to the U.S.S.R. he also visited Damascus and Beirut for talks with the Syrian and Lebanese Governments.

Cairo Discussions. At the end of his five-day visit to Cairo (June 17-22) a communique was issued stating that M. Shepilov and Colonel Nasser had "exchanged opinions on questions involving Egyptian-Soviet relations and a number of important international problems of interest to both countries." After saying that there had been "complete unity of views," the communiqué declared (i) that "the development of Soviet-Egyptian relations in all fields of political, economic, and cultural co-operation corresponds to the interests of both countries and is a considerable contribution to the strengthening of peace and security", (ii) that relations between Egypt and the U.S.S.R. were "based on the principles of the U.N. Charter and the principles approved at the Bandung Conference", and (iii) that both countries would continue to co-operate "in the interests of strengthening universal peace." M. Shepilov announced before leaving Cairo that Colonel Nasser would visit Moscow in August.

In a speech at a village near Cairo, delivered on June 18, M. Shepilov declared that the U.S.S.R. did not intend "to promote agitation by the peoples of Arab countries towards any of the Western Powers", that the Soviet Government would, on the contrary, do its best "to achieve a relaxation of tension in this part of the world", and that the Arab countries could rely on the U.S.S.R. "as their unselfish, faithful, and reliable friend." He added that the Soviet Union was "opposed to colonialism in any of its forms and manifestations, whether it be the aggressive Baghdad Pact or such forms of colonialism which still exist in Western Irian [Dutch New Guinea] or Goa."

It was stated by foreign press correspondents in Cairo, though without official substantiation, that M. Shepilov had conveyed to Colonel Nasser the Soviet Government's willingness to give extended technical and economic aid to Egypt, and, in particular, to supplement its earlier offer of a £400,000,000 loan for building the High Dam at Aswan. Egypt is still engaged in detailed negotiations with the U.S. and British Governments, and also with the International Bank, over Western offers of aid in building the Aswan Dam.

Damascus Discussions. During his visit to Damascus (June 23-24) M. Shepilov exchanged views with President Kuwatly and the Syrian Prime Minister, M. Assali. A joint communiqué said that the two countries had decided to expand their economic co-operation and to conclude trade and cultural agreements. Before leaving Damascus for Beirut, M. Shepilov announced that President Kuwatly had accepted an invitation to visit the Soviet Union.

Beirut Discussions. At the end of M. Shepilov's visit to the Lebanon (June 25-27), where he had discussions with President Chamoun and Government leaders, it was announced that the two countries had agreed to develop economic and cultural co-operation, and to raise the status of their envoys in each other's capitals. It was also stated that President Chamoun would visit Moscow at a date to be arranged.

None of the communiqués issued in Cairo, Damascus, and Beirut made any mention of the Algerian situation or of the tension between Israel and the Arab States.

The Crown Prince of the Yemen (Emir Seif el-Islam Mohamed el-Badr), who is also the Yemeni Foreign Minister, paid an official visit to the Soviet Union from June 11-25. A communiqué issued on the latter date said (i) that agreement had been reached on the sale of Yemeni coffee to the U.S.S.R. and on "the sale of a number of commodities" by the U.S.S.R. to Yemen; (ii) that the Soviet Ambassador in Cairo would be concurrently accredited to the Yemen with the rank of Minister; and (iii) that the Yemeni Minister in Cairo would similarly be accredited to the U.S.S.R. on a concurrent basis. The communiqué (which was signed by Marshal Bulganin and the Crown Prince) added that views had been exchanged "on questions concerning Soviet-Yemeni relations and on international questions of interest to both sides, especially issues concerning the Arab countries and recent events in the Near and Middle East." (Times - Le Monde - New York Times)
(Prev. rep. Soviet-Yemeni Relations, 14779 E; 14522 C.)

B. SYRIA. — Recognition of Communist China.

The Syrian Government's decision to recognize the People's Republic of China was announced in Damascus on July 8 by the Prime Minister, M. Sabry Assali.—(Le Monde, Paris)
(Prev. rep. 14884 C.)

C. LAOS. — Recognition by Soviet Union.

It was announced on July 2 that the Soviet Government had decided to recognize the Laotian Government and to exchange diplomatic representatives.—(Le Monde, Paris)
(Prev. rep. 14875 C.)

D. GUATEMALA. — Proclamation of State of Emergency. - Suspension of Constitutional Guarantees.

The Guatemalan Government proclaimed a state of emergency on June 24, and suspended a number of constitutional guarantees, after announcing the discovery of Communist plans "to spread panic and disorder in the country and thus prepare a propitious atmosphere for the development of subversive intentions." It was alleged, *inter alia*, that the Communists had plotted to murder their political enemies in such a manner that blame would fall on the Government, that they had planned to cause panic in public places by false alarms of fire, and that they had infiltrated into student organizations. Among the constitutional guarantees suspended were those of *habeas corpus*, freedom of speech, the Press, and public assembly, freedom to enter and leave the country, freedom to form political parties, the inviolability of personal correspondence, and the right of arrested persons to be released if no charges had been preferred against them within 48 hours of their arrest.

Fighting broke out in Guatemala City a few hours after the suspension of constitutional guarantees. Although press censorship had been imposed, reports from foreign correspondents stated that demonstrations by some 400 workers and university students had been broken up by police and troops and that a number of persons had been arrested. It was reported that those arrested included the president of the Law Students' Association (an organization which, the Government alleged, had been subjected to Communist infiltration) and the editor of the Opposition daily paper, *Hoy*.

The new Constitution (see 14660 A) had officially come into force on March 1, on which date the new Guatemalan Congress met for the first time. In a speech to the Congress, President Castillo Armas declared that the Government's principal objective was "to prevent the resurgence in our country of despotism, under whatever name it presents itself." He referred to "economic obstacles attributable to the financial chaos in which the country lived during the communistic oligarchy," and declared that the Government would continue to press for the "return" of British Honduras to Guatemala.

A number of Government changes had been announced in January last, involving the appointment of new Ministers of Foreign Affairs (Sr. Ricardo Quiñonez Lemus, formerly Secretary-General to the Presidency) and Defence (Colonel Juan Francisco Oliva).

An electoral law was issued on April 21 making voting secret, compulsory for men and women over 18 who could read or write, and optional for illiterates. It laid down that only legally registered parties could nominate candidates for presidential and congressional elections, and that a party must have at least 5,000 members before it could be registered and recognized.—(New York Times - New York Herald Tribune - Bank of London and South America, Fortnightly Review)
(Prev. rep. Guatemala, 14660 A.)

E. UNITED KINGDOM. — Agricultural Production.

The following statistics of British agricultural production are reproduced from a Special Supplement on Agriculture published by *The Times* on July 3:

Net Output (Agricultural Holdings)		Pre-war average	1946/47	1952/53	1955/56 (Forecast)
		100	119	151	154
Acreage ('000 acres as at June)					
Bread grains		1,872	2,117	2,086	1,967
Coarse grains		3,429	6,236	6,001	5,340
Potatoes		723	1,423	990	874
Sugar Beet		335	436	408	424
All tillage		8,907	13,300	12,261	11,301
Temporary grass		4,150	5,679	5,737	6,138
Arable		13,088	18,980	18,104	17,542
Permanent grass		18,750	12,030	13,059	13,532
Rough grazings		16,476	17,263	17,046	16,878
Crop Production ('000 tons)					
Bread grains		1,661	2,006	2,357	2,618
Coarse grains		2,781	5,216	5,936	6,155
Total cereals		4,442	7,222	8,293	8,773
Potatoes		4,873	10,166	7,848	6,278
Sugar beet		2,741	4,522	4,236	4,556
Livestock Products					
Milk	'000,000 gals.	1,563	1,665	2,053	2,218
Eggs (†)	'000 tons	385	322	494	613
Beef and Veal	,,	578	537	583	677
Mutton and lamb	,,	195	141	172	194
Pig meat (†)	,,	435	211	589	657
Wool	,,	34	27	31	30

(†) Includes estimated production from gardens, pig clubs, and other small producers.

(Times Agricultural Supplement) **(Prev. rep. 14831 A.)**

A. ICELAND. — General Elections.

The general elections held in Iceland on June 24 resulted as follows, comparison being shown with the last (1953) elections :

	Seats		Votes	
	New House	Old House	1956	1953*
Independence Party	19	21	35,028	28,738
Progressive Party	17	16	12,925	16,959
Social Democrats	8	6	15,143	12,093
People's Front (Communists)	8	7	15,860	12,422
National Defence Party	—	2	3,693	4,667

* Revised figures.

The central issue of the elections was the question whether or not the U.S.A. should be allowed to maintain a base or bases on Icelandic territory—a question which had led to the breakdown of the coalition between the Independence (conservative) and Progressive (liberal) parties, the resignation of the Prime Minister, Hr. Olafur Thors, and the adoption by the *Althing* of a Progressive and Social Democratic resolution calling for a revision of the U.S.-Icelandic agreement of 1951. [These developments are described in 14804 A.] On June 11 the Icelandic Foreign Minister (Dr. Gudmundsson) had formally notified the U.S. Ambassador in Reykjavik (Mr. John Muccio) of the *Althing's* resolution and of the Government's intention to seek a revision of the 1951 agreement. The U.S. State Department had previously (May 17) announced that negotiations on the Keflavik air base, near Reykjavik, had been suspended because of uncertainty about the future use of the base.

Of the five political parties, only the Independence Party opposed the demand for a revision of the 1951 agreement, maintaining that the existence of a NATO base on Icelandic territory was essential to the country's defence. The Progressives and Social Democrats wished to terminate the agreement because they regarded the present international situation as more favourable than in 1951, they proposed, however, that the Keflavik base should be maintained in a state of readiness under NATO supervision, with Icelandic personnel replacing American personnel. The Communists and the small right-wing National Defence Party demanded the abolition of military bases, on the ground that they were more likely to place Iceland in danger than to avert it.

The election results therefore constituted a setback for the "pro-base" Independence Party, which lost two seats although increasing its vote by over 6,000 and remaining the largest single party. The Progressive and Social Democratic alliance emerged as the strongest political group in the new *Althing*, though without an overall majority. As shown above, the Progressives gained one seat and the Social Democrats two seats, the Social Democratic vote rising by over 3,000 but the Progressive vote falling by nearly 4,000. The Communists gained one seat and polled over 3,500 more votes than in 1953. The National Defence Party lost their two former seats and are thus unrepresented in the new *Althing*.

Out of the total electorate of about 98,000, the Independence Party polled 42.4 per cent of the votes, followed by the Communists (who contested the elections as a "People's Front" in alliance with the left-wing United Workers' Party), with 19.2 per cent; the Social Democrats, 18.3 per cent; the Progressives, 15.6 per cent; and the National Defence Party, 4.5 per cent. The discrepancy between the percentages obtained by the various parties and the number of candidates actually elected was attributable to the complexity of the Icelandic electoral system—a combination of two forms of proportional representation. In Reykjavik, the capital, the Independence Party polled 16,928 votes, the Communists 8,250 votes, and the Progressives and Social Democrats 6,406 votes between them.

The U.S. Secretary of State (Mr. Dulles), commenting on the Icelandic elections, said that the results could be interpreted neither as a victory for Communism nor for neutralism. He repudiated the idea that the U.S. Government possessed "bases" in Iceland, pointing out that it was merely the "agent of NATO." If Iceland wished to discuss the question of bases, therefore, the issue should be raised with the North Atlantic Council rather than with the U.S. State Department.

Mr. Dulles recalled that Iceland, when becoming a member of NATO, had originally stipulated that no foreign troops should be stationed on her soil, but had revised her attitude as a result of the Korean War and the fear that it might expand into a general conflict. The decision to transform NATO into a "joint military establishment" had also been taken at the same time and for the same reasons. To-day, however, the "degree of fear" had lessened, and he believed there was a tendency in Iceland to revert to the early concept of the North Atlantic Treaty Organization.

Assurances of Iceland's continued membership of NATO were given after the elections by Hr. Olafur Thors, the leader of the Independence Party, and Dr. Gudmundsson, the leader of the Progressive Party. (Berlingske Tidende, Copenhagen) **(Prev. rep. Iceland, 14804 A; 1953 Elections, 13101 B.)**

B. ATOMIC PHYSICS.—Discovery of New Atomic Particle (the Neutrino).

The U.S. Atomic Energy Commission announced on June 21 that the existence of a new atomic particle—the neutrino—had been verified by scientists working at the Los Alamos (New Mexico) laboratories. The discovery was made by Dr. Frederick Reines and Dr. Clyde Cowan, jr.

Dr. Willard Libby, acting chairman of the A.E.C., said that the discovery of the neutrino should help scientists to gain an understanding of the nature of the "glue" or force holding atomic nuclei together—a force which was one of the fundamental properties of matter, and "one of the greatest mysteries facing science today." Although no immediate practical application of the discovery was known, it was nevertheless "of very great importance, since progress in utilizing nuclear energy for human welfare is dependent upon advances in basic knowledge of nuclear forces."

Neutrinos—particles without an electric charge—were described by Dr. Libby as "so penetrating that they will pass through billions of tons of solid matter," a characteristic which posed an extremely difficult scientific problem of detection. He added "Apparently part of the energy from the stars goes into the neutrino state, where it interacts only very slightly with matter. It would be of great importance to learn how much energy in the universe has been 'lost' into the neutrino state, and it is hoped that this can be estimated in experiments following up the work which led to the detection of the neutrino."

The A.E.C.—which described the neutrino as a particle with a "vanishingly small mass"—explained that Dr. Reines and Dr. Cowan had set up equipment at the Savannah River (South Carolina) atomic plant which was designed to catch emissions from one of the large atomic reactors. This equipment, placed deep underground, included a detector "of extraordinary design," similar in principle to the scintillation detector used by uranium prospectors. The scientists had dissolved cadmium salts in a tank containing 100 gallons of water to serve as a "target" for the neutrinos coming from the reactor, and this "target" was watched by the scintillation system—containing more than 1,000 gallons of a sensitive liquid and 330 large "photo-electric eyes" (photo-multiplied tubes). Despite the system's great size, and the billions of neutrinos passing through it each second, only a few neutrino "captures" were observed every hour.

The discovery of the neutrino followed the recent discovery of the anti-proton (negative proton), which had been announced in October last. Its existence, like that of the anti-proton, had been theoretically postulated for many years—e.g. by the Austrian-born scientist, Dr. W. Pauli, as far back as 1921—but it had never hitherto been actually detected. (New York Times) **(Prev. rep. Anti-Proton, 14749 D.)**

C. HISTORICAL RESEARCH. — Discovery of the Lafayette Papers.

It was announced on June 18 that the correspondence, private papers, and library of the Marquis de Lafayette (1757-1834), the French soldier and statesman, had been discovered at the Château de La Grange, his home near Paris.

The papers, which number several thousand, cover the War of American Independence, in which Lafayette fought as a volunteer in Washington's army; the earlier stages of the French Revolution, during which he commanded the National Guard, his imprisonment at Olmütz, in Austria (now Olomouc, in Czechoslovakia) in 1792-97 and his subsequent exile at Hamburg (1797-1800), the Napoleonic period, the restored Bourbon monarchy, his visit to the U.S.A. in 1824; and the Revolution of 1830, in which he played a prominent part.

The documents were discovered by the Comte de Chambrun, a great-great-grandson of Lafayette, who acquired La Grange in October 1955, and who stated on June 18 that it was hoped to open the chateau to the public in 1957—the bicentenary of Lafayette's birth. The classification of the papers, which has been entrusted to a professional archivist chosen by the *Ecole des Chartes*, is expected to take several years. The Comte de Chambrun holds both French and U.S. citizenship under a law passed by the General Assembly of Maryland in 1784, which naturalized Lafayette and his male descendants in perpetuity. (New York Times - Le Monde, Paris)

D. SIAM. — Lifting of Ban on Export of Non-strategic Goods to China and North Korea.

The Siamese Government decided on June 20 to lift the ban on the export of non-strategic goods to the People's Republic of China and to North Korea. The announcement explained (*a*) that as a result of the U.N. resolutions of May 18, 1951, Siam had imposed an embargo on the export of non-strategic goods to China and Korea; (*b*) that, as Siam had sent troops to fight in the Korean War under the U.N. Command, she had also decided to impose an export ban on goods not mentioned in the U.N. list, including rice, timber, industrial tools, agricultural implements, chemicals and pharmaceutical products, cement, fuel oil, rubber, lead, zinc, and other ores; and (*c*) that, in view of the ending of the Korean War, there was no longer any need to continue the ban on goods not mentioned in the U.N. list.—(New York Times) **(14924 D; 11490 A.)**

JULY 7—14, 1956

A. BRITISH COMMONWEALTH. — London Conference of Commonwealth Prime Ministers. - Ceylon to remain in Commonwealth with Republican Status. - Agreement on Transfer of British Bases in Ceylon.

The seventh post-war conference of Commonwealth Prime Ministers was held in London from June 28 to July 6 under the chairmanship of Sir Anthony Eden, the British Prime Minister. It was attended by the Prime Ministers of Canada (Mr. St. Laurent), Australia (Mr. Menzies), New Zealand (Mr. Holland), South Africa (Mr. Strydom), India (Mr. Nehru), Pakistan (Mr. Mohammad Ali), Ceylon (Mr. Bandaranaike), and the Federation of Rhodesia and Nyasaland (Lord Malvern).

The plenary sessions were held at 10, Downing Street, but there were also a number of informal meetings and exchanges of views at Downing Street, Chequers, and Dorneywood. Among Ministers taking part on the British side (in addition to the Prime Minister) were Mr. Selwyn Lloyd (Foreign Secretary), Lord Home (Commonwealth Relations Secretary) and Mr Lennox-Boyd (Colonial Secretary) Commonwealth Ministers taking part in the discussions included Mr Lester Pearson (Canadian Secretary of State for External Affairs), Mr. Eric Louw (South African Minister for External Affairs), and Mr. Krishna Menon (Minister without portfolio in the Government of India).

The Communiqué.

The subjects discussed at the conference were set forth in the final communiqué published on July 6. The text was as follows (cross-headings inserted):

"During the past ten days the Commonwealth Prime Ministers have together reviewed the current state of international affairs Their discussions have again revealed a sense of common purpose in their approach to the major problems of the day. The peoples of the Commonwealth all share the common heritage of parliamentary democracy. They respect aspirations for freedom and self-government, and take pride in what they themselves have done in helping to fulfil those aspirations.

This meeting has been held at a significant stage in the development of international relations. A new element has been introduced by the growing recognition of the devastating power of thermo-nuclear weapons. Other developments of importance have taken place in the world, including changes in the Soviet Union. The common understanding which the Prime Ministers have reached in their review will form a valuable background which will assist each Government in the formulation and pursuit of its national policies.

Disarmament. Despite the high hopes with which the world emerged from the last war, new international tensions developed. These have given rise to increasing fears and suspicion. They have resulted in vast expenditures on armaments and economic distortions which have delayed the full development of the world's natural resources for the common good

The Governments and peoples of the Commonwealth are united in their desire for peace. They seek friendly relations with all the peoples of the world and have no aggressive intent or design. War would bring disaster for many; world war could mean destruction for all. The policies of all Commonwealth countries will at all times be devoted to preserving and consolidating world peace. The Prime Ministers emphasized the importance they attach to the search for a comprehensive disarmament agreement.

Raising of Living Standards. The Commonwealth Governments will strive for a progressive improvement in the standards of life of their own peoples, and will assist in similar efforts in other parts of the world. Since the end of the war, in addition to furthering their own economic development, they have done much to assist the development of other countries through the United Nations and such organizations as the Colombo Plan, the Commission for Technical Co-operation in Africa South of the Sahara, and by other means They will continue in their efforts to secure prosperity as well as peace for all the peoples of the world

Developments in the Soviet Union. The Prime Ministers reviewed the significant developments in the Soviet Union in the context of international relations and world affairs. In this assessment they were helped by the reports made by those Ministers who have recently visited the Soviet Union or have held personal discussions with the new Soviet leaders. The Prime Ministers considered the recent decisions of the Soviet Government to reduce the numbers of their armed forces, their willingness to facilitate increased contacts between the Soviet Union and other countries, and their expressed desire for improved relations with other Governments. They welcomed these developments

Removal of International Tension. A progressive improvement in the relations between the Soviet Union and the other great Powers would help to remove the fear of war and serve the interests of world peace. They [the Prime Ministers] believe, however, that the removal of causes of tension and the creation of mutual confidence and good will are essential if peace is to rest on secure foundations The Governments of the Commonwealth countries will persevere in the search for just and lasting settlements of outstanding international problems Unless such settlements can be reached, resources which might otherwise be used to improve the lot of man will continue to be devoted to armaments; and the fears which impel the peoples of the world to accept the burdens of defence will continue to distract and weaken mankind.

Germany and NATO. The Prime Ministers noted with regret that since their last meeting no progress had been made towards German unity. They were informed of current proposals regarding the political and economic activities of the North Atlantic Alliance and the development of closer economic co-operation in Europe.

The Middle East. The Prime Ministers considered the situation in the Middle East. They reaffirmed their interest in the peace and stability of this area; welcomed the efforts of the U.N Secretary-General to ensure observance of the terms of the armistice agreements between Israel and the neighbouring Arab States, and agreed that all practicable steps should be urgently taken to consolidate the progress thus made and to seek a lasting settlement of this dispute.

Cyprus. The Prime Ministers were informed of the situation in Cyprus, and welcomed the unceasing efforts of the U.K. Government to find a solution acceptable to all concerned.

The Far East and South-East Asia. The Prime Ministers reviewed the situation in the Far East and South-East Asia. They noted the part which was being played by certain Commonwealth Governments in seeking to maintain peace in Indo-China They looked forward to a continuing relaxation of tension in the Formosa area, and expressed the hope that unremitting efforts would be made to this end. Peaceful settlements of the problems in this area are imperative for stability in the Far East and for removing the dangers of conflict which would frustrate the hopes of peace The Prime Ministers heard with interest a report from the Prime Minister of New Zealand on his recent visit to Japan They were informed of the progress of constitutional advance in Malaya, and of the negotiations on constitutional development in Singapore

The United Nations. The Prime Ministers noted with satisfaction that Ceylon and certain other countries had recently been admitted to the United Nations They recognized the important part which members of the Commonwealth had played in securing this extension of the Organization They expressed the hope that its membership could be broadened still further so that it might command a wider allegiance throughout the world

Commonwealth Economic Co-operation. The Prime Ministers agreed that it was of the first importance for their countries to maintain and increase their economic strength. Each country, through sound internal economic policies and steady development of its resources and earning power, could help to strengthen the Commonwealth and the sterling area, and move steadily towards the agreed objective of the widest practicable system of trade and payments.

The Prime Ministers noted with satisfaction the United Kingdom's determination to maintain and improve its capacity to serve as a source of capital for development in Commonwealth countries. They received reports on the development programmes of certain members of the Commonwealth

Peaceful Uses of Atomic Energy. The Prime Ministers exchanged views on the development of nuclear energy for peaceful purposes They agreed that the civil use of nuclear energy constituted a valuable new sphere of co-operation within the Commonwealth, as well as with other countries, and noted with satisfaction the progress already made in this field The Commonwealth countries are already a major source of world supplies of uranium and thorium, and their resources in these materials are increasing. In most of these countries research organizations have been established to develop the use of nuclear energy as a source of power

Republican Constitution for Ceylon. - Continued Ceylonese Membership of Commonwealth. During the course of the meeting the Prime Minister of Ceylon stated that, in accordance with their declared policy, the Ceylon Government proposed to introduce in due course a Republican Constitution for Ceylon. He also stated that it was their intention that Ceylon should continue to be a member of the Commonwealth The other Prime Ministers took note of this statement, and expressed their agreement to Ceylon's remaining as a member of the Commonwealth

Position of Rhodesia-Nyasaland Federation. The Prime Ministers considered the particular position of the Federation of Rhodesia and Nyasaland in relation to meetings of Commonwealth Prime Ministers. Taking into account the 20 years' attendance, first by the Prime Minister of Southern Rhodesia, and now by the Prime Minister of the Federation of Rhodesia and Nyasaland, they agreed that they would welcome the continued participation of the Prime Minister of the Federation of Rhodesia and Nyasaland in meetings of Commonwealth Prime Ministers

Informal Discussions. Apart from the consideration of matters which are of common interest to all Commonwealth countries, these meetings also afford opportunities for discussions outside the formal sessions. Advantage has been taken of these opportunities on this occasion. The continuing exchange of views on matters of common concern is an important element in the relationship between the member countries of the Commonwealth. It is of the utmost value that this should be supplemented at intervals by personal contacts between the political leaders of the Commonwealth countries, and in a rapidly changing world the need for these direct consultations has assumed a new importance."

Ceylon to take over Trincomalee and Katunayake Bases. - Continued Facilities for Britain. - U.K. Aid in training Ceylonese Forces.

Simultaneously with the publication of the general communiqué, the following statement was issued on the future of the British naval and air bases in Ceylon:

" The Government of Ceylon expressed their desire to take over the naval base at Trincomalee and the R A.F. station at Katunayake. The U.K. Government, recognizing the right of the Government of Ceylon to do so under the defence agreement of 1947, have expressed willingness to agree to suitable arrangements for this purpose.

" The Prime Minister of Ceylon and the U.K. Government have had discussions in London about these arrangements. The discussions have been concerned with (*a*) the declared intention of the Ceylon Government to make available to the U K Government at their request certain facilities enjoyed at present in Ceylon for communications, movements, and storage , (*b*) the declared intention of the U K. Government to provide assistance to the Ceylon Government at their request for the expansion, development, and training of the Ceylon armed forces.

" Representatives of the two Governments will meet at an early date in London and later in Colombo to make the necessary arrangements in regard to these matters "

The intention of the new Ceylonese Government to take over the British bases had been expressed by Mr. Bandaranaike after the recent general elections in Ceylon (see 14849 A). In a speech in London on July 5 to the Commonwealth Correspondents' Association, Mr. Bandaranaike defended his Government's decision to take over the bases, and at the same time stressed Ceylon's intention of remaining in the Commonwealth after the adoption of a Republican Constitution.

On the question of the bases, Mr. Bandaranaike said that it was entirely a question for Ceylon to decide whether or not foreign bases should be maintained in her territory. " We have expressed not merely the wish but the intention and determination that the bases shall cease," he declared, " but we wish to do it in a friendly way." Ceylon would discuss with Britain the method of British withdrawal from the bases " without causing dislocation, inconvenience, or embarrassment," and at the same time would hold discussions on " certain facilities which the British Government might have in our country." In reply to a question, he said that Ceylon desired the assistance of the Royal Navy in building up her defences

Mr. Bandaranaike emphasized that Ceylon's intention to adopt a Republican Constitution was in no sense the result of dislike of or hostility towards Britain or the Queen. It was simply that a republican form of government was considered more suitable for Ceylon and Ceylonese conditions. Having regained her freedom, Ceylon was " feeling her way forward . . in order that she may discover for herself that form of society best suited to her needs."

With regard to Ceylon's policy of neutralism, Mr. Bandaranaike said that it was neither a sign of cowardice nor of a desire to make " the best of both worlds," but " something positive in itself." Ceylon desired peace and friendship with all countries, and, if possible, would try to provde a " bridge " between two radically opposed points of view There were countries—of whom Ceylon was one—that did not wish to align themselves with power blocs which, in the name of defence, found themselves " compelled to create a Frankenstein " which they might eventually be incapable of controlling " I do not say we should not protect ourselves," he added. " We must be alert, we must keep our eyes open, but we must not talk in terms of hatred of some particular country or ideology, or of those who may belong to some other race "

In conclusion, Mr Bandaranaike said that the essential value of the Commonwealth lay in the members' common way of life—democratic parliamentary government, an independent judiciary, the rule of law. and efficient and impartial administration The role of the Commonwealth today should be that of a " third force " in international affairs, and he believed that Britain, with her long tradition of service to the world, was particularly qualified to take the lead in such a development

In a subsequent press statement on July 7, Mr. Bandaranaike said that the Ceylonese Government would allow the Royal Navy and the R.A.F. to use stocks of petrol and ammunition now stored at the Trincomalee and Katunayake bases. Moreover, Britain would be allowed to maintain radio communications throughout Ceylon.

Trincomalee is the headquarters of the Royal Navy's East Indies Squadron, at present consisting of the 9,000-ton cruiser H M S *Superb* and three frigates. It is chiefly a refuelling base and not a dockyard, though minor repairs to warships can be carried out there. It also has a radio station and naval stores, together with recreational facilities for men serving on the East Indies Station. The labour force—about 6,000—is recruited entirely from the Ceylonese population.

Meeting between Mr. Nehru and Mr. Mohammad Ali. - Statements on Indian and Pakistani Policy.

Mr. Nehru and Mr. Mohammad Ali had a private meeting on July 5 during the Commonwealth conference. It was stated that there had been a " cordial and frank " exchange of views on matters of Indo-Pakistani interest—including, it was understood, the Kashmir question, problems connected with the property of evacuees from both sides, and the canal waters dispute (i.e. the sharing of irrigation rights in the Indus River basin).

Mr. Mohammad Ali, in an address on June 25 to the Foreign Press Association at the Dorchester Hotel, gave a lengthy review of Pakistan's policy from which the following extracts are taken :

" . . Although Pakistan has become a Republic, it has decided to remain a members of the Commonwealth—a free and voluntary association of independent nations, who, despite their differing political systems and economic interests, continue to work in free, frank and friendly co-operation with each other in a manner that may well serve as a model to a world torn by tension and mistrust In this great mansion of peace there is equal room for everyone—for a Monarchy, for Dominions as well as Republics, for peoples of diverse races, colours and creeds. No-one would claim that it is a perfect organization. But equally, no-one would lightly abandon it, and it would be a mistake to underrate it as a factor in promoting international co-operation in the interest of world peace and human welfare."

After declaring that Pakistan was " passionately dedicated to the cause of peace," Mr. Mohammad Ali continued . " We believe that peace can be maintained only through a dynamic, positive, and constructive approach It cannot be defended through a negative, passive, or neutralist attitude It can be preserved only by strengthening the forces of collective security. For the smaller countries particularly, whether in Asia or elsewhere, there is no other way to ensure independent survival. And since peace can be broken at any point . . it follows that world peace can be assured only if the smaller nations are protected against armed attack or internal subversion by an effective system of regional security.

" It is because of this conviction . . . that we have joined a number of defensive alliances. We have signed a mutual defence assistance agreement with the U S.A. ; we have entered into a friendly co-operation agreement with Turkey , we are a party to SEATO , we have joined the Baghdad Pact. Those who think we have joined SEATO and the Baghdad Pact with an aggressive design do us a grievous injury Geographically situated as West and East Pakistan are, we could not remain unconcerned with developments in the Middle East or South-East Asia. With the stability and welfare of these regions are inevitably bound up our own stability and welfare The sole object of the Baghdad and SEATO alliances is to defend the peace and promote the well-being of these regions. There is no other object. Certainly there is no question of any of the signatories of these pacts being a party to aggression against any country whatsoever . .

" There is an area at our very doorstep, however, which is a source of international conflict and tension I refer to Kashmir . . In 1949 it was agreed between India, Pakistan, and the United Nations that the question of the accession of Kashmir to India or Pakistan would be decided in accordance with the wishes of the people of the State as voluntarily expressed in a free and impartial plebiscite Numerous efforts have been made to obtain Indian agreement to hold such a plebiscite, but so far without avail . . The destinies of Kashmir and Pakistan are inextricably linked. Nevertheless we do not claim that Kashmir must come to Pakistan. All we say is this · Let the people of Kashmir be given an opportunity to decide their own fate by means of a free vote. India is bound under an international agreement to allow this. Let that solemn undertaking be carried out . .

" It has been said that American military aid to Pakistan constitutes a threat to India Such a suggestion is palpably absurd. The disparity between Indian and Pakistani human and material resources is so great that, even after military assistance from the U S A , there can be no question of any threat of aggression from Pakistan to India . "

In a brief press statement on July 6, Mr. Nehru said that India's policy of neutralism meant solely that India followed an independent policy and judged every question on its merits. He did not believe that the world could be divided into good and evil, since no country was totally good and no country totally evil ; alignment meant regimentation, and he objected equally to both Communist and non-Communist regimentation of peoples and countries.

Mr. Strydom's Defence of Apartheid Policy.

A defence of the South African Government's racial policy, and an assurance that South Africa would continue to co-operate with the Commonwealth whatever her future form of government might be, were made by Mr. Strydom on June 25 at a dinner of the South Africa Club, held at the Savoy Hotel.

Mr. Strydom said that at least 90 per cent of the White population of South Africa, and, he believed, of the Rhodesias, were determined at all costs to ensure the continuance of the White race in Southern Africa If the Whites in South Africa, already far outnumbered by the non-Whites, allowed control to pass out of their hands, they would be doomed either to leave the country or to be absorbed in the non-White majority. " We in South Africa," he declared, " have been settled there for more than 300 years. We are no longer Hollanders or Britons we are South Africans. We cannot return to Holland or Britain We and our descendants must remain in South Africa—either to live and survive, or lose our identity. We are determined, come what may, to remain and survive. In this unflinching determination the Afrikaans-speaking and English-speaking citizens of South Africa stand shoulder to shoulder. . ."

After declaring that people in the U.K. and elsewhere had been given "a false and distorted picture of South Africa and of our colour policy," Mr. Strydom continued: "For 300 years we have not only protected the black man and brought him security, in contrast with the policy of extermination practised in certain other parts of the world, but in addition we have developed South Africa, relatively speaking, into one of the richest countries in the world, in which the Native also shares . . . For priests and scribes, in face of these hard facts—under the cloak of religion—to accuse us of harsh and un-Christian treatment of the black man, is such a travesty of the truth that it borders on the blasphemous . . ."

Mr Strydom went on to speak of "another prevailing misconception"—namely, that South Africa was drifting into a policy of isolation towards the rest of the world and towards the Commonwealth in particular. After describing this allegation as "a complete travesty of the truth," he continued

"This charge is probably based on the fact that it is the policy of the present Government ultimately to establish a republican form of government in South Africa when a sufficiently large majority of the European voters shall have expressed themselves in favour of such a step. Let me give you the emphatic assurance that this change in the form of our government will in no way whatsoever affect our policy of co-operation with the United Kingdom, other Commonwealth countries, and all countries and peoples who, like us, subscribe to the Western and democratic way of life

"On the contrary, under a republican form of government the majority of our people—viz, the Afrikaans-speaking section—would be infinitely more willing to co-operate with Britain and other Commonwealth countries in all matters of common concern, especially in respect of a common defence policy for Africa, than they would be under present circumstances Looked at from this angle alone, a republic in South Africa would be in the interest of all concerned, and would strengthen the ties of friendship between our respective countries. We are, moreover, convinced that under such a form of government we shall much sooner succeed in welding the two European sections in our country into one united people, with the retention by each section of its own language and culture, fully guaranteed by the State.

"The absurdity of a charge of isolation should be self-evident . . Quite apart from our common defence interests, our economic and financial interests are so interwoven, and have made us so interdependent upon each other, that instead of drifting into isolation it is of the utmost importance that our trade and other economic relations should, in our common interest, expand and be strengthened wherever possible"

U.K.-South African Discussions on Protectorates.

The following statement was issued on July 4 by the Commonwealth Relations Office and South Africa House: "During their visit to London, Mr. Strydom and Mr. Louw reiterated South Africa's desire for the transfer of the Protectorates [i.e. the High Commission Territories of Basutoland, Bechuanaland, and Swaziland.] The U.K. Ministers restated the position of the British Government, and agreement was not reached."

The British position on this matter was last stated by Sir Winston Churchill in the House of Commons in April 1954. Sir Winston (then Prime Minister) said that the British Government was pledged not to transfer the Protectorates to South African sovereignty until the inhabitants of the territories had been consulted and until the U K Parliament had expressed its views [see 13603 A]

Australian Desire for Revision of Ottawa Agreement.

During the Commonwealth conference, Sir Anthony Eden and Mr. Thorneycroft (President of the Board of Trade) met Mr. Menzies and Mr. McEwen (Australian Minister for Trade) for a preliminary exchange of views on the Australian desire for a new trade arrangement with the United Kingdom to replace the Ottawa Agreement of 1932. The Australian Government's wish for such new arrangements had been announced beforehand by Mr. Menzies, who issued the following statement in Canberra on May 24 before his departure for London:

"The Australian Government has informed the U.K. Government of its wish that trade discussions should take place during my forthcoming visit to London We desire that the talks should cover the whole field of our trade relationship and should not be confined to matters relating to the Ottawa Agreement.

"The object of the the talks will be to reach agreement with the U.K on a set of principles These principles would provide a framework for a new trade agreement, but it would be the task of officials, in subsequent negotiations, to translate them into a new and comprehensive agreement to replace Ottawa The negotiations between officials may need to extend over several months .

"The [Australian] Government has been influenced by a number of important factors. World trading conditions have changed greatly since the Ottawa Agreement was negotiated in 1932 New problems have arisen for which Ottawa does not provide a solution. We are confronted with particular balance-of-payments problems and, consequently, with import licensing controls . . . It is necessary to reach a wider understanding with the U K which will take account of present-day problems We want to ensure that each party has reasonable access to the market of the other party, and fair opportunities to compete in the market on commercial terms Each country is the chief export market for the other's products, and has much to gain from mutually advantageous preference

"I cannot emphasize too strongly that the Government's wish is to preserve the principle of preference as between the U.K. and Australia. At the same time we must pay attention to the effect of preferential arrangements on Australia's cost structure and trade development These will, we hope, be the most important trade talks which have taken place between the two countries since the negotiation of the Ottawa Agreement itself. The [Australian] Government hopes that they will place trading relationships between the U K. and Australia on a basis which will be of lasting benefit to both countries; and that they will open the way for a growing volume of trade, not only between the U K and Australia, but between both our countries and the rest of the trading world."

New Zealand Attitude to Ottawa Agreement.

The New Zealand Government's attitude towards the Ottawa Agreement had been defined in the following statement issued by Mr. Holland on May 25:

"It is not the present intention of the New Zealand Government to raise the question of a general review of the Ottawa Agreement we have with the United Kingdom, although I have some matters concerning trade which I wish to discuss while I am in London It is true that the pattern of our overseas trade has changed in important aspects since the Ottawa Agreement 24 years ago Our total trade has increased substantially, and we are both buyers and sellers in far wider markets than existed when we entered into the agreement However, the principles of the agreement . . are of such significance that the Government would not contemplate discussions of major changes without prior consultation with all interested parties, such as farmers, manufacturers, and the commercial community

"It should be emphasized that the Ottawa Agreements are bilateral agreements. They were concluded individually between the U.K and Canada, Australia, New Zealand, and South Africa respectively At the time the Agreements were entered into, farm products were in over-supply to the U K., and Commonwealth farmers therefore regarded these agreements as a protective umbrella. The agreements also, from another point of view, preserved the principle of imperial preference, a most important factor in the development of the Commonwealth I shall, while in London, keep closely in touch with developments which may affect our own position, having regard to the facts that the U.K is the main market for our exports and also the main source of our imports"

Mr. Holyoake (acting Prime Minister of New Zealand during Mr. Holland's absence in London) said on June 21 that the unrestricted imports of Argentine meat into Britain would be among the subjects to be discussed by Mr. Holland while he was in Britain. He pointed out in this connexion that "the United Kingdom must continue to be our main market for meat and dairy produce for many years to come."

Mr. Menzies on the Future of the Commonwealth.

The Prime Minister of Australia spoke as follows in an address on June 25 to the Royal Empire Society in London:

"More thinking must be done about the future of our association Nothing could be more foolish than to imagine that our British association has something in it which is inevitably immortal and that we need do nothing about it. There is now a mixed Commonwealth partly Crown, partly Republic We have to ask how we are to continue to tie ourselves together for the important things in the world with this new structure. We do not want to be just a scattered family or group of nations, unattached but friendly If we could only devise ways and means of constant consultation and constant hammering out of ideas, this ancient community of nations might expect in the second half of this century to have a joint moral force which the world sorely needs."

After saying that "an ugly word—colonialism" had often been heard, Mr Menzies declared: "While we must not fall into the error of thinking that all is as it was, we must not fall into the error of thinking that we must apologize for our past, though some people seem to think that we should. I am a Colonial, born in the Colony of Victoria, and I am very proud of the fact The whole movement from colonialism to self-government is not something we should have to explain away, but is the greatest achievement of our race in the last 100 years. Never let us forget that the great new nations of the Commonwealth, whether they remain under the shadow and the glory of the Crown or whether they become Republics. are all established partly on the foundation of their own ancient cultures, but very largely on the foundation of the sovereignty of Parliament, the rule of law, and the administrative quality and care which the British people, above all peoples, have given to the world"

Mr Menzies also resisted the idea that "we should apologize for the word 'empire,'" saying in this connexion: "It is rather clever on the part of some of our opponents in the world that they have made us rather apologetic about the word 'empire' while they have been hard at work building one"

Freedom of London conferred on Mr. Holland and Mr. Nehru.

The Freedom of the City of London was conferred upon the Prime Ministers of India and New Zealand at Guildhall on July 3 by the Lord Mayor of London, Sir Cuthbert Ackroyd. A. ARGENTINA. — Abortive Peronista Revolt. - Execution of Rebel Leaders. - Changes in Argentine Cabinet and Army Command.

A widespread Peronista uprising broke out in Argentina on June 10, but was suppressed by the armed forces within a few hours. The principal centres of the rebellion were La Plata (capital of Buenos Aires province), Santa Rosa (capital of La Pampa province), Avellaneda (a manufacturing town a few miles south-east of Buenos Aires), and the Campo de Mayo military base, near Buenos Aires.

The revolt was led by General Juan José Valle and General Raúl Tanco, both of whom held high military positions under President Perón. In a proclamation from the Santa Rosa radio station, which was seized by the insurgents, they announced their intention of establishing a "government of national recovery" based on Peronista principles, and called for the restoration of the Peronista Constitution of 1949, the restoration to the trade unions of the powers they exercised under the Peronista regime, a political amnesty, and the holding of general elections within 180 days. Generals Valle and Tanco (both of whom had escaped from detention several weeks before the uprising) were called upon by the Government to surrender and face charges of "malfeasance and rebellion."

The uprising occurred at a time when President Aramburu was on a tour of the provinces, and operational command of the armed forces was assumed by the Vice-President, Rear-Admiral Isaac Rojas. Immediately after the outbreak of the revolt Vice-President Rojas issued a decree placing Argentina under martial law, and providing that anyone carrying arms, disobeying the police, or acting in a suspicious manner would be liable to summary trial and execution by courts-martial. At the same time Vice-President Rojas ordered the Army, Navy, and Air Force to suppress the rebellion.

The heaviest fighting occurred at La Plata (35 miles south-east of Buenos Aires), where dissident units of the 7th Infantry Regiment and a number of armed civilians seized strategic points and attacked Government House (centre of the provincial administration), the headquarters of the Second Army Division, and the police station with machine-guns and mortars. The barracks of the 7th Infantry Regiment were bombed and strafed by Government planes, including *Meteor* jets and *Lincoln* bombers, after the population had been warned by radio to evacuate an area within one kilometre's radius of the barracks. After severe street fighting, order was eventually restored by loyal troops and marines rushed to the city. Part of the 7th Infantry Regiment continued to hold out in the barracks until the ammunition magazine was blown up by aerial bombing. Many of the insurgents were captured, including Colonel Oscar Cogorno, who led the uprising in La Plata.

At Santa Rosa (375 miles south-west of Buenos Aires) the radio station was seized by a group of insurgents led by Major Phillipeaux, but the city was surrounded by a loyal cavalry regiment and the insurgents surrendered after the radio station had been bombed by Government aircraft. At Avellaneda, where the uprising was led by Lieut.-Colonel Valentin Irigoyen and Captain Jorge Nogales, order was restored by Government forces after street fighting. An attempted uprising by dissident infantry units at the Campo de Mayo base was suppressed by loyal cavalry troops after several hours' fighting. Buenos Aires itself remained quiet, apart from an attempt by 1,800 armed civilians—quickly suppressed by the armed forces—to seize the arsenal.

Some 40 leaders of the rebellion, including a number of insurgent officers, were executed within 48 hours of the uprising after summary trial and sentence by court-martial. Among those executed were General Valle, Colonel Cogorno, Colonel Irigoyen, Major Phillipeaux, and Captain Nogales. Some 300 rebels were arrested for subsequent trial by court-martial, while about 2,500 Peronistas were rounded up in different parts of the country. Total casualties in the rebellion were given as over 200 killed and wounded.

General Tanco and six other rebel officers took refuge in the home of the Haitian Ambassador (M. Jean Brierre), which is situated in a suburb of Buenos Aires. They were abducted on June 14 by a group of armed men, but were subsequently returned to the custody of the Haitian Embassy—on the personal instructions of President Aramburu—after a strong protest had been lodged by M. Brierre at the violation of the diplomatic immunity of his residence.

The Argentine Government ended the state of martial law on June 13, and at the same time announced that no further executions would take place and that those rebels on whom the death penalty had been imposed but not yet carried out would be reprieved.

President Aramburu, who had returned to Buenos Aires after the uprising, said at a press conference on June 11 that the rebellion had "a Communist head and a nationalist and Peronista body." He stated that the civil head of the rebel movement was Señor Raúl Lagomarsino, formerly Minister of Trade under General Perón; that the military leaders were Generals Valle and Tanco, and that General Bengoa, whom he described as a "traitor," was also implicated. [General Bengoa was Minister of War in the Provisional Government of President Lonardi, and had been subsequently banished to Patagonia—see 14553 A]. President Aramburu added that the Peronista rebels had planned to seize members of the Government and hold them as hostages, to carry out terrorist attacks, to arrest priests, and to seize Government offices, radio stations, and newspapers.

Changes in Argentine Cabinet.

Several changes in the Argentine Government were announced on June 8, the membership of the reconstructed Cabinet being as follows:

Dr. Laureano Landaburu	Interior.
*Dr. Luís Podestá Costa	Foreign Affairs.
Dr. Carlos Adrogue	Education and Justice.
*Dr. Eugenio Blanco	Finance and Treasury.
*Dr. Raúl Migone	Labour and Welfare.
*Dr. Francisco Martinez	Public Health.
*Dr. Alberto Mercier	Agriculture and Livestock.
Señor Rodolfo Martinez	Commerce and Industry.
*Señor Pedro Mendiondo	Public Works.
*General Arturo Ossorio Arana	War.
*Rear-Admiral Teodoro Hartnung	Navy.
*Commodore Julio Cesar Krause	Aviation.
*Captain Sadí Bonnet	Transport and Communications.

*Unchanged.

The Ministers were reduced in number from 17 to 13 by combining several portfolios—those of Education and Justice, Finance and the Treasury, Transport and Communications, and Commerce and Industry. Dr Landaburu, previously Minister of Justice and acting Minister of the Interior, took over the portfolio of the Interior, Dr Adrogue, previously Minister of Education, took over the portfolio of Justice concurrently with that of Education, and Dr Blanco, the Minister of the Treasury, concurrently took over the Finance portfolio from Dr Alizón García, who resigned. The former Ministers of Commerce and Industry (respectively Señor Juan Llamazares and Captain Alvaro Alzogaray) left the Government, the two portfolios being combined in a single Ministry under Señor Rodolfo Martinez (a former Director of the *Banco Central*), who entered the Cabinet for the first time.

Changes in Army High Command.

General Francisco Zerda, commander of the Third Army Division, was appointed C.-in-C. of the Argentine Army on June 5 in succession to General Julio Lagos, while General Guillermo Alonso, commander of the Fourth Division at Córdoba, succeeded General Roberto Dalton as Chief of Army Staff. The Minister of War (General Ossorio Arana) stated that General Lagos had expressed the wish to retire, and that General Dalton would be appointed Ambassador to Peru. (Le Monde, Paris - New York Times - New York Herald Tribune - Times) **(Prev. rep. Argentina, 14871 A.)**

B. UNITED KINGDOM - UNITED STATES.—Missile Range in Caribbean extended to Ascension Island.

An agreement was signed in Washington on June 25 between the British and U.S. Governments under which the Anglo-American guided missile range in the Caribbean was extended to St. Lucia in the Windward Islands and to Ascension Island in the South Atlantic. As a result, the range was increased from 1,000 miles to nearly 5,000 miles—about the distance from New York to Moscow.

Under the Anglo-American agreements signed in 1950 and 1952, the missile range extended in a south-easterly direction from Cape Carnaveral, Florida (the firing point at the Patrick Air Force Base) through the Bahaman archipelago to Grand Turk, in the Turks and Caicos Islands, with tracking points on the islands of Grand Bahama, Eleuthera, San Salvador, Mayaguana, Grand Turk, Puerto Rico, and the Dominican Republic. Its extension to Ascension Island brought the range to a point about midway between the South American and African continents.

The announcement said that the British and U.S. Governments had agreed on the extension after consultation with the territories concerned, and that the project "should add considerably to the usefulness of the range and play a valuable part in the development of guided missiles." Steps would be taken to safeguard fully the interests and safety of the inhabitants, and of shipping and air traffic.

It was stated in the British and U.S. Press that elaborate safety precautions were taken in operating the missile range; e.g. missiles deviating from carefully selected safety areas were automatically destroyed in mid-air by an electronic device so as not to endanger shipping, aircraft, or the inhabitants of the territories concerned. It was also stated in the Press that the space that would be occupied by a warhead was taken up by recording and tracking instruments.—(Times - Daily Telegraph - New York Times) **(Prev. rep. 14735 B.)**

A. ALGERIA. — Security Council rejects Arab-Asian Request for Debate on Algerian Situation. - Mr. Nehru's Five-Point Plan for Peace Settlement in Algeria.

The U.N. Security Council, meeting on June 26, rejected a request by 13 Arab and Asian countries that it should debate the Algerian situation.

The request had been put forward by the eight Arab member-nations of the U.N. (Egypt, Iraq, Jordan, Lebanon, Libya, Saudi Arabia, Syria, and Yemen) and Afghanistan, Indonesia, Pakistan, Persia, and Siam. It was presented on the ground that the situation in Algeria had gravely deteriorated in recent months and had assumed the character of a "full-fledged colonial war," with a consequent threat to peace in North Africa

After hearing statements by Dr. Jalal Abdoh (Persia), the spokesman of the 13 applicant countries, and M. Hervé Alphand (France), the Security Council rejected the request for a debate by seven votes (Australia, Belgium, Cuba, France, Peru, the United Kingdom, and the United States), against two (Persia and the Soviet Union), with Yugoslavia and Nationalist China abstaining.

Dr. Abdoh contended that the Algerian question lay within the competence of the Security Council, and also that it represented a threat to international peace and security Algeria, he said, had been an independent country before the French landed there in 1830, and "when France conquered Algeria the sovereignty which was vested in the Algerian people did not disappear; it merely remained dormant and was able to be reawakened by a national movement like that now taking place." When the Asian and African nations had agreed at the last session of the General Assembly to postpone consideration of the Algerian question, they had 'cherished the hope" that France would take measures in Algeria similar to those in Morocco and Tunisia These hopes, however, had "proved vain," and the situation, far from improving, had deteriorated to a point at which it threatened the maintenance of peace throughout the whole of North Africa

M. Alphand denied that the Algerian question lay within the competence of the U N or constituted a threat to peace, and said that there had been "no change in the position which France has on several occasions taken regarding the competence of the United Nations in respect of the domestic affairs of member States." To violate the principle of non-intervention in affairs of domestic jurisdiction, he declared, "would mean the end of peace and the end of the United Nations also." French sovereignty over Algeria had been exercised for 120 years and had been "implicitly or explicitly recognized by all members of the international community."

In a statement to the Indian House of the People on May 22, Mr. Nehru had expressed "deep concern and regret" at the situation in Algeria and had put forward five suggestions as a possible basis for a negotiated settlement.

Developments in Algeria, Mr Nehru said, had now "reached the dimensions of a large-scale conflict with mounting violence . and with no end of the conflict in sight." This conflict was "part of the great wave of national upsurges that have swept Asia and Africa in the last two generations," and whatever the practical difficulties and complexities involved in the Algerian situation, this basic issue had to be recognized The Indian Government's attitude towards all such movements, as defined in its previous statements and in the Bandung Conference's resolution on French North Africa (see 14181 A), had two essential aspects. "our support for freedom movements, and our adherence to a peaceful approach" In this connexion Mr. Nehru paid tribute to the "wisdom and statesmanship" shown by the French Government in reaching a solution of the problem of Morocco and Tunisia

The special factors and complexities in the Algerian situation, he continued, should not be permitted to bar a settlement, but called for negotiation and accommodation. Although there was increasing recognition in France that the claims of Algerian nationalism had to be met, violent conflict was still raging, and India would therefore "endeavour to assist the forces of constructive settlement by urging fuller recognition of national aspirations and, at the same time, by not encouraging hatred and violence by either side." The Indian Government considered that the first and essential step towards a settlement was the ending of violence, a desire for which had recently been expressed by both sides, and they therefore appealed to all concerned to initiate and respond to any moves to this end. India hoped that the French Government would "pursue in Algeria the path which yielded helpful results in Morocco and Tunisia," and that the Algerian people would respond to such an approach.

"In their earnest desire to help resolve the conflict and promote a negotiated settlement which will bind the parties in friendship and co-operation," Mr. Nehru went on, "the Government of India venture to make the following suggestions:

(1) An atmosphere of peaceful approach should be promoted by formal declarations by both sides . . . in favour of ending violence

(2) The national entity and personality of Algeria should be recognized by the French Government on the basis of freedom.

(3) The equality of the peoples in Algeria, irrespective of race, should be recognized by all concerned.

(4) Recognition that Algeria is the homeland of all the people in Algeria, irrespective of race, and that they shall all be entitled to the benefits and share the burdens arising from the recognition of the national entity, personality, and freedom of Algeria.

(5) Direct negotiations based on the above basic ideas, and in accordance with the principles of the U N. Charter, should be inaugurated"

Mr. Nehru concluded: "The House will recall that in Indo-China the first step towards termination of a long conflict began with the cessation of hostilities, and that a similar appeal to the present one evoked the unanimous approval of the House and helpful responses elsewhere. It is our hope that in a situation no less fraught with danger to the parties and to international peace than the war in Indo-China, now happily ended, this fervent appeal will reach the friendly ears of the parties to the present conflict, both of whom we regard as our friend.. "

The Algerian question was discussed in Paris on June 5 by M. Pineau, the French Foreign Minister, and Mr. Krishna Menon, Minister without portfolio in the Indian Government. In a subsequent statement, M. Pineau said that he and Mr. Menon had discussed the points raised by Mr. Nehru in his speech to the Indian House of the People; that he (M. Pineau) had explained to Mr. Menon the difficulties confronting the French Government in Algeria; and that Mr. Menon had stressed the need for a pacific settlement of the Algerian problem in a manner which would take French interests in Algeria into account. No "practical conclusions" had been arrived at, but the discussions had enabled the two countries to understand each other's point of view.—(U.N. Information Centre, London - The Hindu, Madras - Le Monde, Paris)

(Prev. rep. Algeria, 14913 A.)

B. JORDAN.—Arab Legion Discussions with Britain.

The British War Office and H.M. Embassy in Amman announced on April 17 that Anglo-Jordanian negotiations "on future arrangements for the loan of British officers to the Arab Legion" had resulted in agreement on the following future arrangements:

(1) In accordance with their treaty obligations to provide British personnel whose services were required by the Jordanian Government, H M Government had undertaken "to continue to loan certain officers to the Arab Legion in specified appointments connected with training and technical duties." It was stated that "these officers are required by the Jordanian Government until Arab officers are available to replace them."

(2) The British officers lent to Jordan would function "in a way somewhat similar to officers already loaned to certain Commonwealth and foreign countries." They would continue, as in the past, to wear the uniform of the Arab Legion.

(3) The officers concerned would "retain their full rights and responsibilities with regard to their service in the British Army under the Army Act." Their allowances and conditions of service would be mutually agreed between the British and Jordanian Governments.

The Jordanian Government issued a communiqué on May 6 stating that Britain and Jordan were in general agreement on the status of British officers remaining in the service of the Arab Legion. A similar statement was issued by Sir Charles Duke, H.M. Ambassador in Amman. It was understood that several points were still under discussion, but that they were relatively unimportant and related to routine matters.

An Amman announcement of June 28 stated that the Jordanian Government had decided to terminate the services of Mr. G. Lankester Harding, who had held the post of Director of the Department of Antiquities in Jordan since 1936. Mr. Harding stated that he had been given no prior notification of the termination of his appointment, nor any reason for his dismissal.—(Times - Daily Telegraph) **(14876 D; 14737 A.)**

C. EASTERN GERMANY. — Reduction in Army Strength. - Voluntary Recruitment of Armed Forces.

It was officially announced in East Berlin on July 1 that the East German Government had decided (1) that the strength of the East German Army would be reduced from 120,000 to 90,000 men; (2) that the funds made available through the reduction in the Army's strength would be used to develop the country's economy; and (3) that the Army would be raised entirely by the recruitment of volunteers.

The announcement said that the cut in the armed forces followed similar reductions in the armies of the Soviet Union and the People's Democracies "The German people," it continued, "have a particularly great responsibility for the maintenance of peace in Europe. The re-establishment of German militarism in Western Germany cannot be reconciled with a relaxation of international tension There must be a German contribution to the relaxation of tension through an agreement between the two German States on a limitation of army strength, a ban on atomic weapons on German soil, and the non-introduction of conscription. Such an act of peace would also help the reunification of Germany on a peaceful basis"

The central committee of the Socialist Unity Party adopted on the same date a resolution appealing to the Social Democratic Party in Western Germany for joint action to prevent the introduction of conscription in any part of Germany.
(Neues Deutschland, East Berlin) **(Prev. rep. 14701 A.)**

A. UNITED KINGDOM. — Technological Education. - Designation of Eight Colleges of Advanced Technology.

Sir David Eccles, the Minister of Education, announced in the House of Commons on June 21 that he proposed to designate eight existing technical colleges as "colleges of advanced technology," and that the designation of two further colleges was under consideration. The Minister's announcement was made in the course of a debate on an Opposition motion welcoming the White Paper on Technical Education [see 14879 A] but criticizing the Government's plans as "not adequate for the country's needs."

Mr. Michael Stewart (Lab.), introducing the motion, urged that the new technological colleges should have the status of university colleges, and should not be under local or regional control but be linked with the Government through the medium of the University Grants Committee. Similarly, the new Diploma of Technology should not only be the equivalent of a University degree, but should be actually called a degree. He argued that the attitude of parents and teachers towards the diploma would be affected by the name given to it, and that there was "no reason except intellectual snobbery" for refusing to call it a degree. In the same way, unless the new technological colleges had the standing of university colleges granting degrees, they would not be able to offer either the salary or the status to get the staff they required. The Opposition considered that at the highest academic level the Government's plans were "too narrowly conceived," while at the intermediate level there had been "grave under-estimation" of the administrative problems involved.

Sir David Eccles, who moved an amendment welcoming the Government's decision to expand facilities for technical education "as rapidly as resources allow," said that the intention was that there should be in England and Wales about 300 local colleges, about 150 area colleges, and (within the next few years) up to 30 regional colleges. It was now proposed to designate eight colleges of advanced technology which would concentrate entirely on work above the level of the ordinary national certificate, including post-graduate and research work. These colleges would receive a 75 per cent grant for all their advanced technological work, but to qualify they must fulfil a number of "stiff conditions" relating to such matters as the composition of the governing body, financial control, staff arrangements, and standards of accommodation.

The Government would look to these colleges for a growing number of top-grade technologists, and the quality and breadth of training was therefore all-important. Although the colleges would be of far more than local importance, the Government had decided to leave their administration in the hands of local authorities. Over the past few years the larger authorities had been willing to do far more for their principal colleges than successive Ministers of Education had been able to allow, and now that there was this opportunity it was only right to let them build their local colleges up to university status.

"Setting the standards high," Sir David continued, he now proposed to designate the following colleges as Colleges of Advanced Technology: the Birmingham College of Technology, the Bradford Technical College, the Cardiff College of Technology and Commerce, the Loughborough College of Technology, the Royal Technical College, Salford, and, in London, the Battersea, Chelsea, and Northampton Polytechnics. These designations, however, would be provisional only, because he still had to satisfy himself that the eight colleges already fulfilled the necessary conditions or would be able to do so in the near future.

Selection of these colleges, Sir David explained, had been governed by two factors: (1) the standard of work which a particular college was doing; (2) the distribution of industry. There were important areas in which there was at present no college suitable for designation, but there were two exceptions. In the Tyne-Tees area one of the existing regional colleges should be designated as a college of advanced technology, but as resources would not allow of more than one he was asking the local education authorities to consult with industry through the Northern Regional Advisory Council, and then to decide which college should be promoted. In the South-West no college was yet far enough ahead to be designated, but he had added the Bristol College of Technology to the list of regional colleges and had agreed with the Bristol Education Authority that it should plan its building projects so that, if enough support was forthcoming from industry, the college could be up-graded to a college of advanced technology.

After explaining that he did not like the "cacophonous abbreviation Dip. Tech." and had considered offering a prize for a better name, Sir David ended by stating that at March 31 there were 10,000 full-time and 43,700 part-time teachers in technical colleges, 11,000 of the part-time teachers being also regular teachers in day schools. To facilitate transfers from industrial jobs to teaching, he had asked the chairmen of the National Advisory Council on the Training and Supply of Teachers and of the National Advisory Council on Education for Industry and Commerce to nominate a small joint committee to advise him on the recruitment and training of teachers in technical colleges.

During the subsequent debate **Mr. Callaghan** (Lab.) asserted that the Government's proposals were falling far short of requirements. He stated in this connexion that in 1954 the U.S.S.R. had produced 280 engineering graduates per 1,000,000 population, compared with 136 per 1,000,000 in the United States, 67 in Western Europe (including Italy), and only 57 in Britain.

Mr. Butler (Lord Privy Seal), replying to the debate, said that the average figure for Western Europe quoted by Mr. Callaghan included 70 engineering graduates per 1,000,000 population in France, 82 in Switzerland, and 89 in Italy, so that the British figures were "not too bad." In terms of pure-science graduates the British position was much better, the figure per 1,000,000 population being 105, compared with only 56 for the U.S.S.R. and 48 for Western Europe; in the U.S.A., although the figure was 144 per 1,000,000, the standard was probably not so high. Mr. Butler added that the Universities had been asked to increase the number of their students by about 60 per cent in five years and to put forward technological building projects which they considered necessary. Meanwhile the Government had authorized further building to be started in 1957 at a cost to the Exchequer of £4,500,000, apart from the amount which the Universities might be able to find themselves. It was also proposed to spend £1,500,000 at Birmingham, £750,000 at Salford, and smaller amounts at Bradford, Loughborough, Chelsea Polytechnic, Northampton Polytechnic, and the Cardiff College of Technology.

The Financial Secretary to the Treasury (Mr. Henry Brooke) stated in a written reply on June 21 that a revised plan for the expansion of the Imperial College of Science and Technology had been prepared which provided for the central tower of the existing Collcutt building to be preserved as a free-standing campanile. Before a definite decision could be taken, however, expert advice would have to be obtained on the stability of the tower as a separate unit. The Imperial College had considered with the L.C.C. and the Royal Fine Art Commission whether it would be possible to preserve the Collcutt buildings complete, but had decided that this would not be possible without limiting the College's expansion. Mr. Brooke added that the L.C.C. had already given outline approval to the plans for the east and west blocks of the proposed new buildings, on which, subject to the concurrence of the Royal Fine Art Commission, work could now start.—(Times - Daily Telegraph) **(14897 A.)**

B. PORTUGAL. — Air Bases for NATO Forces.

The Portuguese Minister of Defence (Colonel Santos Costa) announced on June 29 that the Portuguese Government had decided to enlarge the air bases at Espinho and Montijo—in northern and southern Portugal respectively—at the suggestion of the United States and other NATO members. He added that the Western allies, especially the U.S.A. and Great Britain, would be permitted to use the bases to carry out their NATO obligations, and that the U.S.A. had suggested that existing facilities in the Azores should also be expanded.

Colonel Santos Costa pointed out that the Espinho and Montijo bases were of great importance to the NATO Atlantic Command, and said that the Portuguese Government had agreed to their expansion in view of "certain recent international developments which . . . might have an adverse effect on the system of Western defence." The Minister did not elaborate on this statement, but the *New York Times* said that it was "clear that he was alluding to the possibility that the U.S. bases in Iceland and North Africa might not be available in the future for the defence of Western Europe."

(New York Times)

Note. The future of the U.S. air base at Keflavik (near Reykjavik) is uncertain owing to the recent political developments in Iceland (see 14960 A, 14804 A). The future of the four U.S. air bases in Morocco—at Ben Guérir, Boulhart, Nouasseur, and Sidi-Slimane—is similarly uncertain owing to the fact that Morocco, now an independent State, was not a party to the Franco-U.S. agreement under which they were established. The Moroccan Foreign Minister, M. Balafrej, had recently stated that the Moroccan Government was reserving its position on that agreement (see 14946 A). The headquarters of the U.S. 17th Air Force, formerly at Rabat, were transferred in June to the Wheelus Air Base, near Tripoli.

C. YUGOSLAVIA. — Scientific and Technical Co-operation Agreement with Czechoslovakia.

An agreement on scientific and technical co-operation between Yugoslavia and Czechoslovakia was signed in Belgrade on July 3. It provided for the setting-up of a joint committee to work out measures of co-operation. - (Tanjug Agency, Belgrade)

(Prev. rep. 14954 D; 14937 A.)

D. SOUTH VIETNAM. — Execution of General Bacut.

General Bacut (32), the former leader of the dissident Hoa-Hao sect, was executed at Cantho (South Vietnam) on July 13 after he had been twice sentenced to death on charges of treason, murder, pillage and arson - first by a civil court and subsequently by a military court. (Le Monde, Paris)

(Prev. rep. 14949 A.)

E. FRANCE. — "Temps de Paris" ceases Publication.

The new Paris evening newspaper, *Le Temps de Paris*, ceased publication on July 8 as a result of difficulties caused by newsprint restrictions. It had been in existence for only 11 weeks. (Le Figaro, Paris) **(Prev. rep. 14845 E.)**

A. POLAND. — The Poznan Riots.

Widespread dissatisfaction with low wages, poor living conditions, and the extremely high cost of living led to serious rioting in Poznan on June 28, when many thousands of factory workers attacked the headquarters of the security police, the headquarters of the local Communist Party, a radio station, and other buildings. The disorders broke out a few hours after the return to Poznan from Warsaw of a delegation of workers from the Zispo engineering works, which had—it was believed unsuccessfully—presented the workers' grievances to Government representatives. The demonstrations began at 8 a.m., when columns of workers—many of whom were from the Zispo engineering works—spontaneously left their factories and converged on the main square in front of the Municipal People's Council building (Town Hall), chanting slogans such as "We want bread" and carrying banners and Polish flags. Later in the morning the crowds attacked and smashed the windows of the Communist Party headquarters, set fire to the prison and freed a number of prisoners, and attacked the headquarters of the security police with rifle fire. According to foreign eye-witnesses in Poznan at the time (see below), many of the workers were armed with rifles made at the Zispo works, or given to them by soldiers who were sympathetic to the demonstrators.

Order was restored later in the day after Polish Army tanks and reinforcements had been rushed to the city, where all public transport had been brought to a standstill and all communications with other parts of Poland cut off. By 7 p.m. Polish armoured troops had reduced the last stronghold held by the rioters—a radio station used for jamming foreign broadcasts. It was officially announced that 48 people had been killed and 270 injured in the disturbances.

Statements by Eye-witnesses.

The disturbances broke out while the Poznan International Fair was in progress, a number of British, Scandinavian, German and other foreign businessmen and visitors being in the city at the time. The following extracts are given from many eye-witness accounts of the riots.

The attack on the security police headquarters was witnessed by Mr. Michael Davies (a member of Cambridge City Council), one of a delegation of British economists—including prominent Cambridge professors—which was visiting Poznan at the time. In an interview with a correspondent of *The Times*, Mr. Davies and other members of the delegation said that the disturbances began with a strike of engineering workers, who marched out of the factory gates and were joined by many other factory and office workers. The demonstrators were shouting slogans such as "Down with Communism," "Down with dictatorship," "Down with the Soviet occupation," "We want bread," "We want freedom," and "We want lower prices and higher wages." At about 10.30 a.m. the demonstrators arrived outside the Communist Party headquarters, where a Communist Party member attempted to address them but was seized and beaten. After being joined by groups of workers armed with rifles, the demonstrators attacked the prison and liberated the inmates. The disturbances then extended to the radio station, into which entry was forced, and the headquarters of the security police, where the windows were smashed and the building attacked by rifle-fire. Mr. Davies, whose account was corroborated by three other members of the delegation, said that the first troops to arrive on the scene—tanks and a lorry-load of infantry—actually fraternized with the crowds and joined in the attack on the security police headquarters. Discipline was later restored, however, and lorried infantry and tanks dispersed and arrested the demonstrators.

Mr. Kenneth G. Treherne (of the Dominions Export Co., London), a British businessman who was in Poznan at the time, said on arrival in Warsaw that he had seen "crowds of workers, apparently steel workers, marching in an orderly manner through the streets. They were chanting something: I was told it was 'We want bread'... Later I heard a bit of individual shooting... I also heard what was obviously a light machine-gun. By mid-day there were tanks in front of the National Bank of Poland... When we left for the airport to catch our plane for Warsaw we were taken round the outskirts of the city. We passed about 12 tanks coming into the town."

Mr. Malcolm Logan, a barrister and a director of a British engineering trade association, said in Berlin that on his way out of Poznan he had met troops moving into the city and had counted 70 tanks. "Wherever our car stopped," he added, "strikers, noticing the Union Jack we were flying, crowded round us to give a message to the West. They described their desperately low standard of living, and how it took two months to buy a pair of cheap shoes."

Statement by Polish Government.

The Polish Government issued a communiqué on June 28 admitting that "serious disturbances" had occurred in Poznan, and attributing responsibility to "imperialist agents" who had exploited "economic difficulties and grievances in certain factories." The communiqué was worded as follows:

"Serious disturbances occurred to-day in Poznan. For some time imperialist agents and the reactionary underground have been trying to utilize the economic difficulties and grievances in certain Poznan factories to provoke outbursts against the people's power. It is no accident that the enemy chose Poznan as the scene of provocation at a time when the International Fair was being held there. The idea was to cast a shadow on the good name of People's Poland and to hamper the promotion of our peaceful international co-operation.

"The enemy's agents succeeded in provoking street riots. Certain public buildings were attacked and this led to victims... Those responsible for the disturbances, which bore the imprint of a large-scale and carefully prepared provocative and diversionary action, will be punished with all the severity of the law.

"In view of the events in Poznan, the special vigilance of all working people and all the patriotic forces of the nation is needed in face of any attempt at anti-State outbursts inspired by the enemies of People's Poland. The provocation in Poznan was staged by enemies of our country at a time when the greatest concern of the Party and the Government is to eliminate the grievances of the working peoples and to democratize our country. The Government and the Central Committee of the Polish United Workers' Party are convinced that every attempt to provoke disturbances and outbursts against the people's power will meet with the proper rebuff... of all citizens who value the good of the country."

Broadcast by Prime Minister of Poland.

The Prime Minister of Poland, M. Cyrankiewicz, flew to Poznan on June 28, together with other members of the Government and leaders of the Polish United Workers' (Communist) Party. In a broadcast from Poznan on the following day, he admitted that there was discontent among the Poznan workers at the "difficult material conditions of the working people"; declared that the Government and the United Workers' Party were working out plans to raise the living standards of the workers; and accused "provocateurs" of causing the "criminal provocation and bloody disturbances" in Poznan. He disclosed that soldiers and members of the security police had been killed during the riots.

M. Cyrankiewicz said that there was "no need to hide the fact that criminal provocateurs took advantage of undoubtedly existing grievances and discontent in certain factories caused by economic difficulties and shortcomings." After saying that "a decision to put these errors right" had been taken a few days beforehand by the Government and the Party, and that workers' delegations had been promised that their legitimate demands would be "settled positively," M. Cyrankiewicz continued:

"This did not prevent the provocateurs from organizing a demonstration which had been prepared for a long time... The attention of imperialist centres has for long been centred on Poznan, the idea being to turn Poznan into a scene of disturbances while the International Fair was on... The enemy tried to take advantage of the discontent among a section of the workers in Poznan, caused by the difficult material conditions of the working people... The Government and the Central Committee of the Party have worked out a plan of action which will make it possible gradually to raise the living standards of the workers... But... the provocateurs and imperialist agents want to prevent the realization of these demands..."

After saying that "the workers as a mass, with the exception of individuals who were fooled," had given their support "to the people's power," the Prime Minister went on: "At some points in the city, on some roof-tops, the provocateurs placed machine-guns which took toll of human life... The authorities were forced to employ stringent methods to protect the life and property of citizens and to restore order. The majority of the rioters, part of them armed, have been apprehended, and court proceedings will be instituted against them. We are filled with sorrow and grief at the fact that soldiers, militiamen, and security employees were killed during the disturbances while defending the posts entrusted to them... We are filled with grief and sorrow at the deaths of innocent citizens who happened to be at the places where the clashes occurred...

"The bloody riots in Poznan will not, however, stop the Party's and Government's efforts to democratize our life and... to achieve the most rapid improvement of the living conditions of the workers... Every provocateur or madman who dares to raise his hand against the people's power may be sure that his hand will be chopped off..."

Polish Government's Account of Poznan Disturbances.

A communiqué giving the Polish Government's version of the Poznan riots was broadcast by Warsaw radio on June 30:

"A few days before the incidents," said the communiqué, "discontent prevailed among the workers of the Zispo works and several other factories, in connexion with wages and delays in the settlement of demands put forward by the personnel. On June 27 a delegation of the Zispo workers returned to Poznan from Warsaw bringing with them a decision on the favourable settlement of their basic demands... Despite these steps to settle the personnel's grievances, the Zispo workers, misled by provocateurs, downed tools on the morning of June 28 and came out into the streets... The workers maintained a calm bearing, but organized groups of provocateurs mingling with the crowds began to incite them to come out against the people's power. In the meantime gangs of provocateurs were calling at Poznan factories and offices, leading the workers into the streets and often using threats. The workers at such important public utilities as the power station, waterworks, gasworks, central post office, and other establishments refused to yield to the persuasions and pressure of the provocateurs...

" The first riots and attempts to enter public buildings by force began in the square in front of the Municipal People's Council The headquarters of the Municipal Council and the Voivodship Committee of the Polish United Workers' Party [i e the local Communist Party offices] were attacked At the same time groups of provocateurs, clearly working to a prearranged plan, attacked the military prosecutor's office, the prison, and the radio station, and tried to seize the railway station, the bank, and the post office Gangs forced their way into the prison and released criminals who joined in the riots. Armed gangs . . . attacked the Public Security Office The building was fired at by machine-guns and attacked with grenades During the clashes around the Public Security Office there were casualties in both killed and wounded Armed groups of provocateurs began at the same time to overturn tramcars and cars, attempting to erect barricades. This action, however, did not find support among the crowds, which rapidly dwindled

" To liquidate the riots and restore order in the city, military detachments were brought in. Tanks also intervened but, in accordance with orders, did not open fire Owing to the exceptional situation the authorities introduced a curfew from 9 p m to 4 a m This decision was obeyed by the inhabitants of the city, who dispersed to their homes In various parts of the city, however, armed groups still attempted to provoke shooting and to plunder shops These groups were rapidly eliminated . . In the morning of June 29 the majority of workers returned to work. Throughout the day individual diversionists were rounded up . "

Dismissal of Polish Ministers. - Repayment of Taxes to Poznan Workers. - Government Inquiry into Poznan Riots.

It was offically announced in Warsaw on July 8 that M. Fidelski, Minister of the Engineering Industry, and M Tokarski, Minister of the Motor Industry, had been relieved of their posts, and that the two Ministries had been merged into a Ministry of the Engineering Industry headed by M. Jaszczuk, hitherto Minister of Electric Power. On July 13 it was further announced that M. Stefan Jedrychowski (a Vice-Premier) had replaced M. Eugeniusz Szyr as head of the Economic Planning Commission, which had been criticized both in the Press and in the Seym for bureaucracy and over-centralization; that the Ministries of Industrial Building and of House Construction had been combined into a single Ministry of Building headed by M. Szyr; and that the heads of these Ministries (MM. Piotrowski and Babinski) had been relieved of their posts

It was stated that M Fidelski had been appointed an Under-Secretary in the new Ministry of the Engineering Industry No new appointment was announced for M. Tokarski, nor any reason given for his dismissal The Warsaw Correspondent of *The Times* stated, however, that M. Tokarski's removal " is connected here [in Warsaw] with the fact that he was in charge of the Ministry which was responsible for the Zispo works in Poznan, where the trouble began . . "

On July 10 it was announced that more than 6,500,000 zlotys' (nominally £500,000) worth of taxes " unjustly collected " from the workers at the Zispo factory in Poznan was to be refunded to them The announcement was made in the *Gazeta Poznanska*, which added that 1,400,000 zlotys had already been refunded to nearly 5,000 workers as a first instalment. No reason was given as to why these taxes had earlier been collected and why it had only now been found out that their collection was " unjust."

The setting-up of a special commission to conduct an " energetic and thorough " investigation into the Poznan riots was announced on July 4 by M. Cyrankiewicz. Warsaw radio said that the commission would be headed by M. Edward Gierek, a secretary of the central committee of the United Workers' Party, and that there would be " no appeal " against its findings. It was disclosed on July 13 that 481 persons had been arrested, of whom 196 had been released after questioning, and that 285 would be brought to trial.

Polish Rejection of U.S. Food Offer.

The Polish newspaper *Trybuna Ludu*, organ of the United Workers' Party, announced on July 5 that Poland had rejected an offer by the American Red Cross—made through the League of Red Cross Societies in Geneva—to send foodstuffs to the Poznan area. The paper said that exception had been taken to the terms in which the offer was couched—" to reduce hunger in the Polish nation "—and also to the U.S. stipulation that the foodstuffs, if accepted, should be specially marked when distributed to show their American origin. *Trybuna Ludu* described the American offer as " pure propaganda," and quoted the Polish Red Cross as saying that there was " no necessity for accepting this kind of philanthropic aid."

The U.S. State Department had announced on July 1 that foodstuffs—including wheat and flour from U.S. surplus stocks—would be offered to Poland, and particularly for the Poznan area, through the League of Red Cross Societies Mr. Hoover, the acting Secretary of State, said that the Poznan disturbances " seemed to be marked by demands by the population for bread."

American Statement on Poznan Riots.

The State Department issued a statement on June 29 saying that it was " profoundly shocked " at the civilian casualties in the Poznan disturbances, which were attributed to the fact that the Poles had been brought " to a breaking-point " by their grievances. The statement added:

Our sympathy goes out to the families of these people, who were merely expressing their profound grievances. They apparently feel that their Government primarily serves the interests of the Soviet Union. This episode dramatically underlines what President Eisenhower said to the Soviet rulers at Geneva—namely, that the peoples of Eastern Europe, many with a long and proud record of national existence, should have the right to choose the form of government under which they will live, and that sovereign rights and self-government should be restored to them "

A Polish protest at this statement, which was described as " interference in Polish internal affairs," was handed to the State Department on July 6.—(Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - Polish Embassy Press Office, London - New York Times)

A. INDIA. — Diplomatic Appointments.

Important appointments in the Indian Diplomatic Service during the past 18 months are listed below:

Mr. Balraj Krishna Kapur, Political Officer in Sikkim, as Minister to the Netherlands (February 1955). Mr Kapur assumed the rank of Ambassador in September.

Mr. Inder Sen Chopra, Joint Secretary and Chief of Protocol in the Ministry of External Affairs, as Minister to Sweden, and concurrently to Denmark and Finland (February 1955).

Dr. Mohan Sinha Mehta, High Commissioner to Pakistan, as Minister to Switzerland, and concurrently to Austria and the Holy See (February 1955).

Mr A C. Narayanan Nambiar, Minister in Stockholm, as Ambassador to the German Federal Republic (February 1955)

Mr. John A Thivy, Minister in Damascus, as Ambassador to Italy (March 1955). Mr Thivy was concurrently appointed Minister to Albania in March 1956, when diplomatic relations were established between that country and India In the same month he also presented credentials as Minister to Greece.

Mr. Rangiah Subra Mani, Joint Secretary in the Ministry of External Affairs, as Ambassador to Iraq, and concurrently Minister to Jordan (June 1955)

Mr R. K. Nehru, Foreign Secretary in the Ministry of External Affairs, as Ambassador to the People's Republic of China, and concurrently to Mongolia (July 1955). Mr. Nehru has represented India at the U.N. and at many international conferences, and headed the delegation which negotiated the transfer of the former French Settlements (Pondicherry, etc.) to Indian sovereignty.

Mr. N. Raghavan, Ambassador in Peking, as Ambassador to Argentina, and concurrently Minister to Chile (August 1955).

Major-General (retd.) Mahinder Singh Chopra as Minister to the Philippine Republic (March 1956). General Chopra held important staff appointments in World War II, and commanded the Indian Army's 20th Division from 1953 to February 1955.

Mr Lal Ram Sharan Singh, Indian Consul-General at New York, as Ambassador to Brazil (February 1956).

Nawab Ali Yavar Jung, Ambassador in Cairo, as India's first Ambassador to the Sudan (May 1956) The appointment was a concurrent one, the Nawab remaining Ambassador in Cairo.

Mr. S. K. Banerjee, lately Consul-General at San Francisco, presented letters of credence as Minister to Syria on June 9, 1956.

It was announced in New Delhi and Madrid on May 25 that the Governments of India and Spain had agreed to establish diplomatic relations at embassy level.—(The Statesman, Calcutta - The Hindu, Madras - Indian High Commissioner's Office, London) **(Prev. rep. 14609 D; 14028 C.)**

B. FRANCE. — Cabinet Appointment. - M. Billères appointed Minister of State.

Under a decree published in the *Journal Officiel* on June 22, M. René Billères, hitherto Minister of Education, Youth, and Sport, was appointed Minister of State in charge of Education, Youth, and Sport. The change in M Billères' designation was made following the resignation of M. Mendès-France as Minister of State, and in view of the fact that M. Mollet had declined to appoint again a fourth Minister belonging to the Radical Party.—(Le Monde, Paris - Le Figaro, Paris)

(Prev. rep. 14933 A; 14681 A.)

C. UNITED KINGDOM. — Capital Issues.

New capital issues during the first half of 1956 totalled £151,754,000, compared with £100,591,000 for the first six months of 1955 and £567,192,000 for the whole of that year. Of the six-monthly total, £131,167,000 were issues for the U.K. and £20,587 for British overseas countries.
(Midland Bank Ltd.) **(Prev. rep. 14621 B; 14293 E.)**

A. FRANCE. — National Assembly Debate on North Africa. - Vote of Confidence in Government's Policy. - Ban on Export of Light Arms to Arab Countries.

A three-day debate on the French Government's policy in North Africa was held in the National Assembly from May 31 to June 2.

Several right-wing deputies, including **M. Dronne** (Gaullist) and **M. Raingeard** (Independent), expressed approval of the Government's policy in Algeria but strongly criticized the agreements concluded with Tunisia and Morocco, alleging that the Algerian rebels were receiving support both from Tunisia and from the "Liberation Army" in Morocco. **M. Monteil** (M.R.P.) deplored the fact that the Government, without consulting Parliament, had granted Tunisia independence before the links of interdependence had been defined, and in particular had taken no precautions to ensure that Bizerta would remain a French base.

M. Cot (*Progressiste*), on the other hand, expressed approval of the Tunisian and Moroccan agreements, but maintained that the policy of M. Lacoste (the Minister-Resident in Algeria) had widened the gap between Moslems and Europeans and threatened to involve France in a war with the whole of North Africa which international opinion would almost unanimously condemn. He therefore called on the Government to recognize the "national entity" of Algeria and to respond to Mr Nehru's appeal [see 14965 A] for the opening of negotiations. This proposal was supported by **M. Duclos** (Communist), who contended that the recent general election and the demonstrations against the recall of reservists had shown that the French people were opposed to the war in Algeria.

M. Maurice Schumann (M.R.P.) insisted that the Government should firmly oppose any "interference by third parties" in the Algerian problem, and should adhere to two principles: not to let a situation be imposed upon France by violence, and not to impose one by force. **M. Reynaud** (Independent) rejected the suggestion of negotiations with the rebels, as the only conditions which they would accept were the recognition of Algeria's right to independence and sovereignty. Instead, he called on the Government to proclaim the principle that the two communities in Algeria should be equal in rights and duties, and that neither should be able to oppress the other politically or economically.

M. Savary (State Secretary for Tunisian and Moroccan Affairs) emphasized that, in view of the situation in Morocco and Tunisia when the present Government took power, an unequivocal recognition of their independence had been the only means of strengthening the authority of their own Governments, if this had been postponed while a definition of interdependence was negotiated, "independence would have been attained without us or against us." The diplomatic agreement with Morocco had been signed because it had proved impossible to conclude all the agreements as quickly as had been hoped, and also because Morocco was exposed to growing pressure from certain foreign countries which made it increasingly difficult for her to reject their offers to exchange diplomatic missions. The agreement, M. Savary pointed out, had in actual fact "the character of an alliance," and certain of its clauses, notably that granting seniority to the French diplomatic representative in Rabat, had even been denounced by those who were "hostile to the understanding between Morocco and France." Interdependence could be achieved only on a basis of equality, and not as "a camouflaged protectorate."

The Franco-Tunisian agreement of March 20, M. Savary continued, left intact the Conventions of June 20, 1955, under which the *status quo* was to be maintained in the fields of diplomacy and defence until new agreements had been concluded. The Government wished to open negotiations on these subjects as soon as possible, but it could not accept any unilateral denunciation of existing agreements.

Reverting to Morocco, M. Savary said that the outstanding problem was that of maintaining public order. The number of terrorist attacks on Frenchmen had steadily fallen, from 73 in July 1955 to 66 in October, 32 in February 1956, 17 in March, and eight in April. During the first four months of the year eight French civilians had been killed and 26 wounded, compared with 108 killed and 186 wounded in the second half of 1955. The French Government had protested strongly against these incidents and against the activities of the "Liberation Army," and as long as the Moroccan Government was unable to protect French lives and property their protection would remain one of the tasks of the French Army. M. Savary said that he had twice been assured by the French C.-in-C. in Morocco that it was untrue that men or equipment were reaching the Algerian rebels from Morocco. In Tunisia the "Youssefist" rebels had been effectively suppressed, and order reigned throughout the country.

In conclusion M. Savary said that the Government's policy was "the only one possible," as any other would have led to war throughout North Africa. He gave an assurance that the Government, in its future negotiations with Tunisia and Morocco, would insist on guarantees for the interests of the French settlers and on continued facilities for the French armed forces, including the base at Bizerta.

M. Lejeune (State Secretary for the Armed Forces) recalled that when M. Lacoste took charge in Algeria the situation had been alarming, and that it had been necessary to prevent the rebels in the Constantinois from linking up with those in the Oran area. Since then the French forces in Algeria had been raised to 300,000 men, and would soon exceed 400,000; the number of helicopters in use had been greatly increased; and equipment originally intended for use in Europe had been adapted to Algerian conditions.

M. Senghor (Overseas Independent) deplored the Government's failure to suggest any political solution in Algeria; he appealed for a cease-fire, to be followed by negotiations leading to internal autonomy for Algeria within the French Republic. **M. Pinay** (Independent) recalled that the statement issued on Nov. 6, 1955 (see 14528 A) by the Sultan of Morocco and himself, as Foreign Minister in M. Faure's Government, had laid down that France would remain responsible for Morocco's diplomatic relations and defence until the permanent links between the two countries had been defined, whereas the present Government had granted Morocco independence without defining the term "interdependence."

M. Pineau (the Foreign Minister) announced that the Government had forbidden the export to the Arab countries of arms which might be passed on to the Algerian rebels. In reply to M. Pinay, he observed that after the restoration of the Sultan of Morocco France had been "practically without a Government" for three months, and that Morocco had drifted towards anarchy during that period. In consequence it had become impossible to link independence with interdependence, or to treat Tunisia differently from Morocco. The only alternative would have been a policy of force, which would have needed 500,000 more troops to carry out.

M. Hugues (Radical) maintained that the diplomatic agreement with Morocco should not be ratified until the other agreements were known, and particularly that on defence. This view was supported by **M. Robert Schuman** (M.R.P.), who said that Morocco and Tunisia should be granted full sovereignty only after full guarantees for the French settlers and French interests had been obtained.

M. Lacoste declared that whereas "in February we were on the way to disintegration in Algeria," a "state of equilibrium" had since been reached. Although certain difficulties had still to be faced, including "infiltration on the Moroccan frontier, the arms traffic through Tunisia and Libya, and the intensification of terrorism," the Europeans' confidence in France had been restored, and the Moslems now knew that the Government's aim was to reduce the inequalities between the two communities. M. Lacoste denied that a "war of extermination" was being waged, and said that he had warned the troops against being provoked into "blind repression" by the rebels' atrocities. "I shall not promise you that the Algerian problem will be solved in the near future," he concluded. "But I wish to inform you of my reasoned and reasonable belief, and I assure you that in a few months we shall have achieved tangible results: that is, important sections of the population will have come over to us."

M. Panier (Radical) accused M. Lacoste of seeking to appease "those Frenchmen who are most hostile to a sincere reconciliation with the Moslems," and of failing to remove officials involved in the Algiers riots of Feb. 6 or to carry out political and agrarian reforms. Since Feb. 6, he asserted, the Government had "yielded to threats" and had abandoned the policy laid down in M. Mollet's investiture speech.

M. Mollet, the Prime Minister, stated (in reply to a question) that on taking office his Government had discovered that certain contracts for the delivery of arms to the Arab countries existed, some of which had been signed only a week beforehand. He had decided, however, that no light arms, even if they had already been contracted for, should be delivered to the Arab countries, and that no new contracts of this type should be entered into. [See page 14728, second column.]

Deploring the attitude of certain newspapers, parties, and politicians, **M. Mollet** said that one section of the Press exaggerated "isolated cases" of counter-terrorism committed by Frenchmen and compared the "Algerian patriots" to the French Resistance movement, whilst another section undermined morale by publishing sensational details of atrocities. Politicians, who had themselves been justly sentenced in the past for treason, accused the Government of defeatism in order to undermine confidence in Parliament. The Communists had called for a cease-fire only from France, and the Poujadists had simultaneously demanded sacrifices and organized tax-strikes. The Government, M. Mollet declared, would respect fundamental liberties and the rights of minorities, but would take measures against those who opposed "the execution of decisions taken by the majority of the nation."

M. Mollet went on to reaffirm the main points of the Government's policy: free discussions with the elected representatives of the Algerian people on Algeria's future status, willingness to accept a cease-fire and to authorize contacts with the rebels for this purpose; and the holding of elections on a single electoral register within three months of the restoration of order. After stressing that any settlement must be on the basis that Algeria should be "neither a Moslem State, an Arab State, nor a French province," he declared: "Algeria has a unique character, a personality of its own which must be recognized while assuring its union with France by indissoluble links. Total equality of rights for Moslems must be guaranteed, together with respect for the legitimate rights of Europeans. A community will be established in the division of political responsibilities, resources, and labour. By a large measure of decentralization, the local authorities must receive very wide powers, corresponding to a genuine autonomy in administration. These principles apply to Moslems as well as to Europeans. There can be no question either of a return to the previous state of things, or of a break with France, or of the eviction of Europeans for whom Algeria has become their true country."

Turning to the Government's policy in Tunisia and Morocco, M. Mollet said that it was inspired by the same desire as its policy in Algeria—the desire to "maintain Franco-Moslem friendship and to

re-establish security." The situation in the three territories was totally different, however, and called for totally different measures Tunisia and Morocco had "never lost their personality as States," and the Government wished them to become friendly instead of protected States, and to substitute free co-operation for tutelage As a result of this liberal policy, security was slowly but surely being re-established. France had recognized the legitimacy of the national aspirations of Morocco and Tunisia, and their Rulers had recognized their common interests with France.

"It is understandable," M. Mollet continued, "that the Rulers of Tunisia and Morocco should be concerned at the situation in Algeria Nevertheless the Government must reply to certain declarations, as it has already done, that the Algerian problem concerns France alone The Government believes that neither Tunisia nor Morocco wishes to interfere in our affairs, for by so doing they would run the risk of gravely endangering our friendship. We are determined in all circumstances to ensure the control of the frontiers in the interests of Algeria and of the internal security of the two neighbouring countries"

Diplomatic means, M Mollet stressed, had been used to assist in the settlement of the Algerian problem France's allies had made their position clear; the Soviet Government had recognized the liberal spirit of France's policy; India and Yugoslavia, despite certain differences of opinion, had shown a "friendly understanding"; and numerous expressions of sympathy had been received from the Latin American countries. In consequence the Arab countries had failed to mobilize world opinion against France

In conclusion, M Mollet emphasized that he wished the Government's policy to be judged as a whole. If the vote of confidence was taken clause by clause, it might be said that the Government was "relying on different majorities to remain in power," and he was therefore asking for "a single vote of confidence which will be a second investiture vote"

The motion of confidence was adopted in the early hours of June 6 by 271 votes to 59, with 200 abstentions. The Socialists, U.S.D.R., and R.G.R., together with the majority of the Radicals, M.R.P., and Gaullists, voted in favour; the Poujadists voted against; the Communists and Overseas Independents abstained; and the right-wing "moderates" (Independents and *Paysans*) were divided.

The distribution of votes was as follows: *For*—87 Socialists, 62 M.R P., 47 Radicals, 29 Independents (including M. Laniel, the former Premier), 15 Gaullists, 14 U D S R , 12 R G.R., 4 *Paysans*, and 1 *non-inscrit*. *Against*—39 Poujadists, 11 Independents (including M Reynaud), 4 *Paysans*, 2 Gaullists, 1 *Progressiste*, 1 M.R.P., and 1 *non-inscrit*. *Abstentions*—135 Communists and 5 *Progressistes*, 38 Independents (including M Pinay, the former Foreign Minister), 10 Radicals (including M. Mendès-France), 4 Overseas Independents, 3 *Paysans*, 2 M.R P (including M Bidault), 2 Gaullists, and 1 *non-inscrit*. Forty-six deputies did not take part in the vote—13 Socialists, 9 Communists, 6 Overseas Independents, 3 U.D.S.R., 3 Gaullists, 3 M.R.P , 3 Poujadists, 2 Radicals, 2 *non-inscrits*, 1 Independent, and 1 *Paysan*

Before the vote was taken, M. Mollet had announced that if the result was favourable the diplomatic agreement with Morocco would be put into effect, but that it would not be submitted to the President for signature until all the agreements with Morocco had been ratified by Parliament. He also stated that the Government could not accept Mr. Nehru's proposals for a cease-fire [see 14965 A], as this would "introduce the idea of meditation."—(Le Monde, Paris - Le Figaro, Paris)

A. GERMANY. — Berlin. - Radio Building handed over by Russians to West Berlin Authorities.

The radio building in the British sector of Berlin, which had been occupied by the Russians since the war and had been the headquarters of the East German radio network until 1952, was transferred by the Soviet authorities to the West Berlin City Government on July 5. The agreement for the handing-over of the building, which had formed an *enclave* in the British sector, was signed at Karlshorst (the Soviet headquarters in East Berlin) by Major-General Chamov, the Soviet Commandant, and Dr. Suhr, Chief Burgomaster of West Berlin. Press correspondents stated that the building had been left in a derelict condition by the Russian authorities.

(Der Tagesspiegel, West Berlin)

B. NORWAY. — Army. - New Commander-in-Chief.

It was announced in Oslo early in July that Major-General Björn Christophersen had been appointed Commander-in-Chief of the Norwegian Army in succession to General Hansteen, who had held the post since 1948. Major-General Christophersen (56) was Chief of Staff of the Norwegian Forces in Britain during the war, and commanded the Norwegian Brigade in Germany from 1952 until its withdrawal to Norway in 1955.

(Norwegian Embassy, London) **(Prev. rep. 9495 E.)**

C. SUDAN. — Fall of Azhari Cabinet. - New Government formed by Mr. Abdullah Khalil. - Formation of People's Democratic Party.

The Government of Mr. Ismail el-Azhari was defeated in the Sudanese House of Representatives on July 4 on a motion of no-confidence, the voting being 60 in favour of the motion and 31 against.

This Government's fall had been preceded by the formation on June 26 of a new party—the People's Democratic Party—under the patronage of Sayed Ali el-Mirghani, the leader of the Khatmia sect The new party claimed 18 members in the House of Representatives, all former National Unionists; they comprised 11 dissident National Unionists, led by the three Ministers whose threatened resignation brought about the formation of Mr. Azhari's National Government in February last, six followers of Mr. Mohamed Nur el-Din, and Mr. Mirghani Hamza (see 14703 B). At the same time two Southern supporters of the National Unionists also expressed their opposition to Mr. Azhari.

The no-confidence motion was moved by a back-bencher, Sayed Rahamtalla Mahmoud, who asserted that Mr Azhari had lost the confidence of the people, that "more blood had been shed in the country under his rule than under the former regime," and that this blood had been "shed through negligence."

Following Mr. Azhari's resignation, Mr. Abdullah Khalil was elected Prime Minister on July 5 by 60 votes against 30 for Mr. Azhari. The membership of the new Government was announced on July 7 as follows.

*Mr. Abdullah Khalil (Umma) .	Prime Minister and Defence.
*Mr. Mirghani Hamza (P.D.P.) .	Deputy Premier, Agriculture, and Irrigation.
*Mr. Ibrahim Ahmed (Umma) . .	Finance.
*Mr. Ali Abdel Rahman (P.D.P.) .	Interior.
Mr. Mohamed Ahmed Mahgoub (Ind.)	Foreign Affairs.
*Mr. Ziada Arbab (Umma)	Education and Justice.
*Mr. Benjamin Lwoki (Liberal)	Works.
*Mr. Hammad Tewfik (P.D.P.)	Commerce, Industry and Supply.
*Dr. Amin El Sayed (P.D.P.) .	Health.
Mr. Mohamed Ahmed Abusin (P.D.P.)	Social Affairs.
Mr. Mamoun Hussein Sherrif (Umma)	Communications.
*Mr. Mohamed Nur el-Din (P.D.P.)	Local Government.
Mr. Alfred Burjouk Uludo (Liberal) . .	Mineral Resources.
Mr. Gordon Ayom (Liberal)	Animal Resources.
Mr. Amin El Tom (Umma) . . .	Ministers without portfolio.
*Mr. Yousif el-Agab (Republican Soc.)	

*Member of previous Cabinet
Umma—Umma Party.
P.D.P. —People's Democratic Party.

The new Cabinet thus consisted of six Ministers from the Umma Party (including Mr Mahgoub, who, though nominally independent, was nominated by that party, with which he has strong connexions); six from the People's Democratic Party, three Liberals; and one Republican Socialist Ten members of the new Government were Ministers in Mr Azhari's Cabinet, of whom only three, however (Mr. Khalil, Mr. Ibrahim Ahmed, and Dr. El Sayed) retained their former portfolios. Of the six new Ministers, two—Mr. Mamoun Hussein Sherrif and Mr. Amin El Tom—are not members of Parliament. As the Minister of Finance, Mr. Ibrahim Ahmed, is also not an M.P, the total number of such Ministers was three—the maximum allowed under the Constitution.

Mr. Abdullah Khalil (65), the new Prime Minister, is Secretary-General of the Umma Party. From 1948 until the dissolution of the Legislative Assembly in 1953 he served as Minister of Agriculture, and in Mr. Azhari's National Government formed last February he became Minister of Defence and Public Works. He served in the Egyptian Army and the Sudan Defence Force from 1910 to 1945, when he retired with the rank of brigadier, being the first Sudanese to reach that rank.

(Sudan Diplomatic Mission, London - Times) **(14703 B.)**

D. TUNISIA. — First Ambassador in London.

The appointment of M. Taieb Slim as the first Tunisian Ambassador to the United Kingdom was announced on July 10. M. Taieb Slim (33) is a prominent member of the Néo-Destour party and a brother of M. Mongi Slim, Minister of State in the Tunisian Government.—(Times) **(Prev. rep. 14858 C.)**

E. MOUNTAINEERING. — Corrigendum.

Owing to a misprint in the table given in 14948 A, it was erroneously stated that the Himalayan peak of Manaslu had been climbed in May 1955. As described in the article, the summit of Manaslu was reached for the first time by a Japanese expedition in May 1956.

(Ed. K.C.A.).

A. AFRICA. — The Capricorn Africa Programme.

A conference attended by some 200 delegates and observers from all British Central and East African territories met at Salima (Nyasaland) on June 16-18 under the chairmanship of Colonel David Stirling, founder and president of the Capricorn Africa Society. This organization was founded in 1953 with the aim of promoting the concept of a common citizenship, free from all forms of racial discrimination, among the African, European, and Asian communities of the territories concerned, based on a common loyalty under the Crown.

The Salima congress was attended by African, European, and Asian representatives from Southern Rhodesia, Northern Rhodesia, Nyasaland, Kenya, and Tanganyika, with a few individual observers from Uganda and South Africa—the latter including Mr Alan Paton, the well-known South African novelist. The delegates from Kenya included Mr. Patel, the Indian Minister in the Kenya Legislative Council, and three members of the Kikuyu tribe Colonel Laurens van der Post, the South African explorer and writer, sent a message expressing his full support for the "Capricorn" ideal, and declaring that it offered an alternative to the "dangerously recessive and narrow kind of racial consciousness and assertion" into which the Afrikaner ideal in South Africa had degenerated.

The delegates unanimously adopted a "Capricorn Africa contract" laying down the bases for a common citizenship and patriotism among all the races in the territories concerned. After reaffirming its faith in "the greatness of our common destiny" and its resolve "to reject the barren doctrine of racial nationalism," the conference expressed its determination to work for "a society free from racial discrimination, with a system of law founded on our human unity under God and our unity in loyalty to one Crown." While recognizing that the final elimination of certain aspects of racial segregation would necessarily take time, and that reforms too hastily carried out might cause injustices, the delegates declared that "while bearing in mind these considerations" they would "proceed vigorously towards a true integration of all races."

The contract was in the form of six "precepts" and a number of detailed provisions relating to such matters as the exercise of the franchise, land tenure, and labour relations. The declaration on the "six precepts" was worded as follows:

"We declare our determination to secure as a condition for full self-government and Dominion status the adoption in each Central and East African territory of a written Constitution embodying the following precepts:

(1) All men, in spite of their varying individual talents and differences of race and colour, are born equal in dignity before God and have a common duty to Him and to one another.

(2) Man's fulfilment of his responsibilities to his fellow men is the essential foundation for a community, and for the assertion and enjoyment of his rights as an individual Between the interests of individuals it is an obligation of the State to secure justice.

(3) The State is under an obligation to protect and advance the moral, material, and cultural standards of its peoples, and at the same time to afford . . such facilities for education in all its forms as will give every individual the opportunity of attaining these standards.

(4) All who have been born in these territories or who live within their boundaries are entitled to equal standing before the law, and, subject to the law, to freedom of movement, speech, religion, and association, and to the same right to acquire and enjoy property. They are entitled to access to public services and institutions; to practise any trade, profession, or calling; to qualify themselves therefor by apprenticeship, public examination, or other test without distinction of race or colour; and to legal protection against the unjust denial of any of these rights .

(5) Membership of the State carries with it responsibilities and duties. The citizen is under an obligation to live by the rule of law, to defend the State if called upon to do so, and to uphold and abide by the principles and spirit of the Constitution

(6) The right to elect members of the Legislature is open to all who have attained statutory qualifications, and they will be registered on one common roll. The vote is not a natural right but a responsibility to be exercised for the common good"

Decisions taken with respect to the franchise, land tenure, and labour relations are summarized below:

The Franchise. The "Capricorn contract" called for a common electoral roll in each territory as "the only means of preserving harmony among the different races" At the same time, however, it rejected universal franchise and advocated the principle of multiple voting—i.e. that persons with special qualifications, such as education and income, should be eligible for more than one vote up to a maximum of six The statement said that "in the special circumstances of East and Central Africa, where there is no background of a long-established civic responsibility, universal suffrage would give rise to the danger of irresponsible politicians appealing to that section of the population which has yet to emerge from a communal tribal state, and being elected to the Legislature on grounds irrelevant to the common good"

Land Tenure. The "contract" declared that land should "not be reserved in perpetuity for members of one race to the exclusion of others." Subject to certain safeguards, all land now occupied by Europeans should gradually become available for purchase or lease to all races. Land occupied by Africans on a communal basis should be gradually sold or leased to individual Africans, and thereafter made open to transfer to persons of any race.

Labour Relations. Reforms in the field of labour relations should depend primarily on negotiations between workers and employers. If the State intervened, it should do so in such a way as to ensure that there was equality of opportunity in training and apprenticeship, that membership of trade unions was not denied to anyone on grounds of race, and that there was equal pay for equal work.

Language. It was unanimously agreed that English should be the only official language in all "Capricorn" territories

In a press statement after the ending of the Salima congress, Colonel Stirling announced that a campaign would be set on foot in all British Central and East African territories to obtain the support of public opinion and the political parties for the "Capricorn" programme. The Capricorn Africa Society had no intention of converting itself into a political party, but individual members were free to enter politics in their private capacities. An intensive campaign for acceptance of the "Capricorn" principles would be undertaken in Kenya as a first priority, in preparation for the European-Asian elections to be held in September next. Colonel Stirling thought there was a fair chance that the "Capricorn contract" might be adopted by the United Tanganyika Party, and believed that it would get increasing support in the Rhodesia-Nyasaland Federation.—(Times - Manchester Guardian - Economist - Federal Information Department, Salisbury)

B. UNITED KINGDOM. — Provisional Results of Census of Production for 1954. - Industrial Production Indices for 1954 and 1955.

Preliminary estimates of the results of the Census of Production for 1954, published on Dec. 31, 1955, showed that the value of the output of manufacturing industry in the United Kingdom was some 15 per cent greater than in 1951, of which rather less than 12 per cent was due to an increased volume of production and about 3 per cent to higher prices. These conclusions were based on census returns relating to about 70 per cent of all the larger establishments within the census field.

Indices of production (1948=100) prepared by the Central Statistical Office were as follows in the years 1954 and 1955:

1954

	Total All Industries	Mining and Quarrying	Manufacturing Industries	Building and Contracting	Gas, Electricity and Water
January ..	129	117	130	110	165
February	131	118	133	111	169
March .	133	117	136	112	156
April ..	125	107	128	109	139
May ..	134	117	139	112	134
June	128	107	133	112	127
July	118	89	121	111	121
August	114	93	116	111	122
September	134	110	139	116	136
October .	139	118	144	116*	144
November	140	118	144	116*	161
December	131	107	135	116*	164

*Average for fourth quarter.

1955

	Total All Industries	Mining and Quarrying	Manufacturing Industries	Building and Contracting	Gas, Electricity and Water
January	135	115	140	109*	177
February	140	117	145	109*	179
March .	143	119	148	109*	175
April	134	105	140	115*	145
May	140	109	146	115*	144
June .	137	106	144	115*	134
July	122	85	127	119*	121
August .	118	89	121	119*	123
September	140	110	146	119*	139
October	145	117	151	122*	155
November	146	119	152	122*	169
December	138	110	142	122*	174
Year 1955	137	108	142	116	153
Year 1954	130	110	133	115	145
Year 1953 (revised)	121	109	123	111	134

*Quarterly average.

Indices for the first four months of 1956 were:

January	February	March	April (provisional)
139	141	140	136

As shown by the above figures, the rate of industrial expansion declined in the second half of 1955 and the levelling-off continued in the first quarter of 1956. Production in 1955 rose by only 7 points, compared with 9 points in 1954. Production in March 1956 was 3 points lower than in March 1955, but March 1956 included the Easter holiday, which fell in April in 1955.—(Central Statistical Office - Board of Trade Journal)

(Prev. rep. 13856 C; 13555 A.)

A. UNITED KINGDOM - TRINIDAD. — Proposed Sale of Trinidad Oil Company to Texas Company. - Conditional Approval by British Government. - Parliamentary Debate. - Mr. Macmillan's Statements.

It was announced on June 6 that the Texas Company (an American oil company) had offered to purchase the whole of the issued ordinary share capital of the British-owned Trinidad Oil Company, consisting of 15,738,740 share units of 5s. nominal value each. The price offered by the Texas Company was 80s. 3d a share unit, compared with the Stock Exchange quotation of 40s. 3d. immediately before the offer was announced. Payment would be made in dollars, and the proposed transaction therefore involved the transfer of a dollar equivalent of about £63,000,000.

The Trinidad Oil Company Ltd. (registered in 1913 as Trinidad Leaseholds Ltd.) exploits extensive oil leases in Trinidad and operates a large refinery in the island. In addition, it has important interests (including an oil refinery) in Canada, and owns a 50 per cent interest in the Regent Oil Company Ltd., distributors of petroleum products with a chain of garages and filling stations throughout Britain, the other 50 per cent interest is owned by Caltex, a wholly-owned subsidiary of the California-Texas Corporation of the U S A In Trinidad itself, the company's refinery has for many years also processed a considerable tonnage of oil for the Texas Company

The proposed sale of the Trinidad Company's shares to U.S. interests caused widespread concern in Britain. On June 7 Mr. Harold Wilson (Lab) asked the Chancellor of the Exchequer whether, in view of the relationship between control over oil supplies and the maintenance of full employment, he would use his powers to prevent control of the Trinidad Company falling into foreign hands.

Mr. Macmillan, in reply, said that although the Government was naturally "concerned to ensure that the interests of Trinidad are fully safeguarded," it was at the same time "anxious not to put obstacles in the way of U.S. investment in appropriate cases" In answer to **Sir Beverley Baxter** (C.), who asserted that the proposed "sell-out to the American dollar" would have "a disastrous effect on the whole Caribbean," and to **Mr. James Griffiths** (Lab), who urged consultation with the Caribbean territories before consent was given to the deal, the Chancellor said that he was already in touch with the Colonial Secretary and the Governor of Trinidad. Replying to **Mr. Bellenger** (Lab), who asked whether the British Government's approval was necessary before contracts were exchanged, he pointed out that this would depend on the nature of the proposed deal Finally, in reply to **Mr. Gaitskell** (Leader of the Opposition), who urged the Chancellor to ask the House for the necessary powers to prevent the deal from going through, should he find that he did not already possess them, Mr. Macmillan said that the Government would decide on its action after it had learnt the attitude of the Trinidad Government and had considered the effect that the proposed sale would have on the economies of Trinidad and Britain.

Statement by Chairman of Trinidad Oil Company.

Discussions took place on June 8 between the Prime Minister and Mr. Macmillan; although no official statement was issued, it was understood that they centred on (*a*) the virtually unanimous demand by the Conservative 1922 Committee for Government intervention to stop the deal; (*b*) a statement on the position by Mr. S. J. Vos, chairman of the Trinidad Oil Company, who had conducted the negotiations on behalf of that company in New York. Mr. Vos issued the following statement on the same day (June 8):

"In view of the public interest which has been aroused by the offer of the Texas Company to purchase the ordinary stock of the Trinidad Oil Company, it is necessary to get the matter into proper perspective . . . The blunt truth of the position is that the Trinidad Oil Company has not the financial resources to maintain its position in an ever-expanding oil world.

"(1) Total world production of oil is 700,000,000 metric tons. Total production of Trinidad Oil is 3,484,000 metric tons, representing 0.5 per cent of world production. The total amount of the Trinidad Oil Company's oil production in Trinidad is 1,149,500 tons, representing 0 16 per cent of world production. Even if the potential of the area covered by the Trinidad Oil Company be included, the total amount of oil available over the next 20 years would not be significantly increased

"(2) The Trinidad Oil Company produces only 300-400 barrels of oil a day in Canada.

"(3) Consumption of petroleum products in the U.K. is 460,000 barrels a day. The Trinidad Oil Company's share of this total is only 24,500 barrels a day.

"(4) The Texas Company had already decided to build a refinery in Trinidad. If this had happened, the processing of 10,000 barrels a day, which has been part of the output of the Trinidad Oil Company's refinery for many years past, would in due course have ceased. This in itself would have seriously affected their refinery costs, and the company would not have been able to secure the essential products from that crude [oil] for its markets. It would therefore have been compelled to buy other crude [oil], in all probability for dollars, which would have been costly and would have involved losses on the sale of the products.

"(5) The Regent Oil Company's position involves the partners each putting in 50 per cent of the product. There are occasions, however, when the position must get out of balance, and here the Caltex Partners, through their vast resources and many refineries, are always in a position to give us the products we need and the quantity we must have.

"(6) The Trinidad Government need have no fears that the Texas Company will not continue to operate the refinery at full capacity, and with their larger markets in the South American continent and West Africa—where the Trinidad Oil Company have no business—full utilization, and indeed an expansion, of the refinery in Trinidad may be expected in the future

"(7) The Texas Company, with its huge financial resources, will be able to explore new fields in Trinidad, both on land and particularly in the marine areas, the latter operation alone would require an immense capital outlay

"(8) The Texas Company can be relied upon to carry out sound operating practice at all times, and must do so at the maximum economic rate if it is to make reasonable profits.

"(9) The Texas Company are well known for their industrial relations Here again the Trinidad Government can rest assured that this policy will be maintained, and that fair treatment for existing personnel will be accorded to every worker, with increased opportunities for all. Finally, the Texas Company may be relied upon to respect the rights of local labour and not to indulge in any form of racial discrimination

"The world-wide nationalism which insists upon domestic refineries makes it even more impossible for the Trinidad Oil Company to open up new markets A case in point is Eire, where the Government have insisted upon a refinery [see 14976 C] which will entail the loss of our distribution rights if we do not accede to their request The underlying fact is that cheap crude oil is not available to the Trinidad Oil Company, who have no Middle East crude [oil] and who are therefore dependent either on the Trinidad high-price crude or imported dollar crude As a comparison, the cost of Trinidad crude produced at the wellhead is approximately $1 50 per barrel, as against Middle East production costing on the same basis anything from 20 to 40 cents per barrel.

"Finally, it must not be forgotten that the American offer, if accepted, would mean an increase in our gold and dollar reserves by about $180,000,000, and is also in the best interests of Colonial development."

Statement by Chancellor of Exchequer.

The proposed transfer of the Trinidad Company's shares was the subject of further protests in the House of Commons on June 12, following Cabinet discussions earlier in the day.

Mr. Cooper (C) pointed out that the estimated annual loss to the sterling area if the transaction were allowed to go through would be "of the order of £2,000,000-£3,000,000," and asked the Chancellor to consider very carefully any scheme which "sought to nibble away our already slender reserves" **Mr. Harold Wilson** (Lab) asked Mr. Macmillan to bear in mind the alternative of making it possible for the Trinidad Company to pass into the control either of the Trinidad Government or of the British Petroleum Company **Mr. Stanley Evans** (Lab) described the Texas Oil Company as "the most volatile partner in Aramco" [the American-Arabian Oil Company], without whose money, he alleged, anti-British propaganda in the Middle East and the Persian Gulf could not have been financed He called for a full debate on the matter before the Government took a decision

Mr. Macmillan did not think a debate would serve any useful purpose until the Government had had time to consider the various issues involved. He promised to make a further statement as soon as the Government had reached a decision

On June 14 Mr. Macmillan announced that the Government had decided to permit the transfer of the Trinidad Oil Company's shares to the Texas Company, subject to certain specified conditions. The Chancellor's statement is given below (cross-headings inserted):

The Trinidad Company's Position. After stressing that the Government's assent would be required for the proposed transaction, Mr. Macmillan outlined the position of the Trinidad Oil Company as follows:

"The Trinidad Oil Company Ltd. has interests in a number of undertakings, of which the most important are the following. First, in Trinidad itself it has oil leases from which it produces just over 1,000,000 tons of oil a year, and a refinery which processes nearly 4,000,000 tons of crude oil a year, including some on behalf of the Texas Company. The products are distributed mainly in the Caribbean area and this country. The company has marketing subsidiaries in the Caribbean—in Jamaica, Puerto Rico, and the Dominican Republic. Elsewhere in the Caribbean the company markets on a 50-50 basis with Shell. It also holds one-third of the shares in Trinidad Northern Areas Ltd. This company engages in oil exploration, including marine drilling. The other shares are held equally by Shell and British Petroleum interests.

"In addition, the Trinidad Oil Company has a 50 per cent share in the Regent Oil Company Ltd., which at present distributes about 6 per cent of all petroleum products used in the United Kingdom. The other half is owned by Caltex (U.K.) Ltd., a wholly-owned subsidiary of the California-Texas Corporation, which in turn is owned as to 50 per cent by the Texas Company and as to 50 per cent by the Standard Oil Company of California.

" Finally, the Trinidad Oil Company owns 89 per cent of the shares in the Regent Refining (Canada) Company, which is concerned in refining and marketing petroleum products in Canada. This company's present production of crude oil from its concessions in Alberta is negligible.

" As the House will see, the crude oil production of the Trinidad Oil Company is very small—about one-sixth of one per cent of free world oil production. But it represents about one-third of the crude oil production of Trinidad, and with the refinery constitutes a considerable part of the oil industry there. The company have stated publicly that they have not the financial resources to maintain their position in an expanding oil world."

The Attitude of the Trinidad Government. After stressing that the British Government were concerned with the interests both of Trinidad and of the U.K., Mr. Macmillan said " We have been in close touch with the Government of Trinidad on the effect of the proposal on the interests of the island Prosperity in Trinidad is closely bound up with the oil industry. The Government of Trinidad have made it known that what they want to see is exploration intensified, existing oil resources exploited at the maximum economic rate, and the refinery operated at full economic capacity, and if possible expanded. At the same time they are concerned that the existing established practice in respect of industrial relations should be maintained, that existing personnel should be treated fairly, and that as many local men as possible should be trained for high positions. In view of the multi-racial character of the community, they are also concerned that there should be no racial discrimination in any of the company's plants or camps, and that the rights of local persons should be respected.

" Subject to safeguards on these matters, I am informed that general opinion in Trinidad is in favour of this transaction. In consequence, H M. Government are under an obligation not to let this deal go forward without ensuring that the conditions made by the Government of Trinidad are met. On the other hand, we must bear in mind that if we use our powers to prevent the transaction we run the risk of denying great material benefits to the island."

The Position of the United Kingdom. " I now come to the interests of the U.K ," the Chancellor continued. " First, I deal with the need to ensure our oil supplies and to safeguard our balance-of-payments position From what I have said about the production of the Trinidad Oil Company, it will be seen that the supplies which come to us from this source are very small indeed in relation to our total needs. Moreover, in time of war or national emergency the Governor of Trinidad has power . to pre-empt all oil works and products thereof, and, if necessary, to take entire charge of the works

" As regards the balance of payments, we should, if we permitted this transaction to take place, make it a condition that the marketing operations should be carried on under arrangements comparable with those which we already have with other American oil companies In this way any oil which comes to the sterling area would continue to be paid for in sterling ; at the same time dollars would have to be found for profits remitted to the parent company in the U S.A , while we should not receive any profits earned and remitted by the Canadian undertaking.

" For many years to come, however, all this would be more than counterbalanced by the continued investment which the parent company would have to make both in the U K. and in Trinidad, while at the same time, of course, we should benefit from the dollars received in the purchase price. We should, of course, lose some tax revenue, but this can hardly be a determining factor "

Arguments for Sanctioning the Proposed Transfer. " If, on the other hand, we were to refuse permission for the transfer," Mr. Macmillan explained, " we should be under a moral obligation to see that the necessary capital was forthcoming to expand the undertaking. The provision of this capital from private sources, even if it could be obtained, would represent a considerable burden on the resources of the U.K. ; and since much of the expenditure would be oversea, an additional strain on the balance of payments The same would apply if the capital came from public funds, and I do not think that this could be justified in the present circumstances

" It has been suggested by some that Shell or British Petroleum might be interested in making an alternative offer. As I have explained, the Trinidad Oil Company has a variety of interests, including producing, refining, and marketing Inasmuch as many of these duplicate undertakings owned by Shell and British Petroleum, it is obvious that the purchase of the Trinidad Oil Company's undertaking as a whole would have no attraction for them.

" Thus, if this transaction is considered by itself, the arguments are clearly in favour of our giving permission for it to go through, provided of course that the very important conditions mentioned, both those concerning Trinidad and those concerning the U.K., are met.

" There are, however, wider considerations. This country is dependent for almost all its raw materials, including oil, on oversea sources. It is also—the two things go hand in hand—a major oversea investor. By our investment abroad we have secured for ourselves access to many of the supplies on which our livelihood depends. This process brings great benefit both to ourselves and to the peoples of the countries where the resources lie waiting to be developed. It does, however, require the willing co-operation of those peoples, and it must be a two-way business. British enterprise has built up and is continuing to build up valuable assets oversea, not only in the sterling Commonwealth but also in North America. We have also benefited, not only in the U.K. but in many parts of the Commonwealth, from U.S. enterprise and capital. If we approach this deal from too narrow a point of view, we not only take upon ourselves the burdens I have mentioned but also expose ourselves to the risk of discrimination against us in other countries."

Conditions of Approval. " For these reasons," the Chancellor concluded, " H M Government have decided that they are in principle willing to give permission for this transaction to go through, subject of course to the ordinary law, both here and in Trinidad, being complied with, but more particularly subject to the following conditions and undertakings

" First, that the following specific conditions are complied with in any rearrangement of the present company structure :

(*a*) The marketing operations are carried on under arrangements satisfactory to H M Government, on a basis comparable with those already existing with other American oil companies ;

(*b*) The production and refining operations in Trinidad are carried on by a company registered in Trinidad

" Second, that H.M. Government and the Government of Trinidad receive satisfactory undertakings on the following matters :

(*a*) The Trinidad refinery is operated at full economic capacity and if possible expanded ,

(*b*) Exploration in Trinidad is intensified

(*c*) Existing oil resources in Trinidad are exploited on the basis of sound operating practice at the maximum economic rate ,

(*d*) Industrial relations are maintained on the basis of existing and established practice ,

(*e*) There is fair treatment of existing personnel, and training of as many local men as possible to take high positions in the company ;

(*f*) There is no racial discrimination in any of the company's plant or camps, and the rights of local persons are respected.

" In view of the complicated nature of the interests involved, which cannot be given in detail in a short statement, the Government will lay a White Paper [see below] setting out the factual basis on which their decision has been reached "

The Chancellor's statement, however, failed to satisfy those M.P.s of both parties who had previously expressed opposition to the deal.

Mr. Harold Wilson asserted that " the real bait in the transaction was the very big prospect of expansion in Canada," as well as the Texas Company's wish to increase its hold on the U.K. market He demanded an assurance that the Government would not implement its decision until Parliament had debated the White Paper

Mr. Macmillan, in reply, said he did not think any large development of the Trinidad Company's Canadian interests was possible, since only about one-twelfth of the $100,000,000 spent by British oil interests in Canada had been spent by the Trinidad Company, by far the greater part having been found by Shell and B.P. In any case, the Texas Company would have no difficulty in exploring for oil in Canada on its own account The chance of acquiring the remaining half-share in the Regent Oil Company might, however, have proved attractive to the Texas Company , in this connexion the Chancellor explained that the only British interests which might have bought it were the Shell and B.P. companies. As these companies already had a very highly-developed distributing organization in the U K., there would have been no point in their acquiring an interest in the Regent Company, which at present handled only six per cent of the trade

Other speakers included **Sir Beverley Baxter,** who quoted a friend in the Canadian Cabinet as expressing the fear that the " monopolistic " policy of the big U S oil groups might " create a stranglehold " on Commonwealth industrial development, and **Mr. Aneurin Bevan** (Lab), who welcomed the condition attached to the transfer that there should be no racial discrimination. **Mr. Harold Wilson** and **Mr. James Griffiths** (Lab) both asked the Chancellor to make it clear to the prospective buyers and sellers that the Government's decision was subject to the House's approval. After Mr Macmillan had replied that had had no contact on the matter with the Texas Company, but proposed to send a copy of his statement to the Trinidad Company, **Mr. Gaitskell** called for an early debate on the matter.

Publication of White Paper.

The White Paper (Cmd. 9790) referred to by Mr. Macmillan was published on June 18 and is summarized below ·

The Trinidad Oil Company's Undertaking.

Operations in Trinidad and the Caribbean. The Trinidad Oil Company (" Trinoil ") directly controlled about 135,000 acres in Trinidad, and also held a one-third interest in Trinidad Northern Areas Ltd , the other two-thirds being held by subsidiaries of the Royal Dutch-Shell and British Petroleum groups Trinidad Northern Areas Ltd. held licences and leases covering 35,000 acres in Trinidad itself and 231,000 acres offshore ; from these " marine " areas small quantities of oil had recently been obtained

The 4,000,000 tons of crude oil processed annually at the "Trinoil " refinery at Pointe-à-Pierre included about 500,000 tons processed for other companies, principally the Texas Company. About half of the 4,000,000 tons was produced in Trinidad (mainly from " Trinoil " wells), the remainder being obtained from South America (mainly Venezuela) under a contract with the Creole Petroleum Corporation, a subsidiary of the Standard Oil Company of New Jersey.

" Trinoil " distributed refined products through wholly-owned subsidiaries in Jamaica, Puerto Rico, and the Dominican Republic ; elsewhere in the Caribbean it distributed (in conjunction with Shell) through Shell-Regent companies.

"Trinoil" was responsible for about one-third of Trinidad's crude oil production and about two-thirds of the 5,500,000 tons treated in the island's refineries In 1955 it provided by way of royalties and income-tax about 19 per cent of the Trinidad Government's revenue, and about half the revenue provided by the oil industry as a whole. The company employed about 8,000 staff, or about half the total number employed in the island's oil industry and about 3 5 per cent of all persons employed in Trinidad.

For the year ended June 30, 1955, the "Trinoil" group made a profit of £2,312,682, after providing £1,849,448 for depreciation, £2,480,439 for taxation, and £42,459 for contingencies. The parent company's share of the group's net profit was £1,937,559, of which dividends absorbed £710,429 and £1,000,000 was placed to reserve. The parent company's current assets stood at £10,793,735, and interests in subsidiaries and investments at £8,841,437.

Operations in the United Kingdom. The Regent Oil Company, in which "Trinoil" held a half interest (see above), supplied about six per cent of the 23,250,000 tons of petroleum fuels consumed in the U K. in 1955, the company's proportion for light oils (motor fuel, etc) being, however, much higher than its share in the heavy oil market Regent was thus the third largest distributor after Shell-Mex and B.P , and the Esso Petroleum Co. (wholly-owned subsidiaries respectively of the Royal Dutch-Shell, British Petroleum and Eagle groups, and of Standard Oil of New Jersey)

Operations in Ireland. The Regent Company also owned a subsidiary, Caltex (Ireland) Ltd., which distributed petroleum fuels in the Irish Republic.

Operations in Canada. "Trinoil" owned 89 per cent of the shares of the Regent Refining (Canada) Company, which owned a refinery near Toronto which processed about 750,000 tons of crude oil annually and was being expanded to process 1,000,000 tons. Regent (Canada) also had a marketing organization in Ontario distributing to nearly 500 service stations, and supplied about 1½ per cent of current Canadian consumption of petroleum products. Furthermore, the company owned a number of oil leases in Alberta producing about 15,000 tons of oil annually, compared with the total Canadian production of crude oil estimated at about 17,000,000 tons a year.

Tankers. "Trinoil" owned, in addition, the Regent Petroleum Tankship Co. Ltd , owning two tankers totalling 26,000 deadweight tons, and on long-term charter six tankers totalling 85,600 deadweight tons. These tankers represented 1 5 per cent of the total U.K. tanker fleet of 7,479,000 deadweight tons, and 0.3 per cent of the free world tanker fleet of 41,300,000 deadweight tons.

Free World Production and Refining Capacity.

Free world production of crude oil in 1955 totalled 707,000,000 tons, comprising about 365,000,000 tons produced in the U.S A. and about 342,000,000 tons produced elsewhere

Refining capacity in the free world in 1955 totalled about 750,000,000 tons (425,000,000 tons in the U.S A. and 325,000,000 tons elsewhere, including about 29,000,000 tons in the U K.).

The Position regarding the Proposed Transfer.

The Texas Company had intimated that it desired, if it acquired control of the Trinidad Oil Company, to transfer that company's domicile from the United Kingdom The position would be affected by the following legal requirements

(1) The oil leases and licences held by the Trinidad Oil Company and its affiliated company, Trinidad Northern Areas Ltd., contained provisions (*a*) requiring the holder not to assign the rights without the consent of the Governor of Trinidad, and only to assign them to British subjects or to companies incorporated in the Colony or in some other British territory , (*b*) to inform the Governor and obtain his consent if the holders of the leases ceased to be British subjects or companies incorporated as above. Thus the assignment of leases or licences, or the issue of new ones, would require the consent of the Governor of Trinidad.

(2) Under the Exchange Control Act, Treasury permission was required for the transfer of any securities by U.K. residents to persons resident outside the sterling area, and for any action whereby a company controlled by U.K. residents passed out of such control.

(3) Applications for the acquisition of control of a U.K. company by persons resident outside the sterling area were considered on the same basis as applications for investment in the U.K by non-residents. Provided that the terms of payment were satisfactory, it was the practice not to refuse permission unless the transfer of ownership would be clearly disadvantageous to the U K. economy, or to the economy of some other country in the sterling area This meant that permission would be given where the proposed investment or acquisition was expected to make a significant contribution to the promotion of exports, the saving of imports, the introduction of new techniques, and, in the case of companies operating in a sterling area country outside the U K., the economic development of the country concerned.

The Colonies, whose exchange control arrangements were broadly modelled on those of the U.K., applied similar criteria in judging applications in their territories. Under this policy a considerable amount of foreign (mainly U.S) investment had taken place in the U.K. and the Colonies during recent years.

(4) Under the Income Tax Act it was also necessary for bodies corporate resident in the U.K to obtain Treasury consent before ceasing to be so resident, or transferring their trade or businesses to persons not so resident. In considering applications for transfer of residence it was the practice to weigh the prospective loss of revenue against other factors in the case.

After explaining the specific conditions and undertakings imposed by the Government [see above], the White Paper stated that the Government would seek an early opportunity to hold discussions with the Trinidad Government and the Texas Company regarding the precise form which the required undertakings should assume

Memorandum by Trinidad Oil Company.

A memorandum explaining the Trinidad Company's difficulties was sent by the company to the Treasury on June 5, and is summarized below. This was the first notification of the proposed transaction which the Government had received.

After setting out the Trinidad Oil Company's present activities and financial position, the memorandum stressed the following points .

(1) "Trinoil" had no cheap source of crude oil (such as oil from the Middle East) to support its business, although its main market (the U K.) was now almost wholly based on Middle East crude oil supplies.

(2) The company was therefore at a disadvantage, not only *vis-à-vis* its competitors but also in maintaining its position with its partner, Caltex

(3) "Trinoil's" crude oil production in Trinidad represented less than one-third of the capacity of its refinery (which had to be large enough to compete with other Caribbean refineries)

(4) While "Trinoil" had secured the best possible terms for buying the balance of its crude requirements, it was "still very vulnerable."

(5) The building of refineries in the U.K. was placing the Regent Oil Company at a serious disadvantage as compared with its competitors, and as a result Caltex had now decided to erect a large refinery in the U.K. as early as possible

(6) The size of the investment required precluded "Trinoil" from participating with Caltex in this project, and this would inevitably weaken "Trinoil's" standing in the partnership

(7) It was now necessary for the Regent Company to enter the fuel oil and aviation spirit markets, and this entailed capital investment "far beyond the ability of Trinoil to contemplate."

(8) Under present conditions, and in view of the "fundamental absence" of cheap oil resources, it would be impossible for "Trinoil" to procure further finance, since marketing profits did not promise proper returns on capital investment.

Having regard to these considerations, the Board of "Trinoil" had decided to try to come to a mutually satisfactory arrangement with the company's partners The Texas Company—which was already closely concerned with the "Trinoil" refinery in Trinidad, as well as being vitally interested through Caltex in the Regent Oil Co Ltd —had decided that it would be well advised to acquire the "Trinoil" group as a whole, and had submitted an offer to purchase the whole of the company's capital stock at a satisfactory price.

The memorandum added: "As far as the Colony of Trinidad is concerned, it will be appreciated that much advantage could accrue through the producing and refining activities at present being undertaken there by "Trinoil" being taken over by a company such as the Texas Company, who, having regard to their Western Hemisphere markets, are in a good position to develop these local resources Under present conditions the economy of Trinidad, which is primarily dependent on oil and on "Trinoil" in particular, is very vulnerable to the competitive pressure from Middle East crude [oil] in the markets."

Parliamentary Debate on White Paper.

The White Paper was debated by the House of Commons on June 20.

Mr. Macmillan said that although his first reactions to the Trinidad Company's proposals had been "regret and even dismay," it had become clear when he looked into the possible alternatives that the Government had no option but to consent in principle The conditions on which consent was granted, however, must guarantee two vital interests: (1) Britain's overriding interest in strengthening sterling; (2) the life and prosperity of the people of Trinidad and the general interest of the Caribbean peoples. If he had considered that the transaction ought to be prevented in the broadest national and imperial interests, he would not have hesitated to use the Treasury's powers under the Exchange Control Act.

Trinidad's oil supplies and reserves, the Chancellor continued, were not important in terms of oil production and had no strategic and only limited economic significance They had, however, great value to the Trinidad population, to whom it was supremely important that capital should be available for development. If the sale went through on the conditions set out, the Trinidad Government would welcome the transfer and have general opinion behind it, since the deal would ensure the backing and wealth of a powerful group in place of an organization without the finance to develop its resources fully. "Unless some direct and vital British interest were involved," Mr. Macmillan declared, "we should have no right to refuse a transaction which was clearly in the interests of Trinidad so long as it was subject to proper conditions and favoured by the Government of Trinidad. To do so would be in the spirit of the old colonialism, and be contrary to the practice of the Empire and Commonwealth today."

With regard to the high price to be paid by the Texas Company, which had caused some people to wonder whether there was not "some hidden asset or mysterious undisclosed El Dorado," Mr. Macmillan explained that the main hope for new production in Trinidad was in the unexplored areas, two-thirds of which were in the hands of Shell and B.P. It appeared, therefore, that one object of

the bid was the development of the Texas Company's business in the British market through "Trinoil's" moiety holding in the Regent Company, and there was no harm in this unless one opposed all competition in petroleum distribution. After rejecting as "dangerous" the suggestion that the British Government should put up the money and enter the business on a large scale, he disclosed that he had himself suggested to the chairmen of Shell and British Petroleum that they might entertain taking over "Trinoil's" business; however, they had not been interested.

Dealing with the protection of sterling, the Chancellor said that the Government must insist on market operations being carried out in the ways already agreed with other U.S companies. It was true that Britain would have to provide dollars for dividends, but this was nothing like so important as marketing conditions In this connexion he mentioned that in 1955 U.S. oil companies had spent £23,000,000 in Britain on equipment, apart from "invisible" payments on tanker freights. The second condition—that production and refining in Trinidad must be done by a company registered there—would mean some tax loss to Britain, but economic and social advantage to Trinidad. "With these provisos," he declared, "I feel that the economic and financial advantages are decisively in favour of acceptance. Any dollar loss in dividends or sterling loss in taxation would be more than recouped by the dollar proceeds of capital investment by the new owners in the sterling area."

In conclusion, Mr. Macmillan dealt with the political and economic aspects, stressing that Britain's policy must be to welcome foreign investment wherever it brought no disadvantage to the economy of the U.K or of a sterling area country In the past, foreign—and especially U S.—investment had provided oil refineries and equipment and benefited the motor, tractor, and chemical industries, while on the other hand Britain had made large capital investments in Canada and the United States. During the past four years British long-term lending in the sterling Commonwealth had been at the rate of about £100,000,000 a year, which was unrivalled in any country in the world. Investment on this scale, however, had caused a "considerable strain" on British resources and on the balance of payments, and it would be a "serious blow" to Britain's interests if she were to "set up a bar to anything like a two-way traffic in investment"

Mr. Harold Wilson, the chief Opposition speaker, described the deal as "a regrettable transaction which has caused dismay and despondency throughout the country," and asserted that it was clearly shown that "after 4½ years of Conservative administration Britain has not the capital for an essential project of Commonwealth development" Declaring that the Government had "had a pistol held at its head by slick oil financiers," he argued that the Trinidad Company should have approached the Chancellor at a much earlier point in the negotiations so that "a coherent line could have been worked out" The real reason for the deal, he said, was the fact that petrol sales in Britain had risen by 11 per cent in 1955, against only six per cent in the U S A. The entry into the British market of the Texas Company—which, Mr Wilson alleged, had been denounced by the U.S Government for restrictive practices and illegitimate pressure on garages—would only add to "the tangled web of restrictive practices in the oil industry" The Opposition believed that there had been no proper consideration of alternatives owing to the speed with which the transaction had been rushed through by interested parties. The Government should have provided the capital for the Trinidad Company to finance necessary developments, either by taking shares (as Mr Winston Churchill, when First Lord of the Admiralty before the First World War, had taken shares in the Anglo-Persian Oil Company to secure strategic oil supplies) or by some other method.

After further debate, an Opposition motion for the adjournment of the House as a mark of disapproval of the Government's policy was defeated by 315 votes to 247—a Government majority of 68.

Trinidad Government Delegation's Discussions with British Treasury, Texas Company and Trinidad Oil Company.

A Trinidad delegation of six members, headed by the Minister of Commerce (Mr. Albert Gomez), and including the Ministers of Agriculture and Health and the acting Attorney-General, arrived in London on June 28 for talks with representatives of the Treasury, the Texas Company, and the Trinidad Oil Company. It was announced by the Colonial Office on July 5 that the talks had been adjourned until July 26, at the request of the Texas Oil Company, to enable the latter to carry out further investigations in Trinidad in connexion with the conditions laid down in the White Paper. The Trinidad delegation returned to Port of Spain on the same day (July 5) while these investigations were being undertaken by the Texas Oil Company. (White Paper, Cmd. 9790 - Times - Daily Telegraph - Manchester Guardian - Economist - Financial Times)

A. SIERRA LEONE. — New Governor.

Mr. Maurice Dorman, Chief Secretary of Trinidad, was appointed Governor of Sierra Leone on July 11 in succession to Sir Robert Hall, who had resigned through ill-health.—(Times)

(Prev. rep. 13025 C.)

B. NETHERLANDS.—Denial of Foreign Press Allegations of Constitutional Crisis and Rift in Royal Family.

Reports in certain foreign newspapers that a crisis had arisen in the Dutch Royal Family owing to the influence allegedly exercised over Queen Juliana by a faith-healer were emphatically denied on July 15 by the Prime Minister of the Netherlands, Dr. Drees, and also by Government spokesmen. Categorical denials were also made of rumours, published in certain sections of the foreign Press, that Queen Juliana was seeking a divorce, contemplating abdication, or had caused a constitutional crisis through her alleged association with the faith-healer.

The allegations of a rift between Queen Juliana and Prince Bernhard had first been made by a West German weekly magazine, *Der Spiegel*, and were repeated by a number of foreign newspapers. These reports said that a Dutch faith-healer, Miss Greet Hofmans (61), had been consulted by Queen Juliana in connexion with the partial blindness of the nine-year-old Princess Maria Christina (Marijke), the fourth and youngest daughter of the Queen and Prince Bernhard, and that Miss Hofmans had gained an ascendancy over the Queen which had resulted in a rift between the Queen and Prince Bernhard and also between the Queen and the Government. According to these reports, Miss Hofmans had first been introduced to the Queen in 1948 by Prince Bernhard after a medical operation had failed to improve Princess Marijke's eyesight.

An official statement was issued to foreign correspondents in The Hague on June 14 emphatically denying "all rumours which have appeared in the foreign Press concerning the Queen and possible divorce proceedings planned or initiated." At a press conference on the following day, Dr. Drees reiterated that there was no foundation whatever for the rumours that the Queen was contemplating a divorce or that her association with Miss Hofmans had led to a constitutional crisis. He stressed that the Queen had at all times acted in a constitutional manner; that the Government would have resigned had the contrary been the case, and that there was "no question of abdication, nor any truth in reports of differences between the Queen and her Ministers."

Strong criticisms of the sensationalism of foreign press reports about the Dutch Royal Family, and the unsubstantiated allegations contained therein, were made by Dutch newspapers of all shades of opinion. It was universally pointed out that the Queen and the Royal Family had the right to privacy in their own affairs, that intrusions into the life of the Royal Family were unknown in the Netherlands Press; that the reports in *Der Spiegel* and other foreign newspapers, apart from being sensationalized and unverified, were in the worst possible taste, and that the Queen's action in enlisting the help of a faith-healer in an attempt to cure her daughter after medical science had failed was no more than any mother might have done in similar circumstances. Particular objection was taken to the article in *Der Spiegel* and to the way in which certain British popular newspapers had reported on the alleged rift in the Royal Family.

A committee of Dutch newspaper editors, meeting at Utrecht on June 21 under the chairmanship of the editor of the *Nieuwe Rotterdamse Courant* (Mr. M. J. Rooy), unanimously decided that the Netherlands Federation of Journalists should send a letter to foreign press organizations—such as the National Union of Journalists in Britain, the American Society of Newspaper Editors, and the International Press Institute in Zurich—protesting at the sensationalized and unverified character of the reports in question, and pointing out that such treatment was "contrary to the high concept of journalistic responsibility held in the Netherlands."

The following joint statement was issued by Queen Juliana and Prince Bernhard on June 29: "The way in which newspapers abroad have considered it permissible publicly to report on our family life, and relations in our immediate surroundings, has disappointed and saddened us both. We consider an investigation into the circumstances which have led to this desirable. We are happy to have found Professor L. J. M. Beel, Professor P. S. Gerbrandy, and Jonkheer A. W. L. Tjarda van Starkenborgh Stachouwer prepared to conduct this investigation and to counsel us."

It was stated in The Hague that the three members of the committee —all eminent "elder statesmen"—had relinquished their public functions in order to carry out this investigation Professor Beel, a leader of the Catholic People's Party, was Vice-Premier and Minister of Home Affairs before the recent general election, Professor Gerbrandy was Prime Minister of the Government-in-exile established in London during the war; and Jonkheer Tjarda van Starkenborgh Stachouwer had lately resigned as Netherlands representative on the North Atlantic Council.

An official statement was issued on July 12 refuting foreign press reports that Princess Marijke was blind. It stated that the Princess had been born with a clouding of the lenses of both eyes; that it had, however, been possible through medical means to restore as much as possible the sight of one of her eyes; and that she was attending school and pursuing her normal studies.—(Netherlands News Agency - Algemeen Handelsblad, Amsterdam - Nieuwe Rotterdamse Courant)

A. NEW ZEALAND. — Review of Immigration Policy. - Immigration Figures, 1952-1956.

The New Zealand Minister of Immigration, Mr. J R. Hanan, announced on June 8 that the Government had arranged for a review of immigration policy to be carried out by the Immigration Advisory Council, and that the Council had been asked to consider both the long-term beneficial effects of immigration and the short-term inflationary effects.

Mr. Hanan pointed out that the short-term inflationary effect of the increased demand for consumer goods had been offset by the fact that immigration had enabled New Zealand to undertake a number of essential works which would not otherwise have been possible because of the labour shortage The Government had also recognized the very beneficial long-term effects of immigration, but the correction of inflationary trends was one of the most important present tasks of the Government, and this had made some review of the various aspects of immigration an urgent task.

The Minister added that there would be no immediate change in the pattern of immigration, as New Zealand had accepted commitments under the free passage scheme from the United Kingdom for approximately 5,000 persons. No changes were likely in the policy regarding the acceptance of unmarried immigrants, the largest source of immigration. There had, however, been an increase in the number of married immigrants in recent years, most of whom had been nominated and guaranteed housing accommodation by New Zealand sponsors, and the consequent pressure on housing accommodation and finance was a matter of some concern

It was announced on June 25 that the N.Z. Government had adopted a recommendation by the Immigration Advisory Council to reduce the number of Government-assisted immigrants by restricting the categories of married immigrants to building tradesmen, farm workers, and seamen who were under 45 years of age and who had not more than two children. No changes were recommended in the number of single immigrants to be assisted. The tightened conditions for married people (which came into force on July 1) limited the number of assisted immigrants to 5,000 a year.

Immigration figures, and other recent developments in New Zealand's immigration policy, are summarized below under cross-headings.

Immigration Statistics. Nearly 120,000 immigrants entered New Zealand between 1947 and 1956, of whom approximately 100,000 were British, 14,000 Dutch, and 4,500 displaced persons from various European countries. Of the 41,000 assisted migrants, 31,000 came from the United Kingdom The net migration gain (i e immigration less emigration) over the 10 years since the end of the war was 111,000. In the year ended March 31, 1955, the total net migration gain was 11,442, compared with 10,441 in 1954-55, 17,848 in 1953-54, and 22,700 in the year 1952-53—the last figure being the highest since the beginning of the century.

German and Austrian Immigrants. Mr Hanan announced on Nov. 9, 1955, that New Zealand's target of 15,000 immigrants for the current year (i.e. April 1, 1955, to March 31, 1956) would not be reached, and that the total intake would probably be between 10,000 and 11,000. As a result of the high rate of employment in the U K there had been some difficulty in obtaining suitable immigrants from Britain, while prosperous conditions in the Netherlands had tended to slow down the flow of migrants from that country For these reasons the Government had arranged, with the co-operation of the International Committee for European Migration, for the selection of 1,500 single persons from Germany and Austria, it being hoped to obtain 500 women and 250 men from each country Mr Hanan emphasized, however, that "it was the policy of the N.Z Government to draw migrants from the United Kingdom," and that over the past five years the proportion of British to other new settlers had been four to one.

Netherlands Immigrants. Details of draft terms for a new immigration agreement between the Netherlands and New Zealand, aimed at bringing immigration requirements into line with present-day conditions, were disclosed by Dr B W. Haveman (the Dutch Commissioner for Immigration, then visiting New Zealand) at Auckland on April 29. The two groups of migrants provided for were (*a*) single men and women up to the age of 35, whose fares would be subsidized by the two Governments jointly; and (*b*) families, and married couples up to 45, who would be guaranteed work and accommodation and would be sponsored by New Zealand, but whose fares would be subsidized by the Netherlands Government alone

Danish and Swiss Immigrants. Arrangements were announced on May 11 for the selection of Danish and Swiss migrants under the Assisted Passage Scheme. Single persons aged 18 to 45 years would be recruited, the men to undertake employment in the building trade, engineering, railways, and hydro-electric development works, and the women in hospitals and other essential employment Applications would be dealt with in London, and Selection Officers would visit Denmark and Switzerland periodically to choose suitable applicants. Not more than 100 or 200 immigrants were expected each year from either country

The N.Z. Government announced on March 7, 1955, that it had decided to join the International Committee for European Migration. (Directorate of Information Services, Wellington)
(Prev. rep. Immigration, 14066 C.)

B. UNITED STATES. — Supreme Court Decision on Security Dismissals.

The U.S. Supreme Court ruled on June 11, by six votes to three, that a presidential Executive Order of 1953 giving heads of U.S. Government agencies the right summarily to suspend or dismiss public servants regarded as "security risks" (see 12902 B) went beyond the powers of the President to make such an Order, which had been granted to him by an Act of Congress in 1950.

The case (*Cole v. Young*) concerned a food and drug inspector (Mr. Cole) who had been summarily suspended in 1953, and later dismissed, by the Department of Health, Education and Welfare on the grounds that he had associated with persons "reliably reported to be Communists" and had been connected with the Nature Friends of America, an organization which had been designated as subversive by the Attorney General.

The Presidential Order of 1953 stated that national security required that all Government employees should be of "complete and unswerving loyalty," and gave heads of Government agencies powers summarily to dismiss or suspend employees if it was determined that their employment was "not clearly consistent with the interests of national security." The Order, applying to all Government agencies, had been made pursuant to the 1950 Act, which had expressly given such powers to heads of the Departments of State, Commerce, Justice, Defence, the Army, Navy and Air Force, the Coast Guard, the Atomic Energy Commission, the National Security Resources Board, and the National Advisory Committee for Aeronautics The Act had also authorized the extension of these powers "to such other departments and agencies of the Government as the President may from time to time deem necessary in the best interests of national security."

The majority judgment of the Supreme Court, delivered by Justice Harlan (with the concurrence of Chief Justice Warren and Justices Black, Frankfurter, Douglas, and Burton), pointed out that the 11 agencies enumerated in the 1950 Act were all "sensitive" agencies dealing with international relations, internal security, defence, and the stockpiling of strategic materials; from this it concluded that the intentions of Congress had been concerned only with "sensitive" Government positions through which the national security might be more or less directly imperilled. That being so, the Court found that the President's extension of the powers prescribed by the Act to cover all Government posts, including those not affecting national security, was clearly outside the spirit of the legislation, and the dismissal of a food inspector was therefore not authorized by the Act.

A dissenting minority judgment by Justices Clark, Reed, and Minton found that there had been no intention by the legislature to limit the application of the 1950 Act, and described the majority judgment as having "stricken down the most effective weapon against subversive activity available to the Government"

In consequence of the Supreme Court's judgment, the U.S. Attorney General (Mr. Brownell) ordered on June 15 the immediate reinstatement of 17 employees in "non-sensitive" posts who had been suspended under the provisions of the Executive Order. Mr. Brownell also ordered that, pending further study of the question, no removal proceedings were to be begun against any other Government servant in a "non-sensitive" position. (New York Times) **(Prev. rep. 12902 B.)**

C. IRISH REPUBLIC. — £12,000,000 Oil Refinery.

The Minister for Commerce and Industry (Mr. Norton) announced on July 5 that he had accepted a joint proposal by three oil companies—the California Texas Corporation, the Esso Petroleum Co. Ltd, and Shell-Mex and B.P. Ltd.—for the establishment of an oil refinery at Whitegate, County Cork, with a capital of £12,000,000—the biggest single private investment ever made in the Irish Republic.

Mr. Norton stated that the refinery would supply the Republic's entire needs for motor spirit, automotive and industrial diesel oils, gas oils, and fuel oils, and would have a capacity of 1,600,000 tons of crude oil a year or 1,500,000 tons of finished products. It was expected to be in operation by 1959, and to give permanent employment to 400 men.
(Irish Times, Dublin)

D. SOVIET UNION. — Recognition of Moroccan and Tunisian Sovereignty.

The Tass Agency announced on June 15 that the Soviet Government had recognized the independence of Morocco and Tunisia, and that Marshal Bulganin had sent letters to the Prime Ministers of the two countries (respectively Si Bekkai and M. Habib Bourguiba) informing them that the U.S.S.R. was willing to exchange diplomatic representatives.

JULY 14—21, 1956

A. UNITED KINGDOM. — Reductions in Government Expenditure. - Chancellor of Exchequer's Statements on Economic Situation. - Call for Price Stability. - Prime Minister's Discussions with T.U.C., F.B.I., British Employers' Confederation, and Nationalized Industries. - T.U.C. Memorandum on Economic Situation. - "Pegging" of Gas Prices, Rail Fares and Freights, and Postal Charges. - Appeal for Price Restraint by Leaders of Industry. - Sir Anthony Eden's Warning of Economic "Battle of Britain." - Maintenance of External Value of Sterling.

The Chancellor of the Exchequer, Mr. Harold Macmillan, informed the House of Commons on June 26 that decisions had been taken to effect interim savings of £76,000,000 in Government spending in the current year, towards the total of £100,000,000 forecast in his Budget speech. Of this total, £36,500,000 was on the defence programme, £14,000,000 on defence expenditure by Civil Departments, and £25,500,000 on other Civil Estimates.

Of the defence savings about £11,000,000 was on the Navy Estimates, nearly £17,000,000 on the Army Estimates, and about £8,750,000 on the Air Estimates. In each case the main savings arose from abandoning or deferring orders which would otherwise have been placed, from increasing the use of existing stocks, and from expediting the disposal of surplus stocks. These savings, effected within two months of the Budget, represented "good husbandry" by the Service Departments and did not reflect "any change in the size or shape of our fighting forces as a result of the review of our defence policy which . . . the Prime Minister set in hand last April." Any major decisions in this field, Mr. Macmillan added, would have to be taken after consultation with the Commonwealth countries and Britain's allies.

The main savings on the defence expenditure of Civil Departments arose from curtailing purchases of mobilization equipment (£2,500,000), food stocks (£8,000,000), and equipment for oil storage and distribution (£2,000,000). On the other Civil Estimates, the reductions in the bread and milk subsidies announced in February and in the Budget left a net saving of £12,500,000 after deducting the resulting extra cost of school and welfare meals (£642,000), the extra cost of the farm prices review (£20,900,000), and the increases in family allowances (£6,500,000). A number of other miscellaneous savings through administrative economies amounted to £13,000,000. Among these were an increase by 1d. in the charge for school meals from next September "so as to cover the cost of the food supplied, in accordance with the policy of successive Governments," and a slowing-down of capital expenditure on the school meals service, the total savings under this head being £2,250,000.

Revised Civil Estimates embodying the Government's decisions, the Chancellor added, would be presented in the first week of July, except where the savings were small in relation to the totals of the existing Estimates The savings, however, took no account of additional necessary expenditure not provided for in the published Estimates, for which Supplementary Estimates would be presented in the usual way. On the other hand, the present savings did not take into account under-spendings on the Estimates during the year, apart from those deliberately planned

Fuller details of the proposed economies were given in a statement circulated by Mr. Macmillan on the same date, some of the principal items being as follows :

Royal Navy. £3,100,000 from the run-down of stores and oil fuel stocks and the quicker disposal of surpluses ; £2,980,000 from a re-phasing of the aircraft programme and cuts in machinery production ; £2,080,000 from the run-down of armaments stores and cuts in ammunition production ; £1,150,000 from speedier sales of property , and £1,000,000 from manpower adjustments.

Army. £11,000,000 from increased use of reserves for maintenance, disposal of surplus stocks, and savings on the production programme , £3,500,000 from the reduction of stocks , £1,500,000 from a review of the building programme , and £700,000 from cuts in Army expenditure in Germany.

R.A.F. £4,620,000 from the accelerated disposal of aircraft and stores and the cancellation of projects ; £2,050,000 from adjustments of purchases due partly to the run-down of stocks ; £1,070,000 from a review of the works programme , and £1,000,000 from manpower adjustments.

Defence Expenditure by Civil Departments (in addition to the items mentioned in the Chancellor's announcement) · £1,249,000 from reduced purchases of Civil Defence equipment and materials, and other economies , £573,000 in National Health Service expenditure for Civil Defence , and £1,500,000 from reduced expenditure of the Ministry of Supply. In addition, turnover purchases by the Board of Trade for the strategic reserve of industrial materials would be reduced by £10,000,000, but for accounting reasons only £750,000 of this amount would appear in the reduced Estimates.

Commonwealth and Foreign Offices. The loan towards emergency expenditure in Kenya was reduced from £2,000,000 to £1,000,000; Colonial Development and Welfare loans by £810,000 , grants and loans to international organizations by £525,000 ; and Colombo Plan grants by £80,000. Administrative economies, together with an increase in passport fees (see below), would yield a total of £325,000.

Works. £1,197,000 from economies in capital and maintenance expenditure on public buildings.

The following charges were raised to provide increased revenue :

School Meals—raised by 1d. to yield (together with reduced capital expenditure on the school meals service) £2,250,000.

Passport Fees—increased from £1 to 30s. to yield £175,000.

County Court Fees—increased to yield £180,000.

Driving Test Fees—increased to yield (together with administrative economies) £125,000. [The Road Traffic Bill at present before Parliament provides for an increase of these fees from 10s. to £1].

Further Education Charges for Non-vocational Courses—increased to yield £170,000.

On April 28 local education authorities had been told by the Ministry of Education that current limits of cost per place in school building must be maintained, despite recent wage awards in the building industry which were calculated to increase the costs of educational building by 3 per cent. Cost limits were £154 for a primary and £264 for a secondary school place.

Mr. Macmillan's Statements on Economic Situation.

Prior to his announcement of the decision to effect reductions in Government expenditure, the Chancellor of the Exchequer had made a number of statements on the economic situation, the most important of which are summarized below.

Newcastle Speech. In a speech at Newcastle-upon-Tyne on May 25, Mr. Macmillan said that he did not expect a rise in the cost-of-living index of more than 2 or 3 points in the next twelve months as a result of the removal of food subsidies or of recent wage increases in the nationalized industries. He foresaw a "plateau of stability" for at least a year ahead and said the country could stay there if it chose, but that another round of wage increases such as had taken place in the past two years would be "disastrous." Mr. Macmillan described the national economy as "buoyant," but mentioned three particular problems . (1) excessive investment in industry and building, (2) increased internal consuming power which deflected goods from the export markets, and (3), most serious of all, rising prices at home which might price the country out of its export markets.

Statement to N.P.A.C. In a statement to the National Production Advisory Council on Industry (May 4) Mr. Macmillan said that his main concern had been to discourage current personal spending and to encourage saving. Without sufficient savings, essential schemes of industrial expansion could not be financed without inflation. Comparison of investment in Germany with that in the U K left no ground for complacency, and it was important to accelerate the pace of investment in the U.K. as soon as possible. In 1955 U.K exports grew only about half as fast as world trade in manufactures and, for the fifth year running, Britain's share of world trade in manufactures had declined The growth of Britain's gold reserves had to be made a major objective of policy, and to achieve that end exports would have to be further increased.

Speech to Commonwealth Correspondents' Association. Addressing the Commonwealth Correspondents' Association on June 6, Mr. Macmillan said that over the five-year period 1950-55 the U.K. had an average current surplus on its balance of payments of some £70,000,000 a year, compared with an average deficit of £25,000,000 for the rest of the sterling area By "average world standards" the U.K had not done too badly, but by its own higher standard of trying to reach a considerable current surplus to cover its capital commitments the country had not done well enough in recent years. Mr Macmillan said that the U.K. had lent well over £100,000,000 a year in long-term investments within the sterling Commonwealth in the last four years. The U K. came a close second to the U.S A. as a provider of long-term capital, and in proportion to national income was the largest long-term oversea investor in the world In the last six years colonial sterling balances had risen by about £700,000,000 but in the same period investments, grants and long-term loans from the U K. to the Colonies had amounted to £600,000,000. It followed that the U K. did not levy a tribute of sterling balances from the Colonies ; nor did it live off the rest of the sterling area.

Discussing the U K 's dollar exports, Mr Macmillan said that in the period 1948-1955 these had risen 136 per cent by value, and those of the rest of the sterling area by 57 per cent. The U.K. had thus provided a larger share than formerly of the sterling area's visible dollar exports, as well as substantial invisible dollar earnings. He also drew attention to the U K 's contribution to defence, which, in proportion to national income, was nearly double that of Continental Western Europe and in total exceeded that of the rest of the Commonwealth put together

Speech to Press Association. On June 13 Mr Macmillan, speaking at the annual luncheon of the Press Association, said there had been "modest but unmistakable" gains in the fight against inflation. He drew attention to the "excellent trade figures" for May, which showed the smallest apparent trade gap for 2½ years, but pointed out that they could not be regarded as reliable evidence of a long-term trend He added that the headway made would be lost if labour costs and prices continued to rise.

Sir Anthony Eden on the Wage-Price Spiral.

The Prime Minister, Sir Anthony Eden, addressing a rally of women Conservatives at the Albert Hall on June 13, said that he believed that the country had reached a point where it was possible to break the "vicious circle of rising prices and

wages chasing each other." He suggested that since nobody gained from such a race it would be "fair and sensible to call it a draw." He went on to say that the present year was the best opportunity the country had yet had to win stability while other factors affecting prices were fairly favourable. The Government would constantly seek economies in expenditure, but the "axe" would have to be laid sparingly on such matters as education, and effective defensive arrangements would have to be retained.

Prime Minister's Consultations with Industry.

The Prime Minister mentioned in his Albert Hall speech that the Government considered discussions with both sides of industry "a necessary process" in the working out of "truly national solutions" to the problems of economic stability. A series of discussions between the Prime Minister and representatives of both sides had begun on March 5, when he met the economic committee of the T.U.C. General Council. Other meetings were held with representatives of the British Employers' Confederation, the Federation of British Industries, and the chairmen of the boards of the nationalized industries to discuss the general economic situation.

Meetings with Trade Union Representatives. - T.U.C. Memorandum on Economic Position.

The first meeting held with the T.U.C. representatives was reported to have been uneventful. At a second meeting with the Prime Minister, held on May 10, the T.U.C. representatives indicated that they were preparing a report on the economic situation, on the completion of which they would welcome a further meeting with Sir Anthony and his Cabinet colleagues.

The T.U.C. had already made its general position clear in a memorandum on Budget proposals sent to the Chancellor of the Exchequer on Feb 22, and in its official statement on the Budget issued on April 25. The memorandum said that experiences in recent months did not inspire confidence in the Government's ability to act quickly if full employment and living standards were threatened, and continued:

"Too often the responsibility for avoiding an income-prices spiral is put on to trade unions and employers But it is necessary to inquire more deeply into the causes of wage claims. The policy pursued by the Conservative Government of deliberately dismantling the machinery of control and planning in order to return to a freer economy, coupled with measures which have resulted in the redistribution of income, has given rise to fears in the minds of many workpeople that their living standards are in danger.

"Moreover, the initial motivation of the great bulk of wage demands in recent years has been the justifiable need, as workers see it, to maintain a level of consumption (of which food and other essential commodities form a large proportion) threatened by price increases, some of which have resulted from deliberate Budget policy. The inequalities of family circumstances and the range of wage rates in industry make it difficult to assess the increase required in particular cases to meet this need fairly, but the prime motive for making demands in the first place is one which is difficult, and often impossible, to resist with equity

"One of the most unsatisfactory and indeed misguided features of the Government's policy is the extent to which it relies upon rising prices to restrain personal spending. Such a policy is not only unfair to the weakest members of the community but is self-defeating in that it directly provokes demands for higher personal incomes The Government have consistently underestimated the reaction of trade unionists to rising prices

"Both in the autumn Budget by purchase tax increases, and now again by cuts in the food subsidies, deliberate steps have been taken to raise the prices of essential goods The rise of food prices, when import prices were falling, was one of the most disturbing features of 1955. The Government have gone out of their way to aggravate this situation."

In their comment on the April Budget the T.U.C. drew attention to "the Government's reliance on monetary policy, the minor role to which other means of influencing the level of economic activity had been relegated, and the lack of conscious direction of the nation's economic affairs" The statement added:

"As for the equity of the proposals, apart from the very small increase in family allowances for the third and subsequent children, the concessions made by the Chancellor will once again confer more benefit on persons with higher incomes than upon people at the lower end of the income scale. The Budget provided the Government with an opportunity to dispel the widespread impression that the sacrifices necessary to overcome the country's economic difficulties are being borne mainly by workpeople. It should have been used to make a contribution towards lowering the prices of necessities. The Government have chosen to ignore the opportunity of using the Budget as a positive instrument of economic policy."

Meetings with Employers' Representatives.

The following statement was made by the chairman of the British Employers' Confederation (Sir Colin Anderson) at the first meeting on March 8 between the Prime Minister and the Confederation's representatives:

"It is the view of the British Employers' Confederation that employers should make every effort to avoid increasing prices and, wherever possible, should reduce them. The Confederation urges that the Government should continue to take such steps as are necessary to balance the nation's books Restraint by everyone, Government and citizens alike, in every form of income and expenditure is essential, and only if all play their part can the general level of prices be stabilized and, with more efficiency and output, be reduced.

"Wages and salaries constitute by far the biggest factor in the national economy, and the Confederation is firmly of the opinion that any further increase in them can only be justified by increased effort on the part of managements and employees which result in lower production costs.

"Wage increases recently conceded will inevitably involve rises in industrial costs unless they are offset forthwith by corresponding increases in efficiency and effort in every industry and service throughout the country."

The Prime Minister met representatives of the Federation of British Industries on March 19.

A statement issued after the meeting said that the Prime Minister had told the delegation that the Government's concern was with the long-term position and how to attack the problem of prices and wages The latter problem was partly psychological, which made it necessary to increase public understanding of the country's economic difficulties and to enlist the co-operation of all parties in industry. Long-term needs required an expansion of the economy, and the Government wanted to put a temporary check on expansion "only where it had outrun our capacity."

Profits must be adequate to enable industry to remain competitive and must give a fair return to the shareholder, but, with increasing productivity, the wise course would be to consider whether profits were not already high enough to enable some of the benefits of productivity to be passed on by way of lower prices. That was not an unreasonable suggestion for those industries which were better able to increase their productivity faster than others

Sir Graham Hayman (president of the F.B.I.), in a statement after the meeting, said that rising costs and prices were symptoms and not causes of inflation, and believed that they would stabilize when production and spending had been brought into balance. The curbing of industrial investment should be a last resort, as it was essential to rising productivity. Sir Graham added: "Without higher productivity, stability will be achieved at the expense of living standards. The more effective the results of Government policy are seen to be, the more industry will be helped to hold, and then to reduce, prices."

Sir Graham Hayman added that because the Government's counter-inflationary measures were slow to show their effect, it was hard to judge whether they were correct in scale. "All are alive to the risk that they might go too far, and we think it important that the Government should be supplied constantly with up-to-date information on industrial investment trends. We will readily co-operate in steps to obtain that information."

The Prime Minister had a joint meeting on June 11 with representatives of the F.B.I. and the B.E.C. An official statement said there was "full agreement that the struggle for the mastery of inflation, the saving of markets, and the preservation of high living standards had now reached a critical stage in which every effort should be made to keep down costs and prices of goods and services." It was agreed that a joint meeting of Ministers, representatives of private industry, and chairmen of the boards of nationalized industries should be held to discuss this problem, after the view had been put forward by the employers that the policy of the nationalized industries was decisive in the field of costs and prices.

Meetings with Chairmen of Nationalized Industries.

The Prime Minister had previously met the chairmen of the boards of the nationalized industries on March 22, the following statement being issued after that meeting:

"The chairmen of the nationalized boards recognized the importance of continuing their efforts to increase efficiency in their industries, and of having regard to the national interest in the provision of services and power.

"There was general agreement that the need to keep down prices applied to both the nationalized industries and the private sector. Because of the effect on the whole of industry, it was of the utmost importance for the national economic well-being that increases in their wages and other costs should, as far as possible, be absorbed by increased productivity and economy.

"As regards investment, the Government for their part accepted the need for modernization and re-equipment in the nationalized undertakings, and it was agreed that a proper balance must be maintained between the pace and scale of investment in the private and public sectors respectively

"The Prime Minister emphasized the great importance which the Government attached to making the facts about the country's economic position as widely known and understood as possible. The chairmen of the nationalized boards expressed their agreement and undertook to play their full part in creating an informed and educated public opinion in these matters."

A further meeting between the chairmen of the nationalized boards and the Prime Minister was held on June 26, when it was announced that the British Transport Commission, the gas industry, and the North of Scotland Hydro-Electric Board would make such contributions as they could towards the stabilization of prices, following the lead given by the National Coal Board and the Central Electricity Authority the previous week in deciding to hold prices of coal and electricity for the next 12 months (see 14930 C).

Pegging of Gas Prices, Railway Fares and Freights, and Postal Charges.

The Gas Council announced on June 26 that the 12 area gas boards, after they had made such revisions of price as were necessary to meet the increased costs of working as at June 1, 1956, would keep the price of gas unchanged until March 31, 1957, "unless something quite exceptional and unforeseen occurs to frustrate that intention"

On June 27 the chairman of the British Transport Commission, General Sir Brian Robertson, promised that there would be no general increase in passenger fares on British Railways or London Transport during 1956. Freight charges would not be increased provided that a course of action consistent with the Commission's statutory obligations and a proper development of the transport undertaking could be worked out and adopted.

The Postmaster-General (Dr. Hill) stated in a parliamentary written reply on June 27 that there would be no increase in the costs of Post Office services during the following six months, apart from the increases which had been announced in April last (see 14179 D).

Mr. Thomas Johnston, chairman of the North of Scotland Hydro-Electric Board, reaffirmed on June 27 the Board's decision (announced in February) not to raise its tariffs during the current financial year. Any losses would be carried forward to another year.

Mr. Macmillan's Meeting with National Union of Manufacturers.

In addition to the meetings between the Prime Minister and representatives of industry, the Chancellor of the Exchequer met representatives of the National Union of Manufacturers, led by their president, Lord Rochdale, on June 13.

The N.U.M representatives stressed that manufacturers were at one with the Government in their efforts to master inflation and to develop exports, but the prices charged for basic materials and services, including those supplied to the nationalized industries, were an uncontrollable element in manufacturing costs. Smaller and medium-sized manufacturing firms—producing between them something like half the country's total industrial output—were at the mercy of these basic charges and of the wage standards set by the big employers of labour.

In his reply, Mr. Macmillan said that the higher prices of basic commodities and services, like higher prices elsewhere, were the result principally of increased labour costs. In his view, the main point at all times was the importance of avoiding increased labour costs resulting from higher wages unaccompanied by corresponding rises in productivity.

Employers' Appeal for Price Restraint.—
Joint Statement by Employers' Organizations.

In a joint statement issued on July 12, four major organizations representing 90 per cent of British industry appealed to their members to try to restrain prices in the fight against inflation. The organizations concerned were the Federation of British Industries, the British Employers' Confederation, the Association of British Chambers of Commerce, and the National Union of Manufacturers.

"It appears to us," the statement said, "that a moment has come when private industry can and should play a special part in defeating inflation. While the urgent need remains for resolute action in reducing public spending, the Government's measures to stop inflationary pressure at its source, slow at first, appear now to be having some effect.

"The boards of the nationalized industries, without whose co-operation private industry can do little, have announced measures to steady the prices of their products for substantial periods We express the strong view that this is the time when private industry, in its own as well as the national interest, should do what is in its power to match these actions

"General guarantees of price freezing are not possible when costs of materials may rise. Quotations for many manufactured products, unlike those for coal, power, and transport (nationalized industries), are made for deliveries months or years ahead. Nevertheless, this is a moment when an exceptional risk must be accepted. We advocate and will support a policy of great restraint in a united effort to bring inflation to an end

"Price restraint will not succeed unless the breathing-space which it gives is used to bring down costs The months immediately ahead will therefore have to be devoted with renewed vigour by all in industry to the pursuit of higher productivity and administrative economies,"

Prime Minister's Warning of Economic "Battle of Britain."

Speaking on July 14 at a Conservative rally at Padiham (Lancashire), the Prime Minister described the "battle against inflation" as "a new Battle of Britain" which called for action by the whole community to halt rising prices and to increase production.

"We are in mortal peril, not of immediate unemployment, but of poverty by stages," Sir Anthony declared. "To-day we are at grips with the battle against inflation. It is the new Battle of Britain, but this time it cannot be won by the few. We are all in it, and upon its outcome our homes, our jobs, and our children's future depend. We have to halt rising prices. We have to produce more, of the quality and at the prices that the world demands We have to deliver the goods on time There is no lack of demand. World trade is expanding, but if we do not do these things our competitors will. They will forge ahead relentlessly without regard to any who slip back in the race. There is no international Welfare State

"In all this the Government's first care must be the balance of payments We have to build up the gold and dollar reserves to a point where we are not living from hand to mouth, at the mercy of every fluctuation of world trade. Each one of us will benefit far more if we are able to halt inflation and stabilize prices than from any further reductions in taxation given from the surplus That is the reality and it has to be faced, most of all by those with fixed incomes, for it is they who suffer most as the purchasing power of money falls. It is not that we fail to understand their difficulties. Indeed we do. But we are convinced that the action we have taken, stern as it has had to be, is the best way to help them now. Meanwhile the tax remissions for pensions schemes in this year's Budget will bring real benefit to the self-employed. This follows repeated income-tax remissions. . . .

"Our policy as a Government is showing some encouraging results. The gold and dollar reserves have been steadily rising every month this year We expect a balance-of-payments surplus for the first six months of at least £100,000,000 This compares with a small deficit in the same period last year That is better, but it is still not good enough.

"The trade figures, perhaps the most important of all, also show an improvement In particular, our exports have risen more and are about 6 per cent higher in quantity than last year after allowing for the dock strike at that time But our imports are still too large. And that means that as a nation we are still consuming at home more than we can afford. That is what we have got to put right by savings and by restraint. I ask you all to help in this. . . ."

Maintenance of Exchange Value of Sterling.

The Treasury announced on July 11 that the Chancellor of the Exchequer had rejected a proposal by Professor Erhard, the West German Minister for Economic Affairs, to discuss the exchange value of the pound in the context of European exchange parities during the O.E.E.C. meeting to be held in Paris on July 17-19.

Professor Erhard was reported to have asked Mr. Macmillan to discuss the possible introduction of flexible exchange rates with a margin of five per cent each way. The British view was that while the German proposal did not necessarily imply any readjustment of the value of the pound, it might have the effect of impeding the steps which the British authorities had been making to restore confidence in sterling just when these measures were bringing results. Professor Erhard's proposals were seen against the background of his earlier statements to the effect that many other European currencies had become over-valued in terms of the Deutschemark, as reflected in Western Germany's excessive payments surplus in the E P.U. Whilst his proposals for flexible exchange rates appeared to be the German solution to the problem, other European Governments were said to take the view that the creditors in the E.P U. were under as much an obligation as the debtors to right an existing imbalance, and that to do so Germany herself might take further steps to liberalize her trade, as well as to adjust her present "tight" money policy

The Treasury spokesman said that the Chancellor's reply to the German proposal was on its way, and added: "In the meantime we are making it known that H.M. Government do not see any useful purpose, and would not be prepared to take part, in any international discussion of the exchange value of sterling. While substantial progress has been made in strengthening sterling, the position remains as stated by the British Chancellor about a year ago at Istanbul."

At a meeting of the International Bank and the International Monetary Fund, held at Istanbul in September 1955, Mr. Butler (then Chancellor of the Exchequer) had made it clear that H.M. Government intended to maintain the exchange parity of $2.80 to the pound, "either in existing circumstances or when sterling is convertible." An identical statement had been made by Mr. Butler on July 26, 1955 (see 14343 A) in the House of Commons. (Treasury Press Office - Board of Trade Journal - Times - Manchester Guardian - Daily Telegraph - Financial Times) **(Prev. rep. Government Expenditure, 14921 A; Anti-inflationary Measures, 14705 A; Stabilization of Coal and Electricity Prices, 14930 C; Monetary Policy, 14343 A.)**

A. WESTERN GERMANY - UNITED STATES. — Dr. Adenauer's Visit to Washington. - Discussions on German Reunification and European Problems.

The German Federal Chancellor, Dr. Adenauer, visited the U.S.A. from June 9-15 for discussions with American statesmen, and also to receive honorary degrees from Yale and Marquette Universities. The Chancellor, who was accompanied by Dr. Hallstein (State Secretary in the West German Foreign Ministry), had originally intended to have conversations with President Eisenhower, but was unable to do so owing to the President's recent operation (see 14940 C). Discussions were nevertheless held at the State Department with Mr. Dulles, mainly on the subject of German reunification. A communiqué (summarized below under cross-headings) was issued on June 13 calling for the reunification of Germany by free elections, and declaring that it would be difficult to place credence in the Soviet Government's promises until it had taken action to end "the brutal and unnatural division which it had imposed on Germany."

German Reunification and Soviet Policy. The communiqué said that Dr Adenauer and Mr. Dulles had undertaken "a broad review of the world situation and of the problems confronting their governments in the international field," the principal matters discussed being "the question of German reunification, the recent events in the Soviet Union, and the strengthening of the Atlantic Community." It continued:

"Secretary of State Dulles and Chancellor Adenauer emphasized German reunification as a major objective of the West, and their conviction that the attitude of the West toward the Soviet Union should be determined by the endeavour to promote the reunification of Germany in freedom... They noted that the Soviet Government has professed a desire to find a basis for peaceful co-existence with the nations of the free world. They agreed that one test of the sincerity of this profession will be the willingness of the Soviet Government to respect its international obligations and to refrain from endeavouring to impose its system upon other peoples

"They recalled that at Geneva . . the Heads of Government of France, the United Kingdom, the Soviet Union, and the U S A. recognized their common responsibility for the settlement of the German question, and agreed that the reunification of Germany should take place by means of free elections and should be carried out in conformity with the national interest of the German people and the interest of European security The Chancellor and the Secretary of State consider that until the Soviet Government had taken action to discharge that responsibility, and to put an end to the brutal and unnatural division which it had imposed on Germany, it will be difficult to place credence in promises and pledges of the Soviet Government.

"The Chancellor and the Secretary of State reaffirmed the desire of their Governments to work out with the Soviet Union and with the nations of the North Atlantic area arrangements which would ensure European security in conjunction with the reunification of Germany in freedom"

NATO. Dr. Adenauer and Mr. Dulles agreed that NATO constituted "an essential contribution to the security of the free world." They agreed also on the need "for strengthening and developing further the relationships among the members of the North Atlantic Treaty, and for harmonizing their policies and actions with respect to major problems affecting the treaty objectives." Both statesmen pledged the support of their Governments for "the work being carried on in this regard under the decision taken at the recent meeting of the North Atlantic Council in Paris" [see 14861 A].

European Unity. The Chancellor informed Mr Dulles of the steps being taken to set up a "Euratom" project and a common market between the six member-countries of the European Coal and Steel Community. Mr Dulles had expressed the U S Government's interest in these projects, and had indicated that the establishment of the Euratom scheme "would make possible a particularly close relationship with the United States in this field" [i e in the joint utilization of atomic energy for peaceful purposes] He had also expressed his satisfaction at the recent Franco-German agreements on the Saar

German-American Relations. After stating that Dr. Adenauer and Mr. Dulles had "noted with satisfaction the continued development of close relations between Germany and the United States," the communiqué said that Dr. Adenauer had "raised the question of war-vested German assets in the U S.A." and that Mr Dulles had "expressed the hope that there would be early U S. legislative action on this subject." Mr. Dulles had also expressed the U.S Government's satisfaction at the action taken by the German Federal Government "to remove quota restrictions on imports from the dollar area, in accordance with the provisions of the General Agreement on Tariffs and Trade."

Dr. Adenauer paid a ten-minutes' visit to the Walter Reed Military Hospital on June 14 to see President Eisenhower, with whom he briefly discussed the question of German reunification. On June 16 President Eisenhower sent a message to the President of the German Federal Republic (Dr. Heuss) in which he said that "the ending of the division of Germany is essential to the development of friendly and co-operative relations between the Western nations and the Soviet Union. . . ."

(New York Times - Frankfurter Allgemeine Zeitung)

B. UNITED KINGDOM. — B.B.C. and I.T.A. Developments. - New B.B.C. Board of Governors.

Developments in recent months in connexion with the British Broadcasting Corporation and with commercial television are summarized below:

B.B.C. Services.

Board of Governors. The following appointments to the Board of Governors of the B B C. took effect from July 1: (*a*) Sir Philip Morris was reappointed a Governor and vice-chairman until June 30, 1958, (*b*) the Earl of Balfour was appointed National Governor for Scotland until June 30, 1961, (*c*) Mrs Thelma Cazalet-Keir was appointed a Governor until June 30, 1960, (*d*) Dame Florence May Hancock (chief woman officer of the Transport and General Workers' Union) was appointed a Governor until June 30, 1961.

Lord Balfour replaced Mr Thomas Johnston (72), who had resigned for reasons of age Mrs Cazalet-Keir (chairman of the Equal Pay Campaign Committee) succeeded Lady Rhys-Williams, and Dame Florence Hancock replaced Professor Barbara Wootton, both of whose terms of office expired on June 30.

The new Board of Governors consists of Sir Alexander Cadogan (chairman); Sir Philip Morris (vice-chairman); Lord Balfour (Scotland), Lord Macdonald of Gwaenysgor (Wales), Sir Harry Mulholland (Northern Ireland), Sir Edward Benthall, Lord Rochdale, Mrs. Cazalet-Keir, and Dame Florence Hancock.

Director of Admimistration. Mr Hugh Carleton Greene was appointed Director of Administration on June 26 in succession to Sir Norman Bottomley, retiring

Director of Television. It was announced on April 27 that Mr Gerald Beadle would succeed Sir George Barnes as Director of Television Broadcasting in July. Mr Beadle (57) had been Controller of the B.B C.'s Western Region since 1937 Mr. Cecil McGivern, Controller of Television Programmes since 1950, was appointed Deputy Director of Television—a new post The appointment of Mr S. J. de Lotbinière as Controller of Programme Services, Television, and of Mr. S. G Williams as Controller of Administration, Television, was announced on June 26

Closing-down of Alexandra Palace Station. The television transmitting station at Alexandra Palace closed for public transmissions on March 28, being replaced by the new and more powerful station at Crystal Palace Alexandra Palace will in future be used for experimental purposes only

Colour Television. A demonstration of colour television was held in London on April 3 under the auspices of the Radio Industry Council, in conjunction with the Post Office and the B B C, for the benefit of over 100 members of a study group of the Radio Consultative Committee of the International Telecommunications Union (C.C I.R.). "Live" colour programmes were transmitted by the B.B C for the first time from the experimental transmitter at Alexandra Palace.

Children's Television. It was announced on May 4 that Mr Owen Reed, drama producer in the Western Region, had been appointed Head of Children's Television Programmes in succession to Miss Freda Lingstrom, retiring.

Independent Television.

Opening of Midlands Service. Independent Television programmes began in the Midlands on Feb. 17, when the first provincial service of the I.T.A. was broadcast to Birmingham and the surrounding area from its new station near Lichfield.

Independent Television News Service. It was announced on March 7 that Mr. Geoffrey Cox, an assistant editor of the *News Chronicle*, had been appointed to succeed Mr. Aidan Crawley as Editor of Independent Television News Ltd

Afternoon Television Programmes. A general cut in summer programmes was announced on April 20, when it was stated that some of the afternoon programmes had not proved successful and that there had been delay in the establishment and completion of new series of programmes. From April 23 all week-day programmes began at 4.45 p.m instead of 4 p m., while from May 6 week-end programmes opened at 4 p.m. instead of 2 p m.

Increase in Capital of Associated Television Ltd. Associated Television Ltd (the London week-end and Birmingham week-day programme contractors) announced on April 20 that part of a capital increase would be subscribed by the *Daily Mirror* Group, which had accepted an invitation to be represented on the board.

Scottish Programme Contractors. The I.T.A. announced on May 30 (*a*) that it had accepted (subject to contract) an application from Scottish Television Ltd. to be programme contractor for Scotland's first commercial television station; (*b*) that the chairman of the company would be Mr. Roy Thomson, a Canadian, who was chairman of Scotsman Publications Ltd. (Edinburgh) and owned five commercial radio and two commercial television stations in Canada; and (*c*) that the Scottish station would be built at Black Hill, between Airdrie and Bathgate, and was expected to be ready for transmissions by August 1957, covering a population of 3,500,000.

The B.B.C. announced on Jan. 25 that independent television had a larger audience among viewers who could receive both services. In October, 1955, 57 per cent of adult viewers had watched B.B.C. programmes and 43 per cent I.T.A. programmes, but in December, 1955, independent television had taken the lead with 51 per cent.—(Times - Daily Telegraph) (14658 A.)

A. BURMA. — Government Victory in General Elections. - New Cabinet formed by U Ba Swe. - Temporary Resignation of U Nu.

General elections held in Burma on April 27 resulted in a victory for the Government party—the Anti-Fascist People's Freedom League (AFPFL), which has held power since Burma became independent in 1948.

The President of Burma (Dr Ba U) had issued proclamations in February last fixing April 27 as the date for elections to the Chamber of Deputies (the Lower House) and May 22 as the date for elections to the Chamber of Nationalities (Upper House). The Chamber of Deputies has 250 members elected by universal suffrage, while the Chamber of Nationalities has 125 members, partly elected by direct suffrage and partly nominated by the various States of the Union of Burma—the Shan, Karen, Kachin, and Kayah States, together with the Chin division.

The elections to the Lower House were contested by a large number of political parties, groups, and local organizations. The strongest opposition to the AFPFL came from the National United Front (N.U.F.), a left-wing group dominated by the Burma Workers' and Peasant's Party [see page 12064, first column]. Other political parties contesting the elections included the Burma Nationalist Bloc, a right-wing group formed by Dr. Ba Maw (the pre-war Prime Minister), and the Arakan National United Organization, which is opposed to the AFPFL and seeks recognition of Arakan as a state of the Union of Burma. The Communist Party is banned and thus presented no candidates as such, but the N.U.F. and other Opposition groups were reported to contain a number of Communist sympathizers.

The principal issue of the elections was whether or not negotiations should be opened with the Communist rebel bands, who, though much weaker than when the last elections were held in 1951-52, nevertheless remained active in different parts of the country—notably in the Mandalay and Monywa areas, and in the delta area round Rangoon The Prime Minister (U Nu), in a pre-election broadcast, had strongly opposed negotiations with the rebels, pointing out that they had consistently ignored offers of negotiation over the past eight years, had rejected two offers of an amnesty, and had ignored an invitation to seek political power through parliamentary elections. There were also differences between the parties on internal policy questions, but no significant opposition to the Government's foreign policy of neutrality, co-existence, and non-alignment with existing "power blocs"

The elections—in which about 8,000,000 people were entitled to vote—passed off quietly, though rebel activity interfered with the polling in some outlying areas Owing to the size of the country, and difficulties of communication, definitive results were not known for a considerable time. By May 10, however, when the results were known for 213 of the 250 constituencies, it had become apparent that the AFPFL had been returned to power with a considerable majority, though a number of gains were made by the National United Front. Figures published in Rangoon on that date showed that the AFPFL (and allied organizations in the Shan, Kachin, Karen, and Kayah states and the Chin special division) had obtained 147 seats, of which about 40 were unopposed returns; the N.U.F. 43 seats, as compared with 20 won by the Burma Workers' and Peasants' Party and other left-wing groups at the last general election in 1951-52; the Burma Nationalist Bloc one seat; and minor parties and independents 22 seats. [Full results will be published when the final figures are available. —*Ed. K.C.A.*].

With 37 results outstanding, the AFPFL had thus obtained 33 fewer seats than in 1951-52, whilst the N.U.F. had won more than twice the number of seats gained by the left-wing parties at the last election. In Rangoon, where about 63 per cent of the electorate of 340,000 went to the polls, all nine seats were won by the AFPFL, the successful candidates including U Nu (who had a majority of 15,000), U Ba Swe, the Minister of Defence, and U Kyaw Nyein, the Minister for Industry. The AFPFL also won all seats in Mandalay and Moulmein, while the N.U.F. won Maymyo with a majority of about 1,000 in a total poll of over 18,000. Most of the N.U.F. successes were obtained in rural areas—notably at Monywa and the surrounding areas west of the Chindwin and Irrawaddy rivers, where nearly all its candidates were elected.

It was announced in Rangoon on June 5 that U Nu had resigned the Premiership for a period of one year in order to devote himself to the reorganization of the AFPFL, and that he would be succeeded as Prime Minister by U Ba Swe, the Minister of Defence. U Nu—who had been Prime Minister since the assassination of General Aung San in 1948—said that he intended to purge the Anti-Fascist People's Freedom League of "pernicious elements," and would continue to remain president of the party.

U Ba Swe was born in a village near Tavoy (southern Burma) and graduated at the University of Rangoon. He helped to found the People's Revolutionary Party in 1939, and during the war was one of the leaders of the Anti-Japanese Resistance Movement, of which he was head in the Rangoon, Hanthawaddy and Insein districts. He was arrested for a short time by the Japanese, subsequently released, and at the end of the war became president and subsequently secretary-general of the Socialist Party, into which the People's Revolutionary Party had been transformed. He later became vice-president of the AFPFL, a position he still holds. In addition, he is president of the Burma Trades Union Congress and president of the Asian Socialist Bureau.

The new Cabinet headed by U Ba Swe, and recruited entirely from the AFPFL, was sworn-in on June 12 by President Ba U, its membership being as follows:

U Ba Swe	Prime Minister, Defence, and National Planning.
Sao Hkun Hkio .	Deputy Premier and Foreign Affairs.
U Kyaw Nyein .	Deputy Premier and National Economy.
Thakin Tin .	Deputy Premier and Social Services.
U Tin ..	Trade, Development, and Supply.
U Khin Maung Lat	Judicial Affairs.
Thakin Tha Khin .	Home Affairs.
U Raschid	Mines.
Bo Khin Maung Gale	Finance and Revenue.
U Win Maung	Ports, Marine, Civil Aviation, and Coastal Shipping.
Bo Min Gaung .	Railways, Inland Water Transport, Union of Burma Airways, Posts and Telegraphs.
U Ba Saw .. .	Religious Affairs, Social Welfare, and Mass Education.
U Shein Htang	Rehabilitation.
U Tun Win . .	Co-operatives and Commodities Distribution.
Thakin Chit Maung	Information.
U Aung Pa . .	Public Works and Housing.
Thakin Pan Myine	Democratization of Local Administration.
U Tin Nyunt	Labour.
Thakin Tin Maung	Agriculture and Forests.
Thakin San Myint	Land Nationalization.
Bo Khin Maung ..	Industry.
Sao Htun E ..	Relief and Resettlement.
U Tun Tin . ..	Education and Culture.
Dr. Sein Ban	Health.

Most of the Ministers had held office in U Nu's Cabinet, though a number of them changed their portfolios. The most important innovation was the creation of three Deputy Premierships, held respectively by the Ministers of Foreign Affairs (Sao Hkun Hkio), National Economy (U Kyaw Nyein), and Social Services (Thakin Tin). Sao Hkun Hkio and U Kyaw Nyein held the same portfolios under U Nu, whilst Thakin Tin exchanged the portfolio of Land Nationalization for that of Social Affairs. U Ba Swe retained the Defence portfolio concurrently with the Premiership New Ministers included Dr. Sien Ban, Deputy Speaker of the Chamber of Nationalities; Sao Htun E, Home Minister in the Shan State Government, and Thakin Pan Myine president of the Federation of Trades Organizations.

In a statement after taking office as Prime Minister, U Ba Swe said that his Government would continue the policies instituted during the "long and distinguished stewardship" of U Nu, and that there had merely been "a change of personalities." In the external field Burma would continue to pursue a policy of "active, dynamic and independent neutrality," based upon co-existence and non-alignment with power blocs. In domestic affairs the Government would give priority to the restoration of law and order, introduce compulsory military service for a two-year period, and encourage foreign investment. (Burmese Government Information Department, Rangoon - Burmese Embassy Press Office, London - Times) **(Prev. rep. Elections, 12062 A; Cabinet, 14340 D; 14007 B; 12118 C.)**

B. UNITED KINGDOM. — Gold and Dollar Reserves in June. - Increase of $16,000,000.

The sterling area had a gold and dollar surplus in June of $16,000,000 after taking account of (*a*) $2,000,000 received in U.S. defence aid, (*b*) $16,000,000 received in gold or dollars from the E.P.U. in respect of the May settlement; (*c*) the quarterly payment of $8,000,000 on the interest-free loan from Canada and $4,000,000 half-yearly interest on loans received from the U.S.A. as Marshall Aid As a result, the sterling area's gold and dollar reserves rose to $2,385,000,000 on June 30.

Provisional figures for the E.P.U June settlement showed that the U.K. had a deficit of £9,000,000, which would be settled in July, three-quarters in gold and dollars. An additional cash payment of $7,000,000 was to be made in July in connexion with the agreed funding of a further $60,000,000 of debt owed to the E.P.U.—(Financial Times) **(Prev. rep. 14922 C.)**

A. KOREA. — U.N. Command orders Withdrawal of N.N.S.C. Inspection Teams from South Korea. - Polish and Czech Representatives accused of Collusion with Communist Authorities. - Charges of Serious Communist Violations of Armistice Agreement. - Rejection of Chinese Proposal for Political Conference on Korea - Closing of British Commonwealth H.Q. in Japan. - Formation of Commonwealth Contingent in Korea.

The United Nations Command decided on May 31 to expel from South Korea the inspection teams of the Neutral Nations Supervisory Commission (N.N.S.C.) in view of the "systematic frustration" of the Commission's functions by the North Korean and Chinese authorities. Earlier (on Aug. 29, 1955) the number of Polish, Czechoslovak, Swiss, and Swedish representatives on the teams had been halved by agreement between the U.N. Command and the North Korean and Chinese members of the Military Armistice Commission.

In accordance with this decision, the inspection teams at two of the South Korean ports of entry mentioned in the armistice agreement—viz., Taegu and Kangnung—were flown to Panmunjom in the demilitarized zone on Sept. 6, together with some members who were being withdrawn from the Pusan, Inchon and Kunsan teams.

Explaining the reductions in the personnel of the teams, the senior U.N member of the Military Armistice Commission, Major-General Parks, stated on Aug. 29, 1955, that "unneutral obstructionism and wily tactics consistently displayed by Czech and Polish members have made the operation of the Commission unworkable and useless, despite the sincere, conscientious and patient efforts of the truly neutral Swiss and Swedish members to preserve some semblance of effectiveness." In future the inspection teams, whose task was to ensure that no military build-up took place in Korea beyond the limits specified in the armistice agreement, would number six—three in North Korea at Sinuiji, Sinanju and Manpojin, and three in South Korea at Pusan, Inchon and Kunsan—instead of the ten teams which had operated hitherto.

Chinese Proposal for Political Conference.

In a Note of April 9, 1956 (published in Washington on May 31) the Chinese Communist Government proposed to the 16 countries represented on the U.N. Command in Korea the holding of a conference on the withdrawal of all foreign forces from Korea and the unification of that country. The Chinese Note was worded as follows:

"The Governments of Sweden and Switzerland have on many occasions stated to the Chinese Government the practical difficulties which they have encountered in their work in the Neutral Nations Supervisory Commission in Korea, and have expressed the hope that a settlement could be reached. The Chinese Government sympathizes strongly with the position of the Swedish and Swiss Governments, and has endeavoured to try to mitigate their difficulties

"Recently the Swedish Government proposed that the whole of the six neutral observation teams at present stationed at designated ports in South and North Korea should be withdrawn for the time being, and that observation teams should be dispatched temporarily only when the need arose, while the Swiss Government proposed that the existing neutral observation teams in the six designated ports should be eliminated and that mobile observation teams only should be retained.

"The Chinese Government holds that a fundamental solution to the practical difficulties which the Governments of Sweden and Switzerland have repeatedly raised can only be reached when a solution has been reached on the question of the peaceful unification of Korea, and in the first place on the question of withdrawing all foreign forces from Korea.

"Since the Geneva Conference on Korea in 1954, the [North] Korean and Chinese sides have consistently advocated that a conference of the nations concerned should be called to discuss the withdrawal from Korea of all foreign forces, and the peaceful unification of Korea. The Chinese Government is convinced that if all parties concerned are genuinely desirous of seeking a settlement, a reasonable solution to those questions could be reached.

"In the light of the above considerations, the Chinese Government, both in their own name and by authorization of the Government of the Democratic People's Republic of Korea [North Korea], propose to the Government of the United Kingdom, and through it to all other Governments represented on the U N Command, to convene a conference of the nations concerned to discuss the withdrawal from Korea of all foreign forces, and the peaceful unification of Korea . "

U.N. Rejection of Chinese Proposal. - Charges of Communist Violations of Armistice Agreement.

The Chinese proposal was considered at a series of meetings in Washington between representatives of the 16 countries represented on the U.N. Command, a reply being delivered on their behalf by the British Chargé d'Affaires in Peking on May 28. The reply rejected the Chinese proposal and made charges of serious Communist violations of the armistice provisions.

After stressing that the reply was sent on behalf of all the Governments represented in the U.N. Command, the British Note stated:

"The Governments of the U N Command have long regarded the frustration of the hopes of the Korean people for unification of their country as the basic problem in Korea At Geneva they set forth in detail their position with regard to a just settlement of this problem, in conformity with the objectives of the United Nations This position was reiterated at the past two sessions of the General Assembly, where it was endorsed by an overwhelming majority of the members of the United Nations

"With regard to the proposal of the People's Republic of China and the North Korean regime for a conference on the withdrawal of foreign troops and the unification of Korea, the Governments of the U N Command are not aware of any change in the position of the People's Republic of China and the North Korean regime which would render such a conference fruitful The Governments of the U.N. Command remain ready to discuss unification on the basis of the U N. objectives. If the People's Republic of China and the North Korean regime have concrete proposals for a settlement of the Korean question in conformity with these objectives, they are prepared to give such proposals every consideration.

"In the absence of willingness of the People's Republic of China and the North Korean regime to negotiate on the basis of the U.N. objectives, the Neutral Nations Supervisory Commission problem can and should be separated from the problem of unification. Pending agreement on unification, the Armistice Agreement remains in force in Korea, and all parties concerned should endeavour to maintain the effectiveness of the armistice and to correct problems that arise regarding it. The Governments of the U N. Command reaffirm their support of the Armistice Agreement and their intention to contribute to peace in the area

"The Governments of the U N. Command cannot accept the statement in the Note of April 9, 1956, that the People's Republic of China and the North Korean regime have endeavoured unceasingly to try to mitigate the difficulties encountered by the Governments of Sweden and Switzerland in their work in the N N S.C, since these difficulties have in fact been created by the conduct of the Chinese-North Korean side itself The proposals of the Swiss and Swedish Governments referred to in the Note of April 9 (which the Governments of the U N Command regard as reasonable, and which have their full support) were made necessary by the policy of systematic frustration of the functions of the N N S C which the Chinese-North Korean side has followed ever since the Armistice Agreement was signed.

"The Chinese-North Korean side has persisted in introducing military personnel and supplies into Korea through other points of entry than those provided for in the Armistice Agreement, and has failed to report these introductions to the N N S C. Through the obstruction of the Czech and Polish members of the Commission, the U.N Command has been effectively prevented from having its charges of such introductions investigated In short, the Chinese-North Korean side has completely frustrated any effective supervision by the N.N S.C in the area north of the demilitarized zone. Under these circumstances, the activities of the Czech and Polish components of the Commission south of the demilitarized zone are an inequitable burden on the U N side. The U.N Command will announce its position on this matter fully in the Military Armistice Commission.

"In the light of the foregoing, and having regard to the attitude of the Chinese-North Korean side with respect to its obligations toward the N N S C., as shown by its conduct in practice, the Governments of the U.N. Command believe that no evidence has been shown of the good faith which alone could enable any new conference to serve a useful purpose Until the Chinese-North Korean side is prepared to negotiate sincerely on the basis of U.N. objectives, the Governments of the U N. Command believe that another conference would only bring about a repetition of the deadlock which resulted at Geneva in 1954."

Demand for Withdrawal of Inspection Teams.

At a meeting of the Military Armistice Commission on May 31, Major-General Gard (the senior U.N. representative on the Commission) announced the decision of the U.N. Command to withdraw facilities for the N.N.S.C.'s inspection teams in South Korea. He said that the primary objective of the Armistice Agreement—"to stop the hostilities in Korea and prevent them from being renewed"—continued to be met, and that the danger of general war in the Far East had been "greatly diminished as a result."

"At the same time," General Gard went on, "there has been a notable and persistent failure of certain arrangements set up by the Armistice Agreement which were intended to contribute to the stability of the cease-fire. Among these are the arrangements concerning the N.N.S.C. and the reporting and inspection of introduction of military personnel and equipment into Korea. These arrangements were intended to assure that both sides would comply with the agreed limitations . . . on such introductions. In short, the primary object in establishing the N.N.S.C. was to prevent violations of the Armistice Agreement by providing a supervisory mechanism which would be enabled to make full and adequate inspections and which would thus be able to ensure accurate reporting and compliance. . . ."

Addressing the Chinese and North Korean representatives, General Gard continued . " From the time the Armistice Agreement was concluded your side has continuously made illegal introductions without reporting them to the N.N S C. When the U.N. Command called for an inspection of these illegal introductions, the Czech and Polish members on the N N.S C. either vetoed such inspections or co-operated with your side in obstructing the efforts of the Swiss and Swedish members of the Commission so as to render effective inspections, and thus disclosure, of these illegal introductions impossible You have used the continued existence of the N N S C as a blind behind which to hide these illegal introductions . . The U N. Command, on the other hand, has faithfully observed the provisions of the Armistice Agreement and has fully co-operated in the inspections made by the N N S C teams in the territory under U N Command control.

" As a specific example, note the contrast between your performance in reporting to the N N S.C and that of the U.N Command The Armistice Agreement requires both sides to make detailed and prompt reports of all introductions of military personnel and equipment.

" During approximately the first six months following the beginning of the armistice, the period during which your side made most of its illegal introductions, your side made only 11 combat material reports of replacement ammunition, and no aircraft. During the same period the U N. Command submitted 598 reports, covering the introduction of approximately 13,000,000 rounds of replacement ammunition and 2,434 replacement aircraft In the entire period since the Armistice Agreement went into effect until June 1955, you submitted a somewhat larger number of combat material reports, totalling 162. However, these still notably omit all reference to aircraft and compare unfavourably with the 1,969 reports submitted by the U.N Command

" The failure of your side to report introductions of combat aircraft is particularly conspicuous since your side now maintains in North Korea between 400 and 500 such aircraft, more than half of which are jet fighters or bombers, whereas you had none in that area at the time the Armistice Agreement was signed

' At the same time Poland and Czechoslovakia, nominated by your side to participate in the N.N S C , have refused to agree to inspections in North Korea which your side opposed, or have delayed inspection until evidence of the violations could be removed By virtue of constituting one-half of the membership of the Commission, the Czech and Polish officers on the Commission have enjoyed an unqualified veto power over any proposal laid before it The members of the N.N S C. nominated by the U N Command, Sweden and Switzerland, have been truly neutrals in the accepted sense of the world Their officers on the N.N S C. have examined and decided each proposal or charge on its merits

" Besides this fundamental perversion of the N.N.S C through actions of the Czech and Polish officers, which allow significant inspections only in the territory under the control of the U N. Command, your side has employed additional tactics designed to frustrate the operations of the N N S C in the territory under your control

" Your side has made introductions through other than approved ports of entry ; in at least one place you constructed a railway by-pass around a port of entry and introduced material and personnel through it Your side has also restricted the activities of N N S C. teams stationed at the ports of entry under your control so as to prevent them from carrying out their duties—as when you scheduled inspections of trains at unreasonable hours in the middle of the night, and when you failed to give the teams sufficient notice to permit them to appear to inspect a train passing through a port of entry Mobile team inspections in the North have also been frustrated "

In this connexion Major-General Gard mentioned a report by the Swiss and Swedish members of one team in North Korea, in which they stated that they had not been able to conduct their investigation of airfields in a sufficiently thorough manner because the Chinese-North Korean authorities had refused to make their records of aircraft movements available, and because repeated requests to inspect even the nearest surroundings of airfields whose alleged boundaries were doubted had been denied

The U.N Command, in contrast, had co-operated fully with the inspection teams sent to investigate Communist allegations of armistice violations, and the teams in question had been shown records of aircraft movements pertinent to their investigation and had been allowed to inspect aircraft on the field. The Swiss and Swedish members of one of the teams had expressly acknowledged the U N. Command's co-operation, and had reported that ' not one single piece could be found of the many different items of combat material enumerated in the charge '

Similarly, the Swedish and Swiss representatives on the Commission had contrasted the attitude of the two sides on the question of movements of materials In a memorandum of May 7, 1954, they had reported : ' The U N. Command took from the beginning a broad view of its obligations and threw open to full inspection the ports of entry in the territory under its control. Partly on its own initiative and partly on request, it put at the disposal of the inspection teams all documents . . . relating to incoming and outgoing material . . The inspection teams were therefore in a position to inspect and to report on any material they felt to be interested in . . . The Korean People's Army and Chinese People's Volunteers' side, on the other hand . . . never submitted any other documents for inspection than prior notification reports. . . . The inspection teams were unable to check efficiently on other movements, and this because of the stand taken by their Czechoslovak and Polish members. . . . In the territory under the military control of the Korean People's Army and the Chinese People's Volunteers, the Czechoslovak and Polish members of the inspection teams, thanks to the ' veto ' power, have kept spot-check controls to a bare minimum. . They have merely become a face-saving device devoid of any real significance. The inspection teams in the North have therefore never gained the insight into movements of materials as have the inspection teams in the South.'

" The U.N Command [General Gard continued] has made frequent requests in the Military Armistice Commission during these almost three years, and most recently on Feb. 25, 1956, that your side amend its behaviour and comply with those provisions of the Armistice Agreement regulating the introduction of combat material and equipment. Your side has failed to meet these demands and has given no indication of any intention to do so It must therefore be concluded that your side intends to continue in default on its reporting obligations It must be further concluded that your side intends to continue its practice of exploiting the unneutral conduct of the Czech and Polish members of vetoing embarrasing inspections, and that the N N S.C will continue to be unable to detect and disclose the illegal introductions by your side.

" The Governments of Sweden and Switzerland have proposed repeatedly during recent months to the appropriate Czech, Polish, and Chinese Communist authorities the withdrawal of the inspection teams to the demilitarized zone, where both sides would continue to report to the Commission This reasonable proposal has been rejected repeatedly by your side Most recently in its Note of April 9, the Chinese Communist regime took the position that this problem could not be solved until the problems of the unification of Korea and the withdrawal of troops are solved. Consequently it has become necessary to invoke the remedies available to the U.N side to meet the situation created by the defaults to which I have referred.

" Your side, and also the Czech and Polish members of the N.N.S.C , have failed to carry out faithfully important provisions of the Armistice Agreement. Therefore the U.N. side, as a party to that agreement, is entitled to take the necessary steps to protect itself from the consequences of such unwarranted conduct Accordingly, you are no longer privileged to take advantage of those provisions of the Armistice Agreement which have been violated and frustrated by your conduct and that of the Czech and Polish members of the N N S C.

" The U N. side has exhibited the greatest caution and forbearance in this matter We have pursued every practicable alternative course to redress the situation The course we must now adopt is . . the least we must do to protect our legitimate interests under the Armistice Agreement by lawful, peaceful, and responsible steps

" Because of these obstructions and violations of your side, and the conduct of the Czech and Polish members of the N N S C. and the Neutral Nations Inspection Teams . . . the U N will provisionally suspend, during the time that your side continues in default the performance on its part of those provisions of the Armistice Agreement governing the operations in the area under its control of the N.N S C and N N I T.'s. This suspension will be put into effect in about one week, and the U N Command will expect withdrawal of the teams from the area to be effected at that time.

" The U N Command is taking only such steps as are indispensable to the protection of its rights under the Armistice Agreement. It continues to regard the Armistice Agreement as in force, and limits its action to the particular suspensions described above. Finally, since for the reasons above stated the N.N S C. teams in the North have not been able to accomplish their purpose, we see no purpose in their remaining there "

A Chinese protest against the U N. Command's decision was rejected at a further meeting of the Military Armistice Commission on June 4. The U.N. representatives also rejected a Chinese compromise proposal that the Neutral Nations Supervisory Commission should withdraw the teams temporarily but should retain the right to send them back to their posts " should the need arise."

During the Commission's meeting Major-General Chung Kook Rok (North Korea) described the U.N. Command's decision as " illegal, invalid, and a serious violation of the Armistice Agreement " He also charged that the U N Command had illegally introduced a large quantity of material to arm 15 South Korean divisions since the armistice. After declaring that North Korea would reduce her armed forces by the end of August by 80,000 men, together with military and combat material, he reiterated the Communist demand for the withdrawal of all foreign troops from both North and South Korea.

On June 9 the teams operating in South Korea left for Panmunjom, where they were joined on June 12 by the North Korean teams. The Prime Minister of North Korea, Kim Il Sung, who was then visiting East Berlin, issued a joint declaration with Herr Grotewohl (the Prime Minister of Eastern Germany) on June 12 in which he condemned the ejection of the N.N.S.C. inspection teams as a " flagrant breach of the armistice agreement."

Other recent developments relating to the armistice in Korea are summarized below.

South Korean Allegations of Illegal Communist Reinforcements. The South Korean Government's Information Office issued on Sept 5, 1955, a statement analysing the alleged build-up of military forces and supplies in North Korea, based upon interrogations of deserters, refugees, and captured agents from North Korea. The document claimed that since the armistice 468 aircraft, 3,400 vehicles, including 2,700 tanks, 1,320 artillery weapons, and 46 light naval vessels, had been acquired by the Communist forces in North Korea. It was also alleged that Chinese forces still remaining in Korea numbered some 1,220,000. The strength of the North Korean forces was estimated at 800,000 to 900,000 men, with some 540 aircraft.

Reductions in Chinese and North Korean Forces. Peking Radio announced on Sept. 29, 1955, that six Chinese divisions would be withdrawn from Korea during the following month, the number of men involved being about 90,000 Altogether the Chinese had announced the withdrawal of 19 divisions from Korea since the signing of the armistice A further Peking announcement on June 28, 1956, stated that North Korea had begun to demobilize 80,000 troops.

Reduction in British Commonwealth Forces. The British Secretary for War (Mr. Head) announced on Feb. 16, 1955, that about 3,000 men from the U.K. were to be released from service in Korea The withdrawal was to start on March 15, and the headquarters set up in Japan for British Commonwealth forces in Korea would be closed in due course. The title "First Commonwealth Division" would be discontinued and the Commonwealth forces remaining in Korea would be known as "Commonwealth Contingent, Korea," under the command of a brigadier with headquarters in Korea

On the same date H Q., British Commonwealth Forces, Korea, announced that there would be a virtual withdrawal of all Commonwealth forces in Japan, that the British base at Kure and the liaison headquarters at Ebisu, near Tokio, would ultimately be closed down, and that the future "Commonwealth Contingent, Korea" would consist of a U.K infantry battalion and supporting units, as well as some Canadian medical personnel and a number of Australians (mostly Signals) and New Zealanders (mostly Transport)

The Australian Defence Minister (Sir Philip McBride) also announced on Feb. 16 that the 1st Battalion, Royal Australian Regiment, would be withdrawn from Korea, and that Australian naval personnel and the R.A A F. Transport Flight would return from Japan. The New Zealand Minister of External Affairs and Defence (Mr Macdonald) stated on Feb. 17 that New Zealand's contribution to the Commonwealth forces in Korea would be reduced from 450 to 100 men.

Withdrawal of Greek Contingent. The last company of the former Greek battalion in Korea sailed from Inchon on Dec. 11, 1955

General R. Bierwirth, the Australian C.-in-C. of the Commonwealth forces in Korea, relinquished his command on July 1. On his return to Australia (July 9) General Bierwirth said that fewer than 2,000 Commonwealth troops would remain in Korea. A. UNITED KINGDOM. — Newport By-election.

Polling took place at Newport (Monmouthshire) on July 6 in the by-election caused by the death of Mr. Peter Freeman (Labour). Result:

Soskice, Sir Frank (Labour) ..	29,205
Box, Donald (Conservative) .	20,720
*Roberts, Emrys (Welsh Nationalist)	1,978
No change. Labour majority ..	8,485

* Forfeited deposit

Figures at the general election were . P Freeman (Lab) 31,537, D. Box (C.) 27,177—Labour majority, 4,360

The Labour candidate polled 56.2 per cent of the votes, the Conservative candidate 39.9 per cent, and the Welsh Nationalist candidate 3.8 per cent. At the general election (when there was a straight fight) the Labour percentage was 53 7 and the Conservative percentage 46 3

The electorate numbered 71,943 (a decrease of 46 since the general election), of whom 72.1 per cent went to the polls, compared with 81.5 per cent at the general election.

Mr. Peter Freeman (67), who died on May 19, had represented Newport since 1945 and had sat for Brecon and Radnor in 1929-31 A vegetarian, anti-vivisectionist, and theosophist, he was well known for his work in matters connected with animal welfare. He had been a member of Glamorgan County Council (1927-31) and Cardiff City Council (1928-30), and was tennis champion of Wales from 1919-21.

Sir Frank Soskice (53) was Solicitor-General in the post-war Labour Governments from 1945 to 1951, and Attorney-General for a short period in the latter year. He was M.P. for Birkenhead East from 1945-50 and for the Neepsend division of Sheffield from 1950-55. The Neepsend constituency was abolished in the redistribution of seats which preceded the last general election.—(Times - Daily Herald) **(Prev. rep. 14898 A.)**

B. FRANCE - UNITED STATES. — M. Pineau's Visit to Washington. - Discussions with Mr. Dulles on International Situation. - Joint Communiqué.

M. Christian Pineau, the French Foreign Minister, visited Washington from June 16-18 at the invitation of the U.S. Government. During his visit he had discussions with Mr. Dulles at the State Department, a joint communiqué (summarized below under cross-headings) being issued on June 20:

Franco-American Relations. The discussions "on various aspects of the international situation and on specific matters of common interest" had "served to emphasize once more the profound and historic friendship between the American and French peoples and the cordial relations between the two Governments, and to recall the common sacrifices of France and the United States in the cause of liberty."

Eastern Europe. M. Pineau had reviewed with Mr Dulles his recent visit to Moscow with M Mollet, the French Prime Minister Mr Dulles had "noted with interest the *exposé* by the Foreign Minister [M. Pineau] on the significance of the developments which are taking place in Eastern Europe." M. Pineau had also mentioned "certain aspects of the problem of commercial relations between East and West"

Disarmament. M. Pineau and Mr Dulles had exchanged views on the letters addressed to their respective Governments by the Soviet Prime Minister, Marshal Bulganin, on the question of disarmament, and had welcomed the consultations on this subject now taking place in the North Atlantic Council "The Secretary of State and the Foreign Minister [the communiqué continued] stressed the necessity of reaching, within the framework of the U N., agreement on a plan of disarmament providing for the security of all participating States through an effective system of control While recognizing the possible value of a reduction in conventional forces and armaments, they agreed that, in the light of modern military technology, only a programme which dealt with the atomic threat by safeguarding the world against surprise attack would serve to give real security to the peoples of the world. They agreed, moreover, that the carrying-out of any extensive reduction in armed forces requires the concurrent solution of major problems such as the reunification of Germany."

NATO. Both M Pineau and Mr. Dulles had reaffirmed "the necessity of strengthening further the North Atlantic Treaty Organization, which remains the bulwark of Western security" They agreed upon "the importance of extending the process of political consultation so as to harmonize the policies of the member-countries with respect to the major objectives of the treaty, and of improving NATO co-operation in non-military fields." In this connexion they recalled that these matters were now "under active examination" by the NATO "three wise men" [see 14861 A], "who have the fullest support of the French and U S. Governments"

European Unity. M. Pineau had informed Mr. Dulles of the steps being taken by the six member-countries of the European Coal and Steel Community to co-ordinate the peaceful uses of atomic energy (the Euratom project); of the steps which those countries were taking to create a common market; and of the agreement between France and the German Federal Republic on the Saar question.

Algeria. M. Pineau had "outlined the current situation in Algeria and the desire of the French Government to reach a liberal and just solution which would enable the European and Moslem populations to live and work together in peace and harmony" Mr. Dulles had "expressed the hope of the U S Government for the achievement of such a solution."

Middle East. After an exchange of views on the Middle East, M. Pineau and Mr. Dulles had "reaffirmed their intention to continue to search within the framework of the U N. for a peaceful solution of existing problems in that area, and in particular to support the efforts of the U.N. Secretary-General in connexion with the Palestine question."

Aid to Under-developed Areas. M. Pineau and Mr. Dulles had "reaffirmed the strong interest of France and the U.S.A. in contributing to welfare and economic development in the newly-developing areas of the world." In this connexion M. Pineau had "elaborated on the proposals which he made to the North Atlantic Council on this subject" [see 14861 A].

While in Washington, M. Pineau visited the Walter Reed Military Hospital to see President Eisenhower, who was convalescing after his recent operation (see 14940 C). He also addressed the National Press Club on June 20, the greater part of his speech being devoted to explaining why he thought the Soviet Union was undergoing certain "irreversible" changes, and why he believed it was to the advantage of the West to accept Soviet offers of increased economic and cultural exchanges. In the course of his speech he urged the American people to try the "experiment" of friendlier relations with the U.S.S.R., declaring that the "very important" evolution in the Soviet Union and its satellites "poses the question whether the Eastern bloc is not disposed . . . towards a *rapprochement* with Western conceptions."

(Le Monde, Paris - New York Times)

A. MIDDLE EAST. — Security Council Resolution on Dr. Hammarskjöld's Middle East Mission. - Arms Deliveries to Arab States and Israel. - Israeli Memorandum on Disparity between Egyptian and Israeli Arms. - Jordanian Infiltrations into Israel. - Military, Economic and Diplomatic Agreements between Jordan and Syria. - Egyptian Journalist's Visit to Israel.

A British resolution commending the U.N. Secretary-General (Dr. Hammarskjold) for his efforts to bring about a settlement of the Arab-Israeli dispute, and requesting him to continue his good offices, was unanimously adopted by the Security Council on June 4 after a debate on the Secretary-General's recent mission to the Middle East.

The resolution—

(1) Commended the Secretary-General and the parties to the dispute (i.e. Israel, Egypt, Jordan, Syria, and Lebanon) "on the progress already achieved"

(2) Called upon Israel and her Arab neighbours to carry out "speedily" the measures agreed upon with the Secretary-General, and to co-operate with General Burns (Chief of Staff of the U.N. Truce Supervisory Organization) in implementing the Security Council's resolution of April 4, 1956 (see 14793 A) and in ensuring full compliance with the armistice agreements

(3) Declared that "full freedom of movement of U.N observers must be respected along the armistice demarcation lines, in the demilitarized zones, and in the defensive areas, as defined in the armistice agreements, to enable them to fulfil their functions."

(4) Endorsed Dr Hammarskjold's view that "full compliance with the armistice agreements represents a stage that has to be passed in order to make progress possible on the main issues between the parties"

(5) Requested General Burns (*a*) to ensure that the parties to the armistice agreements observed the cease-fire, and (*b*) to report any serious violation to the Security Council.

(6) Called upon Israel and her Arab neighbours to take "the steps necessary to carry out this resolution, thereby increasing confidence and demonstrating their wish for peaceful conditions."

(7) Requested Dr. Hammarskjold "to continue his good offices . . . and to report to the Security Council as appropriate"

As originally presented by Sir Pierson Dixon (the British representative), the resolution had contained a reference to the need to create conditions in which a peaceful settlement of the Arab-Israeli dispute could be achieved "on a mutually acceptable basis." After objections by Arab representatives, however, Sir Pierson agreed "in the interests of unanimity" to delete this provision.

The Arab representatives contended that the insertion of this provision might, in effect, be construed as meaning that the U.N should seek a settlement along lines different from those laid down in earlier U N resolutions—an interpretation that was denied by the British, U.S , French, Belgian, Cuban, and Peruvian representatives Although **Sir Pierson Dixon** eventually agreed to withdraw the reference to a solution "on a mutally acceptable basis," he stressed that its deletion should not be interpreted as meaning that the Security Council rejected the possibility of a mutually acceptable settlement in the Palestine dispute. **Mr. Wadsworth** (U S A.), **M. Alphand** (France), and **Dr. Belaunde** (Peru) all expressed regret that the provision should be deleted, and upheld the British attitude **M. Sobolev** (U.S S R), however, supported the Arab view that the resolution's wording should not give rise to interpretations that the Council was seeking to revoke its earlier decisions on Palestine. The Arab viewpoint was also upheld by the Persian and Chinese Nationalist representatives **Mr. Eban** (Israel) supported the British resolution in its original wording, but raised no objections to the resolution in its revised form

M. Shukairy (Syria), speaking before the above-mentioned provision had been deleted, declared that "the inherent rights of the Arabs of Palestine cannot be made a matter subject to the acceptance or refusal of Israel or others" To obtain a settlement of the Palestine problem it was necessary "to begin from the beginning and write off every resolution on Palestine since the partition resolution of Nov. 29, 1947" M. Shukairy added . "The establishment of Israel, its membership of the United Nations, and all other resolutions will have to be revoked ; then, and only then, can the U.N. look forward to a solution on a 'mutually acceptable' basis'" In the course of his speech M Shukairy asserted that Syria had a legitimate claim to sovereignty over Palestine, since the latter had been "from time immemorial" nothing more than "the southern part of Syria"; nevertheless, Syria was "prepared" to relinquish her sovereignty claim to "her ally Jordan."

Mr. Eban (Israel) said that M. Shukairy had given "frenzied expression" to the Arab States' desire to destroy Israel. As the Arab States had rejected the U.N. partition resolution in 1947, and had gone to war to prevent its implementation, they no longer had the right to invoke its provisions. With regard to Syria's claim to sovereignty over Palestine on historical grounds, Mr. Eban said that by the same analogy America should revert to British sovereignty, as it had once been a British colony Moreover, Syria itself had been part of "northern Palestine" in the days of King Solomon.

Developments in the Middle East during recent weeks are summarized below under cross-headings.

Arms Supplies to Arab States and Israel.

It was officially announced in Cairo on June 11 that "new naval units" had arrived at Alexandria "to reinforce the Egyptian Navy." No information was released about the number, type, or origin of these vessels, but on June 6 the official newspaper *Al Goumhouria* had announced that the Soviet Government had sold warships to Egypt, and that two of these vessels were on their way to Alexandria. It was understood that the two vessels were destroyers of the 2,200-ton *Skoryi* class, of which about 80 had been built in the Soviet Union since the war, with others under construction. The arrival at Alexandria of 19 Czechoslovak motor torpedo-boats for the Egyptian Navy had been announced on April 19 by Egyptian naval officers—this being the first time that torpedo-boats had been mentioned as part of the Czechoslovak arms supplies for Egypt.

According to the Naval Correspondent of the *Daily Telegraph*, the *Skoryi*-class vessels are destroyer-minelayers having a maximum speed of 38 knots and a main armament of four 5.1-in. guns, and carrying 80 mines. Two warships of this type passed through the Straits of Dover on June 3, and subsequently through the Bay of Biscay. The Soviet cruiser *Ordjonikidze*, which brought Marshal Bulganin and M Khruschchev to Britain for their recent visit, was accompanied by destroyers of this class.

The Israeli Navy was reinforced on June 20 by the two ex-British destroyers of the 1,700-ton *Zambesi* class which had been purchased from Britain in 1955 (see 14321 F). The two destroyers—formerly H M.S. *Zealous* and H.M.S. *Zodiac*, and now renamed the *Elath* and *Yafo*—arrived at Haifa on that date after refitting in Britain, and will constitute the largest units of the Israeli Navy. Two other destroyers of the same class, H.M S. *Myngs* and H.M.S *Zenith*, have been purchased from Britain by Egypt (see 14342 A).

The French Foreign Ministry announced on May 12 that it would supply Israel with 12 *Mystère IV* jet fighters for the Israeli Air Force, additional to 12 other machines of this type which had been flown to Israel in April. The announcement said that the U S. Government had "agreed to a delay in deliveries of these machines ordered under offshore contracts [i.e. for the NATO air forces] so that rapid delivery can be made of a last consignment of 12 *Mystère* planes ordered by Israel."

The Israeli Embassy in London published a statement on July 6 declaring that the balance of military strength in the Middle East was preponderantly on the side of the Arab countries, particularly since Communist arms supplies had begun to reach Egypt in December last. The statement was apparently issued in reply to Mr. Selwyn Lloyd (the British Foreign Secretary), who on July 2 had expressed the opinion that the balance was "rather in favour of Israel." Mr. Lloyd's statement—made in reply to a supplementary question by Mr. Robens (Labour)—was described by Mr. Ben-Gurion on July 4 as "a flagrant contradiction of the true facts." Foreign Office representatives subsequently explained that, in the British view, the high morale and technical efficiency of the Israeli armed forces more than compensated for any unbalance between Israeli's arms and the recently increased arms supplies of the neighbouring Arab countries.

The Israeli Embassy claimed that the balance of arms was already in favour of Egypt even before the Czechoslovak-Egyptian arms deal In December last, before shipments of Communist arms began to arrive, Egypt had some 150 *Sherman* tanks and about 200 *Valentine* tanks, and had also received 40 *Centurion* tanks from Britain—"the latest and heaviest type of tank produced in the West." Israel, on the other hand, had fewer *Sherman* tanks than Egypt and no *Centurions* whatever, these latter tanks having been "denied to Israel" In the air, Egypt had in December about 100 jet aircraft, mostly *Meteors and Vampires*, whilst Israel had a far smaller number of jet planes At sea, Egypt had two fast frigates of the British escort-destroyer type, five other frigates, and two corvettes, while Israel had three frigates and two corvettes, all of lesser gun capacity than the Egyptian vessels

Since December last, Egypt had received from Czechoslovakia 100 heavy *Stalin* tanks, 200 Czechoslovak T-34 tanks (comparable to *Shermans*), and over 100 artillery pieces of various types In the air, the Czechoslovak-Egyptian arms deal had provided for 200 jet fighters of the MIG-15 type and 60 *Ilyushin* heavy bombers (comparable to the British *Canberras*), of which 150 MIG's and about 45 *Ilyushins* had been delivered At sea, Egypt had purchased two British destroyers over and above the destroyer-frigates previously acquired, and also two Soviet destroyers of the *Skoryi* class (see above) There were also "persistent rumours" that Egypt had received or was due to receive submarines

During the same period, Israel had been able to obtain some lighter tanks from France, but no heavy tanks comparable with the British *Centurions* and the Soviet *Stalins*, the British Government had maintained its refusal to sell *Centurions* to Israel to counterbalance those sold to Egypt. In the air, Israel had been able to obtain 24

Mystère IV jet fighters from France, as well as a small number of additional *Meteors* and French *Ouragans*. With the exception of the *Mystères*, all Israel's fighter aircraft were inferior to the MIG-15s in speed and capacity. In bomber aircraft Israel had nothing to compare with the *Ilyushins*, and nothing more modern than *Mosquito* fighter-bombers, which had been discarded by the British R A F as obsolete Britain had refused Israel's request for a small number of *Canberra* bombers to counterbalance Egypt's *Ilyushins*, and had also ignored repeated Israeli requests for anti-aircraft gun equipment. At sea, Israel had obtained two destroyers from Britain similar to those sold to Egypt (see above), and also a number of light naval A A guns

In April last (the Israeli statement continued) Syria had negotiated an arms deal with Czechoslovakia under which, according to reliable information, she would receive 50 light tanks of a German model, 50 heavy *Stalin* tanks of Soviet type, 25 MIG-15 fighters, 50 pieces of heavy artillery, and 100 armoured vehicles Moreover, heavy shipments of arms had reached Iraq under the Baghdad Pact, while Saudi Arabia had received tanks from the West and also, it was believed, certain equipment from Eastern Europe through Egypt. [The sale of 18 American tanks to Saudi Arabia had been announced in February last—see page 14728, first column]

The document ended by stating that Israel had submitted to each of the Western Powers [i e the U S.A , Britain, and France] lists of arms representing Israel's minimum needs While Israel did not insist on absolute quantitative equality with the Arab States, she regarded qualitative equality as imperative. So far, however, most of the items requested had been refused, except for those mentioned in the statement. Britain, in particular, had refused to provide Israel with a single *Centurion* tank.

A French ban on the export of light arms to the Arab countries had been announced by M. Mollet and M. Pineau during the French National Assembly's recent debate on North Africa (see 14969 A). As explained by MM. Mollet and Pineau, this action was taken to prevent such arms being passed on to the Algerian rebels.

Unfounded " War Scare " on Jordanian Border.

Rumours of Israeli troop concentrations on the border with Jordan—subsequently found to be without foundation—led King Hussein to summon the U.S., British and French Ambassadors in Amman on July 3, and to express to them his concern at what was believed to be the possibility of an Israeli attack. King Hussein also saw the diplomatic representatives of the Arab countries on the same day in connexion with the " necessary measures to implement the Arab collective security pact " in the event of an attack by Israel.

The Israeli Foreign Ministry categorically denied that there were any troop concentrations on the frontier with Jordan, and informed the British, French, U.S., and Soviet Ambassadors that the Jordanian allegations were " pure fabrications." No confirmation of the alleged Israeli troop movements was forthcoming from London, Washington, or Paris, nor any confirmation of similarly unfounded rumours of Egyptian, Syrian, and Iraqi troop concentrations. Both the U.N. Truce Supervisory Organization and General Burns (who saw the Jordanian Chief of Staff, General Ali Abu Anwar) reported that there were no signs of exceptional Israeli troop movements.

The Special Correspondent of *The Times* in Amman, in a despatch on July 8, said that " the disconcerting war scare of the past few days seems to have been aroused partly by a misunderstanding, partly by the inexperience of the Jordanian leaders, and partly by a genuinely provocative flavour to recent Israel actions and utterances." After pointing out that general elections were to be held in Jordan within four months, the Correspondent said that " a colourless caretaker Government is in office, making remarkably little impact upon the progress of affairs, while the country is ruled by King Hussein in youthful partnership with Ali Abu Nuwar, and with the support, becoming progressively more difficult to assess, of the Army This economically unviable country prepares to choose its parliamentary representatives in this unhealthy situation, believing itself threatened by a formidable neighbour, obsessed with visions of ultimate revenge, split by innumerable schisms, plagued by the power rivalries of the Middle East and the world at large. There are those, however, who suspect that the elections will never take place, and those who go so far as to maintain that last week's alarms were at least partly fostered to divert attention from the confused political scene. . . . "

Jordanian Infiltrations into Israel.

Several incidents occurred during June and July in which Israeli nationals were killed by armed infiltrators from Jordan. The Mixed Armistice Commission, after investigations, called upon Jordan on July 15 to prevent such incursions into Israeli territory.

Two Israeli soldiers were killed and a settler wounded on June 24 in an exchange of fire near the frontier settlement of Nir Eliahu, in the Qalqiliya area; the Israeli and Jordanian authorities gave different versions of the incident, each accusing the other of responsibility. On July 9 two Israeli civilians were killed and a third injured when infiltrators from Jordan ambushed a car on the Sodom-Elath road, in the southern Negev; an Israeli soldier was wounded when a patrol car travelling in the Megiddo area (Galilee) hit a road-mine apparently planted by saboteurs, and machine-gun fire was opened from the Jordanian side of the frontier on the Israeli settlement of Ramat Rachel, near Jerusalem, no casualties being caused On July 15 a gang of four armed men, believed to be members of a para-military commando operating from Jordan, attacked a car near Lydda airport and shot its driver dead, a woman passenger in the car was not molested and was allowed to proceed to the nearest village Strong protests at these incidents were made by the Israeli authorities to the Mixed Armistice Commission, which, as stated above, called upon Jordan to prevent their recurrence

Military and Civilian Agreements between Jordan and Syria.

President Kuwatly of Syria, accompanied by the Syrian Prime Minister and Chief of Staff, visited Amman from May 28-31 for conversations with King Hussein and the Jordanian political and military leaders. The following agreements were signed at the end of President Kuwatly's visit. (1) a military agreement providing for the creation of a permanent joint body for military consultation and joint operations in the event of hostilities; (2) an agreement whereby passports were no longer required for nationals of the two countries visiting the other, but only identity cards (similar to the existing arrangements between Syria and the Lebanon); (3) an agreement whereby the Jordanian Legation in Damascus and the Syrian Legation in Amman were raised to the status of embassies; (4) an agreement granting freedom of transit for heavy road traffic from Syrian ports to Jordan *via* the Lebanon. It was also reported that Syria had agreed to contribute 62,500 Jordanian dinars (approx. $175,000) to the Arab League's project (see 14658 D) for producing potash from the Dead Sea.

It was understood that the military agreement was not in the nature of a formal treaty between Syria and Jordan, but represented a form of working co-operation between the armed forces of the two countries.

Egyptian Journalist's Visit to Israel.

Much interest was aroused in Egypt and Israel, and also in the Western capitals, by the disclosure that an Egyptian journalist, Mr. Ibrahim Izzat, had paid a 12-day visit to Israel as the guest of the Israeli Government. The disclosure was made in Cairo on May 19, when Mr. Izzat reported on his tour to Colonel Nasser, the Egyptian Prime Minister.

Mr. Izzat (whose visit to Israel had ended on May 16) said that he had obtained a visa from the Israeli Legation in London, that he had been accompanied on his tour by an Israeli escort and allowed to see everything he wished, and that he had travelled in Israel under the assumed name of George Ibrahim Habib, " a Brazilian journalist of Arab origin " He had been curious for a long time " to find out what it was like on the other side," and had thought that he could do his country a service by " reporting the facts about Israel." As " a simple reporter with no knowledge of military, political or economic secrets," he had therefore replied in the affirmative when asked by the Israeli Legation in London whether he would like to visit Israel

Mr. Izzat's article, written in an objective manner and containing many impressions favourable to Israel, was published in the magazine *Ros-el-Youssef*, a widely-read Egyptian periodical He paid high tribute to the industrial and agricultural progress being made in Israel, said that the Israeli people were working " 24 hours a day " to improve their economy and doing " more than their duty "; and described Tel-Aviv as " a beautiful place " He also wrote in appreciative terms of Israeli educational and technical achievements, and described the *Histadruth* (the Israeli General Confederation of Labour) as " the best-organized trade union movement in the world." Mr Izzat was critical, however, of the conditions in which the Arab minority in Israel were living, saying *inter alia* that he had seen " wonderful vocational schools run by the *Histadruth* for Israeli youth but only one small workshop for Arabs." He alleged, moreover, that the Arabs of Israel were restricted in their movements, that Arab villagers were living in some areas under " martial law " conditions, and that " while everything was done to promote modern progress among the Israelis, nothing was done to help the Arabs pull themselves out of the abject poverty and backwardness that has been their curse for centuries "

Mr Izzat said that he had had personal meetings with Mr. Sharett (then Minister of Foreign Affairs) and Mrs. Myerson (then Minister of Labour), both of whom had stressed their desire for peace with Egypt. After saying that Egypt was regarded as Israel's only potential enemy, and that peace with Egypt was " the aim and dream of everyone in Israel," Mr Izzat wrote: " The Israelis feel that if they can make peace with Egypt the rest of the Arab States will have to follow. They have no special fear of their other Arab neighbours "

While in Israel, Mr. Izzat was given a message from Mr. Ben-Gurion (the Prime Minister), through a secretary, for transmission to Colonel Nasser. Whilst no official Israeli version of the message was made public, Mr. Izzat quoted it as follows: " If you meet Nasser, tell him I am ready to meet him at any time, at any place he chooses, to discuss any problem he wishes—refugees, borders, political, economic, or military questions—without mediation and without publicly announcing anything about such a meeting or its results. Tell him that I am ready to meet him even in Cairo."

A spokesman for Mr. Ben-Gurion confirmed on June 21 that the Prime Minister of Israel was ready to meet Colonel Nasser " at any time and any place," and to go to Cairo " like a shot " if necessary. He added that no more Egyptian journalists would be invited to visit Israel unless Colonel Nasser reciprocated by allowing Israeli journalists to visit Egypt. Mr. Izzat's article was generally praised by the Israeli newspapers as balanced and objective, though exception was taken to his comments on the allegedly unfavourable position of the Arab minority, which were stated to be not in accord with the facts. Refuting Mr. Izzat's statement that nothing was done to raise the Arabs of Israel out of their " abject poverty and backwardness," Israeli officials stressed that Government grants were made to the Arabs for education, health, and social welfare, as well as for agricultural aid.—(Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times) **(Prev. rep. Middle East, 14485 A.)**

A. PHILIPPINES - UNITED STATES. — Mr. Nixon's Visit to Manila. - Joint Statement on U.S. Bases in Philippines. - Recognition of Philippine Sovereignty over Bases.

The U.S. Vice-President, Mr. Richard M. Nixon, visited Manila at the beginning of July in connexion with the ceremonies marking the tenth anniversary of Philippine independence (July 4).

A joint statement issued on July 3 by Vice-President Nixon and President Magsaysay said that they had discussed " the necessity of strengthening military bases in the Phillippines in order to bolster the common defence of the two countries as well as that of the free world in this area," and that President Magsaysay had " concurred in the need for such a step for the mutual benefit of both countries." It had accordingly been agreed that the two Governments would hold formal negotiations on military bases " in the near future ", and that they would be conducted on the following " general principles " :

(1) " Existence of a system of U S. bases in the Philippines has been and continues to be a matter of mutual interest and concern to the two countries for the purpose of ensuring their common defence pursuant to the principles of the United Nations."

(2) " In consonance with this mutual interest and concern, certain land areas in the Philippines have been and are being used by the U.S.A. as bases. The Philippine Government will contribute for use—in accordance with the terms of the military bases agreement—anything additional which is deemed necessary by both Governments for strengthening the base system. The U.S.A will turn over to the Philippine Government those areas listed in the military bases agreement which the parties hereafter agree are no longer required In addition, the U.S A. has contributed and will continue such personnel, equipment, and facilities as may be necessary for the effective maintenance of such bases for the defence of the Philippines and the United States in this area."

(3) " The United States has, since the independence of the Philippines, always acknowledged the sovereignty of the Philippines over such bases, and expressly reaffirms full recognition of Philippine sovereignty over the bases Further, the U.S.A will turn over to the Philippines all titles, papers, and title claims held by the U S A to all land areas used either in the past or presently as military bases, except those areas which may now or will be used by the U S A for its diplomatic and consular establishment. Such transfers . will not affect the use of the bases in accordance with the terms of the military bases agreement."

The status of the U.S. bases in the Philippines had been under dispute for some time, and U.S. recognition of Philippine sovereignty over the bases was regarded by the U.S. Press as one of the most important points in the new agreement.

In a speech on the same date Mr. Nixon said that the U.S.A. respected the right of each country to chart its own course, and appreciated the friendship of neutral countries adhering to democracy and freedom. She had no sympathy, however, " for that kind of neutralism which draws no moral distinction between the Communist world and the free world." (New York Times) **(Prev. rep. 14297 C.)**

B. NETHERLANDS. — Monetary Policy. - Wider Transfer Area for Guilders.

The Netherlands Ministry of Finance announced on July 8 that banks in all E.P.U. countries except Turkey, and also in Afghanistan, Brazil, Chile, Ethiopia, Finland, Persia, Yemen, Lebanon, Saudi Arabia, Siam, Sudan, Syria and Tangier, might freely transfer guilder balances to one another as from July 9. Previously transfers without permit had been confined to countries participating in the European currency arbitrage scheme.—(Netherlands News Agency) **(Prev. rep. Exchange Control Relaxations, 14014 A ; 13727 A.)**

C. FRANCE. — Diplomatic Appointments. - New Ambassadors in Washington and Bonn. - Retirement of M. René Massigli.

A number of important diplomatic changes were announced in the *Journal Officiel* on July 7-8, as follows :

M. Louis Joxe, Ambassador in Bonn, as Secretary-General of the French Foreign Ministry in succession to M. René Massigli, retiring.

M. Jean Daridan, Assistant Director of Political Affairs, as Director-General of Political and Economic Affairs *vice* M Roland de Margerie.

M. François de Panafieu as Director-General for Personnel and Administration *vice* M. Bousquet.

M. Maurice Couve de Murville, Ambassador in Washington, as Ambassador to the German Federal Republic *vice* M. Louis Joxe

M. Hervé Alphand, Permanent French Representative at the U N., as Ambassador in Washington *vice* M. Couve de Murville.

M. Raymond Bousquet as Ambassador to Belgium *vice* M. Jean Rivière.

M. Rivière as Ambassador to Portugal *vice* M. Jean de Hautecloque, who was appointed Diplomatic Counsellor to the Government

M. Roland de Margerie as Ambassador to the Holy See *vice* M. Wladimir d'Ormesson, retiring.

It had been announced on June 13 that the Government had decided to appoint M. Bernard Cornut-Gentille as French Permanent Representative at the United Nations in succession to M. Alphand. M. Cornut-Gentille (55) was High Commissioner in French Equatorial Africa from 1948-51 before becoming High Commissioner for French West Africa.

Other recent French diplomatic appointments, announced in May and June, included those of M. Roger de Bercegol de Lile (Minister in Port-au-Prince) as Minister to New Zealand; M. Jean-Louis Paul-Boncour as Minister to Hungary, M Lucien Félix as Minister to Haiti *vice* M. de Bercegol de Lile, and M Pierre Salade as Minister to Burma

The French Foreign Minister (M. Pineau) sent a special message to M. Massigli expressing the Government's gratitude for the " eminent services " which he had rendered to France before, during, and since the war. M. Massigli had been Ambassador in London from 1944 to 1954 before his appointment as Secretary-General in the Foreign Ministry, and had served during the war as Commissioner for Foreign Affairs in the French Committee of National Liberation. He was invested by Queen Elizabeth II with the Order of the Companions of Honour when retiring from the London Embassy.
(Le Monde, Paris - Le Figaro, Paris) **(Prev. rep. 14648 B ; M. Massigli, 13876 B.)**

D. ATOMIC ENERGY. — Joint Institute for Nuclear Physics created by Communist-bloc Countries.

Moscow Radio announced on July 12 that, in implementation of the preliminary agreement reached in March, the Governments of the Soviet Union, Albania, Bulgaria, the People's Republic of China, Czechoslovakia, Eastern Germany, Hungary, North Korea, Mongolia, Poland, and Rumania had now concluded a formal agreement for the setting-up of a joint institute for " theoretical and experimental research into nuclear physics."

The announcement said that the institute would be located in the Kalinin region of Western Russia, and would absorb the Nuclear Research Institute and the Electro-Physics Laboratory of the Soviet Academy of Sciences. Its equipment would include a synchrotron generating 10,000,000,000 electron volts, as well as a smaller synchrotron producing 680,000,000 electron volts, an experimental nuclear reactor, and a cyclotron for accelerating multicharged ions.

The agreement provided that 47.25 per cent of the expenditure would be borne by the Soviet Union, the shares of the other member-countries being China, 20 per cent ; Poland and Eastern Germany, each 6.75 per cent, Czechoslovakia and Rumania, each 5 75 per cent, Hungary, 4 per cent, Bulgaria, 3.6 per cent, Albania, North Korea, and Mongolia, each 0 05 per cent.

It was laid down that the joint institute might be liquidated " by agreement among the Governments of all the member-countries," and that in the event of liquidation " all the equipment and installations shall become the property of the U.S S.R." In such an eventuality the other member-countries would be compensated "in accordance with their share in the capital expenditures "

The announcement added that other States wishing to take part in the work of the institute might become members " by decision of a majority of the member-countries."
(New York Herald Tribune) **(Prev. rep. 14779 C.)**

E. NEW ZEALAND.—Acquisition of H.M.S. "Royalist."

The British cruiser *Royalist* (5,900 tons), which had been bought by the New Zealand Government, was formally transferred to the Royal New Zealand Navy—of which she will be flagship—at Devonport on July 9 in the presence of Mr. Holland, the Prime Minister of New Zealand.
(Daily Telegraph) **(Prev. rep. 12122 F.)**

A. LIBYA. — Increased U.S. and British Economic and Military Aid. - Rejection of Soviet Economic Aid.

The Prime Minister of Libya (Mustafa Ahmed Ben Halim) announced on April 7 that the U.S.A. had agreed to increase its military and economic assistance to Libya in 1956 and 1957.

M Halim said that the U.S. offer, which was made subject to Congressional approval, comprised: (*a*) $5,000,000 for development projects (in addition to $4,000,000 already agreed upon), to be paid by June 30, 1956; (*b*) 5,000 tons of wheat for famine relief, bringing total U.S. wheat supplies in 1955-56 to 25,000 tons; (*c*) $7,000,000 for development projects during the financial year 1956-57 (in addition to $4,000,000 already agreed), (*d*) 5,000 tons of wheat during the same period; (*e*) the necessary equipment to expand the Libyan Army by 1,000 men by July 1957.

It had been reported towards the end of March, that Libya had rejected a Soviet offer of economic aid, but M. Halim stated that there was no connexion between the increase in American aid and the Soviet offer, which had been rejected "on its merits."

M. Halim had discussions in London from June 18-26 with Sir Anthony Eden, Mr. Selwyn Lloyd (the Foreign Secretary), Mr. Head (the Minister for War) and other British Ministers. On his return to Tripoli (July 3) he announced that the British Government had agreed to increase its financial and military aid to Libya.

The Libyan Prime Minister said that Britain would create the nucleus of a Libyan Air Force and Navy, supply equipment for 10,000 troops free of charge, and provide facilities for the instruction of Libyan officers in U.K. training establishments. An Anglo-Libyan committee of experts would meet shortly to discuss details of British military aid. M. Halim also stated that a British school would be established in Tripoli, and that English-language evening classes would be started to enable Libyan secondary schoolboys to continue their education at British universities.

After leaving London M. Halim had visited Paris for unofficial talks with the French Government. (Times - Le Monde, Paris - New York Times) **(Prev. rep. 14531 E.)**

B. UNITED STATES. — Death Penalty for Supply of Heroin to Minors. - Congressional Legislation.

A Bill giving juries the power to impose the death penalty on persons selling or giving heroin to children under 18 was approved on July 9 by both Houses of Congress (by voice vote), and sent to President Eisenhower for signature. As an alternative to the death penalty, juries were empowered to impose long terms of imprisonment (from 10 years to life sentences) and fines of up to $20,000. The Bill also forbade the use of heroin except for research purposes, and prohibited the use of the telephone and postal services for purposes of illicit drug trafficking.

Other penalties under the Bill were: (i) for illegal possession of heroin, first offence—two to 10 years' imprisonment and $20,000 fine; (ii) illegal possession, second offence—five to 20 years' imprisonment and $20,000 fine, (iii) illegal possession, third offence—10 to 40 years' imprisonment and $20,000 fine; (iv) illegal sale of heroin, first offence—five to 10 years' imprisonment and $20,000 fine; (v) illegal sale, second offence—10 to 40 years' imprisonment and $20,000 fine. No suspension of sentence, probation, or parole would be allowed.

The Bill in its final form represented a compromise between two separate Bills presented in the Senate and the House of Representatives respectively. The legislation was introduced after protracted Congressional investigation into the drug traffic in the United States.

(New York Times - New York Herald Tribune)

C. PHILIPPINES.—Approval of Reparations Agreement with Japan. - Ratification of Japanese Peace Treaty.

The Philippine Senate unanimously approved on July 11 the recent reparations agreement between Japan and the Philippines, and also the peace treaty with Japan concluded at San Francisco in 1951. The Philippine instruments of ratification of the peace treaty were signed by President Magsaysay on July 18, thereby ending the technical state of war between Japan and the Philippine Republic.—(New York Times) **(Prev. rep. Reparations Agreement, 14943 B; Japanese Peace Treaty, 11721 A; 11681 A.)**

D. FRANCE. — President of Paris Municipal Council.

M. Pierre Ruais (Social Republican) was elected president of the Paris Municipal Council—a position equivalent to mayor of Paris—on June 18 in succession to M. Féron (Independent-A.R.S.). The voting on the third ballot was 49 for M. Ruais, 25 for M. Gourdeaux (Communist), and 11 for M. Giraud (Socialist).—(Le Monde, Paris - Le Figaro, Paris) **(Prev. rep. 14267 D.)**

E. INTERNATIONAL TIN COUNCIL.—International Tin Agreement in Force. - First Meeting of Council.

Following the deposit of the Indonesian ratification of the International Tin Agreement on May 16, the ratifying governments decided that the Agreement should come into force on June 30, 1956. The first meeting of the International Tin Council (which superseded the Council's interim committee) was accordingly held in London during the first week of July, the following countries being represented. (*a*) *Producers*: Belgian Congo and Ruanda-Urundi, Bolivia, Indonesia, Malaya and Nigeria; (*b*) *Consumers*: Australia, Belgium, Canada, Denmark, Ecuador, France, India, the Netherlands, Spain, and the United Kingdom.

The aims of the International Tin Agreement (see 13424 B) are to achieve a reasonably stable price and to ensure adequate supplies of tin at reasonable prices at all times. The Agreement provided for a buffer stock of tin to be established by contributions from producing countries (which may be made wholly or partly in cash) and, if necessary, for the regulation of exports from the producing countries.

It was announced on July 12 that the Siamese National Assembly had approved in principle a Government Bill to permit Siam—the only major producing country which had not ratified the agreement—to join the International Tin Council.

The Malayan Finance Minister announced on July 12 that Malaya's contribution to the buffer stock would total $M 50,200,000 in cash. The operation would be financed by an overdraft advanced by the Malayan Exchange Banks Association on current account, and the contribution would be recovered by a levy on tin exports. A first instalment of $M 30,100,000 (£3,500,000) was approved by the Federal Legislative Council on the same date.

The following countries, apart from Siam, have signed the agreement but have not yet ratified it: Italy, Japan, the Lebanon, and Turkey (all consumer countries). South Korea and Israel have applied for admission to the agreement. A number of consuming countries have so far remained outside the scheme, notably the United States and the German Federal Republic.—(Times - Financial Times) **(Prev. rep. 14725 C.)**

F. EASTERN GERMANY. — Visit of Crown Prince of Yemen. - East German-Yemeni Trade Agreement.

A trade agreement between the German Democratic Republic and the Yemen was signed in East Berlin on June 30 at the conclusion of a one-week visit by a Yemeni delegation headed by the Crown Prince of the Yemen, who had previously visited the Soviet Union (see 14959 A).

An official communiqué was issued by Herr Grotewohl (the East German Prime Minister) and the Crown Prince saying that discussions had been held on various international problems affecting the two countries, and that the negotiations had confirmed their mutual wish to maintain and extend "the friendship which has always existed between the German and Yemeni people and to establish normal relations between them at the opportune time." The communiqué also referred to discussions on the German question and on political problems in the Near East.

The Yemeni Legation in Cairo announced on July 4 that Eastern Germany had undertaken the construction, under the new trade agreement, of three factories in the Yemen to manufacture cement, glass, and plastic leather. The costs of construction would be met entirely by the supply of Yemeni agricultural products to Eastern Germany.

(Neues Deutschland, East Berlin - Le Monde, Paris) **(14959 A.)**

G. SYRIA.—Dismissal of Chief of Staff. - Negotiations for Federal Union with Egypt.

Brigadier Shawkat Shukeir was dismissed from the post of Chief of Staff of the Syrian Army on July 8. An official announcement on July 9 said that he had offered his resignation, that it had been accepted, and that Brigadier Tewfik Nizam ed-Din had been appointed as his successor. Brigadier Shukeir's enforced resignation was reported to be the culmination of a conflict, which had arisen since the formation of M. Assali's Cabinet, between the Minister of Defence (M. Arslan) and certain officers connected with Brigadier Shukeir, who had expressed disapproval of M. Arslan's appointment as Defence Minister.

The Syrian Government decided on July 5 to form a ministerial committee, headed by the Foreign Minister (M. Bitar), to conduct negotiations with Egypt aimed at establishing a federal union between the two countries. Announcing this decision in the Syrian Parliament, M. Assali declared that when the Syrian-Egyptian Federal Union had been formed it would be extended to other Arab countries at their request. The Government's decision was unanimously approved by the Syrian Parliament on July 6, representatives of all parties expressing the hope that the proposed federal union with Egypt would serve as a nucleus for a full Arab Federation.

(Times - Le Monde) **(Prev. rep. Assali Cabinet, 14940 B.)**

JULY 21—28, 1956

A. FRANCE - TUNISIA. — Franco-Tunisian Diplomatic Agreement. - Breakdown of Negotiations on Interdependence. - Transfer of Police Powers to Tunisian Government. - Tunisian Political and Social Reforms. - Diplomatic Appointments. - High Court for Trial of Political Offenders.

Relations between France and Tunisia deteriorated seriously from April onwards, as a result of French opposition to the Tunisian Government's claims to the right to form immediately its own army and diplomatic corps, and to its demands for the progressive withdrawal of French troops from Tunisia. Although the question of diplomatic representation was settled by an agreement signed on June 15, negotiations on defence questions —which had opened in Paris on June 26—were broken off by the Tunisian Government on July 13. These and other recent developments affecting Franco-Tunisian relations and the internal situation in Tunisia are described below under cross-headings:

The Diplomatic Agreement.

The Tunisian Prime Minister, M. Bourguiba, maintained in a number of public statements during April and May that France's recognition of Tunisian independence under the protocol of March 20 automatically conferred on Tunisia the right to exchange diplomatic representatives with other countries and to organize her own army. The French Government, on the other hand, held the view (*a*) that although the protocol recognized the principle of Tunisian independence, it laid down that the detailed application of this principle in the spheres of foreign relations and defence should form the subject of further negotiations, and (*b*) that in the interim period the conventions of June 3, 1955, under which France was responsible for Tunisia's diplomatic representation abroad (see 14289 A), remained in force. In view of this disagreement, the proposed negotiations—which it had been decided should open on April 16—were postponed at the Tunisian Government's request.

In implementation of its claims, the Tunisian Government approved on May 3 decrees creating Ministries of Foreign Affairs and Defence, which had existed before the establishment of the French protectorate in 1881. Franco-Tunisian misunderstandings on the diplomatic question were, however, largely removed as a result of discussions between M. Bourguiba and M. Mollet, which took place in Paris early in May. Following further talks between M. Bourguiba and M. Seydoux (the French High Commissioner), an agreement recognizing Tunisia's right to possess her own diplomatic representation was signed in Tunis on June 15, its terms being as follows:

"(1) France will be represented in Tunis and Tunisia in Paris by an Ambassador. The diplomatic representatives of the two countries will bear the titles respectively of 'Ambassador Extraordinary, special envoy of the French Republic to His Highness the Bey' and 'Ambassador Extraordinary, special envoy of His Highness the Bey to the French Republic.'

"(2) In countries to which Tunisia shall decide not to send a permanent diplomatic mission, the French Republic is prepared, if the Tunisian Government so requests, to undertake the representation and protection of Tunisian citizens and interests In such cases French diplomatic and consular agents will act in accordance with the Tunisian Government's directions

"(3) France will support Tunisia's candidature for membership of international organizations in which she is not represented.

"(4) Pending the conclusion of the treaty which will regulate the ways and means of their co-operation in the field of foreign affairs, the two Governments, acting in the spirit of friendship and solidarity which characterizes their relations, will inform and consult each other on all questions of common interest arising in this field."

The agreement was accompanied by an exchange of letters in which the two Governments agreed that the French Ambassador in Tunis should take precedence over the other members of the diplomatic corps, that the Tunisian Ambassador in Paris should be accorded "a privileged position"; and that negotiations for the conclusion of a treaty of friendship and alliance between France and Tunisia, defining "the ways and means of their close co-operation in the field of defence and foreign affairs," should open in Paris on June 26.

M. Roger Seydoux presented letters of credence to the Bey on June 21 as French Ambassador to Tunisia, while M. Hassan Belkhodja (who had been appointed Tunisian High Commissioner in Paris on April 23) became the first Tunisian Ambassador to the French Republic on July 5.

The Bey officially approved on June 25 the appointment of Dr. Mokkadem (formerly Minister of Health in M. Tahar Ben Ammar's Government) as Ambassador to Egypt, M. Taieb Sahbani as Ambassador to Morocco, M. Ameur Mokni as Ambassador to Libya, and M. Taieb Annabi as Minister to Saudi Arabia. M. Mongi Slim, Minister of State in M Bourguiba's Cabinet, was nominated Ambassador in Washington on July 12 His brother, M. Taieb Slim, had previously been appointed Ambassador in London (see 14970 D).

Breakdown of Negotiations on Terms of Interdependence.

The negotiations opened on June 26 but were held up by a dispute arising from an Arabic-language broadcast by Tunis Radio on July 1, intended to be the first of a series entitled "Echoes from Free Algeria."

In a Note of July 2 the French Government strongly protested against the violently anti-French tone of this broadcast, and demanded that the incident should be settled before negotiations continued. Agreement was reached on July 3 between M. Savary and M. Bourguiba after the latter himself had condemned the tone of the broadcast and given assurances against a repetition of similar attacks. It was subsequently announced that the future status of Tunis Radio would be discussed during the Paris negotiations. [Under a convention signed in November 1953, and confirmed on June 3, 1955, Tunis Radio was to remain under the control of the French Broadcasting Service for 30 years.]

The negotiations were accordingly resumed on July 4, when French and Tunisian Ministers began to discuss, *inter alia*, the question of responsibility for anti-subversive activities, the revision of the economic and financial convention of 1955, the future of Franco-Tunisian commercial relations, and the future status of Tunis Radio.

It was disclosed by M. Bourguiba in a broadcast on July 9 that the Tunisian Government had asked for a French loan of 20,000,000,000 francs (over £20,000,000) for agricultural development; that France had agreed to the suspension of interest payments on loans made to Tunisia during the last four to five years, and that, with French approval, discussions had taken place between M Bourguiba and the U S. Ambassador in Paris on the possibility of obtaining loans from other countries and from international organizations.

The principal question which caused the breakdown of the negotiations was the future of the French forces in Tunisia. M. Bourguiba, in an interview published in *Le Monde* on June 28, had declared that the Tunisian Government agreed that Tunisian forces could not at the moment assume the sole defence of Tunisia, and that the French troops in the country could therefore fulfil this role "during the period of transition" He added, however: "We shall never agree that the presence of French forces in our country, and notably at Bizerta, should be of a permanent character under the pretext of Western strategy or the defence of the free world. Any occupation of a country without its consent by foreign armed forces is an infringement of its sovereignty and constitutes a kind of subservience . . . The object of the Tunisian Government in the negotiations . . . is not to fix terms on which French forces should be implanted in Tunisia, but to work out the conditions under which they should leave in accordance with the growing ability of the Tunisian forces to take their place."

M Bourguiba repeated this view in his broadcast on July 9, stating that the Tunisian delegation had proposed the evacuation of French forces by stages He also said that he had impressed on the French Government that the only possible solution of the Algerian question was the recognition of Algerian sovereignty, and that "although Tunisia fought at France's side in the two World Wars, it is impossible for her to be on her side in the Algerian war"

The French Foreign Minister, M. Pineau, in a statement in the National Assembly on July 12, rejected as "unacceptable" the Tunisian demand for the progressive withdrawal of the French forces.

Referring to the "grave difficulties" which had been caused by "ill-timed" statements by M Bourguiba on the evacuation of Tunisia by "foreign troops," M. Pineau declared. "The French Government considers this position as unacceptable The status of our forces in Tunisia can only be modified when the common defence of our two countries has been organized by the proposed treaty" M. Pineau outlined the tasks of the French forces in Tunisia as follows

(1) "They must cover Algeria As long as no pacification [in Algeria] has been achieved, there can be no question of the freedom of manoeuvre of our troops in Tunisia and Morocco being restricted in any way"

(2) "They must ensure the security of the persons and property of French nationals residing in those two countries until North Africa has been completely pacified and the Governments concerned are in a position to ensure this security themselves."

(3) "They must take part in the common defence of the Mediterranean. If the first two tasks are temporary, this one is of a permanent character For this reason it will be impossible for us to envisage leaving a port such as Bizerta, which constitutes an essential element not only in maintaining the French *présence* but also in the common defence of the Mediterranean"

On the previous day (July 11) the Council of the Republic had adopted two amendments in connexion with the Vote on supplementary expenditure estimates relating to Tunisia and Morocco, and had rejected any provision for French financial aid to Tunisia.

The first amendment—moved by M. Debré (Social Republican), who denounced the Government for a "series of capitulations"—provided for a reduction by 50 per cent in the salaries of the principal French officials connected with Tunisian and Moroccan affairs. Although M Savary protested against these allegations and emphasized that the Government had expressly stated its determination to maintain the "French presence" in Morocco and Tunisia, M Debré's amendment was carried by 156 votes to 117.

The second amendment was moved by M Colonna (*Gauche Démocratique*) in connexion with the estimates of the Ministry of Finance covering financial aid to the Tunisian and Moroccan Governments. The amendment proposed that the entire amount provided for such aid should be applied to indemnifying the French communities in Tunisia and Morocco, and that the Tunisian Government should be expressly excluded from receiving any French aid. "It would be inadmissible," M Colonna declared, "to subsidize the Tunisian budget and to neglect our own compatriots We must not help those who do nothing but aggravate our difficulties" M. Colonna's amendment was adopted by 164 votes to 132 after a heated debate.

As a protest against these developments, the Tunisian Government broke off the Paris negotiations on July 13. A communiqué issued by the Tunisian Embassy in Paris stated that this decision had been taken because, "having regard to the hostile attitude taken by the Council of the Republic and the declarations made by M. Pineau before the National Assembly, the Tunisian delegation feels that it cannot continue the negotiations in the present atmosphere." In a broadcast on July 14 M. Bourguiba reiterated that his Government would "never allow Tunisia to serve as a base for French troops charged with the repression of the fight for dignity which our Algerian brothers are waging," and added. "If France gives us the impression that our independence remains incomplete, we will once more resume the fight to recover our sovereignty completely."

Transfer of Police Powers to Tunisian Government.

By agreement with the French Government, the Tunisian Government assumed complete responsibility for public order on April 18, when M. Ismail Zuiten was installed as Chief of Police

In a speech at the installation ceremony, M. Bourguiba appealed to all French officials to serve the Tunisian State with the same zeal which they had displayed in the past, and assured those who decided against continued service in Tunisia that their rights would be respected On May 19 it was announced that 30 French police officials, a number of them in higher posts, had been placed at the disposal of the French Government—most of them at their own request

French Government's Financial Aid for French Community.

M. Mollet announced on May 14 that the French Government, while continuing its financial assistance for the economic development of Tunisia, had approved a number of measures intended to assist the French community in that country to adapt themselves to the new political, economic, and social conditions.

M Mollet said that the French Parliament would be asked to make grants for the construction of a network of French schools and a large French hospital in Tunis, and for the compensation of those who had suffered losses due to political disorders In addition, French officials would be guaranteed the effective exercise of their rights under the Franco-Tunisian Conventions; measures would be worked out for the protection of French employees in public or semi-public undertakings, steps would be taken to enable those who could not continue their activities to readjust themselves to the new conditions, and temporary assistance would be granted to enterprises and members of the professions who found themselves confronted with exceptional difficulties

Political and Social Reforms.

A number of important decrees providing for political and social reforms was approved by the Tunisian Government between April and June, details being given below:

Reduction of Bey's Civil List. The Bey sealed on June 21 a decree granting him a Civil List of 181,500,000 francs for the year 1956-57, as compared with a Civil List of nearly 1,000,000,000 fr for the previous year

Abolition of Special Legal Status of Beylical Family. Under a decree approved by the Government on May 31, members of the Bey's family were declared to possess the same rights and obligations as other citizens [In the past the members of the Beylical family could not conclude agreements under the civil law without the Bey's consent; could be tried for criminal offences only by the Bey himself; and were exempt from certain taxes.]

Reform of Local Government. A decree approved on June 16 authorized sweeping changes in the system of local government, under which the country would be divided into 14 regions, each ruled by a Governor (*Ouali*) who would be assisted by a secretary-general. Within each region the existing caids would be replaced by *moutamads* or delegates responsible to the Governor A decree sealed by the Bey on June 22 provided for the dismissal of 104 of the 160 caids.

Nationalization of Religious Foundations. The Cabinet decided on May 2 in favour of the nationalization of religious foundations (*habous*) An official spokesman stated that property set aside for religious or charitable purposes had been so badly administered in the past that the revenue produced had been insufficient even to meet the expenses of its administration, with the result that the State had had to make good an annual deficit of 170,000,000 francs. Its administration would therefore be transferred to the Ministry of Finance, which would use the revenue to meet the expenses of public worship and for charitable purposes

Status of Agricultural Workers. A decree was sealed by the Bey on April 30 fixing the working hours of agricultural labourers at 2,700 hours a year, and guaranteeing them a weekly rest-day. Wages were raised by 20 per cent, women's wages were fixed at 80 per cent of men's; bonuses for skill, experience, etc, were provided for, and a system of family allowances was introduced. The demand for these reforms had been maintained since 1951 by the General Union of Tunisian Workers (U G T.T.)

Internal Disorders.

A number of engagements against the "Youssefist" rebels took place during April, May and June, notably in the Gafsa area, where 17 *fellaghas* were killed in an action on May 11 and 53 during May 17-19. In the Medenine area of southern Tunisia, 71 rebels were killed and 17 captured during operations on May 29. Many of the rebels surrendered during this period, however, including several leaders of *fellagha* bands, and on July 4 Tahar Lassoued, the self-styled "General Commandant of the National Army of Liberation," submitted to the Government.

The rebel leader, M. Salah Ben Youssef (now in Cairo), assumed on June 5 the title of "Generalissimo of the Tunisian Army of Liberation." On April 17 he had claimed that fighting had been resumed in Tunisia in order to "weaken the French military effort in Algeria."

A considerable increase in terrorist activities occurred during May. Five people were killed and several injured in four incidents in Tunis on May 12-13, M Mekki Ben Azouz, leader of the small Tunisian National Party, was killed on May 20 after he had fired on the guards outside M. Bourguiba's house, one of whom was also killed; and two French soldiers were murdered in the Cape Bon area on May 23, when a French post was attacked by terrorists who were subsequently arrested The Minister of the Interior (M. Mehiri) announced on May 21 that eight Frenchmen had been arrested as members of a counter-terrorist organization known as the "Red Hand," which was alleged to be responsible for one of the incidents on May 13, and that others, including a senior police official, were being sought Six more Frenchmen were arrested on the following day, and two others on July 5

Creation of High Court for Political Offences.

The Tunisian Government decided on April 19 to establish for a period of six months a High Court of Justice to try political offences, as well as "all acts detrimental to the higher interests of the State" and "certain offences in matters concerning the right of association and the Press." The first death sentence passed by the new court—imposed on a terrorist accused of the murder of a lawyer—was carried out on May 16.
(Le Monde, Paris - Le Figaro, Paris) **(Prev. rep. 14812 A.)**

A. RUMANIA. — Art Treasures returned to Rumania by Soviet Government.

The Rumanian News Agency (*Agerpres*) announced in June that the Soviet Government had decided to return to Rumania a large collection of historical and art treasures which had been handed over by the Rumanian Government for safe-keeping in Russia during the First World War, when Rumania and Russia were allies. It was stated that these treasures, together with Soviet treasures and archives, had been evacuated to the interior of the U.S.S.R. for safe-keeping during the Second World War [No explanation was given as to why the Rumanian art treasures had not been returned during the inter-war period.]

The announcement said that the treasures to be returned would include 1,350 paintings, drawings, and engravings by well-known Rumanian artists; 156 painted icons of the 16th and 17th centuries; church plate and ecclesiastical robes and vestments of the same period; and over 35,000 valuable coins and medals, including Greek coins of the sixth and seventh centuries B.C. and gold coins of the Macedonian kings, the Egyptian pharaohs, and the Roman and Byzantine emperors.
(Agerpres, Bucharest)

B. PORTUGAL. — Establishment of Corporations.

The Government's proposals for the creation of corporations for agriculture, industry, commerce, transport and tourism, credit and insurance, and the fishing and canning industry were approved by the Portuguese National Assembly on July 19.—(Times) **(Prev. rep. 14779 B.)**

A. EGYPT. — Withdrawal of U.S. and British Offers to aid in Financing of Aswan Dam Project.

The Egyptian Government was informed by the United States on July 19, and by Great Britain on July 20, that U.S. and British participation in financing the projected High Dam at Aswan was " not feasible in present circumstances." It was understood that this decision had been taken on economic grounds after consultation between the U.S. and British Governments. The following explanatory statement was issued by the U.S. State Department :

" At the request of the Government of Egypt, the U S.A joined in December, 1955, with the United Kingdom and with the World Bank in an offer to assist Egypt in the construction of a High Dam on the Nile at Aswan. This project . . would require an estimated 12 to 16 years to complete at a total cost estimated at some $1,300,000,000, of which over $900,000,000 represents local currency requirements It involves not merely the rights and interests of Egypt, but of other States whose waters are contributory, including the Sudan, Ethiopia, and Uganda

" The December offer [see 14620 A] contemplated an extension by the U S A. and the U K. of grant aid to help finance certain early phases of the work, the effects of which would be confined solely to Egypt, with the understanding that accomplishment of the project as a whole would require a satisfactory solution of the question of Nile water rights Another important consideration bearing upon the feasibility of the undertaking, and thus the practicability of American aid, was Egyptian willingness and ability to concentrate its economic resources upon this vast reconstruction programme.

" Developments within the succeeding seven months have not been favourable to the success of the project, and the U S. Government has concluded that it is not feasable in present circumstances to participate in the project. Agreement by the riparian States has not been achieved, and the ability of Egypt to devote adequate resources to assure the project's success has become more uncertain than at the time the offer was made

" This decision in no way reflects or involves any alteration in the friendly relations of the United States and Egypt The U.S.A remains deeply interested in the welfare of the Egyptian people and in the development of the Nile It is prepared to consider at an appropriate time and at the request of the riparian States what steps might be taken toward a more effective utilization of the water resources of the Nile for the benefit of the peoples of the region Furthermore, the U.S A remains ready to assist Egypt in its effort to improve the economic condition of its people, and is prepared . . . to discuss these matters within the context of funds appropriated by Congress "

The U.S. decision was conveyed by Mr. Dulles to the Egyptian Ambassador in Washington, Dr. Ahmed Hussein. On July 17, Dr. Hussein had announced—after returning from Cairo—that Egypt had definitely decided to accept the help of the U.S. and British Governments and the World Bank in carrying out the Aswan Dam scheme, and that he intended to see Mr. Dulles with a view to speeding-up negotiations for a financial agreement.

No statement was issued by the British Foreign Office other than the announcement that U.K. participation in the Aswan Dam project was " not feasible in present circumstances."

The Diplomatic Correspondent of *The Times* commented as follows. " Since the [U S and British] offers were made, and an agreement with the World Bank worked out in February for a further loan of $200,000,000 [see below], doubts have been growing on the capacity of the Egyptian economy to stand its share of the cost. The Egyptian Government has been evidently anxious to press on at the same time with an ambitious programme of industrialization, which must eat into its foreign exchange reserves and leave it with an unsatisfactory balance of payments Moreover, the recent deal by which Communist arms are exchanged for Egyptian cotton means that much of the cotton crop, which is the country's most important export, is no longer available as a source of foreign exchange."

The *New York Times* said that the phrase in the State Department's announcement, " the ability of Egypt to devote adequate resources to assure the project's success has become more uncertain than at the time the offer was made," was " an allusion to a series of deals by which Egypt has mortgaged her cotton crop for years ahead in barter agreements with Communist China and other Communist countries." Among the reasons believed to be behind the U.S. refusal to assist in financing the Aswan Dam project, the *New York Times* adduced the following . (*a*) the fact that the Egyptian regime " appeared to be working against Western interests at every possible point—against the British in Jordan, Saudi Arabia, and Cyprus, against the French in North Africa, and against the West generally in the interior of Africa " ; (*b*) the fact that Egyptian propaganda seemed " closely attuned to that of the Soviet Union " , and (*c*) Congressional opposition, in which connexion it was pointed out that the Senate Appropriations Committee had asked that appropriations for the Aswan Dam project should not be included in the Foreign Aid legislation now before Congress without the Committee's consent.

The President of the World Bank, Mr. Eugene Black, visited Cairo from Jan. 29 to Feb. 9, at the invitation of the Egyptian Government, to discuss the possibility of a loan from the Bank in financing the Aswan Dam project. It was announced on Feb. 9 that the talks had resulted in " a substantial agreement on the basis on which the Bank will, when requested, take part in the foreign financing of the High Dam scheme with an amount equal to $200,000,000 of the total foreign currency needed to cover the expenses of the scheme. " After the withdrawal of the U.S. and U.K. offers, however, the World Bank announced on July 24 that its proposed loan offer of $200,000,000 for the Aswan Dam had " automatically expired."

The Soviet Foreign Minister, M. Shepilov, said on July 22 that the U.S.S.R. did not regard the question of financing the Aswan Dam as an " urgent problem," since there were " many other problems not less vital for the Egyptian economy, particularly those connected with industrialization." He reiterated, however, that the Soviet Government would give " favourable and friendly consideration " to economic aid if Egypt should request it.

During his recent visit to Cairo (see 14959 A) it had been reported —though not officially substantiated—that M. Shepilov had offered to supplement the earlier Soviet offer of participation in the Aswan Dam project (see 14486 A). In his statement of July 22, however (made at a Belgian Embassy reception in Moscow), M Shepilov said that his visit to Egypt had given him the impression that industrialization was more important to that country than the Aswan Dam scheme, though he did not " minimize " the latter's importance.

A bitter attack on the United States was made by President Nasser on July 24, speaking at the opening of a new oil pipeline from Cairo to Suez.

Ridiculing the argument that the withdrawal of Western support for the High Dam project was based on doubts about Egypt's economic strength, President Nasser declared . " If rumour in Washington tries to make out that the Egyptian economy is not strong enough to warrant American aid, I reply ' Choke with rage, but you will never succeed in ordering us about or in exercising your tyranny over us, because we know our path—the path of freedom, honour, and dignity . Publish your communiques in Washington and then consider this If these communiques are sincere and due to misinformation on your part, that is unfortunate, but if they are lies designed to mislead opinion, then that is a much greater misfortune for the world power which has constituted itself the champion of liberty. We Egyptians will not allow any colonizer or despot to dominate us politically, economically, or military We shall yield neither to force nor to the dollar ' "

President Nasser made no reference to Britain in his speech. (Times - Manchester Guardian - New York Times)

(Prev. rep. Aswan Dam, 14620 A ; 14486 B)

B. BELGIUM. — Ten-Year Plan for Canal and River Improvements.

Details of a ten-year plan for the widening and deepening of Belgium's rivers and canals were given on July 16 by the Prime Minister, M. Van Acker, and the Minister of Public Works, M. Van Audenhoye. It was explained that the recent decision to extend the port of Antwerp (see 14924 G) had made it necessary to modernize the inland waterway approaches to that city—e.g., whereas the Albert Canal linking Antwerp with Liège was navigable by barges of 2,000 tons, other rivers and canals giving access to Antwerp could only take barges of 300 tons. It had accordingly been decided to widen or deepen the following rivers and canals so as to make them navigable for barges of 1,350 tons—the River Meuse from the Dutch to the French frontiers ; the River Sambre between Namur and Monceau ; the River Scheldt from Antwerp to Ghent ; and the Brussels-Charleroi Canal. Improvements would also be made to the ports of Zeebrugge and Ghent. The cost of the ten-year plan up to 1966 was estimated at 11,000,000,000 Belgian francs (over £78,500,000).—(La Nation Belge, Brussels)

(Prev. rep. 14924 G.)

C. VENEZUELA. — Naval Expansion.

The 2,600-ton destroyer *Aragua*, the last of three heavy destroyers built in Britain for the Venezuelan Navy, arrived on March 31 at the Venezuelan port of Turiamo. The two other vessels of this class, the *Nueva Esparta* and *Zulia*, had already joined the Venezuelan fleet. Built by Vickers-Armstrong, they are armed with six 105-mm. guns, eight anti-aircraft guns, and three 21-in. torpedo-tubes, and have a complement of 156 officers and men. They are among the largest destroyers in the world, and the most powerful of any Latin American navy. (Venezuelan Embassy, Washington)

D. VATICAN. — U.S. War Damage Payment.

A Bill granting $964,199 to the Holy See as compensation for accidental wartime damage to the Papal summer residence and domain at Castelgandolfo, near Rome, was signed by President Eisenhower early in July. The damage occurred in U.S. air attacks on German encampments near Castelgondolfo, the payment agreed upon representing about two-thirds of the original Vatican claim of about $1,500,000.

(New York Herald Tribune)

A. SOVIET UNION. — M. Khrushchev's Denunciation of Stalin. - Text of Khrushchev Speech published by U.S. State Department. - Lenin's Testament published in Moscow. - Soviet Communist Party Resolution on "Cult of the Individual."

The U.S. State Department published on June 4 the text of the speech made by M. Khrushchev in February last, at the 20th Congress of the Soviet Communist Party, in which he denounced the late Marshal Stalin and the "Stalin cult" which had existed in his lifetime. It was stated in Washington that the State Department placed every reliance on the "confidential source" (unnamed) from which the document had been obtained, that the speech had been made by M. Khrushchev on Feb. 24-25, and that an edited version was understood to have been circulated to Communist parties outside the Soviet Union.

M. Khrushchev's speech, running to some 26,000 words, was published in full in the *New York Times* and, in Britain, by *The Observer* (issue of June 10) and the *Manchester Guardian* (as a special booklet). In this speech M. Khrushchev disclosed, *inter alia*, that the mass repressions of the 1930's had resulted in the execution of thousands of innocent persons at the instigation of Stalin; that torture had been extensively used to extract "confessions"; that the post-war "Leningrad affair" (see 13978 D) and the so-called "doctors' plot" (see 12869 A, 12728 A) had been fabricated by Stalin and Beria; and that Stalin was responsible for the ruthless and unjustified deportation of minorities in the U.S.S.R. during the Second World War. In addition, M. Khrushchev bitterly attacked Stalin's "megalomania" and self-glorification, derided his military capacities and leadership during the war, and said that Stalin had ignored repeated warnings by Sir (then Mr.) Winston Churchill and others that a German attack on the U.S.S.R. was imminent.

The text given below (cross-headings inserted) is summarized from that published by *The Observer*:

"After Stalin's death the Central Committee of the party began to implement a policy of explaining . . . that it is impermissible and foreign to the spirit of Marxism-Leninism to elevate one person, to transform him into a superman possessing supernatural characteristics akin to those of a god. . . . Such a belief about a man, and specifically about Stalin, was cultivated among us for many years.

"The objective of the present report is not a thorough evaluation of Stalin's life and activity. . . . The role of Stalin in the Socialist Revolution, in the Civil War, and in the fight for the construction of Socialism in our country, is universally known. At the present we are concerned with a question which has immense importance for the party now and for the future . . . [we are concerned] with how the cult of Stalin . . . became . . . the source of a whole series of exceedingly grave perversions of party principles, of party democracy, and of revolutionary legality. . . .

Lenin's Criticisms of Stalin. - Lenin's Testament.

"During Lenin's life the Central Committee was a real expression of collective leadership of the party and the nation. . . . Lenin never imposed his views upon his co-workers by force He tried to convince some; he patiently explained his opinions to others. In addition to the great accomplishments of Vladimir Ilyich [Lenin] for the victory of the working class and the peasants. . . . his acute mind expressed itself also in this—that he detected in Stalin those negative characteristics which resulted later in grave consequences

"Fearing for the future fate of the party and the Soviet nation, Lenin made a completely correct characterization of Stalin, pointing out that it was necessary to consider the question of transferring him from the position of Secretary-General because of the fact that 'Stalin is excessively rude, that he does not have a proper attitude towards his comrades, that he is capricious and abuses his power.'

"In December, 1922, in a letter to the party congress, Vladimir Ilyich wrote: 'After taking over the position of Secretary-General, Comrade Stalin accumulated in his hands immeasurable power, and I am not certain whether he will be always able to use this power with the required care' This letter—a political document of tremendous importance, known as Lenin's 'testament'—has been distributed among the delegates to the 20th Party Congress. You have read it, and will undoubtedly read it more than once.

"You might reflect on Lenin's plain words, in which expression is given to his anxiety concerning the party, the people, the State, and the future direction of party policy. He said: 'Stalin is excessively rude, and this defect, . . . cannot be tolerated in one holding the position of Secretary-General. Because of this, I propose that the comrades consider the method by which Stalin would be removed from this position and another man selected for it—a man who would differ from Stalin in possessing greater tolerance, greater loyalty, greater kindness, a more considerate attitude towards the comrades, a less capricious temper, etc.'

"This document of Lenin's was made known to the delegates at the 13th Party Congress, who discussed the question of transfering Stalin from the position of Secretary-General The delegates declared themselves in favour of retaining Stalin in this post, hoping that he would heed the critical remarks of Vladimir Ilyich and would be able to overcome the defects which caused Lenin serious anxiety."

M. Khrushchev went on to give the texts of two other documents "which confirm Stalin's character as already outlined by Lenin in his testament". (1) a letter from Nadezhda Krupskaya (Lenin's wife) to Kamenev (then head of the Politburo), dated Dec. 23, 1922, in which she complained of Stalin's rudeness towards her, and in which she begged for protection against the "vile invectives and threats" to which she had been subjected by Stalin, and (2) a letter from Lenin to Stalin (March 1923) reprimanding the latter for his rudeness to Mme Lenin, and asking him whether he was prepared to retract his words and apologize or whether he preferred "the severance of relations between us."

"I will not comment on these documents," M. Khrushchev continued. "They speak eloquently for themselves. Since Stalin could behave in this manner towards Nadezhda Krupskaya, an active fighter for the cause of the party since its creation, we can easily imagine how he treated other people. . . . As later events have proven, Lenin's anxiety was justified . . ."

The Stalinist Purges of the Nineteen-thirties.

"We have to consider this matter seriously and analyse it correctly in order to preclude any possibility of a repetition in any form whatever of what took place during the life of Stalin, who did not tolerate collegiality in leadership and in work, and who practised brutal violence not only towards everything which opposed him, but also towards that which seemed, to his capricious and despotic character, contrary to his concepts.

"Stalin acted not through explanation and patient co-operation with people, but by imposing his concepts and demanding absolute submission to his opinion. Whoever opposed his concepts . . was doomed to removal and to subsequent moral and physical annihilation. This was especially true during the period following the 17th Party Congress, when many prominent party leaders and rank-and-file party workers, honest and dedicated to the cause of Communism, fell victims to Stalin's despotism. . . . It was precisely during this period (1935-1938) that the practice of mass repression through the Government apparatus was born, first against the enemies of Leninism—Trotskyites, Zinovievites, Bukharinites, long since politically defeated by the party—and subsequently against many honest Communists. . . .

"Stalin originated the concept 'enemy of the people.' This term automatically rendered it unnecessary that the ideological errors of a man or men engaged in a controversy be proven; it made possible the usage of the most cruel repression against anyone who in any way disagreed with Stalin . . In the main, and in actuality, the only proof of guilt used . was the 'confession' of the accused himself; and, as subsequent investigations have proved, 'confessions' were acquired through physical pressures against the accused This led to glaring violations of revolutionary legality, and to the fact that many entirely innocent persons who in the past had defended the party line became victims.

"With regard to those persons who in their time had opposed the party line, there were often no sufficiently serious reasons for their physical annihilation The formula 'enemy of the people' was specifically introduced for the purpose of physically annihilating such individuals. It is a fact that many persons who were annihilated as 'enemies of the people' had worked with Lenin during his life. Some of these persons had made errors during Lenin's lifetime, but, despite this, Lenin benefited by their work, corrected them, did everything possible to retain them in the ranks of the party, and induced them to follow him.

"An entirely different relationship with people characterized Stalin. Lenin's traits—patient working with people; painstaking education of them; the ability to induce people to follow him without using compulsion, but rather through the ideological influence on them of the whole collective [leadership]—were entirely foreign to Stalin He discarded the Leninist method of convincing and educating; he abandoned the method of ideological struggle for that of administrative violence, mass repression, and terror. . . Arbitrary behaviour by one person encouraged arbitrariness in others. Mass arrests and deportations of many thousands of people, execution without trial and without normal investigation, created conditions of insecurity, fear, and even desperation. . . .

"Let us recall some historical facts. In the days before the October Revolution, two members of the Central Committee of the Bolshevik Party—Kamenev and Zinoviev—declared themselves against Lenin's plan for an armed uprising In addition, they published in the Menshevik newspaper, *Novaya Zhizn*, a statement declaring that the Bolsheviks were making preparations for an uprising, and that they considered it adventuristic. Kamenev and Zinoviev thus disclosed to the enemy the decision of the Central Committee to stage the uprising. . . . However, after the great revolution Zinoviev and Kamenev were given leading positions by Lenin, who placed them in positions in which they carried out responsible party tasks . . . It is known that Zinoviev and Kamenev committed a number of other serious errors during Lenin's life. In his 'testament' Lenin warned that 'Zinoviev's and Kamenev's October episode was of course not an accident.' But Lenin did not pose the question of their arrest, and certainly not of their shooting.

"Or let us take the example of the Trotskyites. After a sufficiently long historical period, we can speak about the fight against the Trotskyites with complete calm and objectivity. . . . We can name many individuals who in their time joined the Trotskyites, but who took an active part in the workers' movement before the Revolution itself, and in the consolidation of the victory of the revolution. . . . Was it necessary to annihilate such people? We are deeply convinced that had Lenin lived such an extreme method would not have been used against many of them. . . .

" Lenin used severe methods only in the most necessary cases—when the exploiting classes were still in existence and were vigorously opposing the Revolution; when the struggle for survival was assuming the sharpest forms, including a Civil War. Stalin, on the other hand, used extreme methods and mass repression when the Revolution was already victorious, when the Soviet State was strengthened, when the exploiting classes were liquidated, when Socialist relations were rooted solidly in all phases of the national economy, when our party was politically consolidated and had strengthened itself both numerically and ideologically. Stalin showed in a whole series of cases his intolerance, brutality, and abuse of power. . . . and . . . often chose the path of repression and physical annihilation, not only against actual enemies, but also against individuals who had not committed any crimes against the party and the Soviet Government. Here we see a demonstration of the brutal force which had once so alarmed Lenin. . . .

" There was no matter so important that Lenin himself decided it without asking for the advice and approval of the Central Committee members, or of the members of the Committee's Political Bureau. In the most difficult period for our party and our country, Lenin considered it necessary regularly to convoke congresses, party conferences, and plenary sessions of the Central Committee at which all important questions were discussed and where resolutions, carefully worked out by the collective leadership, were approved. . . .

"Whereas during the first few years after Lenin's death party congresses and Central Committee plenums [i.e meetings] took place more or less regularly, later, when Stalin began increasingly to abuse his power, these principles were brutally violated. This was especially evident during the last 15 years of his life. Was it a normal situation when over 13 years elapsed between the 18th and 19th Party Congresses—years during which our party and our country had experienced so many important events? These events demanded categorically that the party should have passed resolutions pertaining to the country's defence during the Patriotic War [i.e. the Second World War] and to post-war construction. Even after the end of the war a congress was not convened for over seven years Central Committee plenums were hardly ever called. It should be sufficient to mention that during all the years of the Patriotic War not a single Central Committee plenum took place. . . .

Rehabilitation of Victims of Purges. - Denunciation of Forced "Confessions."

Reverting to the " purges " of the 1930's, M. Khrushchev said that a large quantity of material in the archives of the NKVD [the secret police, formerly known as the G P.U] had now become available, establishing " many facts pertaining to the fabrication of cases against Communists, to false accusations, and to glaring abuses of Socialist legality which resulted in the death of innocent people " He continued .

" It became apparent that many who were branded in 1937-1938 as ' enemies ' were actually never enemies, spies, wreckers, etc., but honest Communists. They were only so stigmatized and often, no longer able to bear barbaric tortures, they accused themselves—at the order of the investigative judges—of all kinds of grave and unlikely crimes. The investigating commission has presented to the Central Committee's Presidium lengthy and documented materials pertaining to mass repressions against the delegates to the 17th Party Congress and against members of the Central Committee elected at that congress. These materials have been studied by the Presidium of the Central Committee. It has been determined that of the 139 members and candidates of the party's Central Committee who were elected at the 17th Congress, 98 were arrested and shot, mostly in 1937-1938. . . The same fate was met not only by the Central Committee members, but also by the majority of delegates to the 17th Party Congress. Of 1,966 delegates with either voting or advisory rights, 1,108 were arrested on charges of anti-revolutionary crimes . . . The delegates to that congress were active participants in the building of our Socialist State; many of them suffered and fought for the party during the pre-revolutionary years and in the Civil War . . How can we believe that such people could prove to be ' two-faced ' and had joined the camp of the enemies of Socialism? . . .

" The mass repressions of that time were made under the slogan of a fight against the Trotskyites. Did the Trotskyites at that time actually constitute such a danger to our party and to the Soviet State? We should recall that in 1927, on the eve of the 15th Party Congress, only some 4,000 votes were cast for the Trotskyite-Zinovievite opposition, while there were 724,000 for the party line During the ten years which followed the 15th Party Congress, Trotskyism was completely disarmed and many former Trotskyites had changed their views. . . . It is clear that in this situation there was no basis for mass terror in the country.

" Stalin's report at the February-March Central Committee plenum in 1937, ' Deficiencies of party work and methods for the liquidation of Trotskyites and other two-facers,' contained an attempt at theoretical justification of the mass terror policy under the pretext that as we march forward toward Socialism, class war must allegedly sharpen. Stalin asserted that both history and Lenin taught him this. Actually Lenin taught that the application of revolutionary violence is necessitated by the resistance of the exploiting classes, and this referred to the era when the exploiting classes existed and were powerful. As soon as the nation's political situation had improved, when in January, 1920, the Red Army took Rostov and thus won a most important victory over Denikin, Lenin instructed Dzherzhinsky [first head of the Bolshevik secret police] to stop mass terror and to abolish the death penalty. . . .

" Stalin deviated from these clear and plain precepts of Lenin. He put the party and the NKVD to the use of mass terror when the exploiting classes had been liquidated in our country and when there were no serious reasons for the use of mass terror. This terror was actually directed not at the remnants of the defeated exploiting classes, but against honest workers of the party and of the Soviet State. Against them were made lying, slanderous and absurd accusations of ' two-facedness,' ' espionage,' ' sabotage,' etc. . . .

" When the cases of some of these so-called spies ' and ' saboteurs ' were examined, it was found that all were fabricated In many cases confessions of guilt were obtained with the help of cruel and inhuman tortures . . . The Central Committee considers it absolutely necessary to inform the Congress of many such fabricated ' cases ' against members of the party's Central Committee elected at the 17th Party Congress. . . . "

M. Khruschev went on to give many instances of " vile provocation, odious falsification, and criminal violation of revolutionary legality " during the 1930's which had resulted in the execution of many innocent and patriotic party leaders on trumped-up charges which had now been found completely baseless. Among them were M. Eikhe, formerly a leading member of the Government and the party, who was executed in 1940 after a " confession " had been extracted from him by torture; M. Rudzutak and M. Komarov, two " Old Bolsheviks " who had similarly lost their lives in the purges and had since been proved completely innocent; M. Kossior and M. Chubar, two former members of the Politburo who disappeared in 1938; M. Kosaryev, former secretary-general of the League of Communist Youth (Komsomols), who was liquidated in 1938; and M Postyshev, a Ukrainian party leader, who had disappeared in 1937. All these party members, and very many others, had been proved completely innocent of the charges of " sabotage," " espionage," etc., brought against them at the time, and had been executed without proper trial and without any opportunity to defend themselves. M. Khruschev particularly denounced Yezhov, the former chief of the secret police, for his share in these crimes, but at the same time emphasized that " these matters were decided by Stalin, and without his orders and sanction Yezhov could not have done this "

" In those years," M. Khrushchev continued, " repression on a mass scale was applied which was based on nothing tangible and which resulted in heavy losses to the party. The vicious practice was condoned of having the NKVD draw up lists of persons whose sentences were prepared in advance. Yezhov would send these lists to Stalin personally for his approval of the proposed punishment. In 1937-38, 383 such lists containing the names of many thousands of party, soviet, komsomol, army and economic workers were sent to Stalin. He approved these lists. A large part of these cases are now being reviewed, and a great part of them are being voided because they are baseless and falsified. Suffice it to say that from 1954 to the present time, the Military Collegium of the Supreme Court has rehabilitated 7,679 persons, many of whom were rehabilitated posthumously. . . .

" Stalin was a very distrustful man; we knew this from our work with him. He could look at a man and say ' ' Why are your eyes so shifty to-day? ' or ' Why are you avoiding looking me directly in the eyes? ' This sickly suspicion created in him a general distrust even towards eminent party workers whom he had known for years. Everywhere and in everything he saw ' enemies,' ' two-facers,' and ' spies.' . . .

" When Stalin said that one or another person should be arrested, it was necessary to accept on faith that he was an ' enemy of the people.' Meanwhile Beria's gang, which ran the organs of State Security, outdid itself in proving the ' guilt ' of the accused and the ' truth ' of materials which it falsified. And what proofs were offered? The ' confessions ' of the arrested, which were accepted by the investigative judges. How is it possible that a person confesses to crimes which he has not committed? Only in one way—through the application of physical methods of ' pressuring ' him, of torture, of bringing him to a state of unconsciousness, of depriving him of his judgment, of taking away his human dignity. In this manner were ' confessions ' acquired . . .

" Not long ago—only several days before the present congress—we called before the Central Committee's Presidium and interrogated the investigative judge Rodos, who in his time interrogated Kossior, Chubar, and Kosaryev. He is a vile person, with the brain of a bird, and morally completely degenerate. It was this man who decided the fate of prominent party workers. . . The question arises whether such a man alone could make the investigation in a manner to prove the guilt of people such as Kossior and others. No, he could not have done it without proper directives. At the Presidium's session he told us ' I was told that Kossior and Chubar were enemies of the people, and for this reason I, as an investigative judge, had to make them confess that they were enemies ' He could do this only through torture, which he did, receiving detailed instructions from Beria. At the session he [Rodos] cynically declared : ' I thought that I was executing the orders of the party ' . . .

Denunciation of Stalin's Military Strategy in World War II.

" The power accumulated in the hands of Stalin led to serious consequences during the Great Patriotic War. When we look at many of our novels, films and ' historical-scientific studies,' the role of Stalin in the war appears to be entirely improbable. Stalin had foreseen everything ! The Soviet Army, on the basis of a strategic plan prepared by Stalin long before, used the tactics of so-called ' active defence '—tactics which, as we know, allowed the Germans to reach Moscow and Stalingrad. Using such tactics, the Soviet Army,

supposedly thanks to Stalin's genius, turned to the offensive and subdued the enemy. The epic victory gained by our heroic people is ascribed in this type of novel, film and 'scientific study' as being entirely due to the strategic genius of Stalin . .

"During and after the war Stalin put forward the thesis that the tragedy which our nation experienced in the first part of the war was the result of the 'unexpected' attack of the Germans against the Soviet Union. But this is completely untrue. As soon as Hitler came to power in Germany he assigned to himself the task of liquidating Communism The Fascists said this openly, they did not hide their plans To attain this aggressive end all sorts of pacts and blocs were created, such as the famous Berlin-Rome-Tokio Axis. Many facts from the pre-war period clearly showed that Hitler was going all out to begin a war against the Soviet State, and that he had concentrated large armoured units near the Soviet borders

"Documents which have now been published show that by April 3, 1941, Churchill, through his Ambassador to the U S S R. [Sir Stafford Cripps], personally warned Stalin that the Germans had begun regrouping their units with the intention of attacking the Soviet Union . . Churchill stressed this repeatedly in dispatches of April 18 and in the following days. However, Stalin took no heed of these warnings What is more, Stalin ordered that no credence be given to information of this sort, in order not to provoke the initiation of military operations

"Information concerning the threat of a German invasion of Soviet territory was also coming in from our own military and diplomatic sources. . For instance, information sent from Berlin on May 6, 1941, by the Soviet Military Attaché, Captain Vorontsov, stated: 'Soviet Citizen Bozer . communicated to the Deputy Naval Attaché that according to a statement of a certain German officer from Hitler's headquarters, Germany is preparing to invade the U.S.S R on May 14 through Finland and the Baltic countries. At the same time Moscow and Leningrad will be heavily raided and para-troopers dropped in border cities . '

"In a report of May 22, 1941, the Deputy Military Attaché in Berlin, Khlopov, communicated that ' the attack of the German Army is reportedly scheduled for June 15, but it is possible that it may begin in the first days of June '

"A cable from our London Embassy dated June 18, 1941, stated: '. . Cripps is deeply convinced of the inevitability of armed conflict between Germany and the U.S S R., which will begin not later than the middle of June. According to Cripps, the Germans have concentrated 147 divisions along the Soviet borders. . .'

"Despite these grave warnings, the necessary steps were not taken to prepare the country properly for defence, and to prevent it from being caught unawares. . . .

"Shortly before the Hitlerite invasion, Korponos, who was Chief of the Kiev Military District, wrote to Stalin that the German armies were at the Bug River, were preparing for an attack, and in the very near future would probably start their offensive. Korponos proposed that a strong defence be organized, that 300,000 people be evacuated from the border areas, and that strongpoints be organized there: anti-tank ditches, trenches, etc Moscow answered this proposition with the assertion that it would be a provocation, that no preparatory defensive work should be undertaken at the borders, that the Germans were not to be given any pretext for the initiation of military action against us Thus our borders were insufficiently prepared to repel the enemy.

"When the Fascist armies had actually invaded Soviet territory and military operations began, Moscow issued the order that the German fire was not to be returned Why? It was because Stalin, despite evident facts, thought that the war had not yet started, that this was only a provocative action on the part of undisciplined sections of the German Army, and that our reaction might serve as a reason for the Germans to begin the war.

"The following fact is also known. On the eve of the invasion of the Soviet Union, a certain German citizen crossed our border and stated that the German armies had received orders to start the offensive against the Soviet Union on the night of June 22, at 3 a.m Stalin was informed about this immediately, but even this warning was ignored As you see, everything was ignored . warnings by army commanders, declarations by deserters from the enemy army, even the open hostility of the enemy. Is this an example of the alertness of the Chief of the Party and of the State at a particularly significant historical moment?

"What were the results of this carefree attitude, this disregard of clear facts? The result was that in the first hours and days of the invasion the enemy had destroyed in our border regions a large part of our air force, artillery, and other military equipment, annihilated large numbers of our military cadres, and disorganized our military leadership. Consequently we could not prevent the enemy from marching deep into the country.

"Very grievous consequences, especially in reference to the beginning of the war, followed Stalin's annihilation of many military commanders and political workers during 1937-1941 because of his suspiciousness and through slanderous accusations. During these years repressions were instituted against certain military cadres, beginning literally at company- and battalion-commander level and extending to the higher military centres During this time the cadre of leaders who had gained military experience in Spain and in the Far East was almost completely liquidated. The policy of large-scale repression of the military cadres led to undermined military discipline, because for several years officers of all ranks . . . were taught to 'unmask' their superiors as hidden enemies. It is natural that this caused a negative influence on the state of military discipline in the first period of the war. . . .

"After the first severe defeats at the front, Stalin thought that this was the end. In one of his speeches in those days he said 'All that Lenin created we have lost forever.' After this Stalin for a long time actually did not direct military operations, and ceased to do anything whatever. He returned to active leadership only when some members of the Political Bureau visited him and told him that it was necessary to take certain steps immediately to improve the situation at the front. Therefore, the threatening danger which hung over our fatherland in the first period of the war was largely due to the faulty methods of directing the nation and the party by Stalin himself. .

"Stalin was very far from understanding the real situation which was developing at the front. This was natural, because during the whole war he never visited any section of the front or any liberated city except for one short ride on the Mozhaisk highway during a stabilized situation at the front To this incident were dedicated many literary works full of fantasies of all sorts, and also many paintings. Simultaneously, Stalin was interfering with operations and issuing orders which did not take into consideration the real situation at the front, and which could not help but result in huge personnel losses.

"I will allow myself in this connexion to bring out one characteristic fact which illustrates how Stalin directed operations at the front. There is present at this congress Marshal Bagramyan, who was Chief of Operations on the South-Western front, and who can corroborate what I tell you When there developed an exceptionally serious situation in the Kharkov region, we had correctly decided to drop an operation whose objective was to encircle Kharkov, because the real situation at that time would have threatened our army with fatal consequences if this operation were continued. We communicated this to Stalin, stating that the situation demanded changes in operational plans so that the enemy would be prevented from liquidating a sizeable concentration of our army.

"Contrary to common sense, Stalin rejected our suggestion and issued the order to continue the operation for the encirclement of Kharkov, despite the fact that at this time many army concentrations were themselves actually threatened with encirclement and liquidation I telephoned to Marshal Vassilevsky, then Chief of Staff (who is present here), and begged him: 'Take a map and show Comrade Stalin the situation which has developed' We should note that Stalin planned operations on a globe, yes, he used to take the globe and trace the front line on it! I said to Comrade Vassilevsky: 'Show him the situation on a map, in the present situation we cannot continue the operation which was planned' Vassilevsky replied saying that Stalin had already studied this problem and that he, Vassilevsky, would not see Stalin further concerning this matter, because the latter did not want to hear any arguments on the subject of this operation.

"After my talk with Vassilevsky I telephoned to Stalin at his villa. But Stalin did not answer the telephone and Malenkov was at the receiver I told Comrade Malenkov that I was calling from the front and that I wanted to speak personally to Stalin Stalin informed me through Malenkov that I should speak with Malenkov. I stated for the second time that I wished to inform Stalin personally about the grave situation which had arisen at the front But Stalin did not consider it convenient to raise the phone and again stated that I should speak to him through Malenkov, although he was only a few steps from the telephone.

"After 'listening' in this manner to our plea Stalin said, 'Let everything remain as it is!' And what was the result? The worst that we had expected. The Germans surrounded our army concentrations, and consequently we lost hundreds of thousands of our soldiers This is Stalin's military 'genius'; this is what it cost us. . .

"Everyone can err, but Stalin considered that he never erred, that he was always right. He never acknowledged to anyone that he made any mistake, large or small. . . . After the party congress we shall probably have to re-evaluate many wartime military operations and present them in their true light.

"The tactics on which Stalin insisted, without knowing the essence of the conduct of battle operations, cost us much blood until we succeeded in halting the enemy and going over to the offensive. The military know that by the end of 1941, instead of great operational manoeuvres flanking the enemy and penetrating his rear, Stalin demanded incessant frontal attacks and the capture of one village after another. Because of this we paid with great losses until our generals, on whose shoulders rested the whole weight of conducting the war, succeeded in changing the situation and shifting to flexible manoeuvre operations, which immediately brought changes at the front favourable to us All the more shameful was the fact that after our great victory over the enemy, which cost us so much, Stalin began to down-grade many of the commanders who contributed so much to the victory over the enemy. . . .

"Stalin was very much interested in the assessment of Comrade Zhukov [now Minister of Defence] as a military leader. He asked me often for my opinion of Zhukov. I told him, 'I have known Zhukov for a long time; he is a good general and a good military leader.' After the war Stalin began to say all kinds of nonsense about Zhukov, among others the following: 'You praise Zhukov, but he does not deserve it. It is said that before each operation at the front Zhukov used to take a handful of earth, smell it, and say, 'We can begin

the attack,' or ' the planned operation cannot be carried out.' I stated at that time : ' Comrade Stalin, I do not know who invented this, but it is not true ' It is possible that Stalin himself invented these things for the purpose of minimizing the role and military talents of Marshal Zhukov.

Stalin's Military Self-Adulation.

" Stalin very energetically popularized himself as a great leader. In various ways he tried to inculcate in the people the version that all victories gained by the Soviet nation during the war were due to the courage, daring, and genius of Stalin, and of no-one else. . Let us take, for instance, our historical and military films and some literary creations They make us feel sick Their true objective is the propagation of the theme of praising Stalin as a military genius Let us recall the film *The Fall of Berlin* Here only Stalin acts. He issues orders in a hall in which are many empty chairs, and only one man approaches him and reports something to him—Poskrebyshev, his loyal shield-bearer.

[Mr Edward Crankshaw, the authority on Soviet affairs, explained in the *Observer's* account of M. Khrushchev's speech : ' *Poskrebyshev was Stalin's confidential aide, a grey and sinister eminence who stood behind Stalin's worst excesses and disappeared without trace the day his master died* ']

" Where is the Military Command ? Where is the Political Bureau ? Where is the Government ? What are they doing and with what are they engaged ? There is nothing about them in the film. Stalin acts for everybody ; he does not reckon with anyone , he asks no-one for advice Everything is shown to the nation in this false light. Why ? In order to surround Stalin with glory, contrary to the facts and contrary to historical truth. . .

" Not Stalin, but the party as a whole, the Soviet Government, our heroic army, its talented leaders and brave soldiers, the whole Soviet people—these are the ones who assured victory in the war . . .

Wartime Deportation of Minorities.

" Let us reach for some other facts The Soviet Union is justly considered as a model of a multi-national State, because we have in practice assured the equality and friendship of all nations which live in our fatherland All the more monstrous were the acts whose initiator was Stalin, and which were rude violations of the basic Leninist principles of the nationality policy of the Soviet State We refer to the mass deportations from their native places of whole nations—action which was not dictated by any military considerations.

" At the end of 1943, when there occurred a permanent breakthrough at the front in our favour, a decision was taken and executed concerning the deportation of all the Karachai from the lands on which they lived. In the same period, at the end of December 1943, the same lot befell the whole population of the Autonomous Kalmuck Republic In March 1944, all the Chechen and Ingush peoples were deported and the Chechen-Ingush Autonomous Republic was liquidated. In April 1944, all Balkars were deported to places far away from the territory of the Kabardyno-Balkar Autonomous Republic, and the republic itself was renamed the Autonomous Kabardynian Republic The Ukrainians avoided meeting this fate only because there were too many of them, and there was no place to which to deport them Otherwise he would have deported them also.

" Not only a Marxist-Leninist, but also no man of common sense, can grasp how it is possible to make whole nations responsible for inimical activity, including women, children, old people, Communists and Komsomols , to use mass repression against them , and to expose them to misery and suffering for the hostile acts of individual persons or groups of persons.

The " Leningrad Affair."

" After the conclusion of the Patriotic War. . the country experienced a period of political enthusiasm. The party came out of the war even more united. . . . Under such conditions nobody could have even thought of the possibility of some plot in the party

" It was precisely at this time that the so-called ' Leningrad affair ' was born As we have now proved, this case was fabricated. Those who innocently lost their lives included Comrades Voznessensky, Kuznetsov, Rodionov, Popkov, and others.

[*Voznessensky was the chief Soviet economic planner and a member of the Politburo. He disappeared in 1949 and is now known to have been shot as part of what came to be called the 'Leningrad case' Kuznetsov, Rodionov and Popkov were all high-ranking victims of this case, which was never publicly mentioned until after Stalin's death*]

" Voznessensky and Kuznetsov were talented and eminent leaders Once they stood very close to Stalin. It is sufficient to mention that Stalin made Voznessensky First Deputy to the Chairman of the Council of Ministers, and Kuznetsov was elected Secretary of the Central Committee The very fact that Stalin entrusted Kuznetsov with the supervision of the State security organs shows the trust which he enjoyed. How did it happen that these persons were branded as ' enemies of the people ' and liquidated ? . .

" After the war Stalin became even more capricious, irritable, and brutal. His suspicion grew. His persecution mania reached unbelievable dimensions. Many workers were becoming enemies before his very eyes. Stalin separated himself from the collective [leadership] even more. Everything was decided by him alone, without any consideration for anyone or anything.

" This unbelievable suspicion was cleverly taken advantage of by the abject provocateur and vile enemy, Beria, who had murdered thousands of Communists and loyal Soviet people The elevation of Voznessensky and Kuznetsov alarmed Beria. As we have now proved, it was precisely Beria who had ' suggested ' to Stalin the fabrication by him and by his confidants of material in the form of declarations and anonymous letters, and in the form of various rumours.

" The party's Central Committee has examined this so-called ' Leningrad affair ', persons who innocently suffered are now rehabilitated, and honour has been restored to the Leningrad party organizations Abakumov and others who had fabricated this affair were brought before a court ; their trial took place in Leningrad and they received what they deserved. [*Abakumov, head of the Soviet Ministry of State Security under Beria, was shot in December, 1954.*]

" The question arises : Why is it that we see the truth of this affair only now, and why did we not do something earlier, during Stalin's lifetime, in order to prevent the loss of innocent lives ? It was because Stalin personally supervised the ' Leningrad Affair,' and the majority of Political Bureau members did not, at that time, know all the circumstances and could not therefore intervene. When Stalin received certain material from Beria and Abakumov, without examining this slanderous material he ordered an investigation of the ' affair ' of Voznessensky and Kuznetsov With this, their fate was sealed

The Break with Yugoslavia.

" Stalin's wilfulness showed itself not only in decisions concerning the internal life of the country, but also in the international relations of the Soviet Union The Committee has studied in detail the reasons for the conflict with Yugoslavia. It was a shameful role which Stalin played in this. The ' Yugoslav affair ' contained no problems which could not have been solved through party discussions among comrades There was no significant basis for the development of this ' affair ' ; it was completely possible to have prevented the rupture of relations with that country This does not mean that the Yugoslav leaders did not make mistakes or did not have shortcomings. But these mistakes and shortcomings were magnified in a monstrous manner by Stalin, which resulted in a breakdown of relations with a friendly country.

' I recall the first days when the conflict between the Soviet Union and Yugoslavia began to be blown up artificially. Once, when I came from Kiev to Moscow, I was invited to visit Stalin, who, pointing to the copy of a letter lately sent to Tito, asked me, ' Have you read this ? ' Not waiting for my reply, he answered, ' I will shake my little finger—and there will be no more Tito. He will fall.' We have paid dearly for this ' shaking of the little finger ' This statement reflected Stalin's mania for greatness, but he acted just that way ' I will shake my little finger—and there will be no Kossior ' , ' I will shake my little finger once more—and Postyshev and Chubar will be no more ' , ' I will shake my little finger again—Voznessensky, Kutnetsov, and many others will disappear.'

" But this did not happen to Tito. No matter how much Stalin shook, not only his little finger, but everything else that he could shake, Tito did not fall. The reason was that . . . Tito had behind him a state and a people who had gone through a severe school of fighting for liberty and independence, a people which gave support to its leaders.

" You see to what Stalin's mania for greatness led He had completely lost consciousness of reality ; he demonstrated his suspicion and haughtiness not only in relation to individuals in the U.S S.R , but in relation to whole nations. We have carefully examined the case of Yugoslavia and have found a proper solution which is approved by the peoples of the Soviet Union and of Yugoslavia, as well as by all progressive humanity. . . .

The " Doctors' Plot."

" Let us also recall the ' affair of the doctor-plotters ' Actually there was no ' affair ' outside of the declaration of the woman doctor Timashuk, who was probably influenced or ordered by someone (after all, she was an unofficial collaborator of the organs of State security) to write Stalin a letter in which she declared that doctors were applying supposedly improper methods of medical treatment [*This refers to the alleged killing of the Soviet leaders Shcherbakov and Zhdanov by a group of senior Kremlin doctors, who were also said to have been plotting to poison a number of high-ranking Army commanders*]

" Such a letter was sufficient for Stalin to reach an immediate conclusion that there were doctor-plotters in the Soviet Union. He issued orders to arrest a group of eminent Soviet medical specialists He personally issued advice on the conduct of the investigation and the method of interrogation of the arrested persons. He said that Academician Vinogradov should be put in chains, that another one should be beaten Present at this Congress as a delegate is the former Minister of State Security, Comrade Ignatiev. Stalin told him curtly, ' If you do not obtain confessions from the doctors we will shorten you by a head '

" Stalin personally called the investigative judge, gave him instructions, advised him on which investigative methods should be used These methods were simple—beat, beat, and beat again. Shortly after the doctors were arrested we members of the Political Bureau received protocols with the doctors' ' confessions of guilt ' After distributing these protocols Stalin told us ' You are blind like young kittens , what will happen without me ? The country will perish because you do not know how to recognize enemies.'

" The case was so presented that no-one could verify the facts on which the investigation was based. There was no possibility of trying to verify facts by contacting those who had made the ' confessions of guilt ' We felt, however, that the case of the arrested doctors was questionable. We knew some of these people personally because they had treated us When we examined this ' case ' after Stalin's death, we found it to be fabricated from beginning to end.

"This ignominious 'case' was set up by Stalin, he did not, however, have the time in which to bring it to an end (as he conceived that end), for this reason the doctors are still alive. All have been rehabilitated; they are working in the same places as before; they treat top individuals, not excluding members of the Government; they have our full confidence; and they execute their duties honestly, as they did before.

Denunciation of Beria.

"In organizing the various dirty and shameful cases, a very base role was played by the rabid enemy of our party, an agent of a foreign intelligence service—Beria, who had stolen into Stalin's confidence. In what way could this provocateur gain such a position in the party and in the State, so as to become the first Deputy Chairman of the Council of Ministers and a member of the Central Committee's Political Bureau? It has now been established that this villain had climbed up the Government ladder over an untold number of corpses.

"Were there any signs that Beria was an enemy of the party? Yes, there were. Already in 1937 at a Central Committee plenum, former People's Commissar of Health Protection, Kaminsky, said that Beria worked for the Mussavat intelligence service. But the Central Committee plenum had barely concluded when Kaminsky was arrested and shot. Had Stalin examined Kaminsky's statement? No, because Stalin believed in Beria, and that was enough for him. And when Stalin believed in anyone or anything, then no-one could say anything which was contrary to his opinion. Anyone who dared to express opposition would have met the same fate as Kaminsky."

After citing the cases of a number of party leaders who had been murdered at Beria's investigation on false and trumped-up charges, M. Khrushchev continued. "Here is what the old Communist, Comrade Kedrov, wrote to the Central Committee through Comrade Andreyev [*Andreyev was then a Central Committee secretary; Kedrov, a friend of Lenin's, was liquidated in the purges of the 1930's*].

'I am calling to you for help from a gloomy cell in the Lefortorsky prison. . . . I suffer innocently. Please believe me. Time will testify to the truth. I am not an agent-provocateur. I am not a spy I am not a member of an anti-Soviet organization of which I am being accused on the basis of denunciations. I am not guilty of any other crimes against the party and the Government. I am an old Bolshevik, free of any stain; I have honestly fought for almost 40 years in the ranks of the party for the good and the prosperity of the nation. . . . To-day, I, a 62-year-old man, am being threatened by the investigative judges with severe, cruel and degrading methods of physical pressure. . . . My torture has reached the extreme. My health is broken, my strength and my energy are waning, the end is drawing near. To die in a Soviet prison, branded as a vile traitor to the fatherland—what can be more monstrous for an honest man? . . . Neither the party, nor the Soviet Government, nor the People's Commissar, L P Beria, will permit this cruel injustice. I am firmly certain that given a quiet, objective examination, without any foul rantings and without the fearful tortures, it would be easy to prove the baselessness of the charges. I believe deeply that truth and justice will triumph' After reading this letter, M. Khrushchev added: "The old Bolshevik, Comrade Kedrov, was found innocent by the Military Collegium. But despite this, he was shot at Beria's order."

"Beria also handled cruelly the family of Comrade Ordzhonikidze," M. Khrushchev continued. "Why? Because Ordzhonikidze had tried to prevent Beria from realizing his shameful plans. Beria had cleared from his way all persons who could possibly interfere with him. Ordzhonikidze was always an opponent of Beria, which he told to Stalin Instead of examining this affair and taking appropriate steps, Stalin allowed the liquidation of Ordzhonikidze's brother and brought Ordzhonikidze himself to such a state that he was forced to shoot himself. Such was Beria"

[Mr. Crankshaw wrote in this connexion: '*Ordzhonikidze was one of Stalin's closest colleagues and a man with a reputation for decency. Mystery has always surrounded his death and many have believed, as Khrushchev now confirms, that he was driven to suicide by Stalin.*']

"Beria was unmasked by the party's Central Committee shortly after Stalin's death. As a result of the particularly detailed legal proceedings, it was established that Beria had committed monstrous crimes, and Beria was shot. The question arises why Beria, who liquidated tens of thousands of party workers, was not unmasked during Stalin's life. He was not unmasked earlier because he had utilized very skilfully Stalin's weaknesses; feeding him with suspicions, he assisted Stalin in everything and acted with his support.

The "Cult of the Individual."

"The cult of the individual acquired such monstrous size chiefly because Stalin himself, using all conceivable methods, supported the glorification of his own person. . . One of the most characteristic examples of Stalin's self-glorification and of his lack of even elementary modesty is the edition of his *Short Biography*, which was published in 1948. This book is an expression of the most dissolute flattery, an example of making a man into a godhead, of transforming him into an infallible sage—'the greatest leader, sublime strategist of all times and nations.' . . . We need not give here examples of the loathsome adulation filling this book. All we need to add is that they were all approved and edited by Stalin personally, and some of them were added in his own handwriting to the draft text of the book. . . .

"In the draft text of his book appeared the following sentence: 'Stalin is the Lenin of to-day.' This sentence appeared to Stalin to be too weak, so in his own handwriting he changed it to read: 'Stalin is the worthy continuator of Lenin's work, or, as it is said in our party, Stalin is the Lenin of to-day.' You see how well it is said—not by the nation, but by Stalin himself! It is possible to give many such self-praising appraisals written into the draft text of that book in Stalin's hand. Especially generously does he endow himself with praises pertaining to his military genius, to his talent for strategy. He writes: 'Stalin's military mastership was displayed both in defence and offence. Comrade Stalin's genius enabled him to divine the enemy's plans and defeat them. The battles in which Comrade Stalin directed the Soviet armies are brilliant examples of operational military skill.' . . Such are the shameful facts. . . .

"Or let us take the matter of the Stalin Prizes Not even the Tsars created prizes which they named after themselves. Stalin recognized as the best a text of the national anthem of the Soviet Union which contains not one word about the Communist Party. It contains, however, the following unprecedented praise of Stalin 'Stalin brought us up in loyalty to the people, he inspired us to great toil and acts' . . . We should add for your information that the Presidium of the Central Committee has already passed a resolution concerning the composition of a new text of the anthem, which will reflect the role of the people and of the party.

"And was it without Stalin's knowledge that many of the largest enterprises and towns were named after him? Was it without his knowledge that Stalin monuments were erected in the whole country? It is a fact that Stalin himself signed on July 2, 1951, a resolution of the Council of Ministers concerning the erection on the Volga-Don canal of an impressive monument to Stalin; on Sept. 4 of the same year he issued an order making 33 tons of copper available for the construction of this impressive monument Anyone who has visited the Stalingrad area must have seen the huge statue which was put up there . . . Huge sums were spent to build it at a time when people in this area had lived since the war in huts.

"At the same time Stalin gave proofs of his lack of respect for Lenin's memory. It is not a coincidence that, despite the decision taken over 30 years ago to build a Palace of Soviets as a monument to Vladimir Ilyich, this palace was not built. Its construction was always postponed and the project allowed to lapse. We recall the Soviet Government resolution of Aug 14, 1925, concerning the founding of Lenin Prizes for educational work. This resolution was published, but to this day there are no Lenin Prizes. This, too, should be corrected. . . .

"Stalin loved to see the film *The Unforgettable Year of 1919*, in which he was shown on the steps of an armoured train and where he was practically vanquishing the foe with his own sabre Let Kliment Yefremovich [Marshal Voroshilov, now President of the U S S.R.], our dear friend, find the necessary courage and write the truth about Stalin; after all, he knows how Stalin fought. It will be difficult for Comrade Voroshilov to undertake this, but it would be good if he did it. . . .

"In speaking about the October Revolution and the Civil War, the impression was created that Stalin always played the main role, as if everywhere and always Stalin had suggested to Lenin what to do and how to do it. This is slander against Lenin. I will probably not sin against the truth when I say that 99 per cent of the persons here present heard and knew very little about Stalin before 1924, while Lenin was known to the whole nation, from the children to the greybeards . .

"If we sharply criticize to-day the cult of the individual which was so widespread during Stalin's lifetime, and if we speak about the many negative phenomena generated by this cult, various persons may ask: 'How could it be? Stalin headed the party and the country for 30 years and many victories were gained during his lifetime. . . . Where were the members of the Political Bureau of the Central Committee? Why did they not assert themselves against the cult of the individual in time? Why is this being done only now?'

"First of all we have to consider the fact that the members of the Political Bureau viewed these matters in a different way at different times Initially, many of them backed Stalin actively because Stalin was one of the strongest Marxists, and his logic, strength and will greatly influenced the cadres and party work. It is known that Stalin, after Lenin's death and especially during the first years, actively fought for Leninism against the enemies of Leninist theory and against those who deviated. The party . . . started on a great scale the work of Socialist industrialization, agricultural collectivization, and the cultural revolution. At that time Stalin gained great popularity, sympathy, and support. The party had to fight those who attempted to lead the country away from the correct Leninist path; it had to fight Trotskyites, Zinovievites, Rightists, and the bourgeois Nationalists. This fight was indispensable. Later, however, Stalin, abusing his power more and more, began to fight eminent party and Government leaders and to use terroristic methods against honest people. As we have already shown, Stalin handled in this manner such eminent party and Government leaders as Kossior, Rudzutak, Eikhe, Postyshev, and many others. . . .

"In the situation which then prevailed, I talked often with [Marshal] Nikolai Bulganin Once, when we two were travelling in a car, he said: 'It has happened sometimes that a man goes to Stalin on his invitation as a friend. And when he sits with Stalin, he does not know where he will be sent next, home or to gaol.'

"It is clear that such conditions put every member of the Political Bureau in a very difficult situation. And when we also consider the fact that in the last years [of Stalin's life] the Central Committee plenary sessions were not convened, and that the sessions of the Political Bureau occurred only from time to time, then we will understand how difficult it was for any member of the Political Bureau to take a stand against unjust or improper procedure. . . .

" As we have already shown, many decisions were taken either by one person or in a roundabout way, without collective discussions. The sad fate of Comrade Voznessensky is known to all. It is characteristic that the decision to remove him from the Political Bureau was never discussed but was reached in a devious fashion. In the same way came the decision concerning the removal of Kuznetsov and Rodionov from their posts. The importance of the Political Bureau was reduced and its work was disorganized by the creation within the Political Bureau of various commissions—the so-called ' Quintets,' ' Sextets,' ' Septets ' and ' Novenaries ' [These were *ad hoc* commissions, named and created by Stalin for special purposes—e g foreign affairs, internal affairs, etc]

" One of the oldest members of our party, Klimrent Voroshilov, found himself in an almost impossible situation For several years he was actually deprived of the right of participation in Political Bureau sessions. Stalin forbade him to attend the sessions and to receive documents. When the Political Bureau was in session and Comrade Voroshilov heard about it, he telephoned each time and asked whether he would be allowed to attend Sometimes Stalin permitted it, but always showed his dissatisfaction. Because of his extreme suspicion, Stalin toyed also with the absurd and ridiculous suspicion that Voroshilov was an English agent. It is true—an English agent ! A special tapping device was installed in his home to listen to what was said there. By unilateral decision Stalin also separated one other man from the work of the Political Bureau—Andrei Andreyev. .. It is not excluded that had Stalin remained at the helm for several more months, Comrades Molotov and Mikoyan would probably have not delivered any speeches at this Congress. Stalin evidently had plans to finish off the old members of the Political Bureau He often said that Political Bureau members should be replaced by new ones. His proposal, after the 19th Congress, concerning the selection of 25 persons to the Central Committee's Presidium was aimed at the removal of the old Political Bureau members and the bringing-in of less experienced persons who would extol him in all sorts of ways ..

Future Policy.

" We must abolish the cult of the individual decisively, once and for all. . . . It is necessary for this purpose :

(1) To condemn and eradicate the cult of the individual as alien to Marxism-Leninism . . and to fight inexorably all attempts at restoring this practice in one form or another. . . . In this connexion we will be forced to do much work . . . to correct the widespread erroneous views connected with the cult of the individual in the spheres of history, philosophy, economy, and of other sciences, as well as in literature and the fine arts. It is especially necessary that in the immediate future we compile a serious textbook of the history of our party, which will be edited in accordance with scientific Marxist objectivism ; a textbook of the history of Soviet society ; and a book pertaining to the events of the Civil War and the Great Patriotic War

(2) To continue systematically and consistently the work done by the Party's Central Committee during the last few years—a work characterized by minute observation in all party organizations, from the bottom to the top, of the Leninist principles of party leadership ; characterized, above all, by the main principle of collective leadership ; and finally, characterized by the wide practice of criticism and self-criticism.

(3) To restore completely the Leninist principles of Soviet socialist democracy, expressed in the Constitution of the Soviet Union, and to fight against the abuse of power by individuals. . . . "

The text of " Lenin's testament " was published in full in Moscow on June 30, for the first time for 33 years. Written by Lenin on Jan. 4, 1923, it was read to the eighth party congress held in that year, but had since been kept secret until M. Khrushchev quoted from it at the 20th party congress in February last. The documents contained Lenin's criticisms and warnings about Stalin, as read to the 20th party congress by M. Khrushchev.

A 6,000-word decree on the " elimination of the cult of the individual " was issued by the Central Committee of the Soviet Communist Party on June 30 and published in *Pravda* on July 2. It recapitulated the denunciation of the " personality cult " made by M. Khruschev at the 20th party congress, and noted with satisfaction the " determined stand against the cult of the individual and its consequences " which had been taken at the congress.—(Observer - Times - Manchester Guardian - New York Times - Soviet Weekly) **(Prev. rep. 14817 A ; 14745 A.)**

A. PANAMA. — Presidential Election.

Señor Ernesto de la Guardia, the nominee of the ruling National Patriotic Coalition, was elected to the Presidency of Panama in presidential elections held on May 13. His only opponent was Señor Victor Florencio Goytia, candidate of the National Liberal Party. Señor de la Guardia (51), manager of a brewery, was educated at Dartmouth College, U.S.A.

Elections for a new National Assembly were also held on May 13, the National Patriotic Coalition securing 42 of the 53 seats. The successful candidates included Señora Cecilia Remón, the widow of the late President Remón. (New York Times)

B. SOUTH AFRICA. — Cape Supreme Court upholds Validity of Senate Act and South Africa Act Amendment Act. - Separate Representation of Voters Bill. - Parliamentary Passage.

An application by two Cape Coloureds (Mr. W. D. Collins and Mr. A. J. Brikkels) for an order declaring invalid the Senate Act and the South Africa Act Amendment Act was unanimously dismissed on May 18 by a full bench of the Cape Provincial Division of the South African Supreme Court. Notice of appeal was given against the Court's judgment.

The judgment said that counsel for the applicants (Mr. Graeme Duncan) had questioned whether the Senate as constituted under the Senate Act was a " House of Parliament " within the meaning of the proviso to Section 152 of the South Africa Act, which laid down that any Bill altering or repealing the " entrenched clauses " of the Act must be passed by a two-thirds majority of both Houses in joint session Counsel for the Government (Mr. De Villiers, Q.C.), on the other hand, had contended that Section 25 of the South Africa Act had expressly empowered Parliament to amend the constitution of the Senate after 10 years. In Mr. Duncan's view, a " packed " Senate could not constitute a House of Parliament for the purposes of Section 152, as without this qualification the guarantee contained in this section was not effective The Court's view, however, was that if the words of Sections 25 and 152 were given their plain meaning, Parliament would be empowered to alter the composition of the Senate and thereby to obtain a two-thirds majority for a measure which had previously failed to achieve that majority. It was true [the judgment went on] that this meant that the guarantee was not effective in all circumstances, but if the framers of the South Africa Act had contemplated the necessity of a limitation on Parliament's power to alter the constitution of the Senate, one would have expected such an intention to be expressed in the words of the Act. The Court had therefore reached the " firm conclusion " that " no such limitation can be implied upon the scope of powers expressly granted to Parliament from enacting the Senate Act," and that the factors relied upon by Mr. Duncan did not " justify implying a limitation on the plain meaning of the words ' Houses of Parliament ' in the proviso, so as to exclude the Senate constituted by the Senate Act from being recognized as one of those ' Houses of Parliament.' "

The Separate Representation of Coloured Voters Amendment Bill (for provisions see page 14806) was given a second reading in the House of Assembly on April 20 after a three-day debate. It was strongly opposed by the United, Labour, and Conservative parties, as well as by the Native Representatives.

Mr. H. G. Lawrence (U.P.) denounced the Bill as a breach of the agreement made by Mr. Havenga with Dr. Malan in 1950 that Coloured people should be represented by Coloured members in the Provincial Council, while **Mr. Hepple** (Labour Party) said that the Union Council of Coloured Affairs to be set up under the Bill would make " a mockery of democratic representation," as it would have a majority of Government-nominated members. **Major P. V. G. van der Byl** (U.P.) asserted that the Government was following a road which would eventually lead to the destruction of White civilization in South Africa under the pretence that it was trying to save the country. The Coloured people, he said, had always stood beside the White man because that was their only hope of survival, as they were more worried about being swamped by the Natives than were the Europeans. By the new legislation, however, the Government was alienating the Coloured from the White population.

Dr. Dönges (Minister of the Interior) denied that there was any disloyalty to Mr. Havenga, as the Nationalist Party had never renounced its point of view about its *apartheid* policy and Mr. Havenga had recognized this at the time of his agreement with Dr. Malan. In reply to the Opposition's objections to a majority of nominated members on the Coloured Advisory Council, the Minister pointed out that the Coloured People's Union had refused to sit on such a council unless it was a nominated one ; the Government had therefore decided to take " the middle way " and make the Advisory Council's membership partly nominated and partly elected.

Mr. P. B. Bekker (Cons.) moved an amendment proposing that " while accepting the principles of separate representation and the establishment of a Union Council of Coloured Affairs, Parliament should decline to pass the second reading because the Government has departed from its previous standpoint on the representation of Coloured voters in the Cape Provincial Council as enunciated in legislation of 1951 and 1954." The amendment was rejected, being supported by only four Conservative members ; the United Party members had left the Chamber before the vote, while Dr. Jonker (who later the same day crossed the floor and joined the National Party—see 14870 B) voted with the Government.

An amendment by **Mr. H. G. Lawrence** (U.P.) " that the Bill be read this day six months " was rejected by 71 votes to 47. Dr. Jonker again voted with the Government, the Conservatives having left the Chamber before the division.

The Bill was given a third reading in the House of Assembly on April 27 after another U.P. amendment for a six-month postponement had been rejected by 72 votes to 39. The Senate gave the Bill a second reading on May 3 (after the rejection of a similar U.P. amendment by 59 votes to 10), and later the same week gave final approval to the Bill. (Cape Times - Die Burger)
(Prev. rep. 14805 A ; 14353 A.)

A. UNITED KINGDOM. — British Transport Commission Report for 1955. - Deficit of £30,600,000. - Second Instalment of Railway Modernization Plan. - Adoption of Overhead Alternating Current System. - Fare Increases in London Area.

The report and accounts of the British Transport Commission for the year 1955 were published on June 29 They showed that the Commission had earned a working surplus of £29,500,000 (compared with a surplus of £45,500,000 in 1954), but that this was offset by central charges (mainly interest on Transport Stock) of £55,500,000, and by the provision of £4,600,000 for capital redemption and other special charges. The resulting deficit of £30,600,000 was the largest incurred by the Commission since 1949. It compared with a deficit of £11,900,000 in 1954, and increased the Commission's accumulated deficit since nationalization to £70,000,000.

The report attributed the size of the accumulated deficit mainly to the persistence of inflation, coupled with the fact that the Commission's charges were closely controlled. This necessarily involved delays in obtaining sanction for increased charges to cover higher wages and costs, and prevented the Commission from providing any margin in these increases to cover future rises in costs. "It is now apparent," the report stated, "that the direct costs of inflation in money terms as far as British Railways and London Transport are concerned have been over £100,000,000 up to the end of 1955. The Commission . . . record their conviction that the financial position cannot be corrected by short-term expedients or quick savings, but only by arresting inflation and pursuing the economies of the railway modernization plan"

Of the net deficit of £30,600,000 for 1955, the report attributed £12,000,000 to loss of traffic resulting from the 17-day strike of footplate staff in May-June (see 14316 A); £8,000,000 to delays in obtaining sanction for increased charges, and £5,000,000 to increased costs since these charges were authorized. Another factor had been the control imposed on capital investment, which had had a very important effect on the railway section of the Corporation's finances and would "continue to depress its competitive powers for many years to come."

The Commission's gross receipts from its principal carrying activities amounted to £652,324,705 (compared with £656,263,239 in 1954), and its working expenses to £637,041,467 (against £624,477,460), leaving net traffic receipts of £15,283,238, compared with £31,785,779 in 1954. Of the total receipts, passenger traffic accounted for £252,600,000 (3.7 per cent up on 1954), freight for £391,300,000 (3.3 per cent down), and miscellaneous activities for £8,400,000 (6.2 per cent up).

Details were as follows:

	Gross Receipts	Working Expenses	Surplus (+) or Deficit (−) 1955	1954
	(£ million)			
British Railways				
Passengers .. 118.1				
Freight, Parcels, and Mails 316 2	440.0	437.8	+ 2.2	+16 6
Miscellaneous 5.7				
Railway Collection and Delivery Service	12.3	14.3	− 2.0	− 1.8
British Road Services (Road Haulage) .	55.7	51.4	+ 4 3	+ 8.7
Road Passenger Services (Provincial and Scottish)	54.7	49 3	+ 5.4	+ 5.0
London Transport				
Road Services . .	53.2	50.8	+ 2.4	+ 1 3
Railways .	21.0	19.8	+ 1.2	+ 1.0
Ships· Passenger and Cargo Services .	14 3	12 3	+ 2 0	+ 1.1
Inland Waterways .	1 0	1 1	− 0.1	− 0.08

The percentage of working expenses to gross receipts was as follows. railway passenger and freight services, 99.9, railway collection and delivery services, 116; road haulage services, 92; road passenger services (Provincial and Scottish), 90; London Transport road services, 96, London Transport railways, 94, ships, 86, inland waterways, 110.

Gross receipts from other important activities, including docks and waterways and hotels and catering, amounted to £46,300,000, or 6 7 per cent more than in 1954, increases having been shown under all heads in this section.

Salient points from the Commission's report are summarized below:

Passenger Traffic. Total passenger traffic handled by the Commission declined in 1955 by 1.5 per cent as compared with 1954, but London Transport road services fell by four per cent. In spite of the strike of British Railway locomotivemen (see 14316 A) railway passenger mileage fell during the year by only two per cent

Freight Traffic. Despite the increase in industrial production and in the volume of imports and exports, the decline in freight tonnage continued during 1955, a rise (in ton-miles) in mineral traffic having been more than offset by falls for merchandize, livestock, and coal. A futher "considerable transfer" of coal traffic from rail to road took place during the year.

Railway Development. The report stressed that although railway development had expanded during the year, early decisions were required on fundamental matters of technique and design before orders and improvement schemes could be put in hand. It was stated in this connexion that special technical panels had been given a long-term target for average train speeds on main lines of 75 m p h. for passenger expresses and 45 m p h for goods trains—i.e considerably higher speeds than in present practice

The report also stated that 3,728 all-steel passenger coaches were in service on main lines at Dec 31, 1955, compared with only 2,640 at Dec 31, 1954, and that 58,733 new freight vehicles had been brought into use during the year, the highest intake for over 30 years Altogether, the Commission had spent about £72,000,000 in 1955 on new vehicles (against £66,000,000 in 1954), and about £9,000,000 on additions and improvements (£10,000,000 in 1954).

Staff and Wages. The Commission's staff decreased by about 30,000 during 1955 to 801,000 at Dec 31, nearly half of the reduction taking place on British Railways. The report pointed out that wages and salaries represented about 60 per cent of total working expenses, a far higher proportion than in manufacturing industry The annual cost of pay increases and concessions granted or awarded during 1955 amounted to almost £30,000,000, while further increases estimated to cost about £30,000,000 a year had been granted early in 1956.

Capital Expenditure. Capital expenditure authorized at Dec 31, 1955, totalled about £205,000,000, and many orders for rail development had been placed since

General Sir Brian Robertson (the Commission's chairman), commenting on the report, gave a warning that the continuance of inflation meant that there was "now no hope of avoiding another deficit at the end of 1956." He maintained, however, that the modernization plan would eventually put the railways on a sound footing, although the need to spend capital without any immediate return would make the position temporarily even more difficult. Indeed, during the early years of the plan there must necessarily be some doubt whether the Commission would be able to comply strictly with its statutory duty to balance its accounts, taking one year with another; the financial review now in hand would show whether such doubts were justified, and if so, what action should be taken.

Referring to complaints in the report that the Commission had to meet competition from privately-owned transport "on unequal terms," Sir Brian pointed out that the freedom to compete promised to the Commission by the 1953 Transport Act had "still not been granted" Moreover, the new scheme of freight charges based on the actual cost of carriage was "still hanging fire before the tribunal," and there was little hope of seeing it carried into effect for at least another year.

Other developments in connexion with rail and road transport during recent months are summarized below:

Railway Modernization Plans. A programme of improvements and re-equipment to be carried out in 1956, together with a forecast of schemes likely to be started in 1957, was announced by the B.T.C. on April 12 It included (1) a start on a number of electrification schemes before the end of 1956, (2) the installation of modern colour-light signalling and track widening to speed up traffic; (3) reconstruction work or improvements at passenger and goods stations and at marshalling yards; (4) the expenditure of about £23,000,000 on diesel multiple-unit trains, and of about £26,000,000 on other passenger stock; (5) the building of 70,000 new freight wagons and the spending of £500,000 in 1957, and of probably about £3,000,000 in 1958, on fitting continuous vacuum brakes to goods vehicles. Details were as follows·

Electrification. The Shenfield-Chelmsford extension (see 14316 A) should be completed in June 1956, and the extension to Southend by January, 1957; a start would also be made in 1956 on electrifying the Eastern Region surburban lines from Liverpool Street (London) to Enfield, Chingford, Hertford, and Bishop's Stortford, at an estimated cost of £6,500,000. The Manchester-Crewe electrification (a pilot scheme for electrification of the London-Birmingham-Manchester-Liverpool lines) would also be put in hand during 1956, while preliminary work would also begin on the extension of the Southern Railway electrification between Gillingham-Maidstone-Sevenoaks and Sheerness, Margate, Ramsgate, Folkestone and Dover, and between Ashford and Hastings.

Track and Signalling. Improvements included (*a*) three new tunnels (estimated to cost £2,750,000) between New Barnet and Potter's Bar, to enable additional tracks to be laid and bottlenecks removed on the East Coast route to Scotland; (*b*) new track layout and modern colour-light signalling at Manchester (Victoria), and colour-light signalling and signal-box concentration schemes at other points

Passenger Railway Stations. Reconstruction or major improvement schemes at Cannon Street (London), Banbury, Barrow, Glasgow Central, Chichester, Weymouth, Forest Hill (London), and Plymouth (North Road), as well as a start on the provision of escalators and subways at the Bank Station, London (Waterloo and City railway) and a new station to serve Harlow New Town.

Goods Stations and Marshalling Yards. Major schemes included new marshalling yards at Perth, Edinburgh, Barking, and Margam; new goods stations at Crawley New Town and Peterborough; modernization schemes at Lincoln, Liverpool, Manchester, Chelmsford, Birmingham, and Welwyn Garden City; and additional facilities for iron-ore traffic at Glasgow and Motherwell.

Rolling-Stock Delivery of 174 main-line diesel locomotives would start in 1957, and during 1956-57 over 400 more diesel shunting engines would replace steam locomotives. Diesel trains were expected to be introduced on main line services such as Edinburgh-Glasgow, Birmingham-Swansea, and London-Hastings.

About 2,600 passenger carriages would be built during 1956 and 1,750 multiple-unit diesel vehicles during the next two years. All passenger carriages would be of steel except some multiple-unit coaches, which would be of light alloys. The modernization programme envisaged the replacement of all timber-bodied coaches within seven years.

Change-over to Alternating Current System. - Further Railway Electrification Schemes. On March 6 the B T C announced that it had decided to change over from direct current to alternating current traction supply in future electrification projects except in the Southern Region, where extensions would continue to use the third-rail system at 660 volts D C., since the conversion of existing lines to A.C. would be too costly.

Sir Brian Robertson explained that the A C system (under which current would be taken at 25,000 volts direct from the national grid and be carried by overhead wire) would be simpler, cheaper, and quicker to instal. Its adoption would make possible a saving of 27,000 tons of copper and 16,000 tons of steel, and a survey of the Euston-Liverpool-Manchester route to compare costs had shown estimates of £117,000,000 for A C and £123,000,000 for D C. The Commission hoped to have the Manchester-Crewe "pilot section" in operation by about January 1959

A scheme (to cost over £13,000,000) for the electrification of 71 miles of railway in the Clyde valley, thus providing Glasgow with its first electric surburban services, was announced by the B T C. on April 27. The first phase, linking Helensburgh and Airdrie through Glasgow with other suburban and district stations north of the Clyde, would be begun in about nine months, work on the second stage, radiating from Glasgow to stations south of the Clyde, was not expected to begin until the first stage was almost complete.

On June 6 it was announced that the electrification of the Crewe-Liverpool main line would be begun before the Crewe-Manchester electrification had been completed

Automatic Train Control. The Minister of Transport and Civil Aviation (Mr Harold Watkinson) stated in a written reply on May 3 that he had given qualified approval for the British Railways' system of automatic train control for use with vacuum brakes (see 12626 A). He explained that reliability tests on a specially equipped section of the East Coast main line had proved satisfactory, that the design of the component parts had reached a stage where production could be arranged, and that railway inspection officers were satisfied with the working of the equipment, subject to further reliability tests and to final inspection.

Railway Efficiency. The B T.C announced on April 16 that, with a view to increasing railway efficiency and productivity, and by agreement with the railway unions, a specialist advisory service in work study had been set up with Mr. E. J. Larkin, assistant mechanical and electrical engineer, London Midland Region, as director.

Railway Liveries. The adoption by British Railways of a maroon livery for all locomotive-hauled passenger stock, except for Southern Railway trains (which would keep the existing green) and for a few selected trains on the Western Region (which would be painted in the former Great Western chocolate-and-cream), was announced on April 19 Electric and diesel multiple-unit stock would be painted green in all regions

Increased Fares. Minimum fares were increased from 2d. to 2½d. on London Transport road services from Dec. 18, 1955, and on London Underground and British Railways' London lines from Jan 8, 1956. From the same dates increases varying from 1d. to 3d. were made in certain ordinary, early morning, and day return rail and bus fares in the London area, while some Green Line coach fares were also raised

On May 25, 1956, the B T C announced that it had applied to the Transport Tribunal for authority for further increases in fares in the London area and in early morning and certain day return fares and season-ticket rates on British Railways The proposed increases (to come into effect in the autumn or later) were as follows. *Early Morning Fares*—increases of 1d -3d (according to distance) in rail return fares and in single fares by London Transport road services. *Season Ticket Rates*—no increase up to four miles, but increases of 1s. a month thereafter up to five miles, 2s. a month up to six miles, and 3s. a month for seven miles and over, with proportionate increases for longer periods and for first-class seasons. *Day Return Fares*—an increase of 2d. on journeys of nine miles or more on British Railways in the London area. *Other Increases*—an increase of 1d. on ordinary fares of 1s. 5d. or over on London Transport and the London-Tilbury Southend line of British Railways No increases were made in other ordinary fares on British Railways.

The yield from the proposed increases (similar to those applied for in February, 1956, when the application, however, was withdrawn—see 14807 A) was put at £1,500,000 in a full year. Of this, about £700,000 would accrue to London Transport, equal to about one per cent of its present fare revenue.

Retention of Road Haulage Vehicles. Mr Boyd-Carpenter (then Minister of Transport) announced on Aug 18, 1955, that, on the recommendation of Sir Malcolm Trustram Eve (chairman of the Road Haulage Disposals Board), the Government had decided to leave with the B.T C. a total of 7,750 general haulage vehicles for the trunk haulage network of British Road Services, instead of only 2,350—the number specified for retention in the Transport Act.

B.R.S. Parcels Services. Tenders were invited on Oct. 25, 1955, for the purchase in one lot of the whole of the shares of B.R.S (Parcels) Ltd., which had been formed in 1954 to take over the parcels section of the B T.C 's road haulage undertaking The Commission announced on Jan 25, 1956. however, that no tenders had been received by the closing date, and on March 8 the Parliamentary Secretary to the Ministry of Transport and Civil Aviation (Mr Molson) stated that the Government had no intention of breaking up the Parcels Service, which they believed to be "giving an extremely valuable service to the country as a whole."

The appointment of Mr. J. W. Watkins, general manager of the London Midland Region of British Railways, as a full-time member of the British Transport Commission was announced by the Minister of Transport and Civil Aviation on May 29. (Times - Daily Telegraph - Manchester Guardian)

A. GREECE. — M. Shepilov's Visit to Athens. - Soviet Economic Aid offered to Greece.

Following his visits to Egypt, Syria, and the Lebanon (see 14959 A), the Soviet Foreign Minister, M. Shepilov, paid a three-day visit to Athens on June 28-30 for discussions with the Greek Prime Minister and Foreign Minister (respectively M. Karamanlis and M. Averoff) before returning to Moscow. Separeate statements on the discussions were issued by M. Averoff and M. Shepilov, but no joint communiqué.

M. Averoff said (i) that M. Shepilov had been informed that Greece desired to improve her relations with the U.S S.R., while remaining loyal to her existing alliances, (ii) that there was a mutual desire to extend trade exchanges between the two countries, this matter having been referred to technical committees for further study; (iii) that Greece had explained her views on the Cyprus question, as already put forward in the United Nations; and (iv) that the Greek leaders had complained to M. Shepilov of the difficulties created by "some of the Soviet Union's allies" in Greece's efforts to restore good neighbourly relations between them

M. Shepilov expressed the Soviet Government's desire to expand Greco-Soviet economic exchanges, and to provide technical and scientific assistance to Greece on terms which would not be prejudicial to her sovereign rights and national dignity He denied that the U.S.S.R wished to drive a wedge between Greece and the Western Powers; affirmed that there was no threat to Greece from the north; and described Greece's neighbours, Bulgaria and Albania, as peace-loving countries which desired good relations with Greece. He made no statement on Cyprus, but said that the Soviet Government had demonstrated its attitude towards this problem before the United Nations.

It was stated in Athens that M Karamanlis and M. Averoff had "politely but firmly" declined an invitation from M. Shepilov to visit the Soviet Union. M. Averoff said in his statement that such a visit could best be undertaken "when the pre-requisites have been established which would make it more constructive"

The Soviet newspaper *Pravda* said on July 9 that the U.S.S.R. was ready to give "sympathetic and disinterested consideration" to co-operating in the development of the Greek national economy, to the exchange of scientific and technical experience, and to the training of specialists, including student exchanges. (Times - Le Monde, Paris)

(Prev. rep. M. Shepilov, 14959 A.)

B. EASTERN GERMANY. — Relaxation of Restrictions on Travel to Western Germany.

The East German Minister of the Interior, Herr Karl Maron, announced on June 27 that travel restrictions between Eastern and Western Germany would be greatly relaxed; that the granting of permits to West Germans wishing to visit Eastern Germany and to East Germans who wanted to visit Western Germany would be facilitated; and that measures were being taken to speed up frontier controls on the inter-zonal border. On the same date the Deputy *Oberbürgermeister* of East Berlin, Herr Waldemar Schmidt, announced that most traffic controls between Eastern Germany and East Berlin would be ended on July 1, including Customs examinations and the need for special permits for motor travel. Herr Schmidt suggested at the same time that representatives of the city administrations in East and West Berlin should meet to discuss measures to relax tension between the Western and Eastern sectors of the city. (Neues Deutschland, East Berlin) **(Prev. rep. 13459 A.)**

C. UNITED NATIONS. — Security Council approves Moroccan and Tunisian Membership of U.N.

Applications by Morocco and Tunisia for membership of the United Nations were unanimously approved by the Security Council on July 20, in respect of Morocco, and on July 26 in respect of Tunisia. The U.N. General Assembly will vote on the applications at its 11th session in November next.

(U.N. Information Centre, London)

A. PERU. — Presidential Election. - Dr. Manuel Prado elected to Presidency. - Changes in Peruvian Cabinet. - The Iquitos Revolt.

Presidential elections were held in Peru on June 17, being contested by three candidates: Dr. Hernando de Lavalle (57), nominee of the *Partido Restaurador* (Restoration Party), an organization which pledged itself to continue the policies of the retiring President, General Manuel Odria, and which enjoyed the latter's support; Dr. Manuel Prado (67), candidate of the moderate conservative *Movimento Democratica Pradista*; and Dr. Fernando Belaunde (43), one of Peru's leading architects, who stood as a liberal and progressive candidate.

Of the three candidates, Dr. de Lavalle was a prominent lawyer, and adviser to many Peruvian banks and business corporations; Dr. Prado, also a lawyer by profession, had been President of Peru from 1939 to 1945, and was honorary president of the Inter-American Bar Association, and Dr. Belaunde was Dean of the School of Architecture at San Marcos University, Lima. Both Dr. de Lavalle and Dr. Prado were supported by important business, industrial, landowning, and newspaper interests, some of which supported the policies of President Odria while others were strongly opposed to them.

General Odria, after overthrowing President Bustamente in 1948 and seizing power by *coup d'état* (see 9623 C), had been elected President of Peru for a six-year term in 1950, at an election in which he was the only candidate (see 10922 C). Towards the end of 1955 President Odria had announced his intention of retiring from public life, and in the early months of 1956 had given repeated assurances that the presidential elections would be freely and fairly conducted and that no pressure would be brought against any of the political parties or candidates. Although President Odria expressed his support for the candidature of Dr. de Lavalle, no attempt was made by the Government to exercise pressure against the other candidates or to interfere with the electoral campaign. Accordingly, the presidential elections of 1956—the first free elections in Peru since 1945—were contested in a fair and democratic atmosphere, and passed off quietly. In addition to electing a new President, elections were also held for two Vice-Presidents and for a new Senate and House of Representatives, both of which had been enlarged (see 14628 E). Women voted for the first time in the presidential and congressional elections, having received the franchise under legislation passed by the Peruvian Congress in 1955 (see 14487 D).

An important role in the elections was played by the left-wing but anti-communist *Alianza Popular Revolucionaria Americana* (APRA), which, although officially proscribed for eight years, commands much support in Peru and claimed to have the support of a large section of the electorate. In view of the importance of the *Aprista* vote, both the *Partido Restaurador* and the "Pradistas" made strenous efforts to enlist the support of APRA, many of whose leaders were released from prison by President Odria and given a public amnesty. Following this amnesty, negotiations between President Odria and the *Apristas* were opened in April, as a result of which the APRA agreed to give conditional support to the President's nominee, Dr. de Lavalle, in the forthcoming presidential elections. Later, however, the *Apristas* withdrew their support from Dr. de Lavalle as a result of President Odria's refusal to legalize the APRA and to allow it to re-emerge as an independent political party. It appeared from the final figures (see below) that the bulk of the *Aprista* supporters had cast their votes either for Dr. Prado or for Dr. Belaunde.

Official results of the presidential elections, published in Lima on July 17, showed that they had been won by Dr. Manuel Prado, who polled 568,443 votes (46 per cent of the total) against 457,977 for Dr. Belaunde and 232,612 for Dr. de Lavalle. The total electorate numbered about 1,500,000, of whom some 500,000 were women. Dr. Prado formally assumed the presidential office on July 28, and will hold it for a six-year term.

A statement on his future policy was made by Dr. Prado on June 22, when preliminary returns indicated that he had won the presidential elections. With regard to the position of APRA, he announced that he intended to ask the new Congress, when it convened, to legalize the party, in which case there would be nothing to prevent Señor Raul Haya de le Torre, the *Aprista* leader, from returning to Peru from exile (see 13698 B). Dr. Prado emphasized, however, that he had made no "deals" with the *Alianza Popular Revolucionaria Americana*, and had promised no special benefits to that party except legalization.

As regards other aspects of his policy, Dr. Prado said that he would maintain the existing system of free currency exchange; stimulate private enterprise and pursue the country's industrialization, encourage foreign investment, including assistance from the World Bank and the U.S. Export-Import Bank; continue the campaign to abolish illiteracy among the Peruvian Indians; and make unused or government-owned land available to the Indian population so that they could become small landholders and peasant proprietors.

Cabinet Changes.

Mainly as a result of industrial unrest and a series of strikes, a number of changes in the Peruvian Cabinet were made in December last, and also after the presidential elections.

On Dec. 20, 1955, a general strike broke out at the port of Arequipa, where workers demonstrated for electoral reform, greater freedom of political activity, and an amnesty for political offenders. The demonstrations were particularly directed against the Minister of the Interior, Señor Esparza, whose resignation was demanded in view of the fact that he controlled public security and, thereby, political activity. Señor Esparza accordingly tendered his resignation on Dec. 24, on which date President Odria appointed a new Cabinet composed solely of members of the armed forces, whereas the former Cabinet had been recruited partly from the armed forces and partly from civilians.

Vice-Admiral Roque Saldias remained Prime Minister, and concurrently Minister of Finance and Commerce. The other portfolios were distributed as follows: Foreign Affairs, Rear-Admiral Luis Edgardo Llosa; Interior and Security, Colonel Agusto Villacorta; Justice, General Feliz Huaman; War, General Enrique Indacochea; Navy, Rear-Admiral Alfredo Souza Almandoz; Aviation, General Enrique Bernales; Public Works and Development, Lieut.-Colonel Roberto Dianderas; Education, General Juan Mendoza; Health, General Alberto Lopez; Labour and Indian Affairs, Colonel Augusto Romero Lovo; Agriculture, Colonel Carlos Siles Baroni.

Following disturbances at Lima and Callao on June 26-27, 1956, in which about 30 people were injured, President Odria imposed a state of siege (a form of martial law) for 30 days, and suspended certain constitutional guarantees during that period. The riots broke out after the Central Syndicate of Commercial Employees had called a general strike (on June 26) in support of about 400 employees of a U.S. petroleum company who had stopped work a week earlier because certain union officials had been dismissed. Port workers in Callao and building trade workers in Lima also went on strike for higher wages, while a student campaign against increased tram fares led to the burning of two buses and the stoning of public vehicles. A settlement of the labour disputes was reached on July 1, when conditions returned to normal.

Rear-Admiral Edgardo Llosa resigned from the Cabinet on June 27 on the ground that he had not been consulted or called to the Cabinet meeting at which it had been decided to impose the state of siege. The portfolio of Foreign Affairs was taken over *ad interim* by the Minister of Justice, General Hanuman, who retained his former portfolio.

On July 11 it was announced in Lima that Vice-Admiral Roque Saldias had tendered his resignation from the Premiership "for personal reasons," and that President Odria had appointed General Juan Mendoza as his successor *ad interim*. It was stated that General Mendoza would retain the portfolio of Education concurrently with the Premiership.

The Iquitos Revolt.

A revolt against the Government of President Odria broke out on Feb. 16 at the Amazonian river port of Iquitos, capital of Loreto province. It was headed by General Marcial Merina, commander of the Forest Division of the Peruvian Army, and a former Minister of Justice and Labour. [The Forest Division, which has its headquarters at Iquitos, is responsible for the defence of Peru's frontiers with Brazil, Ecuador, and Colombia, and is the principal military formation of the Peruvian Army east of the Andes]. Despite broadcast appeals by General Merina, the uprising was confined to Iquitos and all other parts of the country remained quiet. As a result, General Merina surrendered to the Government on Feb. 25 after having held Iquitos for ten days. No fighting occurred during the uprising, apart from a few rifle-shots at Government planes which flew over Iquitos.

General Merina, in a manifesto issued from Iquitos during the uprising, accused the Government of trying to transform the Army into an instrument which President Odria could use to "rig" the forthcoming elections. He called upon the Army to take over the administration for a short time and to provide the nation with an opportunity of going to the polls in "a democratic electoral process that would prevent *continuismo*"—i.e. the continuation of President Odria's policies through a hand-picked successor.

In a broadcast on March 3, President Odria alleged that the primary responsibility for the Iquitos uprising rested with Señor Pedro Beltran, publisher of the Lima paper *La Prensa*, whom he described as "the protagonist of the conflict" and "a politician trying to disguise himself as a journalist." The President said that right-wing elements, "spurred on" by Señor Beltran, had attempted to overthrow the Government, and that General Merina had been "deceived" by Señor Beltran and his supporters.

The Peruvian Government imposed a 30-day state of siege at the outbreak of the Iquitos revolt, and suspended *habeas corpus* and other constitutional guarantees. At the same time some 30 persons, including Señor Beltran, were arrested on charges of alleged complicity in the uprising. On March 14, however, all civil rights were restored and all the arrested persons released.—(New York Times - New York Herald Tribune - Le Monde, Paris - Bank of London and South America, Fortnightly Review) **(Prev. rep. President Odria, 9623 C; Presidential Election, 10922 C; Cabinet, 14484 B.)**

JULY 28—AUGUST 4, 1956.

A. EGYPT. — Suez Canal nationalized by Egyptian Government. - Expropriation of Suez Canal Company. - Strong British and French Protests to Egypt. - British, French, and U.S. Financial Measures against Egypt. - Tripartite Discussions in London. - Convening of 24-Power Conference on Proposed Internationalization of Suez Canal. - U.K. Ban on Export of War Material to Egypt. - British and French Naval and Military Precautions. - International Reactions to Suez Crisis.

In a speech at Alexandria on July 26, President Nasser announced (i) that the Egyptian Government had nationalized the Suez Canal Company and would use the income from the canal—about $100,000,000 (£36,000,000) a year—to build the Aswan Dam; (ii) that shareholders in the Suez Canal Company would be paid in accordance with the last closing prices on the Paris Bourse; and (iii) that all Suez Canal Company funds in Egypt had been "frozen." Describing the Suez Canal Company as an "exploiting" company and a "state within a state," President Nasser declared that it had been nationalized "in the name of the nation" and that all its assets and commitments would pass to the Egyptian State. "We shall build the High Dam," he declared, "on the skulls of 120,000 Egyptian workmen who died in building the Suez Canal. We shall industrialize Egypt and compete with the West. . . . With the revenue from the [Suez Canal] Company we shall not look to Britain and the U.S.A. for their $70,000,000 grant. . . . Egypt will build the Aswan Dam without pressure from any nation." In the course of a bitter attack on the Western Powers, Colonel Nasser said that there had been a "conspiracy" between the World Bank, Britain, and the U.S.A. to "trick" Egypt into building the dam and then to "impose conditions on Egypt affecting her independence and integrity."

The Nationalization Law.

A law nationalizing the Suez Canal Company, signed by Colonel Nasser in his capacity as President of Egypt, was issued in Cairo the same day, its text being as follows:

Art. 1. "The *Compagnie Universelle du Canal Maritime de Suez* shall be nationalized as an Egyptian company and transferred to the State with all its assets and commitments."

Art. 2. "The administration of navigational traffic on the Suez Canal shall be taken over by an independent body subject to the Minister of Trade, and the law on the composition of this body shall be issued by the President of the Republic That body shall have all necessary powers in administering navigation"

Art. 3. "The Company shall have an independent budget and begin its financial year on July 1. The first financial year begins on the date on which this law comes into operation and ends on June 30, 1957."

Art. 4. "The administering body shall keep all officials of the nationalized company, as well as its employees and workers. None of these may leave work or stop doing their duties for any reason whatsoever, except with the permission of the body referred to in Article 2."

Art. 5 dealt with the rights of company employees to pensions, etc

Art. 6. "This law shall be issued in the Official Gazette and shall have legal power from the date of issue.

At the same time President Nasser issued a decree on the formation of the administrative body for the Suez Canal, mentioned in Article 2 of the nationalization law. It laid down:

(1) The administrative body for the Suez Canal would consist of Mohammed Hilmi Bahgat Badawi, president; Mahmoud Younes, vice-president; and the following other members—Badawi Ibrahim Hammouda, Ibrahim Zaki; Magid Younes, Mohammed Tewfik Futkar; Burhan Said, Mohammed Ali el-Ghasib; Mohammed Ahmed Selim; Mahmoud Sami; Dr. Mustafa Hifnawi; and Dr Mohammed Abdel Baki Kosheri.

(2) The Minister of Trade would "implement the law and act upon it as from to-day."

Egyptian Allegations against Suez Canal Company.

The Egyptian Minister of Commerce and Industry (Dr. Abu Nosseir) issued a statement on July 27 accusing the Suez Canal Company of having "failed to comply with its obligations" to maintain the canal properly, and alleging *inter alia* that it had failed to provide Lake Timsah (at Ismailia) with a harbour suitable for the largest ships and that it had not equipped Port Said adequately to deal with transit trade. He declared that Egypt would not recognize the right of the U.N. Security Council or the International Court of Justice to intervene in the Suez Canal question, since the Company had been Egyptian since its inception and the matter was solely within the competence of the Egyptian courts. He also warned all members of the Company's staff in Egypt to remain at their posts, and said that those who left without permission would be liable to prison sentences of three to 15 years.

Statements by President Nasser.

President Nasser, on returning to Cairo from Alexandria on June 28, was enthusiastically acclaimed by hundreds of thousands of people as "leader" and "liberator," his return to the capital being the signal for mass demonstrations of strongly anti-Western character.

In a speech to the crowds Colonel Nasser said that Egypt would "meet force with force," that freedom of navigation would be maintained on the Suez Canal, and that Britain and France would be "held responsible for any damage or delay to freedom of shipping on the canal." After attacking Britain for "interfering" in Egyptian affairs, and saying that he would leave the Algerian rebels to "reply to France and give her a lesson," Colonel Nasser said that he could "not understand what all the fuss is about," since the canal would in any case have reverted to Egypt in 1968 He did not know on what basis Britain had lodged a protest (see below), as "the Suez Canal Company is an Egyptian company."

A statement by President Nasser, giving assurances that freedom of navigation on the Canal would be in no way affected by the nationalization of the Suez Canal Company, was circulated on July 31 to all diplomatic missions in Cairo. It was worded as follows:

"On July 26 the Suez Canal Company was nationalized. This exercise by the Egyptian Government of its rights has, however, given rise to some opposition from a few Governments, particularly those of France and Britain. Such opposition is devoid of all foundation. The Suez Canal Company has always been an Egyptian company, and, like all other Egyptian companies, liable to be nationalized. This nationalization does not in any way or to any extent affect Egypt's international commitments

"We are determined as ever to honour all our international obligations, and both the Convention of 1888 and the assurance concerning it given in the Anglo-Egyptian Agreement of 1954 will be fully maintained. Freedom of navigation on the Suez Canal is neither affected nor involved in any manner or to any degree. No-one could be more interested than Egypt in the freedom of passage through the canal.

"We are certain that traffic through the Canal will in the coming years justify all our hopes and those of the whole world. Egypt is confident of the righteousness of her stand. She will not be deflected from the course she has charted for herself, but will proceed in the service of her own interests and those of the world community of nations."

British Protest Note to Egypt.

A strong British protest was made to Egypt on July 27, in the following terms: "The Egyptian Government have promulgated a law purporting to nationalize the Suez Canal Company. . . . H.M. Government protest against this arbitrary action, which constitutes a serious threat to the freedom of navigation on a waterway of vital international importance. They reserve all their rights, and those of U.K. nationals, as sanctioned by the agreements in force. The responsibility for the consequences must rest entirely upon the Egyptian Government."

Cairo Radio announced the same evening that the Egyptian Government had refused to receive the British Note, on the ground that the nationalization of the Suez Canal Company "is an act coming within the prerogatives of Egypt's sovereignty because it is an Egyptian limited company subject to Egyptian laws." It was reiterated that the nationalization law "in no way affects, and is in no way intended to affect, the transit of shipping through the Suez Canal."

The British Note was sent after a day of intense political activity in London, during which Sir Anthony Eden made a statement to the House of Commons and held a Cabinet meeting which was attended by the Chiefs of Staff. In addition, the Prime Minister had discussions with Mr. Selwyn Lloyd, the Foreign Secretary, and Sir Walter Monckton, the Defence Minister; Mr. Selwyn Lloyd had meetings with the French Ambassador, M. Chauvel, and the U.S. Chargé d'Affaires, Mr. Foster; and a meeting was held between Sir Anthony Eden, Mr. Selwyn Lloyd, Lord Home (Commonwealth Relations Secretary), and all the Commonwealth High Commissioners in London.

Sir Anthony Eden's Statement to House of Commons.

In his statement to the House of Commons, Sir Anthony Eden announced that immediate consultations had been started with the U.S., French, and Commonwealth Governments, and promised that H.M. Government would act "with firmness and care" in the situation created by the Egyptian Government's unilateral and arbitrary action.
